In Syria he strengthened his authority by a close alliance with the fellow-tribesmen of his Kalba wife Maysūn [q. v.] and through them with the other tribes of Kaḏā'a and those from the Yemen; these groups formed the bulk of the Arab population of Syria. It was on these foundations that the hegemony exercised by Syria throughout the Umayyad period was built and consolidated. His policy towards Christians was a tolerant one. Lastly, he endeavoured to train his son Yazid to be an heir capable of continuing his traditions of government, by checking certain tendencies of his well-endowed but impetuous nature with its fondness for pleasure. Seeing his end approaching, he skillfully succeeded in getting Yazid recognised as his successor, first of all in Syria and then in other provinces. These difficult negotiations were the last of his political successes. Mu'awiya was now entering on the twentieth year of his caliphate, in 60 (Oct. 679) and probably was in the 80th year of a life which had been marked by constant success. By the year 3 or 4 — contrary to the assertion of Ibn Duraid (*Kiṣāb al-Jahāliyyah*, p. 256) — he must have reached manhood, for four years later he was secretary to the Prophet. In the course of the forty years of his public career, no serious check ever interrupted his progress. After the abdication of Ḥasan b. 'Alī, he had "reigned without a rival, without losing any of the conquests of Islām. Neither 'Abd al-Malik, nor Mansūr, nor Ḥārūn al-Rashid earned this praise, unique in the annals of Islām" (Ḍahabī). He died at Damascus in the month of Rajab of the year 60 (April 680) and was buried in the cemetery of Rāb al-Saḡhir where his tomb still survives. Before his death he entrusted the regency to Ḍahhāk b. Kaīs and to Muslim b. 'Ukba until Yazid should return from Anatolia. Companion and secretary of the Prophet, brother of Umm Ḥabiba [q. v.], "the mother of the believers", these claims have not preserved him from the hatred of the Shi'is and the official maledictions pronounced by certain 'Abbāsid caliphs. More tolerant to his memory than to that of his son Yazid, orthodoxy generally agrees to recognise his right to the respect which is due to the Ṣaḥābū. The Syrians long cherished the memory of his glorious reign and even beyond the bounds of Syria he had partisans among the Ḥanbalis, called *ḡaṣṣāt*, the enthusiasts for Mu'awiya.

II. Mu'awiya's policy. In the historical and anecdotal literature of the Arabs there are few collections which do not devote a paragraph to Mu'awiya's "wise mildness and complete self-control" (Wellhausen), qualities which the Arabs include under the term *ḥilm*. By this supreme virtue they claim to recognise the true statesman. The Sufyānid sovereign is said to have owed the great success of his career to it. "Mu'awiya's *ḥilm*" thus became proverbial. A somewhat mixed virtue, essentially opportunist in character, it may be combined with astuteness, or the less scrupulous forms of diplomacy. In our hero this quality has been found even in the most difficult trials inflicted on his amour-propre. His smiling imperturbability was able to disarm the proudest of his adversaries, who were then completely won over by his generosity. With the golden chains of pensions

and rich gifts the ruler was able to hold in leash his most intractable enemies. When his friends expressed surprise at the vastness of certain donations, he would reply "a war costs infinitely more". This was his favourite method of dealing with the 'Alids and Hashimids. He has been unjustly accused of having introduced the custom of publicly cursing the name of 'Ali from the pulpit of the mosque. There is no certain evidence of this practice before the time of the Marwānids.

The collateral branches of the Umayyad family supplied him with distinguished assistants. He was careful not to bring the more ambitious of them too much to the front or to leave them too long in one office. He was studious to inculcate into all his relations the feeling that they must stand by one another and that this consisted in the blind execution of his orders. The Umayyads formed his natural supporters. He could not do without them. But the unsettled problem, of the dynastic succession made him distrustful of relatives called upon to share the responsibilities of power. He did not fail to keep a close watch over them. With men like Ibn 'Amir, Sa'id b. al-'As, Marwān b. al-Hakam [q.v.], of remarkable gifts and considerable influence, who did not conceal their aspirations, he came to terms in a way that effectually discouraged them from following the dictates of their ambitions. As to the sons of the Caliph 'Othmān, they seemed to him too insignificant to cause him any disquiet. On the other hand, Marwān and Sa'id were appointed to succeed one another at about regular intervals in the government of the Hijāz, the cradle of Islām and of the ruling family. Mu'awiya was unwilling to give them time to create in such an important centre a position for themselves and connections which might have compromised the future of the dynasty. Ultimately he decided to replace these two relatives by a nephew of his own, now almost grown up, the Sufyānid Walid b. 'Uthba [q.v.]. In the important governorship of the 'Irāk, which controlled the eastern provinces, Mu'awiya showed his preference for Thakafi officials, Mughira, Ziyād and the latter's son 'Ubad Allāh. He appreciated the devotion of these men, who came from the shrewd society in Tā'if, suspected by the other Umayyad families, compelled to rely on their sovereign, the author of their fortunes. For a moment, the extraordinary promotion of Ziyād and the confidence the Caliph showed in him, suggested that he had him in view as his successor. In this attitude to his relatives, the interests of the dynasty superseded all other considerations. The heir presumptive was young. Mu'awiya wanted to save his Umayyad cousins from the temptation to set up as rivals of his successor. The first step was to do Yazid rather a bad turn. If, instead of the inexperienced Walid, Mu'awiya had retained or restored for another period of office in the governorship of the Hijāz the energetic Marwān, there is no reason to think that this would not have turned the incantations Husain from the hopeless exploit of Karbala'.

In the traditional view Mu'awiya appears as the perfect type of Arab ruler. When writers, jurists, encyclopaedists and compilers of anthologies have to quote a trait or a saying illustrating kingship, or the conduct of states, they rarely hesitate to credit it to our hero. This unanimity which reflects so much to his credit has been transformed

into censure by orthodoxy. Mu'awiya is reproached with having transformed the *khilāfa*, the vicariate of the Prophet, into *mulk*, into a temporal sovereignty, with having, if we may use the term, secularized the supreme power, really a purely lay one, in the heart of Islām. This criticism is an attempt to throw odium on Mu'awiya while in reality it calls attention to his great merit. In him the ruler, "the king", i.e. the organizer and administrator, appear very distinctly while they are difficult to find in his predecessors, painfully fighting against the outbursts of Beduin anarchy. This transformation of the patriarchal power had begun with 'Omar who was the first to realise the necessity for it and attempted to realize it. Mu'awiya endeavoured to hasten its evolution towards more effective centralization, an extension of the powers and personal authority of the sovereign. To secure for the latter the advantages of external pomp, the prestige given by formalities, he gave more ceremony to the hitherto democratic appearance of the caliph at the Friday services. He appeared in the *minbar* or pulpit, surrounded by a *sharfa* or guard — 'Ali had already had one — and remained seated while delivering his address, the *khutba*. Some have thought to see in this attitude a sign of pride. This is to forget the primitive nature of the *minbar* as the seat of the ruler, the sovereign's throne, before it became of liturgical significance as the pulpit of the mosque, after the latter had become a building for religious worship. This charge of *mulk* was also intended to render suspect the sincerity of the faith of the Sufyānid monarch. But austerity characterised his morals and private life. He was a good father and a devoted husband. We find him conscientiously performing his religious duties and dying at length a good Muslim.

The chroniclers unanimously find in the complex character of Mu'awiya another trait besides *him*: political finesse, what the Arabs call *dākīya*. To be credited with this it was necessary to have in addition to diplomatic skill, a remarkable gift of eloquence, force of decision, a resourceful nature and a conscience broad enough not to shrink from the use of trickery. Mu'awiya was reckoned among the five best Kuraish orators of his time. He was fond of saying "I have won more success with the tongue than Ziyād (b. Abih) with the sword". Arab writers prefer to attribute these successes to the Machiavellian nature of the sovereign. He is said never to have shrunk from recourse to violence or the use of poison when he wished to get rid of troublesome adversaries. To support this charge the cases of 'Abd al-Rahmān b. Khālā, Hasan b. 'Ali and Ashtar b. Malik [q.v.] are quoted. But each of the examples is capable of a more natural explanation. We would readily put Mu'awiya in the category of those statesmen to whom useless crime is naturally repugnant, too wise to allow themselves to be tempted by violent solutions but not scrupulous enough to hesitate in such an extremity, if reasons of state seemed to advise it. One of his successors, 'Abd al-Malik, called him "the cunning (*mu'āṣin*) caliph". The pleasure-loving son of 'Ali, ruined by his easy life, forgotten and retired to Medina, did not deserve to be feared. The two other individuals above mentioned died by accident or were victims of private vengeance.

The poets, the "journalists" of the period, had an undoubted influence on their contemporaries. This influence the sovereign succeeded in controlling

and subjecting to dynastic interests. Himself very susceptible to the charms of verse, he would have liked to see poetry confine itself to developing patriotism, and renouncing satire which was a source of dissension among the tribes. The restorer of *ḡamā'a*, national unity, felt more than anyone the necessity for this concord to heal the wounds caused by anarchy. Powerless to prevent the incursions of poets into the field of politics he endeavoured to win them over to his side by gifts and the use of tact. To win them over was to have "a good press", and at the same time gain their tribes to the cause of order, for the tribes usually agreed with the ideas spread by their bards. He exploited his son Yazīd's relations and friendships with the poets to compromise them in favour of the Umayyads and make them less amenable to the advances of the reactionary parties. He paid for their panegyrics; he took them under his protection whenever their lack of discipline brought them into trouble with the local authorities. He did not hesitate to shut his eyes to some of their poetical outbursts, which seem to compromise the reputation of his own hearth; under the 'Abbāsids such audacity would have meant death. He further left it to these indiscreet auxiliaries to deal with abuses by officials and found in them a useful check on arbitrary exercise of authority by his lieutenants. It was at the same time a satisfaction of their amour-propre, allowed to the vanity of these rhapsodists, who were courted by all parties and intoxicated by the terror which their wit inspired. In return for this toleration, he was able to get less disinterested services from them. He imposed on them the duty of preparing public opinion in favour of the *ba'a*, the recognition, of Yazīd as heir-apparent. To accustom the Arabs to this step so repulsive to their democratic instincts, to give the caliph leisure to calculate its chances of success, there was nothing so useful as the intervention of these heralds with their echoing phrases. It enabled the government to remain discreetly in the background, ready to come out at the opportune moment.

The biased Mas'ūdi himself cannot help admitting the pliant ease of Mu'awiya's policy, "his great generosity to his subjects and the benefits which he heaped upon them; winning their sympathy and seducing their hearts with such skill that they put him before their kinsmen and natural affections". Firmness in administration, skill in managing men according to their rank, cordiality, these are some of the qualities credited by this historian, the friend of 'Alī, to the successful rival of Fātima's husband.

Let us now deal with the charges brought against him by orthodoxy. With the object of making them more readily accepted, the indictment is carefully put in the mouth of the austere Ḥasan al-Baṣrī. "Mu'awiya committed four crimes — one of them alone would suffice to cover him with dishonour — : he abandoned the nation to men of no repute, deprived it without consulting it (by the *ba'a* of Yazīd) of the control of its destinies and that in the life-time (i.e. to the detriment) of numerous Companions and virtuous individuals. He chose as his successor an incorrigible drunkard, robed in silk and playing the harp. He adopted Ziyād. Lastly he condemned Ḥudayr b. 'Adī (q.v.) to death". The impartial historian will have little difficulty in clearing the sovereign from these charges, which reveal his political flair, his instinct for rulership which raised him high above the

prejudices of his contemporaries. The measures for which he is blamed secured the caliphate twenty years of peace and prosperity, the longest period it ever knew.

To sum up, Mu'awiya appears in the series of Muslim rulers as one of the most attractive individuals and one of all round ability. In him the Arabs see the very incarnation of sovereignty. In the opinion of Mas'ūdi his successors at best could only try to copy him without being able to equal him. In spite of their little liking for the able Sufyānid, the Marwānids frequently appealed to his traditions and the methods of government inaugurated by him. He was, beyond doubt, the least oriental and the most modern of the rulers of Islam. He did not disdain public opinion. One must be grateful to him for not having believed in the power of force alone in the management of men, for not having sought to reestablish, as the 'Abbāsids were to do, the old Asiatic autocracies, for having preferred that his subjects should become voluntarily attached to him by winning their sympathies, for proclaiming that "the world is more surely led by the tongue than by the sword". This conviction led him to adopt several institutions of Beduin democracy — such as the *wafūd*, deputations from the provinces and the principal tribes — to consult the views of such assemblies on as many occasions as possible, to associate them openly with public business by recognising their right of remonstrance. The astuteness of the sovereign knew how to direct these manifestations of the old individualism of the nomads and to bring them to cooperate with his designs. To quote the comparison of the Byzantine historians, he appeared as a *πρωτοβουλός* in the midst of his *ἐκκλησίαι*; in the deliberations of his Syrian parliament, he posed as *primus inter pares*. He was gradually able to advance the political education of his subjects and to control the signs of lack of discipline. He was never perturbed by their criticisms nor by the satires of the poets. "I do not trouble" he said "about words so long as they do not lead to deeds". These liberal principles became restricted under the Marwānids and disappeared with the coming of power of the absolute monarchy of the 'Abbāsids.

As is frequently the case with men who have grown old in politics, a long period of power — he exercised it without interruption for 40 years — had made him a sceptic. This benevolent scepticism was revealed in a knowing smile when, with eyes half closed, he used to listen without missing a word to the petitions and recriminations of his visitors and pretended to be taken in by their customary excesses. From his youth, passed in the cosmopolitan city of Mecca, then in Medina in the very mixed society of the Companions, he had been in too close contact with his contemporaries to be under any illusions about their disinterestedness. He had not to invent, but no one managed better than he, that instrument of government, the *ta'rif al-ḡulūb*, the rallying of hearts, an ingenious euphemism of the Qur'an, meaning the art of purchasing hesitating adherents. Other caliphs surpassed him in courage, in outward austerity, *zuhd*, in love of knowledge and other qualities that dazzle the eyes of the multitude. No one possessed to such a degree as Mu'awiya the gifts of the founder of an empire: vision,

energy and promptitude in action, breadth of view, logical thinking, absence of antiquated prejudices, skill in adapting the prestige and ceremonial of his position to Arab taste, ability to use men and to deal tactfully with their prejudices so as not to offend them directly. This rare combination of qualities enabled him to extract order out of the chaos of Beduin anarchy. If we endeavour to appreciate fairly Mu'awiya's work with its inevitable deficiencies, one must take into account the intractable material on which he had to work and the resistance opposed by the inveterate individualism of the nomads. He succeeded not only in disciplining them but also in transforming them into conquerors, able to rule over peoples of superior culture, heirs to the oldest civilisations.

For achieving this result, the son of Muḥammad's old opponent has deserved well of Islām. In the list of those responsible for this great revolution his name should come after that of the Prophet beside the name of the caliph 'Omar. Orthodox tradition likes to exalt the latter and present him as the second founder of Islām. Of European writers, Sprenger and von Kremer have popularised this view. In it we may recognise the reply of the schools of the Hīdžāz to the 'Irāk legend woven round the memory of 'Alī. To their work we owe the fantastic proportions assumed by the personality of 'Omar; it absorbs not only Abū Bakr, but even throws its shadow upon the Prophet. 'Omar is brought into the origin of all religious and administrative institutions, especially of all those that cannot decently be credited to the author of the Qur'ān. This exaggerated admiration of the Hīdžāz was to provoke the protestations of the 'Abbāsids. The counterblast of Shī'a tradition was to place 'Alī alongside of 'Omar to direct him and if necessary to correct him. The indisputable merits of the second caliph lie elsewhere. In the midst of the terrible confusion that resulted from the conquests he was able to maintain the unity and cohesion of the empire, immeasurably enlarged, to bring the Arabs intoxicated with success under comparative control. Closely watched, harassed by the selfish claims of his Medinese senate and its disturbing element formed by the redoubtable group of the "ten *anṣar al-ghara'*" or "the chosen" and the oldest friends of the Master, he succeeded in neutralising their restless activities, their dire passion for intriguing and in exploiting their greed and mutual jealousies. In the provinces the generals and governors showed an obedience scarcely less intermittent. 'Omar had frequently to resign himself to approving by *sanatio in radice* in order not to lose touch with such undisciplined auxiliaries and to remind all of the existence of the vicariate of the Prophet. The day on which he thought of a more effective centralization, of a less ideal systematization, assassination brutally delivered him from his error. The same fate was to overtake 'Othmān, when under pressure from the Umayyads, he took up his predecessor's programme where it had been interrupted. With 'Alī the caliphate relapsed into chaos and lost a quarter of a century of progress on the way to reorganization. One province alone formed an exception, Syria, which had been governed since its creation by the Umayyads.

But for the intervention of Mu'awiya and his able lieutenants, the 'Amrs, Ziyāds and Marwāns, the Muslim empire would have been transformed — like the 'Irāk and Kijūrkān — into an arena

to which the Arabs came to settle their petty tribal quarrels. Once on the throne, the Sufyānid worked to extend gradually to the rest of the caliphate the methods of government which had secured the prosperity of Syria. Encouraged by the results obtained in this country, he set himself to discipline the other Beduins who, according to the idea ascribed to 'Omar, formed the "substance of Islām". From this *rudis indigestaque moles*, this rebellious mass, gradually broken in by the influence of Syria, fashioned by teachers trained in his school, the first Syrian caliph recruited soldiers, then formed from them the cadres of a regular army: wonderful troops always ready to play their double part, the *ghihād* abroad, and at home the maintenance, against any threat from within, of the *ḥumū'a*, the unity of the empire. Mu'awiya succeeded in impressing on these descendants of caravan-leaders of Arabia, nomads, all obstinate landmen, the importance of the mastery of the seas. Arab thalassocracy dates from this period. Forced to use primitive institutions, the *sunna*, tradition, sanctioned by the Prophet and the Medina caliphs, he endeavoured to turn them to the needs of a great empire. He managed at least to suppress the anarchical working of the *shūrā* by regulating the dynastic succession. He organised the finances; he began by revising and reducing the enormous pensions granted by preceding governments without regard to services rendered to the state. Down to his time the central treasury of the caliphate had been supplied by intermittent and always unwilling contributions extorted from the provinces. Mu'awiya endeavoured to settle the amount to be paid by each province and to regularise its collection. Under him the treasury ceased to be a relief fund which the conquerors claimed to use as they pleased. His predecessors had had to empty it periodically to secure assistance or neutrality important for the success of their policy. Hitherto *"māl al-muslimin"*, the collective property of the Muslims, the treasury now became *māl Allāh*, the treasury of the state, intended to cover general expenses, to secure the representation and the defence of the empire. These reforms made Mu'awiya the first sovereign, *malik*, of Islām, the first ruler to enjoy a definite authority, independent, unlike his predecessors, of the anarchic good-will of his subjects, and no longer at the mercy of an oligarchy interested in the maintenance of old abuses. The Medinese vicariate which developed from the triumvirate, could not long survive this coup d'état, this drastic solution of the problem of the succession to the Prophet. Before Mu'awiya, the caliphate had only had a nominal existence. For this signment, the son of Abū Sufyān substituted a reality; he created the Arab state: a creation seen darkly by 'Omar without having been brought to realisation.

MU'AWIYA B. 'UBAID ALLĀH. [See ARB. 'UBAID ALLĀH.]

AL-MU'AWWIDHATĀN, name of *sūras* cxlii. and cxliii, taken from the opening words: "Say, I take refuge with . . .". The term *al-mu'awwidhāt* occurs also; it denotes these *sūras* together with *sūra* cxii. — The *mu'awwidhāt* belong to those parts of the *Kur'ān* which are frequently recited (after every *ṣalāt*: Ahmad b. Ḥanbal, *Musnad*, iv. 135; before going to sleep: Bukhārī, *Da'awāt*, bāb 12; in order to avert the evil eye: Lane, *Manners and Customs of the Modern Egyptians*, Paisley and London 1899, p. 259, chapter Superstitions).

AL-MU'AZZAM. [See **TURĀN SHĀH**.]

AL-MALIK AL-MU'AZZAM SHARAF AL-DĪN 'ISĀ b. **MALIK AL-'ADIL** b. **AIYUB** was born in 576 (1180). In 597 (1200) he became governor for his father al-Malik al-'Adil [q. v.] in Damascus and next year was besieged by Saladin's sons Zāhir and Afdāl in course of the dispute about the succession between them and 'Adil. 'Adil came as far as Nablus with his army but could not relieve Damascus so that its fall was imminent. Then a quarrel broke out between the brothers as to who was to get Damascus. The majority of the emirs in the army made peace with 'Adil and the siege was raised in the course of the year. 'Adil was recognised as the head of the Aiyūbids and 'Isā continued to govern Damascus and the lands going with it as far as the Egyptian frontier for his father. When 'Adil died in 615 (1216) he had the inhabitants swear fealty to him but recognised his older brother Kāmil as suzerain in the Friday *ḡuṭba*. He was, like his brothers, on fairly good terms with the Crusaders, but at the decisive moment he joined forces with his brothers against them and it is not least due to him, as the most important Aiyūbid leader of the period, that the Crusaders had to withdraw from Damietta in 618 (1221). His desire to seize central Syria (Hims and Hamāt) was not fulfilled as Kāmil threatened him with war when he attacked these towns. 'Isā therefore made an alliance in 623 (1226) with the Khawārim-Shāh Djalāl al-Dīn and mentioned him as suzerain in the Friday prayer instead of his brother. He thus felt strong enough to turn away the Emperor Frederick II's ambassador in this year while Kāmil, who did not feel too secure, negotiated with him. It did not however come to fighting between the two brothers as both feared the intervention of Frederick II. But before the latter set out for the Holy Land, 'Isā died on 1st Dhū l-Hijja 624 (Nov. 12, 1227) in Damascus of dysentery. Had he lived longer, Frederick II would probably not have taken Jerusalem. It was 'Isā's son Nāṣir al-Dīn Dawūd who succeeded in regaining Jerusalem for the Muslims. 'Isā's rule stretched from south of Hims beyond Jerusalem to al-Arish on the Egyptian frontier. In addition to his military ability, he is celebrated as a friend of poetry and letters and he is also said to have been an author himself. Unlike the other Aiyūbids, he followed the school of Abū Ḥanifa.

MUBĀH. [See **SHARFĀ**.]

MUBAIYIDA. [See **AL-MU'ANNA**.]

MUBALLIGH. [See **MASJID**, I, D, e and H, 4.]

MUBĀRAK GHĀZĪ, an Indian saint. In all parts of the Sundarbun, the Muhammadan woodcutters invoke certain mythical beings to protect them from tigers and crocodiles. In the 24 Parganas it is Mubārak Ghāzī who, in the Eastern parts of the Delta goes by the name of Zindah Ghāzī, the living warrior. Mubārak Ghāzī is said to have been a *faḡīr* (mendicant) who reclaimed the jungle tracts along the left bank of the river Hoogly. Every village has an altar dedicated to him and no one enters the forest nor do any of the boat's crew, who might sail through the districts, pass without first making offerings at one of these shrines. The *faḡīrs* in these dangerous forests, who claim to be lineally descended from the Ghāzī, indicate with pieces of wood called *jang* the precise limits within which the forest has to be felled. Mubārak Ghāzī, so the legend goes, came to Bengal when Rājā Matak ruled over the Sundarbun. The saint happened to have a dispute with the chief, who thought himself to be in the right, upon which the latter agreed to give his only daughter Shubhila in marriage to the former, should his own opinion be proved wrong. This the Ghāzī succeeded in doing and won his bride in consequence. Since no man saw him die, he is believed to reside in the depths of the forest, to ride about on tigers, and to keep them so obedient to his will that they dare not touch a human being without his express desire. Before entering a jungle or sailing through the narrow channels whose shady banks are infested by tigers, boatmen and woodcutters, both Hindus and Muhammadans, raise little mounds of earth and on them make offerings of rice, plantains, and sweetmeats to Mubārak Ghāzī, after which they fearlessly cut the brushwood and linger in the most dangerous spots.

This strange myth, there cannot be any doubt, is borrowed from Hindus to suit the taste of the superstitious boatmen and woodcutters.

Bibliography: Ward, *Hindus*, iii. 186; Major R. Smyth, *Statistical and Geographical Report of the twenty-four Pargannah Districts*, 1857. (M. HIDAYAT HOSSAIN)

MUBĀRAK SHĀH, MU'IZZ AL-DĪN, the second king of the Salyid dynasty of Dihli, was the son of Khidr Khān, the first king, and succeeded his father on May 22, 1421. The limits of his kingdom were then restricted to a few districts of Hindustān proper and Multān, and he was obliged to desist from an attempt to establish his authority in the Panjāb by the necessity for relieving Gwalior, menaced by Hūshang of Mālwa, who raised the siege and met him, but after an indecisive action came to terms and retired to Mālwa. From 1425 to 1427 he was engaged in attempting to restore order in Mewāt, and received the formal submission of the rājās of Gwalior and Candwār (Firūzbād), but Muhammad Khān Awḡadī of Bayāna, whom he had taken prisoner, escaped and took refuge in Mewāt, and the work there was to do again. Muhammad Awḡadī, on being hard pressed in Bayāna, fled to Ibrāhīm Shāh of Džawnpūr, and as the latter marched against Kalpi, Mubārak marched to meet him. Ibrāhīm, who had been plundering Mubārak's dominions, avoided a conflict for some time, but on April 2, 1428, the armies met near Candwār and Ibrāhīm, though not decisively defeated, retired

the next day to Džawnpūr. Mubārak then collected revenue in the neighbourhood of Gwalior and retired by way of Bayāna, which was evacuated by Muḥammad Awhādī, who had returned thither. For the rest of the year his officers were engaged in restoring order in the Panḍjāb, ravaged by Džurath the Khokar, and he in a similar task in Mewāt, and in collecting revenue by force. In 1430 Fūlad Turkbāda successfully defied the royal authority in Rhatinda, and in 1431 a rebellion broke out in Multān and had no sooner been suppressed than Džurath renewed his activity in the Panḍjāb. The chronicle of the rest of the reign is a record of rebellions in the Panḍjāb, Multān, Sīmāna, Mewāt, Bayāna, Gwalior, Tiddjāra and Itāwa, and a rebel captured Lāhor and attacked Dīpāl-pūr. Lāhor was eventually recovered, but the whole country remained in a disturbed condition.

War broke out between Ibrāhīm of Džawnpūr and Hūshang of Māwa in connection with Kāipī, the suzerainty over which belonged to neither and was claimed by both, and Mubārak, marching thither, turned aside to inspect Mubārakshāh which he was building, and then, on February 19, 1434, he was assassinated at the instance of Sarwar al-Mulk, whom he had dismissed from the post of minister in the preceding year.

MUBĀRIR AL-DĪN. [MUHAMMAD B. AL-MU-
SAFFAZ.]

AL-MUBARRAD, ABŪ 'L-'ABBĀS MUHAMMAD B. YAẒĪD AL-THUMĀLĪ AL-AZDĪ, an Arab philologist, born on the 10th Dhu 'l-Hijja 210 (March 25, 826) in Baḡra, was there taught by Abū 'Omar al-Djarrī, Abū 'Othmān al-Māzīnī and Abū Ḥatīm al-Sidīqī, the pupil of Aḡa'ī. In his early works, the *Kitāb Maṣā'il al-Qaṣa'id*, he criticised the *Kitāb al-Sibawayh*, but only a small number of his criticisms were well founded and of these only a minority were original (al-Suyūṭī, *al-Mushir*, ii. 188; iii. 232). Later he went to Baghdād where he became a very busy teacher; among his pupils were Niftawāh, Ibn Durastawāh and Ibn Kaṣṣān. His rival for favour at court was the Kūfian Thā'lab, to whom he was far superior in ability and style; the rivalry between these two scholars seems to have been the origin of the later tradition of the opposition between the schools of Kūfa and Baghdād. His epithet al-Mubarrad seems to refer to his skill in disputation, but there are a number of anecdotes explaining it in very different ways (*Mushir*, ii. 267, 271, 272; *Bughyā*, p. 116—117; *Iṣṭihād*, vii. 137, 138, 139). He died in Baghdād in Shawwāl or Dhu 'l-Ka'da 285 (Oct. 898).

His chief work *al-Kāmil fī 'l-Adab* is a typical example of the work of the old philologists as developed from their teaching. Without being tied down to any fixed arrangement or even aiming at cohesion in the separate chapters, it combines traditions of the Prophet, sayings of pious men, proverbs, many poems mostly of the older period, and also historical matter like the important chapter

on the Khāridjīs (characteristic is the passage on p. 409 in Wright's edition: "In this chapter we shall mention something of everything in order by change to prevent the reader from being wearied and mix a little jest with the earnest so that heart and soul may be recuperated"; similarly p. 428; exceptions like the chapters on simile p. 447 or on lamenta for the dead and consolation p. 713 are rare). The important feature is the full grammatical and lexicographical commentary which he gives to every quotation. The work was given its final form with numerous additions and glosses by Abū 'l-Ḥasan al-Akhfash (d. 315 = 927). Al-Baḡalyūsī wrote a commentary on it which has not survived (*Mushir*, i. 182, 8; 223, 3); there is an anonymous commentary in the possession of Imā'il Efendi in Stambul. It was first printed in Stambul in 1286; editions: *The Kāmil of El-Mubarrad* edited for the German Oriental Society by W. Wright, part 1-12, Leipzig 1864—1892; reprinted Cairo 1308, 1323, 1324 (with extracts from Dīhājī on the margin), 1339; with two modern commentaries: *Tuhfat al-Kāmil* by al-Sibā'ī al-Baḡyūnī, Cairo 1341 (1923), 2 vols. and *Raghat al-'Amīl min Kitāb al-Kāmil* by Saiyid Ibn 'Alī al-Marāṣī (professor at al-Azhar), 8 vols., Cairo 345—346 (1927—1928); *Das Khari-dschitenkapitel aus dem K.*, transl. into German by O. Rescher, Stuttgart 1922. His second collection of material, the *Kitāb al-Muṭlaḡad*, met with less success, because, it is said, it had been transmitted by the heretic Ibn al-Rāwandī; it is preserved with a commentary by Sa'id b. Sa'id al-Fārīqī (d. 391 = 1000; see Vākūf, *Iṣṭihād*, iv. 240) in the Escorial manuscript², p. 111 and in Stambul, Köprülü, No. 1507—1508 (cf. Rescher, in *Z.D.M.G.*, lxxv. 197; photograph in Cairo; *Fikrī*, ii. 123). Of his numerous other works given by his biographers we only have the *Kitāb al-Tawāṭ*, Escorial², p. 534, 1; the *Kitāb Naraḥ 'Adnān wa-Kaṣṭān*, in Stambul 'Ārif Efendi, 2003 (*M.F.O.B.*, v. 491) = Well al-Dīn, 3178 (*M.F.O.B.*, vii. 108), Escorial, Casiri 1700, fol. 59^v—68^v (s. Levi Della Vida, *Les livres des chevaux*, Leyden 1928, p. xiii), his answer to a letter from Ahmad b. Wāḥid on the question whether poetry is superior to eloquence, in Munich 791 and in a fragment in Berlin, Ahlw. 7177 as well as the *Kitāb al-Muṭlaḡad wa 'l-Mu'annath* as transmitted by Abū 'Alī al-Fārīqī, in Damascus, Zāyāt, p. 36, No. 113, 2. His other works are only known from quotations, e.g. his *Kitāb al-Iḥṭiyār*, which he himself quotes *Kāmil*, p. 760, 4, the *Kitāb Ghārīb al-Hādīth*, which Ibn al-Aṭhīr mentions among his sources in the preface to the *Nihāya*; the *Kitāb ma 'aṣṣaḥa Lafuḥu wa 'lḥatalaḥ Ma'nāhu* (Suyūṭī, *Sharḥ al-Mughnī*, Cairo 1322, p. 195, 20); the *Kitāb al-Rawḍa*, a collection of poems by contemporary poets beginning with Abū Nuwās, *Aghānī*, viii. 15, 20; 215, 1, 26, 13; al-Djurdjānī, *Kitāb al-Kināyāt*, p. 29, 9; Ibn al-Aṭhīr, *al-Maṭṭal al-ṣā'ir*, p. 189, 16; the *Kitāb al-'Iṭinān* on the causes of the poetical strife between Djarrī and Farasdaq; 'Abd al-Kādir al-Baghdādī, *Khiṣṣat al-Adab*, i. 305, 22; *Kitāb al-Sharḥ* (i.e. *Sharḥ Kālam al-'Arab*), i.e., ii. 193 infra.

AL-MUBDI. [See ALLÄH II.]

AL-MUBÄRĪ, name of *sūra* xxxii., which is also called *al-nafāṭa* or *al-ḡurur*.

MUDAR. [See RAMĀ.]

MUDĀRĪ, the twelfth metre in Arabic prosody, which is very rarely used. Theoretically each of its hemistichs consists of three feet (*maf'īlun fa'ilātun maf'īlun*); in practice the third foot is lacking.

It has one *'arūḍ* and one *qarḥ* only: *maf'īlun fa'ilātun: maf'īlun fa'ilātun*. *Maf'īlun* however must become *maf'īlu*. The first *maf'īlun* may lose its *ma*; in that case the form is *fa'ilu* (= *maf'īlu*) and *fa'ilu*. (M. BENCHEB)

AL-MUDAWWANA. [See SAḤNUN.]

AL-MUDDATHTHIR, title of *sūra* lxxiv.

AL-MUDHILL. [See ALLÄH II.]

MUDİR, title of the governors of the Egyptian provinces, called *mudiriya*. The use of the word *mudir* in this meaning is no doubt of Turkish origin. The office was created by Muhammad 'Alī, when, shortly after 1813, he reorganised the administrative division of Egypt, instituting seven *mudiriyas*; this number has been changed several times (s. KHEḌṬR). At the present day there are 14 *mudiriyas*. The chief task of the *mudir* is the controlling of the agricultural administration and of the irrigation, as executed by his subordinates, viz. the *ma'mūr*, who administers a *markaz* and the *naẓir* who controls the *ḥim* which is again a subdivision of the *markaz*. Under Sa'id Pasha the office of *mudir* was temporarily abolished with a view to preventing oppression. Until that time they had been without exception Turks, but under Isma'il Pasha, when the function was instituted again, this high administrative position was opened also to native Egyptians.

Deny, *Sommaire des archives turques du Caire*, Cairo 1930, p. 130. (J. H. KRAMER)

AL-MUDJADILA, title of *sūra* lviii.

AL-MUDJAHID. [See RASŪLID.]

MUDJASSIMA. [See TASHHIL.]

MUDJAWWAZA. [See TURBAN, iv. 890b 29.]

AL-MUDJIB. [See ALLÄH II.]

MUDJIR AL-DĪN. [See AL-OLAIML.]

MUDJIZA (A.), part. act. iv. of *ḡ-ḡ-z*, lit. "the overwhelming", has become the technical term for miracle. It does not occur in the *Kur'ān*, which denies miracles in connection with Muhammad, whereas it emphasizes his "signs", *āyāt*, i. e. verses of the *Kur'ān*; cf. the ART. KORAN. Even in later literature Muhammad's chief miracle is the *Kur'ān* (cf. Abū Nu'aim, *Dalā'il al-Nubuwwa*,

p. 74). *Mudjiza* and *āya* have become synonyms; they denote the miracles performed by Allāh in order to prove the sincerity of His apostles. The term *karāma* [q. v.] is used in connection with the saints; it differs from *mudjiza* in so far as it denotes nothing but a personal distinction granted by Allāh to a saint.

Miracles of Apostles and Prophets, especially those of Muhammad, occur in the *sūra* and in *ḥadīth*. Yet in this literature the term *mudjiza* is still lacking, as it is in the oldest forms of the creed. The *Fiḥ Akbar*, ii., art. 16, mentions the *āyāt* of the prophets and the *karāmāt* of the saints. *Mudjiza* occurs in the creed of Abū Ḥafṣ 'Umar al-Nasafi (ed. Cureton, p. 4; ed. Taftāzāni, p. 165): "And He has fortified them (the apostles) by miracles contradicting the usual course of things".

Taftāzāni explains it in this way: A thing deviating from the usual course of things, appearing at the hands of him who pretends to be a prophet, as a challenge to those who deny this, of such a nature that it makes it impossible for them to produce the like of it. It is Allāh's testimony to the sincerity of His apostles.

A very complete and systematic description occurs in al-Jāzī's *Mawāḥiḥ*. He gives the following definition of *mudjiza*: It is meant to prove the sincerity of him who pretends to be an apostle of Allāh. Further he enumerates the following conditions: 1. It must be an act of Allāh; 2. it must be contrary to the usual course of things; 3. contradiction to it must be impossible; 4. it must happen at the hands of him who pretends to be an apostle, so that it appears as a confirmation of his sincerity; 5. it must be in conformity with his announcement of it; the miracle itself must not be a disavowal of his claim (*da'wā*); 7. it must follow on his *da'wā*.

Further, according to al-Jāzī, the miracle happens in this way that Allāh produces it at the hands of him whose sincerity He wishes to show, in order to realise His will, viz. the salvation of men through the preaching of His apostle. Finally, as to its effect, it produces, in accordance with Allāh's custom, in those who witness it, the conviction of the apostle's being sincere.

'Abd Allāh al-Iṣbahānī, *Dalā'il al-Nubuwwa*, Haidarābād 1320. (A. J. WERNICK)

MUDJTAHID. [See IGTHĀD.]

MUDJATATH, the fourteenth metre in Arabic prosody, has theoretically three feet, consisting of two successive *fa'ilātun* in every hemistich; in practice there are two feet only.

It has one *'arūḍ* and one *qarḥ* only: *mustafīlun fa'ilātun: mustafīlun fa'ilātun*. The foot *fa'ilātun* of the *qarḥ* and also, though seldom, that of the *'arūḍ*, may become *fa'ilātun*, on condition that *mustafīlun* retains its *a*; it loses its *a* when *mustafīlun* loses its *a*.

Mustafīlun loses its *a*, when the preceding *fa'ilātun* retains its *a*; it also loses its *a*, when *fa'ilātun* following it, does not become *fa'ilātun*. (MOH. BENCHEB)

AL-MUFADDAL R. MUHAMMAD B. YALĀ B. 'AMR B. SALIM B. AL-RAMMAL AL-DABĪL, an Arabic philologist of the Kufan school. By birth he was a free born Arab; the date of his birth is not known. His father was a recognised authority on the events in the wars of the Arabs on the frontiers of Khurāsān in 30—90 A.H. (quoted in Tabari's *Annals*). It is possible that his son was born in this region. As a partisan of the house of 'Alī he took part in the rising against the 'Abbāsid caliph al-Manṣūr led by Ibrāhīm b. 'Abd Allāh [q.v.], brother of 'Al-Nafs al-zakiya. The rising was put down and Ibrāhīm killed; al-Mufaddal was taken prisoner but pardoned by the caliph and appointed tutor to his son, the future caliph al-Mahdī, and in his train he visited Khurāsān. He then worked in Kufa as a philologist and teacher; among his pupils was his stepson al-'Aṭībī. The date of his death is variously given; the *Fihrist* does not give it at all while others give 164, 168 or 170.

al-Mufaddal, like his contemporary Hammād [q.v.], bore the epithet and title of honour *al-Rūmīya*, and was regarded as an authority on the poetry of the *Djāhiliya*. In contrast to Hammād, he is celebrated for the reliability of his transmission. In the *Kitāb al-Aghāni* there are several stories illustrating this fact. While Hammād was reproached with having inserted verses which he had himself composed into the work of the prominent poets of the *Djāhiliya*, al-Mufaddal is praised for handing down the old poetry pure and unfalsified. There was, of course, a great rivalry between the two *ruwāṭ* which also finds expression in the stories of the *Aghāni*. al-Mufaddal is reported to have said that the influence of Hammād on Arabic poetry had been most disastrous, to a degree which could never be made good again. To the question how this was and whether Hammād had made mistakes in the attribution of the poems or linguistic errors, he replied: if that were all, it could be made good, but he had done worse than this. Since he was such an authority on the old poets, he was able himself to write verses in their style and he had inserted such verses of his own composition in genuine old *ḥaṣidas* so that now only very good critics of the old poetry could recognise them (cf. *Aghāni*, v. 172 and *Yāqūt, Irshād*, vii. 171). It is also recorded that al-Mufaddal once in the presence of the caliph caught Hammād passing off verses of his own as the work of Zuhair b. Abī Sulmā. The *ḥaṣida* which Hammād was reciting began with *da' dā*, and on the caliph asking for the missing *naṣīb* he added several *naṣīb* verses. al-Mufaddal however said quite rightly that there had probably been a *naṣīb* before the surviving verses, but no one any longer knew it. Hammād was thereupon forced to confess his forgery. It is interesting to learn that, as is recorded in this passage of the *Aghāni*, Hammād was rewarded for his recitation but the sum given to al-Mufaddal was considerably greater. al-Mufaddal was given his reward, not only for his knowledge, but also for his fidelity and honesty in transmission (cf. *Aghāni*, loc. cit. and *Yāqūt, loc. cit.*).

al-Mufaddal worked in different fields of Arabic philology. He was considered an authority on rare Arabic expressions, celebrated as a grammarian and was also an authority on genealogy and on the Arab battles (*dayām al-'Arab*). He wrote a number of books: a *Kitāb al-'Amthāl* (on proverbs),

a *Kitāb al-'Arūd* (on metres), a *Kitāb Ma'na 'l-Shi'r* (on the meanings of poems) and a dictionary: *Kitāb al-'Alf*. His principal work, however, is a collection of old Arabic *ḥaṣidas* called the *Mufaddaliyāt*, which he compiled for his pupil, the future caliph al-Mahdī. Al-Mufaddal himself is said to have given another story of the origin of this anthology, which is one of the most valuable Arabic collections. When on one occasion Ibrāhīm b. 'Abd Allāh was in hiding in his house, he brought him some books to read at his request. Ibrāhīm marked a number of poems and these he collected in one volume because Ibrāhīm was a good critic of the old poetry. This collection was later called the *Iḥṭiyār al-Mufaddal* (cf. Flügel, *Gramm. Schulen*, p. 144, note 1).

The *Mufaddaliyāt* contains 126 poems, some complete *ḥaṣidas* of many verses, some fragments of small size, while in Abū Tammām's collection, the *Hamāra*, only little fragments of poems or separate verses are contained. The latter was compiled some fifty years later; at first it was much more popular than the *Mufaddaliyāt* and more frequently annotated. But al-Mufaddal's anthology is of quite outstanding merit. The great bulk of it is the work of pagan poets and *mushāḥḥamūn*, while only 6 of the 67 poets represented were born Muslims. Two of the poets whose *ḥaṣidas* are contained in the *Mufaddaliyāt* were Christians. The poems, the date of composition of which can frequently be deduced from events mentioned in them, are in some cases very old. The earliest are those attributed to Murakkish the Elder, which probably belong to the first decade of the sixth century A.D. al-Mufaddal's anthology offers a rich selection of the old Arabic poetry, the value of which is increased by the great age of the poems preserved in it. The name of its collector, who enjoyed a good reputation among his contemporaries for his reliability, also gives us a certain guarantee that we have in the poems of the *Mufaddaliyāt* really genuine specimens of old Arab poetry.

(ILSE LICHTENSTÄDTER)

AL-MUFID ABU 'ABD ALLĀH MUHAMMAD B. MUHAMMAD B. AL-NU'MĀN AL-ḤAKRĪNĪ, also called IBN AL-MU'ALLIM, a distinguished Twelver scholar of Baghdad under the Buyids, was born at the end of 333 or 338 (945 or 950), and came of an old Kuraish family which, as his second epithet shows, had a reputation for scholarship; he himself became, as his epithet shows, the teacher from whom all "later students have derived advantage". While he took little active part in politics, he was a very prolific author. His correspondence, usually replies to queries, came from Mawṣil, Djurdān, Dinawar, Raḥka, Khwārizm, Egypt and Tabaristān. His literary connections with other leaders of the Twelvers are seen in the fact that the *Dogmatici* mentioned third below is a critical commentary on Ibn Bābūya's *Risālat al-'Iṭihādāt* (published in a collected volume, Teheran

1300] and was in turn commented on by the Baghdadī naṣīb al-Sharīf al-Murtadā; the work on law and tradition given second below was also the basis upon which his pupil Shaikh Ṭai [q.v.] wrote as a commentary his *Taḥḥīṣ al-Aḥkām*, one of the "4 (5) books" of the Twelvers. Muḥid wrote pamphlets against Ḍubbā'ī, Ḍjāfar b. Harb, Ibn Kullāb, Karāḥī, the Mu'tazilīs, Zaidīs, the followers of al-Hallājī, Hanbalīs, Ḍjāḥī and the 'Uḥmāniya (for other collected titles see al-Khāyāt, *Kilāb al-Intiqār*, p. 156). The number of his writings runs to nearly 200. In addition to those preserved in European libraries, there are many other manuscripts in Shī'ī libraries, e.g. in Najaf. Among them are the usual handbooks on *fiqh*, on the *uṣūl* e.g. on *uṣūl*, as well as the *furū'* e.g. on the *ḥudūd* and the law of inheritance; also treatises on fundamental philosophical conceptions such as the predicate, the state of being created etc.; but it is with specifically Shī'a problems that he mainly deals. Muḥid, as the titles of several of his works and his influence on later writers show, championed the enhancement of the dogma of Prophethood, dealt with the question, a painful one for the Shī'īs, whether Abū Ṭalīb was a believer, with the imamate of 'Alī and the proof that the Imāms are higher than the angels. He naturally dealt also with the usual special tenets of the Twelvers, like the concealment of the Imām and the prohibition of meat butchered by the "People of the Book". He also wrote guides for pilgrims to the peculiarly Shī'ī holy places.

Muḥid died on Ramaḍān 28, 413 (Nov. 26, 1022). The naṣīb al-Sharīf al-Murtadā conducted the funeral service; he was buried beside Ibn Bahāye [q.v.] at the feet of the ninth imām Muḥammad al-Djowād in al-Kāḥimān.

MUFTI [See FATWĀ.]

MUGHAL, the name given to the dynasty of Emperors of Hindustān founded by Babur in 932 (1526), in virtue of the claim made by Timur, the ancestor of the dynasty, to relationship with the family of the Mongol (Mughal) Čingiz Khān [q.v.]. For the detailed history of the dynasty see the articles *BARBAR*, *HUMĀYUN*, *AKBAR*, *JAHAŅGIR*, *SHĀH-JAHAŅ*, *AWRANGZĒR*, and their successors.

I. THE MUGHAL EMPIRE TO THE DEATH OF AWRANGZĒR:

A. Military Organization.

B. Economics and Administration.

II. THE DECLINE OF THE MUGHAL EMPIRE. III. MUGHAL ARCHITECTURE IN INDIA.

I. THE MUGHAL EMPIRE TO THE DEATH OF AWRANGZĒR

A. Military Organization of the Mughal Empire.

The army which Bābur led into India, and with which he defeated at Pānīpat the army of Ibrāhīm Lodi, 100,000 strong, consisted of about 10,000 combatants, mainly cavalry, but comprising a corps of artillery and a small proportion of infantry, chiefly matchlockmen. Bābur's son and successor, Humāyūn, though hampered by the virtual independence of his brother Kāmrān, governor of Kābul, who annexed the Pāndjāb, and thus cut him off from the best recruiting grounds of the Muslim army in Northern India, Afghanistan, and Transoxiana, was nevertheless able to lead into the field at the battle of the Ganges, near Kanawdj, where he was defeated by Shīr Shāh, an army of 100,000 men. On his return to India in 1555 he left Kābul with an army of no more than 15,000 men, and it was his son and successor, Akbar, who was the creator of the army of the empire of which he was, in fact, the founder.

The empire was a military despotism. The governor of a province was entitled *ṣipāsāḥ*, or "commander-in-chief", the governor of a *pargana*, or sub-district, *ṣarḥḍār*, or "commandant", and practically all courtiers and officials, even those holding civil and judicial posts, were graded as commanders of horse. Thus we find Shaikh Abu 'l-Faḍl, Akbar's secretary, graded as a commander of 2,500; Rādjā Bir Bar, court wit and Hindi poet laureate, as a commander of 1,000; Saiyid Muḥammad, Mir-i 'Adl, a judge, as a commander of 900; and Shaikh Faḍl, the poet, as a commander of 400 horse. A command of horse was known as *manḡal* ("rank" or "dignity"), and its holder as *manḡaldār* ("officer"). Each of these nominally commanding from 500 to 2,500 horse was classed as an *amīr* ("noble"), and each of those nominally commanding more as *amīr-i kabīr* ("great noble"). These commands were nominal, conferred merely for the purpose of regulating the rank of the official holding them, and were styled *manḡab-i shāhī* ("personal rank"). Each of those actually exercising military authority had, in addition to his personal rank, *sawār* (horseman) rank. Thus, a commander of 5,000 might be described as "commander of 5,000, with 4,000 horsemen", that is to say, one ranking as a commander of 5,000, but supposed to maintain only 4,000 horsemen. In Akbar's reign, apart from the rank held by the royal princes, commands ranged from 10 up to 5,000 horsemen, but at the end of the reign two or three nobles were promoted to commands of 6,000 and 7,000. In these two high commands there was no distinction of grade, but each of the other commands was divided into three classes, viz: 1. those whose *sawār* rank was equal to their personal rank, 2. those whose *sawār* rank was half, or more, of their personal rank, and 3. those whose *sawār* rank was less than half of their personal rank. Thus, a commander of 5,000 with 5,000 horsemen would be in the first class of his

rank, a commander of 5,000 with 3,000 horsemen in the second, and a commander of 5,000 with 2,000 horsemen in the third. A purely civil official often had no *sawār* rank, but the distinction between military and civil officials was less clearly marked than it is to-day, and all officials were, in theory, soldiers. The secretary, Abu 'l-Faḥl, served, at least on one occasion, in the field, and Akbar once entrusted military commands in the field to his court wit and to a leading physician, with disastrous results.

The lists of "commanders of horse" given in such works as the *Ṭuhf-i Akbarī*, the *Ṭabaqāt-i Akbarī*, and the *Fāḥṣih-nūma* are not "army lists", but graded lists of the whole establishment of public servants, civil as well as military. Even where, as in the *Fāḥṣih-nūma*, *sawār* rank is given as well as personal rank, the lists are no guide to the effective strength of the imperial army, for commanders with *sawār* rank did not maintain, and were not even expected to maintain, the number of horse indicated by that rank. Thus, Shāh-Jahān issued an edict to the effect that commanders were not required to maintain more than one-third, and, in some cases, not more than one-quarter of the number of horse indicated by their *sawār* rank, and in the Balkh campaign they were not required to muster more than one-fifth of their nominal quota.

The yearly salaries of "commanders of horse" ranged from Rs 350,000 a year for a commander of 7,000 down to Rs 4,000 a year for a commander of 100, but in the commands in which there were three classes the salary varied with the class. Thus, in the 5,000 command an officer of the first class received Rs 250,000; an officer of the second Rs 247,500; and an officer of the third Rs 235,000. These salaries were attached to the personal rank, and were intended to enable the official to maintain his position at court or in the provinces, his household, his transport, and such horsemen as he might require for his personal service. For the payment of troops actually maintained separate allowances were made.

The horsemen were styled *sālinān* ("followers" or "troops"), and the majority of them provided and maintained their own horses and arms, and, in the field, their own transport. They were divided into three classes: three-horsed and two-horsed men, each of whom received nearly Rs 25 a month, and one-horsed men, each of whom received rather more than Rs 16½ a month. At a later date higher rates of pay than these were allowed in the Dakhn. Horsemen who could not supply their own horses were styled *kārgir*, and were the servants or followers of those who supplied them. The proportion of these classes in every ten troopers was usually three three-horsed, four two-horsed, and three one-horsed troopers, or ten men and twenty horses.

The payment of the contingents maintained by the *manṣabdārs* was at first provided for by the grant of *ḡājir*, or fiefs, so that the army was maintained on a feudal system, which, however, differed from the feudal system of Europe in that the fiefs were not hereditary, and the *ḡājirdārs*, or fief-holders, had no proprietary rights in them. A fief-holder might be transferred from one fief to another, or a portion of his fief, or even the whole of it, might be resumed. In 1574 an edict was promulgated by Akbar resuming all fiefs and converting them into crown lands, the payment of

the troops being provided for by orders on the treasury for payments in cash. This edict caused much discontent, for the *ḡājir* system was, for many reasons, far more popular than the *naḡd*, or cash-payment, system. Under the *naḡd* system a muster-parade might at any time be made a condition precedent to the issue of a payment order; and a *ḡājirdār* might reap much profit by economizing in the administration of his fief, by rack-renting the landholders, and by encroachments, but the *naḡd* system furnished him with no such means of enriching himself. The edict was immediately modified, and though the *naḡd* system was introduced in the settled provinces of the empire, the *ḡājir* system was retained in the more recently conquered provinces of Bengal, Guḡarāt, and Sind, and, after Akbar's death, was restored, in many cases, in other provinces.

Another reform introduced at the same time, the *dūgh n-maḡallī*, or branding regulation, was resented even more than the substitution of the *naḡd* for the *ḡājir* system. It was seldom that *manṣabdārs* maintained their full quota of troopers; "false musters were an evil from which the Mughal army suffered, even in its most palmy days. Nobles would lend each other the men to make up their quota, or needy idlers from the bazars would be mounted on the first baggage pony that came to hand, and counted in with the others as efficient soldiers". It was to check such fraudulent practices that Akbar introduced the *dūgh n-maḡallī* regulation, which required the preparation of descriptive rolls of men and horses, the latter being branded on being passed as fit for service; and at muster-parades only these who produced branded horses were paid. This system originated, apparently, with the Saldjūqs in Transoxiana and Persia, and was introduced into India by 'Alī al-Dīn Khwāḍj in 1312, but was not enforced after his death until it was revived by Shīr Shāh in 1541. After his death it was again abandoned, and Akbar had great difficulty in reviving it, owing to the determined opposition to any measure designed to prevent public officials from enriching themselves by defrauding the state. Even he was obliged to exempt commanders of 5,000, or a greater number, of horse from its operation, though these were required to parade their contingents for inspection when ordered. In the later days of the empire, the regulation was not enforced, and when Burhān al-Mulk joined Muḥammad Shāh at Karāḥī, to meet Nādir Shāh, a historian considers it worth while to describe his contingent as *manḡḡūdī na kāgharī*, that is, "actually present, not merely on paper"; and later, in 1750, an officer in Bengal receiving pay for 1,700 men was said not to have been able to muster more than seventy or eighty.

Besides the contingents of the princes and the *manṣabdārs* there were the sovereign's personal troops. His body-guard was a corps known as the *Wāḡhāḡī*, composed chiefly of men who had been attached to him from his youth, and had served under him as a prince. Manucci refers to these as the emperor's slaves, and says that they numbered 4,000 under Aurangzib. Details of their pay are not given, but they probably received more than the troopers serving in the contingents of the *manṣabdārs*. There was also a *corps d'élite* first formed by Akbar, and styled the *Abādī* corps. Abu 'l-Faḥl, in a characteristically foolish passage says that they were so called because they were

fit for a "harmonious unity", whatever that may mean; but they seem to have been called *ahadi* because they enlisted singly in the personal service of the emperor, and were not brought into the service in bodies by a *manjabadār*. They stood, in rank, between the lower *manjabadār*s and the *tabādār*s, and received nearly double the pay of the latter. They may be compared to "gentlemen of the life-guard", and many were seconded from the corps in order that they might hold civil appointments. The proportion of three-horsed, two-horsed, and one-horsed troopers was the same in the *Ahadi* corps as in the contingents of the *manjabadār*s.

A commander of horse, whether he held a *daftar* or whether he drew the pay of his contingent from the treasury, made his own arrangements for its disbursement. He was entitled to retain five percent of the pay of his men for himself, and pay was not always allowed for a whole year; often only for six, five, or four months. Maucci, writing of the army in the reign of Aurangzib, says, "in respect of one year's service they receive six or eight months' pay. Even that is not all in coin; they are always foisted off as respects two months' pay with clothes and old raiment from the household. Over and above this, there is almost always due to them the pay for two or three years' service. The soldiers are obliged to borrow money at interest from the *qarrafis*, or money-changers. These men lend to them, it is true, but it is hardly ever without a command from the general or officer; and these latter have an understanding with them about the profit from interest, which they share between them. Sometimes the soldiers sell their papers to these money-changers, who for a note of hand for one hundred rupees will give them twenty or twenty-five. It is by these and such-like extortions that these generals ruin the wretched soldier, who, unable to find other means of gaining his bread, is forced to remain on in his service. Speaking generally, it is impossible for them to escape such extortions, for these disorders reign throughout all the princes' establishments. If any one resigns service at his own request, they deduct two months' pay. Nevertheless service in the cavalry was socially an honourable profession; a common trooper was looked upon as being, to some extent, a gentleman, and such were, even when illiterate, often used to the highest positions."

The infantry was, in every respect, an inferior arm. With it were classed doorkeepers, watchmen, runners and spies, gladiators, wrestlers and palanquin-bearers, but the combatant branch consisted of musketeers or matchlockmen (*barjandās*), archers, and spearmen. Akbar maintained a corps of 12,000 matchlockmen, the officer in command of which was styled *dārūgā*. A secretary and a treasurer kept the accounts and disbursed the pay of these troops. The non-commissioned officers of the corps were graded in four classes, the first of which received $7\frac{1}{2}$, the second 7, the third $6\frac{3}{4}$, and the fourth $6\frac{1}{2}$ rupees a month. The privates were divided into five classes, the pay of which ranged from $4\frac{3}{4}$ down to $2\frac{3}{4}$ rupees a month.

Besides this corps was a number of troops styled *shahidi*, of which one-fourth were matchlockmen and three-fourth archers. These were the troops allowed to the *famildār*s in the *parganas* or sub-districts, to assist them in maintaining order and

collecting the revenue. The non-commissioned officers of the matchlockmen received Rs 4 a month, and the privates Rs $3\frac{1}{2}$ each. The archers were considered more efficient than the matchlockmen, for the matchlock was not an arm of rapid fire or precision, and an archer could shoot many arrows while a matchlockman was loading his matchlock. Neither matchlockmen nor archers could, as a rule, face cavalry in the field, and it was not until the emperors and their vassals were brought face to face with troops armed and drilled after the European fashion that they discovered that infantry was the queen of battles; but belief in the superior efficiency of cavalry died hard.

The artillery was divided into two classes, the heavy and the light. Akbar had an efficient corps of artillery, and used it with great effect, but the Muslims of India were not skilled artificers, and the heavy artillery was usually officered and partly manned by Uthmanli Turks, Portuguese renegades of pure or mixed blood, and occasionally by other Europeans. The light artillery consisted of field-pieces carried on bullock-carts, wall-pieces on animals' backs, and *sambūras*, or still lighter service-guns, carried on and fired from the backs of camels. The heavy artillery was drawn by strings of oxen, or, occasionally, by elephants, and, as the army gradually declined in efficiency the heavy guns increased in length and calibre until they became so heavy as hardly to be mobile, so that often they could not be dragged to their destination but were left stranded by their road. A defeated army could seldom save its heavy and field artillery. All that it could do was to spike the guns and leave them. The ammunition was solid shot, sometimes of stone, sometimes of iron, and field-guns and heavy guns in the field were sometimes loaded to the muzzle with the rough copper coin of the time, which took the place of case-shot, and did great execution at close quarters. The artillery also comprised a corps of rocketeers. The whole of the artillery was commanded by an officer entitled *Mir-i Shikāh*, or "lord of fire". The officers were entitled *jaldwāl* ("commander of 100") corresponding to a battery commander, and *mirdāh* (commander of 10), who had charge of a subdivision, or one gun. The wall-pieces and *sambūras*, which were numerous, account for the enormous numbers of "guns" mentioned in accounts of armies in the field.

Akbar used elephants freely in battle, and brought them into the field in great numbers. They usually carried archers or musketeers on their backs. Their use as a fighting force was, however, soon abandoned, and would have been abandoned sooner than it was, had it not been for their imposing appearance, for it had long been established that they were more dangerous to their own side than to the enemy. "To the last some elephants protected by armour were brought into the battle-field, but their use was confined almost entirely to carrying the generals or great nobles, and displaying their standards. The baggage elephants were assembled in rear with those bearing the harem, the women remaining mounted on the latter during the battle, and protected by a strong force posted round them."

Under Akbar the elephants ridden by the emperor were called *shahīdā* ("special"), and all others were arranged in groups of ten, twenty, or thirty, called *halqa* ("ring", or "circle"). In later reigns the same classification was employed, but with

a more extended meaning, *khāssa* then including all riding, and *halka* all baggage elephants. *Manjūdars* from 7,000 down to 300 were required to maintain each one riding elephant, and, in addition, five baggage elephants for each Rs 2,500 of pay. It appears that these elephants belonged to the emperor, and were not even made over to the *manjūdars* for use, except in the field. In the *Am-i Akbari* Abu 'l-Faiz says that 'Akbar "put several *halkas* under the charge of every grandee, and required him to look after them".

The commander-in-chief of the army was the emperor himself, but at the head of the military administration was an officer entitled *Bakhshi al-Mamalik*, whose position may be described as that of adjutant-general and muster-master-general. He was assisted by three *bakhshis* and a number of *bitiklis*, or clerks, and the duties of this department included enlistment, mustering, and passing the pay of both *manjūdars* and *filānās*, for which purpose they were obliged to see that the branding regulations, so long as they were enforced, were observed by those to whom they applied. Manucci says, "twice a year the *bakhshi* holds a review of all the cavalry present at court, examines all the horses, and sees whether any of them are old and unfit for service. In the latter case he makes the owners get rid of them and buy others". These officers remained at headquarters, and from some authorities it appears that one of them had charge of the *Wāṭiḥāhis*, or body-guard, but the *Āhadi* corps, which was commanded by one of the great nobles, had its own *diwān*, or paymaster and quartermaster, and its own *bakhshi*, both officers being assisted by *bitiklis*. Certificates granted by the *bakhshi* were recorded by the *wāṭiḥ-nigār*, or writer of the official diary, and were by him submitted to the *wazir*, or minister, who, after passing them, sent them to the office of revision and record, but pay was issued on the minister's order. "In addition to the *bakhshis* at headquarters there were officers with similar functions attached to the governor of every province", their office being generally combined with that of *wāṭiḥ-nigār*, or provincial diary-writer; and in imitation of the imperial establishments each great noble had his own *bakhshi*, who performed for him the same duties as those performed for the emperor by the imperial *bakhshis*.

It is impossible to estimate accurately the strength of the army in Akbar's reign, for the *ṣawār* rank of the *manjūdars* is not given, either in the *Am-i Akbari* or in the *Tabaqāt-i Akbari*. He maintained 12,000 matchlockmen, and Blochmann estimates the whole strength of his army at 25,000, of which 12,000 were cavalry and the rest matchlockmen and artillery, but this seems to be much too low an estimate. Hamayūn could put 100,000 cavalry into the field, and it is not likely that Akbar, with far wider dominions, would have been content, or could have ruled and extended his empire with a smaller army. It seems probable that Blochmann's estimate included only the emperor's personal, or household, troops, in the latter half of Shāh-Jahān's reign the contingents of the princes and nobles would have numbered 425,500 if each *manjūdār* had maintained the full quota of his *ṣawār* rank, but this they were not even expected to do. Fortunately a fairly exact return of the strength of the army is given in the *Pādshāhnāma*. There were 8,000 *manjūdars*

of all ranks, 7,000 mounted *Āhadis* and *barḥandās*, 200,000 cavalry, exclusive of the troops allowed to *ṣawādars* for the maintenance of order and the collection of the revenue, and 40,000 foot matchlockmen, artillery, and rocketeers, of whom 10,000 were at headquarters and 10,000 in the provinces and the forts. It is not quite clear what is meant by the mounted *barḥandās* classed with the *Āhadis*, for *barḥandās* is the word used for a matchlockman, and horsemen certainly did not carry the cumbersome matchlock, and carbines and pistols had not been introduced, but it may be that a few men carrying a lighter musket than the ordinary matchlock were attached to the *Āhadi* corps. Of the army in the reign of Aurangzib Manucci writes, "ordinarily the king keeps fifty thousand horse in garrison besides those in movement every day, an almost equal number. He has twenty thousand infantry, all *Rājputis*; out of them twelve thousand are in charge of the artillery; the rest are for guarding the royal palace, mounting sentry, *et cetera*".

The army of the Mughal emperors was not drilled. Muster parades consisted merely in the troopers passing in single file before the *bakhshi*, and the nearest approach to any manoeuvres was the participation of the army, or part of it, in a royal hunt, when the troops, aided by the people of the country side, acted as beaters, surrounded a large tract of country, and, day by day, closed inwards until in a small area was enclosed an enormous quantity of game, which was then slaughtered wholesale by the emperor and those who were permitted a share in the "sport". Apart from this species of hunting styled *shikār-i ḥamar ghā*, the army was never exercised in any combined movements, or drill; but the individual trooper paid great attention to the training of his body, exercising himself with all his weapons, sabre, spear, mace, battle-axe, buckler, dagger, and bow and arrows. The bow was considered a most effective weapon, as a horseman could shoot six times before a musketeer could fire twice. The trooper also went through various exercises for strengthening his limbs and his body, both with and without apparatus, the latter consisting of dumb-bells, *mugdar*, or Indian clubs, and the *lham*, a strong bow with a steel chain instead of a string, most effective in training these muscles employed by an archer. The horses were also trained in a sort of *manège*.

B. Economics and Administration.

The Mughal Empire lived mainly by agriculture. The only metals available in quantity were iron and copper; both were relatively expensive, and local supplies of the latter were failing in the sixteenth century. The existence of coal was unknown, and of other minerals only lime, salt, saltpetre, and, locally, building stone were largely produced. The agricultural land was divided into areas known as

villages (*deh*), usually, but not always, inhabited. The villages were grouped traditionally in larger areas (*parganas*), which were usually treated as administrative units (*mahall*). Most villages, but not all, were occupied by a community of peasants, held together by the tie of common ancestry; each member of these bodies had separate possession of the land which he cultivated, but the community acted as a whole, through the headmen (*mukaddam*), in the management of the village, letting surplus land to tenants, paying the revenue and other expenses, and transacting such other business as emerged.

The population was predominantly vegetarian. Most for the officials and the army was provided where required, but its supply lay outside the ordinary course of agriculture. The products of the land were mainly food, cereals, millets and pulses, with, on a smaller scale, sugar, vegetables, and condiments. Oilseeds were grown for local needs; opium was produced largely, and tobacco, a recent introduction, had spread rapidly through the empire; cotton and some other fibres, together with indigo and other dyes, were the chief industrial crops. Holdings were usually small, and were worked largely by the peasant himself with the aid of his family and the landless labourers of the village. Oxen were used for tillage, implements were few and primitive, and there was in general a scarcity of agricultural capital, necessitating prompt sales of produce at each harvest, to the peasant's loss and the middleman's gain.

Handicrafts were numerous and varied, but weaving was by far the most important. Cotton cloth was woven all over the empire, most of it for local consumption, but near the coasts production was directed largely to supplying overseas markets, while finer goods — muslins and prints — were carried long distances by land. Most of the consuming markets were conservative, adhering closely to established styles and patterns. There was thus little scope for invention; copying was safer than designing; and such developments as are recorded were the result of either patronage by wealthy amateurs, or the extension of the European demand. Silk-weaving was locally important in Bengal and Gujrat, in the latter case from imported material; jute and hemp also were only of local importance, but in the xviith century an export trade in sacks and sacking was beginning to develop.

In peaceful regions commerce was active, and, for the period, highly organised. Funds were ordinarily transmitted by bills of exchange, which could be negotiated in all the principal towns, and in some centres outside the empire. Merchants were, however, disinclined to carry large stocks of commodities, and preferred to utilise their funds in money-lending; the rate of interest in commercial transactions was commonly about 10 or 12 per cent, but the charge was much higher when the element of risk was great.

External land-trade was almost limited to the two caravan routes westward by way of Kabul and Kandahar, though there was some small traffic with Tibet. By sea, Gujrat had old-established connections with the Red Sea and the Persian Gulf, with East Africa, and with Sumatra, Malacca and further East; on a much smaller scale Sind had relations with Persia; while Bengal dealt chiefly with the south of India and with Burma and Siam.

During the xviith century all the sea routes were dominated by the Portuguese, who were concerned rather to exploit than develop; the chief extension of trade due to their efforts was the supply of cloth to Brazil and West Africa, but most of this was drawn from the Coromandel Coast, which was outside the empire until almost the end of the xviith century. After "factories" (*i.e.* agencies) had been established at Surat by the English (1611) and the Dutch (1617), an important trade with western Europe grew up in indigo and calico. In the middle of the century the indigo-trade yielded to competition from the West Indies, while the depopulation of Gujrat by the famine of 1630 transferred the bulk of the calico trade to the East Coast; Surat remained, however, an important centre until its supersession by Bombay. In the second quarter of the xviith century the Dutch, followed by the English, established factories on the Hugli in Bengal, and trade developed in silk, saltpetre, fine calico, and muslin. Towards the close of the century a change of fashions in Europe produced a great demand for muslin and prints, which was met partly by Bengal, and partly by Madras, by this time technically within the limits of the empire.

The outstanding feature of all trade with India was the need for importing gold and silver. India bought little beyond the industrial metals and luxury goods, but was eager to sell produce for cash; and, since Western Europe could not supply what was most in demand, the operations of the trading Companies were necessarily so organised as to direct streams of gold and silver to India from those countries which would part with them, notably, at this period, gold from China, and silver, and later gold, from Japan. The seaports serving the empire were thus brought into a complex but efficient organisation, which took whatever they had to sell, supplied whatever they wanted to buy, and, so far as was possible, satisfied the demand for gold and silver.

Inland transport was necessarily less efficient. The Indus, the Ganges, the Djumna, and the waterways of Bengal were largely used, but the bulk of the empire depended on what were then called roads, unmetalled tracks, sometimes defined by lines of trees, with halting-places which were generally walled or otherwise defended against robbers, and usually furnished with supplies. Transport was effected by carts and pack-animals, generally oxen but in some places camels. Passengers travelled on horseback, in palanquins, or in carts drawn by fast oxen. There were excellent arrangements for the rapid transit of letters, but these were for official use, and were not ordinarily available for private persons, who hired messengers when required, or in a few cases, clubbed together to send messengers periodically.

Standards of life presented sharp contrasts. The mass of the population, peasants, artisans and labourers, lived in such extreme poverty as to excite the commiseration of European visitors. An almost equally low standard prevailed among the numerically important class of servants in the towns, whether freemen or slaves, who, however, enjoyed a more secure life than the rural population. The middle classes, comparatively smaller in numbers than now, were thrifty and frugal; and, even when wealthy, were careful to avoid any display which might lead to exactions by officials. The superior

grades of officers employed by the State were exceedingly well paid when allowance is made for the high purchasing power of money, and spent their incomes freely in extravagance and display, increased by the fact that on their death their property reverted to the treasury.

The prosperity of the empire depended mainly on three factors: the character of the rainfall, the degree of internal tranquillity, and the working of the revenue administration. The seasonal rainfall was, as it still is, uncertain, and any serious defect resulted in insufficiency of food. The difficulty of transport made it impossible to afford adequate relief on the spot, the people abandoned their homes to wander in search of food, and in contemporary narratives we read again and again of the then familiar features of deaths from starvation, cannibalism, and the sale of children into slavery. Recovery from such a calamity was a slow process, and the famine which desolated Gujarat and the Dekhan in 1630-1631 left its mark for at least a generation. Exceptionally favourable seasons might also prove calamitous, though not to the same extent. There was no local market for the surplus produce, prices fell to a ruinous level, and in official regulations low prices were treated as a calamity requiring relief on the same footing as drought or hail.

The dominance of the weather was inevitable; the other influences on prosperity were matters of administration. Here a clear distinction must be drawn between the general and the revenue administration, a distinction denoted by the current phrase *mulkī wa-mālī*. The emperor was of course supreme in both branches, and was assisted at his headquarters by four principal officers, the *Wakil* or Prime Minister, the *Wazir* or Revenue Minister, the *Bakhshi* (see col. 629), and the *Sadr*, who was in charge of Islamic law and also administered the department dealing with charitable grants and endowments. The post of *Wakil* was not always filled, and when it was in abeyance the duties attaching to it devolved on the *Wazir*. In practice the powers of these Ministers depended on the personality of the Emperor; under Akbar or Shah-Jahan they were definitely subordinates, while Jahangir's Prime Minister was at times practically the ruler of the country.

The system of general administration to which the Mughals succeeded in Northern India was not highly developed. The great bulk of the country was held by officers in assignment (a term explained below); the assignee was responsible for keeping the peace, and in practice had a free hand in the methods employed. Under Akbar a more effective system was established, which was maintained throughout the period. The empire was divided into provinces (*subahs*), each of which was in charge of a Viceroy (*Subahdar*, *Subahdar*), who at first was responsible to the Emperor for all branches of administration, but after 1595 was relieved of revenue work. Apart from the Viceroy, officers who may be described as Governors were stationed at selected places, with the duty of keeping the peace and putting down rebellion, a term which covered failure to pay the revenue due. The ordinary designation of these Governors was *Faujdar*, but in outlying regions which were controlled by fortresses the Governor was the fortress-commander (*Qil'adar*), while in a few large assignments the assignee exercised the powers of a Governor. Cities

were governed by officers designated *Karāmi*, who combined the functions of magistrate, police-commandant, municipality, and censor of morals. There was no regular police force at the disposal of these officers, who were expected to employ the troops they maintained as a condition of their rank, obtaining help when their own forces were insufficient. The efficiency of this organisation varied with that of the central administration, which depended mainly on the personality of the Emperor; by the close of the xvijth century it was definitely breaking down, and conditions of anarchy were spreading over the empire.

It is difficult to state in precise terms the relation of this organisation to the extensive portions of the empire where internal jurisdiction remained in the hands of Hindu Chiefs; but apparently the Chief was regarded officially as assignee of his territories, and was expected to maintain order within them. If he failed to do so, the Viceroy or Governor concerned might intervene, but his action would ordinarily be directed against the Chief rather than against the people.

The revenue administration was controlled by the *Wazir*, sitting in the Revenue Ministry, which was known as *Dar-i-Wazir*, as opposed to *Hazrat*, or the Court, whence orders were issued by, or in the name of, the Emperor. Revenue at this period meant practically Land Revenue; the Imperial Treasury had receipts from other sources—Customs, Salt, Mint, Presents, Inheritance, and, under Aurangzeb, the Capitation Tax (*Jizya*)—, but, taken collectively, they were of little importance compared with the income obtained from the peasants. Under the system traditional in India, and embodied in Hindu law, every person cultivating land was required to pay a share of the produce to the King, who determined, within somewhat elastic limits, the amount of the share, and who also prescribed the methods of assessment and collection. The first Muslim conquerors accepted this "King's share" as the *khirāj* to which they were entitled under Islamic law; the question of property in land was not raised, but occupants were ordinarily allowed to retain possession subject to due payment of the revenue.

In the Moghal period agricultural land fell into three classes: Chiefs', Reserved and Assigned. The areas governed by the more important Chiefs were not assessed to revenue (*khirāj*) by the *Wazir*; that was the privilege of the Chief, and any payments which he made to the treasury were in the nature of a tribute, determined by negotiation. The treatment of the numerous smaller Chiefs is not on record; but the few facts which have survived are consistent with the view that assessment was made through them, and that they were allowed to retain a portion of the revenue in return for their services. In the regions which were directly administered, certain areas of land, described as *khālīqā*, were reserved to furnish the treasury with cash, and were managed by the staff employed by the Revenue Ministry; at first the local staff was under the provincial Viceroy, but in 1596 a *Dimān* was posted to each province, to manage all revenue business directly under the Minister, and in this way emerged the dichotomy into *dimāni* (revenue business) and *faujdārī* (general business) which henceforward characterised the local administration.

The land not reserved for the treasury was

available for assignment. Every officer appointed to the Emperor's service was entitled to an income defined in cash, which represented both his personal salary and the cost of the troops he was required to maintain. For a short period in Akbar's reign, this income was paid, as well as defined, in cash, but the ordinary practice in the empire was to assign to each officer an area (*ḥiṣṣa*, *ṭayāl*, or *īḥṣā*) estimated to yield as revenue the amount of his stated income; and the officer thereupon took charge of the area assigned to him, and assessed and collected the revenue in accordance, at least theoretically, with the general orders in force. If the yield proved insufficient, he could claim the balance from the treasury, while he could be required to account for any excess receipts; but in practice these matters seem usually to have been adjusted by bribery, for which there was also extensive scope in securing profitable assignments, and in getting rid of those which had been squeezed dry. Changes of assignment were ordinarily so frequent that an officer would have been unwise to spend money on fostering agricultural development, or do anything beyond extracting the largest income which his assignment could be made to yield. The great bulk of the land was ordinarily assigned, the reserved area being one-sixth or one-seventh of the whole.

The share of the peasants' produce claimed by Akbar was one-third; later, at some uncertain time in the first half of the xviith century, this figure became the minimum, with a maximum of one-half, which inevitably tended to become the standard. Three principal methods of assessment were in vogue: Sharing (*ḥaḍla baḥḥiṣi*), Measurement (*ḥaḍla ḥaḥḥiṣi*), and Group-Assessment (*ḥaḍla ḥaḥḥiṣi*). In Sharing, the produce of each peasant was ordinarily estimated (or occasionally ascertained at harvest), and the prescribed share valued to determine the cash-revenue due for that season. In Measurement, a fixed charge, varying with the crop, was made on each unit of area sown; it might be fixed in either cash or produce and in the latter case it was valued at current prices. Under both these systems payment in cash was the general rule, but payments in kind were permitted in some backward regions where currency was scarce. In Group-Assessment, the official concerned came to terms with the headmen of the village to pay a sum fixed in cash for the year, thus avoiding the necessity of detailed assessments on individuals; this system tended to pass into Farming, when terms were made, not with the headmen, but with an outsider.

Each ruler determined at his pleasure which of these methods should be employed, and in what regions. Group-Assessment was the prevailing system at the time of Bībur's conquest, and apparently was accepted by him. After the expulsion of Humāyūn from India, Shēr Shāh introduced Measurement throughout his kingdom, and his methods were at first adopted by Akbar; the revenue claimed from each unit of area was at this time a stated quantity of produce, calculated to be one-third of the average yield, and, except in the tracts where payment in kind was practised, this amount of produce was commuted to cash at prices fixed officially for each season. Practical difficulties arose, however, in regard to commutation; and in 1579-1580 the revenue was put definitely on a cash basis, the charge on each unit of area

sown being a fixed number of *ḍam* (reckoned at 40 to the rupee) instead of a fixed weight of produce. Schedules of cash-rates adapted to the varying productivity of different regions were now drawn up, which remained in operation during the rest of Akbar's reign. At some uncertain period, probably under Djahāngir, these schedules were discarded, and a return was made to Group-Assessment, which was the standard system in the middle of the xviith century, and survived into the British period; Sharing was now practised only in backward tracts, or in some cases where the headmen refused to pay what the assessor thought a reasonable revenue, in which case he proceeded to detailed assessment on individuals, by Sharing or by Measurement according to circumstances.

Such was the history of assessment in the heart of the empire, but the outlying provinces were not brought into rigid uniformity, local conditions determining the system applied in each; while in the Dakhan provinces a distinct and elaborate system was introduced in the middle of the xviith century in order to promote recovery from the effects of war and famine.

It would be futile to criticise these varying institutions, for the value of all alike depended on the spirit in which they were worked. In administrative circles there was throughout the Muslim period a definite ideal of agricultural prosperity as the foundation of the State, its elements being extension of cultivation, improvement in the class of crops, and development of irrigation. Against this ideal operated the urgent need for the largest immediate revenue that could be wrung from the peasants. The course of the straggle cannot be traced in detail but the central fact is that by the middle of the xviith century agriculture had ceased to be an attractive career, and the peasants were deserting the land for other occupations; the resulting decline in agricultural production was the chief economic factor in the eventual collapse of the empire.

The remaining branches of the administration require little description. Customs duties were formally low, but their incidence was increased by arbitrary over-valuation and unauthorised payments required to secure prompt clearance of goods. In the towns, civil justice was administered mainly by the *qāḍi*; in the country, disputes were apparently decided summarily by the executive officials. Punishments for crime were summary and drastic, and were not always in accordance with Islamic law. By Indian tradition, local officials raised a large revenue for local purposes by a multitude of taxes and exactions of a most oppressive nature; these were prohibited *en masse* by Akbar, and again by Aurangzēb, but the system survived. Its worst feature was the levy of transit dues on internal trade, which were a cause of constant complaint by Indians as well as foreigners.

Special attention was given to the coinage, as being a recognised appanage of sovereignty. Gold, silver and copper were coined, all the coins circulating at their metallic value, so that the exchange rate between different denominations fluctuated; but gold was not in general circulation. The chief coin of the empire was the silver rupee, containing nearly 180 grains of almost pure silver; the principal copper coin was the *ḍam*, of nearly 324 grains; and there were various smaller coins of both metals.

The unit of weight used in wholesale commerce

was the maund or *man*, which varied in different parts of the country. In the south of India it ranged round about 25 lb; in Gujjarāt it was 33 lb, but in 1635 this was raised to 37 lb; in North India, it was 52 lb at Akbar's accession, was raised by him to 55 lb, by Dīkhāngir to 66 lb, and by Shih-Djahan to 74 lb. In Bengal, it was 64 lb in the West, and 46 lb in the East. All these figures are given to the nearest lb. The unit for retail trade varied from place to place, but was ordinarily smaller than those which have been named. Measures of capacity were not used in wholesale commerce. The measure of length in the North was the *gas* or yard, which was standardised by Akbar at about 33 inches, and by his successor at about 40 inches, but the smaller unit survived; in the South the *hūta*, or cubit, of about 18 inches was used; in Gujjarāt the unit was about 26 inches; and in Bengal about 27 inches.

(W. H. MORELAND)

II. THE DECLINE OF THE MUGHAL EMPIRE.

The decline of Mughal authority, already manifest during the reign of Aurangzeb, rapidly developed under his immediate successors. Bahādur Shāh [q. v.] (1707—1712) was too amiable, Dīkhāndār Shāh [q. v.] (1712—1713) was too vicious, Farrukhsiyar [q. v.] (1713—1719) was too feeble, to revive the empire. In seven bloody battles of succession, fought within six years of Aurangzeb's death, the imperial family attested its inherent lawlessness and declining power. Then it became the sport of rival factions. For a while the two famous Saiyid brothers, 'Abd Allāh and Husain 'Ali of Bārha, became the joint mayors of the palace. But they were unable to conciliate the support of the Mughal nobles. In 1720 Asaf Dīsh Nizām al-Mulk rose in arms. Husain 'Ali marched against him, but was murdered with the connivance of Muhammad Shāh, the emperor whom he and his brother had set up in 1719. Shortly afterwards, his brother 'Abd Allāh was defeated, and, after lying in prison at Dīhlī for two years, was poisoned. When they fell, Nizām al-Mulk strove hard to restore something like the old order of administration. But he was unwilling to force himself upon Muhammad Shāh as the Saiyids had forced themselves upon Farrukhsiyar. When the emperor whom he had delivered refused his advice, and the favourites of the court made fun of his antiquated dress and ceremonious manners, he preferred to retire and rule the Dakhn in virtual independence. Ironically enough, Mu-

hammad Shāh believed that Niām al-Mulk had been plotting his overthrow.

With Niām al-Mulk's departure from Dihli the last chances of a revival of the empire vanished. Never did a falling state betray greater incapacity for reformation. No phoenix could arise from those shameful ashes. Even while Niām al-Mulk still retained the nominal control of affairs, extraordinary incidents could occur. At Dihli itself, for example, a Hindu clerk in one of the imperial offices turned Muslim, and, when his wife and daughter refused to follow his change of faith, he laid a complaint against them, alleging that, as his daughter had not attained puberty, she was therefore of her father's religion. The case offered certain technical difficulties, was at last referred to the *qadr al-qadr*. His treatment of the case displeased the Dihli mob. Riots arose, the recital of the *khutba* at the Djabān-nūmā Masjid was interrupted, two or three Hindus were seized and circumcised. To pacify the rioters, the girl was imprisoned, and, a few days later, buried with Muslim ceremonial. "To cut a long story", says Kānwar Khān who relates the incident, "she was killed; otherwise there would have been many headaches and much vexation".

Niām al-Mulk's successors were worthy of the frivolous emperor whom they professed to serve. For twelve years the imperial councils were directed by a man called Shāh 'Abd al-Ghaffār. By origin a cotton-weaver of Tattā, he had lived both as *legi* and *faḳīr*. Claiming magical powers and popularly believed to consort with djinn and devils, he was summoned to interpret the dreams of the emperor's mother. This led him into the imperial service, and he contrived to accumulate in his own hand a great number of offices, producing a revenue of 5,000 rupees a day, apart from the bribes which he received, said to amount to as much more. This man was pithily described as never having spent money on a good work, never having conferred a favour, and never having done a kindness. He was a miser, and at his downfall (for even at Dihli under Muḥammad Shāh such qualities at last produced their natural reaction) more than a crore of rupees was found in his private boards. But the unpopularity which his character and habits naturally evoked were as nothing compared with the detestation with which his son and daughter were regarded. No one in Dihli was safe who displeased them or denied them anything that they desired.

Amid such confusion and under such rulers the empire rapidly lost its cohesion. The Marāṭhās [q. v.], whom even Awrangzēb sought in vain to subdue, soon became the most formidable power in India. On Awrangzēb's death, his successor, Bahādur Shāh, had released the Marāṭhā prince, Shāhū Rājā, in the desperate hope of reestablishing through him the form, if not the substance of imperial control. Shāhū Rājā met with influential and talented support. In 1708 he took possession of Satara and by the next year was generally recognised as ruler. A Chitpavan Brahman, Bālājī Wighwanāth, became his *peṣhwā* or first minister, and began to develop the characteristic Marāṭhā policy, which was to play a part in the enfeeblement of the empire. This was to put forward claims to a share (under the title of *ṣaṭh* or a quarter part) in the imperial revenues in as many provinces as possible. In 1709 the Mughal governor in the

Dakhan admitted this claim, and, although later governors contested it, it was again recognised by the Bārha Saiyids in 1719. In the next year Bālājī Wighwanāth was succeeded by his son, Bādji Rāo I, and the process was extended farther afield. Particular provinces were assigned to particular officers, who were to realise the *ṣaṭh* either by collecting the amount from the provincial governor, or by plundering the country. Bādji Rāo employed Pīlādji Gāekwāṣ as his chief leader in raids in Guḡarāt; Raghudji Bhonsla established himself at Nāgpur; these and other leaders spread the terror of Marāṭhā devastations in all directions, and it was no longer possible for the provincial governors to make their annual remittances to the capital. At the same time, seeing that their tenure of office was coming to depend more and more upon their own power and resources, the governors tended to become virtually independent rulers. Āṣaf Dīsh Niām al-Mulk in the Dakhan continued to profess himself a humble servant of the emperor, but he repelled by force of arms the persons who came with imperial *farmāns* ordering his supersession, and when he died in 1748 he was succeeded by his son. In Bengal too the succession had become a matter of heredity or war. But the respect which the name of the empire still enjoyed and the degradation into which the empire itself had fallen were exemplified by the large gifts sent by a new ruler for *farmāns* of investiture and the unhesitating compliance with which they were issued.

The troubles bred by this internal dissolution were enhanced by those of foreign invasion. In 1722 the Šafawids were overthrown in Persia, and, after a short period of great confusion, the Turk-mān Nādir Kulī established himself as ruler under the title of Nādir Shāh [q. v.]. With him difficulties arose over the Kāndahār frontier. He was engaged in reducing the Ghilzais there to submission. Thrice he sent envoys to the court of Dihli requesting that his enemies should not receive shelter in the Mughal territory. But by this time the Kābul province was falling into a like disorder with the rest. The governor spent his time in prayer and hunting. The money which had been regularly sent from Dihli to bribe the hill-tribes into quietude and pay the troops ceased to be sent, partly because of the growing imperial penury, partly because it was believed that it never reached the governor but was embezzled by his patron at court. Large bodies of Ghilzais therefore were able without the least difficulty to take shelter from Nādir Shāh's troops in the Mughal province, while the Mughal court foolishly supposed it was evading its difficulties by neglecting to answer Nādir Shāh's repeated demands. The ineptitude of the court, therefore, rather than (as used to be supposed) any elaborate intrigue of party against party, made Nādir Shāh resolve to invade India. No effective opposition could be offered in either the Kābul province or the Panḍjāb. In 1738 Kābul was occupied. In the next year Nādir Shāh's army appeared before Dihli. The emperor went out, not to strike a blow in his own defence, but to make his humble submission. Conqueror and captive then entered the city. The Dihli mob, grievously mistaking its strength, attempted to massacre the foreigners. As a punishment Nādir Shāh deliberately let loose his troops for five long hours — from 9 o'clock in the morning till 2 in the afternoon — during which some 20,000 of the inhabitants are believed to

to have perished; and beyond this toll of life a great ransom was exacted, including 50 crores' worth of those wonderful jewels which earlier Mughal sovereigns had heaped up for their delight. From this time onwards the annals of the Mughal empire contain nothing but dishonour. Nādir Shāh fell; but Ahmed Shāh Durrāni established on the borders of India another empire and repeatedly invaded India between 1748, the year of the ignominious Muhammad Shāh's death, and 1761, the year in which he inflicted the severest defeat in all their history upon the Marāṭhās at Pānīpat. Until the decay of the Durrāni empire in the early years of the nineteenth century, the provinces of Sind, the Panjāb, and Kashmir, were dependencies of the Afghan kingdom.

Europeans in India — Dutch, French, and English — had observed these events with great concern. Early in the eighteenth century the Dutch had sent a great embassy to Bahādur Shāh, and a little later the English had sent one to Farrukhsiyar. Both had secured far-reaching *farmāns* by profuse expenditure; both had found that their *farmāns* were waste paper wherever they ran counter to the interests of local governors. But it was the Frenchman Dupleix who first sought to put into practice the conclusions to be drawn from this situation. Others were convinced that European force could easily establish itself in India; but he began experiments, and, in the hope of keeping the English motionless while he acted, he professed to be acting on behalf and in the name of the Mughal emperor. This fiction became the traditional basis of French policy in India, and down to the end of the century Frenchmen were elaborating plans (which their failure to control the sea brought to nothing) for establishing themselves in India and expelling their rivals under cover of imperial grants. With equal consistency the English adopted a political realism which squared far better with the circumstances of the time. They fought and overcame Dupleix in the name of their national interests. When they acquired Bengal, they carefully avoided all obligation to reestablish the imperial authority; and it appears that their acceptance of the *diwān* of Bengal was dictated, not by any desire to mask the reality of their power (which no one in India doubted), but by the desire to take on behalf of the East India Company something which could not be taken over by the English crown as a territorial sovereignty certainly would have been. Thus it was that Prince 'Alī Gawhar, who proclaimed himself as Shāh 'Alam II [q. v.] in 1760, on learning of his father 'Alamgir's murder by his wazir, Ghāzī al-Dīn, first came under the protection of the English. He had for some years been attacking the province of Bihār with the aid of the Nawāb Wazīr of Oudh. But after the battle of Baksar in 1764 he had given up the struggle, joined the English camp, and in the following year on Clive's demand bestowed on the East India Company the *diwān* of the provinces it held in return for an annual allowance of 26 lakhs of rupees. At the same time the districts of Kora and Allāhābād were assigned to him and he proceeded to reside in the latter city. Soon however, he wearied of his position of dependence, and departed to join the Marāṭhās, who, having recovered from their defeat at Pānīpat, were once more invading northern India. On this Warren Hastings decided to hand

Kora and Allāhābād over to the Nawāb Wazīr and refused to continue the payment of the 26 lakhs. From this time until the close of the century he remained under the control of the Marāṭhās, except at such times as their internal dissensions led to the recall of their forces from the north. One of their chief leaders at this time, Mahādājī Sindhiā, gradually built up a strong principality for himself, conquering the provinces of Agra and Dillī, and becoming the emperor's real custodian. So matters remained till Sindhiā's defeat by the English in 1803 transferred the guardianship of Shāh 'Alam into the hands of the latter. They carefully refrained from entering into engagements with him, but they assigned revenues for the maintenance of the imperial family, they permitted all orders issued in the city of Dillī to run in the emperor's name, though the actual administration was conducted by an English agent, and they attempted no interference within the precincts of the palace. Gradually the traditional observances broke down. The Mughal emperor and the British governor-general met with the ceremonial of equals. The emperor's name was removed from the coinage. And it had been resolved no longer to recognise the imperial title after the death of its holder, Bahādur Shāh II, when the Indian Mutiny, in which several of the imperial princes took an active part although they seem to have had little share in bringing it about, led to the formal trial and deposition of the emperor and the disappearance of the shadowy court which for a century had lingered on under the toleration of the real powers of India.

III. MUGHAL ARCHITECTURE IN INDIA.

The Mughal dynasts brought to India strong Central Asian predilections and a keen feeling for natural beauty. But each in succession obeyed his own instincts, education and caprices. Hence they patronised no "schools" of art, but came to employ an almost cosmopolitan body of artists, Persian, Indian, Turk and even European, who one and all had to adapt their own canons to the aesthetic moods of their employers. In general the Mughals forbade any sculpture of the human form, but like the Orthodox Greek Church, were usually less rigid towards paintings of it and even fostered portraiture till it reached a high level. Yet, with relatively few exceptions, the Mughal buildings were all religious, comprising mosques and tombs or shrines. Hence their scope was limited, though within their limits they express the religious feelings and policies of the dynasty. Even the conqueror Babur found leisure in his brief reign of five years, 1526—1531, to build at Pānīpat the Kabul Shāh mosque, whose name commemorates at once his love of Kābul and his victory at Pānīpat in 1526. His mosque at Sambhal in Rohilkhand is marked by an ovoid dome. When he required constructive work Babur summoned pupils of Sinān, an Albanian, from Constantinople, and avoided Indian, Hindu or indigenous standards, though he must have employed Indian workmen in spite of his dis-

paragement of Indian skill and knowledge in design or architecture.

Humāyūn's longer but still more chequered reign produced many buildings, of which few remain. His mosque at Fathābād near Dihli is massive and well-proportioned, recalling the Tughlak or Turkish period, with domes rather more than hemispherical. It is decorated with enamelled tiles in the Persian manner, apparently the earliest example of that style now extant. His tomb at Dihli, doubtless begun, as is customary among pious Enateras, during his lifetime, is of red sandstone and also Persian in style, but in it coloured tiles are replaced by white marble, of which the dome is wholly composed, the rest of the masonry being also inlaid with that material. The main dome has a narrow neck, the first of its type to appear in India, the four corner cupolas, also a new feature, support domes of an earlier style.

Akbar (1556—1605) was versatile in his architectures as he was in his religion. In the Fort at Agra he built the palace—one of the few secular buildings of the Mughal period which survive—called the Dīhāngir Mahall. His other buildings at Agra were demolished by Shāh-Jahān. This palace, built of red sandstone which has weathered badly, bears the impress of Akbar's vigour and originality. Throughout arches are used sparingly, the horizontal style of construction being the rule. Its forms also are as Hindu as its construction, but the ornamentation, carved on all flat surfaces, is of a type used by Akbar but not found in other buildings. During the early part of his reign was erected at Gwalior the tomb of Muḥammad Ghawth, who died in 1562. Closely resembling that of Sher Shāh at Sahsāram, it marks a considerable advance in tomb-building during the brief period that had elapsed between the erection of the two, an advance ascribed by Fergusson to the invigorating touch of Akbar's genius, but doubtless due in great measure to the skill of the Gwalior school of architects and masons who were probably Hindus. The tomb is a square, 100 ft. each way, exclusive of the hexagonal towers, and its chamber forms a hall, 43 ft. square, with the angles cut off by pointed arches so as to form an octagon on which the dome rests. Around this square building is a wide gallery, enclosed on all sides by a screen of exquisite tracery in pierced stonework with a projecting porch on each face.

At Fathpur-Sikri, the new capital founded by Akbar where the court resided from 1569 to 1584, the emperor's eclectic phase found its fullest expression. Its architecture is admirably illustrated in W. E. Smith's works¹), but all its significance has not yet been explained. The site was chosen because Akbar's patron saint, the Sūfi Salīm Ḥishtī, lived in a cave on its summit²). Akbar's own residence was the "House of Dreams", the Khwāb-gāh, an unpretentious structure standing on the roof of the Mahall-i Khāṣṣ, which contains paintings attributed by Smith to Chinese artists

and apparently depicting Buddha as Yamāntaka³). However this may be, the design of his throne in the Dīwān-i Khāṣṣ massive pillar symbolizes that he sat there as a Cakravartin or ruler of the four quarters, as Haveli suggests, though it is conceivable that it signified his claim to the supreme headship of his new religion, the Dīn-Ilāhī. But it is rash to dogmatise on the symbolism of a builder who seems to have had no settled design for the plan of his new city. The Mahall-i Khāṣṣ regarded by Fergusson as the original block of building at Fathpur-Sikri, has two spacious courtyards and is larger than the Red Palace at Agra, but its surrounding structures are inferior in richness of design and ornamentation. From time to time Akbar added courts and pavilions as if to compensate for this inferiority. While the Dīwān-i Khāṣṣ is square, as befits a Hall of Audience, the Daftar-Khāna or Record Office is peristylar like the one erected by Akbar at Allāhābād. The Panē Mahall, a five-storeyed open pavilion with richly carved pillars, and long colonnades and walls connecting these buildings one with another, complete this group of structures. The most characteristic and beautiful of his designs here are the three small buildings, the Mahall or apartment of Birbal's daughter, the house of Mariam Zamāni, mother of Dīhāngir, and the palace of the Rūmī Sultāna, Ruḳaiya Begam, a cousin of Akbar and his first consort. Akbar's greatness however demanded more grandiose monuments. The Dīāmī Masjid or cathedral mosque, erected in 1571 (the year in which he proclaimed himself the *mudtāhid* of his age and openly claimed the spiritual headship of Islam) commemorated his victories in the Dakhan (Southern India). It ranks amongst the finest ecclesiastical buildings of India. According to its inscription, it was designed by Shāikh Salīm Ḥishtī himself and modelled on the Ka'ba. Though highly ornate it betrays few or no traces of Indian influence⁴). The tomb of the Shāikh, in its courtyard, is built wholly of white marble, with windows of pierced tracery of the most exquisite geometrical patterns, and a deep cornice of marble supported by brackets of a design so elaborate as to be almost fantastic. The other tomb in the courtyard, that of Salīm's grandson, Shāikh Islām Khān, is of sober and excellent design but eclipsed by its surroundings. The Buland Darwāzā or "lofty gateway", built in 1602, commemorates Akbar's conquest of Khāndesh and dwarfs even the Dīāmī Masjid. It is the grandest gateway in India and one of the loftiest in the world, its height being enhanced by its position on the brow of the hill on which Fathpur-Sikri stands. Its architect placed its portals at the back of a semi-dome, which thus became its porch or portico, and its dimensions impress themselves as those of the actual portal. It must be added that Akbar intended his new capital to be a school of all the arts and that he allied architecture to painting. From the fragments of interior mural paintings which survive, it is clear that he employed Persian and Indian artists, who worked independently, and some idea of their technique is doubtless to be gathered from the miniatures of this period, as mural artists were also required to illustrate manuscripts.

²) The tomb of Salīm Ḥishtī is described and illustrated in Smith's work cited above and in *J. Indian Art*, No. 64 (vol. viii., p. 41 and 199.), 1898.

³) *J. Indian Art*, No. 47 (vol. vi., p. 66), 1894.

⁴) For its wall-paintings see *J. Indian Art*, No. 66 (vol. viii., p. 55), 1899.

At Allāhābād, the city where Akbar was compelled by administrative duties to reside more than at his new but isolated capital, he built the pavilion of the *Chūs Sūn* or "Forty Pillars", of which only the hall survives. Its plan is square, supported by eight rows of columns, eight in each row, making sixty-four in all; and it is surrounded by a deep verandah of double columns, with groups of four at the angles, all surmounted by bracket capitals of the richest design.

But perhaps the most characteristic of Akbar's buildings, observes Fergusson, is his tomb at Sikandra, begun in his lifetime¹⁾ but completed by his successor. Unfortunately Djahāngir, in his *Tuzuk* (transl. A. Rogers, i. 152), asserts that he demolished Akbar's work and reconstructed the tomb. But, seeing that the plan of the building is unique in India and has no Persian or Saracenic parallel, it is more likely that only its exterior is the work of the fastidious orthodox Djahāngir. Its original plan was modelled on the Panā Majall, being composed of five square terraces diminishing in size as they ascend. Thus the outline of the structure is pyramidal, not domical. Standing in an extensive garden it is approached by a single gateway and stands on a raised platform. Excluding the angle towers the lowest storey measures 320 ft. each way, and on this terrace stand three more, similar in design but more ornate, each about half the height of the lowest storey or terrace. Within and above the highest storey is a white marble enclosure, 157 ft. square, contrasting with the red sandstone of which the rest of the structure is built. The outer wall of this enclosure is entirely composed of beautiful trellis-work; and inside it is a colonnade or cloister, also of white marble, in the centre of which is placed the tomb of Akbar, resting on a platform of exquisite arabesque tracery. This doubtless typifies Akbar's celestial resting-place, for below it lie his remains under a far plainer tombstone in the basement. That Djahāngir here departed from the original plan is certain. According to W. Finch, the tomb was to have been covered with a canopy of "curious white and speckled gold richly wrought". What Akbar planned and what he meant to express by his design must remain a matter of conjecture. Fergusson postulates a Buddhist model, and even sees in the pavilions which adorn the upper storeys reminiscences of the cells which stand on the edge of the great rock-cut path at Māmallapuram; but these may have been intended for use as a theological college like the rooms and pavilions in the upper storey of Himmān's tomb. He also thought that a domical chamber over the tombstone formed part of the original design, since no such royal tomb remains exposed to the air in any Indian mausoleum — a dangerous generalization. Havell sees in the building an Indian five-storeyed Assembly-Hall, apparently a meeting-house for the royal order, the *Din Ilāhi*, the four lower pavilions (or terraces) corresponding to the four grades of the order. Even Cambodian

influences have been conjectured²⁾. Yet it is not impossible that a Zoroastrian model was kept in view, as Akbar borrowed from that faith among others.

As compared with Akbar Djahāngir contributed little to the architectural magnificence of Mughal India. At Lahore, which he made his capital, he added the *Bayā Khwāb-gāh* or greater sleeping apartment to the Fort; and the tomb of Anāikali was also erected in that city. Near Srinagar in Kashmir he made the *Shūlmār* gardens with their summer-houses; and the fine gateway to the Sarāi at Nūrmahāl near Džalandhar is also ascribed to his reign. The quadrangle at Lahore was doubtless executed by Hindu artisans, as the colonnade, which surrounds three sides of its area, is supported by pillars of red sandstone with bracket capitals and carved figures of elephants, peacocks and conventional animals like those found in the Red Palace at Agra. Djahāngir's greatest buildings were however erected at Dakka, in Eastern Bengal, where he made a new provincial capital in super-session of Gawr; but his structures there were principally built of brick, covered with stucco, only the pillars and brackets being of stone, and they have been almost destroyed by the jungle. In one respect only did Djahāngir innovate. In 1600 he built the *Moti Masjid* or "Pearl Mosque" at Lahore, the first of its kind in India. Between Akbar's style and that of Djahāngir little difference exists. The former had used colour ornamentation at Fathpur-Sikri; its later buildings were richly decorated with wall-paintings, and marble mosaic was used in the *Djāmi Masjid*. Djahāngir relied still more on mosaic decoration, e.g. in Akbar's tomb at Sikandra, but soon after its completion we find variegated marble mosaic supplemented by *pietra dura*, as in I'timād al-Dawla's tomb, and in the *Tādj* we still find inlay almost exclusively used. Akbar had continued the use of enamelled tiles at Fathpur-Sikri for roofing and more sparingly for ornamentation; and they were employed by Djahāngir at Sikandra and by Wazīr Khān, his wazīr, on his mosque at Lahore. Indeed this mosque is only noteworthy on account of this decoration. Akbar had also introduced painting on interior walls.

Djahāngir's wife Nūr Mahāl or Nūr Džahān erected at Agra the tomb of her father, I'timād al-Dawla, completed in 1628. Built almost entirely of white marble, enriched with semi-precious *pietra dura* patterns, it foreshadowed the finest work of Shāh-Džahān's reign. Djahāngir's tomb, at Shāh-darā near Lahore, has little architectural merit, consisting of a vast platform 209 ft. square, with a minaret at each corner. The façades are decorated with white marble set into the red sandstone and the flat roof with geometrical mosaics. The emperor's remains are probably buried beneath an opening in the roof so that the rain and dew of heaven might fall on his tomb, as his earliest chronicler says³⁾. In brief the actual grave was hypaethral⁴⁾.

1) This view is contested in *Archaeological Survey of India, Annual Report, 1903-1904*, p. 19, but it was certainly the usual custom for a Mughal emperor, like any other good Muslim, to build his tomb during his lifetime. The problem is fully discussed in *The Tomb of Akbar*, by E. W. Smith and W. H. Nicholls, published by the *Arch. Survey of India, Allāhābād 1908*.

2) Cf. Vincent Smith, *A History of Fine Art in India and Ceylon*, p. 411.

3) Muḥammad Šālih Kambū, in his *Shāh-Džahān-Nāma* (also called the *Amal-i Šālih* in Elliott and Dawson's *Hist. of India*, vii, p. 123) cited in *Arch. Survey of India, Annual Rep.*, 1906-1907, p. 13.

4) A contrary view, that the tomb had a closed

AL-MUGHNI. [See ALLĀH II.]

AL-MUHĀDJIRUNA, the emigrants, a name often applied in the *Qur'ān* to those followers of Muḥammad who had migrated from Mecca to Medina with him. The word is derived from *hijra*, which does not mean "flight" but breach, dissolution of an association based on origin, in the place of which a new connection is formed. The term *muhājir* is not applied to the Prophet himself but only to those who migrated with him and later made up a considerable portion of the population of Medina. The followers of the Prophet who were natives of Mecca were given the name *Anṣār* [q.v.] to distinguish them from the Muhājirūn, because the immigrants were mainly dependent on their help and active support after they had given up their homes and livelihoods in Mecca. It now became one of Muḥammad's main objects to arouse sympathy for them, because in the early days after their migration they were for the most part in very needy circumstances. With the greatest eloquence he describes them as the particular favourites of Allāh who will receive a splendid reward for their sacrifices "when those who have adopted the faith, who have migrated and fought for Allāh's cause may hope for his grace" (*Sūra* ii. 215); "the sins of the emigrants and of those driven from home are forgiven" (iii. 191). Those who remained in Mecca and feared to migrate although the earth was large enough to afford them shelter are severely censured. He who emigrates finds a home on the earth and if he dies Allāh will reward him (iii. 101). This was however at first only an indication of a future which had not yet materialized, and in addition to these rosy utterances (cf. xvi. 43; viii. 75; xxii. 57) the Prophet made more practical efforts to help those who were living in difficult circumstances. A portion of the plunder taken in fighting was given to the poor emigrants who had been driven from their possessions in order to aid Allāh: "they are the trustworthy" (lix. 8). In order to make the bond between them and the Medinese as tight as possible it is announced in *Sūra* viii. 73 that the emigrants who had left their homes to fight for the true religion and those who gave them shelter (cf. Ibn Hishām, p. 321 *seq.*) and assistance (the *Anṣār*) should enjoy rights of kinship with one another while on the other hand, those, who while adopting Islām had not migrated, should not have any rights of kinship. According to the usual interpretation, this passage refers to the peculiar bond of brotherhood which Muḥammad instituted between each emigrant and a Medinese believer, an explanation which is however not quite certain as the passage perhaps only expresses a general principle (cf. Fr. Buhl, *Leben Muḥammad's*, p. 209). Besides, the usual exegetes sees in the regulations for inheritance (*Sūra* iv. 13, 15) a proof that this special bond was very early abolished again.

The high esteem in which the emigrants were

held finds expression in *Sūra* ix. 20, where we read "those who believed and migrated and expended blood and treasure in fighting for the cause of Allāh, occupy a higher position (than other believers); they are the fortunate ones". Muhājir in this way became a title of honour (cf. *Sūra* xxix. 25 where Lot is so called). Individuals who had migrated not to Medina but to Abyssinia also proudly called themselves muhājir (see Fr. Buhl, *op. cit.*, p. 172). But the real "migration" was that to Medina in which the Prophet himself took part. The number of the Muhājirūn gradually grew as the increasing power of Muḥammad from time to time induced Meccans to leave their heathen city and go to Medina. It is to them that *Sūra* viii. 76 refers, where those who adopted Islām later than the first emigrants who migrated and afterwards fought alongside of the older Muhājirūn are acknowledged as belonging to the community ("they are of you"). After the treaty of Hudaibiya [q.v.] in particular, we hear of Meccan women who left their pagan husbands and went to Medina where in accordance with Muḥammad's interpretation of the treaty they were not surrendered if they offered the so-called women's pledge (see *Sūra* ix. 11 *seq.*). Thus the Muhājirūn, later and earlier, formed an increasing element in the population of Medina, whom Muḥammad often mentions along with other sections of the community as possessing equal rights with them (e.g. *Sūra* xxxiii. 6, 49) in which connection it should be noted that Muhājirūn is never, as was the case among the *Anṣār*, used in genealogies.

That these emigrants were specially dear to Muḥammad is easily intelligible, for they had shared his sufferings in Mecca and made the greatest sacrifices for him and included in their number men who had adopted his teaching out of pure conviction. With the occupation of Mecca, the migration ceased while the Muhājirūn remained as a separate highly honoured body. It is natural to suppose that a certain amount of rivalry might easily arise between them and the other elements of the community, and that there was actually a certain amount of friction between the emigrants and the Medinese is evident from the fact that in the troubles after the Prophet's death the Medinese endeavoured to set up one of their number, Sa'd b. 'Ubadā, as successor to the Prophet. The attempt failed through the energetic action of 'Umar, Abū Bakr and Abū 'Ubadā, and the leadership of the community remained in the hands of the Muhājirūn until the descendants of Muḥammad's old opponents in Mecca seized power for themselves.

MUHĀL. [See MANTIK.]

AL-MUHALLAB b. ABĪ ŠUFRA, ABU SA'ID AL-AẒDĪ, an Arab general. Al-Muhallab is said to have been born two years before the death of Muḥammad. In the reign of Ma'awiya he undertook a campaign against India and raided the country between Kābul and Multān (44 = 664-665). He next distinguished himself in the expeditions of the governors of Khurāsān against Samarkand. Then however, he left the Umayyads and joined the anti-Caliph 'Abd Allāh b. al-Zubair who gave him the governorship of Khurāsān. When he was just about to start for there, he was appointed commander-in-chief in the war against the Aṣraḳīs

following the precedent set by Hābur. The sarcophagus is of white marble, inlaid with *pietra dura*, and it stands in an octagonal chamber 21 ft. high and 20½ in diameter. This chamber is enclosed in nearly solid walls of masonry, 56 ft. thick on all sides, and access to it is afforded by two oblong apartments, one on each side, but it does not open into any of the forty other rooms behind the arches which surround the structure, each façade having a central arch with five smaller arches on each side.

Under Shāh-Jahān (1627—1658) Mughal architecture attained its zenith. One of his earliest buildings was the incomparable Tāj Mahall [q. v.], begun the year after the death of the empress, Arjumand Bānū Begam, entitled Mumtāz Mahall, or the "Chosen One of the Palace". For himself Shāh-Jahān planned a corresponding tomb of equal magnificence on the opposite bank of the river Džamā, but Aurangzēb did not carry out the scheme, probably because it savoured of paganism¹. Considerable controversy has raged over the question of its architect. Shāh-Jahān's style was essentially Persian, with an indefinable difference of expression, and it was sharply distinguished from those of Isphāhān and Constantinople by a lavish use of white marble, sumptuously decorated with *pietra dura*. Coloured tiles had by now become rare. Spacious grandeur was combined with feminine elegance, to which inimitable open-work tracery contributed. In the mosques colour was eschewed, and the finest art is found in the Pearl Mosques at Agra and Dīhli. The former was built in 1646—1653. Meanwhile Shāh-Jahān had founded Shāh-Jahānābād, the great palace near modern Dīhli, recently restored to something like its pristine

beauty. A Persian engineer, 'Alī Mardān Khān, had tapped the Džamā 6 miles above Dīhli, and his canal fed the new capital with many streams. The most favoured of them was the Nahr-i-Bihisht of "Stream of Paradise", which was so named by Shāh-Jahān himself. It fell in a cascade down a marble chute in a pavilion—the Shāh Burdj—and flowing along the terrace which bordered the Hayāt-Bakhsh ("life-giving") garden, it traversed the chain of stately edifices that lined the eastern wall of the Palace—the Hammām, Dīwān-i Khāss and Khwāb-gāh—silently gliding beneath the Mirān-i Ināf ("Balance of Justice") across a sun-bathed court into the cool of the Imtiyāz Mahall or "Palace of Distinction", styled later the Rang Mahall Kalān or "Greater Colour Palace", from its elaborate painted decoration and gilding. Set on a marble terrace which formerly swept from end to end of the Fort, it overhung the Džamā whose course then flowed along the base of the red sandstone walls. On the West an orchard separated it from the Dīwān-i 'Am. Thence, still southward, it passed through the Lesser Rang Mahall, the Mumtāz Mahall and other buildings of the imperial *amūda*. Thus Dīhli combined the Mughal love of enclosed gardens, watered by running channels, with their passion for architectural beauty. It preserved Bābur's love of nature, and perhaps added to it a sense of landscape which also found expression in the Mughal gardens of Kashmir.

With Aurangzēb (1659—1707) set in the period of decline, due no doubt largely to that emperor's orthodox prejudice against art, but partly also to his conscientious parsimony. He declined to complete Shāh-Jahān's tomb, ostensibly on the ground of expense, but also perhaps because he regarded the scheme as savouring of paganism. Yet he constructed at Benares the great mosque with its lofty graceful minarets, built a copy of the Dīhli mosque at Lahore, and at Aurangābād imitated, though on a small scale and with success, the Tāj in the tomb of his favourite wife. Aurangzēb's own tomb, at Khuldābād, a hamlet just above the caves at Ellūra, is mean and insignificant. But some of his buildings, in spite of their incipient decadence, are the last great examples of the Mughal style. His Džāmi' or Bāghshāhī mosque at Lahore is pleasing in form, though the marble ornamentation of its great central and front façade is very inferior in detail to its prototype at Dīhli. Its three domes of white marble and the imposing gateway of red sandstone and marble leading to it from the Hazūri Bāgh are its finest features.

Near Dīhli the tomb (1756) of Nawwāb Saifdar Džang, Wazir of Oudh, is a passable copy of a Humāyūn's mausoleum, but its interior is marred by indifferent plaster decoration.

At Lucknow, the capital of the Nawwāb Wazīr of Oudh, the buildings erected by that dynasty and its nobles hardly deserve to be classed as Mughal. The one exception is the vast Imāmbara, built by the fourth Nawwāb, Asaf al-Dawla, in 1784. Conceived on a grand scale for the celebration of the Muharram according to the Shī'a rite, its details will not bear close examination, though its solidity is impressive. The buildings of the Muhammadan dynasty of Mysore (1760—1777) have still less claim to be regarded as Mughal.

To conclude, the architecture of the Mughals was, like all their arts, a resultant of many forces.

roof and only an uncovered tombstone is maintained by J. P. Thompson in the *Journal of the Panjab Historical Society*, i. 12—30 (also W. H. Nicholls, in *Arch. Survey of India, Annual Rep.*, 1906—1907, p. 12). But hypæthral shrines were not uncommon during the Mughal period (see H. A. Rose, in *Journ. Panjab Hist. Soc.*, iii. 144—145, and *Glossary of Panjab Tribes and Castes*, i. 534). It is possible to reconcile the structural evidence with tradition by assuming that the tomb was originally hypæthral, but that a dome was subsequently erected over it and that Aurangzēb removed the addition in order to restore the original design; but hardly, as Moorcroft states, with the intent that "his grandfather's tomb might be exposed to the weather as a mark of his reprobation of the loose notions and licentious practices of Džahāngīr" (cf. W. Moorcroft and G. Trebeck, *Travels in the Himalayan Provinces*, London 1841, i. 108—109).

1) For twin shrines on either side of the Indus see the account of Daira Din Panāh in Munāffargah (Panjab) District Gazetteer, Lahore 1910, p. 71. Tavernier records this tradition in his *Travels*, Bk. i., Ch. vii., but he does not add the further tradition that Shāh-Jahān's mausoleum was to have been of black marble, a rarity hardly procurable in India. The Tāj was however only the central feature in a group of smaller and hardly less beautiful buildings, e.g. the four Sahels Burdjes, tombs of the empress' maids-of-honour; see *Arch. Survey of India, Annual Rep.*, 1903—1904, p. 14 and plate iii.

But its essential distinction over Hindu art lay in its balanced use of purely Indian and imported technique; while it recognised the value of symbolism in its structures, it never made its arts merely a vehicle for symbols, as Hindu sculpture tended to do.

Bibliography: The fullest collection of material for the study of Indian architecture is to be found in the publications of the *Archaeological Survey of India*. The best comprehensive works are James Fergusson, *History of Indian and Eastern Architecture*, edited by James Burgess, vol. ii., London 1910; Gustave Le Bon, *Les Monuments de l'Inde*, Paris 1893; Ft. Wetzel, *Islamische Grabbauten in Indien aus der Zeit der Soldatenhäuser*, Leipzig 1918; Oscar Reuther, *Indische Paläste und Wohnhäuser*, Berlin 1925. A comprehensive and critical bibliography of the Muhammadan Architecture of India by K. A. C. Creswell appeared in *The Indian Antiquary*, vol. li. (1922). (H. A. ROSE)

MUGHAMMAS or according to others **MUGHAMMA**, a valley near Mecca on the borders of the sacred area. According to tradition, Abrahā [q.v.] ordered his army to encamp here when he was going to attack Mecca, but was prevented from doing so as birds slew his soldiers by dropping stones on them. In Mughammas is shown the tomb of the Tā'ifī Abū Righāl who died here after acting as guide to Abrahā. He was so hated by the Meccans for this that the custom grew up of casting stones on his grave [cf. *AL-DJAMRA*]. Whether this explanation is true or not is unknown, but in any case a verse of Ḥassān b. Thābit (ed. Hirschfeld, LXII/1.) shows that in the time of the Prophet the mention of his name was sufficient to incite the Tā'ifīs. The antiquity of the custom of stoning his tomb is shown by a verse of Djarir: "When al-Farazdaq dies, stone him as you stone the grave of Abū Righāl".

AL-MUGHĪRA B. SHU'BA, of the sept of the *Abīlāf*, a subdivision of the Thakīf, further a member of the clan of the Banū Mu'attib — guardians of the sanctuary of al-Lāt — and nephew of 'Urwa b. Mas'ūd [q.v.], companion and martyr. For having attacked and plundered some travelling companions during their sleep, he was forced to leave Tā'if, his native town, and came to Medina to offer his services to Muḥammad. The latter used him to attract the Thakīf to Islām and after the submission of Tā'if, sent him to this town to superintend the destruction of the national sanctuary and the liquidation of the treasure of al-Lāt. In the caliphate of Abū Bakr, although he never succeeded in attaining to one of the great posts which were reserved for the Quraysh, Mughīra was able to keep a position in governing circles. 'Omar, while under no illusions about his morals, appointed him governor of Baḡra. A scandalous incident temporarily interrupted his administrative career. He was accused of adultery. The evidence was overwhelming: instead of having him stoned, 'Omar only dismissed him. Mughīra holds in tradition the record for marriages and divorces: the figures of 300, 700 and 1,000 are given. In the

year 21 (642), recalled to public life, he was appointed to the important governorship of Kūfa. His slave Abū Lu'lu'a, who lived in Medina, assassinated the Caliph 'Omar. Under 'Othmān, Mughīra retired to private life. In the reign of 'Alī, he withdrew to Tā'if to watch the course of events. He went without having been invited to the conference of Adhīm [q.v.]. In 40 (660), taking advantage of the general confusion that followed the assassination of 'Alī, he produced an alleged certificate of appointment from Mu'āwiya and took over the control of the annual pilgrimage.

The great Sufyanid was able to appreciate at their true value auxiliaries of the stamp of Mughīra, one of the chief *dābiya* of his time, the man "who could get himself out of the most hopeless difficulty": "if (it was said) he were shut behind seven doors, his cunning would have found a way to burst all the locks". Of shocking morals, free from any attachment to the 'Alid party, equally free from any claims to the caliphate, free from the jealousies of the Quraysh families, as well as the narrowmindedness of the Anṣār clans, a member of the intelligent and enterprising tribe of Thakīf, everything attracted Mu'āwiya's attention to him. In the year 41 (661), this Caliph appointed him governor of Kūfa, a region disturbed by the intrigues of the Shī'a and the continual risings of the Khāridjīs. Mughīra succeeded in not compromising himself with the former: he was content to advise them to avoid any too striking outburst. Now nearly sixty, the able Thakāfi felt the unusual ambition of remaining where he was and of finishing his troubled career in peace and honour. This opportunist, who had come over to the Sufyanids after cool calculation, felt little desire to sacrifice his own peace and leisure for the consolidation of the Omayyad dynasty; he was solely concerned with keeping on the right side of the sagacious Mu'āwiya. The sudden rising of the Khāridjī leader Mustawrid failed to disturb his equanimity. With remarkable cleverness he was able to let loose against these rebels their born enemies, "the fine flower of the Shī'a". Whichever was victorious, it could not fail to lighten his responsibilities. By setting them against one another he rendered harmless the most dangerous elements of disorder in his province. The crushing of the Khāridjīs enabled him to breathe freely.

Thanks to this combination of mildness and astuteness, and by knowing when to shut his eyes, Mughīra succeeded in avoiding desperate measures against the people of the 'Irāq, who were a continual source of trouble, and succeeded in retaining his position. He was even regretted by his former subjects after he was gone. Not quite satisfied, Mu'āwiya thought of breaking this lieutenant of his who was playing a double game. Mughīra was always able at the opportune moment to provoke troubles which required the continuation of his services. In this way he prepared the return to favour of Ziyād b. Abīhi [q.v.], destined to be his successor. He is also said to have disarmed the Caliph's suspicions by suggesting the plan of proclaiming Yazid heir-apparent. As the general situation had considerably improved in the 'Irāq and order prevailed, on the surface at least, the Caliph left him in office till his death, the date of which is uncertain but which must be placed between 48 and 51 (668—671). Mughīra died of the plague at the age of about 70.

[q. v.] on the urgent appeal of the people of Basra. After he had driven them from the Tigris he defeated them in Shawwāl 66 (May 686) at Sillatā, east of the Dūdajil, whereupon they withdrew to the east. He then took part in the war against al-Mukhtar b. Abi 'Uthayb [q. v.]. On the latter's defeat and death (Ramaḍān 67 = April 687) he was sent to al-Mawālī to defend the frontier against the Syrians by Muṣ'ab b. al-Zubair, who shortly before had been appointed governor of Basra. In the meanwhile, the Arrāḳīs had been growing more and more dangerous and the only course for Muṣ'ab was to send al-Muhallab once again to al-Ahwāz. Here he fought the Arrāḳīs for eight months; when Muṣ'ab fell at Maskin (72 = 691) he paid homage to the caliph 'Abd al-Malik. The new governor of Basra, Khalid b. 'Abd Allāh b. Khalid b. Asid, himself then undertook the leadership in the war against the fanatical Arrāḳīs, but he was not fit for this task so that the caliph found himself forced to send for al-Muhallab and give him the supreme command. Khalid was soon afterwards dismissed and Basra given to 'Abd al-Malik's brother, the governor of Kufa, Bishr b. Marwān. But since the latter out of jealousy worked against Muhallab, the latter's movements were hampered, though he succeeded in winning the town of Rāmāhurmus. On the death of Bishr, al-Ḥaḍḍajādī [q. v.] received the governorship of the 'Irāk and as soon as he took up his appointment, the campaign against the Arrāḳīs was resumed with vigour (beg. of 75 = 694). At the end of Sha'bān 75 (Dec. 694), al-Muhallab assumed the offensive. The Arrāḳīs had to retire to Kāsurūn where they held out for over a year. They then left Fīra and went to Kirmān. Here they entrenched themselves in the town of Dīraḥ and it was some time before Muhallab could overcome them so that al-Ḥaḍḍajādī became impatient and tried to hurry him up. Al-Muhallab preferred however to await the favourable moment. Fortunately the Arrāḳīs split into two parties, one of which, led by Kaṭarī b. al-Fudjā'a [q. v.] and 'Abda b. Hīlāl, fled to Tabaristān whereupon al-Muhallab easily overcame the rest. He then returned to Basra where as a reward for his services he was given the governorship of Khurāsān (78 = 697-698). From Merv he undertook two expeditions against Bukhārā; on his way back he died at Zāghūl, a village in the district of Merv al-Rūḡh, in Dhū l-Hiḍḡja 82 (Jan.-Feb. 702). According to another statement, his death did not take place till next year. His son Yazid succeeded him in his office. By finally disposing of the fanatical Arrāḳīs al-Muhallab rendered a lasting service to the caliphate and he is incontestably entitled to a place of honour among the generals of the Umayyads.

AL-MUHALLABI, AND MUHAMMAD AL-DAWLA. MUHAMMAD, a vizier of Mu'izz al-Dawla. He belonged to Basra and was born in Muharram 291 (= Dec. 903). In 334 (945) when Mu'izz al-Dawla was marching on Baghdad, he sent him in advance to negotiate with the Caliph and on Dhu-mādī I. 27, 339 (= Nov. 950) al-Muhallab was appointed vizier. He was given the supreme command in the war with 'Imrān b. Shāhin (cf. Mu'izz al-Dawla) and had brought him into a very precarious position when he himself fell into an ambush and could only save himself with difficulty, whereupon Mu'izz al-Dawla had to conclude peace with 'Imrān. In 341 (952-953) the ruler of 'Omān, Yūsuf b. Waḡhīn, undertook a campaign against Basra; al-Muhallab, however, anticipated him, occupied the town and defeated Yūsuf. In the same year, he fell into disgrace but was able to retain his office and the good relations between Mu'izz al-Dawla and his vizier were restored. A few years later, Mu'izz al-Dawla equipped an expedition against 'Omān and put al-Muhallab in command. The latter set out in Dhu-mādī II. 352 (= June/July 963), but soon fell ill and decided to return to Baghdad. He died on the way on 26th Sha'bān of the same year (= 19th Sept. 963) and was buried in Baghdad. On his death Mu'izz al-Dawla confiscated all his property, a measure which aroused general indignation.

(K. V. ZETTERSTEN)

MUHAMMAD, the founder of Islām, was a native of the city of Mecca, out of which the energetic Qurāish had in the sixth century created a flourishing centre of commerce by exploiting the much visited places of pilgrimage there. In consequence of the unreliability of the sources at our disposal the very first question a biographer has to ask, namely when was his hero born, cannot be answered with certainty. That Muhammad's activity in Medina covered ten years (622-632) is certain; but we have no certain data for the Meccan period. There is however no cogent reason to doubt the statement in a poem ascribed sometimes to Abū Kaṭb b. Abi Anas and sometimes to Ḥassān b. Thābit (ed. Hirschfeld, N^o. 19, 1) to the effect that his prophetic activity in Mecca lasted "ten and some years". The parallelism between the two periods, which might be brought forward as a ground of suspicion, is not complete, and on the other hand, the annual recurrence of the great pilgrimage at Mecca must have made it easy for the inhabitants to reckon by them, so that a chronological statement originating there deserves more confidence than others. The Meccan period in any case must not be put too short, for according to 'Urwa's story mentioned below (Tahari, i. 1181), "several years" passed after the migration of his followers to Abyssinia before they returned, after which new difficulties arose which produced the migration to Medina. — For the period before he came forth as a religious reformer we have only the indefinite expression "nawr" (Sūra x. 17). The

Muslim historians make him usually 40, sometimes 43 years old at the time of his call, which, taken with the already mentioned data, would put the date of his birth at about 570 A.D. When however tradition puts the date of his birth in the "year of the Elephant" (see ABRAHA and SŪRA cv.), this is a result of an unhistorical combination, for ABRAHA's attack on Mecca must have taken place considerably before 570. But Lammens has cast various, not unfounded doubts on the whole chronological calculation itself; in particular the fact that Muhammad's migration to Medina and his resultant activities there do not give the impression that he was then a man already in the fifties. In reality 580 or one of the years immediately following would suit very well as the date of the Prophet's birth, so that the Qur'anic expression *'amr* would mean about 30 years.

The name "Muhammad" occurred previously among the Arabs (e.g. Ibn Durzid, ed. Wüstenfeld, p. 62; Ibn Sa'd, i/l. 111 27.) and therefore need not be regarded as an epithet only adopted later in life by the Prophet. As to Muhammad's descent, several old poems (e.g. Hama b. Thabit, ed. Hirschfeld, N^o. 25, 1; A'sha in Ibn Hishām, p. 256, 2; cf. also on Dīk'at: Hama b. Thabit, N^o. 21, 1; Ka'b b. Malik in Ibn Hishām, p. 800; on Hama: Ibn Hishām, p. 630, 7; on Abū Lahab: Hama b. Thabit, N^o. 217, 1) confirm the statement of tradition that he belonged to the family of Hāshim, and that he was recognised by them as one of themselves is evident from the fact that only the protection of a fairly powerful family could have made it possible for him to stay so long in Mecca in face of the hostility of his fellow-citizens (cf. the words put in the mouth of the enemies of Shu'aib [SŪRA xl. 93]: "Had we not had consideration for thy family, we would have stoned thee"). The Hāshim family related to the Banū Muttalib (Ibn Hishām, p. 536, 14) was apparently one of the better class families of Mecca (cf. Ibn Hishām, p. 821 and the words of the poetess Kutāla, *Ibid.*, p. 539, which however might be interpreted merely as a polite formula; cf. Song of Solomon, vii. 2; Dalman, *Palästina-Lexikon*, p. 190, 255 19; E. Lütjmann, *Neuarabische Volksdichtung*, p. 121). On the other hand, the Meccan enemies of the Prophet say in SŪRA xliii. 30 that they would believe in him more readily if he had been one of the prominent men of the two cities (Mecca and YATH). The Hāshim family in any case could not compare with the most prominent families like the Makhzum and Umayya; and what is recorded of the needy circumstances of Muhammad and some of his relatives suggests that the Hāshim family must have been exceedingly poverty stricken at this time. On his mother's side he had connections, which are not clear to us, with Medina (cf. AMINA and HĀSHIM); according to Mīst b. 'Ukba the Medinese called al-'Abbās their "sister's son" (cf. Ibn Sa'd, iv/l. 8, 12). We know nothing more that is definite about his ancestry, for most of what is related is legend. His father, who is said to have died before his birth, is quite a colourless figure, whose name 'Abd Allāh is perhaps only a later improvement on a heathen name. His grandfather is called Shābi or 'Abd al-Muttalib; the connection between these two names is however as obscure as is that between 'Abd al-Muttalib and the off-mentioned family of Muttalib (Hama b. Thabit, N^o. 184, 1; Ibn Hishām, p. 230, 13, 536, 14) or the Banū Shāiba (Ibn Sa'd, i/l. 94, 8; ii/l. 124, 22).

The only thing certain from the Qur'an is that Muhammad grew up as an orphan in very miserable circumstances (SŪRA xciii. 6 29.). The first tangible historical figures among his relatives are his uncles: Abū Tālib, with whom tradition records that he found a kindly reception, 'Abbās, Hama [q. v.] and 'Abd al-'Uzza (cf. ABU LAHAB). On the idyllic little story of the boy's stay with the Beduin tribe of Sa'd b. Bakr, see the article HĀLIMA. The story of the cleansing of his breast (a similar story is related of 'Umayya b. Abū 'l-Salt; cf. Goldziher, *Abd. z. Arab. Phil.*, i. 213) is a materialisation of SŪRA xciv. 1.

In SŪRA xciii. already quoted, we are told that Allāh made the poor orphan prosperous. Corresponding to this in tradition is the marriage of Muhammad with a rich merchant's widow, in whose service he had been (cf. KHADĪJA). She bore him four daughters, who play a part in later history, and several sons all of whom died in infancy; one of them at least must be historical as his pagan name 'Abd Manāf (Sprenger, i. 199 22.; Caetani, i. 273) could not be invented by later writers; such a fiction in any case, as posthumous comfort to alleviate the disgrace of the lack of male heirs (Lammens), would be very inadequate, if it had to make the sons die again soon after their birth. The interest in business matters apparent in the Qur'an (SŪRA ii. 194; lii. 9 22.) as well as his fondness for business expressions (cf. however similar expressions in the Wisdom of Solomon, iv. 20; Pirke Abot, iii. 16; iv. 22; Horn, *Geogr. d. Pers. Litt.*, p. 10) are very natural if Muhammad took part in business transactions as Khadīja's assistant and husband. On the other hand, it would be wiser to set aside the alleged trading journeys into neighbouring lands, which he is said to have made even as a child with Abū Tālib and later in Khadīja's service; in the form in which they are given, they have distinctly apologetic tendencies (cf. BAṬĪNA) and are quite unnecessary to explain his later religious development. SŪRA xxxvii. 137 29. in any case is not clear proof that he himself had passed by Lot's dwellings on a journey. Nor did Khadīja equip trading caravans independently. Equally little confidence is to be placed in the story, which is given in the usual *maṣṣa* style, of the part played by Muhammad in rebuilding the Ka'ba.

While the questions already raised are really of no great importance, the problems which concern Muhammad's début as a religious reformer are of the utmost importance but offer the greatest difficulties to the student in view of the insufficient material available in the sources. The main question is: whence did Muhammad, who everywhere betrays a great receptivity for foreign matter, get his ideas? That he originally shared the religious conceptions of his milieu is in every way the most natural supposition — his uncle Abū Lahab was an ardent defender of paganism and Abū Tālib, who was like a father to him, died without adopting Islam — and is confirmed not only by the name of his son already mentioned but also by SŪRA xciii. 3: "God found thee wandering and guided thee" (cf. also xlii. 52: "Thou didst not know what book or belief was" and the statement of Ibn al-Kalbī that he once brought a sheep as a sacrifice to al-'Uzza). Distinct traces of his early beliefs survived in his later life. He shared the belief of his fellow-countrymen in *ginn* and *shayāṭin*, in evil omens etc. Mecca with its sanctuary was a sanctified place in his eyes (SŪRA xxvii. 93; xxviii. 57; xlix.

67; cv. 1. 199; cvl. 1. 199); he admitted the sacrifices offered there into the true worship (cviii. 2) and allowed his followers to take part in the pilgrimage (vii. 29 sq.) so that it was all the easier for him later to accept it as one of the main features of his religion (see below). We shall later discuss a relapse into paganism, which however was speedily overcome, as well as the fact that he was only gradually led to attack on principle the gods of Mecca. He was also influenced by the manner of the old Arab inspired soothsayers (cf. on the modern Kwaia: Mühl, *Die Kultur*, 1910, p. 10) to the extent that he adopted their peculiar form of speech with mysterious oaths and rhymed prose (*sajf*; cf. Goldziher, *Abhandlungen s. arab. Philol.*, I. 59 sqq.; Mas'ûdî, *Murûj*, iii. 381 sq.) when he began to announce his revelations. All his earlier conceptions were however driven out except for such trifling residues as these, when a new world of ideas began to fill him to an ever increasing extent, until he was finally compelled with irresistible force to come forth and proclaim them. These new ideas point mainly to the religions of the "possessors of a scripture" — Judaism and Christianity — and he was conscious of this, in as much as he repeatedly emphasises the agreement between his teaching and these older religions of revelation as irrefutable evidence of its truth (cf. the significant passage: "If thou art in doubt about what We have revealed, ask them who read the scripture before thee", Sûra x. 94). The only question is, in what way did he become possessed of these new ideas. This much only is certain that he did not get them from his own reading of the holy scriptures of the Jews and Christians. The word *ummi* [q. v.], applied to him (Sûra vii. 156) signifies, without committing us to anything about his ability in reading or writing — as a merchant he must have had a certain knowledge of these arts — that he was an illiterate layman, who was not able to read the Hebrew or Greek Bible, and that this was actually the case, the *Qur'ân* shows on every page. For this explanation of the term *Wemmiq*, *Acta orient.*, li. 191 and (citing the Hebrew *ummi* *ha-olam*) Horowitz, *Koranische Untersuchungen*, p. 52 would put "pagan", *idume*, *im*, although this might fit some passages, it could hardly suit Sûra ii. 73 where there is a reference to a difference between the "possessors of a scripture" and the *ummiyûn* among the Jews. The usual explanation suits well enough, as it is certain and it is confirmed by the *Qur'ân* everywhere that while Muhammad had some notion of the books of the Bible, the Hebrew and Greek Bibles were closed books to him. Utterances like the saying that Jesus "received" the Gospels (iii. 44; v. 50; lvii. 27) and that it should be "observed" like the law (v. 70, 72) clearly show that he did not know its real contents. Sûra xxi. 105 contains a quotation from the Psalms, but this is quite an isolated instance and he knew nothing of the Psalms as a part of the Old Testament (xvii. 57). The parable of the camel and the eye of a needle (vii. 38) proves of course no literary dependence and the alleged description of Muhammad and his followers in the Gospels (xviii. 29) shows what he could build up on a vague recollection of something he had heard. On the other hand the stories reproduced, e. g. the long account of Joseph (Sûra xii.), show that he was indirectly dependent on the Bible and not only on the Old but also on the New Testament (cf. what

he relates of Mary, Joseph, Zacharia and John); the story of the Seven Sleepers (cf. *Asfâr al-Kahf* and M. Huber, *Die Wunderlegenden von den Sieben schlafenden*, 1910) also presupposes Christian authorities. One therefore cannot blame his enemies when they said that he had foreign teachers (xvi. 105; xxv. 5 sq.; xlv. 13), which is certainly not refuted by the reply in xvi. 105. Further it is clear from the *Qur'ân* that he did not come into contact in this indirect way with the books of the Bible in their simple form, but that his authorities had drawn on Midrashic and Apocryphical works, which is easily explained by the varied and luxuriant character of the religious tendencies in Arabia. In particular what he tells of the birth and childhood of Jesus (xii. 22 sqq.; iii. 41; v. 109 sq.) comes from Apocryphal sources, and his account of the death of Jesus (iv. 156) has parallels among the Manichaeans and Basilidians.

To state exactly what religion exercised particular influence on Muhammad's ideas is hardly possible in view of the scanty information available about conditions in these days, especially as many things indicate that he was influenced from various sides, primarily by Christian sects, but later also by the Jews. There was ample opportunity to become acquainted with both these religions from caravans passing through to Syria or the lands of the Euphrates, from communication by sea with Abyssinia, and from foreign merchants visiting the great markets, and not only in the more advanced districts of South Arabia, but also among several Beduin tribes (e. g. Bakr, Taghlib, Hanifa, Jazir), Christianity had established itself, while Jewish colonies had settled in Medina and the oases north of it. But a citizen of Mecca in particular had repeated opportunities of coming into contact with Christians and Jews. The great festivals attracted people from all districts and it is expressly recorded that Christians also took part in the pilgrimage (Snouck Hurgronje, *Het Mekkanische Feest*, p. 28, 128, 159); in addition there were Christians captured in war and immigrant Ghassanids living in Mecca (Azrahi, ed. Wüstenfeld, p. 97, 458, 466; cf. the Christian slave in *Tûk*: Ibn Hisham, p. 280 sq.). In the *Qur'ân* alongside of expressions coming from the Aramaic, several Ethiopic loanwords are evidence of religious influence from Abyssinia (cf. Nöldeke, *Neue Beiträge zur semitischen Sprachwissenschaft*, p. 47). Recently scholars have been fond of seeking a main source of Muhammad's ideas and their formulation in the religious development which is alleged to have taken place in South Arabia. This is certainly a possibility to be reckoned with, but so long as we know so little of South Arabian religious history and in particular so long as no intermediate South Arabian forms are found for the Abyssinian loanwords in the *Qur'ân* we are better to set it aside. It should also be noted that Muhammad in his stories of the prophets frequently mentions the Arab tribes of 'Ad and Thamûd [q. v.] but only rarely touches on the older history of South Arabia (Sûra xxvii. 20 sqq.; xxxiv. 14 sq.; xlv. 26; l. 13, on the other hand hardly lxxxv. 1 sqq.; cf. M. Hartmann, *Die arabische Frage*, p. 474). In the utterance ascribed to the Prophet (Bokhârî, ed. Krehl, iii. 56): "Belief and wisdom are Yemen", Yemen, as the context shows, only means "of Yemen fashion", i. e. cultured, human, in contrast to Beduin uncouthness. The main objection however, is that the hypothesis would only mean

an unnecessarily circuitous route, for Muhammad always appeals directly to his agreement with Christianity, without suggesting any remodelling of these religions through a South Arabian medium. And the stronger one endeavours to make Yemenite influence on religious matters in Mecca, the more unintelligible becomes the stubborn opposition of the Meccans to Muhammad. Much greater weight should be given to Tor Andrae's treatment of the question of Muhammad's dependence on Christianity. After calling attention to the wide dissemination and dominating position of Nestorianism in the Persian empire, which is of importance as it must have been much more accessible to Muhammad than Monophysitism, he points out the close relationship between Muhammad's ideas and the ecclesiastical writings of the Syrians: the contempt for worldly possessions, the strong condemnation of the arrogance and frivolity of the unbelievers, the warnings against laughing, joking and careless speech, the emphasis on the significance of atonement for sin, the descriptions of Paradise (we even find the *houris* in Ephraim the Syrian) etc. Alongside of these very instructive similarities, there is however one point to be remembered in which the relationship is somewhat modified, namely Muhammad's Christology. It is, in any case, remarkable in several respects for it is distinguished from his other accounts of prophets and approximates to the teaching of the Church in striking fashion; e.g. in the account of the birth of Jesus and his miraculous gifts and in the undeniable echoes of the doctrine of the Logos (Sūra iii. 34; i. 169). But already in the Meccan period (e.g. xliii. 57 *sqq.*) Muhammad vigorously rejects the idea of Christ being the son of God and definitely denies that he had ever asserted anything of the kind of himself. Here it is not sufficient to point to the Nestorians since they did not deny that Christ was the son of God. When Muhammad from the first insists on the complete agreement of his teaching with the old revealed religions, i.e. with Christianity also, he seems to have been influenced by a form of Christianity where this dogma occupied a very unimportant position.

What one can deduce in this way from the Qur'ān about Muhammad's development is supplemented in an important way by tradition, according to which he was not alone in his search for a purer religion. Various individuals are named who, dissatisfied with old Arab religion, were seeking for a more intellectual faith, in particular a cousin of Khadija, Waraka b. Nawfal. Even if these traditions cannot be utilised in the form in which we have them, as they have been influenced by later Muslim ideas, yet they certainly have a historical basis, because they are not taken from the Qur'ān and are not intended to show Muhammad in a more favourable light. In addition there are the Hanifs [q.v.] of whom the traditions of the Arabs have preserved only a very hazy picture, and Umayya b. Abi 'l-Sālī [q.v.] whose poems often have points of contact with the Qur'ān, which would be of great importance if they could even in part be regarded as genuine [cf. also the article *MUNANIMA*].

While Muhammad was in a state of great spiritual excitement as a result of contact with the religious ideas that had penetrated into Arabia, something happened which suddenly transformed his whole consciousness and filled him with a spiritual strength

which decided the whole course of his life: he felt himself called to proclaim to his countrymen as a prophet the revelations which were communicated to him in a mysterious way. When Caetani wishes to see in this the result of a long development and continued reflection, this is certainly not correct. We have much rather every reason to trust the tradition which tells of a sudden outburst of conviction that he was called to proclaim the word of God. For this view we have the analogy of prophets in general, from the Old Testament prophets down to Joseph Smith; and no long drawn reflections but only an overwhelming spiritual happening could give him the unshakable conviction of his call. This is also confirmed by several passages in the Qur'ān, which point to a deciding moment, definite in time (xlii. 2 *sq.*, xcvi. 1; ii. 181), in which connection it is of minor importance whether it is possible to identify the revelation of the call itself among the Sūras of the Qur'ān (according to a common opinion, xcvi. 1 *sqq.*; according to some, on the other hand, lxxiv. 1 *sqq.*), especially as one must reckon with the possibility that the very earliest revelations were not written down. If this really was the case, however, the reason certainly was not that they were deliberately suppressed, since a revolutionary change of his world of ideas into its diametrical opposite while retaining the earlier apparatus of inspiration would be quite untenable hypothesis.

The Qur'ān gives only a few hints about the manner of these inspirations; a veil lay over them which the Prophet either could not or would not raise completely. Perhaps the wrapping up (lxxiii. 1; lxxiv. 1) refers to a preparation for the reception of the revelations in the manner of the old Arab *dhikr*; but we are taken further in an indirect way by the oft recurring accusation of his enemies that Muhammad was possessed (*madfūn*), a soothsayer (*kāhin*), a magician (*jāhī*), for they show that in his moments of inspiration he made an impression similar to those figures well known in ancient Arabia. In addition there are several traditions which describe his condition in such moments more fully and may undoubtedly be regarded as genuine, since they are the last thing later Muhammadanism might be expected to invent, while these mysterious seizures afforded to those around him the most valid evidence for the superhuman origin of his inspirations. In Byzantine authors we find it stated that the Prophet was an epileptic (e.g. Theophanes, *Chronographia*, ed. de Boor, I. 334); and modern psychiatrists recognise the correctness of these descriptions of his attacks and we must of course leave it to them to define the exact nature of his condition. From the scientific point of view the fact is that the voice heard by him only uttered what he had from time to time heard from others and which now cropped up out of his subconscious. The scientific student therefore does not see in Muhammad a deceiver but fully agrees with the impression of sincerity and truthfulness which his utterances in the older revelations make (e.g. Sūra, i. 16, 20, 123; xxviii. 85 *sq.*; lxx. 44; lxxv. 16 *sq.*; cf. vii. 202; xvi. 100; the cogent imperatives lxxiv. 2; xcvi. 1; the self-dedication [xxx. 1 *sqq.* etc.] along with the fact that he unselfishly endured years of hostility and humiliation in Mecca in the unshakable conviction of his lofty task. It is more difficult with the later Medinese revelations, in which it is often only too easy to

detect the human associations, to avoid the supposition that his parasyms (e.g. at the battle of Badr; *Ibn Hishām*, p. 444; in the slandering of 'Aḥīsa, p. 736, 2) could sometimes be artificially brought on, and there is even a tradition which makes 'Aḥīsa say to the Prophet: "Thy Lord seems to have been very quick in fulfilling thy prayers". It must not be forgotten however that natures like this, without actually being conscious of it, are able to provoke the same states of excitation, which earlier arose without their assistance; and so probably not only were his followers in Medina (cf. Ka'b b. Malik is *Ibn Hishām*, p. 614, 2) but even he himself convinced, that the spirit was continually hovering about him to communicate the revelations to him. By this we do not of course mean that in his ecstatic condition he received the divine communications *in extenso*, as we now have them in the *Kur'ān*: only the foundations were given him, which he afterwards developed into discourses of greater length. Since in doing this he used the external forms of the old Arab soothsayers it is natural that the Meccans took him for one, but it does not follow that he was spiritually akin from the first to those soothsayers who were inspired by *ghina*. The indignation with which his objects to being associated with them is not a proof of such a relationship of which he wished to rid himself, simply because he was conscious of the similarity, but a natural result of the fact that the enlightened Meccans saw in persons of this kind ludicrous fanatics of the lowest kind, while he was firmly convinced that he was filled with quite a different spirit, one quite unfamiliar to his enemies.

While it is in this way possible with the help of the *Kur'ān* and Tradition, to get an on the whole satisfactory picture of Muhammad's development and his condition when prophesying, he himself gives in the *Kur'ān* quite a different interpretation of the revelations that came to him, which is based on a peculiar theory which he apparently did not invent himself but adopted from others. The fundamental idea in it is the conception of a divine book existing in heaven, *al-Kutub*, a well guarded book, which only the pure may touch (vi. 76 *sqq.*), a well guarded tablet (lxxxv. 21 *sq.*), the mother of the book (xlii. 2 *sq.*), on honourable leaves, exalted and pure, by the hands of noble and pious scribes (lxxx. 13 *sqq.*). He himself did not read this book, as E. Meyer erroneously thinks, but it was communicated to him orally piece by piece, not in its original form but in an Arabic version intelligible to him and his countrymen (cf. xli. 1; xlii. 37; xx. 112; xxxi. 192 *sqq.*; xli. 2; xlii. 58 and especially xli. 44: "If we had made it a *Kur'ān* in a foreign tongue, they would say: Why are its signs ["*āyāt*"], from the small sections of the text) not expounded intelligibly? a foreign text and an Arab reader"). In addition there is the fact that Muhammad was aware that the complete contents of the book were not communicated to him, as he expressly states, e.g. of the stories of the prophets, not all of which were related to him (xl. 78; iv. 162). He received the communications orally, Allah rehearsing to him the substance of the separate sections (lxxxv. 16 *sqq.* etc.), while in several passages it is stated more precisely that the revelations were communicated through the Spirit (xxvi. 192 *sq.*;

xvi. 104; xlii. 52) or the Angel (xvi. 2; xv. 8; cf. lili. 5 *sqq.*; lxxxi. 23 *sqq.*): a late passage of the Medina period (li. 91) is even more precise in saying that they were communicated by Gabriel. References to visions are rare (e.g. the encouraging apparitions in Sūra viii. 45; xlviii. 27; the night journey must also have been a vision) and even in such cases the main thing is not what he heard (lili. 10; lxxxi. 19). These communications were the great miracle that was granted him, while he expressly and repeatedly says that the ability to perform miracles in the usual sense was denied to him (unlike Jesus).

From this book in heaven, the all-comprising contents of which are not by any means exhausted in the extracts forming the *Kur'ān*, also came the older religions of revelation "of the possessors of a scripture", whose religions therefore in his view coincide with his and, as he often says, were confirmed by it (cf. *Ḥasān b. Thābit*, N^o. 134, 2). This again is connected with a theory expounded by him of a line of prophets which began with Adam, and of which he was the last representative. His source for this idea was not Judaism, for he does not know of the great prophets who wrote books of the Old Testament; instead of them he mentions individuals, whom the Jews do not count as prophets, e.g. Lot, Joseph, Solomon, Job, etc.; on the other hand the fact that Jesus and John the Baptist are the last links in the chain of prophets clearly suggests a Christian origin, and certain parallels in more or less heretical early Christian literature can be demonstrated. Of the prophets Muhammad relates a number of stories, which do not begin to appear in any number until the middle Meccan period when the Meccans were beginning sharply to reject his mission.

The ideas in the oldest, passionately excited inspirations, developed under a haroque power of imagination rarely reached later, are very simple. They are based not on the dogmatic conception of monotheism but on the strong general religious and moral impression which contact with older religions had made upon him, which was bound finally to lead to a breach with polytheism. In particular he was filled with the idea of the moral responsibility of man created by Allah, and with the idea of the judgment to take place on the day of resurrection, which again points undoubtedly more to Christian than Jewish influence (cf. especially the introductory sounding of trumpets, not found among the Jews). To this are added vivid descriptions of the tortures of the damned and seductive pictures of the joys of Paradise, which are further of interest because they reveal Muhammad's strongly sensual temperament. Gradually monotheism was emphasized as an overruling basic idea and at the same time he attained a somewhat wider conception of the Deity. With all the vigour of an elemental religious nature, he points to the marvellous phenomenon of man (in this connection cf. the poem of the Jew Samaw'al, *al-Aḥmadīyāt*, ed. Ahlwardt, N^o. 20, 1). The religious duties which he imposes on himself and others are simple and few in number; one should believe in God, appeal to Him for forgiveness of sins (xlii. 11), offer prayers frequently on the model of the Jews and Christians, in the night also (xl. 116; lxxiii. 20; cf. lxxvi. 25 *sq.*), assist one's fellow-men, especially those who are in need, free oneself from the love of delusive wealth and — what

is significant for the commercial life of Mecca — from all forms of cheating (xxvi. 182 *sq.*; lv. 8 *sq.*), lead a chaste life and not expose newborn girls, as the barbarous custom of the time was (according to Sūra vi. 152; xvii. 33 from poverty, cf. al-Mubarrad, *Kamil*, ed. Wright, p. 277; originally perhaps a kind of magic to procure sons, when only girls had been born, cf. Būnī, *Kuṣair Amr*, p. 38; even before Muhammad's time there had been people who fought against this barbarous custom, cf. al-Mubarrad, *Kamil*, loc. cit.). This is the ideal of the truly pious man who is called by the name of *muṣliḥ* (lxviii. 35; xxi. 108 etc.) or *ḥaṣīf* (x. 405; xxx. 29; xviii. 4; cf. vi. 79 and the article). Cf. in this connection the list of Muhammad's precepts in A'ṣh's poem (Ibn Hiṣṣam, p. 255; *Morgenländische Forschungen*, p. 25 *sq.*).

From all this, it is quite evident that Muhammad had at this time no thought of founding a new religion. His task was only to be a "warner" (li. 50; lxxiv. 2; lxxix. 45; lxxx. 11; lxxxviii. 21 *sq.*), in view of the approach of the day of judgment, to his countrymen, to whom no prophet had yet been sent (vi. 157; xxviii. 46; xxxii. 2; xxxiv. 43; xxxvi. 51; no notice is taken here of Hūd and Ṣāliḥ) and as a result of the revelations granted him to give them, in the form of a *ḥuṣūl* Arabic *Qur'ān* (see above), what the "possessors of a scripture" had in their scriptures, which were not accessible to the Arabs and thereby to save them from the divine wrath. The Jews and Christians also must therefore testify to the truth of his preaching (x. 94; xvi. 45; xxi. 7; xxvi. 197; xxviii. 32 etc.).

On account of the insufficiency of the sources, it is very difficult to ascertain in detail how Muhammad's relations with the Meccans developed. The *Qur'ān* contains only vague hints, which permit no chronological arrangement, while the traditions are very full but little reliable. Only one report, which 'Urwā composed for the caliph 'Abd al-Malik (Tabari, i. 1180 *sq.*, 1224 *sq.*), the value of which has already been indicated by Sprenger, gives a brief but apparently trustworthy glimpse of the main events (cf. also al-Zuhri in Ibn Sa'd, i/1, 133). At first Muhammad met with no serious opposition and in not a few cases his preaching fell on fruitful soil; indeed in the words addressed to Ṣāliḥ (xi. 64) we may find a hint that he had at first aroused considerable expectations among the Meccans. All traditions agree that Khadija was the first believer, while they differ as to who was his first male adherent. In any case 'Abd Bakr, the uncommitted slave Zaid b. Haritha, Zuhair b. al-Awwām, Talha b. 'Ubayd Allāh, 'Abd al-Rahmān b. 'Awf, Sa'd b. Abi Waqqās, and Muhammad's cousin 'Alī (q. v.) were among his earliest followers. The majority of those who were won over by his preaching were however young and of no great social standing, while the well-to-do and influential held back (xix. 74; xxxiv. 30 *sq.*; xxxviii. 62 *sq.*; lxxiii. 11; lxxa. 1 *sq.*; cf. the veiled references in vii. 73; xi. 29; xvii. 17; xxvi. 111). This became still more the case when the full consequences of his ideas became clear to him and he openly attacked the religion of his native town; for the Meccans, to the majority of whom such devotional meetings had been a matter of complete indifference, now discovered that a religious revolution might be dangerous to their fairs and their trade. That this was the salient feature of their resistance to Muhammad is evident from the

fact that he frequently endeavours to calm the fears of the Quraysh on this point: the Meccan sanctuary, he said, belonged to his god Allāh, whom the Meccans also recognised as the highest god (xxx. 24; xxxix. 39; cf. Kaṣ b. al-Khaṭm, ed. Kownalski, v. 14; xiii. 12 where Allāh is the lord of the Ka'ba) and he will protect and bless his sanctuary, if they submit to him (xxvii. 93; xxxiii. 57; xxix. 67; cvl. 1 *sq.*). In addition there was the conservative attitude of these merchants in the field of religion and their animosity to new and fantastic ideas, particularly to that of the resurrection of the dead.

Traditions record at great length the persecution and ill treatment which Muhammad and his followers suffered at the hands of the Meccans. These descriptions are undoubtedly much exaggerated, for the object was to glorify the self-sacrifice of the believers and no doubt also to put the old patrician families of Mecca in an unfavourable light. But it is equally certain that there is some foundation for these stories. 'Urwā speaks of two persecutions (*ḥim*) which twice forced the believers to migrate, and in the *Qur'ān* there is mention of "trials" which their opponents inflicted upon the believers, men and women (lxxxv. 10), and it is expressly mentioned that the influential wished to prevent Muhammad from praying (xcvi. 9 *sq.*; cf. the veiled account vii. 84), while on the other hand, the complaints about what they would have liked to do should not be taken at their face value without more ado (viii. 26; xxxvi. 17; xvii. 78; cf. xi. 93). The peculiar feature, repeatedly found in stories of the prophets, that their opponents threaten them and their followers with stoning (Sūra xi. 93 and frequently) might suggest the hypothesis that Muhammad was actually threatened in this way by the Meccans, but this would probably only have been in a momentary outburst of passion and in any case the quarrel was mainly conducted in endless wordy disputations in which the spiritual advantage lay with Muhammad. His strength lay in the consciousness that he lived in a higher intellectual world which was closed to the Meccans and that he proclaimed ideas, "the equal of which neither men nor djinn with combined efforts could produce" (xvii. 90). Very pertinently he often points to the lack of logic in his enemies, when they recognise Allāh as the real true God but will not draw the logical deductions from this. Not even his most crushing arguments rebounded from the impregnable wall of their prejudices which were based on their material interests. This circumstance now began to influence the manner of his preaching in a very remarkable way. When his opponents mocked him because the divine judgment threatened by him did not come (xxviii. 15; lxx. 5) he began to describe in an increasing degree in his stories how the contemporaries of earlier prophets had met them with incredulity and had therefore brought on their heads dreadful punishments. That he did not use such means at the very beginning of his mission is evident from the fact that his preaching, according to the already mentioned credible tradition, at first gave no offence, and indeed this feature is lacking in the *sūras* which are certainly the oldest. It was the hardness of heart of his countrymen which made him take to this weapon in order to stir them. At first it proved by no means ineffective, as the Arabs knew of old trading peoples like the

Thamūd [q.v.], whose destruction might well give them cause for reflection. But gradually this line of attack lost its effect. To Muhammad however this resistance to the obvious truth was something so unintelligible that he could only find solace in an idea, which was to be of far-reaching importance in the further development of Muhammadan dogmatics: Allah, the immeasurably exalted and almighty, could of course not be impeded by the resistance of mortals; the unbelief of the Prophet's opponents was therefore an effect of the divine will: "Allah makes to err whom he will and guides whom he will" (x. 99; xxxii. 12 sq.; xxxv. 9; [xv. 34 etc.], a view which his enemies endeavoured not unskillfully to turn against himself (xvi. 37; xxxvi. 47).

Several episodes stand out in the Meccan period which are unfortunately more or less obscure and may be interpreted in various equally uncertain ways. It is certain, in spite of the silence maintained about it in the Qur'an (even xvi. 43 sq. does not refer to it), that Muhammad's community was at one time in so great distress that a considerable section of them migrated to Abyssinia. The later view was that participation in this flight became a patent of nobility similar to that conferred by the great Hijra to Medina, which was actually granted as a titular distinction (Wellhausen, *Skizzen*, iv. 113); but the Prophet gave the advice to seek protection among the Abyssinian Christians only to those of his followers, of whom he was afraid that they had not sufficient strength to maintain their faith under the difficult conditions in Mecca (cf. the significant story of the cool reception which some of the exiles later received on their return to Medina; Bukhārī, ed. Krehl, iii. 128). M. Hartmann's view that the emigrants were to conduct political propaganda in Abyssinia is not capable of proof. According to 'Urwa, these emigrants (i.e. probably the greater number of them) returned to their native town, when Islam had become strengthened by the accession to its ranks of a number of individuals of position. At the same time there is a different story of their return, which it would not be difficult to combine with 'Urwa's story if we assume that they gradually drifted back. We are told that Muhammad proclaimed in one of his sermons that the favourite duties of the Meccans, al-Lā'i, al-Uzā and Maḥāt [see these articles], might be regarded as divine beings whose intercession was effectual with Allah. This led to a general reconciliation, news of which reached Abyssinia and induced a number of the Meccans there to return home. Here however they learned to their horror that the agreement had been of short duration, as the Prophet had very soon recognised these words as interpolations of Satan and had substituted for them the words which we now have in Sura liii. 19-23. The credibility of this story has been doubted, certainly wrongly; for in view of the absolute impossibility of such a story being a later invention, any possible objections to the reliability of the authorities cited (Tabarī, i. 1192, 1195; Ibn Sa'd, i/i. 137 sq.) hardly deserve consideration and passages like vi. 56, 57; xvii. 75 sq. (cf. iv. 113) amply show that the incident was quite possible from the psychological point of view.

It is much more difficult to elucidate another episode of the Meccan period, the story of the boycott of the Hāshimids. That Muhammad's whole

position during his struggle with the Meccans was only made possible by the support given him by his own family has already been indicated. All members of the family of Hāshim with the exception of Abū Lahab [q.v.], who on this account is perpetually damned in the Qur'an along with his wife, chivalrously fulfilled their duty in this respect, although only a few of them believed in his call. It would therefore be not unnatural in itself for the Meccans in the end to attempt to make the whole family innocents without bringing on themselves the guilt of bloodshed by an open attack. The story, however, which tells how they forced the Hāshimids to withdraw into their own part of the town and pledged themselves to refrain from intermarriage or commerce with them, is confirmed neither by the Qur'an nor by 'Urwa, but sounds in itself somewhat suspicious and is probably much exaggerated. That the effort finally failed is conceded by the story itself. On the other hand, it is quite possible that Khadija's fortune may have suffered considerably from Muhammad's obligations to his necessitous followers and from the enmity of the influential merchant princes.

To the last portion of the Meccan period most probably belongs Muhammad's nocturnal journey, later so celebrated, to the " remotest place of prayer", to which xvii. 1 (perhaps also verse 62) briefly refers, no doubt a vision, which however made upon him an impression of reality. According to the prevailing opinion, the terminus of this journey was the temple in Jerusalem, and conclusions are drawn from this about the great significance which this city then had for him. Schrieke (*lit.*, vi. 1. 199) and Horowitz (*ibid.*, ix. 159 sq.) have however sought to show that *maḥallat al-aḥqā* refers to the place of prayer of the angels in heaven (cf. vii. 205; xxxix. 75), for which view several cogent arguments can be produced, notably that the nocturnal journey is associated with the journey to heaven as early as in the tradition given by Ibn Ishāq and that in the Qur'an there is several times a reference to an ascent into heaven (vi. 35; xvii. 92 sq.; xv. 14 sq.).

Of other details we may further recall that Muhammad, who, as already remarked, was firmly convinced that his preaching agreed with the religion of the "possessors of a scripture", nevertheless had already begun in Mecca to reject the christological dogmas of the church. This is certain from the conversation with his pagan opponents (xliii. 57 sq.) which can only have taken place in Mecca. This however does not affect his idea of the fundamental identity of his with the older revelations but only the false doctrine later adopted in the church, for he makes Jesus vigorously reject the doctrine of his divinity; but this limitation of his theory was not without importance and was able to serve him as a model in his later criticism of Judaism.

The sources are somewhat fuller for the close of the Meccan period, although late tendentious historiography has coloured everything in the traditions. According to 'Urwa's account, Muhammad did, it is true, succeed in winning a few notables in Mecca (including probably 'Umar) for his teaching, after the emigration of a number of his followers to Abyssinia. But on the whole his attempt at a religious reformation could be regarded as having failed; and when Khadija and Abū

Talib died, his position gradually became more and more hopeless. An attempt to establish himself in Tā'if brought him into considerable danger, according to the narrative, although the approval of his preaching expressed by some djinn (cf. xvi. 28; lxiii. 1) certainly raised his drooping spirits. It was probably at this period that Muṭ'im b. 'Adi took him under his protection, which is corroborated by Ḥaṣṣan b. Thābit (N^o. lxxxviii.). He could now have consoled himself with the reflection that he had done his duty as a "warner" and could regard it as the will of Allāh that his countrymen were not to be saved (cf. x. 99; xlii. 89). But the consciousness of being a chosen instrument of Allāh had gradually become so powerful within him that he was no longer able to sink back into an inglorious existence with his object unachieved. His astonishing gift of being able to exert a powerful religious suggestion even on men who were intellectually superior to him imperiously demanded a wider sphere of activity than a small number of adherents, mostly without influence. In addition, there was a factor of which he himself was certainly unconscious but which is apparent on every page of the Meccan sūras, namely his mental exhaustion. All this brought him to the idea of looking for a new sphere of activity outside Mecca, however difficult it must have been for an Arab to break the links that bound him to his tribe and family. The congress of people from all parts at the pilgrimage gave him good opportunities to attempt to find one. After several unsuccessful negotiations he found a favourable soil for his scheme with some men from Medina. Unfortunately we know very little about conditions at this time in this town (q. v.) but we may safely assume that the large number of Jews in it had contributed to make the peasant population of Medina somewhat familiar with religious ideas (cf. Ibn Hishām, p. 178). There is however no question that the Medinese did not so much want to attract an inspired preacher to themselves as to get a political leader, who would readjust their political relations, which had been shattered in the tribal conflicts culminating in the battle of Bu'ath (q. v.). With this we are faced with one of the most difficult problems in the biography of Muhammad, the double personality which he presents to us. The inspired religious enthusiast, whose ideas mainly centred around the coming last judgment, who had borne all insults and attacks, who only timidly touched on the possibility of active resistance (xvi. 127) and preferred to leave everything to Allāh's intervention, with the migration to Medina enters upon a secular stage and at one stroke shows himself a brilliant political genius. That Muhammad's eye in Mecca took in the wider political situation is evident from the prophecy in Sūra xxx. 1 sq.; but the passage is quite isolated there and in any case M. Hartmann's effort (*Die arabishe Frage*, p. 53), to make him play the part of a far-seeing diplomat in international politics is based on fanciful arguments with no basis in the sources. Nevertheless in the despatch of a section of his followers to Abyssinia and in the attempt to reach a compromise with the polytheists in Mecca, we have hints which to some extent bridge over the gulf between the two figures. The decisive point however is that the Medinese would certainly not have thought of seeking in him a saviour from their social and political difficulties, if they had not been

much impressed by his abilities in this direction.

After Muhammad had entered into relations with some Medinese who had come as pilgrims to Mecca, the latter began to spread Islām in their native town along with men whom he had sent there and thus he was able after a preliminary conference in al-Akaba (q. v.) to conclude at the pilgrimage next year (622) at the same place a formal agreement with a considerable number of Medinese, in which they pledged themselves in the name of their fellow-citizens, to take him into their community and to protect him as one of their own citizens, which, as the further history shows, was also to hold for his Meccan followers if they moved to Medina. Tradition, and no doubt rightly, here mentions only the promise of the Medinese to take Muhammad under their protection and not any further obligations. On the other hand according to Ibn Hishām, p. 287, at the first conference at 'Akaba Muhammad is said to have imposed a series of commands upon them; but this so-called "women's homage" is, as the very name shows, taken from the later Sūra ix. 12 and is clearly adapted to Meccan conditions (cf. especially the vow not to kill children). These negotiations, which could not remain unknown to the Meccans, produced great bitterness, and a second *ḥimā*, as 'Urwa says, began for the believers, which must have still more confirmed them in their resolution to migrate to Medina. They slipped away in larger or smaller bodies, so that finally only Muhammad with Abū Bakr and, according to the story 'Ali, was left. That the Prophet did not go with the others was certainly due to the fact that the Meccans otherwise would have prevented the whole emigration. They knew him well enough to see the danger if he were to ally himself with another tribe and there is therefore no reason to doubt Tradition when it relates, although with much legendary embellishment (cf. on David's flight: Tahatt, i. 556), how he had to be the last to flee from the town. Tradition is also confirmed by Sūra ix. 40 where there is mention of Muhammad and his companion (Abū Bakr) stopping in the cave.

The migration of the Prophet, the Hījra (q. v.), has been with justice taken by the Muslims as the starting-point of their chronology, for it forms the first stage in a movement which in a short time became of significance in the history of the world. According to the usual calculation, he arrived in Kubā', a suburb of Medina, on the 12th Rabi' I of the first year, i. e. Sept. 24, 622 and shortly after went into his new home. The tasks which awaited him placed the greatest strain on his diplomatic and organizing abilities. He could only rely with absolute certainty on those who had migrated with him (the *Muhājirūn*, q. v.) for their whole future existence depended entirely on him and of course only those had migrated who were firmly convinced of the truth of his mission. In addition, there were those Medinese who had already adopted Islām or did so soon after his arrival, the so-called *Anṣār* (q. v.) or "helpers", who however formed only a portion of the inhabitants of Medina. He only found direct opposition in a few families, like the 'Aws Allāh; but at the same time there were a number who while they did not exactly oppose him only reluctantly accepted the new relations, the so-called *Muṣallifūn* (q. v.), who were to cause

him much anxiety. Fortunately for him, they were led by a man, the Khazrajī 'Abd Allāh b. Uhayy, who possessed the *munāḥif* quality of irresolution to such an extent that he regularly let slip every occasion on which he might have offered successful opposition. A further danger lay in the fact that the old and bitter feud between the two chief parties, the 'Aws and Khazraj, had by no means died down, but might easily break out again on any occasion. Finally there were the Jews (in the first place *al-Khazimān*, i. e. the Nadir and Gataira; cf. Kaïs b. al-Khaṭim, ed. Kowalski, xx.; Ḥassān b. Thābit, N^o. 216, 19; Ibn Hishām, p. 560 and Ibn Sa'd, viii. 86, 91) and the Judaicised tribes in Medina, who played an important part because of their wealth and the support they had in the Jewish colonies in Khaibar etc. For Muhammad they were on the whole a plus factor in his calculations for, according to his theory already mentioned, he ought to expect that they would champion the truth of his preaching. His relations with the Christians in Medina (cf. Ḥassān b. Thābit, N^o. 135, 17) were no longer absolutely unstrained, since he had begun in Mecca to reject the orthodox ecclesiastical Christology; but they were insignificant and could be ignored. He also had a much greater sympathy with them than with the Jews (v. 85; lvii. 27).

Muhammad had to form a united community out of these heterogeneous elements. The first problem to be tackled was how to procure the necessary means of subsistence for the emigrants, who were for the most part without means or work, which could for the time being only be done through the self-sacrifice of the Anṣār and certainly only very inadequately. To strengthen their claims for protection, he ordered the relationship of brotherhood to be created between each emigrant and a man of Medina. This arrangement, to which was added brotherhood between every two emigrants, was abolished after the battle of Badr by Sūra xxxiii. 6 and left only a few traces (see Ibn Sa'd, iii. xxiv.). On the other hand, we possess for a somewhat later period, when relations between Muhammad and the Jews had begun to be strained, a very valuable document in Muhammad's constitution of the community which has been preserved by Ibn Ishāq. It reveals his great diplomatic gifts, for it allows the ideal which he cherished of an *ummah* definitely religious in outlook to sink temporarily into the background and is shaped essentially by practical considerations. It is true that the highest authority is with Allāh and Muhammad, before whom all matters of importance are to be laid; but the *ummas* included also Jews and pagans, so that the legal forms of the old Arab tribes are substantially preserved. This scheme had however no considerable practical importance; it is nowhere mentioned in the Qur'ān (hardly even in viii. 58), because it was soon rendered obsolete by the rapidly changing conditions.

It is a proof of the Prophet's political wisdom that he endeavoured to attach the Jews to himself by taking over several features of their worship. Thus he made the 10th Muḥarram a fast-day, obviously in imitation of the Jewish fast on the 10th Tishri, the day of atonement, which is particularly obvious in its name, taken from the Aramaic (*ʿAṣṣur*). On Jewish practice are probably also based the introduction of the midday ṣalāt, which was now (ii. 239) added to the morning and

evening ṣalāts and the earlier rule about purification before the ṣalāt (iv. 46; v. 97). On the other hand, Friday as the day of the common ṣalāt, which probably goes back to the Jewish day of preparation (cf. Becker's correction to Ibn Sa'd, iii. 83, 23; in *lvi*, iii. 519), is said to have been already introduced before the Hijra by Muṣ'ab b. 'Umayr (according to others, Aḥad b. Zurāra). Whether the choice of Jerusalem as the *ḥibla* [q. v.] was one of the concessions made to the Medinese Jews is uncertain as the statements about his attitude in Mecca on this point differ. But it is improbable that he should have turned towards the Ka'ba there, otherwise it is difficult to understand how the different stories could have arisen. But whether he then used Jerusalem as the *ḥibla*, which need not necessarily mean a borrowing from the Jews, as this direction of prayer was elsewhere found in the east, e. g. among the Ebionites and Elkesaites, whether he turned to the east like many Christians, or whether he had a *ḥibla* at all (the Qur'ān is silent on the point) is uncertain, but in any case the balance of probability is in favour of the Jerusalem *ḥibla* having been one of the alterations made to gratify the Medinese Jews. If some writers have seen in the immediate erection of a place of prayer (Ibn Hishām, p. 336) a copying of the Jewish synagogues, Caetani has with weighty reasons argued that this was not a building definitely assigned to the worship of God, since the alleged *masjid* was also used for all kinds of secular purposes, because in reality it was simply the court-yard (*dār*) occupied by Muhammad and his family, while the assemblies for regular worship were held on the *maḥallā* [cf. *MAḤALLA*]. But nevertheless the "mosque of opposition" so called by the Prophet with horror (Sūra ix. 108; see below) seems to have been an actual building recalling the Jewish synagogues. In spite of these concessions to the Jews, it soon became obvious that he had seriously miscalculated with regard to them. Although they undoubtedly cherished lively expectations of the coming of the Messiah (Ibn Hishām, p. 286, 373 sq.) they could not possibly recognise an Arab as the expected Messiah and he had soon reason to lament that only a few among them believed in him (iii. 106). In particular, the misunderstandings in his reproduction of the Old Testament stories or laws aroused the notorious Jewish love of ridicule and thus brought him into an unfortunate position. His conviction of the divine origin of his mission and his position among the believers would not allow him to confess that he had made a mistake and on the other hand he had too often himself appealed to the testimony of the older religions of revelation to be able to ignore this criticism. He rescued himself from this dilemma by asserting that the Jews had only received a portion of the revelation (iv. 47; cf. iii. 115) and even this included a number of special laws adapted to a particular age (iv. 158; vi. 147; xvi. 119) but they had also concealed all sorts of things in their holy scriptures (ii. 39, 141, 154, 169; iii. 64 etc.) and indeed had even falsified their scriptures (ii. 56; iv. 48; v. 16, 45; vii. 162; cf. Ḥassān b. Thābit, N^o. 96, 2; and the article *TAYYIB*), in short they obtained hardly more benefit from their scriptures than an ass from the books which he is carrying on his back (lxii. 5). The Jews were not able to refute these assertions for, although he challenged them to produce these scriptures

(iii. 87) neither he nor his followers could read a word of them. He therefore now poured forth the vials of his wrath upon the Jews in many speeches and awaited the time when he would be able to refute their criticism and malicious witticisms and tergiversations in convincing fashion (e.g. iii. 177 *sqq.*; iv. 48). As he had now already begun to regard the church doctrine of the Christians as a corruption of the true teaching of Jesus, he felt himself called upon to reform the degenerate religious of revelation, each of which asserted it was the only true one (ii. 107). As a result he now claimed a special place among the prophets; he is seal of the prophets (xxxiii. 40; a metaphorical expression which Mani among others applied to himself and which indicates the conclusion of the series), he is the last prophet, to whom Jesus himself had pointed under the name Ahmad (lxi. 6; cf. iii. 75). Still he is not thinking any more than before of introducing a new religion but only of restoring the religious proclaimed by the prophets from the beginning. But nevertheless the early years after the migration were the period when Muhammadanism was born as an independent religion, for parallel with his criticism of the religions of revelation and in particular opposition to Judaism ran a positive shaping of Islam, through which he was emancipating himself in important points from his previous models. He gave his religion a pronounced national character by taking over various elements from the worship of the old Arabs and associating them with his religious ideas. In the second year of the Hijra (July 623—June 624) after some hesitation, he ordered that Jerusalem should no longer be the *qibla* at prayer but the ancient sanctuary of the Black Stone at Mecca (ii. 136—145) for it "is a gathering-place and a safe retreat for men" (ii. 119). His native town was thus made the centre of the true religion. As a substitute for the pilgrimage which he now adopted into his religion as one of the main rites, but from which he and his followers were temporarily cut off, he had an animal sacrificed in this year on the 10th Dhu l-Hijja on the *maḥalla* in Medina (Tabari, i. 1362; according to Ibn Sa'd, i/ii. 9 he continued this after the occupation of Mecca) and in the following year he calls the *ḥajj* one of the obligations of believers towards Allah (iii. 90 *sq.*). Friday retained its significance but was not to be a day of rest like the Jewish Sabbath (lxii. 9 *sq.*), which is connected with his rejection of the Old Testament idea of God resting after the creation (i. 37). In place of the fasting on 'Ashūra', he substituted quite a new particular rite, according to which his followers were to fast throughout Ramaḍān, the month, in which he had received the fundamental revelation (ii. 281), as long as the sun was visible in the heavens. The Manichaeans had a similar custom; but whether he took the new revelation from them or from another sect cannot be ascertained (cf. KAMARĀN).

This nationalisation of Islam, which was to have so many results, gave Muhammad a final legitimation, which brought it into harmony with his earlier appeal to the religions of revelation, as he came forward as the restorer of the religion of Abraham (*millat* *Abrahim*) which had been corrupted by the Jews and Christians. Abraham, whom Jews and Christians alike regarded as the great type of faith and whom he had himself emphatically indicated as the true *ḥanif* (e.g. vi. 79), now becomes

the great *ḥanif*, not only in contrast to the heathen but also to the possessors of a scripture (neither polytheist, nor Jew nor Christian [ii. 129; iii. 60, 89] wherefore, as Snouck Hurgronje has shown, vi. 162 and vi. 124 must also be Medinenses). He and his son Ishmael, the ancestor of the Arabs, founded the Meccan sanctuary and the rites celebrated here, now corrupted by the heathen, which Muhammad is to restore (ii. 118 *sq.*; xlii. 27 *sq.*). Whether this bold idea, which according to Sāma iii. 58 met with opposition from the possessors of a scripture, was an original one and in this case a really brilliant invention of Muhammad's or whether it was already in existence, for example among arabised Jews, cannot be decided. The only thing certain is that he cannot have been acquainted with it in Mecca for we meet it nowhere in connection with mentions of the Ka'ba and it is actually excluded by the passages mentioned above (p. 726^a).

While his religion was being transformed in this way, Muhammad's personal position was being gradually changed by the altered conditions. According to the already mentioned constitution of the community, all important matters were to be laid before Allah and himself. It now became a fundamental duty of the believers to be obedient to Allah and to himself (iii. 3, 29, 126, 166; iv. 17 *sq.*, 62 [where it is added: "and to those among you who have to exercise authority"]; v. 93; xxiv. 51, 62; cf. also ix. 12, the "women's homage" which is inserted in the account of the second conference at Aḥabā, Ibn Hiṣham, p. 289) and those who are disobedient are threatened with the tortures of hell (ix. 64). Alongside of the belief in Allah now appears belief in the Prophet (xlviii. 9; lxi. 8 *etc.*). Allah is his protector, as is Gabriel, and the angels are at his disposal (lxi. 4). He claims certain privileges, which suggest a worldly, mortal rather than a spiritual leader (xxiv. 62; xlix. 2 *sqq.*; xxiv. 63; lviii. 13 *sq.*; xxxiii. 53) but which however must be described as quite moderate demands.

The elevation of Mecca to be the centre of his religion imposed on Muhammad new tasks, which were soon to lead to unexpected results. If visiting the holy places in and around Mecca was a duty of the Muslim, who were excluded from the town (xxii. 25 *sq.*), the result was the inevitable necessity of forcing admission to them. In addition the Prophet had an account to settle with the Meccans, for by his expulsion they had triumphed over him in the eyes of the world and the punishment repeatedly threatened them had not materialised, unlike the stereotyped punishments of the godless in the stories of the prophets. This led to a new command, that of the holy war ("war on the path of Allah", *al-djihad*, q. v.), and to set such a war in motion now became the object of his endeavour, which he tenaciously pursued. There were however considerable difficulties in the way of achieving this object. The Medinenses had only pledged themselves to defend him like one of their number if he were attacked, and the anything but warlike merchants of Mecca were not inclined to oblige him by beginning. The emigrants were, it is true, not bound in this way, but it went nevertheless very much against their feelings as Arabs openly to fight members of their tribe and blood relations. How much their resistance vexed him is shown by the vigorous reproaches which he makes to his

followers in this connection (ii. 212; xiii. 39 *sup.* etc.) He succeeded however in finding a way out of the difficulty, which might be able to pave the way for military enterprises without injuring these feelings too much. After he had sent different men with small armed forces who did not succeed in countering the enemy, in Najdah, one of the sacred months in which all fighting was forbidden, he sent some of his followers to Najdah, where a caravan was expected and gave their leader sealed orders in which he left it to their judgment what they should do. They did not disappoint him for they fell upon the caravan which fell secure until the end of the month and one of the Meccans was killed. The rich plunder was sent to Medina, where in the meanwhile a storm of indignation had broken out. Muhammad however gave the people time to recover and finally calmed them, by the revelation ii. 214. The success of the coup had had such an effect in Medina that not only emigrants but also a number of Ansār offered their services, when he appealed for followers in Ramaḍān 2 A.H. in a new raid, which he himself would lead. On this occasion chance came to his aid in unexpected fashion. He had learned that a rich caravan was on its way from Syria and he decided to ambush it at Badr [q. v.]. The very cautious Abū Sufyān [q. v.] who was leading the caravan got wind of his plan however and sent messengers express to Mecca for help. But when by a diversion to the coast he had reached safety, he soon afterwards sent other messengers to Mecca to cancel the first message. The angered Meccans had however already collected an army which was three times the size of Muhammad's little handful of men and were unwilling to let the opportunity escape of properly chastising their troublesome enemy. They went to Badr where soon afterwards Muhammad arrived with his men, expecting to meet Abū Sufyān's helpless caravan. When they discovered their mistake they were filled with terror (viii. 5 *sup.*; cf. the continuation of 'Urwā's story; Tabari, i. 1284 *sup.*); but the Prophet saw in the encounter the wonderful dispensation of Allah, who wished to force them to a battle and his remarkable power of suggestion was able so to inspire his men that they completely routed the far superior enemy. A number of the Meccans, including the leader of the aristocrats Abū Jahl, were slain and several, including Muhammad's uncle 'Abbās, were brought prisoners to Medina, where Muhammad had two of them, al-Nadr and 'Ukba b. Abi Mu'ait, put to death, while the others were held to ransom. This in our eyes very insignificant fracas, which however must be judged in light of the observation by Doughty who knew the country (*Travels*, ii. 378), became of the utmost significance for the history of Islam. So Muhammad saw in the victory a powerful confirmation of his belief in the superiority of Allah (viii. 17, 66; iii. 119; cf. Ka'b b. Malik, in Ibn Hišām, p. 520 *sup.*) and in his own call, and besides the commercial city of Mecca enjoyed such great prestige in Arabia that its conqueror was bound to attract all eyes to himself. He therefore displayed even greater energy and was able to utilise the advantages he had won. After he had drawn up the programme given in Sūra viii. 57 *sup.* he began to besiege the Jewish tribe of Khaybar in their forts. The Musāhikin did not dare to oppose him seriously and the other Jews left their co-religionists in the lurch in shame-

ful fashion (cf. ix. 24) so that the latter were forced to migrate to Transjordania.

In order to protect himself while fighting from attacks from another foe, Muhammad at this time adopted a plan which is a further proof of his outstanding political ability. He concluded, as a number of letters that have been preserved show (cf. J. Sperber, *Mitteilungen des Seminars für orient. Sprachen*, 1916), as lord of Medina, alliances with a number of Beduin tribes in which the two parties pledged themselves to assist one another.

In the year 3 A.H. (JUNE 624—JUNE 625) Muhammad continued his attacks on the Meccan caravans so that the Quraysh finally saw the necessity of taking more vigorous measures and revenging themselves for Badr. An army of 5,000 men was equipped and set out with much display for Medina under the leadership of Abū Sufyān, who was little suited for the task. Although several of his followers advised Muhammad to make his defence within the town, he decided to go out with his forces, which had been much reduced by the departure of the Musāhikin, and took up a position at the foot of the hill of Uhud [q. v.]. In spite of the numerical superiority of the Meccans, the fighting at first went in favour of the Muslims, until a number of archers who had been placed to defend his flank joined against Muhammad's express orders in the battle, which promised to yield rich booty and this at once enabled Khalid b. al-Walid to fall upon Muhammad's flank. The tables were now turned and many of the Muslims began to flee, especially when the rumour spread that the Prophet had fallen (cf. iii. 138). In reality he was only wounded and escaped with a few faithful followers through a ravine on to the south side of the hill. Fortunately for him, the Meccans were quite incompetent to follow up their victory and as they thought that Muhammad had been punished and their honour saved, they turned quietly back to Mecca. The Prophet was thus saved from the worst, but he had to lament many fallen friends including Hanzal [q. v.] and his newly acquired prestige naturally also suffered. With all the eloquence in his power he endeavoured to raise the morale of his followers by exhortation and censure alike (iii. 114 *sup.*, 133—154, 159—200) but the consequences of his reverse did not fail to materialise. The Jews who had taken no part in the fighting (according to Ibn Hišām, they were observing the Sabbath), made no secret of their delight at his misfortune, and several Beduin tribes next year (4 A.H. = JUNE 625—beginning of JUNE 626; the eclipse of the moon which took place in Dhu'l-Hiǧǧa II of this year was that visible in Medina in the night of Nov. 19—20, 625; cf. Rhodokanakis, in *W. Z. N. M.*, xiv. 105; Caetani, i. 598 *sup.*) showed how much his prestige with them had sunk [cf. M's MA'WNA]. It was therefore all the more necessary to make an example and another Jewish tribe in Medina, the Nadir, seemed a suitable object after Ka'b b. Ashraf's (q. v. and cf. Hassan b. Ithābit, No. 97) murder had served as a prelude. It is made a charge against them in Sūra ix. 4 that they defy Allah and his messenger, on which account Tradition imputes all sorts of crimes to them. After a siege of several weeks (Tabari, i. 1850; cf. Euting, *Tagebuch*, p. 111) they were forced to emigrate to Khaybar or Syria. They left behind them their weapons and their gold and silver as a rich booty, the distribution

of which on this occasion Muhammad reserved for himself (ix. 6 *sqq.*).

To this period most probably belongs the prohibition of the drinking of wine which is characteristic of Islām (v. 92 *sq.*; cf. the instructive gradation in lxxxiii. 25; xvi. 69; iv. 46; ii. 216, where the word "great" is to be deleted as Schwally proposes). It has been connected with a number of features of life in the old Semitic east but the main reason should rather be sought in the connection with the *maṣīb* games (q. v.). Drinking-bouts with feasting on a specially slain camel and games of chance, which were in the eyes of the old Arabs the bright spots in their hard struggle for existence, and in which they endeavoured to display their nobility and hospitality, brought the Muslims into suspicious relations with pagans and with Christian and Jewish wine-sellers, which might easily lead to their faltering in their new religion (cf. Wākidi, transl. Wellhausen, p. 100; Bukhārī, ed. Krehl, ii. 270 *sq.*); and this might explain why he forbade both at the same time, which of course does not exclude the possibility that forms of abstinence for other reasons may have been known to him (Muṣallima's prohibition of wine was obviously intended as asceticism; cf. the article). While Muhammad was endeavouring to restore his weakened authority, a new and threatening storm came upon him and Medina from Mecca. The Quraysh, whose caravans were being continually harassed by him (cf. Ḥaṣṣān b. Thābit, N^o. 16, 6 *sq.*) and who were urged on by the Jews of Khaibar, recognised that the victory at Uhud had only been a blow in the air and realised the necessity of occupying Medina, which they had then neglected to do. Conscious of their slight military skill, they negotiated vigorously with various Beduin tribes and thus raised a large army — said to have been 10,000 men — with which they set out against Medina in the year 5 (June 626—May 627). The various accounts of the season of the year (sometimes a month after the barley harvest, sometimes cold winter storms, the latter in agreement with Sūra xxxiii. 9; cf. Ḥaṣṣān b. Thābit, N^o. 14, 9) may be reconciled by the possibility that the siege lasted a considerable time (cf. Doughty's description, *Travels*, ii. 429 *sqq.* of the siege of Anṣere, which in general illustrates this war excellently). The advance of this imposing army produced great consternation in Medina, which was still further increased by the vacillating attitude of the Maudhūghūn and by the discovery or perhaps only the suspicion that the Jews were conspiring with the enemy (xxxiii. 10 *sqq.*, 26). Muhammad in order to strengthen the defences had a ditch (*khandaq*, a Persian word) dug in front of the unprotected parts of the town. According to several stories, he did this on the advice of a Persian named Salmaṣ but J. Horowitz (cf. *Isl.*, xii. 178—183) would reject this as a later accretion. Modest as the defences were — about 150 years later Ṭāḥ b. Mūsā bridged the ditch which had been restored by Muhammad b. 'Abd Allāh, by throwing a few doors across it — they seem to have imposed upon the enemy who had little experience in the art of war and the siege gradually dragged on. The able hand of Medina used the time for secret negotiations with the Ghatafan and cleverly stirred up distrust of one another among his opponents and when at the same time the weather conditions became unfavourable the besiegers lost heart and

gradually began to retire so that the last effort of the Quraysh to destroy their sinister foe came to nothing. For one section of the participants however, the comedy of the "War of the Ditch" was to become a bloody tragedy. Hardly had the besiegers retired than the Prophet declared war on the last Jewish tribe of any size, the Qurayza, and began to besiege their quarter of the town. The Jews no doubt hoped to escape in the same easy fashion as the Nadir had, especially as their allies, the 'Aws, were very actively trying to induce Muhammad to clemency; but this time he was inexorable and carried out seriously a threat that he had previously made (lix. 3). Tradition has however endeavoured to put the responsibility for the massacre of the Qurayza on Sa'd b. Mu'adh (cf. Ḥaṣṣān b. Thābit, N^o. clxvii., who asserts Sa'd's innocence). But there are various indications that it was the Prophet himself who made the decision and perhaps induced the Jews to surrender. On this occasion the Jews showed a strength of character and nobility of spirit which throws a redeeming light on their otherwise so ignoble history.

By these amputations, which however did not remove all the Jews from Medina (cf. Ibn Hishām, p. 895; Wākidi-Wellhausen, p. 264, 309, 393; Ḥaṣṣān b. Thābit, N^o. 133, 27), the Prophet had come nearer his goal, the organisation of an *umma* on a purely religious basis, which hitherto he had to keep somewhat in the background for political reasons. For the present he continued his attacks on the Meccan caravans far into the year 6 (May 627—May 628) and his raids, usually punitive expeditions, on Beduin tribes; of these expeditions, which have no particular interest, mention may be made of that against the Banū Muṣallā which must have taken place about this time, as it gave rise to a serious conflict between the Muhājirūn and the Anṣār and involved 'Ā'ishā (q. v.) in the celebrated adventure which nearly cost her her position as the wife of the Prophet, until finally a revelation saved her (xxiv. 4 *sq.*, 10—20).

Towards the end of the year 6 Muhammad thought that his position in Medina was so firmly established that he could risk a step, which would bring him nearer the desired goal. He and the emigrants were still excluded from Mecca and its holy places, but through secret confidential agents, among whom we may certainly include his carefully calculating uncle 'Abbās, he knew that feeling in the town had been gradually coming round (cf. xlviii. 15; lx. 7). An increasing number had become tired of the hopeless wars and thought it would be much more advantageous for the commerce of Mecca to make peace with their indefatigable enemy, especially after he had adopted into his programme the pilgrimages to their fairs, the source of the city's wealth. Trusting to this revulsion of feeling he gave his followers in Dhu 'l-Ka'da of the year 6, i. e. March 628 (the news of the death of the Persian king Khusrāw Parwēz on the Feb. 29 of this year reached him on the way) orders to provide themselves with sacrificial victims and undertake an 'umra (q. v.) with him to Mecca, as Allāh in a vision had promised him a successful fulfilment of the visit (xlviii. 27). He probably chose an 'umra deliberately (Ibn Hishām, p. 740; Wākidi-Wellhausen, p. 249 *sq.*, 253; cf. Sūra, xx. 30, 34) instead of the great pilgrimage which was soon due, as the consequences of an encounter with all manner of tribes, with whom he might

possibly have been waging war, were too incalculable for him; but perhaps he cherished also the hope that, if all went well, he might remain there in the following month also (cf. II, 192 which perhaps belongs to this connection). The step was nevertheless a risky one, so that he asked several Beduin tribes to accompany him in case they met with resistance. To his disappointment however, they refused (xlviii. 11-17) so that he decided to abandon the military character of the march and make his followers go as harmless pilgrims. In Mecca many were inclined to meet his wishes but the belligerent party was still strong enough to get a body of armed men sent to meet him to prevent him entering the town. He therefore encamped at al-Hudaihiya (q. v.) where he began to negotiate with the Meccans, and when this led to no result he sent 'Uthman, who was protected by his family connections, into the town as his representative. But when the latter showed no signs of returning and finally a rumour got about that he had been murdered, the situation became critical and Muhammad dropped all negotiations, collected his followers under a tree, probably one long held sacred, and made them swear to fight for him to the last, which they did with enthusiasm (xlviii. 10, 18). But soon afterwards a number of Meccans arrived and offered a compromise, which is very characteristic of the aimless Meccan policy, by which he was to retire this time but to be allowed to perform an 'umra next year. He agreed to the proposal, concluded a ten years' truce with the Quraysh and further promised to surrender all Meccans of dependent status who came to him. His followers, whom he had worked up into a state of great excitement by his promises and the taking of the oath, heard these conditions with scarcely concealed anger; but Muhammad calmly ordered the sacrificial animals brought with them to be slain, which was to have been done at an 'umra in the town (see Lane, *Lexicon*, s. v. *nahill*), and had his hair cut and by his authority forced his grumbling followers to do the same. Only later did they discover that he had made a brilliant stroke of policy for he had induced the Meccans to recognise the despised fugitive as an opponent of equal rank and had concluded a peace with them which promised well for the future.

He and the participants received ample compensation for the apparently frustrated 'umra at the beginning of the year 7 (May 628—April 629) by the capture of the fertile oasis of Khaibar (q. v.) which was inhabited by Jews. It was the first actual conquest by the Prophet and he instituted on this occasion a practice which became regular afterwards, when Jews or Christians capitulated: he did not put the people to death or banish them but let them remain as tenants, as it were, who had to pay dues every year. This expedition which also brought the Jewish colonies of Wadi 'l-Kura into his power, made the Muslims rich (xlviii. 18-21).

In this period, although the exact date is variously given, tradition puts the despatch of letters from the Prophet to Mukawkis, governor of Alexandria, the ruler of Abyssinia, the Byzantine emperor, the Persian king etc., in which he demanded that they should adopt Islam. The alleged original manuscript of the first of these has however proved not to be genuine (see *J. A.*, 1854, p. 482 sqq.; Zaidan, in *Hilal*, 1904, p. 103 sq.; Becker, *Papyri Schott-Schmidt*, I, 3). But even what is related

about these epistles hardly deserves the faith most people have put in it. Even if we disregard the many apocryphal details, we must surely consider it very unlikely that so sober a politician as Muhammad, who had at this time a very definite object, the conquest of Mecca, before his eyes, should have thought of indulging so fantastic an idea as the conversion of Heraclius or the Persian king, to whom the "Lucid Arabic Qur'an" was no less unintelligible than the Bible to the Prophet and his countrymen, and whom he could neither compel by force nor entice with preferred advantages. It is very doubtful if Muhammad ever thought at all of his religion as a universal religion of the world, as for example Noldeke, in *W. Z. K. M.*, xxi. 307; Goldziher, *Vorlesungen über den Islam*, p. 25, and T. W. Arnold, *The Preaching of Islam*, p. 23 sqq. hold (against them, see Snouck Hurgronje, *Mohammedanism*, p. 48 sqq.; H. Lammens, *Étude sur le règne du calife Mu'awia*, I, 422). The passages in the Meccan *sūras* which can be quoted in favour of this theory (vi. 90; xii. 104; xli. 157; xxv. 1; xxxiv. 27; xxxvi. 70; xxxviii. 87; lxviii. 52; lxxxi. 27; cf. from the later period: iii. 90; xxii. 25) are limited by their context or by unambiguous parallels (like vi. 92; xlii. 5 [the mother of the city, i. e. Mecca]; cf. xxvi. 214). Besides, in the Medina period, the place of persuasion and proof ("no compulsion in religion": ii. 257; cf. xvi. 126), was taken by the spread of Islam by force of arms, which, although based on the supremacy of Islam over other religions (iii. 79; ix. 33; lxi. 4), was confined to the lands inhabited by Arabs. If after the conquest of Mecca he also declared war on the possessors of a scripture (see below) the campaigns undertaken by him prove that he was only thinking of Arabs under Byzantine or Persian rule, and it cannot be proved that he ever went beyond this in his schemes (the gift of Hebron, Balādhuri, ed. de Goeje, p. 129 may be confidently asserted to be a forgery; cf. the article *USAMA*). The decisive consideration however is that Muhammad at the height of his power never demanded from Jews or Christians that they should adopt Islam but was content with a political subjection and the payment of tribute. The correct conclusion is therefore to reject those stories and to look for the real historical basis in negotiations of a purely political nature, e. g. with the friendly Mukawkis (q. v. and cf. Butler, *The Arab Conquest of Egypt*, 1902) and to assume that the idea of a great missionary enterprise arose later under the influence of Christian traditions, untably of the miracle of Pentecost.

On the other hand, the character of the genuine letters of the Prophet to the Arab tribes changes at this time, for he was no longer content with a purely political agreement but, relying on his now consolidated power, also demanded that they should adhere to his religion, which involved performing the *salāt* and paying "alms"; he even gave the *Djuddām* on the Syrian coast a respite (*amanā*) of two months after which they were to decide (see Spierker, *op. cit.*, p. 14 sqq.).

In March 629, Muhammad performed the 'umra stipulated for him by the peace of Hudaibiya (the 'umra of the "contract" or "recovery"). For him who had been driven out of his native city it was undoubtedly a great satisfaction to be able to visit Mecca as the acknowledged lord of Medina;

but otherwise the significance of the occasion was more symbolical and the efforts of the practised diplomat to prolong his stay by his marriage with a sister-in-law of his secret ally 'Abbās [see MAMUNA] were politely but firmly resisted by the Meccans. On the other hand, it was of great significance that some of the most important Meccans, like 'Amr b. al-ʿĀṣ and the military genius Khālid b. al-Walid, who saw he was the coming man, openly joined him, while his uncle 'Abbās and the very patriotic (Ibn Hishām, p. 275) but cautious Abū Sufyān endeavoured in secret negotiations to prepare in the most favourable way for the inevitable result. In the meanwhile he continued his military expeditions. His forces suffered a serious reverse in the first considerable effort to extend his authority over the Arabs on Byzantine soil, at Mu'ta [q. v.] in Transjordan; this is also recorded by Theophanes (*Chronographia*, ed. de Boor, i. 335). But several Beduin tribes now began to see what advantages they would procure not only for the next but also for this world by joining him, and large groups like the Sulaim voluntarily adopted Islam and placed themselves under his flag.

That it was Muhammad's intention to break the truce with the Quraysh at the first opportunity may be taken as certain; for it must have been intolerable for him that the heathen should still have Allāh's sanctuary in their control (ix. 17 sq.; cf. iii. 3). The tactlessness of the Meccans now gave him his opportunity. Very much against the advice of Abū Sufyān, the belligerent party in Mecca had supported the Bakr against the Khuzā'a, who were Muhammad's allies, and thus given a plausible cause belli (cf. perhaps ix. 12 sq.). In Ramaḍān of the year 8 (May 629–April 630) he set out at the head of an army of Muhādhirūn, Anṣār, and Beduins. The news produced considerable anxiety in Mecca where the number of those who wanted to fight shrank daily so that the more prudent now could take control. Abū Sufyān, who was sent out with several others (including the Khuzā'i Budail b. Warḳa who was a friend of the Prophet's) met Muhammad not far from the town, paid homage to him and obtained an amnesty for all the Quraysh who abandoned armed resistance (cf. 'Urwa, *Tabari*, i. 1634 sq.). Except for a few irreconcilables (cf. *Diman der Hudhayliten*, No. 183; Mubarrad, *al-Kūmil*, ed. Wright, p. 365), they acquiesced and thus the Prophet was able to enter his native city practically without a struggle and almost all its inhabitants adopted Islam. He acted with great generosity and endeavoured to win all hearts by rich gifts (*ṭa'if al-ḥulūl*, a new use of the alms; cf. ix. 60). Only he demanded ruthlessly the destruction of all idols in and around Mecca. Only Sūra cx. seems to preserve an echo of the exaltation with which this victory filled him; here as in the unusually touching passage xlviii. 1 sq., he sees in the success of his plans a sign that Allāh has forgiven him all his sins.

Muhammad did not rest long upon his laurels for not only was Ṭā'if, which was closely associated with Mecca, still unsubdued but the Hawāṣin tribes in Central Arabia were preparing for a decisive fight. A battle was fought with these Beduins at Hunain on the road to Ṭā'if [q. v.] which at first threatened to be a fatal disaster to the Prophet, mainly because of the unreliability of a number of the new converts, until some of his followers succeeded in recalling the fugitives and routing the enemy (ix.

25 sq.). On the other hand, his inexperienced troops were unable to take Ṭā'if with its defences (cf. the description of impregnable fortresses in *Diman der Hudhayliten*, No. 66, sq.). The people of Ṭā'if however afterwards fell in with the spirit of the time and adopted Islam. When Muhammad, after raising the siege, was distributing the booty of Hunain, the Anṣār who as soon as he entered Mecca had expressed the fear that he would take up his residence again in his native town, became very indignant about the rich gifts that he made to his former opponents in order "to win their hearts", while they themselves went empty-handed (cf. Ḥassān b. Thābit, No. xxxi) but he spoke so kindly to them that they burst into tears and declared themselves satisfied. His conduct on this occasion reminds us to some extent of that of David towards the Jews and Ephraimites after Absalom's rebellion.

The characteristic feature of the year 9 (April 630–April 631) in the memory of the Muslims was the many embassies which came from different parts of Arabia to Medina, to submit on behalf of their tribes to the conqueror of Mecca (cf. ix. 3) and the letters which he sent to the tribes, to lay down the conditions of their adoption of Islam. In the autumn of this year, he made up his mind to conduct a campaign against Northern Arabia on a considerable scale, probably because the defeat in Transjordan required to be avenged and because the Ghassānid king was adopting a hostile attitude (cf. Ibn Hishām, p. 911; Bukhārī, *Maghāzī*, b. 78, 79). But his appeal for followers met with little support. Munāfiqūn as well as Beduins held back and even among his devoted followers, there were some who put forward all sorts of objections, out of fear of a campaign so far away in the glowing heat (cf. ix. 45; lvi. 84–91, 98 sq.). In particular he seems to have had to face at this time a considerable opposition in Medina (ix. 38–75, 125) so that he had to have recourse to his old instrument of intimidation and his words recall in a remarkable way the period of passion in Mecca (ix. 71, 129 sq.). Matters came to such a pitch that some of the opposition, behind whom is said by one tradition to have been his old inexorable opponent, the ascetic Abū 'Amr 'Abd 'Amr, founded a house of prayer of their own "for division among the faithful and a support for those who had formerly fought against God and his Prophet" (ix. 108 sq.). Unfortunately the expressions in the Qur'ān and in the traditions are quite insufficient to enable us to get a clear picture of this very remarkable affair. In spite of all opposition however, he carried through his plan; but when after great hardships he had reached Tabūk on the frontier (in the land of the Byzantines; cf. Ibn Hishām, p. 956), he stayed there some time and then returned to Medina. The campaign was however not without success. His prestige had now become so great that the petty Christian and Jewish states in the north of Arabia submitted to him during his stay in Tabūk, for example the Christian king Yuhannā in Allā [q. v.], the people of Adhruh [q. v.] and the Jews in the port of Makna. Khālid also occupied the important centre of Dumat al-Djandal (cf. for a criticism of the account: Caetani, *l. l.* 261–268; Spuler, *op. cit.* p. 44 sq.; on the alleged letter from Muhammad to the Jews in Makna, see also Wensinck, in *l. l.* ii. 290).

Unfortunately we do not know how the matters which were rapidly coming to a head in Medina actually developed; but we may safely assume that the death of 'Abd Allāh b. Ubayy, which took place not long after the expedition to Tabūk, must have contributed to slacken the tension. These years showed a marked increase in the prestige of the lord of Medina abroad. Mecca was in his hands and among the Beduins an inclination was noticeable in several places to submit to the will of the conqueror of this town, to be safe against his attacks and to have a share in his rich booty. This was for example the case with the group of tribes of 'Amir b. Sa'sa's, with portions of the great tribe of Tamim and the neighbouring Asad and further north with the Bakr and Taghlib. Even in regions so remote as Bahrain and 'Omān within the Persian sphere of influence and among the chiefs of South Arabia, the new teaching and order of things penetrated and found ardent followers in some places. But we must not allow ourselves to be deceived by the representations of the historians, from which it appears as if all the people in these lands adopted Islām. Caetani and Sperber in particular have shown that these accounts are not in keeping with reality and that it was only little groups that submitted, while there was a not inconsiderable number who rejected the Prophet's demands. As regards open opponents the question was quite simple; when they were heathen, adhered to their paganism and would not abandon their polytheism, they were to be threatened by Muhammad with the "holy war". He had not only to deal with such as those in Arabia, but there were also in addition to the Jews who had already felt his strength, a considerable number of Christians, and some Persia in the eastern and southern districts. Muhammad was thus faced with a problem which he had to solve. From his words in Sūra ix, 29 *sqq.* where he includes the Christians and even the Jews, the people of such strict monotheism, among the polytheists, who give Allāh a son and honour men as lords beside him, one would expect that he would have fought them like the heathen, if they did not adopt Islām (cf. also the attack on the Christians, verse 76 *sqq.*). But in contrast to such utterances we have another (Sūra v. 85) where he mentions the Christians very sympathetically because they, unlike the Jews, show themselves kindly towards true believers and are not arrogant, which he ascribes to the fact that they have priests and monks (cf. his judgment on monasticism: Sūra lvii. 21). These remarkable contradictions may be explained, as pointed out by Tor Andrae, by the difference between the Monophysites and the Nestorians. The former aroused his unqualified displeasure by their Christology, while the latter, who were then predominant in the Persian empire, attracted him much more, and this attitude was shared by his followers after his death, as the letter of the Catholicos Ishō'yah, quoted by Tor Andrae, shows. On the other hand, his remarks about the Jews are always very severe. It is therefore all the more remarkable that the distinction between Jews and Christians completely disappears when their position is finally settled. They were included together as "peoples of a scripture" and they were allowed to retain their religion if they recognised the political suzerainty of the Prophet by paying a tax (*dhimma*, q. v.); if they did not they were to be fought without mercy.

The memory of the agreement between Muhammad's teaching and that of the "peoples of a scripture", earlier so much emphasised, must have contributed to this rather illogical settlement and in addition there was the fact that treating the Jews as tax-paying tenants, and allowing them to practise their religion, as had been already done at Khaibar, was much more practical for the Muslims than fighting them till they gave in. A further compromise with the "peoples of a scripture" was that believers were allowed to marry the daughters of the "peoples of a scripture" and to eat food prepared by them (v. 7). It is noteworthy that the Persia (*Madā'ir*, xii. 17) were included among the "peoples of a scripture" which made a difficulty for later better informed generations (Tabari, i. 1005, 10 *sq.*; Balādhuri, p. 79); probably Muhammad did not dare for political reasons to demand that they should give up their religion. This extended application of the term "peoples of a scripture" is found not in the Qur'an but in a letter of Muhammad's to the Persia in Haddar (Ibn Sa'd, i/n. 19) but with the limitation that the Muslims are forbidden to marry their women and eat meat killed by them.

With these exceptions, the Prophet had approached nearer the object which was always before him, although it hitherto eluded him, the formation of an *ummah* on a definitely religious basis, for the inhabitants of a number of parts of Arabia were now actually bound together by religion. The old differences between the tribes with their endless feuds, their blood-vengeance and their lampoons which continually stirred up new quarrels, were to disappear at the will of Muhammad and all believers were to feel themselves brethren (ix. 11; xlix. 10 *sq.*). There was to be no distinction among believers except in their degree of piety (xlix. 13). The Prophet certainly had an ideal before him but it was realised only in a very incomplete way. The very rapid extension of Islām had been accompanied by a considerable diminution in its religious content. Alongside of the older adherents, who were really carried away by his preaching and whose faith had been tried by privations and dangers, there were now the many new converts who had been gained mainly by fear (cf. the well-known poem of Ka'b b. Zuhair; the poem of the Hudhaili Usaid b. Abi Iyās in Kosegarten, *Carmina Hudhaili*, N^o. 127) or by the prospect of material advantages. In spite of the teachers sent out to them there could be no question of any deep-seated conversion among these Arabs and how the old Arab spirit continued to flourish among them unweakened is shown for example by the boasting and abuse in the poems in Ibn Hishām, p. 934 *sqq.*, which are in no way inferior to the old poems. The Prophet himself in Sūra xlix. 14 has recorded very definitely how far the Beduins were from the true faith: they cannot say that they believe but only that they have adopted Islām. Commandments relating to religion and worship, which had considerably occupied Muhammad in the early Medinese period, give way in striking fashion to social and political regulations, a natural result of the fact that the new members were not ripe for the former. Uncertainty on these matters was still great and even at headquarters much seems still to have been in an embryonic state. This is true even of so fundamental a law as the rule for the times of daily prayer, as the five prayers later obligatory are

nowhere laid down in the *Kur'ān* (see above; cf. also the expression "morning and evening" in *Ā'ishā's* poem: *Morgens und Abends*, p. 259). That they were introduced by Muhammad himself at the end of his life is possible, but not very probable in view of the silence on the point in the *Kur'ān*, and in any case it is not certainly proved by the mention of the five times of prayer in a letter of the Prophet's (Ibn Hishām, p. 962) as we are not justified in expecting absolutely literal accuracy in the transmission of such documents. Only one or two religious institutions are dealt with at all fully in the *Kur'ān*, the great pilgrimage to the sanctuaries at Mecca and the 'umra in the town itself, but the *ḥajj* was indeed the crown of his endeavours begun in Mecca and carried through with tenacity. The Prophet, although he was now lord of Mecca, did not yet take part in the pilgrimage in the year 8, which was so inexplicable to later generations that they invented an 'umra unknown to many of his followers (Ibn Hishām, p. 886; Tabari, i. 1670 [Urwa], 1685; Wāḳidī, p. 380; Ibn Sa'd, ii/ii. 1, 123 sq.; iii/ii. 103, 11; cf. ii/ii. 123 sq.; Snouck Hurgronje, *Het Mekkanische Feest*, p. 58 sq.). Nor did he come in the year 9 to Mecca to the *ḥajj*; he showed his interest in it however by sending Abū Bakr as his representative and making him read a proclamation which had momentous results (Bukhārī, iii. 163, 249; according to the usual tradition, it was 'Alī who acted as his deputy; but this is probably a tendentious alteration; cf. Tabari, i. 1760 sq. where Abū Bakr complains about being passed over and is comforted by Muhammad; there is also another tradition, according to which Abū Bakr commissioned Abū Huraira to proclaim the exclusion of the heathen from the pilgrimage (Ibn Sa'd, ii/ii. 121 sq.). This was what is known as the *ḥarā'a* [q. v.] in which Muhammad, who had been for so many years excluded from the pilgrimage, forbade all heathen any participation in it and gave them a period of four months, after the expiry of which they had the choice between the adoption of Islam and merciless warfare (Sūra ix.). This explains his absence from the celebration in the two preceding years; he wished to wait until he could celebrate it as sole ruler and completely in agreement with his intentions or, as he said, with the ceremonies introduced by Abraham (ii. 119 sq.). Finally all was prepared and at the end of the year 10 (April 631–March 632) he was able to carry through the first reformed pilgrimage (the "Farewell Pilgrimage" or the pilgrimage of Islam), which became the standard for all time. It is remarkable that the regulations for the ceremonies of the *ḥajj*, the object of which was to remove all that was too obviously pagan in the old ceremony (cf. e. g. the *amḥān* in Minā in Farzdaq, in *Z.D.M.G.*, lix. 604; Arrāḳī, ed. Wüstenfeld, p. 402) and to give it an Islamic colouring, are found mainly in traditions, where later details can of course easily have been inserted, and only in fragments and more or less incidentally in the *Kur'ān*; but broadly speaking, the later form is undoubtedly based on what the Prophet laid down on this memorable occasion [cf. the article *ḤAJJ*].

The Farewell Pilgrimage, at which an effective address, of which somewhat variant versions have been handed down, is put in the Prophet's mouth, marks the culminating point in his career. His feelings at this time are probably expressed in

Allāh's words in Sūra v. 5: "To-day I have perfected your religion, and completed my favours for you and chosen Islam as a religion for you". There is therefore a touch of the dramatic in the fact that his career closed a few months later. He himself hardly expected this, for only a month before his death he was preparing an expedition, which was to set out under the leadership of the young Usāma [q. v.] against Transjordan (not as in some traditions to West of the Jordan, cf. the article *USAMA*) in order to avenge the death of his father. The situation was such in other directions also that it required a man in full vigour to deal with it; in several places the appearance of different "prophets" had provoked disturbances (cf. *AL-ASWAD*, *TULAIHA* and *MUSAILIMA*). Then Muhammad suddenly fell ill, presumably of the ordinary Medina fever (Farzdaq, ix. 13); but this was dangerous to a man physically and mentally overwrought. He rallied a little but then died on the 13th Rabi' I of the year 9 (i. e. June 8, 632; only this date suits the statement in Ḥassān b. Thābit, N^o. cxxxiii. and all traditionists that it was a Monday) on the bosom of his favourite wife 'Ā'ishā, according to the story with the words: "The highest friend" (*rafiq*, for which Goldziher once proposed *rafiq*, "the vault of heaven") of Paradise!". He left — fortunately however for his community — no legal successor, for even the little Ibrāhīm whom the Coptic slave Māriya bore to him had died shortly before (on Jan. 27, 632, if the statement is right that there was an eclipse of the sun on the day he died; cf. Rhodokanakis, in *W. Z. K. M.*, xiv. 78 sqq.; Mahler, *op. cit.*, p. 109 sqq.). The wild confusion which party passions let loose on Mecca when his death became known had the remarkable result that his corpse remained neglected for a whole day until it was finally buried under 'Ā'ishā's hut (Tabari, i. 1817; Ibn Sa'd, ii/ii. 57, 58, 59, 71, 8).

The great difficulty which the biographer of Muhammad feels on every page is this, that the real secret of his career, the wonderful strength of his personality and his power of influencing those around him by suggestion, is not recorded in the early sources and indeed could not be recorded. From the *Kur'ān*, it is true, one becomes acquainted with his earliest remarkable inspirations, which even now are not without effect, and with his eminent political gifts later in Medina. We do of course find instances in the battle of Badr or the agreement of Hudaibiya where his intellectual superiority is overwhelmingly evident; but these are only isolated flashes and for the most part we have to read the essentials between the lines and be content with instructive analogies, among which the influence of Joseph Smith on the intellectually far superior Brigham Young is a particularly striking example. The really powerful factor was his unshakable belief from beginning to end that he had been called by Allāh, for a conviction such as this, which does not admit of the slightest doubt, exercises an incalculable influence on others; and the certainty with which he came forward as the executor of Allāh's will gave his words and ordinances an authority which proved finally compelling. His real personality was revealed quite openly with its limitations; his strength and his knowledge were limited, the ability to perform miracles was denied him and he speaks quite frankly of his faults (vi. 69; xxiv.

49; xl. 57; xlvii. 21; xlviii. 1 sq.; lxxx. 1 sq.; ix. 43). Apart from the revelation with which he was favoured, he is a man like any other and several times refers to the fact that he will die (xxxix. 51; xxi. 35 sq.; iii. 138; the episode in Ibn Hishām, p. 1012 sq. is not historical but a tendentious story directed against the tendency becoming apparent to apotheosise the Prophet). This is exactly the field in which later ages have felt dissatisfied, so that they quite early, driven mainly by their disputations with the Christians (see M. Schreiner, in *Z.D.M.G.*, xlii. 594), wove around the person and life of the Prophet a network of superhuman features (see Tor Andrae's work quoted below). Apart from the traditions which are clearly confirmed by the Qur'an we can only have certainty in the strictest sense of the word in cases where the stories place the Prophet in an unfavourable light, not only from our point of view but also from that of the Muslims, e.g. in the story of his temporary recognition of the three Meccan goddesses or of his being censured by 'Umar for putting off the *ihram* between the 'umra and hajj on the Farewell Pilgrimage, for it is quite incredible that such features should be later inventions and as a rule in such cases the compromising stories are confirmed by the existence of variant traditions which endeavour to dispose of the offensive features by glossing them over or altering them.

If the biographers of Muhammad must for these reasons impose a very considerable restraint upon themselves, there is nevertheless one essential aspect of his activity, which ought to be very strongly emphasised, particularly as justice is not always done to it in modern treatments of his life. There is a tendency in some recent writers not only to emphasise all that is unfavourable but also to neglect his real religious importance. If he had really only been an oversexed man, anxious for worldly profit and quite unscrupulous in the choice of his means, Islām, which had been created by him and developed after his death, would have been an effect without a cause. It is impossible for the unbiased historian to deny that he aroused the religious instinct of his countrymen, and gave expression to a body of religious and moral conceptions which not only satisfied his fellow countrymen but supplied the needs of the people of lands which had old civilizations conquered by the Muslims and served them as foundations for a vigorous and far-reaching intellectual activity. Although as a result of his singular theory of inspiration, his direct dependence on the older religions of revelation remained concealed, he was able in his own way to communicate to his countrymen a part of the spiritual wealth of the "peoples of a scripture" and how he touched the soul of the Arabs is best seen by the efforts of the Wahhābīs at a reformation. In lands of ancient culture, Islām, it is true, was only able to carry out its task by a sometimes radical remoulding and the intellectual activity already mentioned developed also under the influence of Christianity and mysticism, but yet it was Muhammad who set the whole process in motion and he could not have gained this influence if he had only been what the writers mentioned profess to have found in him.

MUHAMMAD I-III. [See UMAYYADS II.]

MUHAMMAD I, according to the current view, the fifth Sultan of the Ottoman Empire, reigned, after the Empire's restoration in 1413, as sole acknowledged ruler until his death in 1421. Like many details of the first century of Ottoman history, the year of the birth of this Sultan is unknown; *Siddiq-i 'Oṣmānī*, i. 66 gives 781 or 791 (1379 or 1389). It is commonly agreed, that he was the youngest of the six sons of Bayazid I, which probably has made von Hammece accept the later date. At the time of Timur's invasion, Muhammad resided at Amasia, but he was present at the battle of Angora (end of July 1402). From here he escaped with the help of the vizier Bāyazid

Pasha and was able to maintain himself in Amasia and Tokat against Timur's governor in Niksar and against Turkoman bands. Soon after Baysazid's death in 1403, having found support with the dynasties of Karaman and Düzük-Kadı, he conquered Bursa from his brother İsa, who had fled there after the battle of Angora. Then followed the struggle with his other brother Sulaiman, who had escaped to Adrianople but reappeared in Anatolia on account of his dealings, friendly as well as hostile, with the Ismaili Oghlu Djunaid. Sulaiman was able to take Bursa but was soon obliged to return to Rüm-ili, where Muhammad had sent their brother Müsâ (who, after Angora, had been prisoner for some time with the Germiyan Oghlu). When in 1410 the struggle between Sulaiman and Müsâ ended in the latter's victory, Muhammad, whose position in Anatolia was now strengthened, had to face Müsâ himself. At first the conquest of Rüm-ili did not seem hopeful, but after some high functionaries, like the Djandar-oghlu İbrahim Pasha (cf. Tüschner and Wittek, in *Isl.*, xviii, 95) and representatives of the old nobility, like Evrenos, had gone over from Müsâ to his side, and after he had made the Byzantine Emperor Manuel his ally, Muhammad was able to crush Müsâ in the battle of Camurlu in Serbia (July 1413). By this battle the unity of the Ottoman state was re-established; nevertheless one gets the impression that, even after the battle of Angora, the supremacy of the house of Oghuz over the other Muhammadan and Christian chiefs in Anatolia and the Balkan Peninsula was never seriously questioned. The hereditary enemy in Asia, Karaman Oghlu Mehmed, who in the meantime had gone as far as besieging Bursa, was subdued at Djünk in 1414 and at the same time the turbulent Ismaili Oghlu Djunaid was finally driven away from Smyrna. In 1416 the Ottoman power in the Aegean Sea was strengthened by the battle of Gallipoli against a Venetian fleet. That same year witnessed the extremely serious derwish revolt in Aidin and the peninsula of Karamurun, connected with the name of Simavna Oghlu Balir al-Din (cf. Babinger's monograph on the subject in *Isl.*, xi, 1—174 and, as to the date, p. 62 *sup.*); its suppression required the levying of troops from all parts of Anatolia under Baysazid Pasha. In the European part of the Empire the Sultan kept up friendly relations with the Byzantine Emperor. The Turks intervened, however, in Wallachia where the succession was disputed and they built there the fortress of Djurdjewa (Turk: Ver Kök) on the northern bank of the Danube; at the same time (1419), the raids of the Turkish troops reached Hungary, Bosnia and Styria. On the Asiatic side large parts of the possessions of the prince of Kastamuni, including Tasia and Kangheri, were incorporated into the Ottoman possessions. From 1416 Muhammad had moreover to face a pretender to the throne who claimed to be his brother Mujaft; this Dürme Mustafa found an ally in Djunaid. Both were defeated near Selânik and had to fly to Constantinople. The Sultan died in 1421 in Adrianople, shortly after his return from Anatolia. His death was kept secret from the army during forty days, until the heir to the throne Murad had arrived at Bursa.

Muhammad I has won the reputation of a mild and benevolent ruler; he often occurs with the surname of Celebi (as also do his brothers). Another surname is Kırabulji, the "Wrecker", which takes unrecogniz-

able forms in the European sources ("Crixia" in the Ragusan documents cited by Babinger on p. 63 of his article in *Isl.*). Important administrative measures are not recorded under his reign; the political and religious unification and pacification occupied all his forces. Some famous edifices are connected with his name; he finished the Ulu Djâmi' in Adrianople and the mosque of the same name in Bursa. A new building of this Sultan was the well known Yesil Djâmi' at Bursa (cf. Ewliya Çelebi, *Travels*, ii, 15).

MUHAMMAD II, with the surname Ahi 'I-Fatih, or, more popularly, Fâtih, seventh ruler of the Ottoman Empire, reigned from 1451 until his death in 1481. He was born, according to *Sijill-i 'Osmanî*, i, 67, in Raddab 832 (April 1429) and resided during his father Murad II's lifetime as governor in Magnisia; after the death of his brother 'Alâ al-Din in 1444 he became heir to the throne. Before his final enthronement Muhammad had twice resided in Adrianople as sultan, on account of the abdication of Murad II; the first time in June 1444, after a ten years' peace had been concluded with Hungary. When, notwithstanding this treaty, Hungary and her Christian allies again took the offensive in July, Murad came back from Magnisia, to which he had retired, and won the battle of Varna (Nov. 10, 1444). Then Murad abdicated a second time, but a menacing revolt of the Janissaries in Adrianople made the grand vizier Khalil Pasha call him back again, after which Muhammad was relegated once more to his Anatolian governorship until his father's death.

On Febr. 9, 1451 this new sultan arrived at Adrianople and seemed at first peacefully inclined. In reality his reign was to become a period of untiring and continual conquest under the personal leadership of Muhammad himself, who, especially in the beginning of his reign, took part in nearly all the important campaigns. His conquests did not very much enlarge the boundaries already reached at Murad II's death, but consisted more in a bringing under immediate Turkish rule of a large number of countries, regions and towns that were still held by local rulers under the Ottoman suzerainty. In this way Muhammad's conquests made possible the enormous expansion of the Ottoman empire in the 15th century.

The first, and at the same time most conspicuous military achievement of his reign was the conquest of Constantinople, where, by the grace of Murad II, the Palaeologue Constantine was still reigning. The preparations for this memorable siege had begun in 1452 with the construction of the castle of Rümîl Hissâr (in which an inscription by Zaganos Pasha, one of the builders, of 856 [1452], is found; cf. Khalil Edhem, in *T. O. E. M.*, ii, 484—497) and other military preparations, e.g. the casting of an enormous siege gun. Constantinople was taken on May 29, 1453 and Galata surrendered soon afterwards [cf. CONSTANTINOPLE]. In the next

year, the sultan obtained successes against Serbia, while Turkhān [q. v.] intervened in Morea, where the last Palatologue despots were at war with the Albanians. Immediately after the taking of Constantinople the grand vizier Khālid Pasha had been deposed and executed by order of the sultan, who had personal and political causes of complaint against him (cf. Taeschner and Wittek, *ibid.*, xviii, 105 *app.*); he was replaced after nearly a year by Mahmūd Pasha [q. v.], who for the next twelve years was to be a no less energetic supporter of Muhammad in the achievement of the programme of conquest. The year 1455 saw both of them in Serbia and on the Aegean coast, where the principal conquests were Ainos and the island of Lemnos [q. v.]. In 1456 they were unsuccessful in the siege of Belgrad. During the years 1458 and 1459 Serbia was made a direct Ottoman province (Semendra taken in 1459 by Muhammad), and in the same year and in 1460 the sultan took part in several campaigns in the Moria, the northern part of which was conquered from the Paleologues. About the same time a temporary understanding was reached with Skanderbeg [q. v.] in Albania.

Then came the amazing Asiatic campaign of 1461. Amasra (Amastria) was taken from the Genoese and Sināh [q. v.] from the last İsfandiār Oghlu; the fall of Trebizond immediately followed (cf. TAKARIM), after the beginning of a conflict with Uzun Hasan of the Ak-Koyunlu. In the next year the sultan's army drove the famous Wallachian warrior Wlad Dracul from his principality, which was given to his brother Radul, and at the end of the year Muhammad and Mahmūd made an end to the rule of the Genoese dynasty of Lesbos. The years 1463 and 1464 were mainly occupied by the annexation of the kingdom of Bosnia. In 1463 began a war with Venice, which was to last seventeen years; the main theatre of hostilities was the Morea, but also in the islands of the Aegean there were continual encounters with Venetian fleets.

The death of the Karaman Oghlu [q. v.] İbrahim in 1464 had first provoked the sultan's intervention and soon nearly all the towns of this once powerful principality were conquered during Muhammad's campaign of 1466 (battle of Larentia). In that same year Muhammad was successful in Albania, where he fortified the town of İbrazan (cf. SKANDERBEG).

Mahmūd Pasha had been deposed as grand vizier after the Karaman campaign and replaced by Rūm Muhammad Pasha. But it was Mahmūd who as governor of Gallipoli and Kapudan Pasha, helped Muhammad in the conquest from Venice of the islands of Negroponte (Euboea) in 1470. In the same year began again a series of campaigns under Rūm Muhammad and Gedik Ahmad Pasha against the last towns held by descendants of the Karaman Oghlu, who were supported by Uzun Hasan [q. v.] and by Christian fleets on the sea side. When Uzun Hasan had even taken the offensive by conquering the town of Tokat, great preparations were made for a new Asiatic campaign of the sultan, and Mahmūd was again made grand vizier. The sultan's army won in 1473 the great victory of Erzinđan, which put an end to danger from that side. In this campaign a part was played by prince Mughla, the heir to the throne, who completed in 1474 the conquest of R. İli (Cilicia) but died soon afterwards. Mahmūd Pasha had been deposed

again from the grand vizierate and executed in August 1474; Gedik Ahmad Pasha took his place.

In the following years, until 1480, the sultan's chief attention was given to conquests in Europe. He built in 1471 the fortress of Sabacs (Bogurdelen) in Syrmia, near Belgrad, while his troops in these and the following years made incursions into Hungary and far into Austrian territory; the war with Venice continued and in 1474 the Albanian Skutari (Shkodra) was in vain besieged. The year 1475 brought the great success of the conquest of Kaffa from the Genoese and, as a result of the establishing of the Ottoman power in the Crimea, the submission of the Tatar Khānate of the Crimea to Ottoman suzerainty. In 1476 the sultan himself was successful in Moldavia, but in the next years the Turkish armies had less success against the Venetians in Albania and southern Morea; finally in 1478 Muhammad himself went to Albania and took Croia; Skutari was besieged a long time, but surrendered only on account of the peace negotiations with Venice, which led to a peace treaty (confirmed January 26, 1479) leaving a certain number of towns in Albania and Morea to Venice. The Ionian islands, however, were conquered in 1479 by a fleet under Gedik Ahmad, who, at the same time, went so far as to take Otranto in southern Italy. An endeavour to conquer the island of Rhodes in the same year was not successful.

Muhammad's last campaign took place in 1480, when he intervened in the dynastic disputes of the dynasty of Dhū l-Kadr [q. v.], which intervention gave rise to the first difficulties with Egypt. In the next year, 1481, he had already set out for a new military enterprise in Asia, the aim of which was yet unknown, but may have been connected with the same difficulties, when he died, rather suddenly, in the place called Tekfar Çayır or Khunkār Çayır between Skutari and Gebic (May 3, 1481). His body was transported to Constantinople and buried in the *türbe* of the Fatih Mosque.

Besides being a great conqueror, Muhammad II was the builder of many important edifices, in the first place of the Fatih Mosque in Constantinople and the mosque of Eiyāh (*Hadikat al-İzzat*, i. 8 *app.*; 243 *app.*) and further of the castles on the Dardanelles and other works of naval and military importance. In the army administration he succeeded in restoring discipline among the Janissaries by incorporating in them the corps of the Segban; further his name is connected with the first Ottoman *Kutuk-nāme* (printed as an appendix to *T.O.E.M.*, iii.). He encouraged scientific studies and showed an interest in literature and poetry (he pensioned thirteen Turkish poets), even for the Renaissance arts in Italy (he summoned Gentile Bellini to Constantinople, who made his portrait; cf. also Tschudi, *Vom alten Osmanischen Reich*, Tübingen 1930, p. 18).

Bibliography: Among the early sources, the Byzantine historians (Phrautes, Ducas, Chacondyles) are by far the more important. The Greek description of Muhammad's life by Critobulus was translated into Turkish (appendix to *T.O.E.M.*, i. and ii.). The old Ottoman chronicles (Nesht and others) often treat the beginning of Muhammad's reign in their last part; the later historical sources (Sa'd al-Din, 'Ali, Feridün) are far from being reliable for this time. Further: von Hammer, *G.O.K.*, i. ii.; Zinkeisen (i.) and

Jorga (I); Heyd, *Histoire du Commerce du Levant*, II; L. Thuessne, *Gentile Bellini et Sultan Mohammed II*, Paris 1888. (J. H. KRAMERS)

MUHAMMAD III, thirteenth ruler of the Ottoman Empire, was born on May 16, 1567, the son of Murad III and the Venetian lady Baffa, and reigned from January 27, 1593 until his death, December 22, 1603. He was the last sultan who, as crown prince, had resided as governor in Magnesia. During his short reign he does not seem to have exercised any great influence on the policy of the Empire, being mostly under the influence of his mother who, as *walide sultana*, intervened in affairs of state through her protégés within and without the palace. Much against her will but on the insistence of a large part of the troops and of the high dignitaries, Muhammad took part in one campaign, namely that of 1596, in which the Hungarian town of Erlau (Eger) was taken by the Turks (September 1596). This campaign was a part of the war against Austria that lasted during all his reign and occasioned every year a military expedition to Hungary or to Wallachia. The grand vizierate was changed not less than twelve times under this sultan; the most conspicuous grand vizier was Dâmad Ibrahim Pasha [q.v.], his brother-in-law and the protégé of the *walide*. Ibrahim three times held the sultan's seal, three other titularies ended their office by being executed. In the same year as the conquest of Erlau, the Turks won the battle of Keresztes over the Austrians and Hungarians; the severity of the then grand-vizier Cîghala Sinân caused a great number of the troops to desert and to appear some years afterwards as *ferîs* or *çifçîs*, provoking dangerous revolts in Asia Minor which lasted thirty years and began with the taking of Urfa by Kara Yaddî [q.v.] in 1599. A third memorable feat of the Hungarian war was the conquest of Kanizsa in 1600 by Ibrahim Pasha. In other parts of the Empire the situation was relatively quiet; only in the Crimea was there a war between two rivals to the khânate, in which the Ottoman government had to intervene. Relations with the European powers were peaceful. France began already to exercise considerable influence through her ambassador; with Persia there was peace until September 1603, when a war began with the taking of Tabriz and Nakhjavân by Abûlî I.

The Empire was still supported by the traditions of Süleimân's time, but the lack of strong government had introduced a lot of abuses, notably in the administration of the *timûrs* and of the finances. One of the consequences was the dangerous revolt in January 1603 of the *ispâkîs* in Constantinople, who demanded the abolition of the harem régime in the capital and the restoration of the authority of the government in Anatolia. Two high harem functionaries fell as victims of this revolt; the grand vizier Yemîshdjî Hasan was able to oppose the *ispâkîs* with the aid of the Janissaries, thus creating an everlasting feud between the two corps, but in October of the same year this nefarious policy caused his own fall and execution.

Muhammad III was buried in a *türbe* of the Aya Sofia, a short time before his death, he had ordered the execution of his eldest son Mahmûd. He is said to have made a great show of piety, and had some excellent counsellors in his environment, such as the *khâdîm* Sa'd al-Dîn (died 1599), who had determined him to accompany

the army in 1596; but on the whole his mother's influence prevailed by keeping him mainly confined to the harem in the palace.

Bibliography: Among the Turkish historians the works of 'Alî (until 1596); Sellîki (until 1600), Pedewî and Hasan Beg Zâde are valuable as contemporary sources, further Na'imî (I) and Hadîdjî Khalîfa. Von Hammer, *G.O.S.*, VI, and the works of Zinkeisen (III) and Jorga (III). A contemporary European source is Laz. Soranzo, *Ottomanius sive de rebus turcicis liber continens descriptionem potentiae Mahometis III*, 1600.

(J. H. KRAMERS)

MUHAMMAD IV, nineteenth Sultan of the Ottoman Empire, was born on December 30, 1641 and was placed on the throne on August 8, 1648, after the deposition, soon followed by the execution, of his father Sultan Ibrahim. The power in the state was at that time divided between the court, where the old *walide* Kösem [q.v.] and Sultan Muhammad's mother, the *walide* Tarkhân, held the reins, and the rebellious soldiery of the Janissaries and the Sipâhis. The lack of stability in the government at this time is shown by the fact, that, until the nomination of the grand vizier Köprülü Mahammad in 1656, there were no less than thirteen grand viziers. In 1651 the old *walide* Kösem was assassinated and at the same time the resistance of the Janissaries was broken; the régime of the court party that followed under the sultan's mother did not improve the situation. The grand vizierate of İbrahim Pasha (1654—1655), who at first seemed to be the strong man needed, was brought to an early end by his rival Murad Pasha, and in the meantime the Cretan war against Venice was exhausting the resources of the Empire. In March 1656 a military rebellion forced the sultan to allow the execution of several of his favourite courtiers.

The real strong man proved to be Köprülü Mahammad Pasha [q.v.] (Sept. 15, 1656—Oct. 31, 1661) who eliminated immediately the influence of the harem on state affairs and became until his death the real ruler of the Empire. His régime began with a Turkish maritime defeat by the Venetians at the Dardanelles, but already in the following year he obtained as *ter'saker* successes in Transylvania and succeeded at the same time in establishing firmly the Turkish authority in the Danube principalities; the collaboration with the Crimean Khân was here of great value. In 1658 and 1659 he was able to suppress rebellions in Asia Minor, and in the Venetian war a great fleet of Venetian ships and other Christian allies did not succeed against the Turkish forces on Crete. After his death (Oct. 31, 1661), he was succeeded in his office by his son Köprülü Ahmed Pasha, who completed the work of his father by carrying through the final conquest of Crete (surrender of Kandia on Sept. 4, 1669) followed by peace with Venice. In 1661 the war with Austria had begun again, where Sultan Muhammad took part in several campaigns, notably that of 1663 in which Újvár (Neuhäusel) was taken. In 1664 took place the famous battle of St. Gotthard, where the Turks were beaten by an allied army, a part of which was formed by French troops; still the peace concluded with Austria in 1665 was favourable for Turkey. In 1672 the sultan took part in the campaign against Poland, after the Ukrainian cossacks had invoked Ottoman aid

against the Polish king; the Polish war, ending in a peace treaty of 1676, strengthened still further the Empire's position in the north. Köprülü Ahmed Paşa died Oct. 30, 1676. Though the sultan, who had developed in the meantime a morose and capricious character, never showed him the same deference as to his father, Ahmed had been easily able to maintain himself against enemies in the interior, not least by forming new troops (the *halki* and the *gövalle*), who were far more reliable than the Janissaries and Sipahis. He had not been able, however, to put an end to the extravagant luxury of the court, which wasted enormous sums. The sultan had an abnormal liking for big hunts, that were organized at enormous cost in the environment of Adrianople, which town he preferred as a residence to Constantinople.

After Ahmed's death the sultan did not himself take the affairs of state in hand; he appointed Kara Mustafa Paşa [q. v.] as his grand vizier. The latter continued in an unnecessary way the tradition of warfare; in 1677 and 1678 he obtained successes against the Cossacks, behind whom the Muscovite power now began to gain in importance in Turkish affairs. In 1682 war broke out again with the Austrian monarchy and led to the second Turkish siege of Vienna (July 13—Sept. 12, 1683), ending in a Turkish débâcle, thanks to the intervention of the Polish king Sobiesky. This disaster cost Kara Mustafa his office and his life and at the same time the influence of the Serail became again predominant. The grand viziers now following proved unequal to their task and in the years 1685—1687 nearly the whole of Hungary was lost to the Austrian armies (Turkish defeat at Mohács on June 22, 1687). At the same time the hostilities with Venice had been reopened in the Morea and in the Archipelago.

All these disasters caused a revolt of the troops in the field; they marched on the capital in September 1687 under Siyavush Paşa of Aleppo. This time the sultan himself fell a victim to them; he was deposed on November 8, 1687 by the *şâh-is-sultân* Köprülü Mustafa Paşa and lived in seclusion in Adrianople until his death on December 17, 1692. He was buried next to his mother in the Yeni Djami.

Bibliography: Na'ima (ii.) and Hâdjdî Khalifa, and until 1660 the *Tarîkh* of Râşid are the most important Turkish historical sources. The *Siyâhat-nâma* of Evliya Çelebi describes many of the military expeditions of this period and is also otherwise a valuable source of information. Among the European sources this period is covered by P. Ricaut, *Histoire des trois derniers empereurs des Turcs depuis 1624 jusqu'à 1677*, Paris 1683. Further, von Hammer, *G.O.R.*, v., vi. and the works of Zinkeisen (iv. and v.) and Jorga (iv.). See also the monographs of Ahmed Refik, *Köprülüler*, Constantinople 1331 (1913), *Kadınlar Sultanatı*, Constantinople 1314—1924, and *Fidâkî Saneleri* (1094—1110), Constantinople 1332 (1914).

(J. H. KRAMERS)

MUHAMMAD V RESHÂD, thirty-fifth Ottoman Sultan, was born on November 2, 1844 as a son of Sultan 'Abd al-Majid. During the reign of his brother 'Abd al-Hamid II he lived in seclusion; his very existence inspired 'Abd al-Hamid with such terror that even the mentioning of persons with the name Reshâd had to be avoided

in his presence (cf. Snouck Hurgronje, *Verbreide Geschiedenis*, iii. 232). He was a man of mild character, who owed his accession to the throne (April 27, 1909) only to the victory of the Young Turks; moreover he was the first constitutional ruler of Turkey, but he was unable to give direction to the very disparate political tendencies that manifested themselves within and without the Parliament during the years after the Revolution, and, after the final victory of the Unionist party in January 1913, Muhammad V had to submit, much against his will, to their government.

At the very beginning of his reign, Turkey lost her last vestige of authority over Bosnia and Herzegovina by Austria-Hungary's annexation, and over Bulgaria by the declaration of its independence (Oct. 5, 1909). The cabinets under Hussein Hilmi Paşa (until January 18, 1910) and Ismail Hakki Paşa (q. v.; until Sept. 29, 1911) were not able to bring about a peaceful situation in the interior (revolts in Albania). Hakki Paşa had to resign on account of the declaration of war by Italy. Under the grand vizierate of Sa'îd Paşa [q. v.] the Italian war led to the loss of Tripoli, confirmed by the peace treaty of Ouchy (Oct. 15, 1912). The peace was signed under the anti-unionist cabinet of Ahmed Mukhtar Paşa, but in the same month began the so-called Balkan War against the confederated Balkan States. The reactionary cabinet of Kâmil Paşa soon showed an inclination to conclude a disastrous peace through the intermediary of the European powers (Conference of London); then on January 23, 1913 the Unionist coup d'état brought again a Unionist government under Mahmud Şevket Paşa. The result was a reopening of the hostilities and, after the failure of Bulgaria, the recapture of Adrianople (July 22, 1913). In the meantime Mahmud Şevket had been murdered (June 28) by adherents of the liberal opposition, but this did not bring about a change in the political course; his place was taken by Sa'îd Halim Paşa, whose government signed the peace-treaties with Bulgaria (Sept. 29, 1913), Greece (Nov. 14) and Serbia (March 14, 1914). From this time on, the Committee of Union and Progress, which from the beginning of Muhammad Reshâd's reign had not ceased to work behind the scenes, became all powerful and its leaders Tal'at Bey and Enver Bey came more and more to the front. Afterwards, when at the beginning of the Great War, the Ottoman Government had decided to remain neutral, it was the unionist sympathies with Germany that brought about a gradual estrangement between Turkey and the Allies (the "Gorben" and "Breslau" incidents), culminating in the entrance of Turkey into the war on the side of the Central Powers (the Turkish fleet in the Black Sea on October 29 and 30, 1914). Tal'at Paşa himself became grand vizier in February 1917. The Allied endeavour to force a way through the Dardanelles was definitely abandoned in January 1916 and in the meantime Turkish troops fought on the Egyptian front, in Irak and on the Russian and Persian frontiers. Before the end of the war Muhammad V died unexpectedly on July 3, 1918.

(J. H. KRAMERS)

MUHAMMAD VI WAHID AL-DIN, last Sultan of the Ottoman Empire, was born on January 14, 1861, as son of Sultan 'Abd al-Majid. He was called to the throne on July 3, 1918, after the death of his brother Muhammad V Reşad, the former heir to the throne Yusuf 'Izz al-Din, son of 'Abd al-'Aziz, having died in 1916. When on October 30, 1918, nearly four months after his accession, the armistice of Mudros was signed, he was the ruler of an empire that seemed to be at the mercy of its former enemies, whose military forces occupied the capital and other hitherto unconquered parts of Turkey. On the other hand, the power of the Committee of Union and Progress was broken, but, since in the beginning of 1919 there began in Anatolia an increasing opposition against the foreign occupation, joined with an aversion to obey the Constantinople government, Muhammad VI seemed to have no other choice than to throw in his lot with the Allies and, together with his grand vizier Dâmiad Ferid Pasha, he collaborated with the Allies in the endeavours to suppress the nationalist forces (beginning of 1920); this anti-nationalist action was even sanctioned by a *feri* of the Şaikh al-Islâm. As the nationalist movement grew ever stronger, the Sultan's authority could only be upheld in Constantinople by the support of the Allies. His government had to sign the Treaty of Sèvres (August 10, 1920) and the Tewfik Pasha cabinet (since October 21, 1920) tried to summon the Parliament for its ratification. But in 1921 things had already gone so far that Tewfik Pasha recognized the powerlessness of his government to represent Turkey. The final success of the nationalists against the Greeks (seizure of Smyrna, September 9, 1922) brought about the armistice of Mudania (October 11, 1922), to which the Sultan's government was not a party. It was still invited to represent Turkey in Lausanne, together with the Ankara government. This was not accepted by the Great National Assembly, which, on November 1, 1922, declared the Ottoman sultanate abolished from March 16, 1920 (occupation of Constantinople); Tewfik Pasha's cabinet resigned accordingly (November 4) and Muhammad VI remained as Khalifa in Constantinople, where, on November 10, he appeared at his last *salâmât*. When, however, the National Assembly decided some days afterwards to try Wahid al-Din on a charge of high treason, this last Ottoman Sultan left Constantinople as a fugitive on a British ship (November 17, 1922) and the very next day the Ankara government declared him divested of the caliphate. Having gone first to Malta, the ex-sultan proceeded to Mecca as the guest of King Hussein. From here he launched a proclamation to the Islamic world, in which he maintained that the separation of the caliphate from the sultanate was contrary to the *shari'a* (text in *Oriente Moderno*, ii, 702—705). This appeal found hardly any response in the Islamic world. The last Ottoman Sultan left Mecca again and went to live in San Remo, where he died on May 16, 1926. In 1924 he had even recognized King Hussein's claim to the caliphate.

Bibliography: Jäschke and Pritsch, *Die Türkei seit dem Weltkrieg*, in *W. L.*, vol. x., 1927—1929, and vol. xii., Heft 1—2, 1930, where in the introduction all available Turkish and Western sources are indicated.

(J. H. KRAMERS)

MUHAMMAD, MU'IZZ AL-DIN B. SAM, was the fourth of the Shansahānī princes of Ghazni to rule the empire of Ghazni. His name was originally Shihāb al-Din, but he assumed that of Mu'izz al-Din. His elder brother Ghiyāth al-Din succeeded his cousin Saif al-Din in 1163 and made Muhammad governor of Herāt, entrusting to him also the duty of extending the dominions of the house in India.

Muhammad led his first expedition into India in 1175, expelled the Ismā'īlīan heretics who ruled Multān, placed an orthodox governor in that province, and captured Uchh. In 1178 he rashly led an army into Gujjarāt, was defeated by the rājā, Bhima the Vaghela, and returned to Ghazni with no more than the remnant of his army, but in the following year he took Peshāwar, and in 1181 Lahor, taking prisoner Khusrāw Malik, the last of the Ghānaswids, and adding the Panjāb to his brother's dominions. In the winter of 1190—1191 he invaded the Čawhān kingdom of Dībli and captured Bhūminda, but the rājā, Prithwī Rāj, marched against him and defeated him at Tarāwri, near Karnāl. He was wounded, but escaped, and in 1192 returned to India, defeated and slew Prithwī Rāj at Tarāwri, captured Hāmī, Simāna, Guhrām, and other fortresses, and plundered Adjmer. On returning to Ghazni he left Kutb al-Din Aibeg [q. v.] in India as viceroy, and at the end of 1192 Aibeg took Dīhli and made it his capital. In 1197 Aibeg was beleaguered in Adjmer and Muhammad sent a relieving force which enabled him to defeat Bhima of Gujjarāt and to plunder his capital, Anhilvāra.

Muhammad was now employed with his brother in recovering Khusrān. On the death of Takash Khān Khāzrimshāh [q. v.] in Marw, on July 3, 1200, Muhammad Curbak was sent to Marw, which he captured and occupied for Ghiyāth al-Din, and Ghiyāth al-Din and his brother besieged and took Nishāpūr. Muhammad was then sent in command of an expedition to Raiy but the misbehaviour of his troops earned a rebuke which led to the only quarrel between the brothers.

On the death of Ghiyāth al-Din in 1202 Muhammad succeeded to the great empire which he had helped his brother to build up, but Muhammad Khāzrimshāh [q. v.] took Marw from Muhammad Curbak, recovered Nishāpūr, but failed to capture Herāt. Mu'izz al-Din Muhammad marched against him but suffered a crushing defeat near Andkhūm and fled to Talakūn. He was besieged by the army of Gūr Khān of Kāsh-Khitāi and purchased a safe retreat only by the surrender of the whole of his baggage and material of war. On his arrival before Ghazni in this plight his slave Ildigiz refused to admit him, and he passed on to Multān where the governor likewise refused him admittance, but he attacked and defeated him and appointed Nūzār al-Din Kubāda [q. v.] to the government of the province. He returned to Ghazni and established himself there, sparing the life of Ildigiz. By the treaty which he concluded with Muhammad Khāzrimshāh he was permitted to retain Balkh and Herāt, but not Nishāpūr and Marw.

On Oct. 20, 1205, he marched from Ghazni for India and, with the help of Kutb al-Din Aibeg, defeated the Khokars, but on returning towards Ghazni was assassinated, on March 15, 1206, on the bank of the Indus, either by Ismā'īlī heretics or by some Khokars. He was succeeded in Ghazni

by his nephew Mahmūd, son of Ghiyāth al-Dīn, but the viceroys of the provinces, Albeg in Dihli, Kabāts in Multān, Tāj al-Dīn Vīdī in Kirmān, and Iltāz in Ghazni, became independent.

(T. W. HAIG)

MUHAMMAD, TUGHLUK, the second king of the Tughluq dynasty of Dihli, was the eldest son of Ghiyāth al-Dīn Tughluq, its founder. During the short reign of the usurper, Nāsir al-Dīn Khawar, he was in some peril, but escaped and joined his father, who was marching on Dihli. He was known at first as Djawna Khān, but received the title of Ulugh Khān and was sent in 1321 to Warangal, to reduce to obedience the rājā, Prathāpa Rudradeva II. In this distant region he attempted to rebel, but his army refused to believe his story of his father's death at Dihli and to accept him as their king, and he was obliged to return in haste to the capital, where he either persuaded his father of his innocence or gained a pardon, for, though his accomplices suffered cruel deaths, he was again sent, in 1323, into Telingāna, and on this occasion compelled the rājā to surrender and sent him to Dihli. In the following year he acted as regent during his father's absence on an expedition into Bengal, but his conduct aroused suspicion, and his father rebuked him in letters sent from Bengal. He received the king, on his return, in a temporary kiosk of wood, so constructed that the dislodgement of a beam would bring the whole structure down, and by this device crushed the old man to death, and ascended the throne in February 1325. The delineation of a character so complex and contradictory as that of Muhammad Tughluq is no easy task. He was one of the most extraordinary monarchs who ever sat upon a throne. To the most lavish generosity he united revolting and indiscriminate cruelty; to scrupulous observance of the ritual and ceremonial prescribed by the Islamic law an utter disregard of that law in all public affairs; to a debasing and superstitious veneration for all whose descent or whose piety commanded respect a ferocity which when roused respected neither the blood of the Prophet nor personal sanctity. Some of his administrative and most of his military measures give evidence of abilities of the highest order; others are the acts of a madman.

The chronicle of his reign is largely a record of rebellions punished with gross barbarity. In the second year his cousin Gurgahar rebelled in the Dakan and was flayed alive. In 1327 he rebuilt Devagiri, named it Dawlatābād, made it his capital, and two years later drove the whole population of Dihli thither. In 1328 Kishū Khān rebelled in Multān and was defeated and slain, and in 1329 India was invaded by the Mughal, 'Alā' al-Dīn Tarmashirīn, who, however, was driven from the country. In the same year the enhancement of the land-tax in the Gangetic Doab drove the inhabitants into rebellion, and the measures taken to suppress the rising depopulated the country. At about the same time Muhammad issued his famous fictitious currency, decreeing that his brass tokens should be accepted as equivalent to silver

tokens. No precautions were taken against counterfeiting, and when the experiment failed and the tokens were recalled the treasury was obliged to purchase mountains of brass at the price of silver.

In 1331 a rebellion in Bengal was crushed by Bahrām Khān, but in 1338 he died, and a second rebellion separated the province from the kingdom of Dihli, and in 1334 Saiyid Djalāl al-Dīn Agha established his independence in Madura. Muhammad marched to punish him, but a pestilence in his army compelled him to retreat, and on his return he established in the Dakan the pernicious system of farming out the revenue for extravagant sums, the result of which was to drive both the impoverished cultivator and the defaulting farmer into rebellion. Hūshang of Dawlatābād, believing a report of the king's death, rebelled, but was captured and pardoned, a rare instance of clemency, but a rebellion in the Panjab was crushed with great severity.

An enormous army raised for the conquest of Persia melted away for want of funds to maintain it, and in 1337 a heavy calamity fell on northern India, a famine of unusual severity which lasted for seven years. The king's measures to combat the famine were, on the whole, well conceived and well executed. Grain was plentiful in Awadh, which proved that the famine was largely due to artificial causes, and he built a temporary city, Sargadwār (*Sargadwār*, Sansk. "the Gate of Paradise"), on the western bank of the Ganges, transferred thither the citizens of Dihli, and with the assistance of 'Ain al-Mulk, governor of Awadh, fed them from the granaries of that province. In the following year he committed one of the greatest of his many follies in assembling an army of 100,000 horse for the invasion of Tibet and sending it into the Himalaya, where it perished.

In 1339 a rebellion in the Dakan was crushed and even the faithful 'Ain al-Mulk was goaded into rebellion, but, in consideration of his services, was imprisoned instead of being put to death. Almost immediately afterwards Shāh al-Aghā rebelled in Multān, but fled before the king's wrath into Afghanistan. The famine was now at its height, and the people were eating human flesh. Muhammad set himself to the framing of regulations which should improve and extend agriculture and obviate future famines. By their means, says the contemporary historian, with conscious or unconscious irony, agriculture would have been so promoted that plenty would have reigned throughout the earth, had they been practicable. They included the extension of the system of farming the revenue, and bred confusion and rebellion, which reacted on the king until he regarded his subjects as his natural enemies and waged war against them with all the weapons of despotic power. The tale of executions is recorded, with sickening details, by Ibn Battūta. Rebellions in Sindh, Simāna, Kalhal, Gubram, Kara, and the Dakan were all traceable to the king's revenue system, but he attributed the discontent in the Dakan to the disaffection of his officers and sent to that province a wretch who slew ninety officers in cold blood, and was himself slain in the rising which his barbarity provoked. Muhammad marched into Gujārat and personally undertook the collection of arrears due to the treasury, so alarming the officials in the Dakan that they seized the fort of Dawlatābād

and proclaimed an Afghān, Jamāl Mukh, as their king. The king marched to Dawlatābād, captured the city, and besieged the rebels in the citadel, but was recalled to Gujjarāt by a serious rebellion headed by a man named Taghī. He pursued the rebel in Gujjarāt and Kāthiāwār for three years, drove him into Sind, and followed him thither, and on March 20, 1351, died within a few miles of Thatta, where the rebel had taken refuge. "The king", as a historian says, "was freed from his people, and they from their king".

His empire, at its greatest extent, included the whole of India except the small kingdoms of the Colas and the Pāndyas, in the neighbourhood of Cape Comorin, and the principality of Gīrnār in Kāthiāwār. Before his death he lost Bengal, the Dakan, the Peninsula, and Sind, and left the remnant of his dominions seething with discontent.

MUHAMMAD III, the sixth king of the Tughluq dynasty of Dīhli, was the son of Firuz, at whose death the son of Faṭḥ Khān, his eldest son, was raised to the throne on Sept. 20, 1388, as Ghiyāth al-Dīn Tughluq II, but was slain on Feb. 19, 1389, and was succeeded by his cousin Abū Bakr, son of Zafar Khān, the second son of Firuz. Muḥammad, the third son, contested the succession and, after suffering more than one defeat, occupied Dīhli and ascended the throne on Aug. 31, 1390. Abū Bakr took refuge with Bahādur Nāshir in Mewāt but was pursued and defeated, and was imprisoned in Mirāṭh, where he shortly afterwards died. The old servants of Firuz, men of Eastern Hindūstān, who had been the principal factors in all the troubles of the kingdom, were put to the sword, after being tested by a shibboleth which distinguished them from the natives of Dīhli.

A rebellion in Gujjarāt was suppressed in the same year by Zafar Khān, who in 1396 became independent in that province, and in 1392 Muḥammad crushed a serious rebellion in the Dab, captured Lāwa, ravaged the districts of Kanawdī and Dalman, and built near Djalessar a fort, which he named Muḥammadābād. In the same year, he put to death his minister, Islām Khān, who was meditating rebellion, and appointed in his place Khwāja Djaḥṣu. Another rebellion was crushed in the southern Dab, and in August 1393, Muḥammad invaded and plundered Mewāt and returned to Djalessar, where he fell sick. Bahādur Nāshir took advantage of his illness to plunder some villages in the neighbourhood of Dīhli and Muḥammad marched into Mewāt, defeated him, and put him to flight, but on his return to Muḥammadābād his disorder increased, and on Jan. 20, 1394, just as he had ordered his son Humāyūn Khān to march against the Khokars, who had captured Lāhor and were ravaging the Panjāb, he died.

(T. W. HAIG)

MUHAMMAD I, the second king of the Bahmani dynasty of the Dakan, was the

eldest son of Hasan, 'Alī' al-Dīn Bahman Shāh, usually, but incorrectly, styled Hasan Gangā. On succeeding his father, on Feb. 11, 1358, he carefully organized the government of the four provinces of the kingdom and the administration of the army. The pertinacity of the Hindū bankers and money-changers in melting down the gold coinage which he introduced led to a general massacre of the community and the measure involved him in hostilities with the Hindū states of Warangal and Vijayanagar. He invaded the dominions of Kānahaiya of Warangal three times, put his son Venāyek Deva to death, and compelled him to pay heavy indemnities and to surrender the town and district of Golkonda. After this success he grossly insulted Bukka I of Vijayanagar by paying some dancing girls with a draft drawn by him on Bukka's treasury. Bukka invaded the Rāichūr Doab, captured Mudgal, and massacred its garrison. Muḥammad marched against him, attacked him with great impetuosity, defeated him, and recovered Mudgal, where he rested during the rainy season. In 1367 he met Bukka at Kawthal, again defeated him, and carried out an indiscriminate massacre of his subjects. The Hindūs were cowed by the slaughter of 400,000 of their race, and Bukka was compelled to sue for peace. He honoured the draft and paid an indemnity, and received in return a guarantee that non-combatants should be spared in future wars, and the agreement, though sometimes violated, mitigated to some extent the horrors of the long period of intermittent warfare between the two states. On returning from Vijayanagar he completed, in 1367, the great mosque at Gulbarga, and then turned against his cousin Bahrām Khān Mārandarānī, who had for some years been in rebellion at Dawlatābād, defeated his army, and drove its leaders into Gujjarāt. He died in 1377 and was succeeded by his elder son, Muḥajhid.

King (*The History of the Bahmani Dynasty*); *An Arabic History of Gujjarāt*, edited by Sir E. Denison Ross (*Indian Text Series*); *The Cambridge History of India*, vol. iii., chap. xv.

(T. W. HAIG)

MUHAMMAD II, the fifth king of the Bahmani dynasty of the Dakan, was the son of Maḥmūd Khān, the youngest son of 'Alī' al-Dīn Bahman Shāh, the founder of the dynasty, and was raised to the throne on May 20, 1378, after the assassination of his uncle, Dāwūd Shāh. Firāhtā's statement that this king's name was Maḥmūd has misled all European historians, but is refuted by inscriptions, legends on coins, and other historians.

Muḥammad II was a man of peace, devoted to literature and poetry, and his reign was undisturbed by foreign wars. He invited Hāfiṣ to visit his court, and the great poet set out from Shirāz in response to the invitation, but was so terrified by a storm in the Persian Gulf that he disembarked and returned to Shirāz, whence he sent to Muḥammad his excuses in a well known ode.

Between 1387 and 1395 the Dakan was visited by a severe famine, and the king's measures of relief included the free importation of grain, the establishment of schools at which children were taught, fed, and lodged at the public expense,

and special allowances to readers of the Qur'ān and the blind, but only those of his own faith profited by his benefactions. He died of a fever on April 20, 1397, and was succeeded by his elder son, Ghiyāth al-Dīn.

(T. W. HAIG)

MUHAMMAD III, LASHKARĪ, the thirteenth king of the Bahmanī dynasty of the Dakṣiṇ, was the younger son of Humāyūn Shāh, and succeeded his elder brother, Nizām Shāh, on July 30, 1463, at the age of nine. His minister was the famous Mahmūd Gāwān, Malik al-Tudjjar, Khwāja Dīhān. A campaign against Mālwa in 1467 was unsuccessful, but between 1469 and 1471 Mahmūd Gāwān conquered the southern Konkan. In 1472 Malik Hasan Bahri, Nizām al-Mulk, a Brahman who had been captured in Vidyanagar and educated as a Muslim, led a successful expedition into southern Uṭṭar and was rewarded with the government of Telingāna. Fath Allāh 'Imād al-Mulk, another Brahman with a similar history, was made governor of Barār, and Yūmī 'Adil Khān, a Turk, was appointed to Dawlatābād. In the same year Muhammad captured the fortresses of Bankāpur and Balgāw, and his conduct at the siege of the latter earned for him the title of Lashkarī, "the Soldier". In 1474 the Dakṣiṇ suffered severely from a famine which lasted for two years, and in 1476 a rebellion in Kōndawir led the king into Telingāna. He relieved Malik Hasan, who had been besieged in Rājamahendri, invaded Uṭṭar and punished the rājās, who had supported the rebels, and on his return, in 1478, captured Kōndawir and assumed the title of *Ghāzī*.

He then set out to invade the eastern Karnāṭak, but first divided the great province of Telingāna into two governments, mortally offending Malik Hasan, the governor. The partition was part of a scheme, devised by Mahmūd Gāwān, to be applied to all the provinces of the kingdom.

Muhammad made Kōndapalli, in the Karnāṭak, his headquarters, and returned thither after carrying out a daring raid to Kāndjweram. From Kōndapalli he issued an edict dividing the other three provinces of his kingdom, Barār, Dawlatābād, and Gulbarga each into two governments. The measure was intensely unpopular, but it was only the vindictive Malik Hasan that actively resented it. He regarded Mahmūd Gāwān as the author of all the unpopular reforms, and by means of a forged letter persuaded the young king that his minister was in league with the foreign enemies of the state. Muhammad, when under the influence of drink, summoned his faithful minister, and on April 5, 1481, without any inquiry into the circumstances of the case, caused his head to be struck off. Mahmūd's innocence was established immediately after his death, and from the day of his unjust execution may be dated the collapse of the authority of the Bahmanī kings. Of the two parties in the state all the foreigners, led by Yūmī 'Adil Khān, who established himself in Bidjāpur, and the respectable portion of the Dakanis, led by Fath Allāh 'Imād al-Mulk of Barār, avoided intercourse with the king, who was thrown into the arms of the assassins, led by Malik Hasan. The *amirs* accompanied Muhammad to Bidar and subsequently on an expedition to Balgāw, but encamped apart from the royal troops, and always saluted the king

from a distance, refusing to enter his presence. Muhammad attempted to drown his grief and humiliation in drink, from the effects of which he died at Bidar on March 22, 1482, crying out in his last moments that Mahmūd Gāwān was slaying him. He was succeeded by his son Mahmūd, who was never a king but in name.

(T. W. HAIG)

MUHAMMAD N. 'ABBĀS [See KADJAR.]

MUHAMMAD N. 'ABD ALLĀH, great-grandson of Ḥasan, the eldest son of 'Alī and Fāṭima, was one of the 'Alids who did not spend their time passively awaiting the fulfilment of their aspirations, but endeavoured to realise them by personal effort. He and his brother Ibrāhīm had, according to Wāḡidī, been brought up as future rulers and Muhammad was called al-Mabdi by his father. As early as the reign of the Umayyad caliph Ḥishām, the two sectarians al-Mughīra (q.v.) and Bayān (q.v.) who did not recognise Muhammad b. 'Alī al-Bakr (q.v.) endeavoured to make propaganda for him. When signs of the imminent collapse of Umayyad rule became apparent after Walīd's death, 'Abd Allāh's family by his command paid homage to Muhammad with the exception of al-Bakr's son Dī'fār. Wider circles also recognised him as the legitimate heir, including the Mu'tazilis, who in those days had a distinctly ascetic character. Abū Dī'fār, later the 'Abbāsīd caliph, was at this time attached to this school and it is several times recorded that he was among those who paid homage to Muhammad. This is in itself by no means improbable and well explains his hostile attitude to him, although it remains remarkable that Muhammad later nowhere, even in his polemical letters to him, refers to this important fact. The Umayyad governor Ibn Ḥubaira also thought of joining him when he was besieged in Wāṣiṭ in 132 (750) but dropped the matter when he received no answer to his letter.

When finally the 'Abbāsīd Abū 'l-'Abbās in the same year won the caliphate and ousted the 'Alids, the two brothers disappeared and showed thereby that they would not recognise him. There now began for them a period full of adventure and danger, especially after Abū Dī'fār became caliph in 136 (754). They went secretly from place to place to gain adherents; nowhere could they feel safe from the caliph but the people were on the whole favourably disposed to them and at least would not betray them. In this way they reached not only Basra and Kūfa but even went as far as al-Sind via 'Aden; as a rule however, they stayed in Arabia, most securely among the Dī'haina, in whose territory lay the hill of Raḡwa, which so often appears in the history of the 'Alids. The caliph was very uneasy at the continued lack of success of his search for them; more and more angrily he demanded of his governors in Medina that they should be produced and he dismissed several in rapid succession, when they appeared, perhaps not without reason, ineffective and lukewarm in their efforts. He himself took very active steps but with as little result. On his pilgrimage in 140 (758) he had Muhammad and Ibrāhīm's father thrown into prison because they would not betray their place of concealment, and on a later pilgrimage (144 = 762) the same fate met the sons and grandsons of Ḥasan, 'Abd Allāh's brother. They and 'Abd Allāh were taken to Kūfa, treated most

brutally and thrown into prison, where most of them died. The same thing happened to Ibrahim's father-in-law Muhammad b. 'Abd Allāh, a descendant of Uthman, whose head the caliph sent to Khurāsān with a certificate on oath that it was the head of the 'Alid Muhammad in order to intimidate his followers there. Shortly before (Dec. 761), he finally found a governor after his own heart, Riyāh b. 'Uthmān, who conducted the search with the necessary vigour. But he was soon able to save himself the trouble for in Rajab 145 (Nov. 762) Muhammad appeared in Medina and began the revolution while his brother Ishāq went to Basra to do the same. It is not clear whether they did this because in Muhammad's opinion the time was ripe or whether they were forced by circumstances to hasten their plans. In any case, the enterprise was not sufficiently prepared, for although they had a large number of followers in Kūfa, Basra, Egypt, where however Muhammad's son 'Alī was arrested by the 'Abbāsid governor, in Khurāsān and even in Sind, to which another son 'Abd Allāh al-Ashtar was sent, there was no question of any organisation, and, as so frequently, the enthusiasm for the 'Alids was like a fire of straw which blazes up quickly but dies down as soon. In Medina where Riyāh was completely taken by surprise, Muhammad in keeping with his character acted with great mildness; he opened the prison, forbade all bloodshed and was content with arresting Riyāh. The best elements in the town came over to him after the jurist Malik b. Anas declared invalid his oath taken to the 'Abbāsids; Mecca also surrendered to the new ruler. The outbreak of the revolt was really a relief to Abū Dja'far for he had now, as he said, enticed the fox out of his hole. He hurriedly left Baghdad, with the building of which he was busy, and went to Kūfa, the point of danger. With keen instinct he saw that the weak point of the rebellion lay in Medina which must be attacked first, for in this remote spot there was a lack of materials of war and the roads thither could easily be barred. But he first of all offered a complete amnesty to Muhammad, which however only led to a characteristic exchange of letters, in which one reproached the other with the weaknesses of his family. He then sent his relative 'Isā b. Mūsā against him with 4,000 men, with instructions however to settle the matter peacefully if possible. His arrival had a sobering effect upon the Medinese, of whom a number seized the opportunity to get out of their difficult position. Muhammad however remained undismayed. He rejected the well meant advice of several men to abandon Medina as an insult to the town but left his people free to stay with him or not. He trusted in Allāh "from whom victory comes and in whose hand the matter lies", and imitated all that the Prophet had done in his time in romantic fashion. For example he restored the ditch which the Prophet had dug round Medina when it was besieged by the Quraysh; he used Muhammad's sword and his battle-cry was the same as that at the battle of Hunain; even the old single combat before the battle proper was revived. The result in these circumstances was easily foreseen. 'Isā, after offering a free pardon in vain for a few days, laid a few doors over the ditch, entered the town and began a battle in which Muhammad's supporters became less and less in numbers until their leader finally fell

(Monday, 14th Ramaḍān 145 = Dec. 6, 762). Muhammad's head was cut off and sent to the caliph. For the further course of the rebellion see the article *ISRĀ'ĪM b. 'ABD ALLĀH*.

Muhammad is described as tall and strong with a very dark skin, on which account the caliph sardonically called him *al-Muḥammam*, the "Blackened". He was rightly called "the pure soul" (Tahān, iii. 200) for he was an ideal character, gentle in spite of his personal bravery, but he lacked those qualities which are required of a pretender in times like his.

(Fa. Buhl)

MUHAMMAD b. 'ABD ALLĀH, a Tāhirid, governor of Baghdad. Born in 209 (824—825) Muhammad in 237 (851) was summoned by the Caliph to Baghdad and appointed military governor in order to restore order in the chaos then prevailing. In spite of the great power of the Tāhirids, who ruled Khurāsān as independent sovereigns in practice, although they nominally recognised the suzerainty of the Caliph, his task was by no means a light one. After al-Mu'tasim had ascended the throne (248 = 862), he confirmed Muhammad in his office and also gave him the governorship of the 'Irāq along with the two holy cities of Mecca and Medina. In the following year troubles broke out in Baghdad and Sāmarrā. The Arabs were defeated by the Byzantines and the rage of the people was turned against the Caliph. The vizier Uṣāmah however finally succeeded in restoring order with the help of the two Turkish generals Waṣīf and Bogha the Younger. The 'Alids also gave the government trouble on several occasions. A descendant of 'Alī named Yahyā b. 'Umar rebelled in Kūfa and drove out the governor of the town. After he had routed an army sent against him by Muhammad, he was attacked by the 'Abbāsid general al-Ḥusain b. Ismā'īl while another division took him in the rear and he finally fell in the battle (Rajab 250 = Aug. 864). Another 'Alid, al-Ḥasan b. Zaid, had more success. Two prominent men in Tabaristān, who were dissatisfied with the rule of the Tāhirids, appealed to him in 250 and very soon he was acknowledged as lord of the whole of Tabaristān. The Tāhirid governors of al-Ray and Kāzin were driven out and replaced by 'Alids; Muhammad b. Tāhir, governor of Khurāsān, a nephew of the governor of Baghdad, then sent an army against al-Ray. The 'Alid governor was defeated and captured and the town had to surrender, but again fell into the hand of the 'Alids. When the former governor of Tabaristān, Sulaimān b. 'Abd Allāh, invaded this province and conquered it completely, al-Ḥasan b. Zaid had to flee to Daīlam where he was defeated by Muhammad b. Tāhir (351 = 865—866); after some years (257 = 870—871) however, he inflicted a defeat on the latter's troops in Dīrdjān and in 259 (872—873) he again became lord of Khurāsān, where he founded an 'Alid dynasty which lasted about sixty years. Arabia

also did not escape the 'Alid plots. A descendant of 'Alī named Ism'īl b. Yūsuf raised trouble there in 251 (865), plundered Mecca and Medina and killed so many pilgrims that he received the epithet of *al-Saffāk*, 'the Bloodshedder'. There was also continual trouble in the capital. In Muharram of the same year (= Feb. 865), al-Musta'in left Sāmarrā and went to Baghdad. Al-Mu'tazz [q. v.] was then taken by force from his prison in Sāmarrā and proclaimed Caliph; he then appointed his brother Abū Ahmad, later co-regent with the Caliph al-Mu'tamid, commander-in-chief in the war against al-Musta'in and his governor. When all negotiations failed, the latter had to take to arms but was several times defeated. Fighting took place in and around Baghdad with varying success during almost the whole year, while anarchy in the provinces increased and when Muhammad finally began negotiations with Abū Ahmad, he was accused of treason, so that the Caliph had to protect him against the troops who were furious with him. But when Muhammad's friends told him that al-Musta'in intended to sacrifice himself, he made peace with Abū Ahmad. The Caliph had reluctantly to confirm the treaty and abdicate in favour of his rival al-Mu'tazz (Dhu 'l-Hijja 251 = Jan. 866) and the latter thereupon ascended the throne. Muhammad died in Dhu 'l-Ka'da 253 (Nov. 867).

(K. V. ZETTERSTEN)

MUHAMMAD B. 'ABD ALLĀH HASSAN AL-MAHDĪ, the well known Somali Mahdī called by the British 'the Mad Mullah'. He was a Somali belonging to the Ogaden Bah Geli tribe, section Rer Hamar. He was born about 1860 A. D. and had been from his youth devoted to religious and mystic studies; in 1895 A. D. he performed the pilgrimage and during his stay in Mecca became acquainted with Saiyid Muhammad Sāliḥ [cf. SOMALILAND] of whom he became an eager follower. After his return to Somaliland he first settled in the Dūbbahanta tribe's territory and began a vigorous propaganda on behalf of the Sāliḥiya *ḥarīka* and to call Somali Muslims to a more strict rule of life. As he was a learned, eloquent man and a skilful impromptu composer of poems (the ancient and best way to propagate one's ideas among the Somali Beduins), he was easily able to attain a great popularity among the Dūbbahanta in British Somaliland and his Ogaden countrymen in Abyssinia. His influence brought him to the knowledge of the government of Berbera, and British officials had sometimes recourse to him to settle through his mediation disputes arising between Beduin groups. In March 1899 however, the Mullah suddenly changed his former attitude to an openly hostile one towards the British Government. In August 1899 he assembled his followers in Dura'a and declared himself to be the Mahdī and proclaimed the holy war against the infidels. A first expedition was sent against him by the Abyssinians to prevent a further exten-

sion of the rebellion in Ogaden; but Grāmāḥ Bānti, the leader of this force, retired to Harar after a violent pillaging *razzia* led by him against the Rer 'Alī, an Ogaden tribe. In 1901 Colonel Swayne drove back the Mullah as far as the boundaries of Italian Northern Somaliland and defeated him at Farjūddīn on July 16, 1901. A second British expedition in 1902 won another victory in the fight at Eragō on October 6, 1902. In 1903 it was decided to send against the Mullah a great expedition in three columns: a British one departing from Hōbaya according to a British-Italian agreement concluded in the same year to that effect; another British column departing from Berbera; and a third, an Abyssinian force departing from Harar. The British forces were placed under the command of General Manning. But the first column fell into an ambush and was defeated by the Mullah at Gumburi on April 17, 1903; the second column suffered heavy losses in a fierce fight at Daratola on April 22, 1903; the Abyssinian column made only, as usual, a *razzia* against Ogaden groups in the valley of the Shābēla. In 1904 a fourth British expedition defeated the Mullah at Djidhālī on January 9, 1904 and again, after the landing of a naval force on the shore of the Indian Ocean, at Ilig in Italian territory on April 27, 1904. In the meantime, Saiyid Muhammad Sāliḥ on the invitation of the British and Italian Governments had directed a letter to the most influential Muslim learned men in Somaliland, which contained a declaration against the Mullah, who was said to have violated the rules of the Sāliḥiya *ḥarīka* and thus to have become worthy of the curses of the true followers of the Sāliḥiya. The victories of the British, however, as they could not be followed up by a permanent occupation of the interior, had not been sufficient to subdue the rebellion. It was therefore attempted to conclude an Anglo-Italian agreement with the Mullah and this was carried through by offering to the Mullah the concession of the Italian portion of the Nūgāl valley with Ilig as his seat. The Mullah subscribed to these conditions in Ilig on March 5, 1905; but added to his signature the clause '*wa 'l-hunqil ya'rifa 'āllī*' (and the Consul knows my condition), which was explained in Europe as meaning a close trust in the Consul, but otherwise in Somaliland, as he (the Mullah) was a Sāfi, and therefore by no means obliged to execute any arrangement he might have concluded with infidels on account of temporary political conditions. In January 1908 the Mullah actually began again to lead *razzias* against British and Italian subjects. No great expedition was however sent against him by the British, who even retired from the interior of their colony; a Camel Constabulary Corps was raised as a mobile force to be employed in raids and swift operations against the Mullah's parties. But after many successful and gallant raids the Camel Constabulary Corps was met by an overwhelming enemy force at Dalma-dōba on August 9, 1913, and the Commandant of the Corps, Sir Richard Corfield, was killed in the fight. In the meantime, the Italians had almost entirely occupied the interior of Southern Somaliland through a very successful policy, which avoided any considerable military action; in this way they brought about in Northern Somaliland the subjection of the two Sultāns (the Sultān of the Madjertēn and the Sultān of Hōbaya) to the Italian

Government, and further they organised the Sultān's forces to employ them against the Mullah, thus assuring the defence of the northern frontier of their colony. There then began a series of raids led by Somali auxiliary lands, especially against the Mullah's followers in the northern valley of the Shaballa and towards Nūgāl, where Djiriban and Gar'ad were occupied by the Sultān of Hobya. These energetic actions which took place even during the Great European war, besides wearing down the Mullah's army, caused him to lose political control of a very large zone where the population concluded peaceful agreements with Italy and forced him to be continually ready to defend his territory from the south also. However, after the end of the Great War, the British Government decided to attack the Mullah from Berbera and to finally overthrow him. In January-March 1920 after violent bombardments of the Mullah's defences by the British airmen, a British force advanced to Tālāh, the Mullah's last camp; he, rapidly pursued by the Camel Corps and Somali auxiliaries, fled to Ogaden and then into the Karanla tribe's territory, where he died on November 23, 1920.

The Mullah's career is a very typical one for the study of the Somali mind. He had begun his movement as an agent of the Šālihiya ʿarīṣa, then his increasing popularity tempted him to a more ambitious sphere and, accordingly, after placing his propaganda on a severely religious basis, he tried to become the leader of all the Somali by making the ties of the common faith prevail over the tribal bonds. This is really the only way to lead such a movement in Somaliland where Islām may be regarded as a tie of brotherhood among tribes otherwise deeply divided by their secular history of wars and revenge. Therefore Muḥammad b. 'Abd Allāh Hassān said in a famous poem: "Have I not put my prayer-mat on this sea to join together the Muslims who were not brothers?" alluding also to his relations with the Šālihiya in Arabia. He desired for the same reason that his followers should call themselves "Darāwīsh", forgetting even the name of their original tribe. Therefore he affected to become angry when he was referred to in official correspondence as "Muḥammad 'Abd Allāh, the Ogaden Bah Geri" while he used to add to his signature only the *nishā*: al-Ḥāshimī (alluding to the origin of the Somali from 'Aḳīl b. Abī Tālib) [see the art. SOMALILAND].

Further, instead of the tribal forces he raised special armed corps, often with a new name, like the Hagattu ("the scratchers") recruited among the Habar Gidir, the Dūḡad recruited among the Mikāhīl ("Dūḡad" means "shooter"), the Kāyād recruited among the Dūlbahanta. But he did not pursue this policy to the end: the hostility of the greater part of the Isāḳ tribes, which was a strong appeal to the old rivalry between Isāḳ and Dārūd; Muḥammad Šāliḥ's letter, which was undoubtedly a severe blow to him, since he had already provoked the hostility of the Kādīriya and so had to rely entirely on Šālihiya support; the necessity of getting booty for his soldiers who otherwise would have hardly remained with him; all these things and his very nature caused the religious prestige of the Mullah as the Mahdī of Somaliland to decline and he gradually became merely the chief of a tribe; a powerful chief indeed of a large tribe as the Darāwīsh were, formed from various elements and therefore very similar to the federations well known

in the Somali customary law. It was obvious that, when he began to regard himself in this light (that is regarding himself as a chief of a Somali tribe rather than "the brother born from the same father and the same mother of all the Muslims"), it was very difficult for him to restrain himself and his followers from exaggerating those tendencies so familiar to their own national character; and therefore they came back gradually to the ancient Somali custom of guerrilla warfare conducted in the traditional way, even to defying the tribes of the enemy in insulting or scornful poems or designating them with typical ironical nicknames or giving to every razzia a special name ("the razzia smashing the bones" was the name given to the fight at Dhulmadoba; cf. the *Ayām al-'Arab*).

It may therefore be concluded that the Mullah's attempt to avail himself of Islām to conquer the old rivalries between the tribes and combine the Somali to drive the Europeans out of the country, failed both on account of the strength of the European armies and the fierce resistance, often unconscious, opposed by the Somali on behalf of their ancient tribal organisation and customary law.

MUHAMMAD R. 'ABD ALLĀH [See IBN AL-'ADRĀB, IBN AL-KHAYYĪR, IBN MĀLIK.]

MUHAMMAD R. 'ABD AL-MALIK, ABU DJĀFAR, called Ibn al-Zayāt, vizier to several 'Abbāsids. Ibn al-Zayāt began his career as secretary in the chancellery in Baghdad and when the caliph al-Mu'taḥim noticed his ability and learning he appointed him his vizier (219—220 = 834—835). He also filled this office in the reign of al-Wāthiq; but as he treated the latter's brother Dja'far, the future caliph al-Mutawakkil, with a lack of respect he earned his hatred. After the death of al-Wāthiq in Dhū l-Hiǧǧa 232 (Aug. 847), Ibn al-Zayāt wished homage to be paid to his son Muḥammad; the latter, however, was thought to be too young by the Turkish general Waṣfī and in his stead Dja'far was proclaimed caliph under the name al-Mutawakkil. The vizier was at first allowed to remain in office but in Šafar of the following year (Sept. 847), he was arrested, deprived of his possessions and subjected to a cruel form of torture which he himself had invented. After enduring the most horrible cruelty he died in Rabī' I 233 (Nov. 847).

MUHAMMAD R. 'ABD AL-MALIK [See IBN TUFAYL, IBN ZUHL.]

MUHAMMAD b. 'ABD AL-RAHİM [See Ibn AL-FURĀṬ].

MUHAMMAD b. 'ABD AL-WAHHĀB [See WAHHĀBIYA].

MUHAMMAD b. ABĪ 'ĀMIR [See AL-MANṢŪR b. ABĪ 'ĀMIR].

MUHAMMAD, a son of Abū Bakr and one of his wives, Aṣmā' of the tribe of Khath'am. He was born in the last year of Muhammad's life so that his father could not have exercised any influence on him, while the memories of Abū Bakr's great friend which were kept alive in his family must have had all the more influence on the passionate nature of the boy, which receives important confirmation from the fact that Ibn Kūṭayba describes him as one of the "pious" (*ṣāliḥ*) among the Qurāsh. When in the reign of 'Uthmān the bitterness at the preference of the Umayyads in combination with a reaction against the strong secularisation of Islām provoked a movement which grew in strength, he took part in it with great vigour and began along with 'Uthmān's ungrateful foster-son Muhammad b. Abi Hujra to stir up the people of Egypt against the Caliph. He later went with other revolutionaries to Medina where his equally ardent but much wiser half-sister 'Āṣha in vain advised him to go with her to Mecca and leave others to carry through the crime; but he was one of those who broke into the Caliph's room where he ill-treated the helpless old man although it was Kinān b. Bihār who dealt the death-blow. He was one of the few Qurāsh who joined 'Alī and the latter apparently cherished a real affection for the young man, which his enemies of course interpreted as further evidence of his friendship with the murderers of 'Uthmān. Muhammad took part in the battle of the Camel, at the conclusion of which the chivalrous 'Alī commissioned him to escort his half-sister to Basra. The sources give somewhat different accounts of the last phase of his life in Egypt. According to Wāḳidī in Balādhurī, Abū Mikhāḍ [Tabarī, i. 3392 sq.] and Ya'qūbī, 'Alī at once appointed him governor of Egypt after unwisely recalling Kaḥ b. Sa'd; but as he soon discovered how foolish it was to appoint a youth inexperienced in war to this difficult post, he sent for his ablest follower al-Ashtar [q. v.] and gave him command in Egypt while he appeased Muhammad's rightly injured feelings by a kind later. The attempt to make good the mistake failed, however, for al-Ashtar was poisoned on the way in al-Kalsum at the instigation of Mu'āwiya. Al-Zuhri's account [Tabarī, i. 3242] shows 'Alī in a somewhat more favourable light. After the recall of Kaḥ he sent al-Ashtar as governor to Egypt and only after he was poisoned did he send Muhammad. Finally there is a third story [Ibn al-Kalbi and Mas'ūdi] according to which al-Ashtar was sent to Egypt only after the death of Muhammad, but this must be due to some misunderstanding of the first version. In any case, the choice of Muhammad was an unfortunate one, for the inexperienced youth, who had no authority and was besides insufficiently supported by 'Alī, was not fit to meet experienced opponents like Mu'āwiya and 'Amr b. al-'Āṣ, as anyone but 'Alī would have seen. 'Amr b. al-'Āṣ came with an army and a battle was fought at al-Muṣannāt (the dam). When the actual murderer of 'Uthmān, Kinān b. Bihār, had fallen after a brave resistance,

the Egyptians lost heart and Muhammad, abandoned by all, was captured and killed while trying to escape (38 = 658).

MUHAMMAD b. ABĪ BAKR [See Ibn KĀYIM AL-DJAWZĪYA, Ibn SA'YID AL-NĀS].

MUHAMMAD b. ABĪ 'L-KĀSİM [See Ibn ABĪ DĪNĀR].

MUHAMMAD b. ABĪ MUHAMMAD [See Ibn ZAFAR].

MUHAMMAD b. ABĪ 'L-SĀDJ Abū 'URĀID ALLĀH, son of Abū 'L-Sādj Dīwād, an Eastern Iranian (not Turkish) noble from Ushrūsāna in Ma-warā' al-Nahr (see Barthold, *Turkistan*, G. M. S., p. 169). For his early career see the article *SAJJID*. After his rupture with Khumrawāh he returned to Baghdād (276 = 889) and appears to have remained there (cf. Tabarī, iii. 2122) until his appointment as governor of Ādharbāidjān in 279 (892). Though on his arrival he had entertained friendly relations with the Bagratid king of Armenia, Sembat (acc. 891), after seizing Marāṣha in 280 (893) he made a first incursion into Armenia, but without success. At the same time he had strengthened his position at Baghdād by giving his daughter in marriage to al-Ma'tadīd's confidant, the general Badr al-Mu'tadīd. Having been rejoined by his *khāṣm*, the general Waṣīf, who had defeated the Dulafid 'Umar b. 'Abd al-'Āzī in al-Djīlā in 281 (894—895) but did not succeed in annexing his territory, he made a second expedition into Armenia in 282—283 (895—896) and captured Kars, Dwin and Waspurakan. Subsequently he came to terms with Sembat, but his son Dīwād remained as governor of Dwin until Muhammad's death. In 284 (897—898) Muhammad declared his independence, but finding himself unable to withstand al-Mu'tadīd made prompt submission, was pardoned, and in the following year officially recognized as governor of Armenia in addition to Ādharbāidjān. About the same time he appears to have adopted the title of al-Afshīn, which appears on his coinage, and which was evidently intended as a claim to descent from the old princely family of Ushrūsāna (see the article *AFSHIN* and Justi, *Iran. Namenbuch*, s. v. *Pišīn*). In 287 (900) he made a further indirect attempt to extend his rule over the territories which were slipping from the grasp of the Tūllids by encouraging Waṣīf to seize Malatya and to apply to the caliph for investiture with the government of Cilicia. Al-Ma'tadīd, however, learning that this was only a preliminary step towards the seizure of Diyār Muṣār by Waṣīf and al-Afshīn, put an end to their design by a swift and unexpected campaign against Waṣīf, who was himself captured. Al-Afshīn died a few months later (Rab' 1, 288 = March 901) at Bardha'a.

MUHAMMAD b. AGHLAB [See **AGHLAIDS**.]

MUHAMMAD b. AHMAD [See **IBN AL-'ALĀMĪ**, **IBN IYĀS**, **IBN RUḤD**.]

MUHAMMAD b. 'ALĪ, a grandson of Ḥusain the son of 'Alī; his *kunya* was Abū Dja'far. On account of his learning he was given the honorific name of al-Bākir (the investigator, who goes deeply into things). He was a recognised authority on Tradition and a number of pious utterances are also recorded of him; he had at the same time the characteristic fondness of his family for embroidered silk garments and colours. That he did not escape the usual fate of his family of being celebrated by a section of the Shī'as as an *imām* is shown by a poem of the 'Iḡlī Abū Huraira; but he lived contentedly in Medina and apparently played no part in politics although he was treated, for example by 'Umar II, with respect. He was expressly disowned by extreme Shī'as like al-Mughira and Bayān. When the party which had hitherto paid homage to his brother Zaid, abandoned the latter, they transferred his privileges to him, or rather, since he was dead, to his son Dja'far [cf. **IBN 'ABDULLAH b. MUHAMMAD**]. The reason of the breach is said to have been that Zaid would not insult the memory of the two first Caliphs as his followers demanded but this does not agree very well with the fact that Muhammad in Ibn Sa'd's obviously much retouched account emphatically declares his fondness for Abū Bakr and 'Umar. The date of his death is variously given as 114, 117 or 118 A.H.

MUHAMMAD b. 'ALĪ [See **AL-DJAWĀD AL-ISFAHĀNĪ**, **IBN AL-'ARĀBĪ**, **IBN 'ANṢAR**, **IBN BĀBU'YĀ**, **IBN AL-TIḤTAKĀ**, **IBN WAḤSHIYĀ**.]

MUHAMMAD b. 'ALĪ AL-RIDĀ, ninth *imām* of the Twelver Shī'a, was born in Ramaḡān 195 (June 811) in Medina. As, according to Abū 'L-Faraj al-Isfahānī, *Muḥallil al-Tullūḡ* (Teheran 1307), p. 195, 196, he was of negroid appearance, it may be true that his mother, a slave-woman, variously called Sabika, Durra and Khairūn, was a Nubian; to give her an honourable pedigree it was added 'of the family of Maria the Copt'. When al-Mu'tasim attached 'Alī al-Ridā to his court, he married the boy to one of his daughters, Umm al-Faḍl, who was taken to him in 215 (830). Al-Mu'tasim on his accession summoned him to Baghdad. He arrived there at the beginning of 220, but was dead already by Dhu 'l-Ḥiḍa (Nov. 835). According to the Shī'as and in keeping with their scheme of martyrdom, he was poisoned at the instigation of al-Mu'tasim by Umm al-Faḍl who remained childless; but even the already mentioned *Muḥallil*, which record every murder

of an 'Alid, know nothing of this. This Muhammad is, generally speaking, only occasionally mentioned outside the Shī'a, along with his father, e.g. in Ibn Wāḡib al-Ya'qūbi, *Ta'rikh*, ed. Houtsma (Leyden 1883), ii. 552 and in Tabari, *Annals*, iii. 1029, 1102; according to al-Mar'ūfi, *Murūḡ al-Dhahab* (Paris 1861 sqq.), vii. 117, Muhammad died in 219, according to vii. 171 not till the reign of al-Wāḡib, i.e. after 227. Even within the Shī'a, his role is quite a passive one. After his father's tragic end, those with Zaidi views who had hoped some day with him as Caliph to put into force their activist 'Alid political programme, went their own ways again, while of those who held *imām* views, one group, as usual in such a case, became 'standfast' Wāḡifiya and another chose Ahmad, a brother of al-Ridā, as *imām*; for Muhammad was only seven at the time. For those who remained faithful to him, there arose in the *Shurūḡ al-Imāma* the question of the child *imām*'s knowledge. The case was repeated with the following three *imāms*. But the authority to teach was in the hands of men whose activity extended through several *imāms*; with Maḍḥilī (s. *BIM*), xii. 125 infra cf. Mirzā Muhammad al-Asterābādi, *Manḥad al-Maḥal* (Teheran 1306), p. 217; Abū 'Amr al-Kashshī, *Maḥḥat al-Aḥḥad al-Kaḥḥat* (Bombay 1317), p. 353 sq., 374 sq.; Tāsi, *Fihrist Kutub al-Shī'a* (*Bibl. Ind.*, No. 60), No. 124, 159, p. 289, note 1. The gradual development of the dogma in question, which is associated with the child Jesus teaching in Sīra xix. 30 sqq., is not quite clear, as regards its apportionment to the various *imāms*. Hereciographers including al-Nawbakhtī, *Firāḡ al-Shī'a* (*Bibl. Ind.*, No. 4), p. 74 sqq., quote the doctrines anonymously. Besides, there is the confusion of names (which has also entered European indices); for Muhammad b. 'Alī was also the name of one of his grandchildren, who died before his father, the 10th *imām* 'Alī al-Naḥḥ, but left issue; his adherents continued the *imamate* further than the Twelvers through these children, while they deny the existence of the twelfth *imām* Muhammad al-Mahdi as son of his brother, the eleventh *imām* Hasan al-'Askari. Shī'a works avoid confusion by giving the ninth *imām* the *kunya* Abū Dja'far al-Thāni; his official title is al-Taqī, 'the God-fearing'; a common epithet is al-Djāwād, 'the liberal'; he is said to have paid his father's debts. As *waḥḥ* or *ḥad*, he had, like al-Ridā before him, 'Uthmān b. Sa'īd al-'Amrī, called Sammān or Zayāl. Among the usual miracles of the *imāms*, Abū Dja'far al-Saffār (d. 290) in *Baḥār al-Daradīl* (in Maḍḥilī, xii. 108) relates that the ninth *imām* carried a worshipper at night from Syria to the holy sites of Kербelā, Kūfa and Medina as well as to Mecca. The fact that his memory has been kept so green to the present day is due to the fact that he was buried beside the tomb of his grandfather, the seventh *imām*, Mūsā al-Kāḡim [q.v.]; thus arose the double Meshhed al-Kāḡimain.

Bibliography: A full account with exact references to the sources is given in Muhammad Bakir b. Muhammad Taḥī al-Maḍḥilī, *Bihar al-Anwar*, xii. (Teheran 1302), p. 99—126; of earlier works we may specially mention al-Mufid [q.v.], *al-Farḥād* (Teheran n.d. without pagination, arranged in the order of the *imāms*).

MUHAMMAD B. AL-HANAFIYA, a son of 'Ali and Khawla, a woman of the tribe of the Banu Hanifa, who had been brought a prisoner to Medina after the battle of 'Akraba' [q. v.] and came into 'Ali's possession (cf. Saiyid's poem *Atid al-Aghni*, vii. 4: "she was a servant in the house"); he was born in 16 A. H. Although he did not, like Husain and Husain, have the blood of the Prophet in his veins, he became involved not only in the political turmoils but also in the schemes which the boundless fancies of the extreme Shi'is built up around the family of 'Ali. He was not to blame for this, for he was of a retiring disposition and acted very cautiously. But when Husain had sold his rights and Husain had fallen at Kerbela' in 680, many turned their eyes to him as the natural head of the family. This aroused the suspicion of 'Abd Allah b. Zubair who, after the death of Husain, appeared more and more openly as a pretender; the fact that Muhammad had no sympathy with the efforts of the opposition in the Hijaz is evident from the interesting statement of Baladhuri that he definitely declared the accusations brought against the Caliph Yazid I by the Medinese to be false. The matter only became serious when the adventurer Mukhtar [q. v.] after several vain efforts to get others to join him stirred up a movement on a large scale in the 'Irak in 66 (685), as champion of Muhammad's rights. Even now Muhammad acted with great restraint and declined the significant title "al-Mahdi" with which they wished to greet him (cf. Tabari, ii. 610 and Ibn Sa'd, v. 68, which has certainly been misinterpreted by Lammens). He obviously did not care for Mukhtar at all, and he had every reason to doubt the genuineness of his enthusiasm for him; but in view of the many dangers which surrounded him and probably also from a want of decision he did not wish to break with him openly. Therefore when some people came to him from Kufa to clear up his attitude to Mukhtar, he only gave them a diplomatic answer which was non-committal (cf. the somewhat different versions: Ibn Sa'd, v. 72; Ya'qubi, ii. 308; Tabari, ii. 607 and thereon *Kamil*, p. 598) but which they interpreted as a kind of approval, as it did not definitely disown him. As a result the revolutionary movement spread in extent and much blood was shed to avenge Husain and other 'Alids. Muhammad was against this also (cf. Ibn Sa'd, v. 72 sq. 77); but when Ibn Zubair's attitude became more and more hostile and he finally imprisoned Muhammad and several relatives, including 'Abd Allah b. 'Abbas, at Mecca near the Zamzam well, he saw nothing else for it but to appeal for help to Mukhtar. This was what the latter wanted and he sent a

body of cavalry at once to Mecca and released Muhammad and the other prisoners in the nick of time but by the latter's express orders avoided conflict with Ibn Zubair's troops, as the town was not to be desecrated by bloodshed. Muhammad then sought shelter with his family at Minā (cf. *Kamil*, p. 554, 597; *Kitāb al-Aghni*, viii. 33; Kumāli, ed. Horowitz, i. 78) and later went to Ta'if. He made no further use of Mukhtar and was therefore not compromised when the revolution failed and his champion fell in 67 (686—687). In spite of the threats of Ibn Zubair and the demands couched in more friendly language of 'Abd al-Malik and although a safe place of residence was granted him neither in Hijaz nor in Syria, he defined his attitude by paying homage to neither of the two pretenders and adhered to the principle that he would only recognise a ruler around whom the Muslim community were united. He therefore appeared in the noteworthy pilgrimage of the year 688 along with the Zubairids, Umayyads and Kharijites, as an independent head of a party, although only under an armed neutrality. Only when, after the fall of Ibn Zubair (73 = 692), the unanimity of the *vox populi* which he had demanded, became a reality, did he finally recognise the Marwanid as the legitimate ruler and visited him in 78 (697—698) at Damascus. He returned however to Medina, where he died in 81 (700—701). His strict passivity in the political field is always attributed to purely religious motives in the traditions; not human force but Allah's help alone should assist 'Ali's family to their rights; but there is no doubt that a further reason was his lack of enterprise and self-confidence, a trait common to a number of 'Alids. That, like his whole family, he at the same time liked the good things of this world is evident from the heavy demands which he sent to 'Abd al-Malik for the payment of his debts and annual pensions for his children, relatives and clients; there is also evidence that he had the family fondness for fine clothes and cosmetics. It is all the more remarkable then that the more fanciful and extravagant school of Shi'is seized upon him at once after his death and spread the belief that he was not dead but lived in a kind of fairy kingdom on the hill of Radwa west of Medina, whence he would return as the victorious leader of an army (cf. *Kitāb al-Aghni*, vii. 4 sq. 9 sq.; viii. 32). This was the idea of *raffa* which 'Abd Allah b. Sabā [q. v.] had associated with 'Ali (cf. Friedländer, in *Z. A.*, xlii. 309 sq.) and which was now transferred to him; and in fact it was now easier to bring him into the forefront than it had been while he maintained an attitude of stubborn passive resistance in his lifetime.

MUHAMMAD b. AL-HUDHAIL [See ABU 'L-HUDHAIL].

MUHAMMAD b. ḤUSAIN, an Ottoman dignitary and historian, who at the request of the first Wali of Baghdad, Derwish Mehmed Pasha (Thurayyā, *Sigill-i 'Osmani*, ii. 33), translated into Turkish the history of 'Alī b. Shihāb Hamadhānī, written in 10 *hijr* in Persian; he added two *hijr* to it and gave it the title *Tuhfat al-Ma'mūn*. The work only exists in manuscript.

Bibliography: Binnāfī Mehmed Tahir, *Osmanlı Muallifleri*, iii. 122; cf. also Hādīdī Khalīfa, *Katib al-Zaman*, Bulak 1274, i. 404, where Mustafa Shāhān is named as the Turkish translator.

The **MUHAMMAD KHALIFA** (محمد خلیفہ کنیکار), who was a dignitary of the court and flourished under three sultāns (Marād IV, 1032—1049 = 1623—1640, Ibrāhīm, 1049—1058 = 1640—1648, and Mehmed IV, 1058—1099 = 1648—1687), was not identical with him. He wrote a chronicle of his time entitled *Tārīkh-i Ghilmanī* which covered the years 1060—1075 = 1650—1665. The work which consists of 3 *hijr* and a *hikma* (of which the second *hijr* contains two and the third 13 *faṣl*) was published by Ahmad Rafīq as supplement 11 to *T.O.E.N.*, parts 78—83, Istanbul 1340 (1924).

A certain Muhammad Khalifa b. Husain is perhaps the same person; he also was a dignitary of the court of the same three sultāns and wrote a history of his time which covered the years 1043—1070 (1633—1659). The only known manuscript is in Vienna.

MUHAMMAD b. AL-ḤUSAIN [See ABU 'L-ḤASAN, ABU SA'D, Ibn MU'LA, AL-SHAIRĪF AL-RADĪ].

MUHAMMAD b. IBRĀHĪM [See ABU 'L-ḤASAN].

MUHAMMAD b. IBRĀHĪM 'ADIL SHĀH (1035—1070 = 1626—1660) succeeded to the throne of Bidjāpūr after the death of his father. In the year 1044 (1634), the armies of the emperor Shāh Djahān invaded the Dakan and laid waste the country of Bidjāpūr. After the subjugation of Dawlatābād and other forts, Muhammad b. Ibrāhīm 'Adil Shāh agreed to pay a considerable tribute to the emperor of Delhi. He was the last king of Bidjāpūr who struck coins in his own name. In the latter part of his reign, his vassal Siwādī, son of Sāhū Bhuṣālī, by stratagem and treachery obtained great power, and the foundation of the Bidjāpūr monarchy became weakened. He died in 1070 (1660) and was buried in Bidjāpūr where his tomb is called 'Gul Gumbaz' (circular dome).

MUHAMMAD b. ILYĀS [See ABU 'ALL].

MUHAMMAD b. IṢĀ [See 'ISĀWIYA].

MUHAMMAD b. IṢHĀK [See Ibn IṢHĀK, AL-NA'IM].

MUHAMMAD b. AL-KĀSIM [See ABU 'L-'AINI, AL-ANBARĪ].

MUHAMMAD b. KĀSIM, a cousin of Walīd I (86—96 = 705—715) and son-in-law of al-Ḥādīdjādī b. Yūsuf, was the governor of Basra; in 92 (711), he was sent to conquer Sind. Having defeated and killed the Rādjā of the place called Dīhīr, he took possession of that country in 93 (712) and finally penetrated as far as Multān about 500 miles from the sea and even reached the foot of the Himalāyas. Various accounts are given of the death of this general. The common story is that Muhammad b. Kāsim was falsely accused by the two daughters of the Rādjā of Dīhīr, whom he had sent to the harem of Sulaimān (96—99 = 715—717), the brother and successor of Walīd, of having violated their chastity, and that he was therefore sewn up alive in a raw cow-hide, by order of the enraged caliph. Others say that Muhammad b. Kāsim, with other members of his family, was tortured and put to death by Šālih b. 'Abd al-Rahmān, governor of Iṣrā, in revenge for the murder of his brother by Ḥādīdjādī.

MUHAMMAD b. MAHMUD ABU SHU'AYḤ GHAYĀTH AL-DUNYĀ WA 'L-DĪN, a Saljuq Sultān 547—554 (1153—1159), born 522 (1128), like his brother Malikshāh was educated with the atabeg Ruzaba, who set them up as claimants to the throne against their uncle Mas'ūd. When Ruzaba in 542 (1147—1148) was taken prisoner in a fierce battle and executed, Mas'ūd adopted his nephew and married Muhammad to his daughter. He probably intended him to succeed him and not Malikshāh, as Ibn al-Athīr and others say, because after his death (547 = 1152) the latter was actually raised to the throne. Muhammad was away at the time but within three months he was recognised as sultān by the powerful Khawāzgar, after he had come to Hamadhān, because Malikshāh proved quite incompetent. The new sultān showed his gratitude by treacherously putting Khawāzgar to death and sent his head to the emirs of Marāgha and Adharbāidjān in the hope that he would win them over. But he was disappointed for, although they hated Khawāzgar, their horror at the cruel deed made them prefer to pay homage to Muhammad's uncle Sulaimān, who had escaped from years of imprisonment on Mas'ūd's death. Muhammad therefore fled to Isfahān, but because Sulaimān was an inveterate drunkard, he could not hold out in Hamadhān and when he had gone away Muhammad returned and was henceforth recognised as sultān by the emirs. In the meanwhile Sulaimān succeeded in escaping to Lihf and entered into relations with the Caliph al-Muqtadī li-Amr Allāh. The latter was endeavouring not without success to make himself independent of the Saljuqs and let Sulaimān come to Baghdad (550 = 1155) to use

him against Muhammad. He was also able to win Malikshah over and to collect an army, which was however scattered in the following year by Muhammad with the help of Mawdud, lord of al-Mawasil, and Sulaiman was again made prisoner. Muhammad now thought himself strong enough to attack the Caliph himself and to besiege him in Baghdad. 'Imad al-Din, who was in the town, gives a full account of the siege (*Rec. Hist. Crois.*, ii. 246 sqq.). Muhammad hurriedly raised the siege when news reached him that Idigis had occupied Hamadnan with Malikshah and Arslan (552 = 1157). By the time the sultan arrived there they had retired, but he was at war with them till his death in 554 (1159).

Bibliography: see the article SELJUKS.
(M. TH. HOUTSMA).

MUHAMMAD R. MALIKSHAH ABU SHUJA'
GHUYATH AL-DUNYA WA 'L-DIN KASIM AMIR AL-MU'MININ, a Saljuq sultan (498—511 = 1105—1118), was born on the 18th Sha'ban 474 (Jan. 20, 1082) of a slave, who was also the mother of Sandjar, and was given the Turkish name of Tapar. After his father's death, he stayed at first with Turkan Khatun but then joined his brother Barkiyaruk who granted him the town of Gandja. Arrived there, he also seized Arran and allowed himself to be seduced by Mu'ayyad al-Mulk b. Nizam al-Mulk into dropping his brother's name out of the *khutbas*. The two brothers fought one another with varying success in the following years until finally in 497 (1104) Barkiyaruk withdrew from the western provinces of the empire to Isfahan and left Muhammad to enforce recognition as sultan from the governors in these lands. When Barkiyaruk died soon after, at the end of 1104, Muhammad turned first to Baghdad because he was sure of the homage of the Caliph, who had already received him and his brother a few years before in ceremonial audience (cf. the account in Ibn Khallikan, *Bulak* 1299, ii. 444, had the emir Ayar, who had at first had the *khutbas* read for Malikshah b. Barkiyaruk, treacherously put to death and sent the king of the Arabs Sadaqa back to his capital al-Hilla with orders to restore peace in Basra and among the Arab tribes of the neighbourhood. He then hurried to Isfahan, where the Batinia had achieved great successes in the troubled reign of Barkiyaruk and had established themselves in several hill-fortresses in the neighbourhood. One of their leaders, Ibn Atiqsh, had by a ruse secured possession of the fortress of Diz-Kuh or Shah-Diz built by Malikshah. The sultan regarded it as his first duty to subdue and root out if possible these unbelievers; he sent his troops to besiege the fortress and, when it was taken, razed it to the ground and had the captured Batinia executed in cruel fashion (500 = 1107; cf. the text of the report sent by him to the Caliph's vizier in Ibn al-Kalānisi, ed. Amedroz, p. 152 ff.). Nor did he hesitate to have his own vizier, Sa'd al-Mulk Abu 'l-Mahasin al-Ati, executed at the gate of Isfahan; he was suspected, according to Anushtarwan wrongly, (cf. *Rec. Hist. Crois.*, ii. 91) of having had dealings with the Batinia.

While Muhammad was still in Isfahan, the emir Cawali Saqawu, who ruled between Fars and Khuzistan, made his submission to him; the sultan had frequently tried in vain to bring him to obedience through the emir Mawdud. The sultan was so pleased that he granted him the town of al-Mawasil where Djekermish, who had only paid homage to him under compulsion, was in command. The latter

was not inclined to submit to the arrangement, but was taken prisoner in an encounter with Cawali. The latter however was not yet lord of al-Mawasil, for the followers of Djekermish now supported his son Zangi and appealed for help to Afsunkor al-Bursuki, the governor of Baghdad, to Sadaqa and to Khilid Arslan, the Saljuq of al-Rum. The last-named alone answered the appeal and came with his troops to al-Mawasil where he had homage paid to himself as sultan, but soon afterwards, after an unsuccessful encounter, he was drowned in the Khabur on his retreat. Cawali now had little difficulty in taking the town and going on to his further task, the war against the Crusaders. It would take us too far here to sketch the course of this war, and the reader may therefore be referred to Weil, *Gesch. der Chal.*, iii. 191 sqq. During his absence he again fell into disgrace with the Caliph, who had in the meanwhile returned to Baghdad and sent his troops to attack Sadaqa, with whom he was also dissatisfied. Sadaqa fell in battle in 501 (beg. of 1101). The sultan sent Mawdud to al-Mawasil and granted him the same dignity as he had previously given Cawali. The latter after some time made his peace with the sultan and was appointed as atabeg to Fars, where he fought the unruly elements in the population with great energy (cf. Ibn al-Athir, ed. Torberg, x. 361 sqq.). The Batinia however gave Muhammad no peace, so long as they were able to hold their strong mountain citadel of Alamut; Abu Nasr Ahmad, a son of Nizam al-Mulk, who after Sa'd al-Mulk acted as the sultan's vizier, was therefore given orders to take this fortress and when he did not succeed, he was dismissed in 504 (1109—10). In the meanwhile the sultan was being urged more and more from different sides to prosecute the war with the Crusaders seriously, and he succeeded in persuading the various governors of the western provinces to combine and attack the Christians under the leadership of Mawdud accompanied by the young prince Mas'ud. After Mawdud's assassination (507 = 1113) Afsunkor al-Bursuki took command and after him Bursuk assumed the supreme command but on account of the strife among the Turkish emirs, the valour of the Crusaders and the complicated situation in Syria, decisive successes could not be attained. For the course of the campaign we again refer the reader to Weil, *op. cit.*, p. 194 sqq., and the historians of the Crusaders. In the last years of his life, the sultan sent the emir Anushtegin Shirvan against the Batinia in Alamut, but he died on the 24th Dhu 'l-Hidja 511 (Apr. 18, 1118) before the fortress was taken. He was only 36 years old and this is why Weil suggests that the Batinia had a hand in his death, but there is nothing to support this hypothesis in the oriental chronicles. On the contrary, individuals in his immediate entourage, notably the Great Hujjib 'Ali Bar, seem to have been not quite innocent, because they, apparently to avert suspicion from themselves, accused the sultan's Guhar Khatun and the famous poet al-Tughrai of having caused the sultan's illness by magic arts. The former was blinded and strangled on the day Muhammad died. The reason given by Matthias of Edessa for this (*Docum. Arm.*, i. 120) is wrong. The sultan deserves credit for having, with the assistance of his brother Sandjar who ruled in Khorasan and the adjoining lands, restored the fortunes of the Saljuq kingdom, which had declined since the death of Malikshah

and for having vigorously fought infidels and sectarians in his zeal for Sunni Islam and the 'Abbāsid caliphate. He was, as *Rec. Hist. Crén.*, ii. 118 has it, the perfect man of the Saljūqs and their strong he-camel.

Bibliography: given in the article *سُلَیْمَان*. (M. TH. HOUTSMA)

MUHAMMAD, ABU AHMAD, DJALĀL AL-DAWLA WA-DJAMĀL AL-MILLA, ABU AHMAD MUHAMMAD, second son of Sulṭān Mahmūd of Ghazna, was born about 387 (997). He was married to a daughter of Abū Naṣr Muḥammad b. Abū 'l-Harith Aḥmad b. Muḥammad, the Farighūnī ruler of Džirgānā. After the death of Abū Naṣr Muḥammad in 401 (1010—1011), Sulṭān Mahmūd assigned to his son Muḥammad the government of the province of Džirgānā. In 417 (1026), at the instance of Sulṭān Mahmūd, the 'Abbāsid Caliph al-Kādir bi'llāh conferred on him the titles of Djalāl al-Dawla wa-Djamāl al-Milla. Towards the close of his life, Sulṭān Mahmūd divided his empire between his sons, giving Ghazna, Khurāsān and India to Muḥammad and Raiy, Džihāl and Isfahān to Mas'ūd, and took solemn vows from both to respect this division. When Mahmūd died in Rabi' II, 421 (April 1030), Muḥammad ascended the throne at Ghazna, but Mas'ūd, disregarding his vows, marched from Isfahān to take possession of Ghazna. In the meantime, the nobles at Ghazna deposed Muḥammad on 3rd Shawwāl 421 (October 2, 1030) and read the *Khutba* in the name of Mas'ūd. Muḥammad was then deprived of his sight by orders of Mas'ūd and imprisoned in a fort. His reign had lasted only 6 months.

In 431 Sulṭān Mas'ūd suffered a crushing defeat at the hands of the Saljūqs, and resolved to settle in India. In the beginning of 432 (September 1040), leaving Ghazna in the hands of his son Mawdūd and his wazir, he marched to India with all his treasures, but on 13th Rabi' II, 432 (December 24, 1040) his slaves deposed him and raised Muḥammad to the throne. Shortly after this, Mas'ūd was put to death. Hearing this, Mawdūd advanced with a large army to avenge the death of his father, defeated Muḥammad near Dūnpur on 3rd Shabān 432 (April 1041), and put him to death. The second reign of Muḥammad lasted only 4 months.

Muḥammad was obedient to his father and was a man of amiable temperament. He resembled his father in appearance.

Bibliography: Abū Sa'īd 'Abd al-Halī b. al-Dahhāk al-Gardizī, *Kitāb Zain al-Aḥbār*, ed. M. Nazim, in *Brown Mem. Series*, i.; al-'Uṭbī, *Kitāb al-Yamīnī* (ed. Lahore), p. 294—295; numerous scattered notices in *Ta'rikh-i Mas'ūdī* by Abū 'l-Faḍl Biḥāqī; Ibn al-Aṭṭir (ed. Tornberg), ix. 281—283, 331—334 and *Ta'rikh-i Farīdūta* (ed. Bombay, 1832), p. 60, 68—69.

(MUHAMMAD NAZIM)

MUHAMMAD B. MARWĀN, an Umayyad governor. In 65 (684—685) he was sent by his father, the caliph Marwān I, to Mesopotamia, and in the battle of Dair al-Djāhalik in 72 (691) in which his brother, the caliph 'Abd al-Malik, defeated Muṣ'ab b. al-Zubair, he commanded the advanced guard of the Syrian army. In the following year 'Abd al-Malik gave him the governorship of Mesopotamia and Armenia which carried with it the command in the war with the Byzantines. On account of climatic conditions the Arab expeditions always took place in summer. In 73 (692), the

emperor Justinian II was defeated at Sebaste or Sebastopolis in Cilicia. In 75 (694) Muḥammad again took the field against the Byzantines and was successful against them at Mar'ash, and in the following year he invaded Armenia. Along with his nephew 'Abd Allāh b. 'Abd al-Malik he was sent to al-Haḍḍjādī in the year 82 (701), to support him against the rebel 'Abd al-Rahmān b. Muḥammad b. al-Ash'ath, and in the negotiations with the 'Irāqīs before the battle at Dair al-Djamādīm the caliph was represented by Muḥammad and 'Abd Allāh. In the same year, Muḥammad led an expedition against Armenia, and again in 84 (703) and 85 (704). After the accession of al-Walīd (Shawwāl 86 = Oct. 705) Muḥammad fell gradually into the background while Maslama, the caliph's brother, was the actual commander; but the former retained his governorship for some time until in 91 (709—710) he was replaced by Maslama here also. Muḥammad died in 101 (719—720).

MUHAMMAD B. SA'UD [See GHORĪ DYNASTY.]

MUHAMMAD B. SA'UD (properly Sa'ūd) b. MUHAMMAD of the Muḥrin clan of 'Anaza, the founder of the Wahhābī dynasty of the Āl-Sa'ūd in Nadjd [see the article IBN SA'UD], succeeded his father as amir of Dar'īya in 1137 (1724) or 1140 (1727). His association with the reformer Muḥammad b. 'Abd al-Wahhāb [cf. WAH-ḤĀBĪYA] began in 1157 (1744). Thereafter until his death (end of Rabi' I, 1179 = Sept. 1765) the history of his reign consists of an unceasing and on the whole indecisive struggle against the neighbouring settlements and tribes and his former suzerains, the Banū Khālid of al-Ḥaṣā. He took little active part in these operations, and his personality is overshadowed by the figures of the Reformer himself and of his own son 'Abd al-'Azīz. Nevertheless his talents as a diplomatist more than

once saved the Wāhībī state from being crushed by a coalition of its enemies, notably after the disastrous defeat by the forces of Naḡrān at Ḥa'ir in 1764.

Bibliography: The only full source is the *Khāṣṣ al-Ghannām* (vol. ii. of *Ḥimāyat al-Aḥbār*) of Ḥusain b. Ghannām (d. 1225 H.), MS. British Museum Add. 23,345, fol. 32^a–39^b [the Bombay lithograph (1332 H.) is very inaccurate] summarized by H. St. J. Philby, *Arabia*, London 1930, p. 12–22. — See also A. Musil, *Northern Negd*, New York 1928, p. 258–259, and Amin al-Raiḥānī, *Ta'rikh Naḡd al-Haṣṣ*, Beirut 1928, p. 50–53, and for general works the *Bibliography* to the article *INN SA'UD*. (H. A. R. GINN)

MUHAMMAD b. SĪRĪN [See *INN SA'UD*.]

MUHAMMAD b. TĀHIR, governor of *Khurāsān*. After the death of his father, Muḥammad received the governorship of *Khurāsān* (Radjab 248 = Sept. 862). In 250 (864–5) the 'Alid al-Ḥasan b. Zaid rebelled, which led to a long and serious struggle [see *MUHAMMAD b. 'ABD ALLĀH*]. When 'Abd Allāh al-Sidḡī rebelled against Ya'qūb b. al-Layth al-Saffār and appealed for help to Muḥammad, who appointed him governor of al-Jabāsin and *Khūstān*, Ya'qūb found a welcome pretext to invade *Khurāsān*. Muḥammad sent an embassy to him; but as Ya'qūb had already found a following among discontented *Khurāsānians*, all negotiations were in vain. In Shawwāl 259 (Aug. 873), or according to another statement in 258, he entered Nisābūr without striking a blow, put an end to the Tāhirid dynasty and took Muḥammad prisoner. But when he rebelled against the Caliph al-Mu'tamid, he was defeated in Radjab 262 (April 876) by the latter's brother al-Muwaffaq and Muḥammad, whom he had with him in chains, escaped. The Caliph restored the latter to his former office in *Khurāsān*; the exiled Tāhirid however never found an opportunity to exercise his functions. He was further appointed — probably not till 270 (853–4) — by the vizier Sa'īd b. Maḥlād as his deputy as military governor of Baghdad. He held this office until the accession of al-Mu'taḍid (279 = 892). He died in 296 (908–9).

MUHAMMAD b. TĀHIR [See *INN AL-KĀSĀ-KĀN*.]

MUHAMMAD b. TAKASH [See *ḤAWĀRIM-MAHĀN*.]

MUHAMMAD b. TUGHDIJ b. DJUFF (or DJAFF) b. YALṬARIN b. FUKAN b. FUL b. KHĀṢAN, Abū Bakr, known as *AL-IKḤSHID*, from the title granted to him by the Caliph al-Rāḍī in 327 (939), was the founder of the Egyptian dynasty of the *Ikḥshidids* [q. v.].

He was born in 268 (882) at Baghdad and must have spent his youth in Syria, as his father, who joined the service of the Tūlūnids at about the same date, was appointed governor of Damascus and Tabariya c. 276, a post which he held for some fifteen years, and he himself acted for a time

as his father's deputy for Tabariya. In consequence of the overthrow of the Tūlūnid dynasty in 292 (904), he was imprisoned at Baghdad. He was released in 294 (907), attached to the waṣīr al-'Abbās b. al-Ḥasan, and being implicated in his murder, had to fly when the conspiracy of Ibn al-Mu'tazz [q. v.] failed in 296 (908). He escaped to Syria and found himself reduced to a humble station. Next year he passed on to Egypt, where Takin, its governor, took him into favour, so that he kept him with himself, both in Egypt and in Syria when he was transferred thither to act as governor at intervals (302–307 and 309–311), and promoted him to appointments of importance.

At this period Muḥammad came into contact with the powerful Mādārī family, and also attended Mu'nis [q. v.] when he was brought to Egypt by the Fāṭimid invasions. He had already attracted some attention at Baghdad by an exploit in 306. In 316 (928), through influence at the capital, he became governor of Ramla, quitting Takin abruptly. In 319 he obtained a transfer to Damascus, where he became powerful, and in consequence of his defeat of Būshrā in 321 extended his rule over the whole of Syria. In the same year (March 933) Takin died, and Muḥammad b. Tughdij succeeded in obtaining the appointment as governor of Egypt in his place, but only nominally and for one month (Sept. 933). Two years later, by means of a large army and fleet, he entered Fustāt and took possession of the country, overcoming the resistance of al-Mādārī (Muḥammad b. 'Alī), who by appointment from Baghdad was then in control of Egypt, the governor being under his direction (*taḥta iḥdīrīhī*). Superior to al-Mādārī, however, was al-Faḍl b. Dja'far b. al-Faṣl (for whom see the article *INN AL-FU'ĀṬ*), the inspecting minister (*waṣīr kaṣf*) of Egypt and Syria, who had been specially granted full executive powers. Muḥammad b. Tughdij had acted with the authorization of al-Faḍl and later (324) obtained the confirmation of al-Rāḍī to the addition of Egypt to the province of Syria already held by him. Probably at the same time he was granted the suzerainty over al-Yaman and the Holy Cities of Mecca and Medina, for in his letter of the following year to the Emperor Romanus he boasts of these places as part of his kingdom. Until the death of al-Faḍl in 327 (March 939), he seems to have been subject, at least in theory, to some control by him.

In 324 a decisive victory by the troops of Muḥammad b. Tughdij near Alexandria (battle of Ablūḳ, March 31, 936) crushed the third Fāṭimid invasion of Egypt and led to overtures from the Fāṭimid Caliph al-Kā'im, which in the end came to nothing. Muḥammad did indeed decide three years later to recognize the Fāṭimid, and had given the order that al-Kā'im should be proclaimed in Egypt, out of indignation at the 'Abbāsid government at Baghdad, but was induced to reconsider his decision.

Only a month after he had received his title *al-Ikḥshid* from al-Rāḍī (Ramadān 327 = June–July 939), he found himself threatened from Raḳqa by Ibn Ra'īḳ [q. v.] and learnt that his provinces had been granted to this rival. Badjkam [q. v.], as *amir al-umara'* at Baghdad, gave no answer to his appeal but that the question must be decided by the sword; the powerless Caliph could say nothing. Ibn Ra'īḳ rapidly possessed himself of Syria, driving back the forces sent to oppose him,

and had soon captured Ramla (Oct. 939). Muhammad b. Tughdj himself confronted him with an army at Faramā, and with no fighting beyond some skirmishing entered into negotiations, ending in an agreement to cede Syria from Tabariya to the north on condition that Ramla and the rest were restored to him. Ibn Rā'ik soon broke this treaty and again advanced. This time Muhammad b. Tughdj encountered him at al-ʿArīsh and routed him (15th Ramaḍān 324 = June 24, 940), but as he followed him into Syria, met with a reverse in his turn, one of his detachments being surprised and badly defeated at Ladijdūn (18th August). Peace was then renewed on the same terms as before, and Muhammad b. Tughdj undertook to pay an annual subsidy of 140,000 dinārs. He was back in Egypt in October.

The death of Badīkam in 329 (April 941) drew Ibn Rā'ik back to Baghdad, and Muhammad b. Tughdj was soon relieved of him completely, for he was murdered a year later by the Hamdānids. Muhammad lost no time in recovering Syria, marching thither himself (June 942) and remaining in the country about six months before coming back to Egypt. It must have been at about this period that he succeeded in dispersing some minor encroachments on Syria from the direction of Raḡḡa that are alluded to without details, those of ʿAdl (al-Badīkam) and Badr al-Kharḡani. He had to meet more serious attacks from the Hamdānids. One of them, al-Ḥusain b. Saʿīd, took Halab from him in 332 (March 944); and in May he set out to recover it. The Caliph al-Muttaḡi, moreover, insecure under the protection of the Hamdānids from Tūḡḡ, the *amīr al-umaraʾ*, had appealed to him for help. His enemy retired at his approach and having regained the town he proceeded to Raḡḡa, where he met the Caliph (Sept. 7, 944). At this time he had thoughts of becoming *amīr al-umaraʾ* himself. He urged al-Muttaḡi to come with him to Syria and Egypt, and even offered to go with him to Baghdad. He begged him not to trust himself to Tūḡḡ, but could not dissuade him. After receiving flattering marks of honour he departed. Before he reached Fustāt on his return the Hamdānīd Saif al-Dawla [q. v.] had retaken Halab (Oct. 944). The Egyptian army sent to meet this new aggression was severely defeated at Rastan near Hims, and Saif al-Dawla advanced to Damascus and entered it (April-May 945). Muhammad b. Tughdj, coming from Egypt with his army, obliged him to retreat, pursued him, brought him to battle at Kinnasrīn (May-June 945), and defeated him. Again Muhammad made easy terms when victorious. Saif al-Dawla retained Syria north of Damascus and was also given a subsidy. The treaty was concluded in Rabiʿ I, 334 (Oct.-Nov. 945), and Muhammad then went back to Damascus, remaining there until he died a few months later (21st Dhū l-Hijja 334 = June 24, 946), just after the arrival of a Byzantine envoy concerning an exchange of prisoners for which he had opened negotiations.

Next to nothing is recorded of the internal events of Egypt during his reign; the country was doubtless quiet. Its revenue, said to have amounted to two million dinārs annually, was no longer accounted for to Baghdad, and no regular payments were made from it to the central treasury. But he sent large occasional gifts to the Caliphs, so that al-Rāḡi considered him an exemplary vassal.

He left seven million dinārs at his death besides considerable other property. No constructional works of much importance are credited to him. At Fustāt he rebuilt the shipyard on the mainland, and on its site on the island of Rawḡa made a garden called al-Mukhtār; he enlarged the government house in which he resided, a Fātimid building that was situated near the still existing tomb of al-Rāḡi Bakḡar, and added a *maṣṣidān*; he also made another garden known later as al-Rāḡi, afterwards the site of the western Fātimid palace of Cairo. His armies at times seem to have been large. At the battle of Abīnḡ the Egyptians are said to have had 15,000 horsemen, at that of Kinnasrīn 50,000 men. Such numbers would have been reached by means of levies for particular emergencies, which he is known to have raised more than once. On one occasion his personal retainers (*ghulāms*), on whom he more especially depended, numbered 500. The constantly repeated and universally accepted figures of 400,000 for his army and 8,000 for his bodyguard can be dismissed as ridiculous, notwithstanding that they rest on the early authority of al-Tanūkhī (d. 584), and with them the accompanying myth as to his habit of concealing his sleeping places when on campaign.

The most renowned of his followers was Kāfīr [q. v.]. Another of his *ghulāms*, Fātik, rose to some eminence. ʿAlī b. Muhammad b. Kāfīr was his secretary both at Damascus and in Egypt. Muhammad b. ʿAlī al-Māḡarī was his wazīr for a few months (328-329), Muhammad b. ʿAlī b. Muḡānil, previously secretary to Ibn Rā'ik, was his wazīr at his death. His four brothers were all younger than himself; al-Ḥusain was in command at the battle of Abīnḡ, and represented him in Egypt during all his absences, al-Ḥusain was in command at Ladijdūn and killed there, ʿUbaid Allāh acted for him in Syria, ʿAlī disappears early.

Notable Egyptian authors who flourished during his reign were the historian Ibn al-Dāya (d. 334), al-Kindī (d. 350), and ʿAbd Allāh al-Farḡānī (d. 362), who came to Egypt in 329 and was in his confidence at Raḡḡa in 333. Al-Masʿūdī moreover visited Egypt in 330. Al-Mutanabbī, just rising to fame, recited once in his presence in Syria and addressed a verse or two to him and to his brother ʿUbaid Allāh (d. 333 at Ramla).

Muhammad b. Tughdj was strong physically, but subject to occasional fits of melancholia. His character is illustrated by a number of incidents that have every appearance of being authentic. He was strict, but in no way vindictive or cruel. He often brought his officers to account, and then after punishing them by arrest or fine would restore them to favour. Hardly any executions are heard of in his reign. He would not allow torture and the maltreatment of accused persons, so common in his time. His tact and sagacity were conspicuous. He was decent in his life and liked by his men and the people. On the other hand, he was certainly oppressive and unfair in some of his money exactions, and though at times not ungenerous was inclined to be mean and miserly in minor matters. The two great faults attributed to him, even to his face in his lifetime, parsimony and timidity, are not altogether without foundation. As to the latter, his own defence in a particular instance looks valid.

His career was closely parallel to that of Ahmad b. Tūḡḡ [q. v.], even as regards several fortuitous

occurrences. It leaves no doubt of his capacity, and if admitting of occasional overcaution, will not allow of anything like cowardice. He did not make the same mark as his predecessor, but was a milder and perhaps a better ruler.

Bibliography: Ibn Sa'id, *al-Muqrib* (ed. Tallqvist, Leyden 1899) contains the text of the principal authorities, a list including subsidiary authorities, and a full biography in German carefully worked out from both sources. By far the most important authority is the long and detailed biography of Muhammad b. Tughdij which forms part of Ibn Sa'id's work, and appears to consist of the life composed by Ibn Zuhayr between 350 and 355, reproduced almost but not quite *verbatim*. The other principal authority is the *Kitāb al-Walā'at* of al-Kindi, ed. Guest, Little, if anything, can be added from books published after *al-Muqrib*.

MUHAMMAD B. YAKUT, ABU BAKR, a chief of police in Baghdad. In 318 (930) Muhammad, whose father was chief chamberlain to the Caliph al-Muqtadir, was appointed chief of police. The maintenance of order in the capital at this time was much neglected and the praetorians conducted a regular reign of terror. In a fracas between infantry and cavalry Muhammad intervened on behalf of the latter; their opponents were cut down, some driven from the city and only a small contingent of negroes, who at once surrendered, remained unscathed (Muharram 318 = Feb. 930). Some months later these mutinied and demanded more pay; but they were driven out of the town by Muhammad and then routed by the chief emir Mu'nis [q. v.] near Wasit. The confusion was increased by the breach between Mu'nis and Muhammad. At the instigation of Mu'nis, Muhammad was dismissed in Djumād II 319 (June—July 931). Mu'nis was nevertheless not satisfied but demanded that his hated rival should be banished. The Caliph at first refused to grant his request; but when Mu'nis threatened him with force, he had to yield, whereupon Muhammad went to Sidjistan (Radjab 319 = July 931). Soon afterwards the Caliph quarrelled with Mu'nis and recalled Muhammad. In Muharram 320 (Jan. 932) the latter returned to Baghdad; the Caliph then sent him with an army to al-Ma'shuk in the region of Takrit. But when Mu'nis advanced from Mosul, the Caliph's troops under Muhammad and Sa'id b. Hamdan retired to Baghdad without striking a blow. After the victory of Mu'nis and the murder of al-Muqtadir in Shawwal of the same year (Oct. 932) the latter's son 'Abd al-Wahid fled with Muhammad and his other supporters to al-Mada'in and then to Wasit where a number of his generals abandoned him. When the forces of the new Caliph al-Kahir approached under the command of Yalbak, 'Abd al-Wahid and Muhammad fled to Tustar. Muhammad was not popular on account of his arrogance and selfishness, so that one after the other laid down his arms and finally 'Abd

al-Wahid surrendered. Muhammad entered into negotiations with Yalbak and the Caliph pardoned him. He then returned to Baghdad where he gained a great influence over al-Kahir. On the accession of al-Radi in Djumād I, 322 (April 934), Muhammad became the real ruler in a short time; the Caliph appointed him chief chamberlain and also made him his commander-in-chief while the vizier Ibn Mukla played a more subordinate part. When al-Muqtadir's cousin Harun b. Ghurth, whom al-Kahir had appointed governor of Mah al-Kufa, al-Dinawar and Misabadhan rebelled, Muhammad was sent with an army against him. In the resulting battle, Muhammad suffered a defeat (Djumād II 322 = May 934); soon afterwards however, Harun fell from his horse and was killed by one of Muhammad's slaves. With the death of their commander the resistance of Harun's followers collapsed; Muhammad was nevertheless unable long to retain his position of power. On the advice of Ibn Mukla who feared his ever increasing power, al-Radi had him arrested along with his brother al-Mu'assar and the secretary Abu Ishak al-Kariri in the 5th Djumād I, 323 (April 12, 935). Muhammad died in prison in the same year.

MUHAMMAD B. YUSUF [See ABU HAYVAN.]

MUHAMMAD 'ABD AL-KARIM 'ALAWI, better known as 'Abd al-Karim Munshi, a Persian historian of the middle of the xixth century. His best known work is the *Tārīkh-i Ahmad* or *Ahmadshāhi* composed for 'Abd al-Rahman b. Haidj Muhammad Rawshan-Khan, a history of the founder of the Durrani dynasty in Afghanistan, Ahmad Shah. After 'Abd al-Karim had finished a history of Shuja' al-Mulk Durrani and the conquest of Khurasan in 1235 (1820), he decided to write a complete history of the Durrani and began his *Tārīkh-i Ahmad*. The work is based on the *Tārīkh-i Husainshāhi* of Imam al-Din Husain (Rieu, *Cat. Pers. MSS. Brit. Mus.*, iii. 904b) and is really only a paraphrase of it. It begins with the story of Ahmad Shah which he continued to the year 1217. Then follows a description of the Panjab and the roads between Kabul, Herat, Paghawar and Kandahar and a chapter on Turkistan under Narbuta Bey. The work concludes with the accession of Shuja' al-Mulk. In addition to this book, 'Abd al-Karim in 1263 (1847) wrote the *Muhtasab-i 'Abul wa-Kandahar*, which describes the war with the English down to General Pollock's expedition (Sept.—Oct. 1842). It again is not original but based on the poem *Akhar-nama* of Kasim Djan. According to Beale, *Oriental Biographical Dictionary* (London 1894, p. 5), he also wrote a history of the Sikh war entitled *Tārīkh-i Panjab Tukhsan-i 'Abd al-Karim*, but there is no mention of a manuscript or lithograph of any such work in any of the European catalogues. It is possible that there is some confusion with the Panjab section of the *Tārīkh-i Ahmad*. In the *Catalogue of the Persian printed Books in the British Museum* (London 1922, p. 19), E. Edwards ascribes to the author a dictionary of English and Persian homonyms

entitled *A Dictionary of Anglo-Persian homogeneous words being a... Collection of... Words having nearly the same Sound and the same Meaning*, Bombay 1889; it is however unfortunately not possible to be certain that the author of the book is the same 'Abd al-Karim Munshi.

MUHAMMAD 'ABDUH, a Muslim theologian, founder of the Egyptian modernist school.

Muhammad 'Abduh belonged to an Egyptian peasant family and was born in 1849 in Lower Egypt. He spent his childhood in the little village of Maḥallat Naṣr in the mudiṛiyya of Buḥaira. When Muhammad 'Abduh had learned the Qur'ān by heart, he was sent in 1862 to the theological school of Tanṭā but he left this after a year and a half discouraged and was only induced to resume his studies through the influence of a grand uncle who aroused in him an interest in mysticism. In 1865 he returned to Tanṭā but the next year proceeded to Cairo to the Azhar mosque. There at this moment the first movements of a new spirit were becoming apparent in the beginning of a return to the classics and an awakening interest in natural science and history, which agreed with mysticism in a lower estimation of the old traditional studies. In this milieu Muhammad 'Abduh at once devoted himself entirely to mysticism, practised asceticism and retired from the world. It was again his grand uncle who persuaded him to give this up. About the same time, 1872, Muhammad 'Abduh came into contact with Saiyid Djamāl al-Dīn al-Afghānī [q.v.] who had just arrived in Egypt and was destined to exercise a profound influence upon him. It was he who revealed traditional learning to Muhammad 'Abduh in a new light, called his attention to European works accessible in translations and attracted his interest finally to Egyptian and Muslim problems of the day. Muhammad 'Abduh soon became his most ardent disciple and in his very first work of a mystic nature (*Risālat al-Warīdāt*, 1290 = 1874) enthusiastically described Saiyid Djamāl al-Dīn as his spiritual guide. The influence of Saiyid Djamāl al-Dīn is still more marked on the matter of Muhammad 'Abduh's second work, notes on dogmatics entitled *Hāshiyā 'alā Sharḥ al-Dawānī li 'Uṣūl al-Aḥdīyā* [1292 = 1876]. The influence of Saiyid Djamāl al-Dīn and the development of affairs in Egypt towards the end of the reign of the Khedive Ismā'īl caused Muhammad 'Abduh in 1876 to take to journalism, which he practised henceforth. After concluding his studies at the Azhar mosque and acquiring the certificate of an

'alim (scholar), he first of all gave private tuition; in 1879 he was appointed as teacher in the Dār al-'Ulūm, which had been founded a few years before to modernise instruction in religious learning. In the same year, shortly after the accession of the Khedive Tawfīq, Muhammad 'Abduh was dismissed for reasons that have not been clearly explained and sent to his native village, while Saiyid Djamāl al-Dīn was banished from Egypt; but a liberal ministry very soon recalled Muhammad 'Abduh (1880) and appointed him chief editor of the official gazette *al-Waḳā'if al-Misriyya*, which not only contained official announcements but also endeavoured to influence public opinion; under Muhammad 'Abduh's control it became the mouth-piece of the liberal party. In spite of a common ultimate goal: the liberation of the Muslim peoples and a renaissance of Islām by its own strength, there was an essential difference between Muhammad 'Abduh's programme and that of Saiyid Djamāl al-Dīn; the latter was a revolutionary who aimed at a complete upheaval; Muhammad 'Abduh, on the other hand, held that only gradual reform could be successful, thought that no political revolution could take the place of a gradual transformation of mentality and regarded a reform of education, especially moral and religious, as the first preliminary to progress. His interest gradually became concentrated on Islām and its position in the modern world. 'Arabī Pāshā's rebellion put an end to Muhammad 'Abduh's activity on these lines. His part in this movement has not yet been sufficiently elucidated; although it is certain that he neither shared the optimism of military circles nor approved their use of force, he put himself on the side of the nationalist opponents of absolutism and endeavoured to exert a moderating influence on its leaders. After the suppression of the rebellion he was condemned to banishment from Egypt at the end of 1882. He first went to Bahrūt and then to Paris where in the beginning of 1884 he met Saiyid Djamāl al-Dīn. The two founded a society called *al-'Urwa al-wuthqā* and published a paper with the same name, which had to cease publication after eight months but exercised a very profound influence on the development of nationalism in the Muslim east. In Tunis Muhammad 'Abduh continued propaganda for the society, but then cut himself off from it and settled in Bahrūt at the beginning of 1885. The '*Urwa* expressed the views of Saiyid Djamāl al-Dīn entirely. In Bahrūt he taught at a theological school and engaged in Muslim and Arabic studies. In this period he produced his translation from the Persian of the *Risālat al-Radd 'alā 'l-Dakrīyā*, the only considerable work of Saiyid Djamāl al-Dīn (1302 = 1886), and two valuable philological treatises (*Sharḥ Nahḍ al-Balaghā* [1302 = 1885] and *Sharḥ Maḥmūd Badī' al-Zamān al-Hamadhānī* [1306 = 1889]). When in 1889 he was allowed to return, he at once went to Cairo. His wish to resume teaching again was not at once granted; instead he entered the judiciary and was immediately appointed a judge on the Tribunaux Indigènes, two years later Conseiller at the Cour d'Appel; in 1899 he attained the highest clerical post in Egypt, that of state mufti, an office he held till his death. One result of his work in the courts was the publication of his verdicts in *Taḥrīr fī Iṭlāḥ al-Maḥkūmāt al-Shar'iyya* (1318 = 1900) which gave the stimulus to important reforms in the admini-

stration of the *shari'a*, and the foundation of the College for *Khādis* goes back primarily to his efforts. In the same year, 1899, he became a member of the Conseil Législatif, which marked the first stage in the representation of the Egyptian people. Finally he was allowed to resume his interest in education; in 1894 he became a member of the governing body of the Azhar, which had been constituted at his suggestion, and in this capacity not only acquired great renown by his reforms in the university but himself took an active part in the teaching. In addition to this many-sided activity in the fifteen years after his return he found time to publish a number of works, including his most important: the *Risālat al-Tawhīd* (1315 = 1897), his principal theological work based on his lectures in Bairūt; the publication of a work on logic (*Sharḥ Kitāb al-Baḥār al-Nāḥiriya, Taḥf al-Kāfi Zain al-Dīn* [1316 = 1898]); a defence of Islam against Christianity in the field of knowledge and civilization entitled *al-Isām wa 'l-Naḥrāniya min 'l-Ilm wa 'l-Madaniya* (1320 = 1902; first published in *al-Manār*). Muhammad 'Abduh was not able to finish his commentary on the Qur'ān, on which he laid great importance and of which he had published portions in *al-Manār*; it was revised by his disciple and friend Shaikh Muhammad Rashīd Riḍā and published first of all in *al-Manār*. Of Muhammad 'Abduh's numerous articles by which, along with his lectures, he most influenced public opinion, two (of 1900) were published in a French translation entitled *L'Europe et l'Islām* by Muhammad Ta'at Harb Bey (1905). The advanced ideas put forward by Muhammad 'Abduh provoked the most vigorous hostility in orthodox and conservative circles which manifested itself not only in serious refutations but also in attacks on and intrigues against him, as we see from a whole literature of lampoons. But his teaching met with remarkable support among all seriously minded Muslims. The principal organ of his views was the monthly *al-Manār*, which had appeared since 1897 under the editorship of Shaikh Muhammad Rashīd Riḍā, who has also produced an extensive literary monument to his master (but his views and the tendencies of his periodical must not be identified offhand with those of Muhammad 'Abduh). Muhammad 'Abduh died in 1905; but his teaching has retained its influence steadily to the present day.

Muhammad 'Abduh's programme according to his own statement was: 1. the reform of the Muslim religion by bringing it back to its original condition, 2. the renovation of the Arabic language, 3. the recognition of the rights of the people in relation to the government. His political activity was dominated by the idea of patriotism, which he was the first to champion enthusiastically in Egypt. As an opponent equally of the political control by Europe and of Oriental despotism in Muslim lands he favoured an inner assimilation of western civilization, without abandoning the fundamental Muslim ideas and a synthesis of the two factors. From this programme, which assures Muhammad 'Abduh an important place among the founders of modern Egypt, must be distinguished his effort to carry it through in the field of theology. Muhammad 'Abduh is in the first place a theologian; his life was devoted to the attempt to establish and maintain Islam, at least as a religion, against the onslaught of the

west, while he abandoned without a struggle those aspects of Muslim-Oriental life in which religion was of less moment. However great a stimulus he may have received from progressive western thought, the actual foundations of his teaching came primarily from the school of Ibn Taymiyya and Ibn Kaḥīm al-Djāwziyya, who favoured reform on conservative lines, and from al-Ghazālī's ethical conception of religion. Deeply convinced of the superiority of true Islam, unaffected by the vicissitudes of time, Muhammad 'Abduh wished to get rid of the abuses which falsified the Muslim religion and made it out of keeping with the times, and to adapt Islam to every real advance by going back to its true principles. Muhammad 'Abduh was thus brought to attack the *maḥabbah* and *taḥfīd* (q. v.), to demand freedom for *ijtihād* (q. v.) and a new *ijmā'* (q. v.), in keeping with modern conditions, based on the Qur'ān and the true sunna, for the establishment of which he laid down strict criteria; he was also brought to reject the hairsplitting of the *fuḥūḥ*, the worship of saints and all *bid'as*, and to the endeavour to create a more ethical and deeper religion instead of a mechanical formalism. The antiquated system of Fiqh, against which Muhammad 'Abduh claimed full freedom, was to be replaced by new laws capable of development, in which consideration for the common good (*maṣlaḥa*) and the times should, in keeping with the true spirit of Islam, have if necessary preference to the literal text (*nawz*) of revelation, just as in any conflict between reason and tradition in settling what is laid down by religion, the verdict of reason should be followed. Alongside of the belief in the sublimity of revelation there was in Muhammad 'Abduh the conviction that knowledge and religion, properly understood, could not come into conflict at all, so that reason need not recognise a logical impossibility as a religious truth; religion was given to man as a thread to guide him against the aberrations of reason; reason must therefore, after it has tested the proofs of the truth of religion, which it is qualified to do, accept its dogmas; Muhammad 'Abduh's object was a cooperation between religion and science. In dogmatics he adopts essentially the most rational conception that could still be reconciled with orthodoxy. At the same time he interiorises the conception of revelation (to him it is intuitive knowledge caused by God and provided with the consciousness of this origin, but this kind of religious experience is limited to the prophets) and defects that of religion (to him it is an intuitive feeling for the paths to happiness in this and the next world, which cannot be clearly grasped by the reason). The task of prophecy for him is the moral education of the masses. Religious teaching and commandments are therefore intended for the masses and not for the élite. Muhammad 'Abduh regards the Qur'ān as created and endeavours to weaken the rigidly opposed point of view of orthodoxy. The saints he does take into his system but is sceptical regarding belief in miracles. In spite of the denial of causality and laws of nature by orthodoxy, he finds a basis for explaining nature by causal laws but by quite scholastically formal reasoning. As regards the duties of religion, Muhammad 'Abduh adheres to the four main duties: ritual prayer, the alms-tax, fasting and pilgrimage; only he shifts them, as usual in mysticism, from the sphere of worship to that of religion and morals. On the old question of free will Muhammad 'Abduh

decides for indeterminism; he thereby opens the way to build up a moral system for society, which, excluding all fatalism, preaches vigorous activity by every one and, following the ethics of the mystics, mutual support. His view of the substance of Muslim teaching Muhammad 'Abduh defends not only against traditional orthodoxy but against Christianity also by a kind of philosophy of history of religion; the sending of prophets was a gradual process of education of step by step; the last and highest stage, that of absolute religion, is the sending of Muhammad; if the Muslim peoples of the present do not correspond to the Muslim ideal, this is only the result of the fact that they have lost the old purity of the teaching; an improvement is possible by return to it. This primitive Islam of Muhammad 'Abduh is however not the historical Islam but a very much idealised one. The superiority of Islam over Christianity in substance lies, according to Muhammad 'Abduh, in its rationalism and its closeness to reality and its avoidance of unattainable ideals of life.

In this theology, the religious content consists of humility before God, reverence for the Prophet, enthusiasm for the Qur'ān. The basis of this Islam is the recognition of a not too retrogressive system of dogmatics, its object is the observance of an ethical system which is favourable to progress, and both are influenced by a strongly marked rationalism, which is genuinely old Muslim but for Muhammad 'Abduh is no indifferent inheritance but the main weapon of defence of Islam and actually takes the place of a deepening of religion so that his theology has the character of an apologetic compromise.

(J. SCHACHT)

MUHAMMAD AHMAD b. 'ABD ALLĀH,

the Mahdi of the Sūdān, was born about 1258 (1843) on the island of Darār in Dongola among the Argū islands north of el-Orde. A member of the Kunūf family of the Nubian Arab Berābers, in later life when Mahdi to prove his kinship and mystical relationship with 'Alī and the Prophet, he traced his genealogy on his father's side to Hasan and on the mother's to Hasan and 'Abbās. He was the second son of a ship's carpenter and had an older sister and three brothers. Mystic tendencies early revealed themselves in him; after the usual early education he therefore in 1277 (1861) entered the order of the Sammāliya with Shaikh Muhammad Sharif; after a seven years' noviciate Muhammad Sharif appointed him a shaikh of the order. After a short stay in Kharṭūm where he married, he went to the island of Abba (in the White Nile, north of Kosti), built a *ḡāmi* there and a *ḡāḥa* and collected pupils around him.

His master Muhammad Sharif, with whom he maintained a constant connection, settled near him in 1288 (1872), which seems to have been unwelcome to Muhammad. Shortly after this event there awoke in Muhammad the consciousness that he was the Mahdi *al-muntazar*, under the influence of the traditional ideas of the Mahdi, which brought about a breach between him and his master. He now joined the enemy of his former leader, the Shaikh al-Kurāshī, and in 1297 (1880) became his successor. In his wanderings (*ṣiyāḥa*) from Dongola to Senār, from the Blue Nile to Kordufān, he convinced himself of the discontent of the people, who were oppressed by the Egyptian government; the turbulent, mixed population of the Sūdān, the religious fanaticism, the dissension between Turks and Arabs, the old opposition of the Shi'a to the Turkish ruling official classes, all formed a fruitful soil for his claims to be the Mahdi; the movement begun by Muhammad Ahmad which, as his letters and proclamations show, was based on a religious experience in which he earnestly believed, became from the first mixed up with political and social ideas, which in the east cannot be separated from religion, and in which finally deception and cunning played an evil part. According to the traditional formula, Muhammad Ahmad felt himself called "to purify the world from wantonness and corruption". For this purpose he summoned the people to fight in the first place against "the infidel Turks". He had previously bound a number of chiefs in Kordufān and Dārṣūr to him by *ḥa'a* (oaths of fealty, after the model of the Prophet; for the text see Dietrich, in *Islam*, 1925, p. 39) and had been cleverly able to attach men of action like the unscrupulous 'Abd Allāh al-Fa'ayishī, later his Khalifa, to him; at the same time he practised a shameless nepotism. He further incited the people by numerous pamphlets and edicts, which contained his visions of the Prophet, who had appointed him Mahdi, of al-Khidr, Gabriel, the *ṣafā*, summons "to purify religion", to "emigrate", to swear fealty, to imitate the Mahdi, to the *ḡhād* etc. The hill of Gadir in Dār Nūba became the centre of this secret propaganda; in Sha'ban 1298 (July 1881) he made his first public appearance as Mahdi. Negotiations begun by the government in Kharṭūm with Muhammad Ahmad proved fruitless. Two companies sent against him under Abū 'I-Sa'ūd were destroyed; this secured further victories for him. The Egyptian government was moreover prevented by the rebellion of 'Arabī Pāshā from taking vigorous action. The expeditions of the governor of Fashūda, Rashīd Pāshā, Yūsuf Pāshā al-Shallāhī (at Gadir, May 1882) and of Hicks Pāshā (at Shaikhān or Kaahgūl), all ended unsuccessfully. The Mahdiya thus spread unhindered from Kordufān via Baḥr al-Jihāl to the eastern Sūdān; there in Sawākin, 'Oḥmān Digna, a former slave dealer, soon to be the ablest Mahdist general, entered Muhammad Ahmad's service. Attempts by the Mahdi to extend his power to the west and with this object to conclude alliances with Muhammad al-Sa'ūdī in Djaḡhūb and with Morocco came to nothing. At the height of his power the campaign of 1301 (1884) took him to Kharṭūm, which after a heroic defence by Gordon fell into the Mahdi's hands on Jan. 30, 1885. Gordon was killed, Muhammad Ahmad did not however long survive his victory; he died, probably of typhus, on 9th Ramaḡān 1302 (June 22, 1885) at Omdurman near Kharṭūm.

where a *ḥabsha* was erected to him by his successor, the Khalifa 'Abd Allāh; it was henceforth the Mahdist capital until Kitchener put an end to 'Abd Allāh's rule and to the Mahdiyya in 1898.

The organisation of the Mahdiyya under Muhammad Ahmad, which was primarily to follow the *sunna* of the Prophet, was early developed; it was quite military in character, for the *ḡibūd* was considered more important than the *ḥajj*. He had four khalfas beside him, of whom al-Ṭā'ayishī was the most intimate and undoubtedly had the most pernicious influence on him. Particular attention was devoted to the distribution of booty and to the administration of the treasury (*ḥait al-māl*).

Muhammad Ahmad's teaching shows some of the features of the extreme popular Sūfism and some of those of an idealised primitive Islam. His asceticism was hostile to progress; the contempt for learning in the Mahdiyya and the order to burn all books on *sunna* and *tafsir* alienated the educated classes from him. The only things that had validity in addition to the Qur'ān were the proclamations of the Mahdi, the *Rūtib* (a collection of *ḡibir* exercises) and the *Madfīl*, a work that contained Muhammad Ahmad's own *sunna* as a substitute for the previous one but remained incomplete. In the abolition of the four *madhāhib* we see the *ijtihād* tendencies frequent among the Sūfis. Wahhābī influences are very probable in a number of regulations, for example in the prohibition of adornment, music, extravagance at weddings, tobacco and wine; particularly however in the zeal against the worship of saints and sorcery; as a matter of fact Muhammad Ahmad himself became an object of worship among his followers even before his death.

The only really new thing in Muhammad Ahmad is the addition to the *ḡibāda*: "...*wa-anna Muhammad Ahmad 'bn 'Abd 'Ilāhī ḥunna Mahdiyya 'Ilāhī wa-ḡhāḡīfatū rayḡīkī*. Where the traditions of the Mahdi did not suit him, he did not hesitate to alter them. He laid down the following 6 *arḡān* instead of the *arḡān* of the *sunna*: 1. *ḡalāt*, on the congregational performance of which the greatest stress was laid; 2. *ḡibāda*, in express opposition to the *sunna* practice and in place of the *ḥajj*; 3. obedience to God's commandments; 4. the extended *ḡibāda*; 5. recitation of the Qur'ān and 6. of the *Rūtib*.

A few extremist ideas, like that of equality between rich and poor, come partly from the revolutionary character of the old *Shī'a*, partly from the political and social conditions of the time; the social ideas were however not his central ones but only incidentally used cunningly to attract the masses. In practice the Mahdiyya had an exceedingly unifying and equalising effect: slaves and slave-dealers fought under one banner, the humblest often rose in a short time to the highest offices.

Muhammad Ahmad's eschatology centres round the world domination of the Mahdi. The conquest of the Sūdān was to be followed by that of Egypt, Mecca, Syria and Constantinople.

The formation of legends around Muhammad Ahmad's personality began very early, sometimes deliberately encouraged by him and his immediate followers and sometimes actually believed by them. Under pressure from him his court chronicler Ismā'īl 'Abd al-Qādir composed a highly coloured *ḡira* entitled *Kitāb al-Mustahdī ilā Sirat al-Imām*

al-Mahdī. It covered the years 1298 to 1302 A.H. but was burned in the time of the Khalifa 'Abd Allāh. The Egyptian writer Shukair (see below) claims to have had in his hands a copy that was said to have survived.

MUHAMMAD 'ALĪ PASHA (in European sources often Mehemed Ali or Mehmet Ali) was the well-known powerful viceroy of Egypt during the years 1805-1849 (which period comprises the entire reign of Sulṭān Mahmūd II q. v.); and the founder of the khedivial, later royal dynasty of Egypt. Seen in the light of history his life-work fully entitles him to the epithet of "the Founder of Modern Egypt".

Muhammad 'Alī was born in 1769, possibly of Albanian extraction, in the town of Kavala [q. v.] in Macedonia; he was engaged in the tobacco trade until he joined, as *ḡāḡ ḡāḡī* in a corps of Albanian troops, the Turkish army that landed in Egypt in 1799 and was beaten by Bonaparte at Abū Kīr (July 25). In 1800 he was one of the two chiefs of the Albanian troops in Turkish service who were left behind in Egypt; this secured him an influential military position when, after the final departure of the French in 1801, Turkey began to try to recover her authority over Egypt. At the end of 1801 he fought as a general against the Mamlūks, but in the troubled years that followed he was alternatively on the side of the Mamlūk Beys (headed by al-Bardī) and of the Turkish governors sent from Constantinople. He intrigued against Khurshīd Pasha [q. v.], who had to leave Egypt in May 1803, and was, already in the same year, appointed titular governor of Djidda. Under the following governorship of Khurshīd Pasha, Muhammad 'Alī succeeded in winning the favour of the inhabitants of Cairo and their spiritual leaders, and used them with success in his intrigues against Khurshīd, whose Turkish troops — composed of *ḡellīs* — were a scourge to the population, while his own Albanians were ordered to behave well. The result was that Khurshīd had to withdraw in August 1803, leaving the citadel of Cairo to Muhammad 'Alī. The Turkish government, though sending several emissaries and trying to remove the Albanian troops, failed to keep Egyptian affairs under control and ended by recognizing Muhammad 'Alī's self-assumed

position (November 2, 1805); he was solemnly installed in April 1806.

The internal and external difficulties of the Sublime Porte did not allow her to interfere any further for the moment and the new governor had soon occasion to show himself a loyal vassal when the English — then at war with Turkey (cf. SELİM III) — landed in Alexandria in March 1807. At that time Muhammad 'Ali had already undertaken the struggle against the Mamlūk Beys al-Bardisi and al-Alfi, the latter of whom was strongly supported by the English. He came back hastily from Upper Egypt, fortified Cairo, and gained a victory over the English army at Rashid (Rosetta) in April. Soon after the departure of the British fleet in September the viceroy began the execution of his far-reaching administrative and economic measures, which were to restore Egypt's economic strength and consequently to assure for himself a more powerful position than any Turkish governor had had for the last two centuries (cf. MAMLŪKS). In the meantime the Beys (whose two leaders had died in 1807) continued their opposition (no doubt increased by the viceroy's land policy), which was finally broken by the massacre of about 300 Mamlūks in the citadel of Cairo on March 1, 1811, on the occasion of a festival. The persecution of the Mamlūks was at the same time extended to the other parts of the country. Muhammad 'Ali now could send, without danger to his own position, his Albanian troops in the campaign against the Wahhābīs in Arabia, to comply with a request of the Porte. The Wahhābī war began in September 1811 and was conducted, until 1816, by Muhammad 'Ali's son Tusun; after the latter's death the command was taken over by his elder brother Ibrāhīm Pasha [q.v.]. Muhammad 'Ali himself took part in an expedition to Yaman, but had to return before the end of the war, because his position as governor seemed to be in danger.

The military successes of the Egyptian troops against the Wahhābī power immensely increased Muhammad 'Ali's authority all over Arabia and in a larger sense in the entire Near East; European policy began to look for the first time on Egypt as a factor of political importance. This importance was further increased by the expeditions to the south that followed immediately on the Arabian campaign: Egyptian power was established for the first time in the Sūdān [q.v.], where Muhammad 'Ali's third son Isma'īl found his death in 1822, the year in which the town of Khartūm [q.v.] was founded. At this time Egyptian power was also extended in the direction of the Red Sea, which made an end to the hitherto continuous plague of the incursions of nomadic Arabs into the Nile valley; the ports of Sawāḥīn and Massawa (Mas̄wa) came under the Egyptian sphere of influence, although the direct authority of the Porte was maintained.

A new phase in the development of Muhammad 'Ali's power began by his participation in the military repression of the Greek revolt by the Turks. Only through Egyptian aid was the submission of the whole of Greece with the exception of Nauplia obtained; first by the conquest of Crete by Ibrāhīm Pasha (1823) and then by the Egyptian army that landed in 1825 in Messina. When in 1827 England, Russia and France intervened in the Greek question, the combined Turkish-Egyptian fleet was destroyed

in the bay of Navarino (October 20, 1827); in the following year the Egyptian troops evacuated the peninsula, after a convention had been concluded between Muhammad 'Ali and the British admiral Codrington (August 6, 1828). Crete remained under Egyptian administration until 1841.

Muhammad 'Ali's power was now such that he could conclude international agreements without the sultān's cognizance; at the same time the two Mediterranean naval powers, France and England, were endeavouring to win him over as an independent political factor. In 1829 France had almost induced Muhammad 'Ali to undertake the conquest of the Barbary states of Algiers and Tunis; the viceroy, however, was more inclined to seek territorial expansion in the east, the more so as the four governorships of Syria had been promised him by the Porte as reward for his participation in the Greek war, a promise that had never been fulfilled. At the end of 1831 there arose difficulties between Muhammad 'Ali and the Porte on account of the governorship of Akkā, which he claimed for himself. The conflict soon brought about the sending of an Egyptian army under Ibrāhīm Pasha into Syria. On May 27, 1832 Akkā was taken. In the following month the army that was sent by the sultān was repeatedly defeated and finally beaten near Konya (December 21, 1832). The Egyptian army, continuing in the direction of Constantinople, reached Kutahia. Here at last an armistice was concluded between the Porte and Ibrāhīm as representative of his father, thanks again to the intervention of the European powers, of whom Russia had already sent military aid to Constantinople. Muhammad 'Ali was granted the governorship of Syria and Adana by the definite peace of April 6, 1833.

During the following six years the viceroy's power was at its height. While Ibrāhīm administered Syria, severely but on the whole to the prosperity of the country, Muhammad 'Ali continued his administrative programme in Egypt and inaugurated a pan-Arabian policy, the aim of which was to be the union of all Arabic-speaking peoples under his leadership. In Arabia his influence was still considerable since the Wahhābī war; he now tried to extend Egyptian influence as far as the Irāk. This policy, while at the same time constituting a threat to the ambitions of the European powers in the Near East, was to bring him again into conflict with the sultān, who, having succeeded at last in subduing too independent vassals in other parts of his empire, was waiting for an opportunity to crush his most powerful vassal in Egypt. The latter, in 1838, had even made known his intention of declaring himself independent of the Turkish government.

Not long after the outbreak of hostilities the Turkish army under Hāfīz Pasha was completely defeated at Nāṣīb in North Syria (June 24, 1839), while the Turkish fleet under the Kapudan Pasha Ahmad sailed to Alexandria and went over to Muhammad 'Ali's side. In this desperate situation the authority of the Porte was saved by the intervention of the five European powers, in defence of the integrity of the Ottoman Empire. The Egyptian question had thus produced an international political crisis, which was aggravated by the opposition of France, which had long been the best intentioned towards Muhammad 'Ali among the European governments. By the convention of

London (July 5, 1840) England, Russia, Austria and Prussia agreed with the Porte upon the terms to be imposed upon Muhammad 'Ali. When the latter did not accept, there followed military demonstrations against the coastal towns in Syria ('Akka taken on November 4, 1840). Soon afterwards a British fleet appeared in Alexandria, where Admiral Napier on November 27 concluded an agreement with Muhammad 'Ali. The viceroy consented to the return of the Turkish fleet and renounced his governorship of Syria, Adana and Crete, while on the other hand he was to keep the hereditary governorship of Egypt as a part of the Turkish Empire. These terms were confirmed by an imperial *firmân* of February 13, 1841, completed by another of May 23, in which the mutual relations of sultan and viceroy were definitely regulated. The chief points were the right of succession according to seniority in Muhammad 'Ali's family, the payment of a tribute and the permission to maintain an Egyptian army of 18,000 men, the higher officers of which were to be appointed by the sultan.

Muhammad 'Ali's last years were passed in peace. In 1846 he visited Constantinople and Kawaia; in 1848 he lost his son Ibrahim to whom so many of his military successes were due. On August 2, 1849 he himself died in Alexandria, to be succeeded by Tusun's son 'Abbas Pasha [q. v.]. He was buried in the new mosque which he had had erected in the citadel of Cairo.

Still more amazing than the career of this once obscure Turkish officer are the enormous changes brought about by his work in the condition and the international position of Egypt; they have made him a hero in the history of the Near East. His reign is an era by itself in Egyptian history. Muhammad 'Ali's latest biographer says: "He began by seeking only to raise money. He ended by seeking, however mistakenly, to develop and civilise the country" (Dodwell, p. 220). His work indeed did not at all mean a break with the government traditions prevailing in the Turkish Empire, but the political aim that Muhammad 'Ali had set himself, seconded by his persevering energy and the continuous supervision of his autocratic individuality, led at last to a result which, in similar conditions, would otherwise have been difficult to attain, as is shown by the state of things prevailing at the same time in other provinces of the Ottoman Empire.

As the measures taken by Muhammad 'Ali in the field of administration, land policy and the industrial and commercial mobilisation of the country have been briefly sketched in the art. KHELOU, it is unnecessary to enter here into the same details. It is sufficient to point to the fact that all these measures had as their first object to make the pasha himself the sole proprietor and administrator of the riches of Egypt. He certainly listened to the advice of European and other councillors and valued European institutions as examples to follow to a certain extent. But he followed oriental methods and made as good as no use of Europeans as officials in the home administration.

This was not the case in Muhammad 'Ali's newly created army. The pasha himself had not been entirely able to keep his mercenary troops under control (matiny in Cairo in 1816). So he decided to form a new army, moved by the

same motives that had led Sultan Selim III to create new regular troops (*nişân-i djedid*). From 1819 this enterprise was confined to and brought to a successful end by the French captain Sève, who, after having embraced Islam, served Muhammad 'Ali as Salâmân Pasha. A first attempt to use negro slaves from the Sudan as soldiers having failed, the *fallâks* of Egypt itself were recruited; the officers were mainly taken from among the young Mamlûks, besides whom there were not a few Europeans. With this army were won the military successes in Morea and Syria. The recruitment met with exceedingly strong opposition among the people of Egypt and later in Syria, and the methods used to get the required number were sometimes cruel, but the pasha's energy prevailed. At length this military organisation proved to be a means of education for the people and prepared the growth of national feeling among the generations to come. As has been said already, the final Imperial *firmân* of 1841 limited the Egyptian army to 18,000 men in time of peace.

Muhammad 'Ali's attempts to create an Egyptian fleet go back as far as 1815. At first he had ships built in France and Italy and in Bombay, but soon Alexandria itself got its yards. After the destruction of the Egyptian fleet at Navarino ship-building began again and quite a number of French and Italian officers were employed in the Egyptian navy after 1831. The Egyptian fleet, however, did not long survive its founder.

On the whole, Muhammad 'Ali's rule wore a Turkish character. Most of the responsible posts in the administration and in the army were held by Turks and by descendants of the Mamlûks. Thus the Ottoman ruling system, with some modifications applied after the European model, was imposed on Egypt most completely at the time when the country itself was politically loosened from the empire. It may be called an exception that the Armenian Boghos Bey, who was for a long time Muhammad 'Ali's minister of finance and of foreign affairs, came to this exalted position, although the use of Christians (Armenians and Copts) in more subordinate offices had always been a government practice in Turkey as well as in Egypt. The viceroy himself is said never to have spoken well any language other than Turkish.

Muhammad 'Ali was not a great builder of magnificent architectural monuments. He erected a mosque after the Turkish fashion in the citadel of Cairo, but he never built costly palaces for himself. Most of his works were of public utility, such as the improvement and the enlargement of the irrigation system in the Delta, including the Nile Barrage below Cairo. This last work was undertaken in 1847, but failed.

The judgments on Muhammad 'Ali's personality were very divergent even during his life-time. Most of his admirers were found amongst the French; in view of the on the whole friendly attitude of the French government this is of course not strange. British opinion was less favourable, but all those who came into contact with the viceroy were impressed by his personal charm. Now that his era belongs to the past, the impression remains of a great man in many respects, possessed of considerable personal courage and trustworthy and loyal in a high degree. His methods were sometimes cruel and in the begin-

ning of his career he often had recourse to intrigues, but in the circumstances it is hard to understand how it could have been otherwise. As years passed by and the prosperity of the country increased, his methods of government grew more lenient, so that, at the end of his reign, he had become decidedly popular with his subjects. An equestrian statue of Muhammad 'Alī now commands the chief square of Alexandria and one of the largest thoroughfares in Cairo is called after him.

MUHAMMAD 'ALĪ B. MUẒAFFAR AL-DĪN.
[See KADJAK.]

MUHAMMAD BAI RAM (MUHAMMAD B. MUṢṬAFĀ B. MUHAMMAD B. MUHAMMAD B. MUHAMMAD B. HUSAYN B. AHMAD B. MUHAMMAD B. HUSAYN B. BAI RAM), a Tunisian patriot and man of letters, born in Tunis in Muharram 1256 (March 5—April 3, 1840) and died on Wednesday, 25th Rabi' II, 1307 (Dec. 18, 1889) in Egypt, at Hulwān, and was buried in Cairo near the tomb of the Imām al-Shāhī.

Belonging to the family of the Bairams whose

ancestor Bairam, at the head of a body of soldiers, took part in the capture of Tunis by Sinān Pāshā on 25th Djumādā 981 (Sept. 24, 1573) and of which several members had held the office of grand mufti of Tunis, Muhammad Bairam studied at the Djamī' al-Zaitūna and had as teachers al-Fahīr b. 'Ashūr, al-Shādhilī b. Sālih, Ahmad Bairam, Mustafā Bairam, the Shaikh al-Islām Muhammad b. Mu'āwīya and others. At the age of 17, he compiled a *kunūẓ* in which he recorded the ordinances, decrees and administrative regulations which the emir Muhammad Pāshā ordered the authorities to enforce.

On the death of his paternal uncle Bairam IV, he was given charge of the Madrasat al-'Unūkiya on 9th Djumādā I, 1278 (Nov. 10, 1861) and on the 9th of the following month (Dec. 13) of that of the Djamī' al-Zaitūna. Soon after this, troubles provoked by the despotic régime began to disturb Tunisia and resulted in the closing of the representative assemblies in which Bairam was interested. He published in the *Al-'Id*, the official gazette, the two first political articles that ever appeared in Tunisia and in them he condemned the tyranny of the authorities, preached the love of liberty and begged the government to be liberal and to grant its subjects representative assemblies.

On Šafar 17, 1291 (April 6, 1874) he was appointed to administer the *awāḍf*, which he hastened to reorganise. The hard work ruined his health and forced him to take a journey in Europe to recuperate; this caused him to begin his *Safwa al-'Iṭihār*. He left in Shawwāl 1292 (Oct. 31—Nov. 28, 1875) and visited Paris. In the same year the Sādiqī College was founded; Bairam shared in the preparation of the regulation and programme of studies, modelled on those of European institutions, and was one of the first to enrol his son so as to encourage his compatriots to take advantage of such innovations.

On 1st Djumādā II, 1292 (May 7, 1875) he was put in charge of the government printing works which he at once reorganised, and securing eminent assistants like Maḥammad al-Sanūsī of Tunis and Ḥamza Fath Allāh of Cairo he produced the *Al-'Id* regularly. It was at this time also that he reorganised the Maktabat al-Sādiqiya alongside of the Djamī' al-Zaitūna.

In 1293 (1876) he assisted Turkey in the war with Serbia and Montenegro by sending money, horses and camels, political considerations preventing the despatch of help in men.

In the summer of 1295 (1878) he went a second time to Paris, visited the Exhibition and was received with great consideration by President MacMahon. He took the opportunity to visit London and England and, on his way back, Algiers. He took a very prominent part in the reorganisation or rather the creation of the Sādiqī Hospital which was opened on Šafar 18, 1296 (Feb. 1879). At the same time he was one of the two arbitrators appointed by the Tunisian government in the case of Henghir Saiyidi Thābit and the French government. In the middle of the same year, he was appointed by the vizier to go to Paris, to receive medical attention, it was said, but in reality to ask Gambetta to remove the French consul, who was interfering in the domestic affairs of the country and even managing them. The consul thwarted the plans of Bairam and the vizier. On his return he told the vizier that France intended to annex Tunisia. Tired of the vexatious pestering

of the vizier Mustafā b. Ismā'il he obtained, after many attempts, permission to make the pilgrimage to Mecca and left Tunis, never to return, on Shawwāl 16, 1296 (Oct. 4, 1879). He went via Malta, Alexandria and Cairo, where he was received by the Khedive Tewfik Pāshā, and thence to the Hijāz, visiting Mecca and Medina. He then went via Yambu' and the Suez Canal to Bairūt, where he was much honoured by the people and by Midhat Pāshā, the governor of Syria, and on to Constantinople. He wrote a *ḥafida* in honour of Sulṭān 'Abd al-Ḥamid. The Tunisian government at the instigation of the French consul, who feared the establishment of closer relations between Turkey and Tunisia, demanded his return but the Sublime Porte diplomatically did not receive the request.

It was in Constantinople that he began to prepare the *Safwa* for publication and finished the first two volumes. The penetration of France into Tunisia was a rude shock to Bairam, who in collaboration with the former vizier of Tunisia, Khair al-Din, was appointed by the Sublime Porte to prepare a report on the situation created by France. Despairing of returning to his native town he went to Leghorn and was joined by his family; he then went to Geneva, where he left his son to finish his education, and to Vienna and Bucharest and then settled in Constantinople. The Sulṭān, wishing to send some horses as a present to the Emperor Frederick III of Germany, Bairam was appointed to write the letter conveying the gift. During the eighteen months which he spent in the Turkish capital, Bairam drew a pension of £T 25 per month. It was during this stay that he prepared the third volume of the *Safwa*.

His health being undermined by an illness which grew worse daily and being unable to meet his expenses and fearing the machinations of his detractors, who saw in him a man to be removed, he left Constantinople on 1st Muḥarram 1302 (Oct. 21, 1884) to go to Egypt, where his letters of recommendation secured him the esteem of the Khedive Tewfik Pāshā, who gave him a pension.

On the 25th Rabi' of the same year (Jan. 13, 1883) he produced *al-'Iṭihār*, a political and scientific journal.

Two years later, he went to London to attend the jubilee celebrations of Queen Victoria, had medical attention in Paris and returned to Egypt via Berlin and Vienna. He then completed a work which he had begun in Constantinople entitled *Tafḥīd al-Sinān li-'I-Radd 'alā 'I-Ḥaṭṭh Rinnān* (Renan), in which he refuted the arguments which Renan had advanced at a conference in the Sorbonne on March 29, 1883 on *Islamisme et la Science* (Paris 1883), in which he alleged that religion was an obstacle to the diffusion of science among Muslims. He also published a *Riḥla* in which he declared that it was permitted to purchase bonds or shares in a Muslim government loan so that Muslim money should not leave the country, and that this had no character of usury. He wrote a report on the compulsory use of the Arabic language in the teaching even of modern sciences. He finished the fourth volume of the *Safwa* and had begun the fifth which death prevented him from finishing.

On 12th Djumādā I, 1306 (Jan. 14, 1889) Bairam was appointed a judge in the Tribunal de 1^{re} Instance in Cairo. Going to Hulwān for a change of air, he took pleurisy and died after 25 days' illness.

He had a vast knowledge of Hadith, law, history, ancient and modern, and historical and political geography.

In addition to the works already mentioned and numerous *riḍālas* which it would take too long to enumerate, we may mention the following: 1. *Tuḥfat al-Khawāṣṣ fī Ḥill Sa'id Būdūḥ al-Raḥḥ*, printed at Cairo in 1303 in which he claims that the law regards as permitted the flesh of game killed with fire-arms; 2. a treatise on prosody; 3. a *riḍāla* in which he says that it is permissible for men to let their hair hang down and float in the air, contrary to the opinion of several *faḥḥās*; 4. *al-Taḥḥiq fī Ma'ālat al-Raḥḥ*, a study in which he shows what slavery among Muslims is according to the law, points out the motives of slavery and the rules regulating it, and concludes by saying that slaves who are sold at the present day are free men and that Muslim governments which forbid the sale of slaves are acting in accordance with the law; 5. *Safwat al-Fihār li-Mustawḍa' al-Amūr*, published in 6 vols. in Cairo in 1302—1303, 1303, 1304, 1311, the sixth volume being devoted to the biography of Muhammad Bakram and edited by his son of the same name; it is perhaps the best treatise yet written in Arabic on political geography.

Bibliography: The biography written by his son and published at the end of the *Safwat*; E. Van Dyck, *Itḥaf al-Kawāṣ*, Cairo 1896, p. 414; G. Zaidān, *Tarīkh Adab al-Lughat al-Arabiya*, Cairo 1911—1914, iv. 289.

(M. H. HAYET HOSAIN)

MUHAMMAD BAKĀ', son of Shaikh Ghulām Muhammad, born in 1037 (1627), was first taught by his father and then by Shaikh 'Abd Allah, called Miyān Ḥafḥat, and Shaikh Nūr al-Ḥaḥḥ b. 'Abd al-Ḥaḥḥ Dihlawī. After a few years he himself began teaching in his native country. He first became a *murīd* or disciple of his father, and after the latter's death attached himself to the famous saint, Muhammad Ma'sūm Sarhindī. He was persuaded by Iṣḥāq Khān, Mir Khānsmān, to come to the court of Awrangzeb and accepted the duties of *Bakhsh* (pay master) and *Wakī'ah-nigār* (writer of the official diary), but by special favour he enjoyed much leisure, which he devoted to literary work. He died in 1094 (1683) at Sahāraupūr. He is the author of 1. *Mir'at al-Faḥḥān Numū* (a general history compiled under Awrangzeb), 2. *Riyāḥ al-Awḥāḥ* (life of saints), 3. *Tadhkirat al-Shu'arā'* (biographies of the poets).

MUHAMMAD BAKHTIYĀR KHALDĪ was an inhabitant of Ghūr [q. v.]. He was of a very mean appearance and amongst other deformities of his person it is said that when he stood upright the end of his fingers extended considerably below his knees. When he reached the age of manhood he went to Ghazna [q. v.] and offered himself as a volunteer to the officers of Muhammad Ghōrī, but they refused to enrol him. He, therefore, repaired to Dihli and was appointed by Khat al-Din Albeg [q. v.] to command an army destined for the conquest of Bihar about 396 (1199). Here he was very successful. He was next ordered to invade Bengal. In 600—601 (1203—1204) he proceeded

to Nadyā, the capital of Bengal, and captured it without any bloodshed. His last attempt was directed towards the invasion of Bhūtan and Tibet, but he met with reverses which compelled him to retreat. He succeeded in reaching Derikōr in Bengal where he died, but his body was carried to Bilār and buried there in 602 (1206).

(M. H. HAYET HOSAIN)

MUHAMMAD BEY ABŪ DHĀHAB. [See 'ALĪ BEY.]

MUHAMMAD BEY 'OTHMĀN AL-DJALĀL was born in Egypt in 1829, the son of a judge in the Court of Appeal, named Yūsuf al-Ḥasan. When a boy he learned English, French and Turkish at the school of languages (*Madrasat al-Asiyya*) and when only 16 was given an appointment in the government translation bureau. His patron, the engineer Clot Bey, had him appointed to the Conseil de Médecine. In 1863 he entered the War Ministry and five years later the Ministry of the Interior. In 1879 the Khedive Tewfīk Pasha appointed him to his civil cabinet and several times took him to accompany him on journeys. After the death of the Khedive he was appointed a judge in Cairo. In 1895 he was pensioned and he devoted himself to literary work till his death at the end of 1898.

In collaboration with Clot Bey, he published a sketch of the history of Muhammad 'Alī and an elementary grammar of the Arabic and French languages and also a description in rhyme of his journey with the Khedive Tewfīk. He then devoted himself to the translation of poetry: first of the fables of La Fontaine, the novel *Paul et Virginie*, and of Racine's tragedies *Alexandre le Grand*, *Esther* and *Iphigénie*. All these he translated into classical Arabic. But his real importance lies in his endeavour to translate Molière's comedies into the modern Arabic vernacular of Egypt, freely adapting them to Arabic conditions:

a. *Tartuffe* under the title *Shaykh Maṭṭaf*, which Vollers edited under the title *Le Sh. Maṭṭaf* (cf. *Z. D. M. G.*, xlv. 71 sqq. and thereon Socin, *ibid.*, xlv. 131 sqq.); b. *Madrasat al-Awḥāḥ* (*L'École des Maris*), transcribed and translated by M. Sobernheim, Berlin 1896; c. *al-Nisā' al-Ālmiyyāt* (*Les Femmes Savantes*), transcribed and translated by Fr. Kern, Berlin 1898; d. *Madrasat al-Nisā'* (*L'École des Femmes*); e. *Kiṭāyat al-Zuhāḥ* (*Les Fächer*), 1897. His collections of popular poems were also lithographed: *Ḥiml Zaḥḥal*.

The Egyptians were not much attracted by these comedies translated into the vernacular. The language did not appear cultured enough to the Egyptian public. They were hardly ever produced and the rich vocabulary which the comedies contain has not been noticed or utilised by students of modern Arabic.

Bibliography: On metre and language see Socin, Sobernheim and Kern, *loc. cit.*; and see also Brockelmann *G. A. L.*, ii. 176 sq.; the poet's autobiography in *al-Khatāt al-Jadida* of 'Alī Pasha Maṭṭar, xvii. 62; *al-Adab al-'Arabiya fī l-Karn al-tā'ir*, ii. 91 sq.; J. E. Sarkis, *Dictionnaire encyclopédique de bibliographie arabe*, ii., col. 1306.

(M. SOBERNHEIM)

MUHAMMAD ÇELEBİ. [See ÇHAZALI.]

MUHAMMAD DAMAD PASHA, grand-vizier, also called OKUZ MUHAMMAD PASHA, was the son of a farrier of Constantinople and was educated (rather unusual at that time for a boy from Constantinople) in the imperial palace for a military career. He left the palace as *allîşâr*, but we do not know his career until he was appointed, in 1616 (1607—1608), governor of Egypt. Here he was successful in the energetic suppression of a Mamlûk revolt and when he returned in 1620 to the capital with two years' tribute, he was appointed Kapudan Pasha, being at the same time married to sultân Ahmad's seven years' old daughter Gawlur Khân (married afterwards to Râdjah Pasha and Siyâwush Pasha; cf. *Sicillî-i 'othmânî*, I. 147), which assured him the qualification *damad*. As Kapudan Pasha he was under responsible for a defeat inflicted in 1613 on a part of his fleet, off the island of Chios, by a small Spanish-Sicilian fleet; this blow prevented the landing of Turkish ships in Syria on an expedition against the Druses. Damad Muhammad was dismissed from the post of Kapudan, became, however, second vizier and, after Nasûh Pasha's execution (October 17, 1614) he was appointed grand-vizier. In this office he commanded in 1615 as *ter-âskâr* in a new campaign against Persia, the peace negotiations having ended unsuccessfully a short time before. Nothing was undertaken, however, that year, partly owing to astrological calculations. The grand-vizier remained that winter in Aleppo. The next year the Persians were attacked in Armenia, where they had made some progress; Erivan was beleaguered and capitulated beginning of July 1616 after a 25 days' siege. The Turkish army was obliged, however, to withdraw with heavy losses occasioned by the rude climate and the insufficient food supplies. Damad Muhammad was dismissed in January 1617 to be succeeded by Khalîl Pasha [q. v.]; in the Venetian *Relazioni* Khalîl Pasha and Muhammad Pasha are described as the only members of the Imperial Diwân that really count. The next year, after the accession of 'Othmân II, he became Khalîl's *âzîm-ma'mûm* during that year's Persian campaign and, after Khalîl's disgrace, was appointed a second time grand-vizier (January 18, 1619). This dignity he held only a year, in which peace was concluded with Persia; the reason of his dismissal was a dispute with the Kapudan Güzelidje 'Alî Pasha [q. v.], a favourite of the sultân (January 1620). Damad Muhammad went as governor to Aleppo after having been deprived of all his wealth by the extortions of his successor. He died soon after his arrival in Aleppo and was buried in the *takke* of Shaikh Abû Bakr, where he had a *mihrâb* made for himself.

Bibliography: The principal Turkish sources are Na'imâ I, Peçewî and Hâdîdî Khalîfa (*Fakih-ke* and *Tuhfat al-Kibîr*). Further von Hammer, *G. O. R.*, iv. 442, 468, 475 *qq.*; 507 *qq.* where some contemporaneous western sources are indicated; 'Othmân Zâde, *Hudûd al-Wusû'a*, p. 61; *Sicillî-i 'othmânî*, iv. 147.

(J. H. KRAMERS)

MIRZÂ MUHAMMAD DJA'FAR KARADJADAGHI, Muntî of the Kâdjâr prince Djâlal al-Dîn Mirzâ and translator into Persian of the famous comedies of the Âdharbâidjân playwright Mirzâ Fath 'Alî Akhundzâde. After they had been published

(1859) Mirzâ Fath 'Alî sent a copy of his plays to the above-mentioned Kâdjâr prince in the hope that he would take notice of it. But the book lay unheeded for years in the prince's library until Muhammad Dja'far opened it by chance. The muntî, delighted with the plays, at once decided to translate them into Persian. As no one would help him, he was forced to print the translation at his own expense, which brought him into considerable financial difficulties. The translation appeared in lithograph in Teheran in 1874 under the title *Tamthîlât*. When the work was finished, Muhammad Dja'far corresponded with the author and found out that they were related. The Persian translation is of the greatest importance for the history of Persian theatre as it gave the stimulus to the composition of original works. The influence of Akhundzâde on the work of Malkum-Khân and even on more recent dramatists, such as Mahmûdî, is quite apparent. From the artistic point of view however, Muhammad Dja'far's translations cannot be called successful as their language is very clumsy and filled with countless Âdharbâidjânisms. It is remarkable that European orientals first became acquainted with Akhundzâde's works in their Persian dress and published a considerable number of these translations (see *Bibl.*) as textbooks for the study of spoken Persian, although, in view of their linguistic defects, the translations cannot by any means be regarded as models of the living Persian language.

(E. BERTHELS)

MUHAMMAD ES'AD. [See GHÂLÎL DEDR.]

MUHAMMAD ES'AD. [See ES'AD EFENDI.]

MUHAMMAD GHAETH GAWALIYARI,

an Indian saint. He was a descendant of the famous saint Shaikh Farîd al-Dîn 'Ajjâr [q. v.], his full name being Abû 'I-Mu'ayyad Muhammad b. Khaṭṭr al-Dîn b. Latîf b. Mu'în al-Dîn Kattâl b. Khaṭṭr al-Dîn b. Bâyarîd b. Farîd al-Dîn 'Ajjâr. Some say that his great-grand-father Mu'în al-Dîn Kattâl came to India and died at Djawnpûr. One of his brothers, Shaikh Bahlûl, who was attached to the service of Humâyûn, fell in battle and lies buried at the gate of the fort in Bayâna. According to his own statement, Muhammad Ghaeth was born in 906 (1500). He was a pupil of Shaikh Zuhâr al-Dîn Hâdîdî Haddâr, and belonged to the Shât-ârtiya sect of Sûfîs. He and his eight brothers were disciples of Shaikh Hâdîdî Hamîd, khalîfa of Shah Kâfân, the disciple and khalîfa of Shaikh 'Abd Allâh Shattârî. After leading a solitary life

for more than thirteen years in the mountains of Cundr, he came to Gudar, where he became acquainted with the popular saint and scholar Shaikh Wadjih al-Din Gudar. He went to Agra in 966 (1558) and was treated with high regard by Akbar. Subsequently he returned to Gawaliyar, where he died in 970 (1562). Humayun is also said to have been a faithful follower of Muhammad Ghawth.

He was the author of several Sufi works, the most popular of which is *Diwān-i Khams*, in Arabic, which he completed in 956 (1549), and which he subsequently rendered into Persian with additional improvements. His other works are *Kutub-i Maḥabbat*, *Bahr al-Hayat*, and *Mir'at-i Nāma*. It is related that his ecstatic sayings in the *Mir'at-i Nāma* were condemned by the 'ulama' of Gudar, who passed orders for his execution, but that he was saved by the timely intervention of the above-mentioned Shaikh Wadjih al-Din.

(ABDUL MUQTADIR)

MUHAMMAD GURDJI PASHA. Two Tur-

kish grand-viziers are known under this name.

1. The one who is also called KHADIM MUHAMMAD PASHA began his political career after having been a eunuch in the imperial palace; in 1604 he became *mawlā* in Egypt, where he was able to establish some order; after that he was twice *ḥākim-maḥḥam* of the grand-vizierate in the capital, in 1611 and in 1615; in the meantime he had held governorships in Erzerum, Bosnia and Belgrad. He was called to the grand-vizierate in the days of Sultan Mustafa I's second reign, when the Janissaries and the Sipahs were dictating their will at Constantinople (September 1622). Khadim Muhammad owed his nomination to the Sipahs — who had obtained the dismissal of Mir Husain Pasha, the leader of the Janissaries — but also to the confidence of the *walide* and to his well-earned reputation of a wise and experienced politician. He succeeded indeed in the abolition of abuses in the army administration by convoking a large council of dignitaries, where the reinforcement of the *ḥukuk* was decided. When, however, in several parts of the empire, there arose opposition against the Janissary regime, especially the action of Abaza Pasha [q.v.] in Erzerum, the grand-vizier was unable to oppose the Janissaries in Constantinople. Their leader Mir Husain was intriguing again, while at the same time the soldateska was crying for revenge for Sultan 'Othman II; as a result of these riots the former grand-vizier Dawud Pasha was killed in January 1623. On February 5 of the same year the rebellious Janissaries, declaring that a eunuch could not be their grand-vizier, obtained his dismissal in favour of Mir Husain. Gurdji Muhammad went into exile, but after the enthronement of Murad IV he came back to the capital as vizier and acted for the third time as *ḥākim-maḥḥam* in May 1624 when the then grand-vizier went on an expedition against Abaza. He died on March 26 and was buried in a *cirke* in Eiyub. His age is not given in the sources. In the opinion of the English resident Roe, Gurdji Muhammad was one of the few per-

sonalities that were able to lead the affairs of the empire.

Bibliography: The historians Na'ima, Pecewi, Hasan Bey Zade, Haddaji Khalifa (*Fajr-i Akbar*); Tughl, *Wafat-i Sultan 'Othman II* (used by von Hammer, not printed but existing in a French translation; cf. Babinger, *G.O.W.*, p. 157); 'Othman Zade Ta'ib, *Hadiyat al-Wusara*, p. 71; *Safih-i 'Othmani*, iv. 151; von Hammer, *G.O.R.*, iv.; Jorga, *Gesch. des Osm. Reiches*, iii.

2. One of the grand-viziers of the first period of Muhammad IV's reign, when the state affairs were really governed by the *walide* Kösem [q.v.] and the *ḫashar-ahad* Soleiman. This Gurdji Muhammad had already a long career as governor of Syria and other provinces behind him when, at the age of 94 years, he was called to the highest dignity in the beginning of November 1651 as successor of Siyavush Pasha, who had shown too much independence towards the court. During his grand-vizierate he is said to have shown fully his lack of capacity, taking the alarming revolts in Asia Minor of Abaza Pasha, Ipsah Pasha and Kadirji Oghlu with the greatest equanimity. He was especially anxious to remove from the capital all possible rivals to the grand-vizierate, amongst them Muhammad Köprülü, which brought him, as Na'ima says, the nickname of *ḥabib al-salafin* 'the pill of the sultans'. On June 19, 1652 he was deposed again by the court party. After having been exiled he lived some time at Eiyub and died in 1664, at the age of 110 years, in Temesvár.

Bibliography: The histories of Na'ima and Pecewi, further Wedjidi (not published and used by von Hammer; cf. Babinger, *G.O.W.*, p. 208); also the *Siyahat-nāma* of Entiyā; 'Othman Zade Ta'ib, *Hadiyat al-Wusara*, p. 95 sqq.; von Hammer, *G.O.R.*, v.; Jorga, *Gesch. des Osm. Reiches*, iii., iv.; Ahmad Rafiq, *Kudatlar Sultanat*, Constantinople 1914—1924.

(J. H. KRAMERS)

MUHAMMAD HASAN KHAN, a Persian man of letters, who died on 19th Shawwal 1313 (April 3, 1896). His honorific titles were *Sani' al-Dawla* and later *I'timad al-Saltana*.

Through his mother he was related to the Khajars [q.v.] and through his father he claimed descent from the Mongol rulers. His father, Haddaji 'Ali Khan of Maragha, was a faithful servant of Nasir al-Din Shah (in 1852 he discovered the conspiracy of Sulaiman Khan) and the son from his youth upwards was in the service of the court.

Muhammad Hasan Khan was one of the first students at the Dar al-Funun founded in 1268 (1851) and spent 12 years there. Later he went with his father when he was appointed governor of 'Arak. In 1280 (1863) he was appointed second secretary to the Paris Legation and spent three and a half years there. On his return to Teheran he was appointed interpreter to the Shah and in this capacity accompanied him on his travels. In 1288 (1871) he was appointed head of the dragomane (*dar al-tarjuma*) and of the press bureau (*dar al-tibba*) as well as director of the official *Khasanu-yi dawlat*. In 1290 he was appointed superintendent of the palaces and assistant to the minister of justice and henceforth continually rose in rank.

E. G. Browne criticises severely the work of

Muhammad Hasan Khan and accuses him of having put his name to books alleged to have been written for him by indigent scholars. On the other hand, Joukovsky speaks with much respect of his works and shows that he inspired a great many literary undertakings (e.g. the printing of the Kur'an with an inter-linear Persian translation, concordance and index; the foundation of a press for printing in Roman characters; the establishment of the Mushittiya school; encouragement of the daily press etc.) although after the appearance at Bombay of a satirical work by Shakh Hashim Shihri the censorship was established on the suggestion of Muhammad Hasan Khan.

The fact is that the number of works — often very useful — bearing the name of Muhammad Hasan Khan, is very large. Without the help of "secretaries" some of these books could not have been undertaken. To Muhammad Hasan Khan is in any case due the honour of having suggested them. His principal works deal with the history and geography of Persia and are often in the form of almanacs. They are: *Mir'at al-Buldan*, i., two editions (1293, 1294, a dictionary of geography: letters ا — و); ii., 1295 (history of the years i. — xv. of the reign of Nasir al-Din and calendar); iii. (years xvi. — xxii. of the reign of Nasir al-Din and calendar); iv., 1296 (geography: letters و — ح and history of 1296). In the geo-

graphical portions we find quotations from Vāqūt and European travellers along with notes specially prepared by the local authorities (an extract from the *Mir'at al-Buldan*: *Tarikh-i Babul wa-Nisawā* was published at Bombay in 1311); *Tarikh-i muntaham-i Nāqih*, 3 parts, 1298—1300 (history from the time of the Ilghiz; vol. iii.: history of the Kādhirs 1194—1300); *Mafid al-Shams*, 3 vols., 1301—1303 (description of the journey to Khurāsān with important archaeological data; ii. 195—213 contains the autograph of Shāh Tahmāsp, and ii. 469—500 a list of books in the library of the sanctuary of Mashhad); *Kitāb Hujūq al-Sā'ida fi Hādith al-Shahīda*, Tihān 1304, Tahsīl 1310 (history of the martyrs of Karbalā); *Ahsan-tun-niswan* [cf. Sūra ix. 70], 3 vols., 1304—1307 (biographies of famous women of the Islām); *Kitāb Durar al-Tijān fi Tarikh Banī Ashbān*, 1308—1310, 3 vols. (history of the Arsacids); *Kitāb al-Ma'āthir wa'l-Ashār*, 1309 (historical almanac for the 40th anniversary of the reign of Nāsir al-Din Shāh); *Kitāb al-Tudūn fi Ahwāl Djabāl-i Sharwān*, 1311 (history and geography of Sawād-kūh in Mazandān).

In the field of literature Muhammad Hasan Khan was only a translator (Swiss Family Robinson, romances of Jules Verne, discovery of America, *Tarikh-i Likhāf-i Yangi Dunyā*, Tihān 1288, *Memoirs on the Indian Mutiny* of 1857). He also wrote a number of text-books on geography and on the French language.

(V. MINORSKY)

MUHAMMAD HUSAIN TABRIZI, a famous Persian calligrapher, pupil of the celebrated Mir Saiyid Ahmad Mashhadi and teacher of the

no less famous Mir 'Imād. His remarkable command of the art of calligraphy, so popular in Persia, brought him the title of honour *Miftāh Ustād* (greatest master). His father Mirzā Shukrullāh was *Murtafi' al-Mamalik* to the Safawid Tahmāsp I (1521—1576), the master himself, according to the Oriental sources, was vizier to Shāh 'Imād II (1576—1578) but lost the favour of the sovereign and was forced to fly to India where he remained to his death. Rien says he died about 950 (1543), but this does not agree with other biographical details and is indeed improbable. That he spent the remainder of his life in India is evident from the fact that most of the manuscripts known to have been written by him were finished in India. The inscriptions on the mosques and khankahs of Tabriz are said to have been his masterpieces but unfortunately they have been almost entirely destroyed by earthquakes. After completing these inscriptions he made the obligatory pilgrimage to Mecca and on his return devoted himself exclusively to copying the masterpieces of Persian poetry. A *Divān* of the Persian poet Amir Shāhī from his pen is in the Cambridge University Library.

Browne, *A Catalogue of the Persian MSS. in the Library of the University of Cambridge*, 1899, No. 265, p. 353; Mirzā Hashim, *Khafā wa-Khawāṣṣ*, Constantinople 1306; *Tarikh-i 'Alam-nāma-i 'Abbāsī*, Teheran 1314, p. 126; Ch. Rien, *Catalogue of the Persian MSS. in the British Museum*, s., p. 782^a, 783^a, 785^a.

(R. BRATHENS)

MUHAMMAD ISMA'IL b. 'ABD AL-QHANI AL-SHAHID MAWLAH was born on the 28th Shawwāl 1196 (1781), of a Dihli family that traces its origin to the Caliph 'Umar. He was a nephew of the famous Mawla Shāh 'Abd al-'Aziz (d. 1239 = 1823). Having lost his father early, he was brought up by his uncle Mawla Shāh 'Abd al-Kādir (d. 1242 = 1826). In childhood he was inattentive to his studies and fond of swimming in the Djamna, but thanks to a retentive memory and a keen intellect he later on became a learned man.

Being shocked at the *shirk* or idolatrous tendencies, then prevailing among Indian Muslims, he zealously preached the doctrines of Islām. Impressed by the religious sanctity of Saiyid Ahmad al-Mujaddid, he became his disciple and his constant companion. In 1236 (1820) they went to Mecca and then to Constantinople, where they were received with marked consideration. Six years later, on their return to Dihli, they gained many followers. In 1245 (1827) they with many disciples went to Peshawar and declared a religious war against the Sikhs. But owing to some innovations upon the usages of the Afghāns, their power declined and during a retreat they perished in a skirmish with the Sikhs in 1247 (1831).

He is the author of the following works:

1. *Nisān Ustād al-Fiqh*, a treatise on the principles of Muhammadan law according to the Hanafī school;
2. *Mantab-i Imāmat*, a Persian treatise on the Imāmat;
3. *Tahmīyat al-Imān*, an Urdu treatise on theology (printed 1293, translated into English by Mir Shāhmat 'Alī, cf. *J. R. A. S.*, xiii, 316);
4. *Sirāt al-Mustafī*, a treatise in Persian on the doctrines of Islām.

Bibliography: Ṣiddīk Ḥasan, *Ikkāf al-Nuḥūḍ*, p. 416; Saiyid Aḥmad Khān, *Aḥḥār al-Sanādīd*, ii. 97; and *J. R. A. S.*, xiii. 310.

(M. HIDAYET HOSAIN)

MUHAMMAD KĀZIM & **MUHAMMAD AMIN** was a *muntazir* or secretary to Awrangzeb. He was entrusted with the compilation, from official records, of the history of the emperor's reign and was ordered to submit it to him for correction. He accompanied the emperor on his journey to Ajmir where he fell ill and was consequently sent back to Delhi and died there shortly after his return in 1092 (1681).

The history which he composed is known as '*Ālamgīr Nāma*'; it begins with the departure of Awrangzeb from Awrangabad in 1068 (1657) and is brought down to 1078 (1667). It has been printed in the *Bibliotheca Indica*, Calcutta 1865-1868.

MUHAMMAD KHALĪFA. [See MUHAMMAD B. HUSAIN.]

MUHAMMAD KHĀN BANGASH. Nawwāb styled Ghājanfar Dīang, was a Rohilla chief of the tribe of Bangash. The city of Farrukhabād was founded by him in the name of his patron the emperor Farrukhsiyar. When Muḥammad Shāh became emperor of Delhi, he appointed him governor of Mīlwa in 1143 (1730), but as he could not stop the repeated attacks of the Mahrattas he was removed in 1145 (1732) and appointed governor of Ilāhābād. Muḥammad Khān intended to reduce the Bundēlas of whom Rājā Chaturāl was chief. He captured several places but as he did not know the roads, Chaturāl with the help of Peshwa Bājī Rāo, surrounded him suddenly with an army. The Nawwāb took refuge in the fortress of Djaigarh; whereupon his son, Kāsim Dīang, having collected an army of Afghans marched to Djaigarh and escorted his father in safety to Ilāhābād. The imperial ministers then removed him from the governorship. He died in 1156 (1743).

Bibliography: *Muṭṭahir al-Umar*, ii. 771-774; *Tarīkh-i Farrukhabād* (Asiatic Society's copy), fol. 9, 13, 18, 20, 26 and 46-48; and *Imperial Gazetteer of India*, xii. 64-65.

MUHAMMAD KÖPRÜLÜ. [See KÖPRÜLÜ.]

MUHAMMAD LALA PASHA. [See MUHAMMAD PASHA LALA.]

MUHAMMAD LĀLEZĀRĪ, SHAIKH, author of a work on tulips, *Mīn al-Ashār* "Balance of Flowers". This treatise on the cultivation of tulips was composed in the reign of Sultan Aḥmad III (1115-1143 = 1703-1730), who had given the author the title *Shāh-nāzīr* on the suggestion of the grand vizier İbrāhīm Pasha between 1718 and 1730.

Bibliography: H. Fr. von Dicz, *Denkwürdigkeiten aus Asien*, Halle and Berlin 1815, ii. 1, 199, reprinted as: *Vom Tulpen- und Narzissen-Bau in der Turkey aus dem Türkischen des Schirch Muhammad Lalezari*, Halle and Berlin 1815; Pertuch, *Katalog der türk. Hss. Berlin*, p. 305, No. 232.

(TH. MENZEL)

MUHAMMAD LĀLEZĀRĪ, TAHR, the name of a Kāfī who died in 1204 (1789) in Constantinople, who wrote a series of theological treatises and commentaries, which are still only accessible in ms.: *Mīn al-Muḥsin fi Marifat al-Kutub al-mustafīn*, *Daf' l'Itrāḍ al-Khāṣṣ fi Ḥaḥḥ al-Fuṣūḥ*; commentary on the *Kaṭīb-i nūnīyeh*, and the commentaries in a collected volume in the 'Aḥrī Efendi-Library in Constantinople (*Defter-i Kutubkhāne-i 'Aḥrī Efendi*, Constantinople 1306, p. 188, No. 124 [3rd Waḥf-foundation]) containing: *Dīwanāh al-qāhīr* (on Ghazālī); *Yāḥyā al-qamr* (on Birgawī); *Zumrudat al-ḥidāyāt* (on 'Abd al-Kādir al-Gilānī); *al-Durrat al-ṣāḥih* (on *Ḥik al-Ḥaḥ*) and *Kawākib al-durr* (on Ibn Maṣṣāḥ). The name Lālezārī comes from Lālezār, a quarter of Constantinople near the Fāṭih Mosque.

Bibliography: Brunsell Mehmed Tahr, *Oṭmānlı Müellifleri*, i. 349, to which may be added Thuriyā, *Siyāḥat-i 'otmānī*, iii. 243; Tahr Lālezār-zāde, who in 1201 (1786-1787) was Molla of Eiyūb.

(TH. MENZEL)

MUHAMMAD MUHSIN AL-HĀDIDI, son of Hādījī Faiḍ Allāh, son of Aghā Faḍl Allāh, a rich merchant of Irān who came to India in the early part of the xviiith century, was born at Hūglī in 1143 (1730). For a time the Aghā resided at Murshidābād and carried on there an extensive mercantile business, but finding the rising port of Hūglī a more convenient centre, he finally settled there with his son Hādījī Faiḍ Allāh.

Already settled at Hūglī was one Aghā Muṭahhar, who, coming originally from Persia like Aghā Faḍl Allāh, had won his way at the court of Awrangzeb (q.v.). That monarch had conferred upon him extensive *ijāzats* in Dīlūt and other places in Bengal, and Aghā Muṭahhar, eager to take possession, finally himself set out from Dīlūt for the Eastern province. So well did he manage his newly acquired lands that he soon became one of the wealthiest men in the province. He selected Hūglī as his headquarters. Aghā Muṭahhar for many years remained childless and it was only in very old age that a daughter was born to him. Round this only child, named Mānū Dījān Khānam, all his affections centred, and dying when she was only seven years old he left her all his property. The widow of Aghā Muṭahhar was displeased with the conduct of her husband and subsequently married Hādījī Faiḍ Allāh, the son of Aghā Faḍl Allāh, her late husband's friend. The fruit of this marriage was Hādījī Muḥammad Muhsin. He was eight years younger than his half-sister, Mānū Dījān Khānam. Muḥammad Muhsin was first brought up at Hūglī, afterwards he completed his education in Murshidābād. After finishing his studies at Murshidābād, he returned to his sister's home at Hūglī. Later, he started on a long journey and for twenty-seven years he continued his travels in India, Arabia, Persia and Central Asia. It was not until he had reached his sixtieth year that he finally decided to terminate his travels and return home. Making his way slowly across Northern India he came at last to Lucknow. Thence he came to Murshidābād in 1216 (1801), with the intention of settling there. But during his long absence his sister, Mānū Dījān Khānam, had married her cousin, Salāḥ al-Dīn Muḥammad Khān, nephew of Aghā Muṭahhar; her husband died in the prime of life and she was anxiously waiting for the

arrival of her step-brother. At last at the solicitation of his sister, Muḥammad Muhsin came to Hūgli, and when she died at the age of eighty-one in 1218 (1803), she left a will bequeathing to Muḥammad Muhsin the whole of her property.

It was thus not until Hādjī Muḥammad Muhsin had reached the age of seventy-three that he became possessed of the great wealth which greatly helped his co-religionists in Bengal in the pursuit of education. He had never married and the death of his half-sister left him without near relatives. He was anxious that his great wealth should be put to good use after his death and consequently on the April 26, 1806 (1221 A. H.) he signed a Deed of Trust, setting apart the whole of his income for charitable purposes in perpetuity.

Hādjī Muḥammad Muhsin lived for six years after making this noble disposition of his property. For his own personal use he had reserved only so much property as would bring him in about one hundred rupees a month. In 1227 (1812) he died at the age of about eighty-two and was buried in the garden adjoining the *Imāmbārā* which he had so splendidly endowed.

MUHAMMAD MURTAḌĀ b. MUHAMMAD b. MUHAMMAD b. 'ABD AL-RAZZĀQ 'ABD 'L-FAḌL AL-HUSAINI AL-ZARIDĪ AL-HANAFĪ, an Arabic scholar, born in 1145 (1732) in Bilgrām in Kanauj in N. W. India, settled, after travelling for many years in pursuit of knowledge, in Cairo on 9th Šafar 1167 (Dec. 7, 1753). There he succeeded in reviving an interest in the study of Tradition by giving lectures to specially invited companies. In Upper Egypt also he was always a welcome guest with the Arab Shaikh Ḥumām and in the Egyptian country towns, and his fame spread to the Sūdān and even to India. From the year 1191 (1777) he drew a pension from the government. He died in Ša'bān 1205 (April 1791) in Cairo of the plague.

His principal works are two great commentaries. He wrote the *Taḏī al-'Arūs* on Fīrūzshāh's *Ġāwā'id*, finishing it in 1181 (1767) after 14 years' work; although in the preface he quotes over a hundred sources used by him, he takes most of the additions to the *Ġāwā'id* bodily from the *Liṣān al-'Arab* of Ibn Manẓūr. It was printed incompletely in 5 vols. in Cairo 1286–1287 and in 10 vols. in Cairo 1307. He wrote a commentary, also very extensive, on Ghazālī's *Ikḥāṣ 'Ulūm al-Dīn*, entitled *Liḥāf al-Sāda al-muttaḥin*, in which, in addition to explaining words he devotes special attention to establishing traditions quoted by al-Ghazālī; it was printed at Fās in 1301–1304 in 13 vols., at Cairo in 1311 in 10 vols. He also composed a number of smaller works on lexicography and Tradition and also on the genealogy of the 'Alids: 1. *Nuḥwāt al-Ittiḥād fī Bayān Ḥaḍīq al-Maṣīr wa 'l-Ḳāḍi*, ed. by Landberg, *Primæurs arabes*, l. 40–55; 2. *al-Ḳawāl al-maḥlūt fī Taḥḥiḥ Laḥf*

al-Taḥḥiḥ, Cairo, *Fihrist*, l. 96; 3. *Taḥḥiḥ al-Waṣīl il-Ma'rifa al-Mukāshshat wa 'l-Rasā'il*, Mīḍal, Dāwūd, *Makḥḥūḍāt*, p. 140, 1; 4. *al-Amālī al-Shāikhūniya*, lectures on traditions, which he gave in the Djamī' Shaikhūn, Berlin, Ahlwardt, N^o 10253; 5. *Riḥla fī Ahādīṯ Yamm al-'Aḥḥar*, Cairo, *Fihrist*, vi. 209; 6. *Tuḥfat al-Ḳamāl fī Madḥ Shaikh al-'Arab Imām al-'Alī* in the form of a *maḥāma*, Cairo, *Fihrist*, iii. 47; 7. *Iḍāḥ al-Maḍā'ir fī 'l-Iḥḍāḥ 'an 'l-'Awā'id*, finished on 4th Rabi' II 1194 (April 10, 1780), *ibid.*, v. 51; 8. *Djaḥwāt al-Ittiḥād fī Narab Bani 'l-'Aḥḥar*, finished on 26th Dhu 'l-Hiḍḍja 1182 (May 2, 1769), *ibid.*, p. 150; 9. *Ḥikmat al-Iḥḍāḥ ilā Kutub al-'Aḥḥar*, history of the Arabic script and of famous calligraphers, finished on 12th Dhu 'l-Hiḍḍja 1184 (March 30, 1771), *ibid.*, p. 163; 10. *al-Rawf al-maḥḥar fī Nazab al-Sāda al-Djāfar al-Taiyār*, *ibid.*, p. 205; 11. *Muḥl Niḥāḥ al-Ḳhaṣa* 'an *Ḳumū Sūdāniya Bani 'l-Waṣā*, finished on 16th Ramaḍān 1187 (Nov. 21, 1774), *ibid.*, p. 343; 12. *Niḥat al-Sayid Muḥammad 'Eṣṣadi Ibn Ḥawwā' bint Aḥmad*, *ibid.*, p. 346, b. 8.

Bibliography: al-Djabbār, *'Aḍḍā al-Āḥḥar*, Cairo 1927, ii. 196–210, followed by 'Alī Pāshā Mubārak, *al-Ḳaḥḥat al-Tawfīḥiyya al-Jadida*, Bulāḡ 1306, iii. 94–96; Mu'min al-Shablandji, *Nūr al-Aḥḥar fī Maḥāḥib al-Bait al-Muḥḥar*, Bulāḡ 1290, p. 273 sqq.

(C. BROCKELMANN)

MUHAMMAD PASHA. [See MUHAMMAD DAMAD PASHA, MUHAMMAD GURĪJ PASHA, ḲARAMĀNİ MEHMED PASHA, SOĞOLLI.]

MUHAMMAD PASHA, BALṬADĪ, grand vizier, was born about 1660 in the town of 'Oḥmāndjīk and, after an education in the imperial palace, entered the corps of the *balṭaḥ*. On account of his beautiful voice he acted for some time as *miṣṣḥḥin*; later on he became a scribe and rose rapidly in this career. In 1703, at Aḥmad III's accession, he became *miṣṣḥḥ* and was made *Ḳapudan Pasha* in November 1704. In December of the same year he obtained the grand vizierate as successor of Ḳalayll Aḥmad Pasha, against whom, although he had been at one time his fellow *balṭaḥ*, he had used all his power of intrigue, for which he was especially notorious, according to the historiographer Rāshid. On May 3, 1706 he was dismissed — on account of his lack of capacity, as Rāshid says — and sailed to Lemnos, but his friends obtained for him the nomination to the governorship of Ezerūm. In January 1709 he became governor of Aleppo and from here he was called, in August 1710, a second time to the grand vizierate, after Köprülü Nu'mān Pasha had proved unable to restore stability in the way that had been expected from him. At that time the first great conflict with Russia was drawing near; Charles XII of Sweden, after the battle of Poltawa, remained in Turkey. The beginning of Balṭadī Muḥammad's second grand vizierate was therefore filled with preparations for the war with Russia, which had been decided upon at a great state council in November 1710, and approved of by a *fatwā* of the Shaikh al-Islām. The grand vizier was made commander of this memorable campaign, which quickly was ended by the battle near Faldin (Falksen, Turk. Faldin) on the Pruth (July 21–22, 1711). Peter the Great's army was left in a desperate position, but his generals succeeded in concluding a truce with the

grand vizier, by the terms of which the Russian army was allowed to withdraw, while Azof was restored to the Turks. The general feeling in the Ottoman historical tradition is that Baltajli Muhammad had been bribed; his enemies at any case intrigued against him in Constantinople so that, even before his return to the capital, he was informed of his dismissal at Adrianople (Nov. 1711). The conclusion of the armistice of the Pruth was also much against the wishes of Charles XII who, on his remonstrances to the grand vizier, is said to have got the insulting reply that, in case Peter had been taken prisoner, there would have been nobody to govern his country and that, in general, it was not good that sovereigns should leave their country (Voltaire, *Histoire de Charles XII et de Pierre I.*). Baltajli was exiled to Lesbos and then to Lemnos, where he died in 1712, aged over fifty.

The bad reputation which this grand vizier has in Turkish history, and which is also given him by von Hammer, does not seem to be confirmed by western sources (Jorga, iv, 308).

Bibliography: The chief Turkish authority is Râşid's *Ta'rikh*; the campaign against Russia has been described in a *Ta'rikh-i Mulk*, contained in the work of Hasan of Crete and in a Munich manuscript (Babinger, *G.O.W.*, p. 307, 310); Dillawer-Zâde, *Dhail to the Hadîth al-Wuzarâ*, p. 7 *agg.*; *Sijill-i 'othmânî*, iv, 208 *agg.*; von Hammer, *G.O.R.*, vi, 111 *agg.*, 148 *agg.*; Jorga, *Gesch. des Osm. Reiches*, iv, where other western sources are indicated; Ahmed Refik, *Mamâlik-i 'othmâniyye* *Dimir Bâkî Şerh*, Constantinople 1910; Ahmad Mukhtâr, *Rûi mu-nâbbîs göre Baltajli Mehmed Paşanın Prut üfârî*, *T.O.E.M.*, vol. 8, p. 160 *agg.*, 238 *agg.* (J. H. KRAMERS).

MUHAMMAD PASHA, ELMAS, grand vizier, was born about 1660 in a village near Sinûb as son of a ship's captain. After having been attached to the service of the pasha of Tripolis, he was educated in the *hâssâ* oda of the palace and became in 1687 *silâhîdar*; soon afterwards he became *nizâmîdar* and obtained the rank of vizier. In Ahmad II's reign he was pasha in Bosnia, but did not yet play a prominent part, though he is said to have been one of that sultan's favourites. After Mustafa II's accession he was appointed *â'in-ma'âm* of the imperial stirrup and, when a revolt of the janissaries had cost the grand vizier Süremlî 'Alî Pasha's life, he was appointed in his stead (April 1695). He accompanied the new sultan during the campaign against Austria of the years 1695, 1696 and 1697. On September 11, 1697 the Turkish army was attacked by the Austrians under prince Eugène, while it was passing the Theiss near Zenta in order to march on Szegedin. The sultan had already reached the left bank, but the grand vizier, together with a number of high military chiefs, was killed that day in the battle, which meant a heavy loss for the Turkish troops. Elmas Muhammad had been against this military enterprise, but the other members of the council had persuaded the sultan to the contrary. He is said to owe the surname *Elmas* "diamond" to his accomplishments and handsome physique.

MUHAMMAD PASHA KARAMANLI [See KARAMANLI MEHMET PASHA.]

MUHAMMAD PASHA, LALA, grand vizier under Ahmad I. He was a Bosnian by origin and a relation of Muhammad Sokolli Pasha. The year of his birth is not given. After having had his education in the palace, he was *mir-akbar* and became in 1595 *agha* of the Janissaries. Two years later he took part in the Austrian wars as beylerbey of Rûm-ili and was commander of Esatergom (Graz; Turkish: Usturghon) when this town capitulated to the Austrian army in September 1595. During the following years Lala Muhammad was several times *mir-akbar* in Hungary and when, in July 1604, the grand vizier Yawur 'Alî had died in Belgrad, on his way to the Hungarian theatre of war, the sultan sent the imperial seal to Lala Muhammad. Although peace negotiations were continually being resumed, the new grand vizier took in that year Waiteen (Turk. Wâs) but besieged in vain Esatergom. During next year's campaign Esatergom was taken by Lala Muhammad (Sept. 29, 1605) and in November he crowned the Hungarian Bocskay as king of Hungary (without the regions occupied directly by the Turks) and Transylvania. In that same year the Turkish eastern army under Cigale Pasha was beaten by the Persians, while the troops sent to subdue the revolt in Anatolia were routed at Bulawadin. After his return it was decided that the grand vizier should remain next year in the capital and lead the war on the two fronts and, if possible, bring to a successful end the long-drawn peace negotiations with Austria. The young sultan, however, changed his mind in keeping with the wishes of the Kapudan Pasha Derwish, who was intriguing against Lala Muhammad. Accordingly the latter was ordered to take command of the army against Persia. He had already put up his tent in Uskûdar, when overcome by sorrow because of the frustration of his plans, he was seized with an apoplexy and died three days afterwards (May 23, 1606). He was buried near the *türbe* of Sokolli Pasha.

(J. H. KRAMERS)

MUHAMMAD PASHA, RUM, vizier and, according to some sources, grand vizier under Sultan Muhammad II. As his surname indicates he was a Greek renegade. After having had an education in the palace he was destined for a military career and became at one time *beylerbey*. The dates of his birth and of his military advancements are not recorded. He had taken part in the final campaign of Muhammad II against Karaman in 1466 and was charged by the sultan with the transfer of parts of the population of the conquered regions to Constantinople, instead of the grand vizier Mahmûd Pasha [q.v.] who executed these measures in too lenient a way, as the sources say. On the way back to Constantinople Mahmûd was dispossessed of his dignity in favour of Rûm Muhammad. The latter remained grand-vizier until

1470, during which time Muḥammad II went on his campaigns in Albania (cf. SKANDER BEG) and Negroponte. Rūm Muḥammad Pasha does not seem to have taken part in these expeditions, but, as a critical perusal of the sources has shown, he was especially charged with the problem of the repopulation of Constantinople; his commissionership for the transfer of the Karamanian population had been connected with the same problem.

As the measures taken to make the new capital again inhabited must have been unpopular in Muslim circles — the Greeks and other Christian elements were granted as favourable conditions as the Muhammadans to settle in the town — the historical tradition of the early Ottoman chronicles is rather against Muḥammad Pasha. They ascribe to him the reestablishment of the house-rent in Constantinople called *mukāṣṣa*, which was considered as an injustice to the new Muslim settlers. The *mukāṣṣa* is said to have been instituted by the sultan, then abolished and again instituted by this grand vizier. But, as F. C. Giese has shown by an analysis of the text of 'Aḥlī-Pasha-Zāde and Tursun Bey (cf. *ibid.*, xix, 1931, p. 268 *seq.*), these measures were part of the policy of the sultan himself and were probably only executed by the temporary grand vizier, who, being a Greek, must have had special qualifications for the difficult task. This last circumstance, however, makes him the more suspect in the eyes of the historiographers and for this reason we may perhaps assume that his reported cruelty towards the population of the Karamanian towns has been exaggerated by the sources, in order to add glory to his predecessor Mahmūd Pasha, whose memory has survived as that of a national hero. It is not even beyond question that Rūm Muḥammad was ever really grand vizier (*Sijill-i 'othmānī*). The *Hadīkat al-Wusarā'* of 'Othmān-Zāde (p. 10) ascribes Mahmūd Pasha's fall to Rūm Muḥammad's intrigues, but makes Iḥāk Pasha his immediate successor in the grand vizierate. So do other historians.

He was dismissed in 875 (1470) and was afterwards (according to the *Sijill-i 'othmānī* in 879 [1075]) appointed *māli* of Konya with the mission to pacify the newly conquered territory. He was defeated, however, by the tribe of the Warsak in the Cilician passes; soon afterwards he died, probably killed by order of the sultan (according to 'Aḥlī-Pasha-Zāde, ed. Giese, p. 133). The chronological order of these events is not certain.

Rūm Muḥammad Pasha was buried in a mosque which he had founded in Üsküdar.

Bibliography: Among the old chronicles those of Neṣrī and 'Aḥlī-Pasha-Zāde, and among the later historians especially 'Alī *Sijill-i 'othmānī*, iv. 104; von Hammer, *G. O. R.*, i. 488, 499; Hāfiḥ Husain al-Aḥkāsīyī, *Hadīkat al-Wusarā'*, ii. 195. (J. H. KRAMERS)

MUHAMMAD PASHA, SOĞOLLI [See SOĞOLLI].

MUHAMMAD PASHA, SULTAN ZADE, grand vizier under Sultan Ibrāhīm, was born about 1600 as son of 'Abd al-Rahmān Bey, son of the former grand vizier Ahmad Pasha (under Murād III), and by his mother a grandson of a princess of the imperial house, whence his surname Sultan Zāde. After having been *kaplān bāshā* in the palace, he adopted a military career, became already in 1630 *kubbe mestri* and was appointed in 1638 governor of Egypt. In 1642 he was made

commander of the expedition against Azof [q. v.] which town he rebuilt after it had been burned by the Cossacks before its surrender. On his return he turned with the *silāḥdār* Yūsuf Pasha and the sultan's favourite Djindji Khwādja a triumvirate, supported by the *māli* Kösem [q. v.]; they intrigued against the grand vizier Kara Muṣṭafā Pasha, who sought to remove the danger by sending Sultan Zāde Muḥammad in 1643 to Damascus as *māli*. After Kara Muṣṭafā had been executed on January 1, 1644, Sultan Zāde Muḥammad was made grand vizier. One of his most conspicuous characteristics in this office seems to have been his ability to flatter the sultan and to satisfy his very extravagant wishes by obtaining money from all possible sources and by giving *sandjaks* to many of Ibrāhīm's favourites. At this time the Empire was at peace with Austria (which sent in August 1644 an extraordinary embassy to confirm the peace) and with Persia, although Rakoczy, the prince of Transylvania, did his best to involve Turkey in a war with Austria. There was, however, a strong desire to go to war with Venice and to conquer Crete. The grand vizier was against this undertaking, but his former confederates drew the sultan to their side. Accordingly Yūsuf Pasha sailed as *serdar* to Crete in the spring of 1645 and took Candia (August 17). The bad feelings that arose after Yūsuf Pasha's return led to Sultan Zāde's dismissal from the post of grand vizier (December 1645). After Yūsuf Pasha in January 1646 had fallen a victim to Sultan Ibrāhīm's cruel capriciousness, Sultan Zāde himself was made *serdar* against Crete. He departed in April 1646, drove the Venetians from Tenedos, which they had taken by surprise, and died shortly after his arrival in Candia (July 1646). He was buried in the *teke* of Hudā'i in Üsküdar.

Bibliography: Na'imā's *Tārīkh* is the chief Turkish authority; valuable contemporary information is given in the *Siyāhat-nāme* of Ewliyā Çelebi, who himself went with the expedition against Azof. Further the *Dhīl-i Tawārīkh-i Aḥī 'Othmān* of Naṣṣī Pasha Zāde (cf. Babinger, *G. O. W.*, p. 211) and an anonymous *Noṣṣat-nāme* (*G. O. W.*, p. 152, note); 'Othmān Zāde *Tārīkh*, *Hadīkat al-Wusarā'*, p. 84 *seq.*; *Sijill-i 'othmānī*, iv. 161; von Hammer, *G. O. R.*, v. (J. H. KRAMERS)

MUHAMMAD PASHA, TIRYAKI, grand vizier under Mahmūd I, was born about 1680 at Constantinople. His father was a Janissary. He began his career as a scribe and rose to important posts; in 1739 he played a role in the peace negotiations at Belgrad with Austria. He had been *kāya* of the grand vizierate, viz. minister of the interior, when the sultan, under influence of his new *hālar agha*, the so-called Begler the Younger, dismissed his predecessor Hasan Pasha and called him to the grand vizierate (August 1746). The twelve months of his period of office were not filled with war but with important diplomatic negotiations, in which he was supported by the new *kāya* Muḥammad Sa'id, later grand vizier, and the *efendi* Muṣṭafā, both of them equally well versed in European diplomacy. During Tiryākī Muḥammad's grand vizierate peace was concluded with Nādir Shāh of Persia (September 4, 1746) and the peace treaties with Austria and Russia were renewed. As the reason for his dismissal (August 24, 1747) is given his addiction to the use of drugs

(hence the surname Tiryaki) and his quarrelsome, vindictive character, by which he had made enemies, especially in the ranks of the *'ulama'*. After his fall he was governor in different eyalets, as İcilli, Mâşul, Bağdad, Djidda, and he died in July 1751 at Rethymno in Crete, where he lived, probably in involuntary retirement. According to the *Sicill-i 'osmânî*, he was a capable official before his coming to the grand vizierate; afterwards he was a failure in every office.

(J. H. KRAMERS)

MUHAMMAD PASHA, YEGEN, grand vizier under Mahmûd II. He was called Yegen "the Nephew" because he stood in that relationship to Kel Yûsuf Efendi, a high official in the financial administration (*Sicill-i 'osmânî*, iv. 659); he also began his career by holding different financial offices, and was also *kapî kaymak* of the grand vizier Topal 'Osmân Pasha (1732). In 1737 he became *âlim-nâshîn* in Constantinople during the absence of the grand vizier 'Abd Allâh Pasha. The latter was successful that year against the Austrians on the Danube frontier (taking of Fethi Islim), but was nevertheless dismissed, after his return, through the influence of the *âzîzler agha* Beshir. Yegen Muhammad was appointed in his place (December 1737) and had to continue the peace negotiations with Austria and Russia, which were made especially complicated by the rivalry between France (represented by de Villeneuve) and the Sea Powers in offering their good services as mediators. The grand vizier himself was rather in favour of continuing the war and, being of a proud and arrogant character, made the negotiations still more difficult. In June 1737 he went as *serdar* to the Austrian front and was successful in recapturing Semendria and Orsova (August). He was back in the capital in November. At the end of the year the Russians retired from Ocakow and Kilburnu, which placed Turkey in a favourable position in the never ceasing peace negotiations, in which Poland also had become involved. But not even this grand vizier was to bring the war to an end; the same influence that had disposed of his predecessor obtained his dismissal in March 1739. After that Yegen Muhammad was governor of Crete, Bosnia, Aidin and Anadolu. When in this last office he was called to the post of *serdar* on the front of Karz (March 1745) against the Persians. He received large reinforcements from different quarters and thought himself strong enough to attack Nadir Shâh in his encampment near Eriwan. This battle resulted in disaster for the Turks, owing mainly to a mutiny among the irregular *levends*. Yegen Muhammad was killed, probably by the mutineers, in August 1745.

Bibliography: The Turkish historians Sabkî, 'Izzî; Dillâver Zâde 'Omar, *Dâhil to the Hadikat al-Wusarâ*, p. 60 199; *Sicill-i 'osmânî*, iv. 234; von Hammer, *G.O.R.*, vii.; Zinkeisen, *Gesch. des Osm. Reiches*, v.; Jorga, *Gesch. des Osm. Reiches*, v.

(J. H. KRAMERS)

MUHAMMAD (MAHMUD) RA'UF, an important Ottoman author and poet who plays a very prominent part in the development of the Turkish moderns and of the written language. Born on Aug. 12, 1291 (1875) in Constanti-

nople, the son of an Anatolian, who came from Kuthiya, and a Circassian mother, he received a good education. He attended the Naval School and became a naval officer but he only spent eighteen months in the navy, mainly in Crete. When quite a boy, he displayed an irrepressible love for the theatre and literature and began to write at the age of 10, taking as his models the novels of Ahmad Midhat and the translations of French romances of adventure. This first production was a drama, *Denâ'it yâkubî Gaskunya Karsanlar* ("Baseness or the Corsairs of Gascogne"). As his knowledge of French, and later of English, increased, he extended the scope of his reading and of his interests, so that at school he received the nickname *Roman okuyan Efendi* (the novel-reader) and later *Romancı* (the novel-writer). His literary activity proper only began in the Naval School where he became acquainted with Georges Ohnet, Octave Feuillet, Alphonse Daudet, Emile Zola, Flaubert, the French realists and naturalists and endeavoured to imitate them. His story *Djânîşî* is the most notable of his efforts at this period.

When he became acquainted with the works of the modernist 'Ushâkî-Zâde Khâlid Ziyâ [q. v.] he came completely under his influence, especially after entering into correspondence with him and having his story *Düşmân* published by him in the periodical *Khidmet*. Through Ziyâ who remained his model and Hussein Djâhid, whose friendship he made soon afterwards, he adopted the careers of letters completely and became an author. When Djânîş Shihâb al-Din had to go to the Hijâz as medical officer, he left the editorship of his periodical *Mekteb* in the hands of Ra'uf. In 1312 (1896) Ra'uf at the suggestion of Ziyâ published his novel *Gharâm-ı Şehâb* ("Youthful Passion") in *İhtisâr*, but it did not meet with any special success. He only began to be famous as an author with his cooperation in the periodical *Servet-i Fânî* in 1312 (1896), which was of great influence in the development of modern Turkish literature. Here he worked with Ziyâ and the poet Tewfik Fikret [q. v.], to whom he had become related by his marriage. In 1901 the *Servet-i Fânî* came to an end and with it his literary activity till the Revolution of 1908.

His first contributions to the *Servet* were *Na-şahat* ("In Convalescence") and *Ushâk*. In the 19th volume was published in serial form his most celebrated novel: *Eylûl* ("September") which then appeared in book form like most of his works in the collection, so important for the development of Turkish literature: *Edibiyât-ı İhtisârî Kütüb-hânesi*, vol. vi., 1317 (1901). This novel, which was reprinted several times and which remained unique of its kind and represents a height of achievement never again reached by Ra'uf, had great influence and won general approval. In vivid, moving, although unequal language he describes in impressively realistic fashion the development and tragic end of a noble, innocent love. The exhausting verbosity in which Ra'uf reveals here was aptly compared by Ziyâ to a gimlet which always turns at the same spot.

Of his novels we may also mention *Ferdî-i Gharâm* ("The Morning of Passion"), *Edibiyât-ı İhtisârî*, No. 28; *Gimîl E'te Kâlm* ("A Young Girl's Heart"); *Menber* ("Violet") and *Kâlm* ("Nightmare").

More important are his collections in the pre-

vailing fashion of short sketches, tales and long stories. Among these is his second most famous work: *Siyâh İnşiller* ("Black Pearls"), a collection of poems in prose modelled on Ziya's *Manâir-ı Şâir* and Beauclaire's *Flowers du mal* (*Edebiyât*, No. 11, 1317); also the collection of long stories *Âşıkânî* ("Enamoured") (*Edebiyât*, No. 16, 1325 = 1910); *İhtîrâr* ("Death Agony") (*Edebiyât*, No. 12, 1325); *Son Emel* ("The last Hope") (*Edebiyât*, No. 29, 1329 = 1913) and *Bir Âşık-ın Târîk-i* ("History of a Love Affair") (1330 = 1914); further *Üç Hikâye* ("Three Tales"); *Eşhor* ("Flowers"); *Perwâneler gibi* ("As butterflies") etc.

Ra'uf was no less successful as a dramatist. He wrote the following pieces: *Pençe* ("The Talon"), a drama (eyan) in four acts (*fa'ıl*) (*Edebiyât*, No. 14, 1325 = 1909); *Ferdi ve Şehzâde* ("Ferdi and Co.") in 3 acts, a dramatisation of the novel of the same name by Ziya (*Edebiyât*, No. 17) and *İydül* ("Battle") in 5 acts (*Edebiyât*, No. 30, 1327 = 1911); also *İki Kuvvet* ("Two Powers"); *Yegmurdan deluya*.

Ra'uf died on Dec. 23, 1931 at Constantinople. Numerous contributions by him are in the *Servet-i Funûn*, the finely produced women's periodical *Meâzîn* of which he edited the only volume that appeared. Contributions by him, some his own work, especially poems (Ra'uf possessed not inconsiderable poetic talent and was regarded as the Turkish Baudelaire), also essays and criticisms, of which his analyses of the contemporary novel are valuable, were published in different collections, periodicals and newspapers in vast numbers. His *Zambak* ("Lily") brought him trouble. It was confiscated on account of its sensuality and the author was imprisoned. He wrote other things in the same style which were not printed.

In his works he appears as a very artistic, rather sentimental nature; even what he writes in prose is pure poetry. His prose is as good as that of Ziya, the leader of the *Servet-i Funûn* movement. He is one of the most important personalities in this group of men of letters, although his marked merits in form and style are counter-balanced by equal defects, which became worse as he paid no attention to the cultivation of his style; in him we find a reversed process, from the more perfect to the less. He would have been held in higher repute generally, if he had ceased to write after his first works. — Owing to the identity of the name and the parallel literary activity Muhammad Ra'uf was often taken for M. Ra'uf, the son of Faruk 'Atif Paşa, who died on Febr. 23, 1918 and was buried at Haidar Paşa. M. Ra'uf was editor of the *Resimli Kitâb*. He was a dramatist and wrote: *Perwâne*; *Nigâhda Kervân* ("Wonder in sight"); a comedy *Atış ile Bâzî arasında* ("Between Fire and Powder") and a piece entitled *Tirâz* written jointly with Ra'if Nedjdet, one of his most intimate friends. The following dramas were never printed: *Şâh al-Din-i Eyyûb*, *Nerwân* and a number of adaptations. From the English he translated Saiyid Ameer Ali's *The Life and Teachings of Mohammed or the Spirit of Islam* in 2 vols. entitled *Muawwez Târîk-i İslâm*.

Besides being an author, M. Ra'uf was also a teacher, a task for which his extensive knowledge of languages qualified him (in addition to French and English, he knew Arabic, Persian, German, Italian, Greek and others). He lectured at the University on mythology and Greek and Italian

literature, on which he wrote two text-books: *Yûnân i Âdâm Târîk-i Edebiyât* and *İtalya Târîk-i Edebiyât*. He was also for a time teacher of western literatures, Turkish literature and French at various secondary schools.

MUHAMMAD SA'ID (MIR DJUMLA), minister of 'Abd Allâh Kuib Shâh of Haidarâbâd during the xviiith century, was originally a diamond merchant, and was famous in the Deccan for his wealth before he became minister. After the defeat of his master 'Abd Allâh by Awrangzêb, Mir Djumla took service under the latter, and was made Governor of Bengal from 1071—1075 (1660—1664). He defeated Shâh Shujâ' when the latter fought against his brother Awrangzêb. Mir Djumla was afterwards employed in the conquest of Cochin Bihâr and Asâm in 1072—1073 (1661—1662). He overran both these countries but owing to the rainy season and the spread of disease among his troops, he was compelled to return, only to die of dysentery contracted during his campaign, shortly after his arrival at Dacca in 1073 (1663).

(M. HIDAYET HOŞAN)

MUHAMMAD SA'ID. (See KHALIL EFENDI ZIKR.)

MUHAMMAD SHAH (1131—1161 = 1719—1748), emperor of Dîhli, surnamed Muhammad Rawshan Akhtar (or, the Brilliant Star), was the son of prince Djahân Shâh, one of the three brothers who perished in disputing the crown with their eldest brother, Djahânsâr Shâh, son of Bahâdur Shâh. He was born on Friday the 24th Rabi' I 1114 (August 7, 1702), and was crowned by the two Saiyid brothers, Saiyid 'Abd Allâh and Saiyid Husain, after the death of Rafi' al-Dawla on the 25th Dhu l-Kâ'da 1131 (September 29, 1719). Muhammad Shâh reigned for about 30 years and died one month after the battle of Sarhind, which his son fought against Ahmad Shâh Abdâlî (q. v.). His death took place on Thursday the 27th Rabi' II 1161 (April 16, 1748). He was buried in the court before the Mausoleum of

Niṣām al-Dīn Awliya' at Dihli. This emperor may be called the last of the Tīmūrid line, who reigned in Dihli and enjoyed any power. The few princes of that sovereign's family who were raised to the throne after Muḥammad Shāh were mere puppets in the hands of the nobles of the court.

Bibliography: Muḥammad Ḥaṣim Khāfi Khān, *Muntahab al-Lubāb*, ii, 840; Elliot-Dowson, *History of India*, vii, 485; Elphinstone, *History of India*, 1889, p. 692.

(M. HIDAYET HOSAIN)

MUHAMMAD SHĀH I, 'ALĀ' AL-DĪN KHĀLJĪ (695—715 = 1295—1315), was the nephew and son-in-law of Sulṭān Jalāl al-Dīn Firāz Shāh II, Khiljī, whom he murdered by treachery at Karā Munipūr, in the province of Ilāhābād, in 695 (1295), and ascended the throne of Dihli in the same year. He re-conquered Guḍjarāt (697 = 1297), took Ūtār and temporarily subdued the Rājputs (703 = 1303). His eunuch general, Malik Kafūr, seized Deogir and Warangal, and founded a Deccan province of the Dihli kingdom. The empire is said to have flourished during his reign. Among contemporary poets Amir Khusrāu and Khwāja Ḥasan held the first rank; Shāikh Niṣām al-Dīn Awliya', one of the greatest saints of India, flourished at the same time. He died in 715 (1315) and was buried in the tomb which he had constructed in his life-time in Old Dihli.

MUHAMMAD SHĀH BAHMĀNĪ [See MUHAMMAD I—III, above p. 664 *sq.*]

MUHAMMAD SHARIF AL-NADJAFI was born in the Deccan where he spent the first twenty-five years of his life. He afterwards visited in an official capacity Guḍjarāt, Mālwa, Adjmir, Dihli, Agra, the Panjāb, Sindh and Kashmir. He went to the last country in the train of Dīshāngīr and under the command of Kāsim Khān (1031 = 1621). He is the author of *Majma' al-Salafin*, a short history of the kings of Dihli and of the Deccan dynasties from the Muhammadan conquest to the accession of Shāh Dīshān, completed in 1038 (1628).

(M. HIDAYET HOSAIN)

MUHAMMAD TĀHIR AL-FATĀNĪ AL-GUḌJARĪ, was born at Patan in Guḍjarāt in 914 (1508); after completing his education in his native land, he proceeded to Mecca, where he studied traditions with eminent scholars such as Ibn Ḥajar al-Haitamī al-Makkī and others. He acquired much learning from 'Alī b. Ḥusain al-Dīn al-Muttaḥī (d. 975 = 1567) and also became his disciple in the Kāfir and Shāhī orders. After his return to his native country he tried his utmost to spread learning and to uproot the doctrines of Muḥammad al-Djawn-pūrī who had claimed to be the *Mahdī* of his time and had a considerable following among the Bohorā [q. v.], a community to which Muḥammad Tāhir himself belonged.

In 980 (1572) Akbar went to conquer Guḍjarāt. After its conquest he conferred honour on Muḥammad Tāhir by tying with his own hands a

turban on his head, saying that it was incumbent on him (Akbar) to spread the true principles of Islām. Khān 'A'zam 'Asir Muḥammad Kūkalush was appointed governor of Guḍjarāt and he helped Muḥammad Tāhir in uprooting the new doctrines of Mahdism. But when 'Abd al-Rahīm Khān Khānṣā succeeded him as governor, Muḥammad Tāhir suffered much at the hands of the followers of the Mahdī, and proceeded to the court of Akbar in Akbarābād for redress. On his way at Ūdhjain he was murdered by some followers of the pretended Mahdī in 986 (1578).

Among his various compositions the following may be mentioned:

1. *Majma' Biḥār al-Anwār fī Ghara'ib al-Tanzil wa-Laṭā'if al-Akhbār*, a copious dictionary of the Qur'ān and the Traditions, lithographed, Lakhnaw 1248, 1284 and 1314;

2. *al-Mughni*, a dictionary of proper names of Muhammadan traditionists, lithographed on the margin of *Taḥrīr al-Taḥqīq* by Ibn Ḥajar al-'Askalānī (Dihli 1290);

3. *Tadhkirat al-Mawdu'at*, a treatise on traditions that have been incorrectly attributed to the Prophet.

A. L.*, ii, 416.

(M. HIDAYET HOSAIN)

MUHAMMAD ZA'IM, a Turkish historian. All that we know of his life is gleaned from his works. He was born in 939 (1532) for he tells us that at the accession of Sulṭān Murād III, i. e. in 982 (1574), he was 43. At the early age of eleven he took part in the campaign of 950 (1543) along with his elder brother Perwāne Agha, who at that time was Kapadji Bashi to the Sanjak Beg of Lepanto, Yahyā Pasha Oghlu Ḥamad Beg. When the latter, after the capture of Stuhlweissenburg, was appointed Sanjak Beg there, the brothers seemed to have remained in his service, probably till 952 (1545) when Ḥamad Beg was summoned to Stambul, in connection with the plundering of the Stuhlweissenburg churches. In 961 (1554) when Sulṭān Sulaimān took the field against Shāh Tahmasp of Persia, Muḥammad Za'im was a secretary in the service of the governor of Syria, Teki Oghlu Mehmed, and a year later he was secretary to the powerful grand vizier Mehmed Sokollī and in this capacity compiled the official report of the death of Selim II and the accession of Murād III which was sent to the governors of Diyarbakr, Aleppo and Baghdad. This office, to which he perhaps succeeded on the promotion (978 = 1570) of the famous Feridūn Ḥamed Beg [q. v.], he must have filled till the death of Mehmed Sokollī in 987 (1579); we hear nothing further about it. He held a great *fiel* (*ra'is*); hence his epithet Za'im; he himself says: *ra'ama-i 'atḥā-i salafin-i 'alī ummāniyeten Mehmedün ile müdāref me-shāhr*. Friends requested him to write a history and he finished it within a year. He began the work in Muharram 985 (beg. March 21, 1577) and had completed it in Dhū 'l-Hijja of the same year (beg. Feb. 9, 1578). The date of his death and

the site of his tomb are not known but he is said to have left charitable endowments in Karaferia near Salonika.

He called his book *Humūl-i Dīwān al-Tawārīkh* and dedicated it to his master Mehmedmed Solṭān. As his sources he mentions eleven historians from Firdawsi and Tabari down to the anonymous *Tawārīkh-i Solṭān-i Āl-i Osmān* and gives as his main source *Beḥarret al-Tawārīkh*, from which, as has been proved, he copied out whole pages without a qualm. The book, which is not yet printed, is divided into a preface and five large sections (*qism*), subdivided into *ḡurūḥ* and then again into *maḡāliḥ* and concludes with an epilogue. Rien and others have given an account of the contents from the manuscripts. In the fourth *ḡurūḥ* of the 5th *ḥisn* he deals with the Ottomans and here alone do we have statements of any value, when the author describes from his own experience events from 1543 onwards. He brought his story down to the time of writing and the last event that he mentions took place in the month in which the book was finished.

The passages in the book relating to Hungary have been dealt with by Thury (*Török történeti*, II, 364—389) who also collected the above data for his life; the earlier from 1390 to 1476 are given in extracts and the later from 1521 to 1566 translated in full. Of the other less valuable parts of the book Dies (*Dentwürdigkeiten von Asien*, I, 212 sq.) has edited a portion of the very early history, dealing with Cain and his descendants, while v. Hammer (*Sur les origines russes*, I, 120) edited and translated a portion on the tribal divisions of the Turks, where the Rūs appear as the ninth Turkish tribe. Of the later Ottoman historians, İbrāhīm Pečewî utilized and quoted from the work of Muhammed Za'im from the year 1542 onwards.

Bibliography: Babinger, *G.O.W.*, p. 20, 98 sq., 193, where further references are given. (W. BJÖRCKMAN)

AL-MUHAMMADIYA, a name of several heretical schools, notably the ultra-Shi'i Muhammadiyah.

As the example of the Kaisaniya [q. v.] shows, at an early date some Shi'is transferred the imamate to 'Alids who were not descendants of the Prophet's daughter Fātima and then to those who were not 'Alids at all. The Manḡuriya revered such an one in Abū Manḡūr al-Idḡī, whom Yūsuf b. 'Omar al-Tahāfi, governor of the 'Irāq, executed in the reign of the Caliph Hishām, i. e. before 125 (743). Abū Manḡūr, rejected by the Imām Dja'far al-Ṣādiq for Shi'i exaggeration, thrust the 'Alids aside by still further increasing this tendency: Muhammad's family, he said, was heaven, the Shi'is the earth and he himself the "fragment falling from heaven" mentioned in Sūra lii. 44, as he had been personally touched and taught by God on a journey to heaven; he is said to have abolished the religious laws. While one group, the Husainiya, recognized the Imām in his son al-Husain after the death of Abū Manḡūr, another, the Muhammadiyah, recognised Muhammad b. 'Abd Allāh b. al-Ḥasan b. al-Ḥasan b. 'Alī b. Abī Tālib. He is the pretender celebrated as *al-Nafs al-zakiya* ("the pure soul"), who in 145 (762) fell at Medina fighting the troops of the 'Abbāsid Caliph al-Manḡūr. The Muhammadiyah quoted as authority for the recognition of an 'Alid again an alleged testamentary

disposition of Abū Manḡūr and compared the following order of succession: testament of the Husainid Muhammad Bakir for Abū Manḡūr and of the latter for the Hasanid Muhammad b. 'Abd Allāh, with the Jewish line: first Moses, then Joshua, son of Nun, then the sons of Aaron (the latter priesthood is meant). This arrangement was chosen in both cases so that conflict might not arise between the two lines of brothers (*ḡaḡnā*). — We cannot be certain that the Muhammadiyah formed a definite sect. The name rather records the fact that the rising of al-Nafs al-Zakiya, which was of great extent, attracted all circles of the Shi'a to its ranks, even those who belonged to the Husainid camp; and members of the Manḡuriya, the followers of Manḡūrah b. Sa'id, killed in the year 119 (737) by Yūsuf b. 'Omar's predecessor Khālīd b. 'Abd Allāh al-Kāsi, probably under the leadership of Dja'fir b. Yarid al-Djufi, supported al-Nafs al-Zakiya with their good wishes at least.

Quite a different group is the ultra-Islamic Muhammadiyah or Mimiya. It took its name from the belief in the divinity of the Prophet Muhammad in reply to an 'Ulyāniya or 'Alniya who regarded 'Alī as God. Its principal representative al-Faiyād b. 'Alī was executed between 279 (892) and 289 (902).

The Khāridjī Muhammadiyah was a separate party within the strictly Khāridjī sub-group of the 'Adjārida; it is called after a certain Muhammad b. Zurāḡ.

MUHAMMARA, a town and port at the head of the Persian Gulf and in the Persian province of 'Arabistān. It lies on the right bank of the Ḥaṣṣir channel (formerly called Nahr Bayān) which connects the Kārtū river with the Shatt al-'Arab. The original village from which the town grew appears to have lain on the left bank of the channel, on the island of 'Abhādān [q. v.], and Muhammara is probably therefore not to be identified with the town of Bayān, though it now lies on the same site. Further, Bayān was included in 'Irāq 'Arabī by the geographers, whereas Muhammara, lying on 'Abhādān island, was a part of Persia until the shifting of a channel threw the possession of the town into dispute between that country and Turkey. By the treaty of Erzerum (1847) it was assigned to Persia, but though the government was nominally directed from Shushitar, it remained in reality in the hands of the Arab ḡaḡh of the Ca'b (or Ka'b) tribe, who were Shi'is. From the fact that the Arab geographers ignore the town, at any rate under its present name (for references to Bayān see G. Le Strange, below), it may be inferred that the place (? Muḡriḡ) was either of minor importance or of comparatively recent origin. At the present time the port is of some importance for the trade of Persia, its principal article of commerce being dates,

though it is also connected with the oil trade.

MUHĀRIB, the name of several Arab tribes (Wüstenfeld, *Register zu den geneal. Tabellen*, p. 320 gives five of this name) of which the most important is that of the Muḥārib b. Khayfā b. Kaīs 'Alīlān (Wüstenfeld, *Geneal. Tabellen*, D, 8). They do not however seem to have been of very great importance either in the Dīhīlīya or in Islām; Ibn al-Kalbī only gives them two pages of his *Dīwanat al-Anṣāb* (Brit. Mus. MS., Add. 23,297, fol. 163b—165b) but these add considerably to the very meagre information in the *Tabellen* especially as regards the lines of 'Alī b. Dīyar b. Muḥārib and of Badhāwa (sic) b. Dhūhī b. Tārīf b. Khalaf b. Muḥārib. A typical Beduin tribe, the Muḥārib lived in the mountainous region of southern Najd between Medina and al-Yamāma (Wüstenfeld, *Register*, p. 320 following Ibn Khatalā, *Kitāb al-Ma'arīf*, ed. Wüstenfeld, p. 41); several places in their territory are recorded in Yāqūt's geographical dictionary (cf. the index of tribes, s.v.). We know very little about their history before Islām; they were closely connected with other tribes of the great group of the Kaīs 'Alīlān, like the Hawāsin, with whom they are said to have shared the worship of the idol Dīhār (Yāqūt, *Muḥḥam*, ed. Wüstenfeld, ii. 167, l. 2—3 = Wellhausen, *Reste*, p. 65; cf. *Taḥṣīl al-Arṣ*, iii. 115, l. 7 from below), and especially the Ghatafan (notably their clan Thā'aba b. Sa'd b. Dhūbyān) alongside of whom the clan of the al-Khudr b. Tārīf b. Khalaf b. Muḥārib (the genealogy of the *Tabellen* is to be rectified in as much as al-Millik is the name of al-Khudr and not that of his father) fought the war known as the *yawm al-ḥaraka* or *yawm Dūrat Maḥḥam* alluded to by the poet of the Dhūbyān Husayn b. al-Humām in some of his poems (cf. *al-Mufaḍḍaliyyāt*, ed. Lyall, Nr. xii. and xci. and the commentary of Ibn al-Anbārī, with the passages quoted in the notes).

The Muḥārib at the beginning of Islām were hostile to Muḥammad; this hostility was perhaps only the continuation of that which prevailed between the nomad tribes of the 'Alīya of al-Najd and the citizens of Medina. Thus we find, in the early years of the Hījra, that Muḥammad sent against them (and against the Ghatafan) a series of expeditions, of the nature of raids and counter-raids rather than regular military enterprises (our sources give 30 or 40 men as the total of the Muslim forces); the details of their fighting are given in Caetani, *Annali dell' Islām*, i. p. 537—538 (3 A.H. § 6), 596—597 (5 A.H. § 3), 689—690 (6 A.H. § 1), 694 (6 A.H. § 6) with reference to the sources utilized (we may add Ibn Sa'd, ii. 1. 23—24, 43—44, 61—62). One part at least of the tribe must however have been attracted within the growing sphere of Muslim influence since we find Muḥāribīs in the cavalry led by al-Zubair at the taking of Mecca (Caetani, *Annali*, ii. [8 A.H. § 390]). But it was only in 10 A.H. that the Muḥārib sent their ambassadors to Muḥammad and gave their formal adhesion to Islām (Ibn Sa'd, i. ii. 43; cf. Caetani, *Annali*, ii. 344—345); even on this

occasion they were conspicuous by their uncouthness, quite Beduin, of which another example is given in the anecdote of the Muḥāribī (he is said to have been called Suwā' b. al-Hārith or b. Kaīs) who dared to doubt the Prophet's word in connection with the purchase of a horse (cf. Ibn Sa'd, iv. 2, 90—91 etc., and Caetani, *Annali*, ix. 627—628).

The Muḥārib abandoned Islām during the Ridda but were easily brought back to obedience (*Annali*, ii. p. 594, 596, 11 A.H. §§ 115, 118); they took part in the conquest of the Irāq (Ibn Hādjar, *Iḥṣā*, Cairo 1325, iv. 20—21; biography of 'A'īth b. Sa'd, who fought at al-Qādisiyya and Qādisiyya and again, in 36 and 37, at the battle of the Camel and that of Siffin, where he was slain); they were encamped at Kūfa in the same quarter as the Usad and Ghatafan, not far from that allotted to the Tamīm (Tabari, i. 2490, 2495).

The contribution of the Muḥārib to the politics and literature of Arabia is practically nil; we need only mention the name of Laḥīṭ b. Bukair b. al-Naḍr (d. 190), who belonged to a branch of the Banū 'Alī b. Dīyar b. Muḥārib, a poet (cf. Tabari, iii. 540), ascetic and historian (*Fihrist*, p. 94 and Yāqūt, *Iḥṣā*, ed. Margoliouth, vi. 218—220, give a list of his works, relating mainly to literary history).

Of the other tribes bearing the name of Muḥārib the best known is the Meccan tribe of the Muḥārib b. Fīhr to which al-Dahḥāk b. Kaīs belonged (q.v.); the Muḥārib lampooned by al-Farazdaq and celebrated by Dīyar (Naḥṣīq, ed. Bevan, p. 817 l. 4, 1039 l. 2) are difficult to identify; it is not certain, although they are so identified in the index, that they were the Muḥārib b. Khayfā.

Bibliography: given in the article.

(G. LEVI DELLA VIDA)

AL-MUHARRAM (A.), the first month of the Muḥammadan year. The name is originally not a proper name but an adjective, as the article shows, qualifying Ṣafar. In the pre-Muḥammadan period the first two months of the old Meccan year were Ṣafar [q.v.] I and II, which is reflected in the dual "a portion" *al-Ṣafarānī* for al-Muḥarram and Ṣafar; in the old Arab year the first half year consisted of "three months of two months each" (Wellhausen), as the two Ṣafars were followed by two Rabi's and two Dūmāds. The first of the two Ṣafars, as the one that belonged to the sacred months, was given the adjectival epithet *al-muḥarram* which gradually became the name of the month itself. As Dhū 'l-Hijja also belonged to the sacred months, three of the four sacred months came together except in leap year. The month intercalated to equate the year to the solar year was inserted after Dhū 'l-Hijja and was not sacred. It thus came about that learned Muslims described the intercalation as renaming the Muḥarram concerned Ṣafar, i.e. as making Muḥarram not sacred; they mean that the month after the pilgrimage, which they consider as al-Muḥarram, following the custom, is not sacred i.e. is 'Ṣafar' and the second month i.e. in their view Ṣafar, is 'al-Muḥarram'. In doing this they of course overlook the fact that Ṣafar proper now only comes third; but when the intercalary month was abolished in Islām, the proper conception of the state of affairs was lost (cf. Nāṣīf).

In the early period when an attempt was made

to equate with the solar year by inserting intercalary months, — which was not successful on account of the ignorance of the old Arabs in astronomical matters — al-Muharram introduced the winter half year as the names of the first six months show. The Arab year began, like the Jewish, in autumn. After Muhammad had forbidden the insertion of the intercalary months in Sūra ix. 37, 1st Muharram, the beginning of the year, went through all the seasons as the year, which now consisted of 12 lunar months, had always only 354 or 355 days, as it still has. Whether the first month of the year was originally marked by a festival we do not know. Wellhausen has endeavored to show that the *ḥajj* originally fell in the first month of the year, so that Muharram was *ḥaram* in its quality as "Dhu l-Hidda". This also suggests that there was originally only one sacred month, but it was observed at different times in different parts of Arabia: Muhammad in the Qur'an always speaks only of the sacred month (ii. 194, 217; v. 2, 97); only in Sūra ix. 36 in laying down the method of reckoning time does he speak of four sacred months, in which it was sought to recognise a later declaration of the equal sanctity of four different sacred months of different districts, which was however illusory, as within Islam the peace of God reigns without this and, according to Sūra ii. 217, the defence of the faith takes preference over the sacred month. What the sacred month referred to in the Qur'an is, we do not know; in Sūra v. 2, at any rate, the month of the pilgrimage must be meant, which fits Wellhausen's theory excellently. The commentators think Raddab or Dhu l-Qa'da is meant, at any rate not al-Muharram.

Al-Muharram has 30 days of which, in addition to the 1st as the beginning of the year, the following are specially noted: the 9th as the fast-day of the Shi'a ascetics; the 10th as the anniversary of Kerbelā (60 = 680), on which al-Husain b. 'Alī b. Abī Ṭālib [q. v.] fell fighting against the Caliph Yazīd b. Mu'āwīya and therefore the great day of mourning of the Shi'a (on the significance of the 10th Muharram for the Sunnis see 'AḤḤAD), celebrated by pilgrimages to the sacred places of the Shi'a, especially to Kerbelā [see MUḤADDITH], in which the passion play, representing the death of 'Alī's sons [see 'AḤḤAD], plays the most important part; also the 16th as the day of the selection of Jerusalem as the Kibla [q. v.] and the 17th as the day of the arrival of the "people of the elephant" (Sūra cv.).

Wāstenfeld, p. 66, 68 (where further events that happened on the 10th Muharram are given); on the "people of the elephant" cf. Buhl, *op. cit.*, p. 12 sq. (M. PLESSNER)

MUḤASIBI ABU 'ABD ALLAH ḤARITH B. ABAD AL-'ANAZI, called Muḥāsibī, i. e. "he who examines his conscience", was born in Baṣra; he died in

Baḡdād in 243 (857). A legist of the Shāfi' school, a theologian who advocated the use of reason (*ʿaql*), using the dialectic vocabulary of the Mu'tazilis, which he was the first to turn against them, he finally adopted a life of ascetic renunciation after a moral conversion long meditated which is described at the beginning of his *Waṣāyā*. Involved with the Mu'tazilis in a general persecution as a result of Ibn Ḥanbal's attack on the dialecticians, he had to give up all teaching in 232 (846) and died in retirement.

His principal works are: *Riʿāya li-Ḥaḥḥab Allāh*, *Waṣāyā* (more accurately: *Najāʿ*), *Kitāb al-Taḥḥam*, *Māʿiyat al-ʿAhl wa-Maʿnāhu*, *Kitāb al-ʿAḥḥad*, *Fahm al-Salāt*; none of them is yet printed. The *Daʿwā ilā al-Nuṣṣa*, which Sprenger attributes to him, is of an earlier date; it was arranged by his chief teacher Aḥmad b. ʿAṣim Anṣārī.

Muḥāsibī is the first Sunni mystic whose works reveal a complete theological education; they combine in a very original way a keen concern for exact philosophical definitions, and a fervid reverence for the most naive traditions with the rigorous search for an increasing moral purification.

In his *Riʿāya* he discards the foundations of that "method" of introspection which Anṣārī had envisaged; he shows that a correlation is possible between two series of human happenings, the external actions of the members and the intentions of the hearts (against this: 'Alāf and the majority of contemporary *mutakallimūn*); he proves in detail that the enchainment of the states of conscience (*ahwāl*) can be guided progressively towards a perfect purity, provided an ascetic and moral rule of life is observed, the true *raḥḥāniya* mentioned in Sūra lvi. 27.

His adversaries (*muḥaddithūn*), especially Hanbalis, attacked him for having differentiated the concepts of *ʿilm* and *ʿaql* (parable of the "sower"), *imān* and *maʿrifā* (like Ibn Karrām); admitted the created character of the *laḥf* (our pronunciation of Qur'anic verses); held that the elect, in Paradise, would be summoned to enjoy directly familiarity with the divine being; chosen his references from authors not by following the formal correctness of their *imāds*, but on account of their intrinsic significance, from their moral weight (*ikhrā*), for the reader.

The *Riʿāya* is his main work; it forms in 61 chapters, in the shape of advice given to a pupil, a complete manual of the inner life. Ḥazālī used it before writing his *Iḥyāʾ*; and in spite of periodical attacks, its reputation among Arabic-speaking Muslim mystics lasted for a long time and may be compared with that of the *Imitatio Jesu Christi* among Christian mystics using Latin; the Shādhiliya brotherhood, with Mursī, Ibn 'Abd al-Rundī and Zarūk Burnūsi, have always recommended its use; and one of them, 'Izz al-Dīn Maḥḥālī, has made a summary of it.

The Ash'ari theologians also esteem Muḥāsibī as a precursor.

(L. MASSIGNON)

MUHĪBB AL-DĪN. [See AL-JARABĪ.]

AL-MUHĪBBĪ, a family of scholars in Damascus of the 11th-12th (xvth-xvith) centuries of which three members distinguished themselves in literature:

1. Muḥibb al-Dīn Abū 'I-Ḥaḍī Muḥammad b. Abī Bakr b. Dāwūd b. 'Abd al-Rahmān b. 'Abd al-Khalīq b. Muḥibb al-Dīn 'Abd al-Rahmān b. Ṭāqī al-Dīn al-'Uḡwān al-Ḥamawī al-Dimashqī al-Ḥanafī, born in the middle of Rabi' al-Thānī 949 (Dec. 23, 1542) in Hamāt, studied there, in Halab and Hims and after a journey to Constantinople obtained a post as teacher in the Madrasa al-Kuḍā'iya in Damascus. In 978 (1571) he accompanied the Shaikh al-Islām and Chief Kaḍī Cīwī Zāde to Cairo, was for a period a kaḍī there and after a second journey to Constantinople was appointed kaḍī in Hims, Ma'arrat al-Nu'mān and several other towns of northern Syria. In 993 (1585) the post of a chief na'ib (*al-nayāba al-kubrā*) was given to him; at the same time he was military judge, judge of the Syrian caravan, taught in several madrasas and gave fatwās at the Sultan's request. He died on the 23rd Shawwāl 1016 (Feb. 18, 1608). Of his numerous writings only three have survived: his commentary written in 969 (1561) (according to al-Muḥibbī, iii. 322, on the other hand, prepared at the age of 16) on Muḥammad b. al-Shihna's (d. 815 = 1412) *Uḡḡūna al-Bayḍūtiya* (*Manẓūma fī 'l-Ma'ānī wa 'l-Bayān*) in the Berlin, Ahlwardt, *Verz.* N° 7256-7257 and Gotha, Pertsch, N° 2789; MSS., his *Tarāḡīm al-Riḡla* or *Hādī 'l-Aḡḡān al-Naḡḡiyya* (la *'l-Diyār al-Miṣriyya*, in the Paris, Cat. de Slane, N° 2293; Cairo, *Fihrist*, vii. 646; Istanbul, 'Atīf Efendi, N° 2030 (s. Rescher, in *M.F.O.B.*, v. 496) MSS., which he wrote when kaḍī in Ma'arrat al-Nu'mān, and his commentary written in 1011 (1602) on the authoritative verses in Zamakhshari's *Kaḥḥāf* entitled *Tamāl al-Āyāt*, pr. Bulāq 1281, Cairo 1307-1308, and on the margin of *Kaḥḥāf*, *ibid.*, 1318.

Bibliography: al-Muḥibbī, *Khulāṣat al-Aḥḥar*, ii. 322-331; Wüstenfeld, *Die Gelehrtenfamilie Muḥibbī in Damascus*, in *Abh. G. W. Götz*, Hist.-Phil. Cl., xxx/iii, 1884, p. 5-9.

2. His grandson Faḍl Allāh b. Muḥibb Allāh b. Muḥibb al-Dīn was born on the 17th Muḥarram 1031 (Dec. 2, 1621) in Damascus, at an early age showed great linguistic ability, received in 1048 (1638) from Naḍjma al-Dīn al-Ghazālī (d. 1061 = 1651), (see Brockelmann, *G.A.L.*, ii. 292) the *idgh* for Ḥadīth, and after failing to secure something in Halab through the Shaikh al-Islām Muḥammad b. Zakariyyā, was given by his father the latter's post at the Dar al-Ḥadīth. In 1051 (1641) he accompanied Muḥammad 'Ismā'īl to Constantinople, was appointed to the Madrasa Arba'in there, but dismissed a year later, when he returned home. In 1059 (1649) he accompanied the kaḍī Muḥammad b. 'Abd al-Halīm al-Bursawī to Egypt and became his deputy. After a quarrel with him, he resumed his studies in al-Aḥḥar and came home next year. In 1073 (1662) he again went to Constantinople and four years later was appointed kaḍī of Balīrt but returned to Damascus in 1079 where he died on 23rd Dhu'l-Ḥijja II,

1082 (Oct. 27, 1671). While his own *Divān* and his description of his journeys to Constantinople have not been preserved, his edition of the poems of his friend Maḥḥāḥ Paḡha (d. 1080 = 1669 in Damascus) are still in existence. He first of all arranged them chronologically, beginning with a poem on Sulṭān Ibrāhīm I of the year 1055 (1645) (in addition to the MSS. mentioned in Brockelmann, *G.A.L.*, ii. 277 there are now Köprülü, ii. 1245 and Mōḡal, Dāwūd, *Mashḥūḥ*, N° 153, 20), then alphabetically, including poems of a later period down to 1071 (1660); this edition was printed at Damascus in 1301. In 1078 (1667) he edited the biographical work of al-Ḥasan al-Būrīnī (d. 1024 = 1615), *Tarāḡīm al-Aḡḡān min Abnā' al-Zamān* and published it with a supplement; we may add to the MSS. mentioned by Brockelmann, *G.A.L.*, ii. 290: Muḥammad Kurd 'Alī, in *R.A.A.D.*, iii, 1923, p. 193-202.

Bibliography: Muḥibbī, *op. cit.*, iii. 277-286; Wüstenfeld, *op. cit.*, p. 15-19.

3. His son Muḥammad al-Amin b. Faḍl Allāh b. Muḥibb Allāh b. Muḥammad Muḥibb al-Dīn al-Dimashqī, born in 1061 (1651) in Damascus, went with his father in 1077 (1666) to Balīrt but returned home several times from there. A friend of his father's, Muḥammad b. Luṭf Allāh b. Balīrām al-'Isāmī, who had been kaḍī in Damascus in 1065 (1655) and was military judge in Anatolia in 1078 (1668), provided him with funds to study in Brusa. He returned home after a brief stay there on 8th Ṣafar 1086 (May 4, 1675) in company with the mufti Muḥammad b. 'Abd al-Halīm. Al-'Izzatī had in the meanwhile been appointed military judge in Adrianople and was able to procure him a post there. But his patron fell ill soon afterwards and had to resign. Muḥammad accompanied him to Stambul and looked after him till his death on 10th Shawwāl 1092 (Oct. 24, 1681). He then returned to Damascus and began to write. When in 1101 (1690) he had made the pilgrimage to Mecca, he was appointed deputy kaḍī and then a teacher in the Amīniya in Damascus. He died there on the 18th Dhu'l-Ḥijja I 1111 (Nov. 11, 1699).

His principal work is a collection of 1,289 biographies of scholars, poets etc. of his time and the period immediately preceding it arranged in alphabetical order, entitled *Khulāṣat al-Aḥḥar fī Aḡḡān al-Karn al-Ḥādī 'aḥḥar*, the first fair copy of which he finished in 1096 (1685) (printed Cairo 1284, 4 vols.). The draft of a number of biographies from the Hijāz and Yemen, which is preserved in the Brill-Houtsma MS., N° 112 appears to be part of the preliminary work on this collection; the draft of a synopsis is in Berlin (Ahlwardt, N° 9895). A synopsis was prepared by 'Alī b. 'Abd al-Ḥādī al-Ghazālī al-'Amīrī (d. 1101 = 1777; Marāḥī, iii. 215); MS. in Tübingen (Seybold, N° 9). A second great biographical work on celebrities of all ages entitled *al-Fīṭaḥ* was to give under each letter *al-Fīṭaḥ wa 'l-nisā' wa 'l-awḥā' wa 'l-ḥadīth wa 'l-nisā'* separately. In the draft in Leipzig (Vollers, N° 683) giving the letter *nīm* the sources, which from the articles are taken usually word for word, are generally quoted. He also wrote a continuation of al-Khaḍīr's *Rafīḥat al-Allāh* entitled *Nafḥat al-Rafīḥa wa-Rafīḥat Fīṭa al-Fīṭa*, which survives, in addition to the MSS. quoted by Brockelmann, *G.A.L.*, ii. 294, in Stambul, Nūr-i 'Oḡḡāniya, N° 4352 (*M.S.O.S.*, xv. 22) and Mōḡal, Dāwūd, *Mashḥūḥ*,

N^o. 264, 7; an anonymous selection from it called *Muḥibbāt* is in Cairo, *Fihrist*², iii. 342. A supplement (*ḥawāṣ*) to it was written by Muḥammad b. Muḥammad al-Su'ālū in 1111 (1699); MSS. in Berlin, Ahlwardt, N^o. 7422; Copenhagen, Mehren, N^o. 170; St. Petersburg, As. Mus., N^o. 251; Ikt. Mus., Or. 6516 (*Descript. List*, N^o. 57); Vale-Landberg, N^o. 179; Damascus, Zayyāt, N^o. 78, 64. A companion work of the middle of the 13th century is 'Abd al-Rahmān b. Shāhī's *Tarāḡim ḥaḍ al-ʿayn min Ahl Dimāḡh min ʿUlamāʾih wa-Ulamāʾih*, pr. Beirut 1886. His *Divān*, mainly *ḥapḥas* on friends and patrons, which are as a rule also included in his *Ḥawāṣ*, is preserved in the autograph copy in the library of A. Taimūr in Cairo; a. R.A.A.D., iii. 342, and the Berlin MS, Ahlwardt, N^o. 8007; cf. N^o. 8008; Flügel, *Z. D. M. G.*, ix. 224. In the *Uḡḡa Barāḡat al-Arḡḡ ḡḡḡḡ al-Surūr wa ʿI-Afrāḡ*, Berlin, N^o. 8102 be collected sayings and proverbs. Al-Thaʿlībī's *Kitāb Ṭimār al-Kulūk* f. ʿI-Muḡḡaf wa ʿI-Mamūḡ was arranged alphabetically by him as *Mā yuʿannawā ʿalāhī f. ʿI-Muḡḡaf wa ʿI-Muḡḡaf ilāhī*, MS. in Istanbul, Top Kapu, N^o. 2455; ʿAtif Efendi, N^o. 2247 (see R.S.O., iv. 727); Aya Sofia, N^o. 4136 (*M. S.*, vii. 132); Cairo, *Fihrist*², iii. 285. The monograph on grammar *Ḍjāy al-Qian-nūnān fī Nawʿ al-ʿI-Muḡḡannayim* is preserved in a MS. belonging to A. Taimūr Paḡha (R.A.A.D., iii. 340; iv. 147) and printed in Damascus 1348. The lexicological work *Sawḡ al-Sabīl fī-mā f. ʿI-Luḡḡa al-ʿarabiya min al-Daḡḡīl* is preserved in a Damascus MS.; see R.A.A.D., iii. 340.

Bibliography: al-Murāḡī, *Silk al-Durar*, iv. 86—91; Wüstenfeld, *Gelehrtenfamilien*, N^o. 590; do., *Die Gelehrtenfamilien Muḡibbī*, p. 19—28; (C. BROCKELMANN)

MUḤIBBĪ. [See SULAIMĀN I.]

MUḤIT. [See BAḤS MUḤIT.]

MUHR (ع., Sanskrit मुह्र), seal, signet or signet-ring. Pronounced in Persian *mahr* and *mahr* and in Turkish *mühür* with the second vowel disjunctive and unstable or popularly *mühür* (Hindoglu, Auher, Ciackiak and Holdermann) or even, according to Viguler, *mihir*. The word has been arabised in the form of barbarous derivatives like *ṭamḡr* "action of sealing" and *ṭamḡr* (synonym: *mühür*) "sealed, hidden".

Muslim legend, according to Mouradges d'Ohsson (vii. 121), traces the use of seals to Lāḡḡ, vizier of Lātis, son and successor of the Pharaoh of Moses (cf. Carra de Vaux, *L'abrégé des merveilles*, p. 387; in contradiction with Genesis, xli. 42).

In the article KHĀTAM are given useful references to the use of seals among the Arabs and also among Turks and Persians and the coin of this name is dealt with under MUḤS. Here we shall deal more particularly with the word *muh* as a complement to that article. We have not however to forget that this word *muh* was used by the Persians and Turks either alongside of *khātām* or in place of it, to express also ideas taken directly from the Arabs, as in the phrase *muh-i Sulṭimān* or *muh-i Dāw* "seal of Solomon" (also the name of a plant) or *muh-i mubārak* "the famous mark of a prophet which appeared on Muhammad's back".

The *Sulṭimān* regards the seal (*muh*), with its synonym of ring or signet; the two words sometimes appear together: *muh-i nigān*, vi. 51, verse 557 of Mohl's edition) as an attribute of sovereignty,

like the crown and throne. It is the same when sovereignty is delegated to governors (vi., p. 5; v. 1; cf. i., p. 499, v. 163; iii., p. 421, v. 111; vii., p. 459, v. 374; p. 463, v. 418). There is a reference in the same poem to seals of amber (i., p. 545, v. 692) such as actually existed (cf. Reinaud, *Mon.*, i. 129). They were sometimes steeped in Chinese musk (vi., p. 351, v. 2288).

In Turkey the seal was again the emblem of power. The imperial seal (*muh-i ḡmāyūn*) was handed to the grand vizier, hence also called *ḡḡḡ-i muhr* (cf. *ḡḡḡ Aʿẓām*), with great solemnity (cf. M. d'Ohsson, vii. 120), and Naʿīmā (iv. 430) in speaking of ambition to become grand vizier uses the phrase *muh-i arṭu* ("desire for the seal").

We may mention here that according to d'Ohsson (*ibid.*), the sultān had four seals with a *tughra*, set in rings; one was square and remained in his possession; he entrusted the others which were round, to the Grand Mistress or Lady Treasurer of the Harem (*ḡḡḡ-dār*) and to the *ḡḡḡ-ḡḡḡ*, a white eunuch who at one time held the office of first chamberlain.

The seal was changed at each accession of a new monarch (cf. Naʿīmā, i. 117) as was the *tughra* itself. Ewliya Celebi's statement, which implies the contrary, is therefore rather strange (vii. 300, v. 4 from below). In Persia the seal was retained but the name was changed (cf. KHĀTAM).

The grand vizier produced the imperial seal on the *ḡḡḡ* days for the *ḡḡḡ ḡḡḡ* to seal the bag (*ḡḡ*) for the registers of the *ḡḡḡḡḡ* and the archives of the Finance Department or *māḡḡ ḡḡḡḡḡḡ*, the Treasury (*ḡḡḡḡḡ*) and the general Archives (*ḡḡḡḡḡḡ*) (*M. T. M.*, 499). The grand vizier also had, like all the viziers or governors of provinces, two other seals, one, a large one, impressed at the top of *ḡḡḡḡḡ* or "ordinances", and the other, a small and modest one, placed at the foot of letters from the vizier, including official ones (cf. Ahmad Rāḡim, *ʿOḡḡ. Tārikḡ*, iii. 1514).

The use of seals in Turkey (we know very little of those of the Saldḡḡs; cf. Reinaud, *Mon.*, i. 121 note) was exceedingly widespread. They were used for impressions in wax (*muh-i mawḡ*) and for stamping in a particular kind of ink to which saliva was added, as in Persia (cf. Le Père Raphaél du Mans, p. 129). In more modern times the seal was carried in the purse (cf. a verse by Mehmed ʿAkif in his poem *Seḡḡ ḡḡḡ*). It is only recently that under the influence of the west the *muh* has been displaced by the signature. It must have received its *ḡḡḡ ḡḡḡ* with the recent adoption of the Roman alphabet and of rubber seals.

The industry of seal-engraving has thus been gradually disappearing. It had at one time reached a high degree of perfection and the artists used to sign their work. These signatures were usually very brief, Mithli, Saʿī, Ahmad etc. They were written in characters so minute that they could only be distinguished with a lens and only when very clearly engraved. Quite a study could be written on these artists.

Ewliya Celebi gives the following information about the seal engravers of Istanbul (i. 575). He distinguishes:

1. Engravers on stone, *ḡḡḡḡḡḡḡ*, 105 workmen in 30 shops. They engraved on stones such as

agate, garnet, turquoise and jasper. Their patron saint or *pir* was 'Abd Allāh Yamīn, a disciple of Uwais al-Karānī who is buried in Tā'izz.

2. The engravers of *mühür*: *mühürkârân* who worked especially for the viziers, 80 workmen in 50 shops. Their *pir* was the Caliph 'Othmān. In the reign of Murād IV the most noted were Mahmūd Çelebi, Rîzâ Çelebi and Ferîd Çelebi, who charged from 100 to 500 piastres for their work.

3. The engravers of silver seals and talismans: *mühürkârân-ı sîm ü-heykâl*, 40 workmen in 15 shops. *Pir*: 'Ukkāsh who is buried near Mar'āsh, who, having seen on the Prophet's back the *mühür-i nihāwmet* (cf. above), began to engrave talismanic formulae (two of these are quoted). These workmen "cannot engrave Yemen agate". They were established in the area called *Seyidhānlar*.

We may still mention the custom of making partisans, whose loyalty one wished to be sure of, stamp their seals on a *Kar'ān* (*Kar'ān mühürletmek*); cf. in the Turkish papers of June 8, 1925, statements by a rebel Kurd.

The word *mühür* in the old language of the Janissaries meant vouchers for their pay (M. d'Oheson, vii, 337).

In figurative language Persian and Turkish uses the expression "to break the seal": *mühür berfâshen*, *mühür almak* (or *hemak*, *almaz*, *göstermek*) for "to deflower a virgin" (cf. further this art. TAMUHA).

The *MUHRDAR* (*mehrdâr*, Turk. *mühürdâr* [cf. the article KHATAM], keeper of the seals or better "private secretary" (cf. below), was therefore a very important personage. Mir 'Alī Shīr Newā'ī was the *mehrdâr* of Hmamīn Balkara before becoming *Atabek Begi* and first minister (cf. Belin, *Notes sur Mir...*, 1861, p. 13; cf. de Sacy, *N. E.*, iv, 282, 261). He was succeeded in these offices by another poet, Merwārdī (*ibid.*). — On the *mehrdâr* in Persia, cf. Le Père Raphaël du Mans, p. 21. In Central Asia the title of *mehrdâr* seems to have replaced that of *tanghāi* which occurs as early as the Orkhon inscriptions.

In Turkey, each vizier had his *mühürdâr* (Ahmad Rāsim, *Ötüm. Târîhi*, i, 455). Cf. the account of the career of a *mühürdâr* in the *Siddiqi-ye 'otmāni*, ii, 31 below (Behdjet Pasha (the name as is mentioned in the *Memoirs* of Sa'ūd Pasha, i, 4)).

The *rūnūmāji* had also their own *mühürdâr* (J. Deny, *Sommaire des archives turques du Caire*, p. 136). At Kādī Klōy there exists a quarter called *Mühürdâr*. For the work bearing the title *Mühürdâr Türkîhî*, cf. Babinger, *G. O. W.*, p. 216 sq.

With the viceroys of Egypt the *mühürdâr* was a "private secretary" of the Khedive. The title of *mühürdâr* was abolished in 1884 but the office has remained. His salary was the same as that of the chief of the cabinet (cf. *ibid.*, p. 92 and 476).

Bibliography: Cf. the article KHATAM. We may now add: Babinger, *Das Archiv des Bosnischen Osman Pacha*, Berlin 1931, p. 23 and note 5, where reference is made to a little known article by Riza Efendi Mudestirovic. Cf. also von Hammer, *Hist. de l'Empire Ottoman*, xii, 425, 539; xvi, 2. (J. DENY)

MUHSIN 'ALI, son of Shāh Hmamīn Hakikat, was an inhabitant of Lucknow. In poetry he was the pupil of Khwāja Wazir. He flourished in the latter part of the sixteenth century. He is the author of a *Diwān*, a collection of lyrical poems, and a

biography of Urdu poets called *Sarūfā Sazān. Bibliography:* Nāsāhī, *Tadhkirat-i Sam'ā'ī* (Lucknow 1874), p. 419.

(M. HIDAYET HOSEIN)

AL-MUHTADĪ, AND 'ABD ALLĀH MUHAMMAD, an 'Abbāsīd caliph. After al-Wāthiq's death, a number of officials wished to pay homage to the young Muhammad, son of the deceased caliph and a Greek slave; instead however, al-Wāthiq's brother was proclaimed his successor and only after the deposition and murder of the unfortunate al-Mu'tazz (end of Radjab 255 = July 869) Muhammad ascended the throne with the name al-Muhtadī. His ideal was the Umayyad 'Umar b. 'Abd al-'Azīz. Like the latter, he was distinguished for the strictness with which he conducted his life; with piety and simplicity however, he combined strength and ability and during his brief reign he did his best to raise the caliphate from its degradation and to restore the power of the Commander of the Faithful. In several provinces there were risings by 'Alīda, real or alleged; but the most dangerous enemy of the caliph was the Turkish general Mūsā b. Bogha. When the latter, who was fighting against the 'Alīda in Persia, heard of the accession of al-Muhtadī, he returned home. Reaching Samarra in Muharram 256 (Dec. 869) he forced the caliph to take an oath to bring to justice the Turkish chief Šālih b. Waṣīf, who had robbed the mother of the caliph al-Mu'tazz of all her priceless treasures. When Šālih concealed himself, the Turkish mercenaries mutinied and were intending to depose al-Muhtadī but were appeased by the resolute action of the latter. Al-Muhtadī then promised Šālih's followers that he would pardon him; but as the latter did not appear, they went to Samarra and began to pillage it until they were scattered by Mūsā. Šālih was soon afterwards discovered and killed by one of Mūsā's men. When Mūsā had taken the field against the Khārijīs, al-Muhtadī began to incite the people against him and his brother Muhammad b. Bogha and accused them of embezzlement. Muhammad was brought to trial and put to death although al-Muhtadī had expressly guaranteed his pardon. The only course left for the caliph was to dispose of Mūsā if he wished to keep his throne. But his plan was betrayed; Mūsā advanced with superior forces and the caliph suffered a disastrous defeat. As he declined to abdicate, he was murdered in Radjab 256 (June 870) in horrible fashion.

MUHTASIB (A.), "censor", an officer appointed by the caliph or his wazir to see that the religious precepts of Islām are obeyed, to detect offences and punish offenders. His office was the *hishā*, and to it only men of good standing could, in theory, be appointed. Like all

Group of 29 seals accompanying the address to
Muhammad 'Ali Pasha by the principal religious
authorities in Mecca: the governor at the time,
the imams, khatibs, muftis of the four schools etc.
The text dated at the end of the month of Mu-
harram 1226 (Feb. 2: 1813) contains congratu-
lations on the occasion of the victory over the
Wahhābīs and expressions of gratitude for the
restoration of freedom of pilgrimage.

Ant. MUHR

*) slightly enlarged

Seals of various individuals, Ottoman,
Algerian and Hijarian
(beginning of the 19th century).

1. Giritli İbrahim Agha, *wakil* of Algiers at Chios. Document of 11 Muh. 1211 (July 17? 1796).
2. Emel Sultan, sister of Mahmud II. 11 Ram. 1222 (November 12? 1807).
3. Müsâ Paşa, *şâ'immaşâm* or grand vizier interim. 8 Shaw. 1222 (December 9, 1807).
4. Selim Thâbit, correspondent of Mehmed 'Ali at Constantinople, later his *kapı-bekyası*. 13 Saf. 1225 (March 20? 1810). Cf. N^o. 18.
5. Kâsim Agha, chief eunuch. 19 Rab. II 1225 (May 24, 1810).
6. Ghaliib, *Sherif* of Mecca. 20 Shaw. 1226 (November 7, 1811).
7. Kara Kichya, banker to Mehmed 'Ali at Constantinople (seal in Armenian characters). 21 Djum. II 1226 (July 13? 1811).
8. Mehmed 'Arif Efendi, former *sheikh-ul-islâm*. 9 Saf. 1227 (Feb. 21? 1812).
9. Mehmed Sa'id Khâlet, Minister of the Interior. 23 Djum. II 1227 (July 4? 1812).
10. Şâkir Ahmad, *şâ'immaşâm*. 28 Djum. II 1227 (July 8? 1812).
11. Mehmed Khusrav Paşa, *kapudan-paşa* (at this date). 15 Saf. 1228 (Feb. 17? 1813).
12. Tosun Ahmad Paşa, son of Mehmed 'Ali. 12 Muh. 1228 (Jan. 15? 1813).

holders of public office, he had to be a Muslim and free. Generally he was a *faḥḥ*, and in addition to his police functions he performed those of a magistrate. In some respects his duties were parallel with those of the *ḥāḥ*, but the muhtasib's jurisdiction was limited to matters connected with commercial transactions, defective weights and measures, fraudulent sales and non-payment of debts. Even in these matters he could hear only those cases in which the truth was not in doubt. As soon as evidence had to be sifted and oaths administered the muhtasib's jurisdiction ceased. As a censor he had power to enforce the law without first requiring complaint from an injured party. He had to see that in a place where Muslims lived they did not neglect to hold a Friday service in the mosque and that if they numbered forty or more they formed themselves into an organised community. But if the number was large and there were differences of opinion on the question of worshipping together, his authority might be dimmed, and it was not within his power to compel the attendance of the individual Muslim at the mosque unless he was a persistent defaulter. Even then the officer could do no more than admonish the delinquent. So far as the mosque was concerned the muhtasib could insist on the *ḥāḥ* and he could examine the *muḥaddithin* in the subject of the times lawful for the *ḥāḥ*. If a public mosque fell into disrepair, the muhtasib was charged with the duty of calling the attention of the authorities to the matter.

An important part of the muhtasib's duties was to see that the laws of the *ḥāḥ* were maintained. Persons breaking the fast of Ramadān, widows and divorced women who did not observe the *ḥāḥ* [q. v.] before remarriage, and other transgressors, were liable to have to make explanations before him. Public morals, further, came under his jurisdiction. He had to prevent men from consorting with women in public and from indulging openly in wine; also the playing of forbidden musical instruments came under his ban and he had to see that games and toys did not lead to offences against the *ḥāḥ*. However, he could not act on suspicion alone nor had he the right to go behind closed doors to pursue his investigations. His powers would appear to have been wider where the spiritual welfare of Muslims was concerned. Thus if a *faḥḥ* propounded views contrary to *iqmāḥ* [q. v.] it was the muhtasib's duty to admonish him and to report him to the sovereign if he persisted in preaching heretical doctrines. Also, if a person not a *faḥḥ* suddenly turned to the study of the *ḥāḥ*, the muhtasib had to make investigation in order to discover his motive and to prevent his misleading persons who might apply to him. Schools also had to be visited by the muhtasib, though not so much for the purpose of inspecting the character of the teaching as to ensure that teachers did not beat their pupils too severely (Maḥḥ, *Ḥāḥ*, I. 464). Other matters which came within his jurisdiction were concerned with public amenities rather than with morals or religious institutions. Thus, in towns where the source of drinking-water was fouled or no provision was made for poor wayfarers he could order the townsmen to rectify matters. He had to ensure that no house overlooked the women's quarters of another belonging to a Muslim and that no house had projecting rainpoets or drains leading on to the street to the inconvenience of

wayfarers, and finally that the *ḥāḥ* was kept clean and clear of obstacles to traffic.

AL-MUHYI. [See ALLĀH, b. 2.]

MUHYI 'L-DIN. [See IBN 'AL-'ARAB.]

MUHYI 'L-DIN MUHAMMAD (MEHMET) b. 'ALĀ' AL-DIN 'ALĀ' AL-DJAMĀLĪ, a Turkish theologian and historian of the time of Selīm I (1512-1520) and Salāmān I (1520-1566). His father was the famous mufti Zānallī 'Alī al-Djamālī, a grandson of Djamāl al-Din Mehmed of Ak Seral (hence the epithet Djamālī). He received his theological training first from his maternal grandfather, Husām-Zāde Efendi, then from his father 'Alā' al-Din and later from Mu'ayyad-Zāde Efendi. He worked as müderris in several medreses, in Constantinople at the Murād medrese and at the eight schools of the Fāṭih mosque and in Adrianople where he was also a mufti for a period. He died in retirement and was buried at Adrianople in 957 (1550); according to some, however, in 956 (1549).

His main importance lies in the fact that he edited the anonymous Ottoman chronicles, the *Tevārīḥ-i Alā' Oṭmān*, under the title *Tārīḥ-i Alā' Oṭmān*. These chronicles which run from the beginning of the Ottoman empire were continued by him down to 936 (1549) i. e. till shortly before his death.

Two versions of his *Chronicle* exist, both of which go back to him: 1. a shorter one to which corresponds the translation of the Beck manuscript by Gaudier-Spiegel: *Chronica oder Acta von der Türkischen Tyrannen herkommen vund geführte Krügen, aus Türckischer Sprachen verdeutschet. Vorhin nie in Druck gangen*, Frankfurt a/O. 1567; it was also published in Latin and German by Leunclavius: *Annales Sultanorum Othomanidarum a Turci sua lingua scripti*, Frankfurt 1588; 2nd edition with index and German transl.: *Neue Chronik Türkischer Nation von Türken selbst beschrieben*, Frankfurt a/Main 1590;

2. a longer version: the so-called Verantion *Chronicle* (Codex Verantianus), edited in Latin and German by Leunclavius: *Historiae Musulmanum Turcorum de monumentis ipsorum excerptae libri XVIII*, Frankfurt 1591. There were 18 books instead of the 30 planned. As early as 1590 the first three books were published in German at Frankfurt: *Neuer Muselmanischer Histori, Türkischer Nation, von ihrem Herkommen, Geschichte und Taten; drey Bücher, die ersten unter dreyszig*, followed by the complete German translation of the *Annales: Neuer Muselmanischer Histori Türkischer Nation*, Frankfurt a/M. 1595.

In addition to his chronicle, which exists only in manuscript (MSS. in Vienna, Munich, Berlin, Gotha, London, Constantinople etc.), Muhyi al-Din is also credited with poems in Turkish, Arabic and Persian (also extant in a manuscript) and a theological work.

(TH. MENZEL.)

MUHYI LĀRĪ (d. 933 = 1526–1527), a Persian writer, author of the famous *Futūḥ al-Farāman*, a poetical description of the two holy cities, Mecca and Medina, which also contains a full account of all the rites of the obligatory pilgrimage (*ḥajj*).

This book, written in 911 (1506) and dedicated to Muḥammad b. Mahmūd Shāh of Gujjarāt (917–932 = 1511–1526), was for a long time wrongly attributed to the celebrated poet ‘Abd al-Rahmān Djamī. Muhyi Lārī was a pupil of the great philosopher Muḥammad al-Dawānī (d. 907 = 1501) and made use of his extensive philosophical knowledge in a commentary on the great *Kāfiya* of Ibn al-Fārīd, which is known as *al-Tāṭīya al-kubrā*. In this work he endeavoured, following in the footsteps of his teacher, to reconcile the principles of orthodox Muḥammadian mysticism with the teachings of Aristotle in the form in which they were disseminated in the east.

AL-MU'ID. [See ALLĀH, b. 2.]

MU'IN AL-DIN SULAIMAN PARWANA,

vice-regent of the Saldjūq empire in Asia Minor after the Mongol invasion of that territory. His father Mahādihūb al-Dīn ‘Alī al-Dallāmī (in some sources, such as the *Ta’rīkh-i Gūzda*, Mu’īn al-Dīn is called ‘al-Kāshī’, which implies origin from Kāshān) had been a minister during the reign of Kaikhusraw II and had been able, after the battle of Kōse Dagħ (1243), to secure for a time the continuation of the Saldjūq dynasty in Asia Minor, by his intercession with the Mongol general Baidjū (Ibn Bibi, p. 243). His son Mu’īn al-Dīn Sulaimān soon rose to hold important offices and had been commander of Tokāt, and later of Tokāt and Erziğān, when, in 1256, he was promoted, by the favour of Baidjū, to the rank of *parwāna*. The title *parwāna* denoted a high administrative office (high chancellor) in the Saldjūq empire and is erroneously explained by the Persian dictionaries as a synonym of *farwān* (the word is fully discussed in the foot-note on p. 46 of Khalīl Edhem’s article in *T.O.E.M.*, vol. viii.; cf. also Huart, *Les Seldjūqs*, etc., i. 80). At the time indicated the three sons of Kaikhusraw were nominally reigning, but Mu’īn al-Dīn was already the real director of affairs. After Hülagū had appeared on the scene in 1260, the empire was divided into two parts,

of which Rukn al-Dīn Kildj Arslan got the eastern part with Parwāna as vizier at his side. The latter had also a family connection with the dynasty, for he was married to a daughter of Kaikhusraw II, while one of his own daughters became the wife of the Saldjūq Qhiyāth al-Dīn Mas‘ūd II. As vizier of Rukn al-Dīn he conquered Sinope (Sinūb) from the Greek emperor of Trebizond; the town was given to himself, and after his death some of his descendants continued to reign there (cf. Sinūb and Tewhīd, *Statūda Parwāna-Zādler*, in *T.O.E.M.*, 1st year, p. 203). In February 1265 Parwāna, warned that his sultan wanted to get rid of him, had him imprisoned and afterwards strangled at Ak-Seray. The two and a half years’ old son of Rukn al-Dīn, Qhiyāth al-Dīn Kaikhusraw, was set up as a puppet-king. During the following years, when Parwāna was, under the supervision of the Mongols, the real master in Eastern Anatolia, the wretched situation of the country induced many notable Turks to emigrate to Egypt, where they incited Sultān Baibars to a military expedition against the Mongol domination in their country. It is highly probable that Mu’īn al-Dīn Parwāna himself was secretly at the head of these negotiations. Baibars invaded Asia Minor, defeated a Mongol army at Albistān and occupied the town of Kaizeriye in April 1277. Here he waited for Parwāna to join him, but the latter had lost his confidence in the enterprise and fled to Tokāt with the young sultan. Baibars returned again to Syria and soon a Mongol army appeared under the Ilkhān Abaka to inflict drastic punishment on the Muslim population; he is said to have killed over 200,000 people. At the same time suspicion fell on Parwāna. He was accused of having fled with his army at the battle of Albistān, of having not appeared before the Ilkhān after the defeat, and of having neglected to inform the Mongols of Baibars’ approach. At first Abaka was willing to spare him, but on the insistence of the relatives of those killed in the battle of Albistān, he ordered him to be executed at Ala Dagħ, together with his retainers, probably on the 1st Rabi’ I 676 (August 2, 1277). Ala Dagħ is, according to Khalīl Edhem, probably the same as Kōse Dagħ, to the east of Siwas. His burial place is not known. A foundation inscription on a mosque built by Mu’īn al-Dīn Parwāna in 663 (1264–1265) is still extant in Marāṣfūn. His death inspired several poets to make elegies on him (Munaddijim Bāshī). From the tradition of the Mawlawī order it appears that Parwāna was on intimate terms with Djalāl al-Dīn Rūmī; the latter’s work *Fihrist al-fihrist* was dedicated to him (cf. Kropulnik-Zāde M. Fu’ād, *Ilk Muteawwif*, p. 258).

(J. H. KRAMERS)

MULIN AL-MISKIN whose full name was Mu'in al-Din MUHAMMAD AMIN b. HADJOT MUHAMMAD AL-FARUKI AL-HARAWI and whose *laqab* was MURMI (d. 907 = 1501—1502), a celebrated traditionalist. He studied *Hadith* for 31 years and throughout this period preached every Friday in the great mosque of Herāt. He was for a year *khāṭib* of Herāt but gave up the post by his own request. In 866 (1461—1462) at the request of a friend, he began to write a little book on the life of the Prophet Muhammad. Out of this little book there grew in time the great biographical work, exceedingly popular in the East, called *Ma'arifi al-Nubuwwa fi Madarifi al-Farwāna*, which was not finished till 891 (1486) and contains a very full account of the life of the Prophet consisting of a *Muḥadditha*, four books and a *Ḥikāma*. Besides this gigantic work Mu'in also wrote a commentary on the *Kur'ān* entitled *Bahr al-Durra* and a collection of forty *hadiths*, *Rawḍat al-Wāṭi'a*. His study of the history of the prophets produced a large history of Moses entitled *Mu'jizat-i Mūsā* (also called *Tārīkh-i Mūsā* or *Kiṣṣa-yi Mūsā*), which was completed in 904 (1498—1499), and the story of Yusuf and Zulaikha, *Aḡṣan al-Kiṣṣat*.

Mus.*, I, 149; *Hadith al-Sayr*, Bombay, III/III, 348; text of the *Ma'arifi al-Nubuwwa* lithographed Lucknow 1292. A Turkish translation by Ali Fakrak (d. 1033 = 1624) entitled *Dalā'il al-Nubuwwa fi Muḥammadi* printed in Constantinople 1257. A manuscript of the *Tārīkh-i Mūsā* in the India Office, N° 2029. A manuscript of the *Aḡṣan al-Kiṣṣat* in the Bodleian (Elliott, N° 409). (E. BERTHELS)

AL-MU'IZZ. [See ALLAH, II.]

AL-MU'IZZ b. BADIS. [See ZIRIDS.]

MU'IZZ AL-DAWLA, ABU 'L-HUSAIN AHMAD b. ABU SHURAYK, a Būyid, was born in 303 (915/916). After the taking of Shiraz by the Būyids he brought Kirmān under his rule in 324 (935—936). When the rebel governor of al-Ahwāz, al-Bārīdī (q. v.), after several unsuccessful encounters with Badīkem (q. v.), the general of the Abbāsid caliph, sought the help of the Būyid 'Imād al-Dawla, the latter sent his brother Ahmad against al-Ahwāz with an army; Badīkem was defeated first at Armodjān and then at Askar Mukrim (326 = 938), whereupon Ahmad took this town, but when he demanded upon Ahmad for the help he had given that al-Bārīdī should help the Būyid Rukn al-Dawla against Waḡmīr, the brother of Mardawīdī (q. v.), al-Bārīdī refused and went to Basra. After Ahmad had received reinforcements from 'Imād al-Dawla, he was able to take al-Ahwāz. In 333 (943—944) he undertook a campaign against Wāsiṭ while the Amir al-Umarā', the Turkish chief Turun, was involved in a war with the Hamdānid of al-Mawṣil.

Turun hurriedly made peace and set out against Ahmad, and the two armies met in Jih 'l-Ka'da of this year (July 944). The details are variously given; it is certain at least that Ahmad soon afterwards returned to al-Ahwāz. At the end of Raddāb of the following year (middle of March 945), he made a further attempt to take the town but had to withdraw the next month on the approach of Turun. In 334 (945) he attacked Wāsiṭ for a third time; its governor had gone over to his side and the town surrendered without a blow being struck; he then marched against Baghdad and in Jumādī I 334 (December 945) entered the capital where he at once seized the power. The caliph al-Mustakfi appointed him Amir al-Umarā' and gave him the title Mu'izz al-Dawla but was deposed and blinded a few weeks later because he was alleged to be dealing with the enemies of the Būyids. Mu'izz al-Dawla was soon afterwards attacked by the Hamdānid Nāṣir al-Dawla of al-Mawṣil, who advanced on Baghdad along with Abū Dja'far b. Shīrīn and very quickly occupied the eastern part of the capital. Nāṣir al-Dawla was not driven back till Muharram of the following year (Aug. 946) when he made peace with the Būyids but without consulting his Turkish allies. The latter were angered at this and turned against him. Nāṣir al-Dawla had to flee and only succeeded in bringing the Turis to terms with the help of the Būyids; he then returned to al-Mawṣil as a vassal of the Būyids. Abū 'l-Kāsim, son and successor of al-Bārīdī, was the next to be dealt with. Mu'izz al-Dawla sent an army against him which put his forces to flight and in 336 (947) he took the field in person. Abū 'l-Kāsim fled to the Karmāniyas of al-Bahraïn and Mu'izz al-Dawla occupied Basra. Abū 'l-Kāsim's governor 'Imrān b. Shāḥīn however held out in al-Djāmīda, the capital of the Euphrates territory between Wāsiṭ and Basra, and after several years fighting Mu'izz al-Dawla had to confirm him in his governorship. In 337 (948—949) Mu'izz al-Dawla undertook a campaign against al-Mawṣil because Nāṣir al-Dawla did not send the tribute imposed on him. The latter fled to Nāḡīn, but when Rukn al-Dawla, brother of Mu'izz al-Dawla, was attacked by the Samāniids, Mu'izz al-Dawla had to send him help and concluded peace with the Hamdānids. In 347 (958—959) Nāṣir al-Dawla rebelled again but on the approach of Mu'izz al-Dawla he left al-Mawṣil and went first of all to Nāḡīn and then to Haleb to his brother Saif al-Dawla, while Mu'izz al-Dawla advanced on al-Mawṣil and took this town and also Nāḡīn. Through the intervention of Saif al-Dawla however peace was made (Muharram 348 = March—April 959). In the last year of his life Mu'izz al-Dawla had to fight the Karmāniyas and 'Imrān b. Shāḥīn. The former acknowledged his suzerainty; the war against the latter was interrupted by the death of Mu'izz al-Dawla on 13th or 17th Rabi' II 356 (March 28 or April 1, 967).

AL-MU'IZZ LI-DIN ALLAH, AND TAMIM MA'ADD b. ISMA'IL AL-MANSHUR, fourth Fātimid caliph, was born at Mahdiyya on 11th Rāmādān 319 (28th Sept. 931), proclaimed heir-apparent in 341 (952—953), and succeeded to the throne in Shawwāl of the same year (March 953). His first object was to restore the Fātimid power, which had been reestablished in Ifrīkiya by his father, over the remaining provinces of the Maghrib. In 342 he led in person an army of Kitāma into the Awrās mountains and not only reduced the turbulent tribes of that region for the first time, but also received the formal submission of the chiefs of Zenāta and of the ruling princes of the west. The hostility and intrigues, however, of the Umayyad ruler of Spain, 'Abd al-Rahmān III [q. v.], maintained a situation of unrest in the Maghrib, and after ineffectual naval raids on both sides, al-Mu'izz despatched thither in 347 (958) a strong force under the command of his freedman and *katib* Djawhar al-Rūmī [q. v.]. Tahart and Sijilmāsa were captured with little difficulty, Fas surrendered after an obstinate siege of eleven months in Rāmādān 348, and the other strongholds in the Maghrib were occupied, with the exception of Salā and Sabta, which were held for 'Abd al-Rahmān. Although the results of this campaign in the western Maghrib were ephemeral, the establishment of the *Sanhādji* chief Ziri b. Manāf at Tahart placed an effective check upon the Zenāta of the Central Maghrib. There can be no doubt that al-Mu'izz was already contemplating the conquest not only of Egypt and Syria, but also of Baghdād, using for this purpose the Kitāma, as the 'Abbāsids had used the army of Khurāsān, while the *Sanhādji* should hold North-west Africa for him, and with this end in view he actively pursued a policy of conciliation of these tribes by lavish gifts and the abolition of financial exactions.

Though this ambition was no secret, it is represented in the official correspondence of al-Mu'izz as subsidiary to his desire (which was probably sincere) to assume the leadership in the *ghilāt* against the encroaching Greeks. Already in 350 (961) the Cretans, besieged by Nikephoros Phokas, and despairing of assistance from Kāfir, had solicited his aid. In spite of the victory claimed for al-Mu'izz by Ibn al-Athīr (viii. 404), it appears that he was unable to send assistance in time, but he seized the opportunity to denounce the treaty made with the Emperor Constantine VII in 956, and opened a fresh attack in Sicily. Taormina was captured in 351 (962), and an expeditionary force sent from Constantinople was severely defeated both on land and sea, the general Manuel Phokas being killed, and the commander Niketas taken prisoner.

In the same year (355 = 966) al-Mu'izz began his preparations for the advance on Egypt, by ordering wells to be dug along the route. His relations with Kāfir at this time are obscure. Fātimid emissaries had long been engaged in active propaganda in Egypt, and had evidently made some headway, aided by the resentment of the population against the Shādai troops, who were fanatical Sunnis. Their propaganda was indulgently regarded by Kāfir, and it is not impossible that, as the Fāti-

mid writers claim, he privily declared his adhesion to al-Mu'izz. His death on 21st Djumādā II, 357 (24th May 968) gave the signal for the advance of the Fātimid army, said to have been over 100,000 strong, which set off under the command of Djawhar on 14th Rabi' I, 358 (6th Feb. 969), with the support of a naval squadron. The disorganization which prevailed in Egypt and the terror inspired by the Greek armies (who in 968 had swept over the whole of northern Syria without meeting opposition and had taken immense numbers of prisoners), contributed greatly to the prospects of its success; moreover, many of the Egyptian notables and even of the troops had sent letters to al-Mu'izz inviting his intervention. On Djawhar's approach the population made their submission by an embassy of notables, but the Ikhshidī and Tulūnī regiments rejected the conditions laid down in the agreement, and had to be forcibly dislodged from their positions at Dīza and on the islands. The retreating Mamlūks split up into bands, some of which continued to give Djawhar much trouble as local centres of disaffection, ending only with the arrest and deportation to Africa of their commanders, and the disarmament or imprisonment of the remainder.

Djawhar, having entered Fustāt on 17th Shabān 358 (7th July 969) and laid the foundations of the new city of al-Kāhira, immediately took in hand the reform of the administration. Complete religious toleration was promised, and confirmed by the reinstatement of the existing officials, weekly sessions for the hearing of *ma'ālīm* were instituted, several vexatious taxes were abolished and property which had been illegally sequestered to the Treasury was restored to its owners, and regular salaries were assigned to the officers of the mosques. Another of his reforms, however, caused great resentment; this was the striking of a new coinage to replace the existing debased coinage, and the order to levy all taxes in the new currency. His difficulties were increased by a prolonged famine and by the turbulence of the Berber soldiery, and it was not until the arrival in Egypt of al-Mu'izz himself in Rāmādān 362 (June 973) that the task of reorganization was completed by centralizing the financial administration under Ya'qūb b. Kilīs [q. v.] and 'Aḥmad b. al-Ḥasan, and by the removal of the Berber troops to a new camp near Heliopolis.

The course of events in Syria after the occupation of Egypt is differently related and obscure in detail. Djawhar's lieutenant Dja'far b. Falāḥ defeated the joint forces of the Ikhshidids and Karmaṭians under al-Ḥasan (in some sources al-Ḥusayn) b. 'Ubayd Allāh b. Tughdī at Ramla in the early months of 359 (970), but the general disorganization and the licence of the Arab tribesmen preventing him from entering Damascus until Dhu 'l-Hijja of the same year. Shortly afterwards he detached some contingents against the Greeks, but the troops sent to recover Antioch were defeated near Iskandarīya, or, according to Yahyā b. Sa'īd (ed. Cheikh, p. 139), were recalled after besieging the city for five months. Meanwhile the Karmaṭian general al-Ḥasan b. Ahmad al-A'sam (in some versions al-Aghshām), in revenge, it is said (but see de Goeje, *Les Carmathes du Bahrein*, p. 181—190), for the stoppage of the subsidy he had received from the Ikhshidid al-Ḥasan, opened negotiations with the Buwāhid 'Izz al-Dīn and

the Ḥamdānīd amir of al-Mawṣil, and with the aid of subsidies from them and some Ikhshīdī contingents, defeated and killed Dja'far and recaptured Damascus in Dhū l-Ka'da 360 (Aug.-Sept. 971). Having shut up the remaining Egyptian forces in Yāfa, he marched on Cairo, but was defeated by Djawhar in Rabi' I 361 (Dec. 971), and his fleet was destroyed at Tinnis. The Karmāṭians retained their hold on Damascus, however, repulsed a strong Maghribī force despatched to Palestine by Djawhar in Ramaḍān 361, and with an army of Arab auxiliaries and Ikhshīdīs (some sources also add Dailamīs) made a second descent upon Egypt after the arrival of al-Mu'izz. By bribing the Arabs, the Caliph succeeded in dividing and defeating the Karmāṭian army outside Cairo in Ramaḍān 363 (May-June 964), but not before Karmāṭian forces had overrun both the Delta and the Sa'id. On al-Ḥasan's return to al-Aḥṣā' the 'Uqallīd Zālim b. Mawḥib occupied Damascus on behalf of al-Mu'izz, but came into conflict with the Maghribī troops, whose indiscipline and excesses at length led the citizens to appeal to the Turkish general al-Aḥṣā'ī, who remained in possession of the city until he was captured by al-'Aziz [q.v.]. Meanwhile in northern Syria the Fāṭimid troops gained a series of striking successes against the Greeks. Tripoli and Bairūt were captured in 364 (975), and John Zimiskēs suffered a crushing defeat both on land and sea at the hands of Rāyān, governor of Tripoli, on his attempt to recover the city.

The empire which al-Mu'izz bequeathed to his successor, though it fell short of his ambitions, was still of imposing extent. The viceroy to whom he had committed the western provinces, Bulukkin b. Ziri [q.v.], proved both loyal and capable; when, on the departure of the Caliph, the Zenāta again rose in revolt, he scattered their forces and recaptured Tāhart and Tilmisān. The holy cities of Mecca and Madīna acknowledged the suzerainty of the Fāṭimids, and they had a powerful following in Sind. Only in Syria had the Karmāṭians, on whose cooperation al-Mu'izz had confidently relied (though the letter reproduced by al-Makrīzī, *Itihāz*, ed. Banz, p. 133 *sqq.* is of doubtful genuineness), brought him to a halt, but by this action they had placed a fatal obstacle in his way. This disappointment preyed on his mind and, worn out by ill-health and by grief at the loss of his eldest son 'Abd Allāh (died 364), he died at Cairo on 11th Rabi' II, 365 (Dec. 19, 975), having nominated as his successor his second son Nizār al-'Aziz.

The personal character of al-Mu'izz was singularly noble, frank, accessible, simple in his habits, endowed with brilliant gifts and all the traditional qualities of *ālim*, he was at the same time a capable administrator and just towards his subjects, though the financial exactions of his last years left a bitter memory. No instance of cruelty is recorded of him, except the execution of his Karmāṭian captives, and he was completely devoid of religious fanaticism.

Bibliography: The fullest accounts are those of al-Makrīzī, *Itihāz* (ed. Banz, p. 59—143), and the *Ḍū' l-Idris* b. al-Ḥasan (*Uyūn al-Akhbār*, vol. vi), both of whom utilized the biography by Ibn Zūlsik (d. 387), and the latter also the works of the Kāḍī al-Na'mān b. Muḥammad (d. 363). Additional details are furnished by Ibn al-Athīr (vol. viii.), whose chronology

is at variance with earlier sources; Ibn Taghribirdī, ed. Juynboll, ii. 398—494; Ibn al-Kāṭib, ed. Amedroz, p. 1—14; Ibn Mayassar, ed. Mas'ūd, p. 43—47; al-Kindī, ed. Guent, Supplement, p. 584—589; Ibn 'Adhārī, ed. Douy, i. 229—237; Yahyā b. Sa'īd, ed. Cheikh, p. 129—146, 295—296; Ibn Zāfir, MS. Brit. Mus., Or. 3685, fol. 47^h—50^h; al-Dhahabī, *Tārīkh*, MS. Brit. Mus., Or. 48, fol. 92—93, sub 365 A.H.; and the *Dirwān* of Ibn Ḥanī al-Andalus, ed. Baillif 1326, in addition to the references quoted in the text. — European works include, besides the general histories of Egypt by Wustefeld and Lane-Poole, a study by Quatremère, *La Vie du Khalife Mo'izz-din-Ali* (*J. A. R.*, ser. iii., vols. 2, 3).

(H. A. R. GIBB)

MU'IZZ, AMIR ABU 'ABD ALLAH MUHAMMAD b. 'ABD AL-MALIK, one of the most famous of Persian court poets. His place of birth is not exactly known. According to most of the sources he was born in Samarqand about 440 (1048—1049) but Nāsī and Nishāpur are also mentioned. The son of a little known poet 'Abd al-Malik Burhānī, who was attached to the court of the Saljuq Alp Arslān (1063—1072), he was introduced to Sulṭān Malik-Shāh (1072—1092) by Amīr 'Alī b. Farāmūr, ruler of Yezd (445—488 = 1051/1502—1095), made a favourable impression on the sulṭān and received from him the *iqbal* of Malik-Shāh, Mu'izz al-Dīn. He enjoyed even greater distinction under the last great Saljuq ruler Sandjar (1118—1157) and was appointed his *malik al-shu'arā'* and the head of a regular establishment of poets, said to have numbered 400. He is reputed to have become fabulously wealthy from the splendid gifts of the ruler and he received a salary paid out of the revenues of Isfahān. Nevertheless he continually tried to increase his fortune and, as he himself tells us, never wrote a single panegyric without making certain in advance that his work would be well paid. According to the Oriental sources, he came to a tragic end, being accidentally killed by Sulṭān Sandjar, while practising archery in his tent. This is not possible however, as Mu'izz himself mentions this incident in his *Dirwān* and says that, although he suffered a long illness as a result of being struck by the arrow, he completely recovered in the end. This event took place in Marw, about 496 (1102—1103), but he lived for another 46 years and died there in 542 (1147—1148). There is an elegy written on the occasion of his death in the *Dirwān* of Maḥdī al-Dīn Sanā'ī. Mu'izz is one of the most brilliant writers of *ghazals* in the old Gharnawīd style ('Unsurī) but his art was finally displaced by Anwārī's new style and came to be forgotten.

Brown, *A Literary History of Persia*, ii. 327—330; *Ḥabīb al-Siyar*, ii. 4, 103; *Muḥimad al-Fayyāz*, i. 571; Rieu, ii. 552. A longish monograph on the poet by 'Alī Ridā Khurawānī Turfā in the monthly *Armaghān*, iv. 529. A good MS. of the *Dirwān* in the Leningrad University Library, N^o. 939; C. Salemann, *Zafar*, ii. (1888), p. 253. (E. BERTHELE)

MUḤABALA, Gr. *ἀντιπρῶτος*, in the *Almagest* *ἀντιπρῶτος*, Lat. *oppositio*, the term in astronomy for the opposition of a planet and the sun or of two planets with one another. In opposition the

difference in longitude between the two heavenly bodies is 180° ; while the modern use is to take no note of the deviations of latitude from the ecliptic, al-Battānī expressly emphasises (*Opus astronomicum*, ed. Nallino, iii. 196) that we can only have the true mukābala when both bodies are either in the ecliptic itself or are in equal ecliptical latitudes when opposed: in other words when they are diametrically opposite one another in the heavens (cf. "ἀντιμεση"). Opposition with the sun can only occur for the moon and the outer planets (in ancient astronomy only for Mars, Jupiter and Saturn), not for the two inner ones, Mercury and Venus. When an outer planet is in opposition to the sun, its conditions of visibility are at their best; at midnight it passes through the meridian and is above the horizon the whole night. When the moon is in opposition to the sun we have the full moon; the usual technical expression for this in Arabic astronomy is *al-istihāl* which is derived from the same root as *mukābala* (Greek δ *πασιδωρε*) and is rendered by Plato Tiburtinus and other mediaeval translators by *peractio*; but we not uncommonly find the general term mukābala applied to the opposition of sun and moon, while on the other hand we never find *al-istihāl* used in the general sense of opposition of the planets (cf. al-Battānī, ii. 349, s. v. *al-istihāl*).

Al-mukābala, opposition, forms along with *al-tarḥīl*, quadrature (Gr. *τετραγωνία*, Lat. *tetragonum, quadratum*), *al-tathlith*, trigon (Gr. *τριγωνία*, Lat. *trigonum, triangulum, trigonum, aspectus trinus*), and *al-tasdiq*, hexagon (Gr. *ἑξάγων*, Lat. *hexagonum, sexangulum, aspectus sextilis*), the four astrological aspects (*ḥakāḥ*, 3d. *ḥakāḥ*, Gr. *εἰρημονία, εὐχρημασία, εὐχρημασία*, also *ἁρμονία*, Lat. *aspectus or consonantia*), which are applied to the ecliptical differences in longitude of two planets to the amount of 180° , 90° , 120° or 60° respectively. The *ḥakāḥ* also play a part in the astrological arrangement of the signs of the zodiac (*ḥurūf*) (cf. the article *MINTAḤA* and al-Battānī, iii. 194). It should be noted that the conjunction of planets (*mukābala*, Greek *συνωδία*; for moon with sun (new moon) always *idḥimā*) is not included among the *ḥakāḥ*, nor the position when the difference of latitude is 30° or 150° (cf. al-Battānī, *op. cit.*).

In horoscopes mukābala and *tarḥīl* are as a rule regarded as unfavourable in principle, *tathlith* and *tasdiq* on the other hand as favourable.

(WILLY HARTNER)

MUKADDAM (a.). "placed in front". Applied to persons the word means the chief, the one in command, e.g. of a body of troops or of a ship (captain). Dozy, *Suppl.*, s. v., gives a number of police appointments which have this name. In the dervish orders the word is used for the head of the order or the head of a monastery.

As a neuter noun the word is a technical term in logic and arithmetic. In logic it means the protasis in a premise in the form of a conditional sentence, e.g. "If the sun rises (it becomes day)", where this whole sentence is to be regarded as premise of a syllogism. But as every sentence can be a premise, mukāddam is really identical with the condition in the conditional sentence. In

arithmetic mukāddam means the first of two numbers in a proportion, i.e. 3 (5) or in other words the divided in a simple division. — In logic and in arithmetic the portion following the mukāddam (in brackets above) is called *tail*.

Bibliography: Dozy (cf. above) and other dictionaries; Thorning, *Beiträge zur Kenntnis der isl. Wissenschaften* (*Türk. Bibl.*, xvi.), p. 106; *Dict. of Technical Terms*, ed. Sprenger, p. 1215, 1362.

(M. FLEISSNER)

AL-MUKADDASĪ, SHAMĪ AL-DĪN ABU 'ABD ALLĀH MUḤAMMAD B. AḤMAD B. AḤI BAKR AL-BANNA' AL-SHA'AMĪ AL-MUKADDASĪ AL-MA'RUḤ BI 'L-BASHSHĀRĪ as he is called on the first page of the Berlin manuscript (Cat. Ahlwardt, N^o 6034), is the author of the most original and at the same time one of the most valuable geographical treatises in Arabic literature. The name-form al-Mukaddasī, denoting his origin from Jerusalem, goes back to Sprenger, who brought the Berlin manuscript from India and made this author first known in Europe (A. Sprenger, *Die Post- und Reiseverhältnisse des Orients*, Leipzig 1864, p. xviii.), but the form al-Makḍisī is probably more correct as Jerusalem is commonly spelt al-Bait al-Makḍis (Yāqūt, *Muḥarrar*, iv. 590). Yāqūt always quotes him as al-Bashshārī.

Biographical dates on the life of this author are only to be found in the text of his treatise. In 356 (966), when he was at Mecca, he was about twenty years of age; it is probable that he lived at least as late as 1000, as the last datable information in the treatise belongs to the end of the 10th (xth) century. His grandfather Abū Bakr al-Banna' was an architect in Palestine and had made for Ibn Tūlūn the gates of the town of 'Akka. His mother's family was originally from Ḥayr in Kūmis, from where his grandfather Abū 'I-Tayyib b. al-Shawā (in *B.G.A.*, iv., p. vii., l. 12 "paternus" is to be corrected into "materous") emigrated to Jerusalem. Muḥammad b. Aḥmad himself shows also a good knowledge of architecture, besides a good literary and general erudition.

The geographical treatise is known from two old manuscripts, which form the basis of de Goeje's edition in the *B.G.A.*, iii., Leyden 1877 and of his revised edition of 1906. The Berlin manuscript has the title *Aḥsan al-Taḥḍīr fī Ma'rifat al-Aḥḍāt*, while the Constantinople manuscript (Aya Sofia, N^o 2971 *ḥi*; cf. Ritter, in *Hz.*, xix. 43), written in 658 (1260), is only indicated as *Kitāb al-Aḥḍāt*. The Leyden manuscript (Cat., v. 191) is a modern copy of the Constantinople one, while another Berlin manuscript (Cat. Ahlwardt, N^o 6033) is a bad copy of the other Berlin manuscript. The date of composition is not certain. The text itself states that it was completed in 375 (985) (*B.G.A.*, iii. 9), but as has been said, information of a later date has been added, while Yāqūt (i. 653) gives the year 378 (988). The manuscript (Constantinople) is somewhat less extensive than Berlin) and de Goeje, hesitatingly, considers the redaction of C as the older one. It is dedicated to a certain Abū 'I-Ḥasan 'Alī b. al-Ḥasan and mentions the Sāmānids as the most important dynasty; B, on the contrary, does not contain the dedication and is more orientated towards the Fātimids.

The general scope of the work proves beyond doubt that it is based on the same geographical tradition as the treatises connected with the names

al-Balkhī — al-Iṣṭakhrī — Ibn Hawqāl; the same is proved by the fact that the maps accompanying both manuscripts show the still rather primitive type of the Iṣṭakhrī maps (the Maḳḍisī maps have been published by K. Miller, in *Mappe Arabicae*, vol. I.—v., Stuttgart 1926—1931). In this last respect al-Maḳḍisī's work does not really reflect the considerable progress of geographical knowledge that is manifested in the text. As in the texts of al-Iṣṭakhrī and Ibn Hawqāl the object is to treat only the Islamic world (*mamlakat al-Islām*) of the 10th (11th) century and that after a division into regions (*asṣulḥa*) which, on the whole, is the same as that of the two authors mentioned; the order is not always the same, but the distinction between western and eastern regions is maintained. The treatment is often more detailed than with the earlier authors, while the disposition of the geographical matter is the same, each region ending with a survey of the distances between the different towns. In how far al-Maḳḍisī is dependent on al-Iṣṭakhrī and Ibn Hawqāl remains to be examined. His introductory chapters show not a few original features and are especially valuable for information about earlier geographical authors. As de Goeje has already remarked, this information is more accurate in the redaction C than in B; if the latter redaction is really later it would seem that the rather depreciating judgment he gives therein of al-Balkhī, al-Djāhizī and others (p. 4) must be explained by the change of the author's political predilection in favour of the Fātimids and occidental Islam. Al-Maḳḍisī's style and language is sometimes difficult, owing to his expressly stated endeavour to adapt himself in the description of each region to the special idiom used in that region. Moreover, the reading of his text is several times made unpleasant by the boisterous way in which the author speaks of the merits of his work.

A English translation of part of the treatise was published by G. S. A. Ranking and R. F. Azzū in the *Bibliotheca Indica*, Calcutta 1897—1910, vol. I.—IV.

Bibliography: The author and the work are discussed by de Goeje in the introduction to vol. IV. of the *B.G.A.*, p. vi.—viii; further cf. Brockelmann, *G.A.L.*, I.

(J. H. KRAMERS)

AL-MUKADDIM. (See AL-ḤAM, II.)

MUKALLĀ (MAKALLA), a seaport on the south coast of Arabia, $2\frac{1}{2}$ miles N. W. of the cape of the same name. The town lies between two bays at the foot of a reddish limestone cliff, which rises to a height of 300 feet behind the town; four towers for the defence of the town are built upon it. On the west side a wall runs from the cliff to the shore with only one gate in it. The only buildings of any size are the great mosque on the coast with a minaret which can be seen from a great distance, and the sultan's palace; the other buildings are mainly huts with a few houses of stone. The palace is a great six-storey building with decorated windows which stands on a kind of peninsula. In the centre of the town is a large cemetery with the tomb of Walī Ya'qūb; in the modern western part of the town is the bazaar which is provided with all kinds of goods and has some modest industries which provide the native population with baskets, pipes of a kind of limestone, silver powder-horns and muskets without stocks. There is a yard in the harbour

where the native sailing-boats are built. The country around is not fertile; a mile to the west however is an oasis belonging to the ruler, which is watered by a stream which also provides the town's water supply. The climate of Mukallā is very dry, the coast hot; only from October to April and in June and July do fresh breezes and showers temper the heat. The population varies between 6,000 and 12,000.

Mukallā is the only place between 'Aden and Maṣṣā that deserves the name of harbour. It cannot however be used as an anchorage during the southwest monsoon; in this period its place is taken by Burūm, 16 miles southwest. The trade with India, Somaliland, the Red Sea and Maṣṣā is considerable. The exports are mainly gum arabic, skins, honey from the Yaghboom valley, senna and some coffee; the imports are cotton goods, metals, pottery from Bombay, dates and dried fruits from Maṣṣā, coffee from 'Aden, sheep, aloes and frankincense from the African coast. The fisheries also give a considerable yield while amber is obtained in considerable quantities. Paras and bananas from Bombay play a leading part in the trade and Hindustānī is spoken almost as much as Arabic. Since 1881 Mukallā has been under the al-Qa'itī dynasty with which England concluded a treaty granting a protectorate on May 1, 1888. According to Ibn al-Muḍāwir, the old name of the town was al-Mukannā, and the natives also call al-Mukallā, like al-Shīr, Bender al-Aḥḳāf or Sūḳ al-Aḥḳāf. The port has steamship communication with 'Aden; most of the traffic is borne by native sailing-boats of 100—300 tons, which are busiest at the time of the date harvest.

(ADOLF GROHMANN)

AL-MUKALLAD b. AL-MUSA'IB, HUSAM AL-DAWLĀ ABU HASSAN, an 'Uḳailid. After the death in 386 (996) or 387 (997) of the 'Uḳailid emir Abū 'I-Ḥawwāl Muḥammad b. al-Musa'ib (cf. BAḤĀ' AL-DAWLĀ), a quarrel arose between his brothers, 'Alī and al-Mukallad, each of whom claimed power. 'Alī was the elder; but al-Mukallad wrote to Baḥā' al-Dawlā and promised him an annual tribute and then told his brother that Baḥā' al-Dawlā had appointed him governor of al-Mawṣil and asked 'Alī's help to take the town. Baḥā' al-Dawlā's general in al-Mawṣil, Abū Dja'far al-Ḥadī

djadj, took to flight and the two brothers agreed to share the government. Disputes between al-Mukallad's representative in Baghdad and Baha' al-Dawla's officials gradually led to open hostilities. A reconciliation was soon brought about and al-Mukallad promised to pay 10,000 dinars and in return received the title Husam al-Dawla with al-Mawwil, al-Kufa al-Kasr and al-Djamilin as a fief. In 387 (997) he took 'Ali prisoner. As a result the third brother advanced with a strong army against al-Mukallad; before they came to blows however, their sister Kahila succeeded in making peace among the brothers. 'Ali was released and received his confiscated property back and al-Mukallad turned his attention to the lord of Wasit, 'Ali b. Mazyad, who was on the side of 'Ali and Hasan. But when al-Mukallad learned that 'Ali had designs on al-Mawwil, he turned back but through the intermediary of Hasan, the two brothers were again reconciled. Soon afterwards 'Ali and Hasan left al-Mawwil. After long negotiations, it was agreed that 'Ali should be al-Mukallad's representative in al-Mawwil whenever the latter had to leave the town. On 'Ali's death in 390 (999—1000), Hasan succeeded to his privileges but was driven out by al-Mukallad and had to take refuge in the Irak. In Safar 391 (Dec. 1000—Jan. 1001) al-Mukallad was murdered in al-Anhar by a Turkish Mamlik.

(K. V. ZETTERSTEN)

MUKAN (Mughan), a steppe lying to the south of the lower course of the Araxes, one part of which (about 5,000 square kilometres) belongs to Russia (U. S. S. R.) and the other (50—70 × c. 50 kilometres) to Persia. The steppe which covers what was once the bottom of the sea has been formed by the alluvial deposits from the Kur (in Russian Koara) and its tributary the Araxes. (The latter has several times changed its course and one of its arms flows directly into the gulf of Khali-Aghal). In the interior the only water in Mughan is from a number of springs, but it is covered with reeds and shows traces of the old system of irrigation. Mughan has a very mild climate in winter (Kazwini calls it *qurum Adhar-kudjun*) and in the spring is covered with a rich carpet of verdure but in summer the heat makes it a regular hell and it is infested with snakes (Monteith says, "in June the snakes literally covered the ground"; cf. Abu Hamid al-Gharasi in Kazwini, p. 379).

The name. The old Arabic transcription (Baladhuri, Tabari) is Mukan (without article) but quite early in certain manuscripts of the Arab geographers we find Mughan (probably a popular etymology *mughan* "magi") which becomes general in the Mongol period. Markwart, *Z.D.M.G.*, 1895, p. 633 connects the name of Mukan with that of the people mentioned by classical writers as inhabiting this region: Hecataeus, fragment 170: *in Mucis* etc. *Apollon*; Pomponius Mela, book iii, ch. v: "Mochi (*ad Hyrcanium fretum Albani et Moschi et Hyrcani*)". This tribe is to be connected with the Caspians who lived in this region; cf. Hübschmann, *Die altarm. Ortsnamen*, 1904, p. 269; cf. in Yakut, iv. 676 the genealogy in-

vented by Ibn al-Kalbi, according to which Mukan and Djilan — both inhabitants of Tabaristan — were the sons of Kamshah (?) b. Yafith b. Nuh; cf. Genesis x.). The Chronicle of Theophanes, p. 363, has *Βουζαία* (var. *Βουζαία*), the Armenian geography Mukan, the Georgian chronicle Mowkan (another Mowahan lay near the confluence of the Alazn with the Iora).

History. The Byzantine general Leontius in 678 subdued Iberia, Albania, Bukaria (cf. above) and Media. The district of Mukan was conquered in 21 (642) by an officer of Surakha Bukair who addressed a letter guaranteeing peace to "the people of Mukan of the mountains of al-Kabdi" (Caucasus; Tabari, i. 2666). According to Baladhuri, p. 327—329, in 25 (645) Walid b. 'Ukba undertook a campaign against the people of Mukan (*ahl Mughan*), of al-Bahr (cf. *Tahom*) and al-Tailasin (= Talish). Another campaign of Sa'id b. 'Asi against the people of Mukan and Djilan, although successful, entailed severe losses. According to Ya'qubi, ed. Houtsma, ii. 395, 397 in 123 the future Caliph Marwan II b. Muhammad undertook a campaign in Djilan and Mukan. Mukan figures several times as a stronghold of Bishak (Tah., iii. 1174, 1178). In the third (ninth) century Ibn Khurdadbeh, p. 119, mentions one Shakhla (?) as chief of Mukan. According to al-Mas'udi, *Murudj*, ii. 5, in his time the Sharwan (cf. *sharwan*) had conquered the states (*malak*) of Layran (several variants) and al-Mukaniya. It appears from Ibn Miskawaihi (ed. Margoliouth, i. 399) who mentions the isphahad of Mukan b. Dullia as ally of the Gil chief Lashkar b. Mardī, who rebelled against the Dailamis in 326 (937), that Mukan enjoyed a certain degree of autonomy. In 339 (950) the Kurd Daisam sent his vizier "into the mountains (sic!) of Mukan to entrench himself". In 349 Mukan appears as a centre of rebellion (Ibn Miskawaihi, ii. 136, 178—179). The poet Kapan mentions the rising of the isphahad of Mukan against the Rawwadi Walsudan (344—378; cf. Kierawi, *Fadl al-Shihab-i gumnam*, Tihān 1929, ii. 94). Later we hear of Mukan mainly as an excellent area for the winter pasturage of the conquering nomads. In Yakut's (iv. 676) time the majority of the people of Mukan were still Turkomans. In the history of the Khwarizmshah Jalal al-Din, Mukan is constantly mentioned. The sulhan sends his booty there, keeps his baggage and mobilises his troops there (Nasawi, *Sira*, p. 210, 280, 366 etc.). But in 617 (1220—1221) the Mongol generals Djobe and Subutay spent the winter in Mukan (Djuwaini, i. 116), and Kazwini, p. 379 says that Mongols took Mughan for their winter pastures and drove out the Turkomans. In the time of Timur, Mukan must have been included in the region of Katabagh where this conqueror liked so much to pass the winter. During the winter of 804 (1401) Timur restored an old canal which was given the name of his tribe Barlas. The canal left the Araxes at Kaghk-i Chogahr and at a distance of 10 farsakhs ended at Sardja-pil (hel?). Since, in order to give the necessary instructions, Timur (who was to the north of the Araxes) had to cross the river (*Zafar-nama*, ii. 395), we may suppose that the canal lay to the south of the Araxes, i. e. in the steppe of Mughan. It must correspond to the Vagin G'aur arghl of which traces can still be seen for a length of about 35 miles. Sardja-pil may correspond to *Čarfeli* on the Russian map (according

to the involved description by Monteith, the Barlas canal issued in the neighbourhood of Kara-su (?). The canal is in any case quite distinct from another canal which Timur traced in 806 to the north of the Araxes towards the town of Bailākan (*Jafar-nūma*, ii. 543).

In the Salawid period (and perhaps already under the Karakoyunlu) Mughān became the possession of the Shā'ī Turkoman tribes who formed the principal support of the dynasty and became known as Shāhsewān (q.v.). By article ii. of the treaty of Gūlistān of 1813 the steppe of Mughān was divided between Russia and Persia. The boundary line was more precisely defined in article iv. of the treaty of Türkmenčai (q.v.). In 1884 Russia forbade Persian nomads to cross into Russian territory. Towards the end of the sixteenth century the project of irrigating the land of Mughān was conceived and realised between 1902 and 1907. The four systems of canals were to make 200,000 hectares cultivable, particularly for cotton. From 1884 the steppe was occupied solely by nomads who were Russian subjects. But in 1917 there were already 46 Russian villages with 17,000 inhabitants while the Turkish nomads who had become settled on the banks of the Kur and of the Araxes numbered 30,000 souls. As a result of the tragic events of 1918, the whole Russian population had to leave Mughān and the canals became silted up. Between 1920 and 1924 the work of restoration was carried out and the fugitives began to return. The total area of irrigated land in Mughān is estimated at 253,000 hectares, while immediately to the north of Mughān the steppe of Mil (from *Mil-i Bailākan*, 'the tower of Bailākan'; cf. Khanikow, *Mém. sur les inscriptions musulm. au Caucase*, 16 J.A., Aug. 1882, p. 72) has another 165,000 irrigated hectares.

Historical geography. The Arab geographers are fairly well acquainted with Mughān (cf. the *Bibliography*). In the Mongol period, Mughān must have comprised all the lands to the north of the Salawid range (which is a western outlier of Russian Tālish and forms the watershed between the middle course of the Kara-su and the Bolgaru), to the east of the lower course of the Kara-su (where it follows the northern direction) and to the south of the Araxes. Towards the east Mughān stretched to the Caspian Sea and included the coastal region of Russian Tālish. The mountainous part of the latter, held as in a vice, must also have belonged to Mughān. The same condition must have existed in the Arab period for the curious expression of Ibn Miskawaihi, ii. 126 referring to the *Dihāl Mughān* can only refer to the mountainous part of Russian Tālish.

We may note Mukaddasi's remark (p. 380) who among other wonders mentions, one *mashala* (7—8 *farsakhs* = 20—25 miles) distant from Mughān, an imposing fortress called al-Ḥara (?) below which are houses and palaces in which there are large quantities of gold (*ḡhakah 'ajim*) in the form of birds and wild beasts and 'many kings made plans to seize it but never succeeded in reaching it'. Mukaddasi does not definitely say that the fortress belongs to Mughān and evidently speaks of it by hearsay. Is this a reference to Shindān-kal'a (which is about 50 miles = 2 *mashala* to the south of the presumed site of the *ghakristān* of Mughān)? On this imposing mountain (6,000 feet high) can still be seen ruins

of important fortifications (Radde, p. 135: 'ruins of a strong castle... many ruins of brick buildings'). Finally in a Persian translation of Istakhrī, p. 186, we read: 'The Gils and the Mughān are tribes on foot who rarely go on horseback' which can only refer to a few remnants of the old population settled in upper Tālish (where the highlanders are very distinct from the lowlanders).

AL-MUĠĀNTARĀT. [See *ASṬURĀT*.]

MUĠĀTIL b. SULAIMĀN b. BAHIR AL-AZHI AL-KHURĀSĀNI AL-BALĠHĪ, ABU 'L-HASAN, traditionist and commentator on the Kur'ān, was born in Balḡh and lived in Marw, Baghdād and Bayra, where he died in 150 (767); there is also a reference to a stay in Bāḡit. Of his life we know almost nothing apart from a few details for his judgment as a traditionist. The name of his wife Umm Abi 'Isma Nāh b. Abi Maryam has been preserved. According to Ibn Duraid, he was one of the *muwaffi* of the Banū Asad. He is sometimes quoted as MuĠātil b. Djāwād dūs or Dawāl dūs. Ibn Hajar, *Lihā al-Miṣnā*, expressly states in contradiction of wrong ideas that this is our MuĠātil and that Dawāl dūs is not a *lokal* of MuĠātil himself but of his father.

MuĠātil's prestige as a traditionist is not very great; he is reproached with not being accurate with the *sunna*. His exegesis enjoys even less confidence. The biographers vie with one another in telling stories which illustrate his mendacity and particularly his professing to know everything. Contempt is poured on his memory by stories of ludicrous questions which were put to him about the most impossible things and to which he either gave fantastic answers or could make no reply. It is in keeping with this profession of universal knowledge that the sources are unanimous in talking of his extreme anthropomorphism (*taḥakkuk*).

It did little to help his fame also that he is said to have told pious stories [cf. 933a] in the mosque, at a time when this was strictly forbidden. In politics he is said to have belonged to the Zaidiya, in theology to the Murdī'a [q. v.].

Muḥatīl's literary activity was somewhat comprehensive, yet until quite recently nothing was known of his works. Only since 1912 has a Ḥurān commentary by him been known in the MS. Or. 5333 of the British Museum, the genuineness of which however Goldziher did not think beyond doubt. The *Fihrist* gives a list of his works; Ḥādīdī Khālifa also gives some of them. They deal mainly with the language and exegesis of the Ḥurān; but a pamphlet against the Ḥadariya is also mentioned. This is however hardly in keeping with another story, according to which he wrote a pamphlet against Ḍahm [q. v.] and the latter wrote against him.

(M. PLESSNER)

AL-MUḤATTAM, the part of the range of hills west of the Nile, which lies immediately to the east of Cairo and from which the mountains take a north-easterly direction, bordering the Nile delta to the south-east. It reaches a height of about 600 feet and consists, as does the greater part of the north African mountains, of limestone (cf. *Description de l'Égypte, État moderne*, Paris 1822, II/II. 751).

The name Muḥattam (the *Tibī al-ʿArīṣ* records also the popular form al-Muḥattab) does not go back to a pre-Muhammadan nomenclature, nor is it considered, in spite of its correct Arabic formation, as a true Arabic word, for the geographers (cf. Yāqūt, iv. 607 sq.) give, hesitatingly, different explanations of its meaning. The name occurs for the first time in the historical tradition of the Egyptian Arabs, as found in the *Futūḥ Miṣr* of Ibn ʿAbd al-Ḥakam (cf. Torrey's edition, New Haven 1899, p. 156 sq.), in half legendary tales in which also al-Muḥawḳas [q. v.] plays a part. Some of these traditions give it an eponymous hero, Muḥattam b. Miṣr b. Baṣar b. Ḥam, or lay stress on the special sanctity of the mountain, declaring that, in some way, it is connected with the mountain of Jerusalem. As in the last mentioned traditions Kaʿb al-Aḥbār [q. v.] is named as final authority, it seems probable that the origin of the name must be sought in Jewish legendary traditions (for Jewish traditions about mountains, cf. the *Midrash Thillim* on Psalm lxxviii. 17) and that the name has been fixed only in course of time on the ill-defined mountainous region to which it is attached since the flourishing times of al-Faṣṭāt and al-Ḳāhira. The vagueness of the geographical definition has survived in the Arabic geographical sources, which either call Muḥattam the entire eastern mountain range as far as Uṣwān (Yāqūt), or even represent under the name Muḥattam the whole of the mountain system that

runs over the inhabited world from China to the Atlantic Ocean (Ibn Ḥawḳal and others). Moreover several geographers give the legendary statement that in the Muḥattam are mines of emerald and other precious stones, while in reality it contains only stone quarries, but these were used already in very ancient times. Maḡristī, *Āḥṣāʾ*, ed. Bullūḡ, i. 123 gives a fairly complete survey of the different traditions and opinions.

It may be thus assumed that the Muḥattam acquired a real geographical identity only after the foundation of al-Faṣṭāt. Its geographical situation, viz. its proximity to the bank of the Nile, has deeply influenced the territorial expansion of this town and later of Cairo [q. v.]. Parts of the town and famous sites are situated on the western spurs of al-Muḥattam, such as the mosque of Ibn Tūlūn and the citadel of Saladin. The elevation of Ibn Tūlūn's mosque bears, however, the special name of Ḍjabal Yaḥḳur. The cemetery of al-Ḳarāfa belongs likewise to the Muḥattam and it is with this cemetery that are connected the ancient traditions already mentioned, in which al-Muḥawḳas plays a part; al-Muḥawḳas informs ʿAmr b. al-ʿĀs that the mountain, instead of earthly vegetation, is destined to bear the plants of Paradise and the caliph ʿUmar, informed by ʿAmr, decides that by these plants of Paradise can only be meant Muslims who have died. Accordingly, tradition records a number of *ṣāḥib* who are buried in al-Ḳarāfa. On the summit of al-Muḥattam was built in the Fātimid period the mosque of al-Djuyūṣḥī, by Badr al-Djamālī in 478 (1085); for this reason the mountain is also called Ḍjabal al-Djuyūṣḥī. On the southern slopes, towards Ḥulwān, lay the Christian monastery Daīr al-Ḳusair (description by al-Shabūṣṭī towards 1000; cf. Sachau, in *Abh. Pre. Ak. Wiss.*, 1909). A historical, or perhaps legendary feature, connected with al-Muḥattam is that the Fātimid caliph al-Ḥakīm is said to have disappeared mysteriously, in the night of 27th Shawwāl 411 (Feb. 23, 1021), when he had gone for a ride in the Muḥattam. — Finally it may be mentioned that the Muḥattam has given its name to one of the large modern Arabic newspapers published at Cairo.

(J. H. KRAMERS)

AL-MUḤAWḲAS, AL-MUḤAWḲIS, the individual who in Arab tradition plays the leading part on the side of the Copts and Greeks at the conquest of Egypt. The Prophet is said to have sent a letter to him in the year 6 A. H. In the address on this letter, the text of which is given in Ibn ʿAbd al-Ḥakam (ed. Torrey, p. 46), al-Maḡristī (*Āḥṣāʾ*, i. 29), al-Suyūṭī (*Ḥuṣn al-Muṣṭafāra*, i. 58) and al-Manṣūf (p. 29), as well as in an entirely different version in Pseudo-Wāḳidī (p. 10), and also in the accounts of the incident in the Arab historians, the position of Muḥawḳas is described in the following phrases:

1. *Ṣāḥib al-Iḥkandariya* (Nawawī, p. 577; Ibn ʿAbd al-Ḥakam, p. 45, 52; Abū Ṣāliḥ, p. 38 [100]; Ibn Kathīr, iii. fol. 159r, along with N^o. 7 in Ibn Saʿd in Wellhausen, *Seignen und Vorarbeiten*, iv. 3 [99]);
2. *Malik al-Iḥkandariya* (Ibn ʿAbd al-Ḥakam, p. 49; al-Suyūṭī, i. 60; Pseudo-Wāḳidī, p. 25; Ibn Ḥishām, p. 971);
3. *Ṣāḥib Miṣr* (Abū l-Fidaʾ, i. 149);
4. *Malik Miṣr* (al-Manṣūf, p. 7; cf. al-Maḡristī, *Āḥṣāʾ*, i. 163, ss. 14);
5. *Malik Miṣr wa l-Iḥkandariya* (Pseudo-Wāḳidī, p. 10);
6. *Ṣāḥib Miṣr wa l-Iḥkandariya* (Pseudo-Wāḳidī,

p. 10); 7. *ʿAlīm al-Kubrī* (Ibn ʿAbd al-Hakam, p. 46, 47; al-Makrīzī, *Khitaṭ*, i. 29, 12; 161; al-Suyūṭī, i. 58; al-Manāfi, p. 29; al-Tabarī, i. 1575; al-Masʿūdī, *Tanbih*, p. 261, 2 along with i. q. v.).

All these epithets no doubt mean simply the actual ruling authority in Egypt, whose true title was not known to the Arabs. If we remember that in the year 6 (628) the Persians were masters of Egypt, we can hardly give much credence to the story of the Arab historians. This is evident from the statement recorded by Manāfi (p. 30) that Egypt was under the rule of Mukawkiṣ continuously from the lifetime of the Prophet, through the caliphate of Abū Bakr to the beginning of the caliphate of ʿOmar. Muhammad's letter to Mukawkiṣ was long ago declared not to be genuine by E. Amélineau (*Fragments inédits*, p. 392) and Wellhausen (*Skizzen und Vorarbeiten*, iv. 90) although they did not doubt the fact of the embassy to him; later Butler (*Conquest*, p. 522) and Th. Nöldeke (*Z. D. M. G.*, xlviii. 160) still believed in the embassy although the latter granted the possibility that tradition might have transferred the name known from the time of the conquest to the man to whom Muhammad sent gifts, while for example S. Lane-Poole (*Egypt in the Middle Ages*, p. 6, note 2) supposes that the Mukawkiṣ of 628 and the Mukawkiṣ of the conquest are two different people. This suggestion however is disposed of by the fact that the Mukawkiṣ of the letter is called in Ibn Kathīr *مينا ابن جريح* (in Abu ʿl-Fidaʾ

the patronymic has been corrupted through *مينا*

to *مينا*; Nawawī only gives *Djuraidd*, i.e. the same as the Mukawkiṣ of the conquest, for we need not heed the patronymic of Mukawkiṣ given by Pseudo-Wāḥidī (p. 10) (*ابن راعي*), while the epithet al-Farkab al-Nūṣī, which al-Masʿūdī, *Tanbih*, p. 261, 2 has taken in an obviously corrupt form from an old source, is the Ibn Qurqub al-Yūnānī of the Mukawkiṣ of the conquest. In view of the many serious contradictions, which the transposing of Mukawkiṣ into the period of Persian rule in Egypt offers, there is no alternative but to regard with Cantani, *Annali dell' Islam*, iv. 90 the story of Muhammad's embassy to Mukawkiṣ as legendary and devoid of any historical value (cf. also G. Rouillard, p. 187 and note 2). The genuineness of the parchment found in a monastery at Akhmīm by the French Egyptologist E. Barthélemy in 1852, which was thought to be the original of Muhammad's letter to Mukawkiṣ and was actually put among the relics of the Prophet in the old Scroll, thus disappears (cf. the publication by Helin, in *J. A.*, 1854, p. 482—518 and Djirdjī Zaidan, in *Hisb*, xiii. 2, 1904, p. 103 19). Its falsity had already been recognised by J. Karabacek (*Beiträge zur Geschichte der Masʿūditen*, Leipzig 1874, p. 35, note 47 and *Mittelungen der K. K. Österreich. Akademie*, xix. [1884], p. 183) (cf. also Nöldeke-Schwally, *Geschichte der Korān*, i., Leipzig 1909, p. 190). As a matter of fact palaeographical grounds are clearly against any assumption of a date in the first century for this document.

The same discrepancies, which we find in the transmission of the name and title of the Mukawkiṣ of Muhammad's letter are found in the Mukawkiṣ of the conquest. In the historians we find the following names:

1. *Djuraidd* b. Minā (Abū Sāliḥ, p. 30 [81], 101 [230]); 2. *Djuraidd* b. Minā b. Qurqub (Ibn ʿAbd al-Hakam, p. 64, note 9; Ibn Ḥadjar, *Isāha*, iii. 1090); 3. Ibn Qurqub or Ibn Karqab (al-Kindī, p. 8; al-Makrīzī, *Khitaṭ*, i. 289, 27; Ibn Taghribirdī, i. 9; Yāqūt, *Muʿjam*, iii. 894, 14).

Taking first of all the name of his grandfather, J. v. Karabacek's endeavour (p. 2) to dispose of apparent contradictions in the statements about the patronymic by assuming a double name *Minā Farqab* proves unnecessary, when we see the name unequivocally given in N^o. 2. When Karabacek (p. 3) preferred the reading *Farqab* for *Qurqub*, he was at least able to quote the form *قرقب* in the Codex Parisinus of Ibn Taghribirdī, but I cannot agree with Amélineau in supporting Karabacek's proposal (*Fragments*, p. 394 17.) to equate this name with Παρκάβος, especially if we remember the variant *قرقب* of the *Isāha*, and Nöldeke must be right when he (*Z. D. M. G.*, xlviii. 161) restores this to the Περκαβος rejected by Karabacek. The form *قرقب* (unpointed however) has however so far been found in only one papyrus, the more usual form being *قرقيميوس* (*Z. D. M. G.*, i. 158). Butler's conjecture (p. 523) on the name *قرقب* seems to me as improbable as Karabacek's identification. He calls attention to Abū Sāliḥ's observation (p. 67 [156]) that *قرقب* is a corruption of Gregorios and supposes that Karqab is a corruption of Qurqar so that Ibn Karqab would be an error for Ibn Karqar and mean "son of Gregory". Casanova's proposal (in Butler, p. 523) must be dismissed as still more improbable, viz., that Ibn Karqab is a corruption of Abū Kirmā. The office filled by Mukawkiṣ is described by the sources in the following terms:

1. *Ṣāliḥ Miqr* (al-Balādhuri, p. 226); 2. *Malik ʿalā Miqr* (al-Makrīzī, *Khitaṭ*, i. 163, 20 19; Ibn Duqmāq, v. 118); 3. *Amir al-Kubrī bi-Miqr* (Ibn Ḥadjar, iii. 1090); 4. *ʿAmīl ʿalā Miqr* (Ibn ʿAbd al-Hakam, p. 64, note 9; al-Makrīzī, p. 29); 5. *ʿAmīl ʿalā ʿl-Kharāj bi-Miqr* (Eutychius, ii. 302). If the three first terms only mean the ruler of Egypt in general, the two last named limit the sphere of activity of Mukawkiṣ to the administration of taxation and the expression given in 4 may be taken as synonymous with *amir* "governor". In this connection we have the very clear evidence of Ilm ʿAbd al-Hakam, p. 37 and Ibn Duqmāq, v. 119 who preserve the statement that Mukawkiṣ was appointed by the emperor Heraclius as governor of Egypt and entrusted with the waging of war and the levying of taxation. Abū Sāliḥ's statement (p. 30 [81 19]) that Mukawkiṣ *Djuraidd* b. Minā had rented the taxes of Egypt from Heraclius for 18,000,000 dinārs fits in with this. This makes intelligible the statement of Eutychius (ii. 302) who calls Mukawkiṣ controller of the land taxes (*ʿAmīl al-Kharāj*) and traces his attitude to the Arabs to his embezzling the taxes raised, and further explains the description of Mukawkiṣ (ΠΡΑΥΧΙΟΣ) as ΤΑΞΙΑΡΧΗΣ ΕΞΗ ΝΑΝ-ΛΩΣΙΟΝ ΠΤΕΧΩΡΑ ΗΚΗΛΕ in the *Vita* of Apa Samuel published by Amélineau (p. 367), to which we may add the statement of the Ethiopic Synaxar that Mukawkiṣ had been Patriarch and financial controller of Egypt.

M. J. de Goeje and J. v. Karabacek have laid special stress on this side of the activity of Mukawkis and identified the prefect George mentioned in John of Nikiu (p. 559), whom de Goeje regards as prefect of Lower Egypt and Karabacek (p. 8) as pagarch of Babylon, with Mukawkis who is called in the sources George son of Menas. A. J. Butler (note 4 to Abu Salih, p. 81), Milne and Laun-Poole have followed de Goeje while Amélineau (*Fragments coptes*, p. 404; *Samuel de Qalamon*, p. 24 and *Résumé de l'histoire de l'Égypte*, p. 243) wished to identify Mukawkis with the Patriarch George who was appointed by the emperor Heraclius as successor or deputy to Cyrus during the period of the latter's stay in Constantinople (cf. John of Nikiu, p. 574).

In contrast to these attempts at identification, which are in more than one respect in contradiction to the sources, the most probable solution of the Mukawkis problem is the identification of Mukawkis with the Patriarch and governor Cyrus of Phasis, who was sent in the year 631 A. D. by Heraclius to Alexandria where he died on March 21, 642. While Zotenberg (in his edition of John of Nikiu, p. 576, note 2) had already pointed out that the main features of the activity of Cyrus are found in the Arabic stories of Mukawkis, although no doubt the legend mixes up the activities of several individuals under this name, F. M. Esteves Pereira, (*Vita do Abba Samuel*, p. 41—53) completely proved the identity of the two. Independently J. Krall in an unpublished article for the *Mitteilungen aus der Sammlung des Papyrus Erkerung Rainer*, on the authority of three new fragments of the *Vita* of Apa Samuel, had come to the same conclusion. The full study of the whole problem by A. J. Butler, the main result of which, the identity of Mukawkis with the Patriarch Cyrus, has been adopted by B. Evetts (*Patrologia Orientalis*, i, 491, note 1), by M. Guidi in his doctoral thesis, C. H. Becker and O. Braun in his article *Cyrus* in the *Kirchliche Handlexicon*, ii, col. 530 and others, has been critically examined by L. Caetani (*Annali dell' Islam*, iv, 86 sqq.). The decisive evidence for the identity of the two individuals is found in the *History of the Patriarchs of Severus of Ashmūnain* (ed. Evetts, p. 490 sq.; ed. Seybold, p. 106 sq.) in which there are references to the Patriarch and governor of Heraclius in connection with the flight of the Patriarch Benjamin once as Cyrus (قبرس), then a few lines later as al-Mukawkas or al-Makawkas; the *synaxar* in this connection also give the name al-Makawkas (cf. E. Amélineau, *Fragments coptes*, S. 397, note 1; p. 398, note 1; p. 406, note 1 and the edition by R. Basset, *Patrologia Orientalis*, xi, 562) and the Arabic *Vita* of Benjamin (Amélineau, p. 400, note 1); of peculiar importance is the text edited in *R. O. C.*, xx, 393, where the combined names Cyrus al-Mukawkis appear. There is the additional fact that the period of ten years which, according to the history of the Patriarchs, lay between the flight and return of the Patriarch Benjamin coincides within a year with the period of office of Cyrus (631—642) in Egypt, whom the Christian sources describe as an "unbeliever" (πασεδνε, Amélineau, *Fragments coptes*, p. 364, 366; *kāfir* in Severus of Ashmūnain, p. 405 [108]), godless and sinful Kauchios (πικαρχιος πασεδνε ἀπαράδωκε, Vienna Coptic fragments of the *Vita* of Apa Samuel in Krall, Kauchios frequently in Amélineau), deceitful Antichrist (παντίχριστος ἀπιδανος in Amélineau, p. 366 sq.) and Pseudoarchiepiskopos (*ibid.*, p. 365). The double position of Cyrus or Mukawkas as supreme head of the administration and archbishop, of which we have ample evidence (cf. G. Rouillard, p. 230, note 2), and which is quite certain from the testimony of Severus (p. 490, 495 [106—108]) and the Arabic and Ethiopic *synaxar* (Amélineau, p. 496, note 1: *ويزير وبطريرك*, p. 399) and also by the *Vita* of Samuel (Amélineau, p. 367), was quite unknown to the Muslim Arabic sources. Nöldeke has already called attention to this remarkable fact (p. 160) and it remains a crux for the identification of the two figures. There was however no necessity for the Arabs to refer to his position in the church. He was only of importance to them as head of the administration. If one wants to, one can see an indication of his ecclesiastical dignity in the wish expressed by Mukawkis during the negotiations with 'Amr regarding the capitulation of Alexandria (in Ibn 'Abd al-Hakam, ed. Torrey, p. 72) that he might be buried in the Church of St. John (cf. thereon Amélineau, p. 400 sq.). How much the Christian sources differ in their ideas of the personality and position of Mukawkis may be gathered from the description of the death of Mukawkis. According to Severus of Ashmūnain (ed. Evetts, p. 495; Seybold p. 108), the governor and Patriarch of Alexandria poisoned himself after the occupation of Alexandria lest he should be put to death by 'Amr, while John of Nikiu (p. 335, 578) says that Cyrus weakened by vexation at the faithlessness of 'Amr caught dysentery and died. According to Caetani, the contradictions and obscurities on the part of the Arab historians show that they did not consider who Mukawkis exactly was, but simply used the name as the family name of the chief personage in Egypt at the time of the Muslim conquest. Evidently all who negotiated with 'Amr in the name of the Copts are included in one individual. The unanimity with which Mukawkis is described as a Copt and the different names given him suggests that Mukawkis conceals not only Cyrus but also other Egyptian negotiators — e. g. perhaps the commander of Babylon, George, and the bishop of the same town, Menas. The Arabs must have made one out of these two negotiators and given him like Cyrus the name Mukawkis. Of the attempts to explain this name, Karabacek's (p. 8) *μακωκας* is as little probable as Amélineau's explanation (p. 407—409) which makes Kauchios "the man from Kauchion". We would rather think with Butler and Guidi of a connection with *μακωκας*, which indicates the home of Cyrus. But even this explanation is by no means certain and the connection of Mukawkis with Cyrus has again (in Canterelli) given rise to serious doubts. Nau, p. 11 has compared Mukawkis with *μακας*. His name survived in the Kôm el-Mukawkis in the area of old Cairo (Ibn Duqmāq, iv, 53).

(A. GROHMANN)

MUKHADRAM (A.), the term applied to an individual whose life fell within the periods of both paganism and Islām. Various explanations are given of the origin of the name. Some derive it from *uḍḥan mukhadramu* "cropped ear" and say the meaning is that these people were cut off from the Dīḥiliya by Islām (cf. *nūḥa mukhadrama* "a she-camel with cropped ears"). It is said that the tribes who adopted Islām cropped the ears of their camels differently from what they had done in the pagan period. A man who had therefore seen both the pagan and Muslim styles was called *mukhadram*. Others derive the word from *mā' ḥidrim* "(a well) which contains much water" and explain that a man who has lived in both Dīḥiliya and Islām was called *mukhadram*, since he was fully acquainted with both periods. The term *mukhadram* is occasionally found with the same application and the explanation given is that the individuals had mixed paganism and Islām. Some commentators describe as *mukhadramūn* only those who adopted Islām after the death of Muḥammad.

The word *mukhadram* is particularly used to describe one of the four classes into which the Arab philologists divide the poets. It means those whose work was begun in the period of the Dīḥiliya but who lived to see Muḥammad and his mission and some even adopted Islām. Among these for example were Labīd, al-A'ḥḥā and Ka'b b. Zuhair. These poets are still completely immersed in the poetic tradition of the Dīḥiliya. The new outlook was late in finding its way into poetry so that the change is not yet reflected in the poets who were Muḥammad's contemporaries. The scheme of the *ḥasida* of the pagan poetry with its fixed themes and stereotyped images also holds for the *mukhadramūn* and in their poems one can hardly find the slightest hint that they were contemporary with the great religious change in Arabia. The only exception is the *ḥasida* composed in honour of Muḥammad, like the *ḥasida* of Ka'b b. Zuhair called after its opening words *Bismat Sa'ad* and the panegyric on the Prophet by al-A'ḥḥā. While these still follow the scheme of the *ḥasida* as regards form they reflect Muḥammadan points of view and legal ordinances and also use Qur'anic phrases.

(ILSE LICHTENSTÄDTER)

MUKHLIS AL-DAWLĀ. [See AL-MUKALLĀD.] **AL-MUKHTAR** R. ABI 'URĀID AL-THAKAFI, a Shi'a agitator who seized possession of Kūfa in 66 (685—686). The clan of Thakaf to which he belonged was the same as that of the poet Umalya b. Abi 'l-Salt [q. v.] and another poet, Abū

Mihdjan, was his second cousin (al-Mukhtār's grandfather Ma'ād being the son of 'Amr b. 'Umayr b. 'Awf; cf. Wüstenfeld, *Gen. Tab.*, G. 19). He is said to have been born in 622 (Tabari, i. 1264) a statement which has perhaps no real foundation (cf. Tabari, ii. 2: in 40, he was a "young man", *ghulām shabb*) and based on the fact that his adversary 'Abd Allāh b. al-Zubair was born in the same year. His father having died the death of a hero at the battle of the Bridge in 13 against the Persians, the orphan was brought up by his uncle Sa'd b. Ma'ād who became governor of al-Madīna under the caliph 'Alī. Al-Mukhtār was his deputy when Sa'd left al-Madīna to go after the Kharijites who had left 'Alī's camp in 37 (Tabari, i. 3366; al-Dinawari, p. 218). His early life and his family traditions therefore made him a partisan of 'Alī: al-Tabari (ii. 2) however says that when 'Alī's son al-Hasan took refuge with al-Mukhtār's uncle when fleeing from Mu'awiya in 40, the nephew proposed to surrender him to his rival and he was reproached with this disloyal act 25 years afterwards by the Shi'is. This is all we know of the early days of one who was destined to become the champion of the extreme Shi'is: his refusal to bear witness before Ziyād b. Abīhi against Hujr b. 'Adī, who was accused of having attempted an anti-Umayyad rising at Kūfa in 51 (Tabari, ii. 134), shows however that his feelings were already pro-Allid. It is only when, after the death of Mu'awiya, the hopes of the partisans of 'Alī's family began to rise again, that al-Mukhtār emerges from obscurity: he took part in the rising of Muslim b. 'Aqil in 61 and, imprisoned by the governor 'Ubayd Allāh b. Ziyād, he was only released after the failure of al-Hasan's attempt and returned to Mecca, where 'Abd Allāh b. al-Zubair was secretly engaged in preparing the movement which was to take him to the head of the anti-Umayyad rising. It is alleged that al-Mukhtār, after vainly trying to compromise Ibn al-Zubair prematurely, disappeared from Mecca for a whole year which he spent in his native town of al-Ta'if. It was no doubt in this period that the ideas ripened in him which made him the initiator and leader in a new political and religious phase of the Shi'a movement; but of the way in which his ideas came to him, their immediate origin and the influences which went to form them, history unfortunately knows nothing.

In any case, al-Mukhtār returned to al-Zubair, who had in the meanwhile been publicly recognised as caliph, and fought bravely at the first siege of Mecca in 64. But his adhesion to the cause of Ibn al-Zubair had no other object than to enable him to return to Kūfa which was then under the anti-Umayyad caliph. According to one source which is in contradiction to Tabari, al-Mukhtār was sent by al-Zubair himself to the capital of the 'Irāq to take charge of its administration, having promised him the support of the 'Alid party (al-Ma'ādī, *Mawā'id*, v. 70); it seems more probable that, as Tabari says, he went there of his own accord to carry out his plans for a Shi'a revival.

The Shi'is of Kūfa were at this time (Ramadān 64) under the influence of Sulaimān b. Surād [q. v.]. Al-Mukhtār did not wish to join his party and began propaganda of his own, saying he was the emissary of Muhammad, son of 'Alī called Ibn al-Hanafīya from the name of his mother's tribe

[cf. MUHAMMAD B. AL-HANAFIYA]. The motives which gave al-Mukhtār the idea that he could pass off as the legitimate successor to the rights of 'Alī, this son, who was not born of Fātima, the daughter of the Prophet, have not been fully explained; but as the other children of 'Alī who had escaped the massacre of Kerbela were quite incapable, al-Mukhtār's choice was limited. In any case, his fiery and peculiar eloquence (he pronounced his discourses in *saj'* with obscure phrases and expressions which recalled the Qur'an, without being a slavish imitation of it; he also said or allowed it to be said of him that he was inspired by the angel Gabriel) was able to gain partisans for the idea of the Mahdī whose imminent coming would restore the rule of the true religion. Without being yet openly hostile to the rule of Ibn al-Zubair, al-Mukhtār's attitude was suspected. He was therefore imprisoned by the Zubairid governor 'Abd Allāh b. Yazīd al-Anṣārī but his captivity was not rigorous and enabled him to remain in contact with the people of Kūfa. After the defeat and death of Sulaimān b. Surād, which he had predicted, he was set at liberty on guaranteeing he would not fight against the Zubairid government. Al-Mukhtār took advantage of the liberty restored to him to secure the cooperation of Ibrāhīm b. al-Aḥtar, son of 'Alī's famous general, who kept up his father's traditions. The latter hesitated long before accepting al-Mukhtār's proposals and only agreed on receiving a letter, undoubtedly a forgery, in which Ibn al-Hanafīya introduced al-Mukhtār to him as his plenipotentiary (*amīn*) and minister (*wasīr*).

The rising then began (14 Rabī' I 66): the resistance of the chiefs of the tribes (the *Ashraf*), who while opposed to the Umayyads and former fighters by the side of 'Alī, had long lost their enthusiasm for the cause of his family, was overcome by the onslaught of the troops, composed for the most part of adventurers and *muḥālī* led by Ibn al-Aḥtar, a most capable warrior. The Zubairid governor fled (he was at this time 'Abd Allāh b. Muḥ' al-Kurashī); the Ashraf capitulated and al-Mukhtār, undisputed lord of Kūfa, rapidly extended his power over Mesopotamia and the eastern provinces, to which he at once appointed governors: the south alone, with Basra, remained to Ibn al-Zubair.

Al-Mukhtār had naturally to give the Ashraf positions of authority in his organisation but he could not completely gain their confidence. Although old partisans of 'Alī, or sons of partisans, they were moderates who distrusted al-Mukhtār as an extremist and demagogue: indeed, the favour which the latter showed to the *muḥālī*, who formed his real support, threatened to overthrow the system on which the political and economic supremacy of the Arabs over the native population was based, for not even the conversion of the latter to Islam had made them equal to their conquerors. Al-Mukhtār therefore was faced with the necessity of deciding for one or other. He preferred the *muḥālī* party, probably more from genuine conviction than for political reasons: he must have believed that the triumph of the Mahdī whom he foretold would make all believers equal without distinction of race. During the absence of the army which had gone under Ibn al-Aḥtar to fight 'Abd al-Malik's troops, the Ashraf made an attempt to overthrow al-Mukhtār who was forced to temporize with them; but succeeding in informing Ibn al-

Ashtar of his difficulty, the latter returned to Kufa and completely routed the enemies of al-Mukhtar. This was the signal for putting into execution the latter's full Shi'a programme; all those who had taken part in the murder of al-Husain, or had neglected to defend him, were put to death. This bloody deed seemed to have divine approval, for two days later the Syrian army which had set out for the Iraq was completely routed on the banks of the Khazir by Ibn al-Ashtar, and its leader 'Ubad Allah b. Ziyad, who had defeated and killed al-Husain, was killed in the battle (Muharram 67). In the fanatical enthusiasm of these days in which the Shi'a cause seemed to have won a definite success there took place episodes of great religious interest although unfortunately not yet clearly explained, notably the worship of the empty chair (Tabari, ii. 702—706; cf. al-Mubarrad, *al-Kamil*, ed. Wright, p. 597—600).

But in spite of his successes at home and abroad, al-Mukhtar was threatened by the presence in Basra of the brother of 'Abd Allah b. al-Zubair, Mus'ab, whose army, organised by al-Muhallab b. Abi Sufra, hardened in the war with the Khazirids and strengthened by the accession of the Kufan Ashraf who had left the town, was one to be feared. Indeed, the Shi'a troops were defeated by it at al-Madhat on the Tigris; a little later at Harura they suffered a complete rout, mainly because of the absence of Ibn al-Ashtar who was in the north at al-Mawil and whom al-Mukhtar either through distrust of him or through excess of confidence in himself had neglected to recall. Al-Mukhtar who had taken refuge in the citadel of Kufa held out there valiantly for four months. Finally abandoned by most of his men, he was slain in a desperate sortie (Ramadan 14, 67). His body was mutilated, his hand suspended at the gate of the great mosque (and it was only taken down many years later by al-Hajjaj); one of his wives, who would not disown him, was executed in brutal fashion, although she was the daughter of al-Nu'man b. Bashir al-Ansari, who had been governor of Kufa under Mu'awiya. A great many of al-Mukhtar's followers were also massacred.

The nature of the movement led by al-Mukhtar has been variously judged by modern historians. The historical tradition which grew up in Kufa, especially in the milieu of the Ashraf, is naturally hostile and regards him as an adventurer and false prophet. His conduct was undoubtedly somewhat crooked occasionally; the way in which he exploited the name of Ibn al-Hanafiya (who never wished to be completely compromised in the business of the Mahdi) was not quite fair. But neither these doings nor his double dealing with regard to the Ashraf (they paid him back however only too well) are sufficient to convict him of bad faith. They were tactical expedients which every one who wants to stir the masses is justified in employing for the triumph of his cause. It seems certain that al-Mukhtar sincerely believed in his mission, and his equalitarian ideas about the *masad*, although premature, were, as the future was to show, the only ones which could secure to Islam its later expansion and transform it from the exclusively Arab movement it was at first into a world wide civilization. What is still and will remain mysterious in the personality of al-Mukhtar (Wellhausen rightly observes that "demoniac" natures like his are always problematic), is the

manner in which he arrived (no doubt through a crisis within himself) at the religious and eschatological conception of the Shi'a of which he was the creator and which is infinitely greater than the expiatory sacrifice of the *awwalin* of Sulaiman b. Surad. It is owing to this conception that the importance of the movement started by al-Mukhtar is far greater than the ephemeral political success which he enjoyed; in the popular enthusiasm which welcomed his propaganda we see the germs of the ideas which transformed the Shi'a from a political movement to a religious doctrine. In what measure these ideas were in existence before al-Mukhtar, in what relation they stood to that enigmatical personage 'Abd Allah b. Salim and his disciples are points that are still obscure. But if he was not the inventor of the doctrine of the Mahdi, it was undoubtedly he who in locating in a real person, Muhammad b. al-Hanafiya, the mystical figure of the Messiah, the restorer of the true religion, gave it the stamp which was henceforth typical of *imami* doctrines.

The name Mukhtariya is borne by one of the many Shi'a subdivisions given in the lists of the writers on heresies; but it is doubtful if it ever had a real existence as an organised sect, especially as the sources which mention it do not clearly distinguish it from the Kala'aniya [q.v.] and the Khazabiya [q.v.], which seem very likely to be the legitimate successors of the teachings of al-Mukhtar.

Bibliography: The principal and almost the only source for the history of al-Mukhtar is al-Tabari (ed. de Goeje), ii. 530—752 and *passim*, which is based for the most part on the statements of eye-witnesses of the events. The secondary sources add practically nothing new; they are quoted in Caefani, *Chronographia islamica*, 2. 64 § 13, 65 § 6, 66 §§ 5—7, 9—12, 67 §§ 2, 4, 42 (a few details also in the biography of Muhammad b. al-Hanafiya in Ibn Sa'd, v. 71—77); H. D. van Gelder, *Muhtār al-walī al-nabī*, Leyden 1888; J. Wellhausen, *Die religionsgeschichtliche Oppositionen im alten Islam* (Abh. G. W. Gott., N. S., v. 2, 1901), p. 74—89. Cf. also the bibliography given in the articles KALA'ANIYA and KHABABIYA (add al-Nawbakhti, *Firak al-Shi'a*, ed. Ritter [Bibl. Islamica, iv., 1931], p. 20—30). (G. LEVI DELLA VIDA)

MUKHTAR PASHA, GHANIM AHMAD, a Turkish general and statesman, was born in Sept. 1832, the son of a high official in Brusa, and received a military training there and in Constantinople (officer in 1854). He took part in the Crimean War, from 1860 taught in the Mekteb-i Harbiye as professor of the art of war and in 1865 was tutor to the prince Yusuf 'Izz al-Din. After holding a command in Albania (1867—1870) he distinguished himself under Redif Pasha in the Yaman campaign, the conduct of which he took over in 1871 as General of Division and Pasha. On his return he was given the title of *muhtār*. In the Herzegovina he was defeated in 1876 at the Duga Pass. After the declaration of war by Russia (April 24, 1877) he was given the supreme command on the Caucasus front, where after at first having to retire to Kopruköy, he counter-attacked at Dahar (June 21) and Ziwin (June 25) and forced the Russians under the Armenian generals Loris-Melikoff and Ter-Hugassoff, to evacuate Ottoman territory and occupied Sukhum.

Successes in August on the Yaghnī Dagh and at Kifl-Tepe (near Bash Gedikler) earned him the title of honour of *Qāsi* [q. v.] but did not prevent the collapse of the army in Oct.—Nov. [cf. DEWE BOYON, KARS and ERZERUM]. Appointed Commander-in-Chief of the Artillery, he restored peace in Crete in 1878; in 1879—1885 he served as commissioner on the Greek frontier. As a result of the Anglo-Turkish agreement of Oct. 24, 1885, he became the first High Commissioner of the Porte in Egypt, holding the post till 1906 and playing a part in the Taba affair. In this period he busied himself with the question of reforming the calendar; he advocated a uniform Hijra solar year for all Muslims (see *Bibl.*).

From Dec. 1908 Vice-President of the Ottoman Senate, he proposed in the National Assembly of April 27, 1909 to give prince Reşid the name Mehmed V in memory of the first conqueror (*Fatih*) of Constantinople [see MUHAMMAD II] (communication of 'Abd al-Rahmān Sharaf to Martin Hartmann); he himself led the deputation which announced his accession as Sultān-Caliph and brought him to the War Ministry to receive the oath of allegiance [cf. *Baṭā*]. On Oct. 14, 1911 he succeeded Sa'id Pasha [q. v.] as President of the Senate and on July 22, 1912 as grand-vizier in the cabinet of the "Great Ones" (*Buyukler*). Under pressure from the association of old-Turkish officers (*Akavutçular*) he persuaded the Senate on Aug. 4 by a bold interpretation of the constitution to declare the session of Parliament closed. He endeavoured to free the army and civil service from politics, obtained an amnesty for Albania, recalled Ahmad 'Izzet Pasha from the Yaman, instituted the Naval Medal and Medal of the Red Crescent, obtained favourable terms in the treaty of peace with Italy (Oct. 18, 1912) but could not avert the catastrophe in the Balkan War. On Oct. 29, 1912 he retired in favour of Kamil Pasha, but remained a member of the Senate till 1918, in which on Feb. 12, 1917 he advocated the adoption of the Gregorian calendar and rejection of the Christian reckoning for the financial year. He died on Jan. 21, 1919. Mahmūd Mukhtār Pasha is his son.

Bibliography: Général Izet-Fuad, *Autres Occasions perdues... Critique stratégique de la Campagne d'Asie Mineure 1877—1878*, Paris 1908 (Izzet-Fuad Pasha makes use of Mehmed 'Arif Bey's book *Bahmülâ Gelenler* which was inspired by Mukhtār Pasha); Ghazi Ahmed Moukhtar Pasha, *La Réforme du Calendrier* (transl. O. N. E.), Leyden 1893; Collection *Düstūr, Tertibi* (İkânî, vol. I, v. vii.; *Osmanischer Lloyd*, Constantinople 1908—1912 and other scattered sources. (G. JÄSCHKE).

MUKHTARĪ, SHARAF AL-DIN 'UHMĀN b. MUHAMMAD AL-MUKHTARĪ AL-GHAZNAWĪ, court poet of the later Ghaznavids Ibrāhīm b. Ma'ūd II (1059—1099) and Ma'ūd III b. Ibrāhīm (1099—1114). He lived for a considerable period in Kirmān, where he wrote panegyrics on the Saldjuk Arslān-Shāh b. Kirmānshāh (1101—1141). The great poet Majdī al-Din Sanā'ī showed him the greatest reverence and celebrated him in a long *ḥajda* as the best poet of his time. He could not have been Sanā'ī's teacher, as the Bankipore Catalogue (i. 32) says, since he must have been only a year or two older than Sanā'ī. His influence however is quite marked in many of Sanā'ī's

works. One of Mukhtārī's philosophical *ḥajdas* may be regarded as the one of the finest examples of the old Persian school of poetry since *naṭras* on it were written by the best poets such as Khāṣṣānī, Amīr Khusrāw, Alīrī Aḥṣakānī, 'Abd al-Rahmān Djāmi and Nawā'ī. His chief work is a large *Divān* of lyrics, the majority of which are panegyrics in the style of the old Ghaznavid poets like 'Unsuri and Farrukhī, and dedicated to Arslān-Shāh, Bahrām-Shāh, Adud al-Dawla Dailami, Tamghash-Khān and a number of viziers. Besides these *ḥajdas* there were in the *Divān* a few short *mathnawī's*, one of which of an astronomical nature seems to have had a great influence on later poetry. We should probably also ascribe to our poet the authorship of the *Shāhriyār-nāma*, an imitation of the *Shāh-nāma*, the hero of which is Shāhriyār son of Barīd son of Suhrah, i. e. a great-grandson of Rustam, and the action of which is laid in India. The poem is dedicated to Ma'ūd III in the preface the poet says that he has worked at it for three years and hoped for a present worthy of this labour. If he does not receive this gift however, he will not write a satire this; seems to be a direct reference to Firdawsi. The year of Mukhtārī's death is not exactly known, 530 (1135), 534 (1139), 544 (1149) and 554 (1159) are mentioned. The last date seems to be the right one.

Bibliography: H. Ethé, *Neupersische Literatur* (Gr. I. Ph., ii. 234, 250—257); Dawlatshāh, p. 93; *Majma' al-Fuṣūḥ*, i. 598—607. A manuscript of the *Shāhriyār-nāma* in Rieu, ii. 542. (E. BRÜHLER).

AL-MUKIT. [See ALLĀH, II.]

MUKRĀ, a district and village in the Yaman, a day's journey south of Sanā'. The Arab geographers mention a cornelian mine here. The name is also given to a mountain in the Yaman Sarāt. According to Sprenger, we cannot connect the Himyar tribe of this name with the *Moufira* of Ptolemy.

Bibliography: al-Hamīdānī, *Ṣifat Djāmi'at al-'Arab*, ed. D. H. Müller (Leyden 1884—1891), p. 68, 104 sq.; al-Mukāddasī, *B.G.A.*, iii. 91; al-Hamādānī, *B.G.A.*, v. 36; Ibn Khurdādhbih, vi. 141; al-Yā'qūbī, *B.G.A.*, vii. 319; Yāqūt, *Mu'jam*, ed. F. Wüstenfeld, iii. 130; iv. 437, 603; A. Sprenger, *Die alte Geographie Arabiens*, Bern 1875, p. 244. (A. GROHMANN).

MUKTADAB, name of the thirteenth metre in Arabic prosody, very little used; in theory it consists of three feet, with two successive *mustaf'ilun*, in each hemistich; but in practice it has only two.

There is one *'arūḍ* and one *ḡarḥ*:
maṣ'ūlātu mustaf'ilun: maṣ'ūlātu mustaf'ilun.
 However, *maṣ'ūlātū* should lose its *f* (*maṣ'ūlātu* = *faṣ'ūlātu*) or change its *ā* to *u*, which is very frequent (*maṣ'ūlātu* = *faṣ'ūlātu*).

Mustaf'ilun can never retain its *f* (*mustaf'ilun* = *muṣṭaf'ilun*). (MOH. BENCHENEN).

AL-MUKTADĪ BI-AMR; 'LLĀH, ABU 'L-KĀSHIM 'ABD ALLĀH b. MUHAMMAD, 'Abbāsīd caliph. His father was a son of the caliph al-Kā'im and his mother an Armenian slave girl named Urdjuwān. After the death of his grandfather al-Kā'im in Sha'ban 467 (April 1075), al-Muktadī succeeded him as caliph. The real ruler was the Saldjuk sultān Malikshāh [q. v.] to whose daughter al-Muktadī was married in 480 (1087). By 482 (1089) however, she had returned to her father because

she was neglected by the caliph. Malikshāh, who wished to prevent the caliph interfering in affairs of state, endeavoured to induce him to leave Baghdad and take up his residence in another town; this plan however came to nothing through the death of the sultan in Shawwāl 485 (Nov. 1092) and al-Muktadir was left in peace in the capital. About this time the power of the Saljuqs reached its greatest height and in all the lands conquered by them the spiritual supremacy of the caliph was recognised. Al-Muktadir died suddenly on 15th or 19th Muharram 487 (4th or 8th Feb. 1094) at the age of 38. He was perhaps poisoned by Malikshāh's son and successor, Barkiyārūk [q.v.] whom he had offended by confirming the selection of his minor brother Mahmūd as sultan.

AL-MUKTADIR. [See ALLAH, II.]

AL-MUKTADIR ibn 'alī, abu 'l-faḍl, dīnār FAR H. AHMAD, 'Abbasid caliph, son of al-Mu'tadid and a slave named Shaghāb. After the death of his brother al-Muktafi in Dhū 'l-Ka'da 295 (Aug. 908), al-Muktadir who was only 13 at the time was proclaimed caliph. Many however preferred 'Abd Allāh, son of the caliph al-Mu'tazz, and after the murder of the vizier al-'Abbās b. al-Ḥasan b. Ahmad [q.v.], al-Muktadir was declared to be deposed and Ibn al-Mu'tazz elected caliph. The eunuch Mu'nis [q.v.] came forward to save al-Muktadir; Ibn al-Mu'tazz was slain and al-Muktadir retained the caliphate. He showed very little independence however and allowed himself to be guided, sometimes by the personnel of the harem and sometimes by the viziers among whom special mention may be made of the intriguing Ibn al-Furāt [q.v.] and the brave Ibn al-Djarrāh [q.v.]. Al-Muktadir's caliphate was therefore marked by a gradual decline. In his reign the dynasties of the Fātimids [q.v.] and Ḥamdānids [q.v.] became independent. The Karmāniyās also rebelled once more. In the years 307 (919—920) and 311 (923) Basra was plundered by the Karmāniyā chief Abū 'Tāhir Sulaimān [cf. al-DjANNAKI] and at the end of the year 311 (924) he fell upon the pilgrim caravan returning from Mecca. In Dhū 'l-Ka'da of the following year (925) he attacked the caravan which was going on the pilgrimage to Mecca from Baghdad and put it to flight. He next plundered al-Kūfa and then returned to Bahrain. An army sent against the Karmāniyās under the command of Mu'nis arrived only after they had retired. In 314 (926—927) Yūsuf b. Abī 'l-Shāh was summoned from Adharbāydjān to help, but Sulaimān defeated him in Shawwāl of the following year (Dec. 927) and took him prisoner. The caliph's troops did not dare to give battle and in Muharram 316 (March 928) Sulaimān seized the town of al-Rāḥaba. After an unsuccessful attack on al-Rāḥaba he retired; in 317 (929—930), or, according to others, in 316, he plundered Mecca and carried off the Black Stone.

On the Byzantine frontier both sides continued their raids with varying fortunes. In 305 (917) the Byzantines made an offer of peace and after two years peace was definitely concluded, but hostilities very soon broke out again. In 314 (926—927) the Byzantines ravaged the district of Malatya and in the following year they crossed a considerable part of Armenia. After taking several Armenian cities which belonged to the Arabs (316 = 928—929) and occupying northern Mesopotamia (317 = 929—930) they lost all their gains in 319—320 (= 931—932). In Muharram 317 (Feb. 929) a rebellion broke out in the capital. Al-Muktadir was forced to abdicate but was brought to a place of safety by Mu'nis, while the soldiery plundered the palace. His brother Muḥammad was summoned to be Commander of the Faithful in his stead with the style al-Kāhir; but since the chief leader of the rebels, the head of police Nāṣir, could not satisfy the demands of the troops for higher pay, al-Kāhir was deposed after a few days and al-Muktadir placed on the throne once more. In Baghdad the confusion increased and in 320 (932) the catastrophe came. The enemies of Mu'nis took advantage of his absence to persuade the caliph that Mu'nis intended to dethrone him and when Mu'nis approached at the head of his army, al-Muktadir was persuaded with great reluctance to take the field against him; he fell at the beginning of the encounter (27th Shawwāl 320 = Oct. 31, 932). See also the article MUḤAMMAD H. YAKUT.

(K. V. ZETTERSTERN)

AL-MUKTAFI ibn 'amr, 'alī, abu 'abd allāh MUḤAMMAD, 'Abbasid caliph, born on 12th Rabī' II 489 (April 2, 1096), son of al-Mustashir and a slave girl. After the deposition of his nephew al-Rashid, al-Muktafi was acknowledged as caliph on the 8th Dhū 'l-Hijja 530 (Sept. 17, 1136). While the Saljuqs were fighting among themselves, he did his best not only to maintain his independence but also to extend his rule and one district after the other in the 'Irāk fell into his hands. In 543 (1148) a number of emirs announced their allegiance to Sulṭān Mas'ūd and marched on Baghdad but dispersed after several encounters with the caliph's troops. According to some sources, the same thing took place again next year. In Rajab 547 (Oct. 1152) Mas'ūd died, and was succeeded by his nephew Malikshāh who was deposed in a few months and succeeded by his brother Muḥammad. In the meanwhile the caliph seized the two towns of al-Hilla and Wasī. In the following year Sulṭān Sandjar who lived in Khurāsān was attacked and taken prisoner by the rebel Ghuzz [q.v.] whereupon his emirs proclaimed Mas'ūd's

brother Sulaimānshāh sultān. In Muharram 551 (Feb.—March 1156) the latter was recognised by the caliph on condition that he did not interfere in the affairs of the 'Irāq. Although al-Muktāfi supported him he was defeated in Dījmadā I (June—July) of the same year by his nephew Muhammad and the latter's auxiliary. In Dhū l-Hijja (Jan.—Feb. 1157) Sultān Muhammad advanced on Baghdad to take vengeance on the caliph. The latter had to retire to the eastern part of the town and was besieged there for several months. In Rabi' I 552 (May 1151) however, the sultān suddenly raised the siege because Malikshāh was advancing on Hamadān. As the latter therefore retired, hostilities automatically ceased and Muhammad is said to have later made his peace with al-Muktāfi. The latter twice besieged Takrit in vain; on the other hand, he succeeded in taking Lāh. The Crusaders continued their hostilities in al-Muktāfi's caliphate. The most powerful pillar of Islām was the Atābeg of al-Mawālī, Imād al-Dīn Zangī, and his son Nūr al-Dīn Mahmūd in Syria. Al-Muktāfi died on 2nd Rabi' I 555 (March 12, 1160).

(K. V. ZETTERSTEN)

AL-MUKTAFI ʾALI b. ʾALLĪ, ARḌ MUḤAMMAD ʾALI b. AHMAD, ʾAbbāsīd caliph, son of al-Muʾtadīd and a Turkish slave girl named Çiçek (Arabic Dīdjak). In 281 (894—895) he was appointed by his father governor of al-Kaly and several towns in the neighbourhood, and five years later he was made governor of Mesopotamia and took up his quarters in al-Rakka. After the death of al-Muʾtadīd on 22nd Rabi' II, 289 (April 5, 902), he ascended the throne and at once won the good-will of the people by his liberality and by destroying the subterranean dungeons in the capital. He proved a brave and fearless leader who fought with success against the many enemies of the caliphate. The Karmatians were ravaging Syria; one town after another fell into their hands and Damascus itself was plundered. On the 6th Muharram 291 (Nov. 29, 903) the general Muhammad b. Sulaimān finally succeeded in inflicting a crushing defeat on them and they scattered in all directions. Muhammad then turned his attention to Egypt where he put an end to the rule of the Tulūnids. Many of their followers joined him and after the Tulūnid Hārūn b. Khumārāwāsh had been slain, the capital had to surrender (Safar 292 = Jan. 905) and ʾIsā al-Nūsharī was appointed governor of Egypt. An attempt to restore the Tulūnids was easily crushed (293 = 905—906). About this time the Karmatians again began to be troublesome and at the beginning of the year 294 (Oct.—Nov. 906) they attacked the great pilgrim caravan returning from Mecca, massacred the men and carried off the women and children. In Rabi' I of the same year (Dec. 906—Jan. 907) they were defeated near al-Kadisiya by the caliph's troops under Waṣīf b. Sawātegin. The war with the Byzantines was also vigorously pursued. In 291 (903—904) a Greek named Leo who had adopted Islām undertook a number of raids on the Greek coasts with

his fleet of 54 ships. The Byzantines however had the advantage by land. In 292 (904—905) Marāsh, al-Maṣṣīra and Tarsūs were taken by the Greek general Andronicus and in the following year the Byzantines advanced as far as Halab. Then the Muslims gained the upper hand and Andronicus went over to them. Al-Muktāfi died in Dhū l-Ka'da 295 (Aug. 908) at the age of 31; cf. also the article **AL-ʾABBĀS** b. AL-ḤASAN b. AHMAD.

AL-MUKTANĀ, BAHĀ' AL-DIN, a Druse missionary and author, with his teacher Ḥamza (b. ʾAlī; q. v.) founder of the theological system of the Druses [q. v.], the fifth minister of the Druse theogony, with several titles of honour, in addition to the above two: al-Ḥanān, al-Aṣar, al-Talī, al-Khayāl, al-Mukāsir etc. His "secular" name was Abū ʾl-Ḥasan ʾAlī b. Ahmad al-Samāki. Of his life practically nothing is known. As Arab historians are silent about him (Silvestre de Sacy, *Exposé de la religion des Druses*, ii. 320), his own writings are almost the only source. According to Druse tradition, he was kādī in Alexandria in al-Ḥakīm's time [q. v.] (M. v. Oppenheim, *Vom Mittelalter zum Persischen Golf*, L. Berlin 1899, p. 135). As his works reveal quite a good knowledge (not without misunderstandings) of Christian religion and literature, he may have been born a Christian, probably in Syria. Only for the period of his teaching do we have chronological exactness. His *taḥṣīl* of investiture is dated on the 13th Sha'ban of the third year of Ḥamza's mission i. e. 411 (1020) (S. de Sacy, *op. cit.*, i. 474—475; ii. 309, 313; transl., *ibid.*, ii. 297—309). The earliest of his known writings is of the tenth year of Ḥamza, 418 A.H. (*ibid.*, ii. 326). In consequence one must assume that he came to the front after the disappearance of al-Ḥakīm and Ḥamza. His activity was not a continuous one and he had even to live for a time in concealment (about the year 17—18 of Ḥamza; see S. de Sacy, *op. cit.*, ii. 364); whether in Egypt or Syria is not certain (H. Guys, *La nation druse*, p. 114). The latest date known in his writings is the 26th year of Ḥamza, i. e. 433—434 (1042) (S. de Sacy, *op. cit.*, i. 496; ii. 379). His farewell epistle dates from this year; according to it he had retired into concealment (*ibid.*, i. 514—515; ii. 358); nothing more is known of him. The "Druse theogony" does not agree with these dates; it gives 17 years as the period of his activity (H. Guys, *op. cit.*, p. 107). Ph. Hitti's assertion (*The Origins of the Druse People*, p. 11) that he died in 1031 is due to a misunderstanding.

Druse tradition not unjustly ranks him with Ḥamza and regards him as the greatest theological writer, to whom four of the sacred books are ascribed (M. v. Oppenheim, *op. cit.*, i. 135—137). These are not books

in the proper sense but collections of separate tracts, usually in the form of epistles, directed to followers of the Druse teaching or of other creeds in various lands (Byzantium, Syria, Egypt, Arabia, India). They are to this day frequently read by the Druses in their *ḥalawāt*; commentaries were written on some of them by the last independent Druse theologian 'Abd Allāh al-Tanūkhī (d. 1480; on him see Ph. Hitti, *op. cit.*, p. 53, 71; M. v. Oppenheim, *op. cit.*, i. 137). Of the some 110 Druse treatises so far known in Europe, 70 are ascribed by S. de Sacy to al-Muktanā (*op. cit.*, i. 484 and 496). Except for a few short texts published by S. de Sacy along with other writings of Hama (see *Bibl.*) very few have been printed, namely the *Kitāb al-Bad'* by Chr. Seybold (s. *Bibl.*) and *al-Risālat al-Kaṣṣāfiyya*, sent in 1028 to the Byzantine Emperor Constantine VIII., by J. Khalil and L. Ronzevalle (s. *Bibl.* and extracts in Hitti, *op. cit.*, p. 64–67). Others are accessible only in translations and extracts (espec. in Silvestre de Sacy; *al-Risālat al-Mariḡiyya*, a synopsis in Hitti, *op. cit.*, p. 68–70). As with other Druse writers, the style is very obscure and artificial, frequently embellished with rhymed prose.

Silvestre de Sacy, whose book still is the most important collection of material, regards al-Muktanā as "un enthousiaste de bonne foi" (*op. cit.*, i. 308). It is highly desirable that some one should devote a special study to his life and work, paying particular attention to the authenticity of his works and to a critical edition of them.

MULAL [See MAWLĀ.]

MULK (A.), royal power, is used in the Qur'ān with reference to God and to certain pre-Islamic personages, who all appear in the Old Testament, and in the former case is synonymous with *malakūt*; the latter word however occurs only four times in the Qur'ān and always with a dependent genitive (*kull shay' or al-ramawāt wa 'l-ard'*) while *mulk* is often used absolutely. To God alone belongs *mulk*, He has no associate therein; to Him belongs *mulk* over heaven and earth as well as over the judgment. He gives *mulk* to whom He will; the unbelievers have no share in it. Shaiṭān promised Adam imperishable *mulk* and tempted him with this promise to eat of the *shajarat al-ḥuld* (Sūra xx. 118). Nimrūd endeavours to claim for himself God's *mulk* against Ibrāhīm (ii. 260) but God gives *mulk* to the family of Ibrāhīm (iv. 57). Yūsuf thanks God in prayer

for the *mulk* which He has given him (xxi. 102). Fir'awn boasts of his right to the *mulk* *Misr* (xliii. 50); God wills to give Tālūt *mulk* over the recalcitrant Israelites and to send the *āḥūt* as a sign (ii. 248 *iqq.*) Dāwūd's *mulk* is mentioned ii. 252 and xxxviii. 19 and Sulaimān's ii. 96; the latter prays for it (xxxviii. 34).

That the conception of *mulk* was not carried over into Muslim law generally has been explained in the article *MAḤK*; an exception is Egypt during the Ayyūbid period and in quite modern times. Cf. also the article *TĀJ* and G. Richter, *Studien zur Geschichte der älteren arab. Fürstentpiegel* (Leipz. Sem. Studien, N. F., iii., 1932), esp. p. 6. (M. PLESSNER)

MULTĀN is an ancient town of the Panjāb situated in 30° 12' N. and 71° 31' E., and has been known at various times as Kashtpūr, Hanspūr, Bāgpūr, Sanb or Sanābpūr, and finally Mulasthān, of which Multān is a corruption. This name is derived from that of the idol and temple of the sun, a shrine of vast wealth, which the Arabs, who plundered it, named *dār al-ghahab*, or the house of gold. It remained the Arab capital, and the outpost of Islām in India, for three centuries but by A. D. 900 its ruler had become independent of Baghdad. At this time it was seized by 'Abd Allāh the Karmatī, and became a stronghold of the Karmatīan heretics, who were crushed and expelled by the orthodox Maḥmūd of Ghazni. The town and province remained nominally subject to his descendants until Khusrāw Malik, the last of them, was carried into captivity by Mu'izz al-Dīn Muḥammad b. Sām, when it became a province of his Indian empire. On his death the governor, Nāṣir al-Dīn Kaḥāza, attempted to establish his independence of Delhi, but Kutb al-Dīn Aibak reduced him to obedience, and the province remained nominally subject to Delhi from 1206 to 1438 when Shaikh Yūṣuf Kuraishī became independent ruler of Multān and was followed by the kings of the Langāh tribe, who reigned until 1527. The town was occupied both by Timūr in 1397 and by Bābūr in 1528.

The province was one of the *subas* of Akbar's empire, and remained nominally subject to his successors until 1752, when its allegiance was transferred to Kābul. It was threatened by the Sikhs as early as 1771, but was not annexed by them until 1818, when Randjit Singh took the city by storm. It was not affected by the first Sikh war, but the murder of two British officers by Mūlradj led to the second Sikh war, and the city was captured on January 3, 1849. Its fortifications were dismantled in 1854 and its garrison was disbanded in the mutiny of 1857.

MUMTĀZ, BAKHWURDĀR B. MAḤMŪD TURK-MĀN FARĀHĪ, a Persian writer, a contemporary of the Ṣafawid Sultān Ḥusain (1694–1722). At an early age he left his native town of Farāh

and went to Marw where he entered the service of the governor Aḥmad Khān. After two years however, he left this post and became munshi with Ḥasan Kūli Khān Shāmī Kūrī-bāghī in Isfahān. At a banquet there at his master's house he heard a story which attracted him exceedingly. He wrote it down and it became the foundation of a great collection, *Maḥṣūrāt*, which contained about 400 stories and consisted of a *muḥaddama*, eight *ṣab* and a *ḥikāya*. Soon afterwards he returned to Farāh, spent some time in Herāt and Meshhed and then entered the service of the emir Minūchir Khān b. Kārēghāy whose duty it was to defend Darīn and Khahūghān against raids by the wild nomad tribes. His stay there was disastrous for Mumtāz, since he lost all his goods and chattels and the valuable manuscript of his *Maḥṣūrāt* during a nomad raid; he did not have another copy of it. He resolved however to restore the book and wrote all the stories that he could remember a second time. Thus arose the second version of the *Maḥṣūrāt*, which consists of a *muḥaddama*, five *ṣab* and a *ḥikāya* and has come down to us under the title *Maḥṣūrāt al-Kutub*. The book is written in an extravagantly artificial style. The *ḥikāya* is the best part; it contains the celebrated story of Zuhā and Ra'nā, which is very common in Persia in a simplified form in many editions from the popular presses.

MUMTĀZ MAḤALL, wife of Shāh Dīshān, and the lady for whom the Tādj Mahall (q. v.) was built. She was the daughter of Abū Ḥasan Aḥmad Khān, who was Nūr Dīshān's brother. Her name was Arḡumand Bīnu, the title Mumtāz Mahall being conferred on her after Shāh Dīshān's accession. She was his favourite wife and bore him fourteen children, seven of whom grew up. She was born in 1593, married in 1612, and died, at Burhānpūr in the Deccan, very shortly after the birth of a daughter in 1631. She was beautiful and amiable, and Shāh Dīshān loved her tenderly.

(H. BEVERIDGE)

MUNADJIDJIM. [See ASTROLOGY.]

MUNADJIDJIM BASHI is the name by which the author of the most important general historical work written in Turkey is known. His real name was Aḥmad Efendi, son of Luṭf Allāh, a native of Ereğli near Konya. He was born in Selānik, in the first half of the xvth century, received a scholarly education and served in his youth for fifteen years in the Mewlewī-khāne of Kāsim Pasha under Shāikh Khalīl Dede (*Sigill-i 'otmānī*, ii. 287). Afterwards he studied astronomy and astrology and became court astrologer (*munadjidjim bashi*) in 1078 (1667—1668). In 1086 (1675—1676) he was admitted to the intimate circle of Sultān Muḥammad IV as *muḥabib-i pādishāhi*. He was dismissed in Muḥarram 1099 (November 1687) and banished to Egypt. From here he went

some years later to Mecca, where he became *shāikh* of the Mewlewī-khān. In 1105 (1693—1694) he was obliged to move to Medina, where he lived for seven years. Soon after his return to Mecca he died there on the 29th of Ramaḍān 1113 (February 27th 1702) and was buried near the tomb of Khadija.

Besides writing his historical work, Munadjidjim Bashi displayed a considerable literary activity. Of his works are mentioned a *ḥikāya* on the Kūrān commentary of Bajdawī, a commentary on the *Asṣūl al-'Aḥdīya* of al-Jāzī, a *Luṭ'if-nāma*, a translation of the anecdotes of 'Ubaid-i Zakānī, and a number of treatises on geometry, mysticism and music. His Turkish *divān* also gives him a place in the ranks of Turkish mystical poets; his *takhalluṣ* was 'Aḥlī.

The general history was written in Arabic under the title *Djāmī al-Dawal*, but although manuscripts of the Arabic original exist (the *Semā'-Khān-i Edab* of 'Alī Enwer mentions two MSS. not mentioned by Babinger, viz. one in the library of the mosque of Selīm II in Adrianople and the other in the imperial palace, in the library of Aḥmad III), it is much better known in the Turkish translation made by the poet Nedīm (q. v.) in the xviith century under the title *Şaḥīṣ al-Aḥkār* (printed in three volumes in Constantinople in 1285). It is a world history, arranged, after the fashion of similar Arabic works, according to dynasties, with a main division into three parts: the first treating of the history of Muḥammad, the second the non-Muḥammadan dynasties and the third the Muḥammadan dynasties. In the introductory chapters the author cites his numerous sources, not a few of which are lost in the original. Therefore the work has a special value for the knowledge of many smaller dynasties and for this reason it has been especially used by E. Sachau for *Ein Verzeichnis muḥammadanischer Dynastien*, in *SB. Pr. Ak. W.*, Berlin 1923 (cf. the introduction). The last dynasty treated is that of the Ottoman Sultāns; it is proportionately longer and more detailed than the history of the other Muḥammadan dynasties and based on several imperfectly known sources; the last part, which ends in 1089 (1678), gives contemporary history. The Turkish translation of Nedīm is very readable and not composed in the high-flown literary style that prevailed in his period. For this reason it is especially praised and represented in Ebuzziyā Tewfīk's *Nūmūn-i Edebiyyāt-i 'osmāniye*, Constantinople 1330.

Bibliography: F. Babinger, *O. G. W.* and the sources mentioned there.

(J. H. KRAMERS)

AL-MUNĀFIKŪN (A.), the term applied in the Kūrān to those Medinese upon whose fidelity and zeal Muḥammad could not absolutely rely. The Arabs (e.g. Mubarrad, *Kāmil*, ed. Wright, p. 153) derive the word from *nāfiḥa* ("one of the entrances to the hole of a fieldmouse"), but it is certainly the borrowed Ethiopic *manāṣe* "heretic" from *nafaṣa* to "split", *nafaṣa* "to be divided, irresolute". The meaning "waverer", "doubter" quite fits the usual use of the word in the Kūrān, while the usual translation "hypocrite" only suits a few passages. Another description of the same people in the Kūrān is: "those in whose hearts there is sickness (weakness, doubt)", again in contrast to the unshakably firm believers. Sometimes (ix. 68

xxiii. 73; alvii. 6; lvii. 13) there are references to women of this type (*munāfiqāt*) in addition to the male *munāfiqūn*. A closer consideration of the passages in question shows we have not to think of a regular, rigidly defined party; sometimes the reference is to such Medinese as had only joined the Prophet under compulsion or reluctantly, and sometimes to those who had quite honestly joined him but had not been able to retain their belief and enthusiasm (ix. 67; lxiii. 3). Maḥammad also on one occasion speaks of *munāfiqūn* among the Beduins. The first group found their leader in 'Abd Allāh b. Ubayy [q. v.] who would have been the chosen head of the Kaiba tribe, if a new and superior force, which he could not meet, had not opposed him in Maḥammad. Nevertheless these grumblers, joined by other unreliable elements, were strong enough to cause the greatest embarrassment to the Prophet in critical moments e.g. before the battle of Uhud (iii. 160 sq.), in the War of the Ditch (xxxiii. 1, 12—24, 60, 73) and before the march on Tabūk (ix. 65—69, 74, 78), as he had always to be careful not to drive them over into the enemy's camp. It is no wonder then that his utterances about them are always made in a tone of great irritation. He describes them as hypocrites, who say something different from what they mean in their hearts (iii. 161; xiii. 1); in their irresolution they join, according to their view of the future, sometimes the Muslims and sometimes the enemy (iv. 137—142; v. 57); if it goes badly with the believers, they think that their religion has deceived them (viii. 51). When they are together among themselves they revenge themselves for the restraint which they must put upon themselves by malicious remarks about the Prophet and his revelations, but are in great anxiety, lest Allāh may communicate their secret conversations (ix. 65 sqq.; x. 79, 125 sqq.). They are indolent at prayer (iv. 141), refuse to take part in the fighting or to contribute from their means (alvii. 22, 31; lvii. 1 sq.; lxiii. 71; cf. iv. 40 sqq.); they hope for a weakening of his power so that the more worthy may expel the meaner (lxiii. 8). As representatives of the true Meccan aristocracy, their attitude and eloquence made a certain impression on the Prophet but on closer examination they are nothing but "propped timbers" (lxiii. 4). In a word, they are no better than the unbelievers. God makes them err (iv. 50 sqq.) and their abode shall be hellfire (ix. 74; lvii. 13 sq.). We cannot help feeling in some ways a certain sympathy for these men who were deprived of their rights; but in the end they deserved their fate for their complete lack of ideas and courage at decisive moments and their conduct with regard to the Jews in Medina, whom they incited to resist Maḥammad and then left in the lurch (cf. iv. 11), makes a very unfavourable impression. With the death of 'Abd Allāh they lost their leader and their opposition was forced to be silent before the great successes of Maḥammad's last years.

The word *munāfiq* remained however and like other Qur'anic terms was used in the fighting between the various parties as a term of abuse; cf. e.g. its application to Ibn Zubair (Ṭabari, ii. 467, 2) and his party (Ahlwārī, *Anonymous arab. Chronik*, p. 73, 4).

In the Qur'an Sūra lxiii. is called after the *Munāfiqūn*; it is connected by most commentators

with the campaign against the Banū Muṣṭalik.

AL-MUNDHIR u. MUḤAMMAD. [See UMAYYADS II.]

AL-MUNDJIYA, title of sūra lxvii., which is also called *al-mulk* and *al-wāḥiya*.

MUNGIR (Monghyr), the head-quarters of the Mungir District in Bihar and Orissa in India, situated in 25° 23' N. and 86° 28' E. on the south bank of the Ganges. The population of the district in 1911 was 2,132,893, of whom 200,339 were Muhammadans. Muhammadan historians state that Bakhtiyār Khuldī was the first Muhammadan who conquered Mungir during his subjugation of Bihar about 595 (1198). Henceforth it became a place of military importance. In 1177 (1763) Nawwāb Mir Kāsim, the Nawwāb Sābadār of Bengal, when he proposed to fight against the British made Mungir his military head-quarters. He founded here an arsenal under Gurgin (Gregory) Khān, his Armenian general. The gun-making industry for which the town is famous is said to date from the establishment of this arsenal.

(M. Hidayet Hossain)

MUNIS DEDE or DERWISH MUNIS, Ottoman poet of Adrianople. He belonged to the Mewlewī Order. He received his education from the famous Entis Dede (d. 1147 = 1734). He died in 1145 (1732) in Adrianople, where he is buried.

Bibliography: Faṭmā, *Teskere*, Constantinople 1271, p. 385; Ḥusayn, *Shajrillat al-ḥamānī*, iv. 527; Ali Enwer, *Semā'ihān-i Edeb*, Istanbul 1309, p. 226. (Th. Mezzel.)

MUNIS AL-MUẒAFFAR, ABU 'L-ḤASAN, principal 'Abbāsīd general from 296 to 321 (908—933), and latterly virtual dictator (usual attribution to him of *nisba* al-Kaḥḥirī seems to rest on passage — p. 347 — in *Ḥilāl al-Sābi's Kitāb al-Wusarā* [ed. Amedroz], where Naṣr should be read for Mu'nis), a eunuch (passage of Ibn Miskawayh [ed. Amedroz and Margoliouth, i. 160] shows that *ghulam* in this case does not mean merely freedman, as suggested by Massignon, *al-Hallaḥ*, p. 205, No. 2), said by al-Jahābī, *Ta'rikh al-Islām* (followed by Ibn Taghribirdī, ed. Juynboll, ii. 255) to have been 90 years old at death (though this age would seem incredibly great for a recently active commander), i.e., to have been born in 231 (845—846), and to have held the rank of *amir* for 60 years.

Mu'nis first appears (if passage of al-Ṭabari, iii. 1953, refers to him) as a *ghulam* of al-Mu'taḍid (not yet caliph) in Zandj [q. v.] campaign of 267 (880—881); and is mentioned as Chief of Police in caliph's camp in 287 (900). Al-Jahābī (also Ibn Taghribirdī, *loc. cit.*) states, again, that he was banished to Mecca by al-Mu'taḍid, to be recalled on accession of al-Mu'taḍir [q. v.]; and as Mu'nis is nowhere referred to during intervening reign of al-Mu'taḍī, the statement may be true. (If so, in al-Mas'ūdi's description, *Murūf*

al-Dhahab, ed. B. de Meynard, viii. 212, of al-Mu'tadid's death, for *al-Dhahab* read *al-Dhahab*, as in 'Arib, ed. de Goeje, p. 29).

Mu'nis owed his later eminence mainly to his leading the defence, in 296 (908), of the Ḥammīd palace at Baghdād for al-Mu'tadid against the partisans of the latter's cousin, the pretender Ibn al-Mu'tazz [q. v.]. During the caliph's youth his gratitude and that of his powerful mother for this service assured Mu'nis's position; and though later al-Mu'tadid's favour turned to enmity, by that time Mu'nis's authority was hardly in need of support, owing chiefly to his almost invariably successful generalship. For though he undertook no very important campaigns, except perhaps the repulse of the Fātimid al-Mahdī [q. v.] in 307 (919–920) (for which he received the *laqab al-MuẒaffar*), and the defence of Baghdād from the Karmatians [q. v.] in 315 (927–928), he was only once defeated — in 306 (918).

Mu'nis early fell out with the wazīr Ibn al-Furāt [q. v.], repeatedly opposing him, till in 312 (924), on Ibn al-Furāt's third term of office, Mu'nis played a prominent part in securing his dismissal and execution. He now became all-powerful, being invariably consulted on the appointment of viziers and so controlling the government. Hence the change of al-Mu'tadid's affection to dislike, first signalized (315 = 927) in an abortive plot of the caliph's to murder him. In 316 Mu'nis lent himself to al-Mu'tadid's deposition in favour of his half-brother al-Kāhir [q. v.]. He almost immediately restored him, however, thereby becoming more absolutely his master than ever. Al-Mu'tadid eventually defied Mu'nis (319 = 931), who thereupon left Baghdād. Next year, however, having meanwhile collected a strong force, he marched on the capital intending to reimpose his authority. He duly defeated the caliph's army outside the walls, but al-Mu'tadid himself was killed on the field.

Mu'nis now restored al-Kāhir. But by resuming his dictatorial ways he soon so alienated him also that he was obliged in self-defence to keep the new caliph a prisoner in the palace. He even contemplated deposing him. Al-Kāhir, however, succeeded in luring Mu'nis, together with his chief supporters, into the palace, where he shortly had them executed in Sha'bān 321 (August 933).

Mu'nis' influence was on the whole exerted for good; but he was neither strong nor intelligent enough to prevent the decline of the caliphate. His example of depriving the caliph of real power was pernicious. It was to be followed all too soon by the series of adventurers who, with the style of *amir al-umara'* [q. v.], were to dominate al-Kāhir's successors.

Bowen, *Life and Times of 'Alī b. 'Isā*, Cambridge 1928, index. (HAROLD BOWEN)

MUNKAR WA-NAKIR (the forms with the article are also found), the names of the two angels who examine and if necessary punish the dead in their tombs. To the

examination in the tomb the infidels and the faithful — the righteous as well as the sinners — are liable. They are set upright in their tombs and must state their opinion regarding Maḥammad. The righteous faithful will answer, that he is the Apostle of Allāh; thereupon they will be left alone till the Day of Resurrection. The sinners and the infidels, on the other hand, will have no satisfactory answer at hand. In consequence of this the angels will beat them severely, as long as it will please Allāh, according to some authorities till the Day of Resurrection, except on Fridays.

In some sources a distinction is made between the punishment and the pressure (*ḡaḡḡa*) in the tomb, the righteous faithful being exempt from the former, not from the latter, whereas the infidels and the sinners suffer punishment as well as pressure (Abu 'l-Mu'ta Maimūn b. Muḥammad al-Nasafi, as cited in the commentary on the *Waḡīyat Abi Ḥanifa*, Haidarābād 1321, p. 22).

The punishment in the tomb is not plainly mentioned in the Qur'ān. Allusions to the idea may be found in several passages, e.g. sūra xlvii. 29: "But how when the angels, causing them to die, shall smite them on their faces and backs"; sūra vi. 93: "But couldst thou see, when the ungodly are in the floods of death, and the angels reach forth their hands, saying, Yield up your souls: this day shall ye be recompensed with a humiliating punishment"; sūra viii. 52: "And if thou wert to see when the angels take the life of the unbelievers; they smite their faces and their backs, and taste ye the torture of burning" (cf. further sūra ix. 102; xxiii. 21; lii. 47).

The punishment of the tomb is very frequently mentioned in Tradition (see *Bibliography*), often, however, without the mention of angels. In the latter group of traditions it is simply said, that the dead are punished in their tombs, or why, e.g. on account of special sins they have committed, or on account of the wailing of the living.

The names of Munkar and Nakir do not appear in the Qur'ān, and, so far as I can see, once only in canonical Tradition (Tirmidhī, *Ḍaḡā'ir*, bāb 70). Apparently these names do not belong to the old stock of traditions. Moreover, in some traditions one anonymous angel only is mentioned as the angel who interrogates and punishes the dead (Muslim, *Imān*, trad. 163; Abū Dāwūd, *Sunna*, hāb 39^b; Ahmad b. Ḥanbal, iii. 233, 346; iv. 150; Tāyālīsī, N^o. 753).

So there seem to be four stages in the traditions regarding this subject: the first without any angel being mentioned, the second mentioning "the" angel, the third two angels, the fourth being acquainted with the names Munkar and Nakir.

This state of things as reflected in *ḥadīth* finds a similar reflex in the early forms of the creed. In the *Fīḡh Akbar* i., which may date from the middle of the viiith century A.D., the punishment of the tomb appears as the only eschatological representation (art. 10). In the *Waḡīyat Abi Ḥanifa*, which may represent the orthodox views of the middle of the viiith century, we find, apart from an elaborate eschatology, the two following articles (arts. 15, 19): "We confess, that the punishment in the tomb shall without fail take place. We confess, that in view of the traditions on the subject, the interrogation by Munkar and Nakir is a reality". The term "reality" is apparently intended to oppose the

allegorical interpretation of eschatological representations as taught by the Mu'tazilīs.

The *Fih al-Akbar* II., which may represent the new orthodoxy of the middle of the 12th century A.D., is still more elaborate on this point (art. 23): *The interrogation of the dead in the tomb by Munkar and Nakir is a reality and the reunion of the body with the spirit in the tomb is a reality. The pressure and the punishment in the tomb are a reality that will take place in the case of all the infidels, and a reality that may take place in the case of some sinners belonging to the faithful". In the later creeds and works on dogmatics the punishment and the interrogation in the tomb by Munkar and Nakir are expressed in similar ways.

The Karāmiyya [q. v.] taught the identity of Munkar and Nakir with the two guardian angels who accompany man ('Abd al-Kāfir al-Raghdādi, *Uṣūl al-Dīn*, Istanbul 1928, p. 246). Ghazālī admits the idea that eschatological representations are a reality that takes place in the *malakūt*.

The origin of the names is uncertain; the meaning "disliked" seems doubtful. The idea of the examination and the punishment of the dead in their tombs is found among other peoples also. The details to be found in Jewish sources (*Shibbūṭ ha-piber*) are strikingly parallel to the Muslim ones.

(A. J. WENSINCK)

MUNSARIH, the name of the tenth metre in Arabic prosody; it has three feet to the hemistich. It has three *arūḍ* and four *qarḥ*:

1st *arūḍ* { *mustaf'ilun maf'ūlātu mustaf'ilun*
mustaf'ilun maf'ūlātu mustaf'ilun
mustaf'ilun maf'ūlātu mustaf'ilun
mustaf'ilun maf'ūlātu mustaf'ilun
 2nd *arūḍ*: *mustaf'ilun maf'ūlun*
 3rd *arūḍ*: *mustaf'ilun maf'ūlun*.

We rarely find *mustaf'ilun* in the *qarḥ* of the first *arūḍ*. The second *qarḥ* of the first *arūḍ* is not indicated by al-Khulī b. Ahmad but Ibn Barri notes it was much used by the *muwallad* poets, among them Ibn al-Rūmī. It may be noted that the second and third *arūḍ* are regarded as belonging to the *raḍf* metre.

Mustaf'ilun may lose: 1. its *s* except when used as the first *qarḥ* in the first *arūḍ*; 2. its *f* and the foot becomes (*mustaf'ilun* ⇒) *mustaf'ilun*; 3. its *s* and *f* at the same time (which is very bad) and the foot becomes (*mustaf'ilun* ⇒) *fa'ilatun*. This last change could not be undergone by the first *arūḍ*.

Maf'ūlātu loses 1. its *f*, which is very bad and the foot becomes (*maf'ūlātu* ⇒) *maf'ūlū*; 2. its *w* and the foot becomes (*maf'ūlātu* ⇒) *fa'ilatun*;

3. its *f* and *w* at the same time which is very bad and we have (*maf'ūlātu* ⇒) *fa'ilatun*.

Maf'ūlātun and *maf'ūlūn* may lose their *f* and become (*maf'ūlātun* ⇒) *fa'ilātun* and (*maf'ūlūn* ⇒) *fa'ilūn*. (MOH. BEN CHENEB)

MUNSHI'. [See *INSHĀ'*.]

MUNSHIF (A.), part. active IV. of *n-ṣ-f*, "to be just, to act with justice", the title of a native judge of the lowest grade in India.

Bibliography: Yule and Burnell, *Hobson-Jobson*, s. v. moonshiff.

AL-MUNTAḤIF, a section of the Arab tribe of the Banū 'Ukail, which in turn is a subdivision of the great group of the 'Amir b. Sa'ya [q. v.]. Genealogy: al-Muntaḥif b. 'Amir b. 'Ukail (Wüstenfeld, *Gen. Tab.*, D. 19). The very scanty information in Wüstenfeld can be supplemented by the notice which Ibn al-Kalbi gives of the Banu 'l-Muntaḥif (*Dīwān al-Aḥwāl*, MS. Brit. Mus., fol. 130v-131v); but this little clan nowhere appears to play a great part in early history. The territory inhabited by the Banu 'l-Muntaḥif is the same as that of the other divisions of the Banū 'Ukail, in the southwest of Yamama; some places belonging to them are quoted by al-Bakrī (*Mudjam*, ed. Wüstenfeld, p. 567), Yāqūt (*Mudjam*, ed. Wüstenfeld, I. 793-794; IV. 712, I. 78; we may note that in these two passages al-Muntaḥif is said to be the surname of Mu'awiya b. 'Ukail while the usual genealogy makes this Mu'awiya a son of al-Muntaḥif), al-Hamḍānī (*Dīwān*, ed. D. H. Müller, p. 177, I. 12-15; note the mention of gold mines in their territory). The Banu 'l-Muntaḥif numbered among their clients the Banū Ṭaḥr (Wüstenfeld, *Gen. Tab.*, C. 13) whose eponym was said to have been made a prisoner by them (*Kitāb al-Aḥwāl*, VII. 110); one of the few episodes of the pre-Islamic period in which this clan is mentioned is the battle of Shīb Djabala where Kais b. al-Muntaḥif distinguished himself (*Aḥwāl*, X. 44; *Nakā'id*, ed. Bevan, p. 671 I. 12-672, I. 14, where Ibn Ṭufail should be deleted). In the history of the origins of Islām, several of them appear as ambassadors of the Banū 'Ukail to the Prophet: such were Anas b. Kais b. al-Muntaḥif and Laḥī b. 'Amir b. al-Muntaḥif (Ibn Sa'd, I/ii. 45 etc.); on the latter the biographical collections have long discussions as to whether he is to be identified with this or that *muḥaddith*: cf. among others Ibn Ḥaḍjar, *Tahdhīb al-Tahdhīb*, VIII. 456). In the period of the conquests, the Banu 'l-Muntaḥif settled in the marshy region between Kufa and Basra (al-Kalkashandī, *Nikāyat al-Arab*, p. 65-66). All that we know of them after this period is the names of a few individuals who held public offices: a certain 'Amr b. Mu'awiya b. al-Muntaḥif, mentioned by Ṭabari, I. 3284 at end, as fighting at Siffin, is said by Ibn al-Kalbi to have been governor of Armenia and Ādharbāidjān under Mu'awiya; according to Ibn al-Kalbi, 'Abd Allāh b. Mu'awiya b. Rabbā b. 'Amir b. al-Muntaḥif was governor of Marw and Ahwāz, also under Mu'awiya, and 'Abida b. Kais b. al-Muntaḥif of Armenia, under Yazīd I. These men are not mentioned elsewhere: the same is true of the poet Dīhām b. 'Awf b. al-Husain b. al-Muntaḥif (Ibn Ḥaḍjar, *Libā* [ed. Sharafīya, Cairo 1325], v. 124 follows Ibn al-Kalbi).

AL-MUNTAKIM. [See *ALLĀH II*.]

AL-MUNTAŠIR (also called Mustansir) b. LĀLĀ, ABU DĪ'Ā'AR MUHAMMAD b. DĪ'Ā'AR, 'Abhāsīd caliph, son of al-Mutawakkil by a Greek slave. After his father had been murdered in Shawwāl 247 (Dec. 861) by conspirators, among whom was al-Muntašir, the latter ascended the throne, aged 25 according to the usual statement. As a ruler he was only a tool in the hands of the vizier Ahmad b. al-Khaṣīb and the Turkish generals. His brothers al-Mu'tazz and al-Mu'ayyad were forced to renounce their claims to the throne and Waṣīf, the commander of the bodyguard, was sent to the Byzantine frontier. Unlike his father, he treated the 'Alids with great consideration; nothing else remarkable is recorded of him. Al-Muntašir died in Rabi' II 248 (June 862) or, according to a less trustworthy report end of Rabi' I, in Sāmarrā after a reign of six months.

MURĀBĪT. [See ALMORAVIDS.]

MURĀD, the name of an Arab tribe, belonging to the great southern group of the Maḍhijīd [q. v.]; genealogical tradition (Ibn al-Kalbī, *Djāmhara al-Ansāb*, Escorial MS., fol. 114b—117b, which is followed by Ibn Durraid, *Kitāb al-Ishāb*, ed. Wüstenfeld, p. 238, 4; cf. also *Lisān al-'Arab*, iv. 409) regards Murād as a nickname, for this tribe was said to have been the first to rebel (*tamarrada*) in the Yaman: an etymology which is not convincing. Murād's own name is said to have been Yuhābir b. Maḍhijīd and he was therefore a brother of the 'Am and the Sa'd al-'Ashira (Wüstenfeld, *Geneal. Tabellen*, p. 7, 11). Although they were neighbours of the South Arabian civilization, the Murād have always retained a typically Beduin character; their country (usually called al-Djawl and placed to the east of Najrān and Ma'rib) is bare and sterile (cf. the picturesque description given of it by the *Kitāb al-Aghānī*, xviii. 135 and 'the mountains of the Murād' mentioned by Yāqūt, *Mo'djam*, ii. 78) and its inhabitants are notorious as brigands (*fak* Murād; cf. *Kitāb al-Aghānī*, x. 147). The land inhabited by the Murād and by their neighbours, the Hamdān [q. v.], had once belonged to the Taiy (Yāqūt, *Mo'djam*, i. 129), who had left it to settle in the north of the Arabian peninsula; it is probable that it was from the old masters of the country that the Murād and the Hamdān inherited the cult of the god Yaghūth (cf. below).

The Murād appear for the first time in history in connection with an episode, not however at all clear, of the last days of the dynasty of the Lakhmids of al-Hira; as the king 'Amr b. al-Mundhir (III) b. Mā' al-Samā' had excluded his half-brother 'Amr, a son of Usāma, sister of Hind mother of the first-named 'Amr, from a share in the kingdom, the latter sought refuge with the Murād, who recognised him as their chief but when he began to rule tyrannically, they killed him, which gave 'Amr b. Hind a pretext for invading the land of the Murād and putting to death

the murderer of 'Amr b. Usāma (al-Mufaḡḡal al-Dabbī, *Amṣār al-'Arab*, Constantinople 1300, p. 68—69, who gives a more satisfactory account than that contained in the passages quoted by G. Rothstein, *Die Dyn. der Lakhmiden*, p. 99, in which Yāqūt, iv. 130 should be read for i. 130). 'Amr is said to have been killed by a certain Ibn al-Dhū'aid (the same story is given by Ibn al-Kalbi, *Djāmhara*); according to Yāqūt on the other hand by Huhaim b. 'Abd Yaghūth surnamed al-Makshūh; the latter's son Ka'is seems to have been one of the most powerful chiefs of the Murād at the time of the rise of Islām.

The Murād had just then suffered a disastrous defeat, which had considerably weakened them, at the hands of the Hamdān, as the result of a quarrel which had arisen in connection with the control of the worship of the god Yaghūth (cf. Wellhausen, *Reise arab. Hidentums*?, p. 19—22 and the sources mentioned by him). It is probably this defeat (Yawm al-Razm), which tradition places in the same year as the battle of Badr, which made a section of the Murād think it advisable to seek an alliance with Muḥammad; but Ka'is b. al-Makshūh refused to join in this. It was therefore another Murādi chief, Farwa b. Musailk, who went to al-Madina in the year 10 A. H., and concluded a treaty there with the Prophet (cf. Caetani, *Annali dell' Islām*, ii. 332). To what extent tradition is right in saying that Farwa was given authority to levy *zakāt* on all the tribes of the Yaman, is very difficult to ascertain. In any case, the policy of the Murād was not oriented towards Muḥammad under the leadership of Ka'is b. al-Makshūh. In the great rising led by al-Aswad al-Ansi against Persian hegemony in the Yaman, the Murād were against him. But if, as tradition has it, Muḥammad used his connections with some chiefs of the Yaman to prevent al-Aswad's success, after the death of the Prophet these same chiefs refused obedience to Abū Bakr and resolutely threw themselves into the struggle against Islām. It is again Ka'is b. al-Makshūh who plays the chief part in these events. Taken prisoner, Abū Bakr granted him his life and henceforth the chief of the Murād and his tribe played their part bravely in the conquests. We find them sometimes in Syria, sometimes in the 'Irāk, and Ka'is everywhere distinguishing himself by his exploits. He lost an eye at the battle of Yarmūk (cf. Caetani, *Annali dell' Islām*, i.—v., index s. v. Qays b. Habbayrah). But the account of his death in the civil war between 'Alī and Mu'āwiya at the battle of Siffin is based on confusion with another man of the same name of the tribe of Badjila (this fact, which is clearly indicated by Ibn al-Kalbī, *Djāmhara* and Tabarī, i. 3301—3302, has already been noted by Ibn Hadjar, *Iṣāha*, ed. Sharafiya, v. 281; *Annali dell' Islām*, ix. 638 should be corrected). We also find the Murād in the conquest of Egypt (*Annali*, iv. 573, 21 A. H., § 191 & [29]). But it was at Kufa that they settled in the largest numbers. It was there that one of them, 'Abd al-Rahmān b. Muljam, assassinated the caliph 'Alī; it was there also that in 60 (679) Hānī b. 'Urwa al-Murādi was executed by orders of the governor 'Ubayd Allāh b. Ziyād after being found guilty of conspiring with Muslim b. 'Aqil in favour of al-Husain (Tabarī, ii. 227 19). He was a descendant of the poet 'Amr b. Qī'as (*R. S. O.*, xiii. 58, 327¹), one of the very few poets

of this tribe, which does not seem to have produced many individuals of note either during the Djahliya or under Islām. We may however mention Uwais al-Karani (of the Banū Karan b. Radmān b. Nādiyya b. Murād; Wüstenfeld, *Geneal. Tab.*, p. 7, 23), one of the prototypes of Muslim asceticism.

Bibliography: Given in the article.

(G. LEVI DELLA VIDA)

MURĀD I, according to the common tradition the third ruler of the Ottoman state, was a son of Orkhān and the Byzantine lady Nihiser. Although some Ottoman sources profess to know the year of his birth (*Siddīl-i 'otkūmān*, i. 74 gives the year 726 = 1326), this date, like all dates given by Turkish sources relating to this period, is far from certain. The name Murād (Greek sources such as Phrantzes have Ἀμυράτης, from which later Latin sources make Amurath, while contemporary Latin sources from Italy have Moratibei) must have originated in mystical circles and hardly occurs in earlier times. An 'Abdal Murād lived in Orkhān's time (cf. *Siddīl-i 'otkūmān*, iv. 354; 'Ashik Pasha Zāde, ed. Giese, *Im neuen Anatolien*, Leipzig 1928, plates 9 and 10). The ancient Turkish chronicles often call Murād Ghāzi Khunkār, later Turkish historians Khudāwendikār (q.v.).

During his father's lifetime Murād had already been entrusted with the governorship of In Ōnu and later of Brusa. His brother Sulaimān Pasha had held the more important sandjaks and was destined to become Orkhān's successor. Sulaimān's untimely death, shortly before that of Orkhān himself, placed Murād unexpectedly at the head of the Ottoman principality. This happened about 1360; the date of Orkhān's death is uncertain.

Murād I became the first great Ottoman conqueror on European soil. In this he followed the footsteps of his brother Sulaimān Pasha and of other Turkish emirs before him.

It is not yet possible to gain a clear idea of the succession of the military achievements by which the Ottomans succeeded in establishing themselves firmly on the Balkan Peninsula. Even the outstanding victories are confounded with each other in the Ottoman and Western sources, and the exact dating of even important events is subject to great difficulties. The Byzantine sources, the most reliable of all, are mainly concerned with the tortuous policy of the Byzantine rulers. On the other hand, many tales of a legendary character have entered the historical accounts of later times. The impression on the whole is, that the Ottoman successes were mainly due to the mutual rivalry between the then existing Balkan states, Byzantium, and the Bulgarian and Serbian kingdoms, complicated by the struggle of Venice and Genoa for an advantageous position in the Levant, and the zeal of the popes for bringing the Greek church back to Rome. This secured the Ottomans at all times allies in the Christian camp itself. Nor is it possible to ascertain which Ottoman expeditions were really planned by Murād and his councillors and which were merely successful raids by Turkish hands. All this makes it extremely difficult to form an adequate judgment of Murād's personality as a warrior and as a statesman.

Provisionally three periods can be distinguished. The first begins shortly after Murād's accession with the conquest of Western Thrace, in which

were taken Čorlu, Demotika (if this town had not already been taken under Orkhān), Gümüldjina, Adrianople (about 1362; cf. ZIEGLER) and Philippopolis, mainly through the activity of the beglerbeg Lala Shāhin and Ewrenos Beg. These conquests provoked a coalition of Servians, Bosnians and Hungarians, who were beaten on the river Maritza by Hüdājī Ilbeki. The western part of Bulgaria was raided up to the Balkan Mountains and the Byzantine Emperor John Palaeologos made his first submission as vassal to Murād. Murād himself had been on a campaign in Anatolia, which brought him as far as Toğat [q.v.] during which he consolidated the Ottoman hold on Angora (already taken by Sulaimān Pasha in 1354; cf. Wittek, *Festschrift Jacob*, 1932, p. 347, 351 sqq.). He then came to Rūm-ili and took up his residence in Demotika, to change this town in 1366 for Adrianople, from this time on the European capital of the Ottomans. The story about a treaty between Ragusa and Murād concluded in 1365 has a legendary character (cf. Giese, *Festschrift Jacob*, 1932, p. 42, after Jireček). In the meantime the hostility between Byzantines and Bulgarians gave Murād the opportunity of taking Ishtebol (Szeropolis) near Burgas, and the same hostility led to the failure, about 1366, of a crusade undertaken at the instigation of Pope Urban V by count Amadeo of Savoy to come to the rescue of the Byzantine Emperor; the expedition only drove the Turks from Gallipoli for a short time.

A second period of Murād's reign may be said to begin with the crushing of a Serbian advance on the Maritza, near Cirmen, probably in 1371. This Serbian defeat is known to the Turkish sources as *İrf (İstikbal)* and gave the Turks during the following years the important Macedonian towns of Seres, Drama and Kavalas, and at the same time the possibility of advancing west of the Vardar. These conquests were made by Ewrenos and Djan-darī Khalīl Pasha, while Lala Shāhin obtained about the same time successes in eastern Bulgaria (battle of Samakow). Then followed again some years of comparative tranquillity, in which the newly won regions were partly colonized with Ottomans; the still unsubdued northern parts of Serbia and Bulgaria were governed by the local rulers as vassals of Murād. The latter had more than once to interfere with the dynastic affairs of the Palaeologoi. After John Palaeologos had sold in 1375 the island of Tenedos to Venice, this led to an action of Genoa in combination with the Turks, in course of which John lost his throne and was imprisoned, until, by the favour of Murād, he became Emperor again in 1379; his dependency went so far as to help the Turks, together with his son Manuel, in the conquest of Philadelphia (Ala Shehir), the only remaining Greek fortress in Asia Minor. The end of this second period is marked by an increased activity in Anatolia. A part of the territory of the Germiyan-Oghlu [q.v.] was acquired as a wedding gift to prince Bayazid when he married the daughter of that ruler (probably in 1381); this territorial accession was followed by the sale of the greater part of the lands of the Hamid-Oghlu to Murād and by the conquest of a part of the principality of Tekke.

About 1385 there followed new conquests in Europe. Turkish troops intervened in Epirus and Albania (under Khalīl Pasha), but decisive for the establishment of Ottoman power in the Balkans

was the taking of Sofia (1385?) and Nish (1386?). About the same time, the Italian republics, Genoa and Venice, obtained by treaties with Murād, concluded respectively in 1385 and 1388, commercial privileges in Turkish territory. Immediately after the successes in Serbia, probably also in 1386, Murād went to war with the Karamān-Oghlu 'Alā' al-Dīn, his son-in-law; this conflict had long been threatening [cf. KARAMĀN-OGHLU]; now the Ottoman power had grown so far as to destroy the political equilibrium in Anatolia. Murād was victorious in the battle of Konya, but left 'Alā' al-Dīn in his possessions and set the example, henceforward traditional, of leniency in dealing with the Anatolian population. This caused a lively discontent amongst the Serbian troops who had taken part in the battle of Konya. These Serbians are said to have contributed to the anti-Turkish feeling among the Serbians in general, who, under the leadership of Lazar Gresljanowitch, and with the Bosnian king Tvrtko as a powerful ally, were preparing a last effort to free themselves from Turkish vassalage. They succeeded in defeating an Ottoman army at Plochnik (1388). The results were meagre, however, for at the same time the Turks made new conquests in Bulgaria (Shumla and Timovo) and even raided Morea. In 1389 Murād himself marched against the Serbians and their allies and fought the famous battle of Kosovo Polje (Turkish: Kösowa), where he himself lost his life, although the Serbians, partly owing to treachery in their own ranks, were defeated. The most probable date is June 20, 1389 (Gibbons, cf. also Giese, in *Ephemerides Orientales*, No. 34, April 1928, p. 2 sq.). The way in which Murād was killed, during or after the battle, is not clear from the early sources; the later Serbian epic tradition has the well-known tale that Murād was murdered by Miloš Obradowitch, Lazar's son-in-law, who, claiming to be a deserter, had obtained an audience with Murād after the battle, was admitted to his presence and killed him with a dagger. Murād's body was transported to Brusa and buried in a *türbe* near the mosque which he had built at Çekirge in Brusa (cf. Ahmed Tewhid, in *T. O. E. M.*, vol. iii.).

Murād I was the first ruler under whom the state founded by Öghmān rose to be more than one of the then existing Turkoman principalities in Asia Minor. This development is symbolised in the successive change of titles given to him in different building inscriptions dated in his reign (cf. Taeschner, in *Isl.*, xx, 131 sqq.). While the oldest inscription calls him simply Bey, like his father Orkhān, and gives him a *şahāh* (Shihāb al-Dunyā wa 'l-Dīn) after the Saljuq fashion, he is already called Sultān [q. v.] in 1385 (1383), while in the inscription from 790 (1388) on the 'Imāret built by him in Iznik, we find the style which afterwards became a tradition with the Ottoman sultāns (*al-malik al-mu'azzam al-shāh al-mubārak al-sultān ibn al-sultān*). It was a time when the old Saljuq traditional institutions no longer held and new forms of government and administration came into being, to which the example of Byzantine institutions, and also those of Mamlūk Egypt may have contributed. Even if it is not true that Djandarl Khair al-Dīn Khalil Pasha — who was appointed Murād's vizier at the beginning of his reign and died about 789 (1387) — was the first Ottoman grand vizier, it

cannot be denied that the activity of this man — who by his origin belonged to a higher culture than the Ottoman — as Murād's councillor as well as his military deputy and administrator in Macedonia, makes him a true prototype of the grand viziers of a later age (cf. Taeschner and Wittek, in *Isl.*, xviii, 66 sqq.). His son 'Alī Pasha began also to play an important military part during the later years of Murād's reign. It is also with Khalil Pasha that the old Turkish sources connect the institution of the Janissaries as troops formed from converted Christian prisoners of war. In the administration of the *timārs* [q. v.] a *Kānūn* of Murād I is said to have brought improvements. Some of these measures were closely connected with the problem of acquiring a quiet and loyal population in the newly conquered Christian territories; this was not possible by Turkish colonisation only but succeeded mainly through a humane treatment of the original inhabitants, after the region had once been conquered.

The more important buildings of Murād I are all in Asia Minor. The best known are the Khudawendikār Djāmi' in Çekirge, near Brusa, where Murād himself is buried, and the Ulu Djāmi' in Brusa; further a mosque in Bilecik, the Nispeti 'Imāret in Iznik (recently described by Taeschner, in *Isl.*, xx, 127 sqq.). There is also a mosque of Murād in Serres. The old Ottoman chronicles enumerate his foundations. — On Murād I's coins cf. 'Alī, in *T. T. E. M.*, xiv, 224.

Bibliography. The information given by the old Turkish chronicles ('Ashik Pasha Zāde, Anonymus, ed. Giese, Urüd), the translations of Leunclavius, also *Disfūr-nāme-i Emverī*, ed. Mukrimin Khalil, Istanbul 1928 and this editor's *Medhal*, Istanbul 1930) is sometimes supplemented by the later historiographers (Sa'd al-Dīn, 'Alī, Münedjdim-Basfi). The Byzantine historians (Phrantzes, Ducas, Chalcondyles), however, give a far clearer survey of this period so far as it came under their attention, while documents from Venice, Genoa and Rome throw light on the diplomatic activities provoked by the advance of the Turks in Europe. Ibn Hādjar al-Asqalāni, *Inbā' al-Ghaur fī Anbā' al-'Umr*, contains also a biography of Murād I. Further the historical works of von Hammer, Zinkeisen and Jorga, and H. A. Gibbons, *The Foundation of the Ottoman Empire*, Oxford 1916, p. 110 sqq.; C. Jireček, *Geschichte der Serben*, Gotha 1918. (J. H. KRAMERS)

MURAD II, sixth ruler of the Ottoman Empire, was born in 806 (1403—1404) and ascended the throne in May 1421, when he arrived in Adrianople some days after his father Muhammed I's death; his decease had been kept secret on the advice of the vizier 'Iwād Pasha until the new sultan's arrival. As crown prince he had resided at Magnisia, and he had taken part in the suppression of the revolt of Simawna Oghlu Badr al-Dīn. Immediately after his accession he had to face the pretender known in Turkish history as Döme Mustafa [q. v.] and his ally Djunaid [q. v.]. Both were supported by the Byzantine emperor Manuel and at first were successful in the European part of the empire. Bayazid Pasha, sent from Brusa, was defeated and killed in the battle of Sızil Ders (between Seres and Adrianople) and the allied Greek forces took Gallipoli. Then Murād himself had to face them in Asia; he suc-

ceeded in sowing discord between Mustafa and Djunaid and defeated the first in the battle of the bridge of Ulubad. Then Murad went over, with the help of ships from the Genoese colony of New Phocaea (Yeni Foça), recovered Gallipoli, after which he entered Adrianople and killed the pretender. In 1422 he began a siege of Constantinople; this siege was raised, either by the effect of Byzantine gold (through the intermediary of the græcophil vizier İbrâhîm Paşa) or as a result of the rise of a new pretender in İznik in the person of Murad's younger brother Mustafa. The latter was at last betrayed by his former supporter İlyâs Paşa and killed. Then followed a struggle with Djunaid, who had established himself again at Aidin, but surrendered at last in 1425, after which he was killed. Murad was now at peace with all his European neighbours and vassals; the Emperor Manuel had died in 1424 and was followed by John Palæologos, with whom peace was concluded. Several towns had been taken in the meantime in Morea, and Wallachia paid tribute. In Anatolia there had been a conflict in 1423 with İsfendiâr of Sinûb, ending with the acquisition of a part of his territory by Murad; after 1425 the Ottoman power was confirmed in Teke and Monteshe and the Karamân Oghlu İbrâhîm, who tried to take the already Ottoman Adalia, had to retire and made peace. In eastern Anatolia Yürkedj Paşa subdued the Turkomans round Tokat and Amasia and of the region of Djanik. In 1428 there began difficulties on the Hungarian frontier. The most noteworthy exploit of this period was however the capture of Saloniki (Selanik; q.v.) in March 1430; after the Greeks had sold this town to Venice in 1427; Murad had never given up the plan of avenging that transaction. Peace with Venice soon followed.

Occasionally the Turks had taken several fortresses in Epirus and Albania, but their interest began more and more to concentrate on the north-western regions, where George Brankovitch ruled as vassal over Serbia. With this latter peace was renewed in 1432 and his daughter Mara was given to Murad, but the Turkish raids continued in Serbia as well as far into Hungarian territory. In 1438 the Turks made, together with Serbians and Wallachians, incursions in Hungary (capture of Semendria); in 1440 they beleaguered Belgrad in vain and in 1442 Turkish troops under Merid Bey laid siege to Hermannstadt. Here they suffered a heavy defeat by John Hunyadi, who in the coming years was to act as champion of Hungary and Christian Europe. He was the leader, in 1443, of a big crusading army including Serbians, Poles and Germans; the Turks were thrown back at Nish, after which Sofia was taken. The campaign ended with a heavy defeat of the Turks at Jalowaz, between Sofia and Philippopolis. In the same year Murad had to oppose again the Karamân Oghlu, who supported the Christian allies. But the peace with Hungary, concluded in July 1444 at Szeged, though advantageous to Hungary, maintained the former frontiers of the Ottoman political influence; only Wallachia became tributary to Hungary.

After this peace, which was to last ten years and seemed to Murad a guarantee for the future, he abdicated in favour of his son Muhammad, leaving with him Khalil Paşa, son of İbrâhîm Paşa (who had died of the plague in 1429) and Khusrav Molla [q.v.] as councillors. He retired

himself to Magnisia, but had to come back when, in September of the same year, the Hungarians, flouting the peace treaty, were preparing a new crusade. They marched south of the Danube to Varna; here the army of Murad inflicted on them a crushing defeat, in which King Ladislas of Hungary was killed. Again Murad II went back to Magnisia, but in the following year a Janissary revolt broke out in Adrianople and it was the vizier Khalil who invited Murad to return a second time, as the young Muhammad did not seem to be able to face the situation.

During the last six years of his reign Murad led again several campaigns in the Balkan peninsula. In 1446 an action was undertaken against the Palæologoi in the Morea (destruction of the Hexamilion, capture of Corinth and Patras); in 1447 against Albania, where the activity of Skander Beg [q.v.] had begun in 1443; in 1448 he faced again a Hungarian invading army, which was beaten on the plain of Kossowa; and in 1450 he was again in Albania (siege of Croja). In that year Constantine Palæologos became, by the grace of Murad II, the last Byzantine Emperor, after the death of John. Shortly afterwards, in the first days of February 1451, Murad died at Adrianople. He was buried in Brusa at the side of his mosque (cf. Ahmad Tewhid, in *T.O.E.A.M.*, iii, 1856).

His reign was of extraordinary importance for the future political and cultural development of the Ottoman Empire. After the first critical years he continued his father's work of consolidation. His aim was mainly to live on peaceful terms with the vassal princes, of whom the ruler of Sinûb and the despot of Serbia gave their daughters to Murad. This peaceful policy was in concordance with his character; the Byzantine historians and other Christian sources describe him as a truthful, mild and humane ruler. His most influential viziers were not yet the renegades of later times; they belonged to the old families that had supported the cause of Murad's forefathers and were becoming a kind of hereditary nobility: İbrâhîm Paşa and Khalil Paşa of the Djandarli Oghullari (F. Taeschner and P. Wittek, in *Isl.*, xviii, 92-107), Hüdâdjî 'Iwaç Paşa (Taeschner, in *Isl.*, xx, 154-159), the sons of Timurtash, of Ewrenos and others. The mystical tradition was strong in his surroundings, as is proved by the great influence of a man like the Shaikh Amr Bukhari; other shaikhs came to his court from Persia and Mesopotamia. This determined also the direction which the classical Ottoman literature was to take in following centuries. Murad II was the first Ottoman prince whose court became a brilliant centre of poets, literary men and Muhammadan scholars (see *TURKIA*, B, iii.). But also to non-Islamic envoys and visitors Murad's court seemed a centre of culture (cf. Jorga, i, 464-199, which description applies principally to Murad II). Amongst the sultan's buildings a mosque in Brusa (cf. H. Wilde, *Brusa*, p. 51) and one in Adrianople (the *Uç Şerheli Dîmî*), are notable and some large bridges. His army organisation is well known from a full description by Chalcondylas.

Bibliography: The older Turkish sources: Neshrî (Haniwaldanus), 'Ashkî Paşa Zâde, Urođj, Rûhi, Anonymus Giese, are completed by the Byzantine historians Phrantzes (who himself played a part in the diplomatic history of the time), Ducas and Chalcondylas, and also by

the later Ottoman authors Sa'd al-Din, 'Ali and Münedžjim Başlı. A curious contemporary description is that of an unknown captive from Mählenbach in Transylvania (captured 1438) in his *Tractatus de moribus conditionibus et nequitia Turcorum* (cf. K. Foy, in *M.S.O.S.*, iv., v.).

General later descriptions of Murad II's reign in the works of von Hammer, *G. O. R.*, I.; Zinkeisen, I. and Jorga, I.

(J. H. KRAMERS)

MURAD III, twelfth ruler of the Ottoman Empire, was born on the 3th Dümada 1953 (4th July 1546; *Sigill-i 'othmāni*, I. 76) as son of the later sultan Selim II and the *Āḥī-ye Nūr* Bānū. He arrived at Constantinople on Dec. 21st, 1574, after Selim II's death and reigned until his death on January 16, 1595 or a few days later. His reign is not characterized by great conquests in Europe. The peaceful relations with Austria were officially maintained; peace was several times confirmed (in 1575 and 1584) by a new treaty and by extraordinary Austrian embassies. Nevertheless there were continual Turkish raids into Austrian territory, especially in Croatia in 1578 — where even a new sandjak was formed — followed by triumphal processions in the capital, which the Austrian envoys were forced to witness. It was only in 1593 that a formal war broke out, in which the then grand vizier Sinan Pasha took the town of Raab (1594). The relations with Venice were of the same kind as with Austria; notwithstanding several serious naval collisions peace was maintained, mainly through the influence of Murad's *Āḥī-ye Şafiye* (of the family of Baffa) and the Kapudan Pasha, who were Italian renegades. In the Danube principalities the never ending dynastic disputes went on; this was also the case in Transylvania. Even Poland was considered more or less as an Ottoman tributary vassal state; the Polish king, Stephan Bathory, owed his crown to the sultan's protection and after his death (1587) the new king Sigismund began to reign by the grace of Murad. The Porte had to intervene several times in the disturbances caused by Polish cossacks in Moldavia and the Tatar Khānate and by Tatar incursions in Poland. In the Crimea the Ottoman intervention was even stronger, because the Persian war necessitated in 1581 and 1583 expeditions by the way of Kaffa and the Crimea against Daghistan and Transcaucasia.

The most outstanding military exploit of the Ottoman Empire during Murad III's reign was the war with Persia, which lasted from 1577 to 1590. Persia passed, after Shāh Tahmasp's death in 1576, through serious inner troubles. This gave the Turks a favourable opportunity of enlarging their territory. Between 1577 and 1584 the chief theatre of the war was Georgia; Lala Mustafa Pasha won the battle of Lake Çaldır (August 9, 1578), after which the princes of the small Georgian kingdoms became nominally Ottoman vassals, while several towns, like Tiflis and Shaki, came under direct military occupation. In 1579 the town of Kars was fortified. That same year Sinan Pasha became serasker on the Georgian front. The completion of the conquests confronted the Ottoman armies with serious difficulties, especially after Simon, the former king of Kartli, had come back from exile in Persia. This made necessary the already mentioned expedition by the way of the Crimea in 1581, under Özdemir 'Othmān Pasha

who was joined in 1583, by the same way, by Dja'fer Pasha; they came back to Constantinople again via the Crimea and 'Othmān Pasha was received with great honour by the sultan after his return, although it would seem that the real aim of the expedition — a junction with the Turkish forces of the south — was not reached, owing to the combined efforts of the people of Georgia and Shirwān (cf. W. E. D. Allen, *A History of the Georgian People*, London 1932, p. 157). The second phase of the Persian war began with the taking of Tabriz in 1585 by 'Othmān Pasha, followed by other successes on Persian territory (Gandja in Transcaucasia and Nihāwend). In 1587 Shāh 'Abbās I ascended the throne; soon afterwards there began peace negotiations, ending in a peace treaty (March 21, 1590) which left Georgia, Shirwān, Karabagh, Tabriz and Luristan to the Ottoman Empire. One of the peace conditions was that the Persians should give up most of their anti-Sunni religious practices.

During Murad III's first years Muhammad Pasha Sokolli [q.v.] had continued to administer the huge Empire as grand vizier, but his once unquestioned authority began to wane under the influence of the sultan's courtiers like Shems Pasha and the defterdar Uweis; an influential personality also was the *Khawāja* Sa'd al-Din — the historian — and the eunuch Ghazanfer Agha. Home and foreign politics were influenced also by Murad's mother Nur Bānū and the already mentioned *Āḥī-ye Şafiye* (Baffa), who used as a powerful agent outside the palace the Jewess Kira (Chieraza in the Italian sources). Sokolli's confidants were relegated from the capital (as the *nihānchī* Feridūn) or executed (like Michael Cantacuzenos). But he was still grand vizier, when he was murdered on October 11, 1579. After him the grand vizierate was changed no less than ten times under Murad III. Sinan Pasha, already mentioned, held the office three times; 'Othmān Pasha, appointed in 1585, after his return from Daghistan, died eight months afterwards. As the sultan, though well-intentioned, was too weak himself to direct a consistent policy, — as he acknowledged himself according to 'Ali (cf. Hammer, *G. O. R.*, II. 567) — all kinds of abuses gradually began in this epoch, especially in the administration of the fiefs [cf. *rimāz*] and the enrolling of the Janissaries; they are summed up in Koçi Bey's *Risāla*. This sultan's reign witnessed for the first time revolts of the Janissaries directed against the imperial *divān* itself. The first mutiny, in April 1589, was caused by depreciation of the coinage and could be appeased only — as so often afterwards — by the sacrifice of the lives of high officials. In 1592 there was a similar Sipahi revolt. More than one provincial rebellion had to be subdued by force; the most celebrated expedition was that of Ibrahim Pasha, the later *istāmlā* and favourite of Muhammad III, to Egypt and Syria in 1585; in Syria he persecuted severely the Banū Ma'an, the leaders of the Druses, but very soon afterwards the successful career of Fakhr al-Din [q.v.] began.

Murad's reign can be characterized as the beginning of the internal weakening of the Ottoman power. The sultan did not possess the strong personality of his grand father; his amorous tendencies were much encouraged by his mother and his wife Şafiye, and he had far more than a hundred

children. Besides he was inclined to mysticism; he protected mystic poets and himself wrote poems under the *tashtullu* Murâdî, besides a mystical treatise called *Furûsât al-Siyâm* (Hâdjî Khalîfa, N^o. 1003). It is possible that he was in sympathy with the repeated outbursts of Muhammadan fanaticism that occurred during his reign and led to the conversion of several churches in the capital into mosques, amongst them the church of the Greek Patriarchate. These actions caused violent but vain remonstrations from the representatives of France and other Catholic powers. The outward splendour of the court was extravagant; the festival of the circumcision of his son Muhammad, in June 1582, seems to have surpassed all similar ceremonies in the Ottoman history (description by Leonclavius).

Bibliography: The Turkish contemporary sources are the historical works of 'Alî (a *Nuṣrat-nâme* of 'Alî is dedicated to the Georgian campaign), Peḫewî, Selânikî, Solak Zâde and Hasan Bey Zâde; Na'imâ and the *Fedâlekz* of Hâdjî Khalîfa begin with the year 1001 of the hidjra (October 1592). Contemporaneous western sources are the *Relazioni* of the Venetian barlo's, the diary of Gerlach; further v. Hammer, *G.O.R.*, iv. and the historical works of Zinkeisen, *l.c.*, Jorga, iii.; E. J. W. Gibb, *H.O.P.*, iii. 170-177. (J. H. KRAMERS)

MURÂD IV, fifth son of sultân Aḥmad I, and seventeenth ruler of the Ottoman Empire, was born 28th Djumâdî I 1021 (July 27, 1612) and called to the throne as a result of the mutiny of the Janissaries and Sipâhis, which had forced Muṣṭafâ I to abdicate, on September 11, 1623. When the lives of Murâd and his brothers were in danger, they had been hidden by Khalfî Paṣha. But even after his enthronement Murâd IV's position was far from strong. The turbulent and continuously mutinying Janissaries and Sipâhis were the real masters of the situation and the seven grand viziers that succeeded each other between the accession and 1632 were more or less dependent on the momentary wishes of those militias. The young sultân and his mother Kösem [q.v.] were at first unable to restore the authority of the government, and more than once they were constrained to sacrifice a high official to the mutinous soldateska, amongst them the grand vizier Hâfî Paṣha [q.v.] in February 1632. Gradually the old experienced statesmen of 'Othmân II's time regained their influence, and sometimes the sultân was able to suppress unreliable officials, as already in April 1624 by the execution of the grand vizier Kemânkeşî 'Alî Paṣha [q.v.], but it was only in 1632 that he became real master of the situation; in that year he had the grand vizier Redjeb Paṣha — until that time one of the most influential men at court — executed, after which began Murâd IV's personal reign of terror.

During this period from 1623—1632 the Asiatic affairs of the Empire required all the available energy of the Porte. In 1623 Baghdâd had fallen after many atrocities into the hands of the Persians as a result of the intrigues of the Turkish *paḫsâ* Bekir; Mâyul also became Persian, and the Anatolian army under Hâfî Paṣha was powerless. Abâza Paṣha [q.v.] was still in revolt at Erzerûm; in 1624 an agreement was reached with him, but only in 1628 the grand vizier Khosrew Paṣha

forced him to surrender, after which Abâza played a part as governor of Bosnia and of Silistria. In the meantime several vain efforts were made to recover Baghdâd, by Hâfî Aḥmad Paṣha in 1626, and by Khosrew Paṣha [q.v.] in 1630.

From 1632 Murâd IV prepared with incredible energy the mobilisation of all the country's resources for the war against Persia, where Shâh 'Abbâs I had died in 1627. He suppressed with great cruelty the rebellious movements among the Janissaries and reduced their number by not applying the *dergâhîr* for twelve years. New and more reliable troops were formed from the *dîbedîs*, *bistandîs* and especially the *seghîns* (*aymens*). The necessary funds were procured by drastic financial measures, amongst them the confiscation of large fortunes. Every attempt at opposition was cruelly suppressed; in 1633 even the Shaikh al-Islâm Aḥmî-Zâde Husain was executed. In October 1633 an army under the new grand vizier Tabanî Vâsî Muhammad Paṣha left Constantinople, but that year and the following no important military operations took place. The Kapudan Paṣha Dîa'far, however, was successful in suppressing the power of the Druse Amir Fakhr al-Dîn [q.v.] and bringing him alive to Constantinople. In 1635 Murâd himself left the capital, joined the grand-vizier's army in Erzerûm and conquered Eriwan (August 1635). Then the undefended Tabriz was taken and destroyed, after which the sultân returned. In the following year the Persians recaptured Eriwan. Finally, in 1638, Murâd took the field for the second time with the grand vizier Taiyâr Muhammad Paṣha; Baghdâd was taken by them in December 1638, and thousands of Shî'îs were massacred. This was the end of the Persian war; in 1639 a peace was concluded, which left Baghdâd to Turkey and Eriwan to Persia.

In comparison with the events in Asia, European affairs were of secondary importance. The peace with Austria was several times renewed (1625 at Gyarmath and 1627 at Sâbn) although predatory raids from both sides never ceased. Serious trouble was caused in 1624 by the appearance of Cossack ships in the Bosphorus; they were defeated only in 1626. Another hotbed of unrest was the Crimea, where from 1624 till 1628 the Porte had to suffer against its will the Khân Muhammad Girây and his brother Shâhin Girây, who even took Kaffa for a time. After 1628 the Tatar Mirâ Kântemir (or Kântimîr), chief of the Noghays, became the most powerful man in the khânate; his continual incursions caused serious conflicts with Poland (peace restored in 1634) and in Moldavia. At last Kântemir was executed at Constantinople in 1637.

The peaceful relations with Venice and the western sea powers continued; in 1624 the capitulations had been renewed, but as the Porte was without authority over the Barbary states of Algiers and Tunis, England, Holland and France concluded separate treaties with their rulers in order to avert as much as possible the damage done to their trade by the ships of the corsairs. In 1638 a more serious battle took place in the Adriatic between the Venetian fleet and Barbary corsairs; at first Murâd ordered the massacre of all Venetians in his Empire, but in 1639 peace was restored. In Constantinople the ministers of Holland (Haga) and England (Roe) intervened successfully in the

troubles between the Porte and the Greek Patriarchate.

Murād IV died on February 9, 1640 and was buried in the turbe of the mosque of his father Ahmad; he was the last warlike sultan of the Empire; by his energy he restored for some time its military authority, but his reforms did not last after him. Still a separate *ẓān-nāme* bears Murād IV's name. He was a man of considerable physical strength and of high personal erudition and he liked the company of poets. His attachment to the poet Tifti [q. v.] is famous in literary tradition. The poet Nef'i [q. v.] on the other hand was executed by his order. On verses written by Murād cf. Gibb, *H.O.P.*, iii. 248 *seqq.* He had four sons, all of whom died young; at his death there was only his brother Ibrāhīm to take the succession. His brothers Bāyazīd and Sulaimān were killed by his order during the Eriwan campaign, and later also his brother Kāsim. In course of time Murād had become ever more ferocious, and he is said to have sworn in 1639 that he would subdue all his Christian neighbours (Jorga, iv. 1).

Bibliography: The chief Turkish sources are Na'imā, Pečewi and Kara Çelebi Zāde's *Rawdat al-Abrār*. Further the continuation of 'Atāyī's biographical work by 'Ushāki-Zāde (*G.O.W.*, p. 259); Ewliyā Çelebi's *Siyāhat-nāme* is also particularly rich in information about the reign of Murād IV. Of Western contemporary sources must be mentioned the Venetian *Relazioni* and the correspondence of Sir Thomas Roe and Cornelius Haga (*Rijks geschiedkundige Publicatien*, x.; *Bronnen tot de Geschiedenis van den Levantischen Handel, 1590—1660*, II, 's Gravenhage 1910). Later treatments of this period in the general works of von Hammer (v.), Zinkeisen (iv.) and Jorga (iii.).

(J. H. KRAMERS)

MURĀD V, Ottoman Sultan from May 31 till Sept. 7, 1876. He was born on Sept. 21, 1840 as son of Sultan 'Abd al-Majid and was deprived of all influence on public affairs during the reign of his elder brother 'Abd al-'Aziz, who had the plan of altering the succession in favour of his own descendants, so as to deprive Murād of his rights. Murād was called to the throne by the coup d'état of the recently established cabinet, of which Midhat Pasha [q. v.], Muhammad Rushdi and Husain 'Awni were the leading members. By deposing Sultan 'Abd al-'Aziz they hoped to eliminate the influence of reactionary elements who were opposed to their schemes of reform and they expected to find an ally in Murād. In the night from 30th to 31st May 1876 Murād was induced with some difficulty to proceed to the Seraskerate in Constantinople, where he received the homage of the troops and the high dignitaries. He confirmed the cabinet in office. Very soon afterwards took place the suicide of the deposed sultan (June 5) and the murder of the ministers Husain 'Awni and Rashid Pasha during a cabinet meeting in Midhat's house (June 15). These events seem to have been fatal to the mental equilibrium of the new sultan, who, already in the night of his accession, had shown signs of abnormal nervous excitement. He was unable to appear before his people at the *istislah*, nor could the sword-girding ceremony (*miladi alay*) be applied to him. Midhat Pasha and his friends, although fearing that a new

change of ruler might endanger their plans, had to arrange another deposition; they had the sultan's health examined by a number of physicians and, on their report, obtained a *fatwa* from the Shaikh al-Islām Hasan Khair Allāh Efendi, authorizing Murād's deposition (September 1). His younger brother 'Abd al-Hamid II became sultan and Murād went to live in the Çiraghan Palace, where he died on August 29, 1904. His confinement during 'Abd al-Hamid's reign continued to excite speculation as a yet unsolved mystery and was occasionally represented as one of the crimes of the Hamidian regime.

(J. H. KRAMERS)

MURĀD PASHA, Turkish grand vizier under Ahmad I, was a Croatian by birth and was born about 1520. He served the empire as military commander and later as *wālī* in different provinces (Egypt, Yaman, Anatolia) and was made prisoner by the Persians in the battle of Tahrit (Sept. 1585), where Çiğhāle's army was defeated. In 1601 he was pasha of Budin and in 1603 commander-in-chief on the Hungarian front. In these posts he repeatedly conducted for the Porte peace negotiations with Austria. He was the chief negotiator of the peace of Zsitvatorok (Nov. 11, 1606). A month afterwards (Dec. 11, 1606), after the execution of Derwish Pasha in Constantinople, he was appointed grand vizier, being then already about 80 years of age.

As grand vizier Murād Pasha became particularly famous by his relentless persecution and repression of the many rebellions in the Asiatic provinces. In 1607 he defeated the Kurd Dhanbulād [q. v.] in North Syria (battle of Urudj Owāl in Oct. 1607). After having passed the winter in Aleppo, he succeeded in crushing the forces of the arch-rebel Kālander Oghlu at the pass of Gökseun in Cappadocia (July 1608), where he decided the battle by his personal courage. Then he pursued from Siwās the rebel Maimūn and defeated him near Baiburt. His habit of throwing the captured rebels into pits dug for that purpose brought him the name of Koyudju Murād Pasha. Notwithstanding the sultan's order — provoked by his enemies in the capital — that he should proceed immediately against Persia, he returned in December to Constantinople, where he was received with great honours. Poets celebrated his achievements against the rebels. In 1609 Murād Pasha went to Scutari for the Persian campaign, but he went no further that year, because he wished first to deal with two remaining dangerous rebels: Muselli-Çağh in İrāq and Yūsuf Pasha in Aidin. By false propositions of reconciliation these two were at last induced to surrender and afterwards killed. Murād Pasha had to make use more than once of his personal influence with the sultan to restrain the latter's impatience before his plans had succeeded.

On the other hand, the sultan had to protect several dignitaries against the personal hatred of the terrible old man. In 1610 the grand vizier at last marched to Persia and destroyed Tabriz; then he went to Esfahan, from where he began long and extended negotiations with Shāh 'Abbas. Before the following year's campaign had begun, he died (August 5, 1611). He was buried in a *tūrbe* near the *madrase* he had founded in the quarter *Wazmedjiler* in Constantinople.

By his successes in restoring the internal order of the empire Murād Pasha is considered as one of the most able grand viziers; the historians give ample proofs of his sound judgment of persons and situations. To his initiative is due a compilation of the *qānūns* regulating the *timār* administration (G. O. W., p. 141).

MURĀD ŠÜ. [See AL-FURĀY.]

MURĀDĀBĀD. [See MURĀDĀBĀD.]

MURĀDĪ, *tajkhalīq* of Murād III [q. v.] and Murād IV [q. v.].

MURCIA (Ar. *Mursiya*), a town in the S. E. of Spain, 140 feet above sea level in the centre of the famous *huerta de Murcia* ("gardens of Murcia") watered by the river Segura (Ar. *Wādī Shuhūrā* [q. v.] or *Wādī 'l-abyaḍ*, "the white river"). The area of Murcia has a large population: over 150,000, although the town in the strict sense has barely 30,000. Murcia is the capital of the province of the same name and the see of a bishop; it has also a university. Its port, 40 miles to the south on the Mediterranean coast, is Cartagena, the *Karṭājanna* or *Karṭājannat al-Khulafā'* of the Arabs.

The situation of Murcia in the centre of very fertile gardens, forming an island of vegetation in a bare country poorly endowed by nature, had been noticed already by the Arab geographers who give more or less long accounts of it. Abu 'l-Fidā', for example, says that it was like Seville for the number of its groves and parks (*muntazahāt*), among which he mentions the famous al-Rushāka.

Murcia in the Umayyad period was the capital of a province or *kūra* which bore the name of Todmir [q. v., iv. 805]. This name which is connected with the name of Theodemir, a Visigothic chief of the region at the time of the Muslim conquest, was also applied to the town of Murcia itself, from the time when it supplanted Orihuela [q. v.] as the chief town of the region. Indeed almost all the Arab authors who speak of Murcia agree in saying that it was a comparatively recent foundation; it was built by order of the Umayyad emir 'Abd al-Rahmān II al-Hakam about the year 210 (825), according to the *al-Rawḍ al-miṣbāḥ* in 216 by the governor Dīshir b. Mālik b. Labid.

The land of Todmir and with it of course Murcia was much involved in the civil wars provoked by the rivalry of the Yamanis and the Muḍaris of Spain in the period of the independent emirs of Cordova. In the reign of 'Abd Allāh (275-300 = 888-912), a rebel, the renegade Daisam b. Ishāk, rose there with the connivance of the famous agitator Ibn Hafṣūn [cf. Umayyads II]. He ruled independently all the province

of Todmir until the emir of Cordova sent to suppress him in 283 (896) an army led by his uncle Hishām b. 'Abd al-Rahmān b. al-Hakam and the general Ahmad b. Muhammad Ibn Abi 'Abda. Daisam was defeated between Alcedo and Lorca and the latter town besieged. The country was only definitely pacified and restored to the central power in Cordova in the reign of the caliph 'Abd al-Rahmān III and his successor al-Hakam II.

During the events which ended in the break up of Umayyad Spain, Murcia became, like the majority of the great towns of the Peninsula, the capital of a little independent state. At first in the hands of the "Slavs" [cf. *SAKALIBA*] Khairūn and Zuhair, along with Almería and Jaén, the principality of Murcia was then for some time attached to the kingdom of Valencia, in the reigns of 'Abd al-'Aziz al-Manṣūr Ibn Abi 'Amr and his son 'Abd al-Malik al-Muḥaffar. The governor who then ruled Murcia was Abū Bakr Ahmad b. Ishāk Ibn Tāhir; when he died in 455 (1063) after amassing a considerable fortune, he was succeeded by his son Abū 'Abd al-Rahmān Muhammad who soon proclaimed himself independent and repudiated the authority of the Valencian dynasty.

The principality of Ibn Tāhir soon aroused the covetousness of the minister of al-Mu'tamid [q. v.] Ibn 'Abbād, king of Seville, and an expedition was sent against Murcia with the help of an independent lord of the district, Ibn Rashīk. Ibn Tāhir was taken prisoner and shut up in Montegudo, but escaping, he reached Valencia where after acting as adviser to al-Qādir Ibn Dhi 'l-Nūn [q. v.] and having almost succeeded him, he finally died in 508 (1119). The conquest of the kingdom of Murcia by Ibn 'Anmār in the name of the 'Abbāsids took place in 471 (1078), but it was only nominal and it was Ibn Rashīk who exercised the real power instead of Ibn Tāhir.

The kingdom of Murcia was one of the first districts of the Peninsula to be conquered by the Almoravids. Murcia was taken for Yūsuf b. Tāshfīn [q. v.] in Shawwāl 484 (Nov.-Dec. 1091) by the Lamtūnian general Ibn 'A'isha who next took Denia and Játiva. Ibn 'A'isha remained governor of Murcia; he was replaced later by Abū Bakr b. Ibrāhīm Ibn Tiflūt, then by a brother of the sultan 'Alī b. Yūsuf, Abū Ishāk Ibrāhīm.

A general rising against the Almoravids took place in Spain in the beginning of the 12th century and gave rise to the formation of a new series of kingdoms of "taifas". Murcia therefore between 1145 and 1147 was in the hands of two rival leaders, 'Abd Allāh b. Iyād and 'Abd Allāh b. Faraj, until the Valencian ruler Muhammad b. Ahmad b. Sa'īd Ibn Mardaniṣh seized it and took up his residence there. This individual, who was of Spanish origin (cf. above, ii., p. 403), soon became the powerful ruler of all S. E. Spain, between Valencia and Almería, and instituted a series of fruitful alliances with the Christian rulers of Catalonia, Aragon and Castile. He was for long able to resist the attacks of the first Almohads 'Abd al-Mu'min [q. v.] and Yūsuf [q. v.], and it was only after his death in 567 (1172) during the siege of his capital Murcia that his kingdom passed finally to the Mu'minid sovereigns.

From the fall of the Almohad empire in Spain until its conquest by the Christians Murcia had

a very troubled existence. It was in turn the residence (from the beginning of the thirteenth century) of princes of the family of the Banū Hūd of Saragossa: Muḥammad b. Yūsuf al-Mutawakkil, the latter's uncle, Muḥammad, Abū Bakr Muḥammad al-Wāḥid, then it passed to the Nasrīds of Granada to 'Abd Allāh b. 'Alī Ibn Ashkīlūla. For details of the obscure history of this period see the monograph by Gaspar Remiro quoted below. According to Ibn al-Abḥār (cf. M. Bencheh, *Notes chronologiques sur la conquête de l'Espagne*, in *Mélanges René Basire*, Paris 1923, ii, 73), Murcia was surrendered to the Christians by Ahmad b. Muḥammad b. Hūd, son of the governor, on Thursday 10th Shawwāl 640 (April 2, 1243). But if we may believe the Christian chronicles it was in February 1266 that Don Jaime of Aragon took definite possession of Murcia.

MURDĀDH (r.), the fifth month of the Persian solar year running from July 19 to Aug. 18 (*Murdādh māh*). *Murdādh* is also the name of the seventh day of each month (*Murdādh rūḥ*); it is the last of the series of the days which are called after the Amesha Spentas. *Murdādh* (Pehlevi *amurdādh* "immortality") forms with *Khur-dādh* [q.v.] (Pehlevi *khurdādh* "perfection") an indivisible pair and the days which bear these names come together. They denote a pair of archangels, of whom *Murdādh* has charge of the gifts of the earth on which the life of man depends. The seventh day of the month *Murdādh* on which the names of the day and of the month are the same is called *Murdādhgān*.

Bibliography: al-Birūnī, *Ākhār*, ed. Sachau, p. 42, 43, 70, 221; Geiger-Kuhn, *Gr. I. Ph.*, ii, 638, 675 *sqq.* (M. PLESSNER)

AL-MURDĪ'A, name of one of the early sects of Islām, the extreme opponents of the Khārijites [q.v.]. The latter thought that a Muslim by committing a mortal sin becomes a *kāfir*. The *Murđī'a*, on the other hand, were of opinion that a Muslim does not lose his faith through sin. This doctrine led them to a far-reaching quietism in politics; according to their doctrine, the *imām* who was guilty of mortal sins did not cease to be a Muslim and must be obeyed. The *qalāt* performed behind him was valid.

Occidental and Oriental explanations of the name show considerable divergencies (cf. e.g. Sale, *Preliminary Discourse*, p. 229 *sq.*; Goldziher, *Richtungen der islam. Karamanlegung*, p. 179; v. Kremer, *Gesch. d. herrschenden Ideen*, p. 20; Houtsma, *Strijd over het dogma*, p. 34). It seems to me that the origin of the name must be sought in the term *irḡā'*, in this way that *Murđī'a* meant adherents of the doctrine of *irḡā'* ('Abd al-Kāhīr al-Baḡhdādī uses the term for their doctrine) and that this term goes back to verse 107 of *sūra ix*. The context of this verse not only explains the term *irḡā'*, but may also give an insight into the evolution of the ideas of the *Murđī'ites*. In the preceding verses Muḥammad makes a distinction between two groups among the Madinese who had forsaken him in the expedition to Tabūk [q.v.]: some had shown *nifāq* without penitence; they were to receive punishment in this and in the other world (verse 102). Others had shown penitence (*tawba*); they were left to Allāh's mercy (verse 103). The third group, who had not made penitence, were left in suspense (*murđj'ana*, or, according to a different reading, *murđj'ama*).

The situation in Madina after the expedition to Tabūk was generalised by later sects. As a matter of fact, the third group mentioned in the passage discussed — viz. sinners who did not show penitence — was relegated to Hell by the Khārijites. In opposition to this, the *Murđī'ites* taught the doctrine of *irḡā'* mentioned in *sūra ix*, 107 and therefore they were called *Murđī'a*, i.e. the adherents of the doctrine of respite or hope; for this the term *irḡā'* means; the variants *murđj'ana* and *murđj'ama* are irrelevant in this respect.

In the course of time the doctrine of the *Murđī'a* assumed a double aspect. Their chief thesis was the indelible character of faith, in opposition to the Khārijites. Their second thesis was of an eschatological nature: where there is faith, sins will do no harm. On account of the latter doctrine they were called the adherents of promise (*ahl al-wa'd*), in contrast to the *Ma'tazila* [q.v.] who were called the adherents of threats (*ahl al-wa'id*). So the doctrine of *irḡā'* had acquired a triple aspect — which accounts for the divergent explanations of the name —, viz. the doctrine of faith bearing an indelible character, an indulgent attitude towards sinners in the Muslim community, and a hopeful prospect for them in the Last Judgment.

These are the chief tenets of the *Murđī'a* as they appear to us as well as to later Muslim writers such as al-Shahrastānī. Earlier authors enumerate a number of divergencies among the different groups of *Murđī'ites*. Al-Aḡḥārī mentions their variety of opinion regarding faith, unbelief, sins, *kufr*, interpretation of the Qur'ān, eschatology, mortal and venial sins, forgiveness of mortal sins, the impeccability of the Prophets, punishment of sins, the question whether there were infidels among the early generations of Islām, redress of wrongs, the beatific vision, the nature of the Qur'ān, the *quidditas* of Allāh, His names and *isfāt*, predestination.

'Abd al-Kāhīr al-Baḡhdādī mentions three groups of *Murđī'a*: a. those who taught *irḡā'* regarding faith and free-will; to this group belonged Ghallān Abū Marwān al-Dimashqī, Abū Shāmir, Muḥammad b. Abī Shāhib al-Baḡrī; b. those who taught *irḡā'* regarding faith and compulsion (*ijbār*); c. those who gave faith the pre-eminence before works and

belonged neither to the adherents of the doctrine of free will nor to those of predetermination; to the latter group belonged the followers of Yūnus b. 'Awa, Ghassān, Abū Thawbān, Abū Mu'adh al-Tawmānī, Bishr b. Ghayāth al-Marāṭī [q. v.]. The followers of Ghassān reckoned Abū Hanīfa as one of their friends, not, however, quite rightly, according to al-Baghādādī. That Abū Hanīfa shared the general views of the Murdjī'a, appears from his (unedited) letter to al-Battī, which is preserved in a MS. in the library of Cairo.

Although al-Baghādādī mentions a *ḥadīth* in which the Murdjī'a are cursed, the high esteem in which Abū Hanīfa stood as a dogmatist and as a doctor of the law would be in itself sufficient proof of the fact that the "sect" was not too eccentric. As a matter of fact, their political quietism was largely practised by orthodoxy itself. As regards eschatological punishment, the *Fiḥḥ Akbar*, ii. (art. 14) rejects the Murdjī'a doctrine of our good deeds being accepted and of our sins being forgiven, Allāh being free to punish the sinner or to grant him forgiveness. — The same *ʿaḥida*, however, shares the Murdjī'a doctrine of the constancy of faith (art. 18).

MURGHĀB. [See MERW AL-SHĀHĪDĀN.]

MURID, novice, the term applied during his period of preparation to one who wishes to enter a dervish order [TARĪQA; q. v.; cf. also DRUWISH] or a guild [ḡIR; q. v.]. The task of the murīd and his obligations to his master (*shaykh*, *pir*) and to his ideal and their mystic and erotic foundations have been often and fully discussed, so that it is here sufficient to give a reference to the most important literature of modern times, which will guide one to the sources themselves. In the wider application of the word murīd has become a term for mystic in general.

AL-MURİYĀNĪ, Abū Aiyūb Sulaimān al-Khūzī, vizier of the caliph al-Manṣūr. When the governor of Fārs Sulaimān b. Ḥabīb al-Muhallabī in the Umayyad period had the future caliph al-Manṣūr, who was accused of embezzling state funds, flogged and intended to treat him with still greater indignity, the latter was saved by Abū Aiyūb al-Murīyānī who was Sulaimān's secretary. According to another story, al-Manṣūr purchased him as a young boy and sent him in

some capacity to his brother, the caliph al-Saffāh, who was so pleased with him that he at once took him into his service and retained him there after his manumission. Al-Murīyānī was in any case appointed vizier by al-Manṣūr in succession to Khālid b. Barmak. He had a great influence over the caliph; in 153 (770) however, he was arrested with his brother and the latter's sons and deprived of all his property. According to some, his crime was that he had embezzled a large sum received from al-Manṣūr to make a district in Khūzistān arable and deceived the caliph when he came to inspect it by making the place look as if it were cultivated. According to others, he had a son of al-Manṣūr murdered. He died in prison in 154 (770/1). — The nisba *al-Murīyānī* comes from Murīyān, a town in Khūzistān.

MURSAL (A.), part. pass. IV from *arsala* "to send". As a technical term it denotes a: an apostle of Allāh; b, traditions of which the *imād* is defective in a certain sense; cf. *ḤADITH*, iii. c.

AL-MURSALĀT, title of *sūra* lxxvii., after the first verse: "By those which are sent by Allāh, following one another in a continual series". According to some interpreters a certain group of angels is meant here; according to others, however, the *mursalāt* are the verses of the *Qur'ān*. See the commentaries on the *Qur'ān* on *sūra* lxxvii. 1.

MURSHIDĀBĀD, district in the Presidency Division of Bengal; area 2,143 sq. m.; pop. 1,372,274, of whom 713,152 are Muslims. The public offices are at Barhampūr, but the old capital is at Murshidābād, which before Murshīd Kullī's appointment was known as Makhdūdābād or Makhdūdābād. The district is mainly agricultural, and produces much rice, jute, etc., and is famous for its mangoes. The silk industry was formerly of great importance, but has now much declined. The district played a very prominent part in the history of Bengal, and is full of historical sites though Plassey is now outside its borders. The history of Calcutta and of the English in Bengal is intimately connected with Murshidābād. But the Nawābs are no longer of political importance.

AL-MURTADĀ AL-SHARĪF ABU 'L-KĀSIM 'ALI b. AL-TAHIR DHU 'L-MANĀJIN ABI AHMAD AL-HURBAIN b. MUSA b. MUHAMMAD b. IBRAHIM b. MUSA AL-KĀSIM b. DHA'IR AL-SADIQ b. MUHAMMAD AL-BAKIR b. 'ALI ZAIN AL-'ABIDIN b. AL-HUSAIN b. 'ALI n. ABI TALIB, 'ALAM AL-HUDA, Arab author born in 355 (966), died in 436 (1044) as *Nafih* of the 'Alids in Baghdad. Of his works, which are detailed in Ahlwardt, *Verzeichnis der Hds. in Berlin*, No. 16, we still have the following: 1. His principal work *Qhurar al-Fawa'id wa-Durar al-Kal'id bi 'l-Muqaddarat*, usually called briefly *al-Durar wa 'l-Qhurar*, which he finished on the 22nd Djamādā I 413 (Aug. 24, 1022) is an *adab* book which to the discussion of verses of the Qur'an and traditions adds numerous philological and lexicographical notes and extensive references to poets and is divided into 80 (82) *madjalis*, lith. Tihra 1273, 1277, pr. Cairo 1325 as the *Kitāb al-Amālī*; 2. *Kitāb al-Sūfi*, a defence of the imamate of the Twelvers against the *Mughni* of the Mu'tazili chief kadi of the Shāfi'is in Raiy Abu 'l-Hasan 'Abd al-Qabbār b. Ahmad al-Asadābādī († 415 = 1024), along with an abbreviation of the year 432 (1040) by Shaikh al-Tusi entitled *Talhiq al-Sūfi* printed in one volume Tihra 1301; 3. *Irshād al-'Awāmm* in a collected volume Tihra 1304 (s. E. G. Browne, *A Year among the Persians*, p. 554); 4. *al-Dhar'ā ilā Uqūl al-Shar'a*, Brit. Mus. Or. 5581 (*Descriptive List*, No. 21); 5. *al-Mawā'il al-Nafisiya* in the collected volume *al-Djawnūn al-Fihriya*, Tihra 1276; 6. *al-Intiqār*, on the differences between the Shāfi' and the other *madhāhib*, lith. Bombay 1315 (s. Goldziher, *Verl. über den Islam*, p. 271); 7. *al-Shikāh f 'l-Sharīh wa 'l-Shahād*, pr. Stambul (Djawa'ib) 1302 in a *Madjmu'a*, Tihra 1272 (s. Goldziher, *Abhandl. zur arab. Philologie*, II, p. xxi, lvi.).

He is also regarded by some as the author of the *Nahj al-Balagh*, a collection of reputed sayings of 'Ali, which others (so always in Yemen, according to MSS. of the Ambrosiana, see R.S.O., III, 574) attribute to his brother al-Ra'ī Abu 'l-Husain Muhammad, born in 359 (969), d. 406 (1015) [s. vol. IV, p. 354 sq.]; lith. Tabriz 1247, Tihra 1271, Cairo n.d., Bairat 1885 with commentary by Muhammad 'Abduh (d. 1905), Cairo 1290, 1328, with footnotes by Muhammad Hasan Na'il al-Masafi, 1925. Commentaries on it were written by: 1. his contemporary 'Ali b. al-Nāsir al-Husaini entitled *Fihm Nahj al-Balagh*, a *Catalogue of the Arabic MSS. in the Bihār Library*, No. 413, II; 2. 'Izz al-Din Abū Hāmid 'Abd al-Hamid b. Hibat Allāh b. Abi 'l-Hadid al-Madī'ī, d. 655 (1257) [*G.A.L.*, I, 249—282], Bombay 1304; Tihra 1270, 2 vols., 1281, 10 vols.; Cairo 1330, 20 vols.; 3. Kamāl al-Din Mitham b. 'Ali b. Mitham al-Nadīrān in 776 (1374), *Fihris*, Cairo, IV, b, 60; 4. 'Imād al-Din Yahyā b. Ibrāhīm b. Yahyā al-Djāhshī (s. Brit. Mus. Suppl., No. 1228, IV; his *Diwan* in Munich, Glaser, No. 104) in the Ambrosiana, C 7, s. R.S.O., VI, 1304; 5. (Persian) Fakhr al-Din 'Ali b. Hasan al-Zawāri in the reign of Shah Tahmāsp I (930—984 = 1524—1576); s. *Story, Pers. Literature*, I, 14; 6. (Persian) the latter's contemporary Husain b. 'Abd al-Hakīm al-Ithī al-Astarābādī, s. Ivanov, *Cat. At. Soc. Bengal*, No. 1107. The book was also several times translated into Persian e.g. by 'Ali b. Hasan al-Zawāri about 647 (1249) entitled *Rawdat al-Abrār*, s. *Catalogue Browne*, p. 10; by Fath Allāh b.

Shukr Allāh al-Kāshāni (d. 978 = 1570; according to the *Katib al-Hudūd*, p. 143 in 997 = 1589) entitled *Tanbih al-Ghāfilin wa-Tadhkirat al-'Arifin*, s. Rich, *Brit. Mus.*, No. 18, 1120—1121; Ivanov, *Cat. At. Soc. Bengal*, II, 372; *Cambridge Suppl.*, No. 1342; Asafiyu, II, 1608, No. 185.

While the authorship of the *Nahj al-Balagh* must remain open the anthology *Talif al-Khayāl* is to be ascribed to our author and not with Derenbourg, *Cat. Escur.*, No. 348 to his brother, as in the preface he quotes his own work mentioned under No. 7. He and not his brother as in the article SHARIF PASHA is to be credited with the *Madjāsāt al-Kur'an*, which Hādījī Khalifa No. 11377 ascribes as *al-Madjāsāt al-Ra'ī* and he is probably also the author of the *Kitāb al-Madjāsāt al-nabawiya*, also ascribed to al-Ra'ī and extant in a manuscript in the British Museum (s. *Oriental Studies presented to E. G. Browne*, p. 137, No. 2) and was printed at Baghdad in 1328. This also holds of the *Kitāb Ma'āni al-Kur'an*, there quoted but now lost. The Turkish commentary on the *Diwan* ascribed to 'Ali also credits him with the authorship.

Bibliography: Ibn Khalikān, ed. Wāstenfeld, No. 454; Cairo ed., I, 243; al-Bakharī, *Dumyat al-Kayr*, p. 75; Tusi, *List of Shia Books*, p. 472. (C. BROCKELMANN)

MURTADD (A.), "one who turns back", especially from Islam, an apostate. Apostasy is called *irtidād* or *riḍā*; it may be committed verbally by denying a principle of belief or by an action, for example treating a copy of the Qur'an with disrespect.

1. In the Qur'an the apostate is threatened with punishment in the next world only; the "wrath of God" will fall upon him according to a Sūra of the latest Meccan period (xvi, 108 sq.) and severe punishment (*adhāb*) "except he did it under compulsion and his heart is steadfast in belief". Similarly it is written in the Medina Sūra iii, 80 sq.: "... This is the punishment for them, that the curse of Allāh, the Angels and of men is upon them for all time (82); the punishment shall not be lightened for them and they shall not be granted alteration, (83) except for those who later repent and make good their fault, for Allāh is forgiving and merciful. (84) Those who disbelieve after believing and increase in unbelief, shall not have their repentance accepted; they are the erring ones. (85) Those who are unbelievers and die as unbelievers, from none of them shall be accepted the earth-full of gold even if he should wish to ransom himself with it; this is a painful punishment for them and there will be no helpers for them" (cf. also iv, 136; v, 59; ix, 67). Sūra ii, 214 is to be interpreted in the same way although it is adduced by Shāfi' as the main evidence for the death penalty: "... He among you who falls away from his belief and dies an unbeliever — these, their works are fruitless in this world and the next, and they are the companions of the fire for ever".

2. There is little echo of these punishments in the next world in the Traditions (cf. Ibn Māja, *Hudūd*, bāb 2; Ibn Hanbal, I, 409, 430, 464 sq.; v, 4, 5). Instead we have in many traditions a new element, the death penalty. Thus Ibn 'Abbās transmits an utterance of the Prophet: "Slay him, who changes his religion" or "behead him" (Ibn Māja, *Hudūd*, bāb 2; Nasā'i, *Taḥrim al-Dam*,

bab 14; Tayāliṣ, N^o. 2689; Mālik, *Aḥḍiyā*, tr. 15; cf. also Bukhārī, *Istīṣāḥ al-Murtaddīn*, bab 2; Tirmidhī, *Hudūd*, bab 25; Abū Dāwūd, *Hudūd*, bab 1; Ibn Hanbal, l. 217, 282, 322. According to another tradition of Ibn 'Abbās and 'A'isha, the Prophet is said to have permitted the blood to be shed of him "who abandons his religion and separates himself from the community (*Djama'a*)" (Bukhārī, *Ḍiyāt*, bab 6; Muslim, *Kaṣāma*, tr. 25, 26; Nasa'i, *Tahrim al-Dam*, bab 5, 14; *Kaṣāma*, bab 6; Ibn Mājā, *Hudūd*, bab 1; Abū Dāwūd, *Hudūd*, bab 1; Tirmidhī, *Ḍiyāt*, bab 10; *Fitan*, bab 1; Ibn Hanbal, l. 382, 444). But there was no agreement from the first on the nature of the death penalty; thus 'Ikrima (d. 106 = 724) and Anas b. Mālik (d. 91 = 710) criticise 'Alī for having burned apostates (Bukhārī, *Istīṣāḥ al-Murtaddīn*, bab 2; Tirmidhī, *Hudūd*, bab 25; Abū Dāwūd, *Hudūd*, bab 1; Ibn Hanbal, l. 217; according to a variant the reference is to Zindīka or Zaqq, who served idols; Nasa'i, *Tahrim al-Dam*, bab 14; Ibn Hanbal, l. 282, 322). According to a tradition of 'A'isha's, apostates are to be slain, crucified or banished (Nasa'i, *Tahrim al-Dam*, bab 11; *Kaṣāma*, bab 13; Abū Dāwūd, *Hudūd*, bab 1).

On the question whether the apostate should be given an opportunity to repent, traditions differ. According to one tradition of Abū Burda (d. 104 = 722), Mu'adh b. Djaḥal refused to sit down until an apostate brought before him had been slain "in accordance with the decision of God and of his apostle" (Bukhārī, *Maḡāzī*, bab 60; *Istīṣāḥ al-Murtaddīn*, bab 2; *Aḥḍiyā*, bab 12; Muslim, *Imāra*, tr. 15; Abū Dāwūd, *Hudūd*, bab 1; Ibn Hanbal, v. 231). In the same tradition in Abū Dāwūd however, it is added that they had tried in vain for 20 nights to convert the apostate. The caliph 'Umar is also represented as disapproving of this proceeding with the words: "Did you then not shut him up for three days and give him a round loaf (*ragīf*) daily and try to induce him to repent. Perhaps he would have repented and returned to obedience to God. O God! I was not there, I did not order it and I do not approve; see, it was thus reported to me" (Mālik, *Aḥḍiyā*, tr. 15). There are also traditions according to which God does not accept the repentance of an apostate (Ibn Hanbal, v. 2 *qq.*) and others according to which even the Prophet forgave apostates (Nasa'i, *Tahrim al-Dam*, bab 14, 15; Abū Dāwūd, *Hudūd*, bab 1; Ibn Hanbal, l. 247; Tabarī, *Tafsīr*, iii. 223).

3. a. In the Fikḥ there is unanimity that the male apostate must be put to death, but only if he is grown up (*balīḡ*) and compos mentis (*ʿaql*) and has not acted under compulsion (*mukḥḍar*). A woman on the other hand is imprisoned, according to Hanafī and Shī'ī teaching, until she again adopts Islam, while according to al-Awzā'ī, Ibn Hanbal (Tirmidhī, *Hudūd*, bab 25), the Malīkīs and Shāfi'īs (cf. *Umm*, i. 131, where Shāfi'ī vigorously attacks Abū Yūsuf who is not mentioned by name) she also is put to death. Although this punishment is not properly *ḥadd* (cf. thereon Shāfi'ī, *Umm*, vii. 330, 30-31) it is regarded as such by some jurists, as it is a question of a *ḥaqq al-dam* (cf. e.g. Sarakhsī, *Siyar*, iv. 162); therefore the execution of the punishment lies with the imām; in the case of a slave however, the *manūṣ* can carry it out, as with any other *ḥadd* punishment. Execution should be by the sword. According

to the above traditions, apostates must sometimes have been tortured to death. The caliph 'Umar II had them tied to a post and a lance thrust into their hearts (Abū Yūsuf, *Kharāḍī*, p. 112). Bāḡūrī expressly forbids any form of torture, like burning, drowning, strangling, impaling, flaying; according to him, Sultān Balḡār (708-709 = 1308-1309) was the first to introduce torture (Snouck Hurgronje, *Verspreide Geschiedenis*, ii. 198). Lane (*Manners and Customs*, ch. iii., near the end) records the case of a woman who had apostatised and was led through the streets of Cairo on an ass, then strangled in a boat in the middle of the Nile and thrown into the Nile was already usual in Cairo in the Fātimid period; cf. Mez, *Renaissance d. Isl.*, p. 29. In quite recent times followers of the Qādīyānī or Ahmadiyya sect in Afghanistan were stoned to death (*O.M.*, v. [1925], 138). In former Turkish territory and Egypt as well as in Muslim lands under European rule since the middle of the sixteenth century, under European influence the execution of an apostate on a *qāḍī's* sentence has been abolished, but we still have imprisonment and deportation (cf. Isabel Burton, *The inner Life of Syria*, London 1875; l. 180 *qq.*); but nevertheless renegades are not sure of their lives as their Muslim relatives endeavour secretly to dispose of them by poison or otherwise. Occasionally modern Islamic writers (Ahmadiyya movement) endeavour to prove that Islam knows of no death penalty for apostasy; the Indian apologist Muḥammad 'Alī lays great stress on the fact there is not once an indication of the death penalty in the Qur'ān (Zweimer, *The Law of Apostasy*, in *Islam*, p. 17, 37 *qq.*, London 1924; *O.M.*, v. [1925], 262).

I should like here to call attention to an agreement which is probably not accidental. As in Islam, in addition to apostasy, unchastity and unnatural vice (even by stoning are punished by death) according to both Shāfi'īs and Malīkīs, as well as blaspheming God or a prophet and magic, we find in Islam all crimes punished by death which in the Mishna (*Sanhedrin*, vii. 4) are threatened with stoning.

b. Whether attempts at conversion must be made is a question of *ikhtilāf*. A number of jurists of the first and second (viith and viiith) centuries deny this (as do the Zāhirīs) or like 'A'ī (d. 115 = 733) make a distinction between the apostate born in Islam and one converted to Islam; the former is to be put to death at once (so also the Shī'īs). Others insist on three attempts at conversion (relying on Sūra iv. 136; cf. Tabarī, *Tafsīr*, v. 103 *qq.*) or have him in the first place imprisoned for three days (cf. above 2). According to others again one should await the round of the five times of prayer and ask him to perform the *ḡalāt* at each; only when he has refused at each is the death punishment to be enforced. If however he repents and professes Islam once more, he is released (cf. thereon Shāfi'ī, *Umm*, i. 228; Abū Yūsuf, *Kharāḍī*, p. 109). In later times *istīṣāḥ* was always applied.

c. Apart from the fact that apostasy deprives the murtadd of burial with Muslim rites it has certain civil consequences. The property of the murtadd is *fa'i'* according to Shāfi'ī and the Malīkīs; if the fugitive murtadd returns penitent, he is given back what remains (cf. *Umm*, i. 231 *qq.*), where Shāfi'ī opposes the contrary Hanafī view). Others, especially later Shāfi'īs, regard the rights

of ownership of the apostate as suspended (*manwāf*) and regard him as one who is under guardianship (*maḥfūr*); only if the fugitive apostate dies in the *dār al-harb*, does his property become *fa'* (Shāfi'i, *Mukaddimah*, Cairo 1343, ii. 240; cf. Shāfi'i, *Umm*, vii. 355). Among the Hanafis and Shāfi'is the estate is allotted by the *qādī* to the legal heirs (cf. also the traditions in Dārimī, *Faṣṣid*, liib 40), the *mudabbir* and *umm walad* are set free, even when the apostate escapes into the *dār al-harb*, for this is equivalent to his death. If he comes back penitent, however, he receives of his property what still exists; the heirs however are not liable for compensation. — The marriage of the *murtadd* is void (*bāṭil*). Of his legal undertakings the *istilāq* is effective (*nāfiḥ*), i. e. the *umm walad* becomes free; the *kitāba* also continues. Other legal activities, like manumission, endowment, testament, sale are suspended (*manwāf*) according to Abū Ḥanifa; according to Abū Yūsuf they are effective as in the case of a person in good health, according to Muḥammad al-Shāfi'i however only as in the case of an invalid, i. e. they cannot deal with more than one third of the estate. In the case of the female apostate however, they are always effective. If the apostate makes such legal arrangements after his flight into the *dār al-harb*, they are invalid (Sarakhṣī, *Siyar*, iv. 152; cf. also Abū Yūsuf, *Kharāj*, p. 111). But since according to Shāfi'i and Mālik his whole estate becomes *fa'*, such legal arrangements are invalid; only the manumission of a slave remains suspended until his possible return penitent; in the case of his death also this slave becomes *fa'* (cf. however above the view of later Shāfi'is).

He is punished for crimes committed before apostasy, if he returns penitent; for crimes committed during *rida*, no notice is taken of the *ḥukūḥ Allāh* (i. e. no *ḥadd*) but only of the *ḥukūḥ al-ʿibād*, and he must for example pay the *diya* (Sarakhṣī, *Siyar*, iv. 163, 208 *iq.*; cf. Shāfi'i, *Umm*, i. 231).

(HEFFENING)

MUSA, the prophet Moses of the Bible. 1. In the Qur'ān. Muḥammad regards Mūsā as his predecessor, his model, and believes he had already been foretold by Mūsā (vii. 156); his religion is also Mūsā's religion (xlii. 11). Mūsā is also conceived in Muḥammad's image. Charges are brought against him similar to those made against Muḥammad: he is said to want to pervert people from the faith of their fathers, (x. 79); he practises magic (xxviii. 18). Mūsā and Hārūn seem rather to be sent to the stubborn Pharaoh than to the believing Israelites. Revelation is granted him: *tawrāt*, *kitāb*, *furqān*, *juhūf* (ii. 50; xxi. 49; liii. 37; lxxxvii. 19), illumination, instruction and guidance. The picture of him is made up of Biblical, Haggadic and new elements. Mūsā is exposed, watched by his sister,

refuses the milk of other nurses and is suckled by his own mother. Coming to the assistance of a hard pressed Israelite he kills an Egyptian but repents of this crime to which Satan had tempted him. He is pursued and escapes to Madyan. At a well there he waters the flocks of the two daughters of a *shaikh*. One of them invites him home modestly. He receives her as his wife at the price of 8—10 years service. This preliminary history is told in Sūra xxviii. 1—28; the mission itself is often mentioned.

Mūsā receives from the burning bush in the holy valley of Tuwān (xx. 12; lxxix. 16) orders to take off his shoes, the message to Pharaoh, the signs of his mission, the rod, the snake, the hand that becomes white. His speech is difficult to understand (xlii. 52); Hārūn accompanies him as warr (xx. 30; xxv. 37). Pharaoh reproaches Mūsā with ingratitude, saying he had been brought up by them (xxvi. 17). Pharaoh assembles his magicians but their rods are devoured by Mūsā's. The magicians profess their belief in God and are mutilated in punishment (vii. 106—123; xx. 59—78; xxvi. 36—51). Pharaoh wishes prayers to be offered to him as God, orders Hāmān to build him a tower so that he can reach the God of Mūsā (xxviii. 38; xl. 38). Mūsā performs nine miracles (xvii. 103; xx. 59—78; xxvii. 12). These are: 1. the rod and make; 2. white hand; 3. deluge; 4. locusts; 5. lice; 6. frogs; 7. blood; 8. darkness; 9. dividing the sea (cf. e. g. Tabari, ed. de Goeje, i. 485).

Mūsā spends 30 and 10 nights with God (vii. 138). He brings instruction and admonition on the tablets. In his absence Sāmīri makes the lowing golden calf (vii. 146; xx. 79—98). Mūsā breaks the tablets. He desires to see God. God crumbles the hill to dust (vii. 139). Israel fears war and has to wander 40 years in the wilderness (v. 24—29). Mūsā's enemies, Kārūn (Korah), Pharaoh and Hāmān, perish (xxix. 38).

Some details differ from the Biblical story. Instead of Pharaoh's daughter, it is his wife who rescues the infant; instead of seven shepherdesses Mūsā assists two. Instead of ten plagues, Muḥammad speaks of nine miracles. Mūsā strikes twelve springs out of the rock, one for each tribe (ii. 57, a memory of the twelve springs of Elim, Exodus xv. 27). The divergence is greater when Hāmān is made minister to Pharaoh. Then there are new features: Mūsā repents of having slain the Egyptian. Mūsā sees the burning bush at night and desires to take a brand from its fire for his home (xx. 10; xxviii. 29). Pharaoh's magicians die for their belief in God.

The following seems to originate in Haggada: God forbids the infant to be suckled by an Egyptian mother (xxviii. 11). In the Haggada Moses is offered to all Egyptian suckling mothers; but the month that is to speak with God cannot imbibe anything impure (*Sṣṣa*, 12^b). That God tilts the mountain over Israel (ii. 60, 87; vii. 170) is explained from the Haggada: Israel hesitated to accept the Torah and God tilted Sinai over them: Torah or death (*Sabbath*, 80^a; *Aboda Zara*, 2^b). The turning of the sabbath breakers into apes (ii. 61; iv. 50; v. 65; vii. 166) recalls the Haggada in which the builders of the tower of Babel become apes (*Sanhedrin*, 109^a). Kārūn is represented as an exceedingly rich man the keys of whose treasure can hardly be carried by many strong men (xviii. 76, 79); the Haggada

says that Korah found a hidden Egyptian treasure; 300 mules carried the keys of his treasury (*Periplus*, 119a; *Sanhedrin*, 110a; *Pal. Sanh.*, x. 27d; Ginzberg, *Legends*, vi. 99, 560). — The Kur'anic story of a believer at the court of Pharaoh who wants to save Musā is not quite clear (xl. 29). Ought we to compare Jethro in the Haggada who advises clemency at Pharaoh's court? (*Shu'a*, 11a; *Sanhedrin*, 106a; Ginzberg, v. 392, 21; v. 412, 101).

The story of Musā accompanying a wise man on a journey seems without parallel (xviii. 59–81). The attempt is often made to distinguish this Musā of Khadir as Musā b. Manasse from Musā b. Imrūn (cf. the article *KHADIR*).

2. Musā in post-Kur'anic legend. The histories of the prophet (especially Tha'labi's) supplement the Kur'anic story with much from the Bible, Haggada and folklore.

Much is added from Haggada. Pharaoh's sick daughters are cured as soon as they touch Moses's cradle. *Exodus Rabba*, i. 23 makes Pharaoh's daughter be cured of leprosy. — The infant Musā scratches Pharaoh's chin. Pharaoh wants to slay him. On the intercession of Asiya he tests him by putting gold and jewels on one side and burning coals on the other. Musā reaches for the gold but Gabriel directs his hand to the burning coal. Musā puts his burned hand on his tongue and therefore becomes a stammerer (Ginzberg, v. 402, 25; Hamilton, *Zeitschr. f. romanische Philologie*, xxxvi. 125–159).

Elements of other legends are woven into the legend of Musā. The Ibrahim-Namrud legend supplies the following features: Pharaoh frightened by dreams persecutes the infants; Musā is hidden from the assassins in the burning oven but the fire becomes cool and does him no harm. Pharaoh orders prayers to be offered to himself as to a god, has a tower built, shoots an arrow against heaven; the arrow comes back blood-stained and Pharaoh boasts he has slain God (Tabari, i. 469). — From the story of Jacob and Laban come the following: Musā serves 8–10 years for his wife (xviii. 27). His father-in-law offers him the spotted lambs born in his flock and the ewes for the watering troughs bear spotted lambs (Tha'labi, p. 112). There are frequent references to a pious Egyptian woman who is martyred by Pharaoh with her seven children, the youngest of whom is still at its mother's breast (in Tha'labi, p. 118, 139); this is of course modelled on the martyr mother of the Maccabees.

There are many fanciful embellishments, e.g. the miracle of the snakes, the plagues, the scenes on the Red Sea; Moses's rod in particular plays a great part. It came from Paradise; Adam, Hābil, Shīth, Idrīs, Nūh, Hūd, Šālīh, Ibrāhīm, Ismā'il, Ishāq and Ya'qūb had previously used it (Kisā'i, p. 208). In Tabari (p. 460 ff.) an angel brought the rod. Musā obtained it from his wife; his father-in-law quarrels with him about its ownership and an angel decides in favour of Musā. It is a miraculous rod and Tha'labi (p. 114–116) in particular relates the wonders it performs. It shines in the darkness; it gives water in a drought, and placed in the ground it becomes a tree bearing fruit; it produces milk and honey and fragrant scent; against an enemy it becomes a double dragon. It pierces mountains and rocks; it leads over rivers and sea; it is also a shepherd's staff

and keeps beasts of prey from the herds of Moses. When Musā was asleep on one occasion the rod slew a dragon, on another occasion seven of Pharaoh's assassins.

The varied Biblical, Haggadic, legendary and fairy tale features in the Islamic legend of Musā are thus blended into a very full picture and in Tha'labi form a regular romance.

MUSĀ b. NUŠĀIR b. 'ABD AL-RAHMAN b. ZAID AL-LAKHMI (or AL-BAKEI) ABU 'ABD AL-RAHMAN, Arab governor, conqueror of the western Maghrib and of Spain. He was born in 19 (640); his father had been in the immediate entourage of Mu'awiya [q. v.]. Musā was at first appointed by the caliph 'Abd al-Malik to collect the *khurāṣ* at al-Basra, but having been suspected of embezzlement, he fled and took refuge with the caliph's brother, the governor of Egypt 'Abd al-'Aziz b. Marwān; the latter took Musā to Syria to the caliph who fined him 100,000 dinārs. 'Abd al-'Aziz provided half of this sum for Musā and brought him to Egypt where he gave him the governorship of Ifrikiya which had been previously held by Ḥassān b. al-Nu'mān. The various chronicles are not agreed as to the date of his appointment to the office but it possibly took place in 79 (698) or the following year.

Musā and his troops thereupon entered on a career of successful conquest which ended in the consolidation of Arab power in Ifrikiya and in the conquest of the rest of north Africa and of Spain. Here we give only the most essential details. Assisted by his son 'Abd Allāh al-Marwān he sent successful expeditions against Zaghwān and Sadjūma and reduced the Hawwāra, the Zanāta and the Kutāma. The Berbers taking refuge in the west of the Maghrib, Musā decided to bring them to subjection; confirmed in his office by 'Abd al-Malik's successor al-Walid, he continued his advance to Tangier and Sūs [q. v.] and returned to Ifrikiya leaving as his deputy in the Maghrib his freedman Tārik [q. v.]. The latter in 92 (710–711) invaded Spain and Musā anxious about and at the same time jealous of the progress made by his lieutenant crossed himself in the following year leaving his son 'Abd Allāh as governor of Ifrikiya. Landing at Algeciras in Ramaḍān 93 (June–July 712) with his other son 'Abd al-'Aziz, he refused to take the same route as Tārik and taking the towns of Sīdona (Shadhūna; q. v.), Carmona, Seville and Merida, he was on his way to Toledo when Tārik came to meet him and was bitterly reproached by his master. Musā b. Nušair then continued his march and completely subjugated the north of Spain from Saragossa to Na-

varre. In 95, he left Spain with immense booty, leaving his son 'Abd al-'Aziz as governor; he reached Kairawān at the end of the year and continued by land to Syria in a triumphal procession of Arab chiefs and Berber and Spanish prisoners. The caliph al-Walid then near his end urged him to hurry while his brother and heir presumptive Sulaimān, eager to appropriate the vast wealth brought by Mūsā, tried to delay him. He arrived in Damascus shortly before the death of al-Walid and when Sulaimān assumed power he at once displayed his hatred of the conqueror. Regarding Mūsā b. Nušair's stay in Syria before his death in 98 (716—717), the Arab historians give a number of details which are obviously of quite a legendary character.

Bibliography: All the Muslim chroniclers who deal with the conquest of Africa and Spain deal more or less fully with Mūsā b. Nušair. We may mention among the more important: Ibn 'Abd al-Hakam, *Futūḥ Miṣr*, ed. Torrey, Yale Univ. Press, 1922; Ibn al-Kutayb, *Islāḥ al-'Andalus*, ed. Ribers; *Akhbār muḥimma*, ed. Lafuente y Alcázar; Ibn 'Idhār, *al-Bayān al-mughrib*, ed. Dozy, I. and II.; Ibn al-Athir, *Kāmil*, etc. — Biographical notes on Mūsā b. Nušair are given by Ibn Khallikān, *Wafayāt al-A'yān*, iii. 475; Ibn al-Faraj, *Tawārīkh 'Ulamā' al-'Andalus*, in *B. A. H.*, viii, No. 1454; al-Dabbī, *Bughyat al-Mulṭamiz*, in *B. A. H.*, iii, No. 1334; Ibn al-Abbār, *al-Iḥṣāl al-siyarā*, ed. Dozy, (*Notices sur quelques manuscrits arabes*, Leyden 1847—1851), p. 30—32. Cf. also Fournel, *Les Berbères, Étude sur la conquête de l'Afrique par les Arabes*, Paris 1857—1875; Saavedra, *Estudio sobre la invasión de los Arabes en España*, Madrid 1892; Dozy, *Hist. des Mus. d'Espagne*, new ed. Leyden 1932, I. 121.

(E. LEVI-PROVENÇAL)

MUSĀ ĆELEBİ, one of the younger sons of the Ottoman sultan Bāyezid I. According to some sources he was younger than his brother Muḥammad I [q. v.], who is generally considered as the youngest. Mūsā had been taken prisoner in the battle of Angora (1402) and was left by Timūr in custody with the Germiyan Oghlā Ya'qūb Beg. The latter sent him afterwards to his brother Muḥammad in Amasia, and for some time he became Muḥammad's helper in the re-establishment of Ottoman power in Anatolia; he is even said to have driven their brother 'Isā from Brusa, though the current opinion is that Muḥammad went there himself. When, in 1404, their eldest brother Sulaimān Ćelebī appeared in his turn in Brusa, Mūsā first opposed him in the name of Muḥammad and went afterwards, with the latter's consent, to Europe, where he hoped to make an end of Sulaimān's reign with the aid of Mirke of Walachia and Stephan of Serbia. At first this enterprise failed through a defeat inflicted on Mūsā near the walls of Constantinople. Sulaimān resided in Adrianople. Here Mūsā appeared suddenly in 1411 (or 1410); Sulaimān had to flee and was killed on his way to Constantinople, after which Mūsā took his place as ruler of the Ottoman territory in Europe, surrounded by the military and political councillors of Sulaimān, as Ewrenos Beg and the Džandarī Oghlā Ibrāhīm Paṣha. Mūsā began his short reign with great energy, recovering nearly all the Ottoman possessions in Serbia and Thessaly, and sending raiding ex-

peditions as far as Carinthia. At the same time he adopted a despotic attitude which displeased his entourage and prepared the final victory of his brother Muḥammad. Ibrāhīm Paṣha, sent to Constantinople to exact tribute, went from there to Muḥammad's court (cf. Taeschner and Wittek, in *Isl.*, xviii. 94) and, when Mūsā soon afterwards began a siege of Constantinople, Muḥammad came to the rescue of the emperor. In this he failed for the moment and he was obliged to return to Anatolia. But in 1413 Muḥammad appeared again in Europe, having found allies in the Serbians. Meanwhile, the Turkish commanders in Serbia and Thessaly were drawn to Muḥammad's side and even the old Ewrenos prepared to leave Mūsā's cause; his son and other military chiefs went over openly to Muḥammad. The latter approached Adrianople from the north and followed from here Mūsā's army beyond Philip; polls; then he joined his allies in Serbia and met Mūsā's army on the plain of Camurlu, east of Sofia. Here Mūsā's army was defeated (July 1413) and Mūsā himself perished in the flight. His corpse was found and buried in the *türbe* of Marīd I in Brusa.

(J. H. KRAMER)

MUSĀ, AND MUHAMMAD AL-HADİ, an 'Abīdī caliph. After the death of his father on Muḥarram 22, 169 (Aug. 4, 785) al-Hadī ascended the throne and at once put an end to the influence of his mother al-Khairun, by forbidding her to interfere in the slightest in matters of state. When he proposed to exclude his brother Ḥārūn from the succession in favour of his son Džafar, he met with vigorous opposition from the Harakid Yahyā b. Khālid [q. v.]. When the latter boldly persisted in his opposition, he was arrested; but the caliph's plan came to nothing for he died suddenly in Rabi' I 170 (Sept. 786) in 'Isābūd near Baghdad. According to the usual but not at all certain story, he was poisoned or stabbed by his mother's orders. Al-Hadī who was only 26 when he died is described as brave, just, liberal and full of *joie-de-vivre*. The most important event of his brief reign was an 'Alid rising in Mecca and Medina. 'Omar b. 'Abd al-'Aziz, the governor of Medina, had punished an 'Alid along with some other citizens of the town for drinking wine. As a result the 'Alids rebelled and renounced their allegiance to the caliph. After several days fighting the ringleader of the movement, a descendant of 'Alī called al-Ḥusain b. 'Alī, marched on Mecca where he obtained a number of additional followers. Soon afterwards the pilgrims arrived; at Fakhkh near Mecca, a battle took place and al-Ḥusain was killed (Qhu 'l-Hidjja 169 = June 786). As regards the fighting with the Byzantines, the Muslims under Ma'yās b. Yahyā invaded Asia Minor where they took much booty.

(K. V. ZETTERSTEN).

MUSA AL-KAZIM the seventh Imam of the Twelver Shi'a, son of Dja'far b. Muhammad al-Sadiq [q.v.], was born about 128 (745) at al-Abwa' [q.v.], the traditional burial-place of Amina, mother of the Prophet. He grew to manhood in his father's house in Medina and remained there as Imam after the latter's death in 148 (765) without playing any part in politics. In particular he took no share in the great rising of the Hasanid Alids which collapsed at Fakhkh in 169 (786). Nevertheless the caliph was suspicious of him. He was perhaps already imprisoned by al-Mahdi. In 179 (795) Harun had him brought first to Basra and then to Baghdad; he is said to have been released for a time but he died in prison in Baghdad, according to the usual story in Rajab 183 (Aug.-Sept. 799).

Little attention was paid to Musa outside the Shi'a, but we find him occasionally, as the Shi'a point out, quoted as an authority, for example for a strongly pro-'Alid tradition in Ahmad b. Hanbal, *Musnad*, i. 77 infra (cf. al-Dhahabi, *Miftah al-'Irfan*, No. 1835). The Shi'a records are more voluminous. He is said to have had the honorific al-Kazim "he who restrains his anger" because he returned kindness for injury to an opponent so that the latter came over to him. As evidence of his fitness for the imamate he is reputed to have had a great knowledge of fish and is thus brought into connection with Abu Hanifa. The chapters on miracles, usual in all biographies of the imams, credit him with being born with a knowledge of languages, e.g. Ethiopic and the language of birds, in later stories also of "Frankish" to fit a story, modelled on a later Kербель motif, that Harun could not find a Muslim to assassinate him and therefore brought Franks, who were so impressed by his nobility that they refused to kill him. Prayers by Musa have been handed down; a letter of warning to al-Hasan b. 'Ali b. al-Hasan, the leader of the Fakhkh rising; letters from prison; a statement of his claims to the imamate against Harun through relationship with the Prophet, not through 'Ali like the Abbāsids through 'Abbas but through Fatima, whom he compares with the mother of Jesus. Considerable portions of the biography are the result of the disputes within the Shi'a, even the account of his conception and birth. That his mother was bought from a slave dealer is not disputed; but great pains are devoted to proving she was a virgin. When at the death of his father a group of the Nawustya "remained" steadfast to him, the Isma'iliya [q.v.] and the Fathiya branched off, the claims of Musa had to be based on a will of Dja'far, the authenticity of which is as doubtful as that of Musa in favour of his son 'Ali al-Rida; this was used against the followers of another son Ahmad, as well as against

the Mamūra who "remained" by Musa himself and a similar party in the Musawiya (Musa'iya); for details see the writers on heresy, especially al-Ash'ari, *Maqalat*, ed. Ritter, Constantinople 1930, p. 25 sqq. The dispute with the latter groups also explains the very detailed stories of witnesses who had seen Musa's corpse. Ritter differences of opinion within the family are revealed by the fact that even Musa's son Ibrahim for a long time denied his father's death, and also by the fact that Musa's brother Ibrahim or a nephew 'Ali b. Isma'il played the traitor with Harun, inciting him by pointing out the great sums which were given to Musa as the true caliph by his followers; on the other hand, the incautious acknowledgment of Musa's imamate by the theologian Hisham b. al-Hakam is made responsible for his capture. — The kunya of Musa is Abu Ibrahim or Abu 'I-Hasan, also Abu 'Ali; the statements regarding the number of his children vary between 30 and 60; 37 is the usual figure. Besides his successor 'Ali al-Rida some prominence was attained by the partial imam Ahmad, but more by Zaid, who at the time of the great rising of Abu 'I-Saraya in Basra, by burning the houses and followers of the 'Abbāsids acquired the name Zaid al-Nar, "Zaid of the fire" (Tabari, iii. 986), and Ibrahim, who on account of similar activities in San'a was called al-Djazar, "the butcher" (Tabari, iii. 987); a daughter Fatima, who died in Kumm, has given to this city in her tomb its most important sanctuary. Musa himself was buried in the cemetery of the Kuraish in Baghdad, where his grandson, the ninth imam Muhammad al-Djawad [q.v.], was in time interred beside him; thus arose the twin sanctuaries al-Kazimain [q.v.].

N^o. 9663), esp. fol. 10^b—52^a; comprehensive collection of Shi'a accounts with references to the sources in Muhammad Bakir al-Majlisi, *Bihar al-Anwar*, xi, Teheran 1303, p. 230—317; Abu 'I-Faraj al-Isbahani, *Ma'ajim al-Fakhkh*, Teheran 1307, p. 172—176; Ibn Khallikan, *Wafayat*, Bulak 1299, ii. 172 sq. (from al-Khatib, *Ta'rikh Baghdad*); Mas'udi, *Murūf* (ed. Barbier de Meynard), vi. 309 sqq., 329 sq.; E. de Zarnhau, *Manuel de généalogie et de chronologie*, Hanover 1927, table D. — As the importance of imams like Musa lies less in their own personality than in the views of the dogmatists upon them, their *wasit* should also be compared: cf. in Kashsh, *Wasifat Akhbar al-Rida*, Bombay 1317, section *Akhbar Musa b. Dja'far wa-'Ali b. Musa*, p. 344 sqq. and also the *wasit* of Hisham b. al-Hakam, Hisham al-Dhawali, 'Amr b. Musa al-Saba'i etc.; and the same names in the alphabetically arranged works of Nadjashi, *al-Rida*, Bombay 1917; Tusi, *Fikhr al-Rida*, Calcutta 1853—1855; Astarabadi, *Manhaj al-Ma'ajim*, Teheran 1306. (R. STROTHMANN)

BANU MUSA, more precisely BANU MUSA b. SHAKIR, the usual name for the three brothers Abu Dja'far Muhammad, Abu 'I-Kasim Ahmad and al-Hasan b. Musa b. Shakir, who made a reputation under the 'Abbāsids from al-Ma'mun to al-Mutawakkil as mathematicians, astronomers and technicians and also at times played a part in politics. The father is said

to have begun life as a bandit in Khurāsān, then to have become an astronomer and geometer. We have no means of testing such stories or learning how a bandit could become an astronomer. If we assume however that Mūsā b. Shākir like Muhammad b. Mūsā al-Kh-wārizmī joined al-Ma'mūn's train in Khurāsān as astronomer and astrologist and then came with him to Baghdad, we can understand that al-Ma'mūn took his three sons, still young, into his service on Mūsā's death and had them educated in mathematical sciences by the astronomer Yahyā b. Abi Manṣūr. The Banū Mūsā thus at a comparatively early age were admitted to that circle of scholars who, by their thorough and expert translations, introduced Greek science to Islām and by their own researches laid the foundation for the glorious development of the sciences in the 11th (11th) and 12th (12th) centuries. Attaining fame and fortune, they used their wealth to purchase Greek manuscripts and sent agents into the Byzantine provinces to seek for and purchase books. Of Muhammad b. Mūsā it is related that he met Thābit b. Qurra in Harrān while on a journey and induced him to settle at the caliph's court. It may be assumed they these scientific expeditions to seek books and scholars did not take place without the caliph's support.

History also records political and literary feuds. A particular enmity is said to have existed between al-Kindī and the three brothers, because the caliph al-Mu'taḥim did not entrust them but al-Kindī with the education of his son Ahmad. The feud went so far that the Banū Mūsā are later said to have intrigued against the choice of Ahmad as caliph. This story can only be understood in connection with court intrigues, in which the ambitions of the brothers and the jealousy of the courtiers played the same parts as elsewhere. If all is true that is recorded of the malevolent attitude of the brothers to recognised scholars, little praise can be bestowed on their character. The stories of the huge incomes, especially that of Muhammad b. Mūsā — he is said to have had for a time an annual income of £300,000 — exceed all that even the most liberal caliph could heap upon a scholar.

The works of the Banū Mūsā include translations and original works on geometry, astronomy and mechanics. Many of their works are written jointly by two or three brothers, others only by one. Muhammad b. Mūsā is regarded as the most versatile, al-Ḥasan the best mathematician, Ahmad as especially interested in mechanical and technical problems. The astronomical and metrological observations of the brothers were probably made mainly in Sāmarrā; their tables of observations of the sun are mentioned by Ibn Yūnus. M. Curtze, H. Suter, F. Wiedemann and F. Hauser have devoted special attention to the editing and elucidation of these works that have survived in Arabic or Latin.

MUṢAB b. 'UMAIR, a follower of Muhammad of the Quraysh family of 'Abd al-Dār. The son of rich parents, this handsome young man had attracted attention by his elegant appearance when Muhammad's preaching made so deep an impression upon him that he abandoned the advantages of his social position to join the despised adherents of the Prophet. Tradition dilates on the contrast between his former luxurious life and later poverty but these, like such stories in general, are somewhat suspicious, although not impossible, since the people in Muṣab's time had not yet acquired wealth and could not have been accustomed to luxury.

When his parents endeavoured to prevent him taking part in the worship of the believers, he went with several of the faithful to Abyssinia from which he returned however before the Hijra. The Prophet thought highly of him and sent him after the first meeting at 'Akāba as a missionary to Medina where he won a number of followers for Islām. According to some traditions, he on this occasion, following the practice of the Jews [see MUHAMMAD], introduced the common Friday salā, which however, as was noted as early as by Mūsā b. 'Ukba, others ascribe to the Medinese As'ad b. Zurāra, while others in an effort at harmonising say that As'ad conducted the common salā during the absence of Muṣab.

At Badr and at Uhud he carried the Prophet's banner in memory of the old privilege of the 'Abd al-Dār; he met his death in the latter battle. With what ardour he adopted the new teaching is seen from his attitude to his mother who is depicted as a most lovable character and particularly from his words at the capture of his brother in the battle of Badr. His wife was Hanna bint Dajsh of the Aam.

MUṢAB b. AL-ZUBAIR, son of the famous ancestor of the Prophet, al-Zubair, and brother of the anti-Caliph 'Abd Allāh b. al-Zubair. Handsome, chivalrous, generous to the most foolish prodigality, he resembled his elder brother 'Abd Allāh and the family of the Zubairids only in his bravery and in fits of severity in exacting punish-

ment which bordered on barbarity. He began his military career at the beginning of the caliphate of Marwān I by a badly planned invasion of Palestine. Later sent as governor to Basra by his brother 'Abd Allāh, he soon found himself called to the help of the people of Kūfa, tired of the yoke of Mukhtār b. Abī 'Ubad [q. v.]. He began by putting to flight the army brought against him by the redoubtable Thaqafi agitator and then besieged him for four months in the citadel of Kūfa. On the death of Mukhtār, Muṣ'ab ordered several thousands of his followers to be executed and by this savage act made as many enemies as the victims had relatives. He was less successful against 'Ubad Allāh b. al-Hurr [q. v.] who had been sent into the 'Irāk to stir up a counter-revolution in favour of the Marwānids. A similar attempt at Basra by the Umayyad Khālid b. Asid failed. But by proceeding with great severity against Khālid's followers Muṣ'ab alienated the most influential personages in the city.

Soon he found he had to defend the 'Irāk which was directly threatened by the Caliph 'Abd al-Malik; troops were massed at Bādjumaira. Muṣ'ab awaited the Syrian army here and then retired to Dair al-Djāhlik [q. v.]. His position soon became critical for the Basran troops refused to follow him. The best troops of the province were far away with Muḥallab, engaged in an interminable campaign against the Khāridjīs. The Zubairid's troops displayed only moderate enthusiasm. His officers tired of his iron hand were prepared to betray him and entered into negotiations with 'Abd al-Malik. The Marwānid was not stingy in his promises. He also tried to negotiate with Muṣ'ab, who learning of the perfidy of his followers rejected all offers and decided to die like a brave man. Among his followers Ibrahim b. al-Ashtar alone fought vigorously in the battle; the others folded their arms during the fighting or went over to the Syrian ranks. 'Abd al-Malik offered Muṣ'ab his life for the last time with the government of the 'Irāk, but in vain. Thrown from his horse, the Zubairid received the coup-de-grace from an avenging Bakrī, 'Ubad Allāh b. Zahrān. This took place about the middle of Djumādā I (October) of 72 (691). 'Abd al-Malik wept for him and ordered his poets to commemorate his heroic end. Muṣ'ab's great generosity earned him numerous eulogies from poets. He is also famous for the fact that he had in his harem the two most independent and haughtiest women of the time, belonging to the most undoubted aristocracy of Islām, 'Ā'isha bint Talha [q. v.], the second *Amūsa* of the Prophet, and Sukaina, granddaughter of 'Alī; feminine types, remarkable in spite of their frivolity for having bravely tried to fight against the degradation of their sex in Muslim society.

AL-MUSABBIHĀT, name of sūra's liii, lix, lxi, liii, liiv, as a group, after the first word of each of them, *sabbāḥa* or *yusabbihūn*. The name is old, cf. Muslim, *Zakāt*, trad. 119.

MUSĀFIRIDS (Kangari or Sallari), a dynasty of Dailami origin which came from Tārom [q. v.] and reigned in the fourth and fifth centuries of the Hījra in Ādharbāidjān, Arrān and Armenia.

Its coming to power was one of the manifestations of the great movement of Iranian liberation which formed a kind of interlude between the end of Arab domination and the first Turkish invasions. While in Khurāsān and Transoxania this movement culminated in the rule of the Sāmānids [q. v.], in western Persia and Mesopotamia its standard-bearers were the Dailamis and to a smaller extent the Kurds (cf. V. Minorsky, *La domination des Dailamites*, Paris 1932).

The Musāfirids and the Djuṣṭānids. According to a genuine document quoted in Yāqūt (III. 148—50), the Kangari family only comes into history after seizing the famous stronghold of Shamirān in the district of Tārom [q. v.] which was under Kāzwīn. The Kangaris have therefore to be distinguished from the ruling family of Dailam, i. e. the Djuṣṭānids of Rūbār, of whom seven are known from between 189 and 316 (805—928), while members of the family can be traced till 434 (1042). We know that Muḥammad, son of Musāfir, the eponym of the dynasty (whose real Iranian name must have been Aswār, cf. Mas'ūdi, *Murūj*, IX. 16), had married Kharrāsiya, daughter of the Djuṣṭānid Djuṣṭān III (from 250 until after 300). From such alliances the names peculiar to the ruling family of Dailam (Djuṣṭān, Wahsūdān, Marzubān) became popular among the Musāfirids. In 307 (919) Muḥammad killed his wife's uncle 'Alī b. Wahsūdān to avenge the death of his father-in-law Djuṣṭān b. Wahsūdān. Henceforth there was a breach between the two families. The last Djuṣṭānid took refuge with the Dailami chief Asfār (lord of Raiy and Kāzwīn) who sent the Ziyārid Mardāwīd against Muḥammad but instead of fighting they joined forces and Mardāwīd slew Asfār. Muḥammad was an important ruler and Mus'ir b. Muḥallil speaks with praise of his buildings at Shamirān (1,850 houses) on which 5,000 workmen were employed (the ruins of Shamirān have been described in Brugsch, *Reise d. preuss. Gesandtschaft*, 1862, II. 471—472) but he was a difficult character and did not agree even with the members of his own family.

The two branches of Musāfirids. In 330 (941) his sons Marzubān and Wahsūdān by arrangement with Kharrāsiya, seized Shamirān and shut their father up in a fortress, after which the dynasty broke up into two branches: Wahsūdān remained in the hereditary fief of Tārom, while Marzubān extended his power over Ādharbāidjān, eastern Transcaucasia and some districts of Armenia.

The fourth generation of the Musāfirids consisted of the sons of Marzubān: Djuṣṭān, Ibrahim, Nāṣir and Kay Khuraw, and of the sons of Wahsūdān (330—355): Isma'īl, Nuḥ and Ḥaydar (?). Marzubān. This ruler (330—346 = 941—957) is the most important figure in the dynasty. After the death in 314 (926) of the Sājjid [q. v.] Yūsuf, Ādharbāidjān became the scene of the struggle between the Khāridjī Kurd Daisam b. Ibrahim and Lashkari b. Mardī, a native of Gilān, whom the Ziyārid Wushmagīr supported alternately

Laghkatt died in Armenia and Daisam was betrayed by his vizier Abu 'l-Qāsim 'Alī b. Dja'far who had come to an arrangement with Marzubān for both were *šāhin* (Ibn Miskawāh, II. 32). Marzubān occupied Ardabil and Tabriz and finally Daisam surrendered to Marzubān and received from him a castle in Tārom. Marzubān extended his territory northward as far as Darband. In 333 (943-944) the Russians (*Rūs*) came by the Caspian and the river Kur and took the capital of Arrān [q.v.]. Barda's [q.v.] in spite of the resistance of the subjects of Marzubān. At the same time, the Hamdānids of Mawṣil had conceived designs on Ādharbāidjān and Marzubān had to deal with a force under Abū 'Abd Allāh Husain b. Sa'īd b. Hamdān and the Hadhānt Kuc Dja'far b. Shakkīya, which had reached Salmās [q.v.] but was soon recalled to Mawṣil by Nāṣir al-Dawla. On the other hand, the Russians, decimated by disease and harassed by the Muslims, beat a retreat (cf. the sources on the Russian invasion including the Armenian historian of the tenth century, Moses Kāhankatvatsi, in Dorn, *Caspia*, St. Petersburg 1876; the text of Ibn Miskawāh, II. 62-67, was translated with commentary by Yakubowski in the *Vizant. Vremennik*, Leningrad 1926, xlix, p. 63-92).

A new danger arose in the south-east of the lands of Marzubān when in 335 (946) the Būyid Rukn al-Dawla occupied Ray (disputed by the Sāmānids and Ziyārids). Marzubān filled with wrath at the Būyids decided to attack them in 336. But Rukn had time to get reinforcements from his brothers. In 338 (949) Marzubān, defeated near Karwin, was besieged in the castle of Sumairam (in Fārs).

The fugitives from his army gathered round his father Muḥammad and occupied Ardabil while Wahsūdān remained in Tārom. Muḥammad soon gave dissatisfaction to his captains and was shut up by Wahsūdān in his castle at Shisagān (?). Rukn al-Dawla sent to Ādharbāidjān Muḥammad b. 'Abd al-Razzāk, the former governor of Tūs [q.v.], who had deserted the Sāmānids. Wahsūdān released Daisam in the hope that he would be able to organize resistance. Daisam who had time to take Ardabil, was defeated by Ibn 'Abd al-Razzāk but the latter disgusted by the intrigues around him returned to Ray in 338 (949). Daisam reoccupied Ardabil but the advance of 'Alī b. Muḥḥi, a supporter of Marzubān, forced him to seek shelter with the Artunids of Waspurakan [cf. WKS].

In the meanwhile by an ingeniously planned coup, Marzubān escaped from Sumairam and recovered all his strongholds and treasures (in 342). After a long series of adventures which brought him to Mawṣil, Baghlād and Aleppo, Daisam in 344 (955) collected a force and read the *shahāda* at Salmās in the name of the Hamdānid of Aleppo Saif al-Dawla. Marzubān quickly put down a rising in Darband and later drove Daisam back, who once again sought refuge with the Artunids who handed him over to Marzubān under threats from the latter.

In an important passage, Ibn Hawqal, p. 251-253, gives the list of the tributaries of Marzubān compiled by his minister Abu 'l-Qāsim (in 344). The names include those of the lords of Shirwān, Abkhāz (I uncertain name of a district north of Shirwān; cf. Marquart, *Streifzüge*, p. 174: *Abkhāz), of Shakkī (q.v.), of 𐌌𐌔𐌌, of Džurran wa-Saghyan (Gurizān and Saghyan to the west of Shirwān), of Vayots-dzor (district of Simla), of

Ahar and Wazzān (N. E. of Tabriz), of Khirān (N. of Baku?), as well as the Artunids, Bagratids and the princes of Khācen (west of Barda').

Wahsūdān and his nephews. Marzubān died in Rumāḡān 346 (Dec. 957) and while questioning the power to his brother Wahsūdān forgot to cancel his first will by which his sons Džustān, Ibrāhīm and Nāṣir were to succeed him in succession.

The commanders of the fortresses would not surrender them to Wahsūdān who returned to Tārom in disgust. Džustān b. Marzubān was recognized by his brothers but was only interested in his fārem. Marzubān's old general Džustān b. Sharmazan set up in Urmīya [q.v.] and won to his side Ibrāhīm, with whom he occupied Marāgha.

In 349 (960) the grandson of the caliph Muḥammad Iahāk b. 'Isā rebelled in Gilān and took the name of Mustafīr bi 'l-Iḥā. Džustān and Ibrāhīm became reconciled and defeated the rebels at Mūḡān [q.v.].

Wahsūdān began intriguing among his nephews and detached Nāṣir from Džustān but the quarrel was of short duration. Under assurances from Wahsūdān, Džustān with his mother and Nāṣir came to Tārom but were thrown into prison. Wahsūdān sent his son Ismā'īl to Ādharbāidjān. Ibrāhīm who was ruling Armenia (Dwin) made a move in 349 or 350 which gave Wahsūdān an excuse to massacre his prisoners. Ismā'īl soon afterwards died at Ardabil after which Ibrāhīm reoccupied Ādharbāidjān and laid Tārom waste while Wahsūdān sought refuge in Dailam. Meanwhile Wahsūdān's general Sharmazan b. Muḥḥi, however, succeeded in defeating Ibrāhīm and the latter, abandoned by all his soldiers, sought refuge with his brother-in-law Rukn al-Dawla, who had married a daughter of Marzubān (355 = 966).

Rukn al-Dawla with his usual chivalry besped favours on Ibrāhīm and sent to Ādharbāidjān his famous minister Ibn al-'Asid (Usādā Ra'is) who reinstated Ibrāhīm and subjected the Kurds and Džustān b. Sharmazan to him. Ibn al-'Asid who was much impressed by the wealth of Ādharbāidjān proposed to Rukn al-Dawla to annex this province but his master recalled him to Ray, saying that he did not wish to be accused of coveting the inheritance of one who had sought his protection. After the return of Ibn al-'Asid matters went badly and from the allusions in Ibn Miskawāh we know only that Ibrāhīm was deposed and imprisoned (probably about 369 = 979, the year in which the *Tağfārīn al-Umam* wrote).

The end of the Musāfirids. In the Muslim sources the situation in Ādharbāidjān till 420 is obscure but the statements of the Armenian historian Stephen Asotik, *Hist. Universalis*, part II, book III, transl. by Macler, Paris 1917, ch. 11, 12, 18, 19, 29, 38 and 41, enable us to fill the gaps. According to Kasrawi, in 369 (979) Ibrāhīm b. Marzubān was dispossessed of his lands in Ādharbāidjān by the Rawwādī family (on which see the articles MARĀGHĀ, MARAND, TARRIZ and KASRAWI, *op. cit.*, II). The son of Ibrāhīm Abu 'l-Hādīd (the 'Abīhādī Delmestani' of Asotik) remained Dwin [q.v.] and on the invitation of king Muḥḥi of Kars in 982-983 made an expedition into Armenia where he desecrated the churches. This Abīhādī later lost all his lands to his neighbour Abutlup of Gokhn (i.e. Abū Dulaf Shāhān, lord of Ordubad). He later wandered in Georgia and Armenia and even visited the Byzantine emperor

Beal II; he was killed by his servants at Ukhahik (Oli). Finally another Abū Ḥadī, son of Roūd, amīr of Atropatakan (Abū Ḥadī b. Rawwād of Ḍhar-ḥajjān), took from Abū Dalaḥ "the towns of Salas and after sacking Gokha marched on Dwin, seized this town and demanded from the Armenians the arrears of tribute" (Asotik, ch. xviii.). King Smbat II hastened to accede to the demand. The Rawwādis thus gained possession of the remainder of the possessions of the Musafirids of whom they claimed to be the successors. There is no reason to connect the Arab-Kurd Rawwādis with the Musafirids, who were of Dailami origin, although there may have been intermarriage between the two families.

The Tārom branch. After the disappearance of the descendants of Marzubān, Tārom, the original seat of the dynasty, alone remained in their hands. Wahūdān had extended his power over the adjacent districts of Zandjān, Abhar and Suhraward (the latter name is usually mutilated in the sources). A *ḥajab* of Maṭanahīl (Kasrawī, *op. cit.*, I, 45) dated probably in 354 suggests that Rukn al-Dawla drove Wahūdān from Tārom for a time, but his family had remained there, for from Yaḳūt, III, 148—150 we learn that in 379 (989) the Būyid Fakhr al-Dawla took Shamsirān from the young son of Nūḥ b. Wahūdān, whose mother he married (the child's name was probably Dīstān; cf. Yaḳūt, *ṭahṭā al-Aḥḥā*, II, 308).

In 387 (997) after the death of Fakhr al-Dawla, Ibrāhīm b. Marzubān b. Ismāʿīl b. Wahūdān seized the fortress of Saḍḍijān and Tārom. In 411 (1020) even Kāwīn was in his hands (cf. *Nuḥḥat al-Kulūb*, in *G. M. S.*, p. 58). When Maḥmūd of Ghazna had taken Kāy, he sent against him the Dailamī Kharāmīl. After the return of Maḥmūd to Khurāsān (420), his son Maʿūd attacked Ibrāhīm but only captured him by a stratagem. Saḍḍijān, however, remained in the hands of Ibrāhīm's son. In 427 (1037) we find the "sālār of Tārom" in his fist again.

Nāṣir-i Khusrāw who was in this region in 437 (1045), speaks in high terms of the lord of Shamsirān Dīstān (b.) Ibrāhīm whose title was "Marzubān al-Dailamī Dīstān Abū Ḥalīb, Mawla Amīr al-Ma'mūnīn".

Under 454 (1062) Ibn al-Athīr records the visit of Tughlūk to Tārom, where he imposed a tribute of 100,000 dinārs on Musafir, who is the last Musafirid known. From Yaḳūt's words we may conclude that the Ismāʿīlīs of Alamūt put an end to the rule of the family when they dismantled Shamsirān.

Gatastiden und Sallārīden*, in *Islamica*, 1927, III, 2, p. 168—186; Zambaur, *Manuel de généalogie*, Hanover 1927, p. 180; Sayyid Ahmad Kasrawī, *Fāḥḥān-i gumnām*, Teheran, I, 1928, and *passim*, II, —III, 1929—1930 (a very good book analysing all the Muslim and even some Armenian sources); Markwart, *Die Entstehung d. armenischen Hītōmer*, in *O. C.*, xxvii, 2, N° 80, Rome 1932, p. 150—151 (recognises the identity of the Rawwādis of Tabriz and Marāgha). (V. MINOVSKY)

MUSAILIMA (a contemptuous diminutive from Maslama, which is the form of his name given in Muḥarrad, *Kāmil*, ed. Wright, p. 443, 5; Balādhurī, ed. de Goeje, p. 422 ult.; cf. Tulaiha [q. v.] for Talha), a prophet of the Banū Ḥanīfa in Yamama contemporary with Muḥammad. His genealogy is variously given but always contains the name Ḥalīb; his *umma* was Abū Ṭhumāma. According to the usual account, he appeared as a prophet soon after the death of Muḥammad, after having visited the latter in Medina with a deputation. There is however another tradition according to which he began his prophetic career before Muḥammad dīl, and D. S. Margoliouth has given very cogent reasons for accepting this. According to Ibn Ishāq (Ibn Hishām, ed. Wüstenfeld, p. 200), Muḥammad's enemies reproached him with having obtained his wisdom from a man of Yamama named Raḥmān. Now we have ample evidence (Wāḥidī, transl. Wellhausen, p. 28; Tabarī, I, 1935, 14; Balādhurī, p. 105; Baghawī on Sūra xxv, 61) that Musailima, who preached in the name of Raḥmān, was himself called Raḥmān. Further the story recurring in all traditions that Musailima proposed to the Medinese prophet a division of authority or a transfer of his power to him on his death (a similar story is told of the Ḥanīfa chief Hawḍha) becomes more intelligible if this prophet already occupied in Yamama a position similar to that of Muḥammad in Medina. It is also worthy of note that the prophetic utterances attributed to Musailima recall the earliest Meccan *sūras* with their short rhyming sentences and curious oaths and have no resemblance at all to the later Medinese *sūras*. In particular the fact that all the Banū Ḥanīfa followed him into battle against the Medinese shortly after the death of Muḥammad shows that he must have been active for a considerable time and was no isolated imitator of Muḥammad. That the latter was the usual method of explaining the "ḥar" Musailima, is readily intelligible, nor is it to be wondered at that orthodox tradition could not deny itself the pleasure of depicting his relations with the Tamīm prophets Saḍḍāh [q. v.] in the most scurrilous fashion. Fortunately however, the otherwise little reliable Saif gives quite a different story, which although influenced by later ideas (Musailima in order to gain followers reduces the five daily *ṣalāts* to three; he has a *mal'adḥīn* and a *muḥḥīn*; he tries in vain to imitate Muḥammad's miracles, etc.), gives a picture of him which is in the main correct and we can agree with Wellhausen that his utterances have a distinctly Yamama

colouring. According to Saif's account, he must have been considerably influenced by Christianity for he speaks of the kingdom of heaven and of him who will come from heaven. Like several other men of the time in Arabia of deep religious feelings he favoured asceticism. He forbade wine and marital intercourse after the birth of a son. It is interesting that Palgrave on his journey into Najd found a number of sayings still current under Musallima's name; unfortunately he did not trouble to record them so that we cannot compare them with what is recorded of his utterances in literature. This rival community in the heart of Arabia meant a serious danger to the young faith of Islām. Therefore when the first attempts to repress it had failed, Abū Bakr sent his ablest leader Khalid b. al-Walid against Musallima and the Banū Hanifa. A battle was fought at 'Akraba' [q. v.] in 12 A. H. which at first went against the Muslims, but Khalid's superior strategy finally prevailed and Musallima and many of his followers fell martyrs for their faith. The battle was unusually fierce and the Muslims also suffered heavily, among the fallen being a number of the best authorities on the revelations of Muḥammad.

MUSALLĀ (A.), part. pass. II of *ṣ-ḥ*, place where the *ḡalāt* is performed on certain occasions. When Muḥammad had fixed his abode in Medina, he performed the ordinary *ḡalāt* in his *ḡār*, which was also his *maḡḡid* (not in the sense of temple). The extraordinary *ḡalāt*'s, however, were performed on a place situated southwest of the city in the territory of the Banū Salima, outside the wall, northeast of the bridge on the wādī, where at present the street from the suburb al-'Anḡariya reaches the market-place Barr al-Munākḡha (cf. Burton, *Personal Narrative*, plan opp. i. 256; picture of the musallā as well as of the mosque of 'Umar situated on the place, opp. i. 329; al-Batānī, *al-Riḡla al-ḡalāt*, 2nd ed., plan of Medina opp. p. 252; picture of the Barr al-Munākḡha, *ibid.*, opp. p. 264; Caetani, *Annali*, vol. II, opp. p. 72).

On this spot the *ḡalāt* was performed on the 1st Shawwāl and on the 10th Dhū l-ḡiḡḡa (Tabari, i. 1281, 1362). On the latter day the *ḡalāt* was combined with the slaughtering of two spotted rams (Bukḡārī, *Aḡḡā*, bāb 6). On the two days of festival Muḥammad and his followers on their way to the musallā were preceded by Bilāl who bore the spear (*ḡanaḡ*; q. v.).

It is also said that the *ḡalāt* for rain was held on the musallā (copious data in Tradition, cf. Wensinck, *Handbook*, s. v. Rain; and do., *Moham-*

med en de Joden, p. 141). Further it is related that the service for the dead was performed on this spot (Bukḡārī, *ḡḡanāʿis*, bāb 4, 61; Wensinck, *Mohammed en de Joden*, p. 140). Finally the musallā is mentioned as the place where executions took place (Bukḡārī, *ḡalāt*, bāb 11; Tabari, i. 1903). The sacred character of the place appears in the fact that menstruating women were taught to avoid it (Bukḡārī, *ḡalāt*, bāb 23). According to Caetani (A. H. i. § 55, note 3; cf. A. H. 2, § 24, note 1), the musallā was used more frequently.

It was not only in Medina but in a large number of other places that the rites mentioned, or some of them, were performed on a musallā. According to al-Nawawī (commentary on Muslim's *ḡalāt*, Cairo 1283, ii. 296), this was the practice of most of the capitals. The custom prevails up to the present day. According to Doutté, the North-African musallā is used for the rites of the 10th Dhū l-ḡiḡḡa. It is a large threshing-floor, with a wall provided with a *miḡrāb*; there is also an elevated place for the *ḡalāt*. This is the form of the musallā in many towns of Morocco.

To the doctors of the law it was questionable whether the festival ceremonies should be performed on the musallā or in the mosque. There was divergency of opinion on this point, even within the *madḡḡab*'s (Abū Ishāḡ al-Shirāʿī, *Tanbih*, ed. Jaynboll, p. 41, where 'the field' (*al-ḡalāt*) is mentioned side by side with the mosque; Zuhri, comm. on the *Muwaffā*, i. 328; Khalid b. Ishāḡ, *Mukḡḡḡat*, Paris 1318, p. 33 sq.; al-Nawawī, *op. cit.*, ii. 296).

Wensinck has conjectured that even in pre-Islāmic times rites of several kinds were performed on an open area, threshing-floor, musallā or the like. The connection between all those rites and the special place is sought by him therein, that they had a special connection with the fertile earth, of which the threshing-floor and the like were symbols.

MUSAWI. [See MECCA, ii. 4.]

AL-MUSAWWIR. [See ALĀḡH II.]

MUSH, town in Western Armenia near the southern bank of the Murād Su (Arasian), some 70 km. as the crow flies to the west of Eḡbiḡ. In pre-Muḡḡammadian times it was the principal town of the district of Taran (Hübschmann, *Idg. Forsch.*, xvi. 326; J. Saint-Martin, *Mémoires Historiques et Géographiques sur l'Arménie*, i., Paris 1818, p. 102). In Islāmic times the name Tarta

(as spelled by Yāqūt, iv. 534) is sometimes used for the town itself as in Tabarī, iii. 1408 (cf. J. Markwart, *Süd-Arménien und die Tigrisquellen*, Vienna 1930, p. 354). The tradition of the Armenian historians connects the foundation of Mūsh with Muḥab Mamikonean, the ancestor of the powerful, originally non-Armenian family of the Mamikoneans, who lived in the 4th century A. D. To him is ascribed the construction of a castle, the ruins of which are still visible on one of the hills that dominate Mūsh. This town itself is situated at the mouth of a mountain gorge and before it extends, as far as the river, a large fertile plain, the "plain of Mūsh". During the first centuries after the Muhammadan conquest, Mūsh remained a centre of Armenian national life; from 825–851 it was the residence of the Bagratid Bagrat. After the abduction of this prince to Baghdad in 851, the inhabitants revolted and killed the Muhammadan governor Yūsuf b. Abī Sa'īd al-Marwānī (Tabarī, iii. 1408 sq.). Later on it was part of the vassal kingdom of the Bagratids. Occasionally it was occupied by Muhammadan adventurers, as in the days of Saif al-Dawla (Ibn al-Athīr, viii. 408) in 353 (964). About this time the name Mūsh appears for the first time in Islamic geographical literature (al-Maḥallī, p. 150). In Seldjūq times the influence of Islām became stronger; the atabegs of the Armanjūh dynasty disputed the territory of Khilāt and Mūsh with the Urtukids and even the Aiyūbid Naḍīm al-Dīn laid siege to Mūsh in 604 (1207) (Ibn al-Athīr, xii. 169, 180), and in 625 (1228) Djalāl al-Dīn Khwārimshāh was master of the country; in that year a battle was fought by him and lost on the plain of Mūsh against the Seldjūq ruler of Erzerūm (Ibn al-Athīr, xii. 314; Djuwainī, *Tārīkh-i Djihān-gushā*, ii. 181). This accounts for the ruined state of the town in the middle of the 14th century (Hamd Allāh Mustawfī). After the Mongol period Mūsh was razed by Timūr in 1386, when he invaded the possessions of the Kara Koyunlu (Sharaf al-Dīn, ix. 419). In 1473 the power of the Ak Koyunlu ruler Uzun Hasan was definitely broken in Armenia and from that time on Mūsh belonged to the Ottoman Empire. At that time the population of its surroundings was already strongly mixed with Kurds and Turcomans. The direct authority was exercised by Kurdish local chieftains, who, in the ruling system of the Empire, were subordinated, as sandjak beys, either to the pasha of Bitlis or to that of Wan. At the beginning of the 16th century ruled the Kurdish *wirimirān* Emin Pasha, who was deposed in 1828–1829 (Ritter, x. 676 and *Sijill-i 'Uthmānī*, i. 426). In the middle of that century, Mūsh became the chief town in the *marka* *ḥaṣṣ* Mūsh, in the sandjak Mūsh in the *wilāyat* of Bitlis, and in the Turkish republic it is a *ḥaṣṣ* in the *wilāyat* of Bitlis. The population of the town (some 5,000 inhabitants) was, until the Great War, half Armenian and half Muhammadan; one of the Armenian churches had been converted in 979 (1571) into a mosque, according to an inscription (Ritter). The environs of Mūsh had also a mixed population, where, however, ancient Christian sanctuaries had long continued to exist, such as the monastery of Surb Karpet, called by the Turks Çanlı Kılıse and described by Ewliya Çelebi.

During the Armenian troubles in the last years of 'Abd al-Hamid II's reign, in 1905, there began

in Mūsh a revolutionary movement of Armenian tashnakists, which brought about an intervention of the Kurds and a suppression by government troops, in which the population suffered much. In the Great War the Russian advance in Armenia had gone as far as Mūsh, when, in accordance with the treaty of Brest-Litovsk (1917), the Russian troops retired in 1918, leaving this part of Armenia again in Turkish possession.

AL-MUSHABBIḤA. [see TAḤḤIḤ.]

MUŞHAF (A.), Ethiopic loanword (cf. Nöldeke, *Neue Beiträge*, p. 49 sq.); the forms *miḥṣaf* and *maḥṣaf* occur also; according to some grammarians they are less correct, especially the latter, coddex, or, according to the definition of Arabic lexicographers, leaves (*ṣūḥuf*, plural of *ṣaḥifa*), when they are bound together between two covers. In the tradition on the redaction of the Qur'ān [q.v.] by Huḍhāifa b. al-Yamān during 'Uthmān's caliphate, it is said indeed, that the collection of leaves that had been made by Zaid b. Thābit at 'Umar's instigation, was copied and arranged into *maḥṣaf*. These were sent to all regions (as standard copies); the *ṣūḥuf* were restored to 'Umar's daughter Hafsa, in whose possession they had been ever since her father's death. Other *ṣūḥuf* were annihilated as often as occasion offered itself (Bukhārī, *Faḍā'il al-Kur'ān*, bāb 3; *Ibn*, bāb 7; *Djihād*, bāb 12; *Tafsīr*, sūra 9, bāb 20; *Aḥkām*, bāb 37; Tirmidhī, *Tafsīr*, sūra 9, trad. 19).

From the time of the redaction of the Qur'ān under 'Uthmān *maḥṣaf* are frequently mentioned in Arabic literature. In a tradition on 'Amr b. al-'Ās's well known stratagem during the battle of Siffin it is said that a huge *muḥṣaf* from Damascus was tied to the points of three lances (al-Dīnawarī, *Kitāb al-Aḥkām al-Fiṣṣal*, ed. Girgass, p. 201 sq.; Naḥr b. Muḥṣim, *Wafat Siffin*, Bairūt 1921, p. 350; cf. p. 353); in other traditions "copies of the Qur'ān" in several numbers are mentioned (e.g. Tabarī, i. 3329).

In a tradition on the *ṣaḥāb* it is assumed that in the mosque of Medina the *muḥṣaf* had a fixed place (Bukhārī, *Ṣaḥāb*, bāb 95; Muslim, *Ṣaḥāb*, trad. 263, 264); nowadays this place is by the *alḥa* (cf. Lane, *Manners and Customs of the Modern Egyptians*, chap. Religion and Laws; and *supra*, art. MASJID, I, D, f. -).

It is said that 'Ā'isha had a *muḥṣaf* copied for her private use by her mawla Abū Yūnus (Tirmidhī, *Tafsīr*, sūra 2, trad. 29; cf. Bukhārī, *Faḍā'il al-Kur'ān*, bāb 6).

Maḥṣaf were taken into the field by Muslim soldiers (cf. Tirmidhī, *Ḥudūd*, bāb 28; Abū Dāwūd, *Djihād*, bāb 135); this practice met, however, with objections (cf. Bukhārī, *Djihād*, bāb 129; Muslim, *Imāra*, trad. 92, 93), founded on the fear that they might fall into impure hands. For a similar reason persons impure in a ritual sense were prohibited from touching *maḥṣaf*, save in a special cover (*ṣaḥāfa*; Bukhārī, *Ḥudūd*, bāb 3).

Bibliography: The lexicons, s. v.

(A. J. WENINK)

MUSHİR (A.), councillor, Turkish pronunciation *müshir* and *müshir* (modern orthography *müshir*) with meaning "Marshal". *Müshir* literally means "one who points out, advises". Cf. also the article *MUSTASHİR*.

According to some authorities, *mushir* was at first (before the 'Abbasids) the title of the ministers (later *wasir*; q. v.) or secretaries of state (*kاتب*). So at least we are told by Ibn al-Tiqṭāṣ (ed. Derenbourg, p. 206; transl. Amar, p. 244). Khalil al-Zahiri (ed. Ravniass, p. 106 and 114) says that "formerly" an official to whom he gives fourth rank in the hierarchy, which shows he clearly distinguishes him from the *wasir*, bore the title of *mushir*. We seem however to have very little other information about this dignity. On the other hand, the word *mushir* in a non-technical sense is often found along with *wasir* of which it sometimes seems to be a doublet or synonym (cf. Makrisi, ed. Wiet, iv, fasc. I, p. 20 and 74; Nöldeke, *Die Erwählungen von Mamlukönig und seinen Ministern*, Göttingen 1879, p. 55: *mushir nāṣir*, *wasir nāṣir*).

We may note however that this older and broader conception did not survive. According to Ibn Khaldūn, the *wasir* is, it is true, an "assistant" to the sovereign, but to his predecessor Māwardī (*Les statuts gouvernementaux*, transl. Fagnon, p. 43 sqq.) the *wasir* is not the adviser of the *imām* but his delegate.

If Ibn al-Tiqṭāṣ's statement is correct we must see a survival of this older state of affairs in the usage of the Mamlūk chancellery where we find among the honorific *ṭabaq* of the *wasir* that of *mushir al-dawla* (or *al-salṭana* or *al-mamlūk wa'l-salṭana*). Cf. Kalkschandī, vi, 70.

The same usage, which perhaps came from the Seldjūqs, is still more clearly established in the Ottoman chancellery. We actually find the word *mushir* among the *alṭāq* of the Turkish *wasir* (*vezir*) and almost at the head of the formula, which shows its importance: *düstūr-i müberrrem, müshir-i muṣabḥḥam, nāṣir al-ṣalṭana* etc. Whence is the epistolary style the epithets *mushir* and *mushirane* used along with *düstūr* and *düstūrane* or *khidm* and *khidmāne* to designate all that belongs to an official of the rank of *wasir*.

Mahmūd II in creating the principal ministries naturally thought of again giving a real value to this title of *mushir*, which he gave to the principal ministers, and in the reign of his successor 'Abd al-Majīd "the privy council (*meclis-i khāṣṣ*), a regular council of ministers) consisted of the grand vizier, the *shakh al-islām*, eleven *mushir* and three officials of the first rank" (Bianchi, *Le premier annuaire impérial de l'Empire Ottoman*, Paris 1848, p. 7; Bianchi translates *mushir* by "councillor or under-secretary of state" and has been followed by Barthès de Meynard in his *Supplément*, the references in which should be taken with this reservation). In 1250 (1834–1835) the title of *mushir* was given to the new *naṣir* of the Interior (*mukhtār nāṣir* = the former *katib*) and of Foreign Affairs (*khāṣṣ nāṣir* = the former *reṣ* al-kātib; cf. Lutfi, v, 29). The *naṣir* *mushir* *khāṣṣ* was created in 1263 (1846) (Lutfi, viii, 87).

Mahmūd II also created the post of *baylarbey* *wasir* or chief of the imperial guard, who bore the title *mushir-i müshir-i khāṣṣ* (*poṣṭa*), an officer who took rank after the *ser'asker* or War Minister

(Hammer, *Hist. de l'Emp. Ott.*, xvii, 188 and 189). This title was soon to be contrasted with that of *mushir-i 'azīm-i shāhāne* by the other troops (Lutfi, v, 28).

The ministers did not long bear the title of *mushir* which gave place to *nāṣir*, but the former of these titles, perhaps under the influence of the word "marshal", which it more or less resembles, became a special military title. It became the highest rank in the army, corresponding to vizier in the civil service and of *ḥaşakir* in the religious hierarchy. At first the title *radī-i manṣure müshir* (cf. Lutfi, v, 68, 74) was given to the *waṭṭā* of certain provinces, or simply *mushir* of such and such a province (*Ibid.*, p. 165 sqq.; vi, 102, 103; vii, 70). This corresponded to the demarcation of the army corps.

The number of *mushir* or "marshals" soon increased and in the reign of 'Abd al-Hamid II, there were 39 in 1890 and in 1895, 31 (see the *Salmā-i 'asker* of the years 1306 and 1311). Those who had the right to this title were the *ser'asker*, the *topḥāne-i 'amire müshir* or "grand master of artillery", the *ser'asker müshir* or "grand master of the Palace" (replacing the old *lamanā-ḥāḥi*, according to Ahmad Rāsim, *Tarih*, i, 156 and 186), the *khāṣṣ müshir* (as under Mahmūd II), the commanders of the seven army corps (*bol uṣṭa*), the heads of the army services, the *asān* de camp to the *sulṭān* (*yāver-i shrem*). The only duty of five of the *mushir* was to superintend the ceremony of the *Selāmlik* (*selāmlik esmā-i 'āliyye meṣṣur*). The officer in charge of the police station (*merke*) of Beşiktaş, near the Yıldız Kişik, was also a *mushir* (*M.S.O.S.*, vii, 1908, part 2, p. 40). Instead of *ser'asker müshir* the more usual phrase was *müşeyy müshir* (Lutfi, vii, 62).

The honorific form of address for a *mushir* was *devletli* (*devletli*) *efendim* *hazretleri*. In the plural the Persian form *mushirān* or with epithet *mushirān-i 'āṣm*. The name of the office is *mushiriyet* or *mushirlik*, more rarely *mushiri* (Lutfi, v, 91).

The title of *mushir*, which has been borne by Muṣṭafā Kemal Pāshā himself, has survived in the Turkish republic but there is at present only one *mushir* in office, the Chief of the General Staff, Fewa Pāshā.

In Khedivial Egypt they stopped at a stage where the influence of the reforms of Mahmūd II was still felt. The *raṭab* *mushir* there was down to the present reign exclusively the highest grade of officers but without distinction between military and civil offices. It was also in theory a civil rank (*raṭab mülkiyye*) to which all the princes of the khedivial house had a claim.

In Persian the title *mushir* has been rarely used. Cf. however the case of the *mushir al-dawla* (cf. the similar title above) borne by an aide-de-camp of Nāṣir al-Dīn Shāh (Pevrier, *Trois ans à la Cour de Perse*, p. 135–136).

Deny, *Sommaire des archives turques du Caire*, Cairo 1930, index, s. v. *moushir*; Mue Kilisli-Mehemet-Pasha, *30 ans dans les Harems d'Orient*, Paris 1875, p. 126 (description of a ceremonial presentation of a *mushir*'s firman); on the word *mushiriyet* in actual use in Damascus, cf. Sauvery, *Les mots turcs dans le dialecte arabe de Damas*, in *Mél. de l'Inst. fr. de Damas*, i, 1929, p. 117.

(J. DENY)

MUSHRIK [See *SHIRK*]

AL-MUSHTARI, the planet Jupiter, Pers. *Harmand* < *Harmand* (*Akura-mandāh*). The name of the planet is in Sumerian *Šulpa*, later also *Šulpa-khar* "the white star" (= *Meluzāpa* in Hesychios; cf. Meissner, *Babylonian and Assyrian*, Heidelberg 1925, II. 404); in the later Accadian period it is always identified with the mimen supremum Marduk (Biblical Merodach). In Hebrew it is called *Šofēf*, in Greek — just as among the Babylonians, as the symbol of the highest deity — *ἡ ἄρσ ἀρκά*. As a synonym of al-Mushtari we find (e.g. in Hadith) the name *Baridjū* (cf. *Lisān al-Arab*, VII. 323).

The Arab astronomers, like Pythagoras and Ptolemy, put Jupiter in the sixth sphere (*falak*) from within i.e. the third from without. On the interior it adjoins the outer surface of the sphere of Mars and on the exterior the inner surface of the sphere of Saturn. The following table gives the least, mean and greatest distance of Jupiter from the centre of the earth, expressed in radii of the earth, as given by al-Battāni (*Opus astronomicum*, ed. Nallino, ch. 50), al-Farghāni (*Compendium*, ch. 21), Ibn Rusta (*Ḥikāṭ al-Aṣṭāl*, ed. de Goeje, p. 18-20) and Abū Ḥayyā (*Sphaera mundi*, ch. 9), as well as the Hindu values given by al-Bīrūnī from the compilation by Ya'qub b. Tārīk of the year 101 A.H., and the modern figures for these distances:

	least distance (perigee)	mean distance	greatest distance (apogee)
al-Battāni	8,022 rad. of the earth	10,473 rad. of the earth	12,924 rad. of the earth
al-Farghāni	8,876 "	11,640 ¹ / ₂ "	14,403 "
Ibn Rusta	8,820 "	11,503 ¹ / ₂ "	14,187 "
Bar Ḥayyā	8,000 "	10,200 "	12,400 "
Hindu			
(al-Bīrūnī)	8,019 ¹ / ₂₁ "	10,866 ² / ₃ "	13,714 ³ / ₇ "
Modern	92,500 "	122,250 "	152,000 "

be expected from the *Almagest*, taking into account the precession.

The movement of Jupiter is as in the *Almagest* represented to be through four circles ("spheres", *uṣṭāk*) (cf. al-Battāni, *Op. astr.*, ch. 31). The astronomical tables take for its mean daily sidereal motion the value of 5'. Its period of sidereal revolution is given by al-Kāzwinī (*Āḥḥār*, ed. Wüstenfeld, I. 26) at 11 years, 10 months, 15 days.

Al-Mushtari in astrology. Al-Mushtari is the ruler (*rāḥ*) of the *Ḥayāt al-Rūm* (Sagittarius, night-house) and *al-Ḥayāt* (Pisces, day-house), also night-ruler of the 1. *Muthallatha* (Trigonum), which consist of *al-Ḥamal* (Aries), *al-Aḥad* (Leo) and *al-Rūm* (Sagittarius), whose ruler by day is the sun, and finally companion (*raṣīd*) of the 3. *Muthallatha*. It has its *Sharaf* (exaltation) in the 15° of *al-Sarāḥ* (Cancer), its *Ḥabīb* in the 15° of *al-Ḥayāt* (Capricornus). According to al-Kāzwinī (I. 22), "the astrologers call al-Mushtari the larger star of fortune", *al-Sūd al-aḥbar*, because its good influence surpasses that of Venus; they attribute to it numerous happy states and the greatest good fortune. The idea that the planet Jupiter is a star of good fortune is general among other peoples also; we also find it in Babylonia, India and China. For further details of the part played by Jupiter in Arab astrology see the works of Abū Ma'shar.

MUSIKI or موسيقا or موسيقى as it was

written in the West (al-Fārābī, *Ḥikāṭ al-Uṣṭūḥ*; Schiaparelli, *Vocabolista in Arabico* = Latin *musica*), is the name given to the science of music. It is a post-classical word derived from the Greek *μουσική*, and was already current at the time of Ishāq al-Mawṣilī (d. 236 = 850) [q. v.]. In the *Mafāḥ al-Uṣṭūḥ* (10th = 11th century) *musīqī* is one of the four mathematical sciences. Its author says: "As for *musīqī*, its meaning is the [science of the] composing of melodies (*al-ḥikma*). It is a Greek word, and it is named the *musīqī*. And the composer of the melodies is the *musīqār* or *musīqār* (p. 236)". The contemporary Ṭḥawwā al-Sāḥī say (I. 87): "*Musīqī* is *ghinā'*, and the *musīqār* is the *muḥabbib*, and the *musīqār* (*musīqārīya* in Dieterici) is the instrument of music (*ghinā'*)". Ibn al-Musīqī was the name given by the Arabs to the Greek or mathematical theory of music as distinct from 'ilm al-*ghinā'* which was the Arabian practical theory, as we know from the *Kitāb al-Aḥḥād* and Yahyā b. 'Alī b. Yahyā b. Abū Ma'shar (d. 300 = 912). The latter tells us (Brit. Mus. MS., Or. 2361, fol. 236v) of the "disagreement between the masters of Arabian *ghinā'* and the masters of [Greek] *musīqī*". Of course, the Arabs and Persians possessed a theory of music long before they became influenced by the translations made from the Greek

The radius of the earth is here estimated at 3,250 (al-Battāni, al-Farghāni and Bar Ḥayyā) and 3,818 Arab miles respectively (Ibn Rusta) while, according to al-Bīrūnī, the Hindus give it as 4,050 (*ṭasakī*) = 5,150 Arab miles (1 Ar. m. = 1,973 metres; cf. Nallino, *Il valore metrico del grado di meridiano*). The true geocentric distances of the planet Jupiter are actually about 11¹/₂ times greater than given by al-Battāni for example. It should however be pointed out that the relation of 37:23 = 11¹/₂ for the greatest and least observed apparent diameter taken by this scholar, with the help of which the distance of the apogee was calculated from the estimated distance of the perigee at 8,022 radii of the earth agrees remarkably well with the modern estimate. The apparent diameter of Jupiter at the mean distance is given by al-Battāni as ¹/₁₂ of the diameter of the sun. From this and the mean distance he calculates the true diameter of Jupiter at 4¹/₂ diameters of the earth (= 82¹/₂ radii), and its volume at 81 times that of the earth (i.e. [4¹/₂]³). The true values are 2.56 (i.e. 170 times larger); diameter of Jupiter = 11.14 diameters of the earth, volume = 1,380 times the volume of the earth.

Following Ptolemy (*Almagest*) al-Battāni gives the greatest observed northern (geocentric) latitude as 2° 4', the greatest southern as 2° 8'. On the other hand, he points out (ch. 31 and 45) that he found the length of the apogee of the geocentric circle from his observations to be about 8° smaller (in 879 A.D., 164° 28') than was to

at the end of the 11th (viiith) and beginning of the 12th (ixth) century.

The Pre-Islamic System. The source of both Persian and Arabian theory of music was an older Semitic one which had influenced, if it had not been the actual foundation of Greek theory (cf. Farmer, *Hist. Facti...*, p. 123). No Persian or Arabic technical nomenclature of a theory of *mūsīqā* (i.e. speculative theory) has come down to us from pre-Islamic times, although it must have existed. Al-Fārābī (d. 339 = 950) describes a musical instrument, still used in his day, called the *tanbūr al-baghdādī* or *al-mīrānī*, the frets (*darāt*, a Persian word) of which gave a "pre-Islamic scale" (Kosegarten, *Lit. cant.*, p. 89; *Mafātīḥ al-'Ulūm*). It was a quarter-tone scale which was arrived at by dividing a string into forty equal parts. The idea could be traced to Eratosthenes (Ptolemy, *Harm.*, ed. Wallis, ii. 14) but probably was of far greater antiquity (Farmer, *Influences of Music*, in *Proceedings, Musical Association*, 1926, p. 121). Although al-Fārābī's instrument did not actually give the following scale, yet the theoretical division mentioned above would produce a scale which, expressed in cyclic cents, would register:

Fret	Nut	2nd	4th	6th	8th	10th
Cents	0	89	182	281	380	498

J. P. N. Land was of opinion that the later Pythagorean lute scale of the Old Arabian School was derived from the system of the *tanbūr al-baghdādī*. It is more likely however, that there was an earlier lute scale than that of the Old Arabian School, as has been hinted elsewhere (Farmer, *Hist. of Arabian Music*, p. 70). This was a one-octave scale fixed by the accordatura (*tarāṭya*) C-D-G-a, the frets of which gave the following scale:

Cents	0	204	408	498	702	906	1110	1200
-------	---	-----	-----	-----	-----	-----	------	------

For a discussion of this scale see Farmer, *An Old Moorish Lute Tutor*, p. 27; do., *Hist. Facti...*, p. 310.

The Old Arabian System. In the 10th (viiith) century we get definite glimpses of a theory in the music of the Arabs and Persians. We read of a certain Ibn Miqdāsh [q.v.] (d. ca. 97 = 715) who had learned Persian music (*ghinā'*) and accomplishments in playing (*qār*), and had received instruction from Byzantine (*rūmī*) barbiton players (*barbaṭīya*) and theorists (*usūkhānīya* = *psaltes*). These borrowings from abroad he incorporated into a system which came to be recognized throughout the peninsula (*Kitāb al-Aghānī*, iii. 84). We are told however, that Ibn Miqdāsh rejected from Persian and Byzantine methods what he found to be "alien to Arabian music" (*ghinā'*). This would appear to show, as Land once pointed out (*Remarks*, p. 156), that these foreign importations "did not supersede the national music, but were grafted upon an Arabic root with a character of its own". We know that about the same time, or perhaps slightly later (*Kitāb al-Aghānī*, i. 98), that the Arabs adopted the Persian lute in the place of their own instrument. This latter, as we have seen, gave a one-octave scale based on the accordatura C-D-G-a, whilst the Persian lute was tuned in fourths thus: A-D-G-c, which enabled the performer to attain (with a shift) the double octave. Yet only the highest and the lowest strings of their old lute needed to be altered, and these were given the Persian names of *sir* and

hamm, whilst the second and third strings retained their old Arabic names of *mathnā* and *mathlath*. The new accordatura of the lute brought about a change in the scale (*qabaṣa*) as the following distribution of the frets shows (Brit. Mus. MS., Or. 2361, fol. 237). The lute with the Arabs was the basis of all "theory", just as the lyre was with the Greeks.

FRETS	STRINGS			
	<i>Bumw</i>	<i>Mathnā</i>	<i>Mathlath</i>	<i>Sir</i>
<i>Muṣṭafā</i> (Open string)	0	498	996	294
<i>Sabbāba</i> (1 st Finger)	204	702	1200	498
<i>Wusṭā</i> (2 nd Finger)	294	792	90	588
<i>Binjir</i> (3 rd Finger)	408	906	204	702
<i>Kānjir</i> (4 th Finger)	498	996	294	792

Nevertheless, this scale did not satisfy everyone, and we find that the Persians introduced a new *wusṭā* fret at 303 cents, whilst later a famous musician at Hārūn's court named Zalsal [q.v.] (d. 175 = 791) adopted a fret at 355 cents, half-way between the new Persian *wusṭā* fret and the *binjir* fret. By the time of Ishāk al-Mawṣilī (d. 236 = 850) these Persian and Zalsalian frets seem to have created such confusion that this musician attempted to recast the lute scale in its old Pythagorean mould, which, we are told, he did without recourse to Euclid or a solitary book of the "Ancients" as the Greeks of old were called (*Kitāb al-Aghānī*, v. 52-53; *Iqd al-farīd*, iii. 188). His reform appears to have been successful in 'Irāq and lasted there until the 15th (xth) century (*Kitāb al-Aghānī*, i. 2; *Rasā'il Ikhwān al-Safā*, i. 98). Elsewhere however, the Persian and Zalsalian notes continued in favour, as we know from al-Fārābī (Kosegarten, *Lit. cant.*, p. 85) and the *Mafātīḥ al-'Ulūm*, p. 239. A century later, whilst the Persian note of 303 cents had disappeared, that of Zalsal was still popular (Ibn Sina, *Ṣifā*, India Office MS., fol. 173).

There is but little preserved of the writings of the theorists of the Old Arabian School. Whether the books of Yūnus al-Katīb (d. ca. 148 = 765) [q.v.] and the more famous al-Kharrī (d. 175 = 791) [q.v.] on music (*nagham* and *ilā'*) dealt with these theories we know not since they have perished (*Fihrist*, p. 43, 143). A similar fate appears to have overtaken the music books of 'Uḥayd Allāh b. 'Abd Allāh b. Tāhir (d. ca. 300 = 912), 'Alī b. Hārūn b. 'Alī b. Yahyā b. Abī Manṣūr (d. 352 = 963) and Sulaimān b. Aiyūb al-Madīnī (*Kitāb al-Aghānī*, v. 45; *Fihrist*, p. 144, 148). Beyond the sparse information given in the *Kitāb al-Aghānī* and the *Murūṣṣi* of al-Mas'ūdī (viii. 89-99), we have only the *Risāla fī 'l-Mūsīqā* of Yahyā b. 'Alī b. Yahyā b. Abī Manṣūr (d. 300 = 912) to depend on, since the *Kitāb al-Lahw wa 'l-Malah* of Ibn Khur-dādhbih (d. ca. 300 = 912) [q.v.] is in private hands (*Hilf*, xxviii. 204).

Although we read that Ishāk al-Mawṣilī made his calculations by *ghinā'* (Yahyā b. 'Alī, fol. 237), yet the Old Arabian School, so far as we know from Yahyā b. 'Alī b. Yahyā, did not adjust the

frets of the lute (*ūd*) or pandore (*ṭunbūr*) by this method. Their rule for fixing the frets was based on tuning a note with its octave or, as they termed it, its *ṣūbḥ* or *dīf*, although the latter term shows that they recognized the interval ratio 1:2. When the Greek scholastics came to deal with the theory of music all this was changed.

The Greek Scholastics. By the middle of the 11th (10th) century, the effects of the writings of the ancient Greeks on music, which had been translated into Arabic, began to be felt. Among these treatises were Aristotle's *Problems* and *De anima*, the commentaries of Themistius and Alexander Aphrodisiensis on the latter, two works by Aristoxenus — including the *ερωγέα* it would seem, the two books on music attributed to Euclid, a treatise by Nicomachus, presumably the lost book, and the *Harmonics* of Ptolemy, all or most of which had been translated by the first half of the 10th (9th) century at least, as we know from al-Fārābī (*Fihrist*, p. 266, 269, 270; Ibn al-Kifī, p. 65; al-Maḥḥārī, *Anal.*, ii. 87; *ʿIqd al-Jarīd*, iii. 186; B. G. A., vii. 128; *Rasāʾil Iḥwān al-Safā*, I. 102; and Farmer, *Greek Theorists of Music in Arabic Translation*, in *lit.*, xiii, p. 325).

The *ʿilm al-mūsīqī* now became one of the courses of the *ʿulūm ṣābiya* or *quadrivium*, and was studied by most savants at this period although later a few fought shy of the subject probably, as in Western Europe (Farmer, *Hist. Facts*..., p. 184), because it was too abstruse (Ibn Khallikān, iii. 471). The early scholastics dealt with the theory of sound (*ṣawr*), intervals (*al-ʿād*), genres (*ajnās*), species (*anwāʾ*), systems (*ʿimnāt*, *ʿjamāʿāt*), mutation (*intiqāl*) and composition (*taʿlīf*), after the manner of the Greeks, and from the above order we see that Euclid influenced them in this respect. To this was added rhythm (*īzāʿ*). All this was of immense value to Arab theorists and their later copyists, the Persians and Turks. Instead of the old method of describing intervals according to their frets they were now given definite names and recognized by ratios. The octave became *al-kull* ("the whole"), whilst the fifth, fourth, and ditone were given identical names in Arabic. The tone was variously known as the *ṭanin*, *ʿawda* or *mudda*. The semitone or *nusf ṭanin* was recognized in its two forms, the *inṣaf* or *ḍarwāḥ*, and the *ḥaḍḥa* or *ḥaḍḥa* which was the *ḥaḍḥa*, whilst the quarter-tone was the *irḥāḥ*. In some ways the Scholastics were slavish and diffuse in what they borrowed, although in others they were eclectic. On the question of the physical bases of sound however, and their treatment of musical instruments, they pushed ahead of their masters.

The first to take advantage of the newly-found treasures of the "Ancients" was al-Kindī (d. 260 = 874) [q. v.]. Seven treatises on music theory appear under his name (*Fihrist*, p. 255—257; Ibn al-Kifī, p. 370; Ibn Abī Uṣayb'a, I. 210), and four of them would seem to have survived (Farmer, *Hist. of Arabian Music*, p. 127; do., *Some musical MSS. identified*, p. 91). Three of them are at Berlin (Ahlwardt, *Verz.*, Nos. 5503, 5530, 5531): *Risāla fī l-ḥikm al-ḥabariyya al-mūsīqī*, *Risāla fī l-ḥikm*, and another without title. The fourth, the *Risāla fī l-ḥikm al-ḥabariyya al-mūsīqī*, is in the British Museum (Or. 2361), and is probably later than the others. In the latter we see the author's indebtedness to Euclid and Ptolemy. He had written a *Risāla fī l-ḥikm al-ḥabariyya*, presumably Euclid's *Sectio*

canonis. He uses a one-octave alphabetic (*abjad*) notation which was an improvement on Greek methods, but his pointing the way to a reform of the scale was probably of greater import to the Arabs. By introducing a fifth string on the lute, so as to reach the double octave without recourse to the shift, he obtained the Complete System (*ʿJamʿ al-ʿaṣām*: Ptolemy's *ερωγέα ῥήμα*). To accomplish this a fret called the *muḥjannab* had to be introduced at 114 cents between the *muṣṭafā* and the *sabāḥa* fret, which in itself created another problem, and eventually led to frets being tried between the *muṣṭafā* and the above *muḥjannab* at 90 cents and between the *muṣṭafā* and *ḥaḍḥa* frets at 384 cents. Here was the germ of the *limma*, *limma*, *comma* scale of the later *ṭunbūr al-ḥabariyya*, the forerunner of the Systematist scale.

After al-Kindī, we have a gap of a century in actual documents. There are names of theorists in abundance but their works have not survived. Al-Kindī's two disciples, Ahmad b. Muḥammad al-Sarakhsi (d. 286 = 899) and Manṣūr b. Ṭāḥa b. Ṭāḥir, contributed works on the theory of music, the former writing six (*Fihrist*, p. 117, 149, 261). More important perhaps, were the three books of Ṭāḥit b. Kurra (d. 288 = 901) [q. v.], as well as those of Muḥammad b. Zakariyyā al-Rāzi (d. 320 = 932) [q. v.] and Kūṣā b. Lūṭī (d. ca. 320 = 932) [q. v.] (*Fihrist*, p. 276, 295; Ibn Abī Uṣayb'a, I. 309; *Kitāb al-Aghniya*, viii. 34; *Ḥadith al-Khalīf*, v. 161). The greatest of all the scholastics however was al-Fārābī (d. 339 = 950) [q. v.] (Ibn al-Kifī, p. 277; Ibn Abī Uṣayb'a, II. 134; Stein-schneider, *al-Fārābī*). Although we lack two of his books on music, the *Kalām fī l-Mūsīqī* and the *Kitāb fī l-ḥikm al-ḥabariyya*, yet his greatest work, the *Kitāb al-Mūsīqī al-kabīr*, has been preserved. This treatise, so he tells us, was written because he found an "incompleteness" in what had been handed down from the Greeks. It has been called "the most important treatise on the theory of Oriental music" (cf. vol. II. 54), but it probably deserved to rank as one of the greatest works that had been written on music. His treatment of the physical and physiological principles of sound and music is certainly an advance on the Greeks, whilst he was the first to devote a detailed study to musical instruments, a subject on which nothing has come down to us from the Greeks. Al-Fārābī was a good mathematician and physicist, and that enabled him to do justice to what the Arabs called the *ʿilm al-naṣarī* or speculative theory, even to not repeating the errors of the Greeks (Farmer, *Hist. Facts*..., p. 292—293). Yet he was something more. He was a practical musician and could appreciate the art as well as the science, which was more than Themistius could do, as al-Fārābī himself mentions. As a performer with a reputation (Ibn Khallikān, iii. 309; *Rasāʾil Iḥwān al-Safā*, I. 85) he could bring the *ʿilm al-amālī* or practical art to bear upon the discussions. So whilst he was more thorough than the Greeks in handling the physical bases of sound, he could also make valuable contributions to physiological acoustics, i.e. the sensations of tone, a question which the Greeks left practically untouched.

By the time of al-Fārābī further additions had been made to the scale. The principle by which the Persian and Zalalian *muṣṭafā* frets at 303 and 355 cents had been determined, was also applied to the insertion of corresponding *muḥjannab* frets,

between the *muṣṣaf* and the *sabbāḥ*, at 145 and 168 cents, with the result that there were now three *muḡannab* frets known respectively as the Ancient, Persian and Zalzalīan, whilst the one at 114 cents had disappeared. Here is the fretting of the lute in al-Fārābī's day:

	FRETS				
	STRINGS				
	<i>Ḥamm</i>	<i>Maṭṭāḥ</i>	<i>Maḍḍāḥ</i>	<i>Zir</i>	<i>Ḥadd</i>
<i>Muṣṣaf</i>	0	498	996	294	792
<i>Ancient muḡannab</i>	90	588	1086	384	882
<i>Persian muḡannab</i>	145	643	1141	439	937
<i>Zalzalīan muḡannab</i>	168	666	1164	462	960
<i>Sabbāḥ</i>	204	702	1200	498	996
<i>Ancient wusṭā</i>	294	792	90	588	1086
<i>Persian wusṭā</i>	303	801	99	597	1095
<i>Zalzalīan wusṭā</i>	355	853	151	649	1147
<i>Bimjir</i>	408	906	204	702	1200
<i>Khānīr</i>	498	996	294	792	90

Al-Fārābī also noted the scale of the *ṭunbūr al-khurāsānī* proceeding by a *ṭimma*, *ṭimma*, *ṭimma*, which doubtless was prompted by al-Kindī's speculations. It became the parent of the later theory of the Systematist School. In describing the scales of the *rabab* or *rebec* he shows one that gave the just minor third (316) and just major third (386).

The next great writer after al-Fārābī was Abu 'l-Wafā' al-Buzjantī (d. 388 = 998) (q.v.), the most eminent of the Arabic writers on mathematics. His book on rhythm (*ṭabā'*) has unfortunately disappeared, although its importance has been testified to (*Bibl. Ind.*, 1849, p. 93). The contemporary encyclopaedists, the *Ikhwān al-Ṣafā'* in their *Rasā'il*, and Muhammad b. Ahmad al-Khwarizmi in his *Mafāṭīḥ al-ʿUlūm*, also deal with the theory of music. The latter does not break fresh ground although his work is helpful in controlling others. The former, however, are of considerable import because of their able and lucid treatment of acoustics. Here is an instance. According to Helmholtz (*op. cit.*, p. 10), musical tones are distinguished by their force, pitch, and quality, and the force of a musical tone, he says, increases and diminishes with the extent or so-called amplitude of the oscillations of the particles of the sounding body. Preece and Stroh refused to accept this definition and pointed out that loudness does not depend upon amplitude of vibration only, but upon the quantity of air put in vibration (*P. R. S.*, xxviii, p. 366). The *Ikhwān al-Ṣafā'* had already enunciated this opinion. "Hollow bodies" they say, "like vessels... will resound for a long time after they are struck, because the air within them reverberates time after time until it becomes still. Consequently, the wider the vessels are, the greater the sound, because more air is put in vibration" (i. 89). They also recognized the spherical propagation of sound (i. 88), which was an improvement on the Aristotelian *De audibilibus* (802, a) which said that "the direction of sound follows a straight line" (cf. Vitruvius, *De arch.*, v. 3).

The next writers whose works have been spared us are Ibn Sīnā (d. 428 = 1037) (q.v.) and Ibn Zayla (d. 440 = 1048). Two treatises on music stand to the credit of Avicenna, as he was known in Europe, and they are contained in the *Shifā'*

(India Office MS., 1811) and the *Nagāt* (Bodleian MS. Marsh, 521) (Ibn al-Kifī, p. 413; Ibn Abi Usaybi'a, ii. 2; cf. Casiri, i. 271). Unlike al-Fārābī, the *ṭabā'* al-*ra'is* was not a practical musician, yet his biographers claim that he dealt with questions on the theory of music which were neglected by the Greeks. He is scientific and philosophic in his approach, and even critical at times, but he displays little of that originality that is so apparent in his other writings. Ibn Zayla was his disciple and echoed his opinions, although some fresh details emerge when dealing with the practical art. He quotes from al-Kindī on the question of rhythm, and is useful on that account.

Egypt also contributed its quota of music theorists, two outstanding writers being Ibn al-Haitham (d. 430 = 1039) (q.v.) and Abu 'l-Ṣalt Umāyya (d. 528 = 1134). Ibn al-Haitham appears however to have written commentaries on both the *zawajir* *ṣawāḥ* and the *Elasaryūn* *ṣawāḥ* of Euclid (Ibn al-Kifī, p. 168; Ibn Abi Usaybi'a, ii. 90). Although there were several Arabic commentaries on Euclid's *Canon* not one appears to have survived. Yet we have two at least in Hebrew whose authors probably depended on Arabic works. One of these was Moses N... Levy (Halevy) who quotes Shem Tob b. Isaac Shafrūt, and the other was Isaac b. Isaac (*Beṭh eṣar haṣṣiphurim*, Year L, xxix, xxi.). The *Risāla fī 'l-Musīqā* by Abu 'l-Ṣalt was probably of some importance since it is quoted by Jewish writers (Ibn Abi Usaybi'a, ii. 52; Ahlwardt, *Fors.*, No. 5536 [5]; P. Duran, *Grammar*, Vienna 1863, p. 37). In Syria we have Ibn al-Naḡgāsh (d. 574 = 1178), Abu 'l-Hakam al-Bāḥillī and his son Abu 'l-Maḡdī Muhammad (d. 576 = 1180), and 'Alam al-Dīn Kaiṣar (d. 649 = 1251), all of whom were interested in music theory (Ibn Abi Usaybi'a, ii. 144, 155, 162, 181; Ibn Khallikān, iii. 471), whilst further East we have such names as Ibn Man'a (d. 551 = 1156), 'Abd al-Mu'min b. Ṣaṭf al-Dīn (vith = xiith century), Fakhr al-Dīn al-Rāṣī (d. 606 = 1209) (q.v.), and Naṣr al-Dīn al-Ṭūsī (d. 673 = 1274) (q.v.) (Ibn Khallikān, iii. 467; Bodleian MS. Ouseley, No. 117; Brit. Mus. MS. Or. 2972; Paris Bibl. Nat. MS., Arabe, No. 2466). In the West, the two theorists of consequence are Ibn Bāḡdja (d. 532 = 1138) (q.v.) whose book on music enjoyed the same reputation in the West as that of al-Fārābī in the East (al-Maḡkārī, *Anal.*, ii. 125), and Ibn Rushd (d. 594 = 1198) (q.v.) whose commentary on Aristotle's *De anima* reveals that lucidity of treatment in the section dealing with the phenomena of sound that made him so famous on other questions.

The Systematist School. After Ibn Sīnā and Ibn Zayla, the most thorough exposition of the theory of music, so far as existing documents show, was made by a musician in the service of the last Caliph of Baghdad, named Ṣaṭf al-Dīn 'Abd al-Mu'min b. Faḡhīr (d. 692 = 1294) (q.v.), the author of two estimable works, the *Risāla al-Sharafiya* and the *Kitāb al-Adwār*, which almost every subsequent writer in music uses as his principal authorities. A later theorist, 'Abd al-Qādir b. Ḥabīb, frankly admitted that Ṣaṭf al-Dīn was the fountain head in music theory, whilst a modern has called him "the Zarlino of the Orient" (Kienewetter, p. 13), and many commentaries have been penned on his theories. Ṣaṭf al-Dīn was no mean physicist, and he attacks both al-Fārābī and Ibn Sīnā when

he finds that their terms and definitions are inexact. Much of it may be mere quibbling over verbal niceties, but it redounds to his credit that he realized that in a science we must start off with terminological exactitudes. Like al-Fārābī, he was a practical musician, and the reform of the scale, which must be attributed to him (cf. Helmholtz, p. 280), was possibly due to this fact. The Greek scholiasts had done much to stabilize Arabian music theory, yet anomalies still existed. The most notable was the Zalzalīan *wuṣṣā* note at 555 cents together with its attendant sixth at 853 cents. These did not conform to the scholiasts' scale which produced a succession of fourths (cf. Helmholtz, p. 281). It was to remedy this defect, it would seem, that Ṣāfi al-Dīn laid down a new theory of the scale in which the octave was divided into seventeen intervals in the succession of *limma*, *limma* and *comma*, which enabled him to embrace the fractious Zalzalīan notes of 555 and 853 cents by close approximations which worked out at 384 and 882 cents. This scale, which has been considered "the most perfect ever devised" (Parry, *Art of Music*, 1st ed., p. 29), gave consonances purer than our scale of equal temperament can afford us (Riemann, *Catechism of Musical History*, i. 65). It is no wonder therefore that Helmholtz has considered the theory of the Systematist School so "noteworthy in the history of the development of music" (p. 283). Here is the scale of Ṣāfi al-Dīn:

VEETS	STRINGS				
	<i>Ḥamm</i>	<i>Muthlaḥ</i>	<i>Madhūn</i>	<i>Zir</i>	<i>Ḥadd</i>
<i>Mutlaḥ</i>	0	498	996	294	792
<i>Zaid</i>	90	588	1086	384	882
<i>Muḍḡannab</i>	180	678	1176	474	972
<i>Sahbāḥa</i>	204	702	1200	498	996
<i>Persian wuṣṣā</i>	294	792	90	388	1086
<i>Zalzalīan wuṣṣā</i>	384	882	180	678	1176
<i>Binjir</i>	408	906	204	702	1200
<i>Shinqir</i>	498	996	294	792	90

After the fall of Bagdad (654 = 1256), the hub of culture moved further East, and the writings of the Systematist School have to be sought as much in Persian as in Arabic. Most of this literature has been preserved. Kūṭh al-Dīn al-Shīrāzī (d. 710 = 1310) [q. v.], who devoted a valuable *ḡunna* to the "science of music" in his *Durrat al-Tāḡ* (Brit. Mus., MS. Add. 7694), was the first of these writers in Persian. He was followed by Muḥammad b. Maḥmūd al-ʿAmulī (viiith = xivth century), whose *Nafāʾis al-Funūn* also has a section on music (Brit. Mus., MS. Add. 16827). Another xivth century Persian work deserving of mention is the *Kanz al-Tuhaf* (Brit. Mus. MS. Or. 2361). More important were the four works of ʿAbd al-Qādir b. Ghālibī (d. 839 = 1435) [q. v.], entitled the *Djāmiʿ al-ʿAlhān*, with its two epitomes the *Mafāḥid al-ʿAlhān* and the *Mughṭaṭar al-ʿAlhān* (Bodleian MSS., Marsh, N^o. 282, Ouseley, N^o. 264, 385), and the *Sharḥ al-ʿAdwār*. A fifth work, the *Kanz al-ʿAlhān*, the most precious of all since it contained noted music, has disappeared. Ibn Ghālibī depends on al-Fārābī, Ibn Sīnā, and Ṣāfi al-Dīn, but is by no means servile. What he adds to our knowledge of the music of his day concerns the practical art. Both his son and his

grandson were theorists, and their works still exist, the *Nabḥat al-ʿAdwār* and the *Mafāḥid al-ʿAdwār* (Nūrī ʿUṭmāniya Library, Nos. 3646, 3649). They were in the service of the Turkish sultāns, who were now patronising this class of servants, and we find two theorists, Khidr b. ʿAbd Allāh and Aḥmad Ughla Shakhullāh, writing in Turkish, the latter translating the *Kitāb al-ʿAdwār* of Ṣāfi al-Dīn (Lavignac, N^o. 2978). They were eclipsed, however, by two Arabic writers, the author (fl. 855—886 = 1451—1481) of the *Muḥammad b. Murād Treatise* (Brit. Mus., MS. Or. 2361), and Muḥammad b. ʿAbd al-Ḥamid al-Lādīkī (fl. 886—918 = 1481—1512), the author of the *Risālat al-Fathāya* (Brit. Mus., MS. Or. 6629). Al-Lādīkī is the last writer to deal in an appreciable way with the speculative theory of music which had been suscitiated by the Scholists (cf. Kiesewetter, p. 88). As for the author of the *Muḥammad b. Murād Treatise*, we have in him an able mathematician who places the *Arithmāṭikī* of Nicomachus and Ibn Sīnā under contribution. He is replete with argument and carefully examines the statements of his predecessors on questions of acoustics. We find him saying that he had put certain theories to practical test and found them wanting. He gives divisions of the string other than those laid down by Ṣāfi al-Dīn.

The contemporary encyclopædias also contain a section on music, the most noteworthy being the *Durr al-Naḡm* (Vienna MS., N^o. 4) or *Irshād al-Ḥāqid* (Bibl. Ind., 1849) of Muḥammad b. Ibrāhīm al-Akfānī (d. 749 = 1348), the *Makḥḥat al-ʿUlūm* (Brit. Mus., MS. Or. 3143) attributed to ʿAlī b. Muḥammad al-Djurdjānī (d. 816 = 1413), and the *Unwūḍḥ al-ʿUlūm* (Vienna MS., N. F., N^o. 7) of Muḥammad Shāh ʿĀlebi b. Muḥammad al-Fanāḥī (d. 839 = 1435). To al-Djurdjānī may also be ascribed the *Sharḥ Mawḥḥat al-Mukṭarab Sāḥā*, the most thorough and illuminating commentary on the theories of Ṣāfi al-Dīn ʿAbd al-Muʾmin, and the most strikingly original treatment of the physical and physiological rudiments of sound (Brit. Mus., MS. Or. 2361). After the close of the 15th (xvth) century, treatises on the *ʿilm al-mūsīqī* are rare. Writers abound who profess to deal with it, but actually they are only concerned with the practical art. If any *ʿilm* is displayed in these later books it is the *ʿilm al-nuḡm*, and authors fill their pages with astrological tables linking up the twelve *ḥayāt* of the heavens with the twelve *maḥmūdāt*, and so forth. Many treatises are written in *verse*, a form which, however much it may attract the pure *alsh* lover, is scarcely suitable in dealing with a science. The author of one of these however, Shams al-Dīn al-Saydāwī al-Dihābī (or al-Dimashqī), is worthy of attention by reason of his use of a staff for the purpose of a musical notation, a device which may be traced to the year 1200 at least (Bodleian MS., Marsh, N^o. 82; Paris Bibl. Nat. MS., Arabic, N^o. 2480). In the West, treatises on the theory of music are scarcer still. Ibn Khaldūn (d. 809 = 1406) [q. v.] gives a glimpse of what was taught under this heading in his day (*Prolog.*, ii. 410), but actual works are rare. A certain ʿAbd al-Rahmān al-Fāṣī wrote a treatise in 1650 entitled the *Kitāb al-Djūmūʿ fī ʿIlm al-Mūsīqī wa ʿl-Taḥḥīl* (Ahlwardt, *Verz.*, N^o. 5521), but its author borrows his theory from older authorities (Farmer, *An Old Moorish Lute Tuner*, p. 14).

The Modern School. The chief feature of this school is the so-called quarter-tone system, and its most important theorist is Miḥḥā'il Muḥḥāḥ (d. 1888) [q. v.]. The system was not invented or introduced by him as Parisot thought (*Rapport*, p. 21) because Muḥḥāḥ himself tells us that it existed before his day (*M. F. O. B.*, vi. 52, 105). Nor can we say that the sixteenth century was the period of its origin (cf. Lachmann, *Greene's Dict. of Music*, iii. 576) since we know that it was practised in the xviiith century as Baron de Tott (La Borde, i. 436-439), Toderini (i. 243) and Murat (Féris, ii. 363) have shown. Nor can it be traced in a MS. mentioned by Villoteau, as Land suggested (*Recherches*, p. 77-78), because this work can be identified with a MS. entitled *al-Shuḥḥāra dhāt al-Aḥmām* (Brit. Mus., MS. Or. 1535) in which there is no mention of the quarter-tone theory. How did the system originate? Dr. Lachmann holds that it was due to the needs of transposition (*Greene's Dict. of Music*, iii. 567). On the other hand, Collangettes avers that in actual practice (for the lute is no longer fretted) it is simply the Systematist scale to which several smaller intervals have been added (p. 419). Some of the technical terms used in the system are of Persian origin such as those for the quarter-tone, three quarter-tone, and tone, *nim'araba*, *tiḥ'araba*, and *larḥa*. Further, as early as the xvth century, as we know from Ibn Qaḥḥib, Shihāb al-Dīn al-'Aḥḥāmī, and the author of the Muḥḥammad b. Muḥḥad Trentise, intervals finer even than those of the Systematist School were being used in the newly-adopted *ḥuḥḥā* or modal extensions, which were not used in the time of Saḥī al-Dīn 'Abd al-Muḥḥin, although they are part of the earlier (?) Persian system as reflected in the *Bahḥat al-Aḥḥā* by 'Abd al-Muḥḥin b. Saḥī al-Dīn (Bodleian MS., Ouseley, No. 117). A Persian origin of the quarter-tone system is, therefore, not unlikely, although Maḥḥmūd Rāḥḥib, a well known writer on Turkish music, argues in favour of a Greek origin (see the Turkish journals *Milli Maḥḥmūd*, May-Oct., 1927, and the *Turkische Post*, June and Aug., 1928). In the xviiith century we have evidence (La Borde, i. 436) that the octave was divided into twenty-four equal parts of 50 cents each producing a scale comprising three major tones of 200 cents, each divided into four quarter-tones, and four minor tones of 150 cents, each divided into three quarter-tones:

TONES	Aḥḥā	Dhāḥā	Shāḥā	Ljāḥāḥāḥā	Nawā	Ḥuḥḥāḥ	Awḥ	Māḥḥā
CENTS	200	150	150	200	200	150	150	Total 1200

Muḥḥāḥ tells us that he was dissatisfied with the theorists of his day in regard to their division of the octave (cf. Murat's division of the octave into 55 *commas*). There was certainly a difference so far as Egypt was concerned, since one theorist divided even the minor tones into four parts as well as the major tones, thus giving twenty-eight intervals to the octave (Muḥḥammad b. Ismā'il Shihāb al-Dīn). At any rate, Muḥḥāḥ attempted to lay down a principle that would establish the quarter-tone (*ḥuḥḥā*) system on a proper basis. His method is by no means clear (Land, *Recherches*, p. 75; Collangettes, p. 417, 418), but Ellis (*J. S. A.*,

p. 497) and Parisot (*Mus. orient.*, p. 15-16) believe that he was aiming at a quarter-tone scale of equal temperament, twenty-four to the octave, which was actually the scale (see La Borde, i. 436) that he found in use (cf. Collangettes, p. 419).

NOTES	Yāḥḥā	Uḥḥāḥāḥ	Ḥāḥ	Aḥḥā	Dhāḥā	Shāḥā	Ljāḥāḥāḥ	Nawā
CENTS	0	200	350	500	700	850	1000	1200

This is the same scale as the preceding with the exception that the base has been given a lower note in the system, i.e. *yāḥḥā* instead of *ḥāḥ*. The system of the quarter-tone scale is generally accepted to-day throughout the Islamic Near East (Collangettes, p. 415), and even the Middle East ('Alī Naḥḥī Khān Wasīḥ).

Although in the Maghrib very little is written about the theory of music nowadays, yet in Egypt, Syria, Persia, and Turkey, there is no lack of books on the subject, as the *Bibliography* will show, although many of the treatises are merely manuals for practitioners. Even in Turkestan, under the auspices of the Soviet, works are being published. During the last decade a great impetus has been given to the study of the theory of music by the establishment of conservatories of music in the great Oriental capitals and chief cities, notably the *Dār al-'Alīm* at Constantinople and the *Nāḥī 'l-Muḥḥāḥ al-Shuḥḥā* at Cairo.

(H. G. FARMER)

MUSLIM (A.), part. IV of *Islam*, denotes the adherent of Islam [q.v.]. The term has become current in some European languages (also in the forms *moslem*, *muslem*), as a noun or as an

adjective or as both, side by side with *Maham-madan* (in different forms). It has replaced *Musulman* (in different forms), except in French, where the latter term is used as a noun and as an adjective. The origin of *musulman* is probably *muslim* with the ending *-an* of the adjective in Persian. In some countries, e.g. Germany and the Netherlands, popular etymology has taken *man* for the vernacular "Mann, man", whence the plural forms *Muslimänner*, *Muslimänner* etc. These forms have, however, become antiquated. — In Arabic literature the term *Muslim* is and has always been used to denote the adherents of Islam. See further the artt. *IMĀN*, *AMR AL-MUSLIMIN*.

MUSLIM b. AḲĪL, cousin of HUSAIN b.

All. The latter, taking refuge in Mecca after the death of Mu'awiya I, sent him to study the situation in Kufa where the partisans of 'Alī were inviting him to come and proclaim himself caliph. Muslim there received promise of support from thousands of Shī'as. He wrote to Husain imploring him to hasten there and take command of the movement in person. In the meanwhile, the energetic Ubaid Allāh b. Ziyād had replaced the irresolute Nu'mān b. Bashir [q. v.]. Realising the seriousness of this change Muslim took refuge with Hānī b. 'Urwa [q. v.]. A stratagem devised by the new governor soon revealed his hiding place. Hānī having been captured, Muslim, abandoned by all his followers, wandered from one place of concealment to another. The descendants of Ash'ath b. Kaïs [q. v.] revealed the secret of his last hiding-place — a deed which earned the family the hatred of the Shī'a. The unfortunate 'Alid when discovered surrendered without resistance to the minions of 'Ubaid Allāh. His head was sent to the caliph Yazid I.

MUSLIM b. AL-HADJĪJĀDĪ ABU 'L-HUSAIN

AL-KUHAIRI AL-NISĀBURI WAS BORN AT NISĀBUR IN 202 (817) or in 206 (821). He died in 261 (875) and was buried at Nāzābād, a suburb of Nisābur. An anecdote regarding the cause of his death is related by Ibn Hajar (see *Bibliography*). His fame is based upon his *Ṣaḥīḥ*, which, along with Bukhārī's book of the same name, enjoys the highest fame among the collections of traditions.

Muslim travelled widely to collect traditions, in Arabia, Egypt, Syria and 'Irāq, where he heard famous authorities such as Ahmad b. Hanbal, Hammāla, a pupil of Shāfi'i, and Ishāq b. Rāhūya. His *Ṣaḥīḥ* is said to have been composed out of 300,000 traditions collected by himself. He wrote a large number of other books, on *ḥadīṭ*, traditions and biography, none of which seems to have survived.

The *Ṣaḥīḥ* differs from the other collections of canonical *ḥadīṭ* in that the books are not subdivided into chapters, whereas in Bukhārī's work the traditions act as examples of the *tarḡīma*'s.

Still, it is not difficult to trace in the order of the traditions in Muslim's *Ṣaḥīḥ* a close connection with corresponding ideas of *ḥadīṭ*. As a matter of fact the groups of traditions have been provided with superscriptions which may be compared with Bukhārī's *tarḡīma*'s; this was not, however, done by Muslim himself, as appears from the fact that the headings are not uniform in the different editions of the *Ṣaḥīḥ*.

A second difference between Muslim and the other collections consists in the fact that he pays peculiar attention to the *imād*'s, to such an extent that a tradition in his work is often followed by several different *imād*'s which serve as an introduction to either the same or to a slightly different *sunna*. Such a new *imād* is indicated in the text by *ḥ* (*ṭahawt* or *ḥawāla* "change"). Muslim is praised for his accuracy regarding this point; in other respects, however, Bukhārī is superior to him, as is even recognised by a man so devoted to him as al-Nawawī, who wrote upon the *Ṣaḥīḥ* a commentary, which in itself is a work of immense value for our knowledge of Muslim theology and *ḥadīṭ*.

Muslim has prefixed to his work an introduction to the science of tradition. The work itself consists of 52 books which deal with the common subjects of *ḥadīṭ*: the five pillars, marriage, slavery, harter, hereditary law, war, sacrifice, manners and customs, the Prophets and the Companions, predomination and other theological and eschatological subjects. The book closes with a chapter on the *Kur'ān* (*Tafsīr*), the shortness of which is several times outweighed by the value of the *Kitāb al-Imān*, which opens the work, and which is a complete survey of the early theology of Islam.

On the commentaries upon the *Ṣaḥīḥ* see Brockelmann, *G. A. L.*, i. 160, to which may be added: 'Alī b. Sulaimān al-Maghribī, *Wasayt al-Dibādī* 'alā *Ṣaḥīḥ Muslim b. al-Hadījījādī*, Cairo 1298.

MUSLIM b. KURAISH SHARAF AL-DAWLĀ

ABU 'L-MAKARIM OF THE ARAB FAMILY OF THE 'UḤAYYID [see 'UḤAYYID] WAS THE MOST IMPORTANT ruler of the last great Arab dynasty in the Near East; during his reign the struggle between Fāṭimids and 'Abbasids for supremacy in Syria and Mesopotamia was decided in favour of the latter. In the year 433 (1042) the 20 year old Muslim was chosen chief of the tribe after the death of his father Kuraish b. Badrān and succeeded him as ruler of Mōsul. Like most Arab rulers of the lands of the Euphrates he recognised the Fāṭimid caliph in Cairo as his suzerain partly because he was himself a Shī'i. Quite early in his reign he began to cherish the ambitious plan of gradually extending the rule of his tribe over Mesopotamia. Every means of extending his power was taken by him. The first opportunity occurred

when in 458 (1066) the Saljuq Sultan Alp Arslan [q. v.] after conquering the Kh̲arizmians was proceeding to establish his supremacy in Syria. For this he had to entice the Arab chiefs from the sphere of influence of the Fatimid caliph and win them over to an alliance with him and to a recognition of the Abbāsid caliph. He therefore concluded an alliance with Muslim and granted him several towns in Mesopotamia. As a partner in this alliance Muslim defeated the Banū Kilāb who were vassals of the Fatimids. In 463 (1070) Alp Arslan died. The alliance was renewed with his son Sultan Malik Shāh [q. v.]. With his help Muslim was able a few years later to extend his power into Syria and take Aleppo. In 472 (1079) this town had no strong owner; the town was ruled by the ʔādī al-ʔh̲atāʔ, and the citadel by one of the last Mirdāsids [cf. the article ʔALAS]. There was a lack of provisions, as the town was continually threatened by enemies and the roads to it were cut off.

Damascus was in possession of Sultan Tutuḡ [q. v.], to whom his brother Malik Shāh had granted Syria, which was still to be conquered. It was natural for Tutuḡ to wish to bring Aleppo also into his power but the people did not care for him because of his cruelty and greed, shut their gates against him and appealed for help to Muslim. After Tutuḡ had withdrawn, Muslim approached the town with large supplies of provisions and after lengthy negotiations both town and citadel were handed over to him [see ʔALAS] and the Mirdāsīd chiefs received some smaller towns in compensation. He received a grant of confirmation from Malik Shāh, who did not want his brother to become too powerful, on paying a considerable annual tribute (£ 150,000). Muslim extended his territory by adding to it Ruḡā (Edessa), Harrān and a number of smaller fortresses, out of which he drove the leaders of Turkish bands so that his power stretched from Northern Syria to the Euphrates. Instead of being content with this his unbounded ambition made him overestimate his strength. Like Tutuḡ he had dreams of conquering all Syria, especially Damascus. He could not obtain the town from Malik Shāh who had granted Central Syria to Tutuḡ. He therefore again joined forces with the enemy of the Saljuqs, the Fatimid caliph, who promised to send troops to assist him to take Damascus. Muslim took advantage of the absence of Tutuḡ who was engaged in a campaign against the Byzantines in Antioch, to advance on Damascus. He occupied several towns in Central Syria, including Baalbek [q. v.]. But the Fatimid help did not materialise and Tutuḡ was called back by his vassals who hated Muslim. These circumstances and a rising in Harrān forced him to retire. To replace Muslim who had deserted him, Malik Shāh bestowed his favour on the sons of a former vizier of the Abbāsids, Ibn Djaḡir, and sent them against a supporter of the Fatimids, the Marwāsīd Maḡḡūr, to deprive him of his chief possession Amid. The latter found support from Muslim. They joined forces, were attacked at Amid and withdrew into the fortified town leaving their other possessions undefended. Sultan Malik Shāh seized the opportunity to send ʔamid al-Dawla, another son of Djaḡir, to Mōsul, to take this city from Muslim who had in the meanwhile escaped from Amid. When Muslim saw that he had lost his possessions he made overtures to the Sultan through

the son of the vizier Niḡām al-Mulk and humbly begged for mercy. The Sultan, who thought Muslim no longer dangerous, pardoned him and restored his lands to him but Muslim could not be at peace. Perhaps in secret agreement with Malik Shāh, he turned in 477 (1084) against a Saljuq prince of Asia Minor, Sulaimān b. ʔuṭalmish, who had taken Antioch from the Byzantines and demanded from him the same tribute as the Byzantines had paid. When Sulaimān refused to pay, he advanced against him with a force of Arabs and Turkomans. In the neighbourhood of Antioch in Safar 478 (May 1085) the forces met, unexpectedly for Sharaf al-Dawla; his troops, who hated Muslim, went over to Sulaimān. Muslim was defeated and slain along with 400 of his Arabs (cf. Ibn al-ʔAdīm, fol. 68b). With his death the power of the ʔUḡalids was at an end. They lost Aleppo on Muslim's death and only survived a few years longer (till 489 = 1090) as governors of Mōsul [see ʔUḡALIDS]. Muslim is described as an able and just man and his tolerance of Christians was remarkable. His rule is said to have been able and orderly and indeed he did bring the finances of Aleppo into order in a very short time after taking it. In any case he had wide vision and successfully endeavoured to maintain the power of the Arab tribes in Syria and Mesopotamia. It ceased with him; Turkish generals became the rulers of Syria and Mesopotamia.

Bibliography: Ibn al-Aṭṭir, *al-Kāmil*, index; E. v. Zambaur, *Manuel de généalogie*, index, s. v. (M. SOBERNHEIM)

MUSLIM b. ʔUḤBA of the tribe of the Banū Murra, a famous leader in the armies of the Sufyānid caliphs. We know very little about the early stages of his career. We find him early established in Syria to which he probably came with the first conquerors. Completely devoted to the Umayyads and of great personal valour, he led a division of Syrian infantry at the battle of Siffīn. But he failed in an attempt to take the oasis of Dūmat al-Djandal [q. v.] from ʔAlī. The caliph Muʔāwīya appointed him to take charge of the *ḡharāḡ*, the finances, of Palestine, a lucrative office in which he refused to enrich himself. Muslim was prominent at the death-bed of Muʔāwīya. The caliph had charged him and Djaḡḡāḡ b. ʔaṣīb [q. v.] with the regency until the return of Yazīd who was in Anatolia at the head of his troops. The confidence which the great Sufyānid had in his loyalty is seen in his advice to his heir: "If you ever have trouble with the Hidsās, just send the one-eyed man of the tribe of Murra there" (Muslim had only one eye). This time had now come.

Muslim had been a member of the embassy sent to Medina to bring the Anṣār back to obedience. All other efforts at conciliation having failed, Yazīd I decided to resort to force. In spite of Muslim's age and infirmities, Yazīd felt he was the man to command the expedition. He was obliged to travel in a litter so infirm was he. At Wādī ʔ-ʔurāḡ, Muslim met some Umayyads who had been driven out of Medina; these exiles informed him of the military situation of the town. When he reached the oasis of Medina, Muslim encamped on the *ḡarra* of Wāḡim and for three days awaited the result of the negotiations begun with the rebels, Anṣār and descendants of the *muhājirūn* of the ʔuraish. On the fourth day, all overtures

having been rejected, he made his plans for battle. It was a Wednesday, the third last day of *Uhu* 'l-Hidjja 63 (Aug. 26-27, 683). After a slight initial advantage for the Ansār, the battle ended at midday in the complete rout of the rebels. The Syrians followed them into Medina and began to plunder the city. Anti-Umayyad legend has much exaggerated the horrors and the duration of this pillaging which it extends to three days. On the day after the battle, Muslim's intervention restored order and he used the next few days in drawing up the case against, and trying the principal leaders of the rebellion who had fallen into his power.

Having established order in the town, which he left in charge of Rawh b. Zinba', in spite of the aggravation of his malady, he resumed his march on Mecca to deal with 'Abd Allāh b. al-Zubair [q. v.] who had rebelled against the Umayyads. Arriving at Mughallā [q. v.] he became so ill that he had to stop. In obedience to the caliph Yazīd's instructions, he appointed to succeed him in command of the army Husain b. al-Numair [q. v.], his second in command. He died at Mughallā, where his tomb long continued to be stoned by the passers-by. Writers with Shi'a sympathies are fond of twisting the name Muslim into *Murif* (criminal: an allusion to Qur'ān, v. 36; vii. 79; xl. 29, 36 and *passim*). One statement which must be a ridiculous exaggeration puts his age at 90. Every thing, however, points to his having been born before the Hidjja. He died a poor man. This disinterestedness is not the only feature in his character which makes us take him as one of the most representative of the types of this generation of soldiers and statesmen, whose talents contributed so much to establish the power of the Umayyads. Doss described him as "un Hérouin mécréant". Muslim, it is true, retained all the proverbial uncouthness (*ghifā'*) of the Banī Murra. But his whole career reveals the Murri general as a convinced Muslim of a rectitude rare in this period of unsettlement, which saw so many extraordinary vicissitudes of fortune and wavering loyalties.

Bibliography: Tabart, ed. de Goeje, i. 3283; ii. 198, 409-425, 427. Other references are given in the writer's *Califat de Yazīd Ier*, p. 223 *seq.*, reprint from *M.F.O.B.*, v. 225 *seq.* and in his *Étude sur le règne du calife omayyade Mo'awia Ier*, in *M.F.O.B.*, i. 299, p. 19, 45, 269, 373. (H. LAMMENS)

MUSLIM B. AL-WALID AL-ANṢĀRĪ (called *Ṣarf* al-*Ḡhawānī* = "he who is laid low by the fair ones", as was al-Kuṭāimī [q. v.] before him), an Arab poet of the early 'Abbāsid period, born in Kufa c. 130-140 (747-757), d. 208 (823) in Djurdjān. His father, a *muṣawwif* [q. v.] of the Ansār [q. v.], was a weaver. Nothing is known of the poet's education. He probably got his literary training not from particular teachers or from books but in the busy life of the Mesopotamian cities, the intellectual life of which had risen to a still higher level with the advent of the 'Abbāsids. Like most of his contemporaries he earned his living as a poet by writing panegyrics and was acquainted with many statesmen and emirs. Among the former were the general Yazīd b. Ma'ād al-Shibānī (see *Dirwān*, N^o. 1, 6, 10, 16, 49), Dāwūd b. Yazīd al-Mughallabī (N^o. 20), Ma'mūr b. Yazīd al-Himyārī (N^o. 31) and many others. He gradually

won the favour of the influential Barmakids (cf. N^o. 17, 40, 45) and of the caliph Harūn al-Rashīd (N^o. 14, 41, 57); according to one story, he received his nickname from the latter on account of a verse of his (N^o. 3, 35; cf. also N^o. 23, 39). He even mentions the caliph's sister 'Abbas in an ode (N^o. 57, 12). The fall of the Barmakids about 187 (803) did not affect his career: he dedicated some of his odes to al-Amin (N^o. 7, 28, 30) but his principal patron in later times was al-Ma'mūn's vizier Faḍl b. Saḥl [q. v.]. Through his intervention he received from al-Ma'mūn an official post (probably *qāḥib al-harīf*) in Djurdjān. He remained faithful to Faḍl b. Saḥl until his death in 202 (818), and out of grief for him he wrote no more. There is a story told by his rawī according to which he destroyed a considerable part of his poems before his death.

As regards the matter and style of his poems he was on quite traditional ground. In addition to his old-fashioned odes and elegies his satires are particularly interesting in this respect; in his polemics with the (otherwise little known) poet Ibn al-Kanhar on the merits of the Ansār and Kuraish he revived the coarse and bitter tone of the polemics of an al-Farazdaq [q. v.] or an al-Tirmidhī [q. v.] on a similar subject. The two hundred years of development of Arabic poetry were naturally not without influence on him; in his *nawā'id* we frequently find the style of an 'Umar b. al-Raḍ'a or al-'Abbās b. al-Aḥnaf (see *THE AL-AḤNAF*), Muslim's contemporaries. His drinking songs deserve special mention. Although Nöldeke only very rarely finds in them "the natural effusion of Bacchantic joy as so frequently in Abū Nuwās [q. v.]", Arab critics are of another opinion. These two poets are to them practically the same in this respect and we must confess they are right. His drinking-songs are not only of great value for the descriptions of society and social life in the cities but from the point of view of poetry they are among the best of Muslim's work. If we must, as regards subject matter, number Muslim among the imitators of the old poets, in style he belongs to a more modern period. The historians of Arabic literature frequently mention him as the first to introduce the "new style", *al-baḍi'*, with its tropes and figures. This is however not quite such a simple point; the "new style" arose only gradually in Arabic poetry, although Muslim with his contemporaries, Baḥshār b. Burd [q. v.], Abū Nuwās etc., was one of the first who definitely struck out on the new path. The younger generation, especially Abū Tammām [q. v.], drove this new style to banality.

Muslim was on terms of friendship or enmity with many contemporary poets, e.g. Abū Nuwās, Abū 'Alīyah [q. v.], al-'Abbās b. al-Aḥnaf (who maliciously called him *Ṣarf* al-*Ḡhawānī* or *Ṣarf* al-*Kāṣ*; cf. *Dirwān*, N^o. 44), Abū 'Alīyah [q. v.], al-Ḥasain al-Khalīl etc. His literary influence was not inconsiderable. Dhū'ill [q. v.] was his pupil (which did not prevent him exchanging satires with Muslim), Abū Tammām was particularly fond of studying his poems. His *Dirwān* has been transmitted in very unsatisfactory fashion; it was collected in alphabetical order by al-Sull [q. v.] but this edition has not come down to us (there are a few traces of it in the *Kitāb al-Aghānī*); another story speaks of the collection made by the philologist al-Mubarrad. The only known European manuscript (Leyden)

on which de Goeje's edition is based, contains only a portion of his poems (including a few epigrams; see Barbier de Meynard, *op. cit.*, p. 17 sq.); it represents an unknown edition and is of little importance for the criticism of the text.

Bibliography: *Diwan Poetas Abu-l-Walid Moïssa ibn-l-Walid al-Ahmedi cognominus Cario-gharibî*, ed. de Goeje, Leyden 1875 (unfortunately without an index of rhymes); the Cairo edition of 1325 (Maḥabāt Madrasat Wāḍi-dāt 'Abbās al-Awwal, 8°, p. 97) although called *al-Taḍ'a al-ālā*, repeats de Goeje's text in an alphabetical arrangement; the Bombay lithograph of 1303 (1886) is not accessible to me (see Rescher, *op. cit.*; it claims to give a better text than the Leyden edition; see Sarkis, *op. cit.*). Most of the sources are given by de Goeje in his edition (p. 228—310); the most important is of course the *Kitāb al-Aghānī* (p. 228—271). Of others we may note: Ibn Kutaiba, *Kitāb al-Sū'ar*, ed. de Goeje, p. 528—535, *passim* (s. index); Ibn al-Maṭar, *Tabaḥāt al-Sha'ar al-muḥadḥin* (MS. Escorial, N^o. 279), fol. 15^v—15^v; al-Marzubān, *al-Muwaḥḥid*, Cairo 1343 (*al-Maḥabāt al-sha'fiyya*), s. index. — Modern literature: Th. Nöldeke, review of de Goeje's edition, in *G. G. MUSNAD. [See HADITH, IV.]

AL-MUSTADĪ BI-AMR 'ILĀH, ABŪ MUHAMMAD AL-HAKAM, 'Abbāsid caliph, born on 23rd Sha'bān 536 (March 23, 1142), son of al-Mustandjīd and an Armenian slave named Ghāḍi. After his father's death on 9th Rabi' II 566 (Dec. 20, 1170) al-Mustadī succeeded him and at the beginning of the following year was formally recognised as caliph in Egypt also, which passed into the hands of the Ayyūbids at this time [see the article *ṬAYYIBS*, II. 96]. The assassins of al-Mustandjīd soon quarrelled among themselves. 'Aḍud al-Dīn [q. v.] whom al-Mustadī had been forced to make vizier was dismissed by 567 (1171—1172) at the instigation of the emir Kaīmaz. In 570 (May 1175) the latter was about to attack the treasurer Zāhir al-Dīn b. al-'Atīr, but the latter fled to the caliph whereupon Kaīmaz began to besiege the palace of the latter. Al-Mustadī appealed to the people to help him; the house of Kaīmaz was pillaged and he himself fled but died soon afterwards and 'Aḍud al-Dīn again became vizier. Al-Mustandjīd already had quarrelled with Shīrāz, lord of Khirāsān. In 569 (1173—1174) a war broke out between the latter's nephew Ibn Shānkā and al-Mustadī; Ibn Shānkā was soon taken prisoner and put to death. The insignificant al-Mustadī died on the 2nd Dhū l-Ka'da or, ac-

ording to another statement, at the end of Shawwāl 575 (end of March 1180).

Bibliography: Ibn al-Athīr, ed. Tornberg, xi, 237 sq.; Ibn al-Tikṭāk, *al-Fakhri*, ed. Derenbourg, p. 428—433; Muḥammad b. Chalifen*, III, 337—363; Houtsma, *Recueil de textes relatifs à l'histoire des Seldjoukides*, II, 304; La Strange, *Baghdad during the Abbāsid Caliphate*, p. 87, 195, 260, 280. (K. V. ZETTERSTEN)

MUSTADJĀB-KHĀN BAHĀDUR (NAWĀB), thirteenth son of the celebrated Rohilla leader Hāfiḥ al-Mulk Hāfiḥ Rahmat-Khān (1707—1774) and author of a biography of his father, which he wrote in Persian under the title *Gulistan-i Rahmat*. Hāfiḥ Rahmat-Khān, who was an Afghān of the tribe of Yūsuf-zāi by descent, had been since 1748 a chief in Rohilkhand (Kātehr) and throughout his life waged a bitter warfare with the Mahrattās. He fell in 1774 in a fight at Muzāpur Kātra where he was fighting against the combined forces of the Nawāb of Oudh Shujā' al-Mulk and the English. Warren Hastings' act in supporting the Nawāb with English troops became the subject of a judicial investigation. Mustadjāb Khān's book describes Hāfiḥ Rahmat Khān as a fine representative of Afghān chivalry and contains much of value for studying the relations between the individual Afghān tribes.

Bibliography: I do not know of any edition of the original text of the *Gulistan-i Rahmat*. There is an abbreviated English translation by Ch. Elliott, *The Life of Hafiz Rahmat Khan, written by his son the Nawab Mustajab Khan Bahadur and the Nawab Gulistan-i Rahmat*, London 1831; H. Hamilton, *The East-India Gazetteer* 2, London 1828, II, 468; *Imperial Gazetteer of India*, London 1908, xx, 138 and xxi, 307 sq. (E. BENTHELE)

MUSTAFA I, the fifteenth Ottoman Sultan, was born in the year 1000 (1591) as son of Muḥammad III. He owed his life to the relaxation of the *ḥukm* authorising the killing of all the brothers of a new sultan, and was called to succeed his brother Aḥmad I at the latter's death on November 22, 1617. But his weakmindedness — which is said to have him made escape death on account of superstitious fear of Aḥmad — made him absolutely incapable of ruling. Aḥmad's son 'Othmān, who felt himself entitled to the succession, had little difficulty in procuring Mustafa's deposition in a meeting of the Imperial *Dīwān*, by the *ḫisr ağa*, the *muffi* and the *ḥā'im-maḥmūd*, the grand-vizier Khallī Pasha [q. v.] being absent. This happened on February 26, 1618.

Unexpectedly Mustafa I was again called to the throne when, on May 19, 1622, the rebellion of the Janissaries broke out against 'Othmān II. He was taken by force from his seclusion in the harem and the Janissaries forced the 'ulama' to acknowledge him as sultan. The next day 'Othmān was killed and until June the grand-vizier Dāwūd Pasha, the man responsible for the murder, remained in power. Then he was deposed by the *trullide*. The real masters were the Janissaries and Sipahī's; several grand-viziers were nominated and deposed again at their pleasure. The Sipahī

party began, after some time, to exact vengeance for 'Othmān and in January 1623, when Gurdji Muhammad Pasha [q. v.] was grand-vizier, Dāwid Pasha was killed. Soon the janissary party came again to influence under the grand-vizier Mere Husain Pasha (Feb. 3). The latter succeeded in maintaining himself until August 20; then the general feeling amongst the 'ulama' and the people, combined with the steadily growing opposition in the provinces against the tyranny of the military to the capital, as manifested by the action of Sali al-Din Oghlu in Tripolis and still more by the revolt of Abaza Pasha [q. v.] in Erzerum, brought about Mere Husain's deposition. The new grand-vizier, Kemānkeş 'Alī Pasha, together with the *mufti*, deposed the sultan on Sept. 10, 1623 and called Ahmad's son Murād to the throne.

During all his reign Mustafā had continued to give signs of his complete mental aberration; he died in 1638 and was buried in the Aya Sofia. The only important international act that took place during his reign was the peace concluded with Poland in February 1623.

Bibliography: The Turkish sources for this period are the historical works of Na'imā, Hādji Kāhā (Fāhā), Pecevi, Hasan Bey Zade and Tūht. Contemporaneous reports in the Memoirs of the English envoy Sir Thomas Roe. Further the general historical works of von Hammer, Zinkeisen and Jorga.

(J. H. KRAMERS)

MUSTAFA II, the twenty-second Ottoman sultan, was a son of Muhammad IV. Born in 1604, he succeeded to his uncle Ahmad II. on February 6, 1695, at a time when the empire was at war with Austria, Poland, Russia and Venice. The new sultan in a remarkable *khass-i shari* proclaimed a Holy War and carried out, against the decision of the *Divan*, his desire to take part in the campaign against Austria. Before his departure a mutiny of the janissaries had cost the grand vizier Desterliar 'Alī Pasha his life (April 24, 1693) and the campaign was led by the new grand vizier Elmās Muhammad Pasha [q. v.]. The Turkish army operated not without success in the region of Temesvár, taking Lippa, Lugos and Sebes. The Venetians had been beaten in February near Chios and were beaten again in September. In October Azof was delivered from the Russian siege. Next year the sultan and his army were again successful in raising the siege of Temesvár, but no part of the lost territory could be recovered from the Austrians. That year, however, the Russians took Azof. The campaign of 1696 is memorable for the heavy defeat inflicted on the Turks near Zenta on the Theiss (Sept. 11), where Elmās Muhammad lost his life, while the sultan, who had already crossed the river, had to fly to Temesvár. The imperial seal fell into the hands of the Austrians. From Temesvár Mustafā nominated 'Amūdja Zade Husain [q. v.], of the Kōprülü family, his grand vizier. Under this very able statesman peace was at last concluded. In 1698 the grand vizier went to the frontier, while the sultan stayed at Adrianople, but the peace negotiations were pursued more earnestly than the war. In October of that year began the peace negotiations at Karlowitz (Turk. Karlofta, see CARLOWITZ) on the Danube, where on February 26, 1699 peace was concluded with Austria, Poland and Venice. With Russia only

an armistice was concluded to be followed in 1700 by a definite peace. The English and Dutch ministers took part in the negotiations as intermediaries. The peace treaty meant the loss of Hungary and Transylvania, with the exception of the district of Temesvár; Poland recovered Kamieniec, while Venice had to cede Lepanto and some other towns in Morea. With Russia the Dniestr became the frontier.

The peace enabled the grand vizier to bring order into the affairs of state, which had suffered by the long and disastrous war. The Re'is Efendi Rāmi and the *mufti* Feizullah, who had great influence with the sultan, were his collaborators. Some interior troubles were easily appeased; only in 1701 a campaign in 'Ilişk was needed to take Bagra from the hands of a local party that had submitted to Persia. Fortresses were put in a better state of defence and a new *Asiān-nāme* was issued for the fleet. Husain Pasha resigned his office in Sept. 1702 and died soon afterwards. His deposition was partly the work of the *mufti* Feizullah, who made the sultan appoint in his place Daltaban Muhammad Pasha. When the latter showed himself of too warlike a disposition and caused at the same time unrest in the capital by favouring the claims of the Tatar Khan, the influence of the *mufti* caused his deposition and execution (Jan. 1703). Rāmi [q. v.] became grand-vizier. Rāmi's measures to enforce the authority of the central government were salutary but made him many enemies; moreover the janissaries were not contented with a grand-vizier who was not a military man. The general unrest was increased by the permanent residence of sultan Mustafā in Adrianople. All these circumstances brought about in July 1703 a janissary revolt in Constantinople, directed at first against Rāmi Pasha and against the *mufti*. The latter's deposition was obtained without much difficulty, but the rebellion continued under the leadership and organisation of a certain Hasan Agha. A deputation of the rebels to Adrianople was imprisoned and treated in an insolent way. Too late the sultan promised to come himself to Constantinople; the 'ulama' were constrained to give a *fetvā* authorising the sultan's deposition. In August 1703 a rebel army went on its way to Adrianople, after having agreed on Mustafā's brother Ahmad as successor to the throne. When Mustafā saw himself at last abandoned by his own janissaries he resigned on August 21. He died soon afterwards on Dec. 31, 1703 and was buried in the Aya Sofia. He is rightly considered as a wise and good ruler, as is proved by his careful choice of able statesmen. He wrote poems under the *takhallus* of Meftān and Ikbalī. Under him the imperial *tughra* appeared for the first time on the Ottoman coins.

Bibliography: The chief source is the *Tarīkh* of Rashīd, besides an anonymous historical work, used by von Hammer and only mentioned in a note by Babinger, *G. O. W.*, p. 247 and 248. Useful information also in the history of the Crimea by Mehmed Girāy (*G. O. W.*, p. 235) and Saiyid Mehmed Ridā (*G. O. W.*, p. 281). The *Inshā* of the grand-vizier Rāmi Pasha (not mentioned in *G. O. W.*) has importance as containing contemporary documents. Further the general histories of von Hammer, Zinkeisen and Jorga.

(J. H. KRAMERS)

MUSTAFA III, the twenty-sixth ruler of the Ottoman Empire, was one of the younger sons of Ahmad III and was born on Safar 14, 1129 = January 28, 1717 (*Sicâ-i Âlemiyye*, I, 80). When he succeeded to the throne, after 'Othman III's death on October 30, 1757, his much more popular brother and heir to the throne, Muhammad, had recently died, in December 1756. Turkey enjoyed at that time, since the peace of Belgrad of 1739, a period of peace with her neighbours. Since December 1756 the very able Râghib Pasha [q. v.] was grand vizier and remained the real administrator of the empire until his death in 1763. Râghib had removed from the capital all those who might have counteracted his influence, taking at the same time wise financial measures and endeavouring to keep the military forces in good condition. The sultan meanwhile, who was of a vivid and active temperament, busied himself, like his predecessor, with regulations concerning the clothes of his non-Muslim subjects and the appearance in public of Muhammadan women; at this time there was also taken up again the never realized plan of linking the gulf of Izniç with the Black Sea (see SABANDIA). The Seven Years' War in Europe (1756—1763) had not remained without influence on the policy of the Porte; after long hesitation Turkey agreed at last to conclude a treaty of friendship with Prussia (March 29, 1761). Râghib himself was inclined to conclude even an alliance, but the sultan and the influential 'ulamâ were peacefully minded.

After Râghib's death Mustafa began to reign himself and different grand viziers succeeded one another at short intervals. From 1765 to 1768 the grand vizierate was held by Muhsin Zâde Muhammad Pasha, under whom the disastrous war with Russia broke out. Difficulties with Russia had already commenced in 1762, when Russia had supported the ruler of Georgia against the Turkish Pasha of Akhişkha (Caldır); here, as well as in Montenegro, Russian emissaries worked in secret against the Turkish rule. Moreover the Khân of the Crimea repeatedly complained about Russian military measures on his northern frontier, while the party of the Confederates in Poland urgently appealed for the intervention of the Porte against the aggression of Catherine's government on Polish liberty. In these circumstances the Porte had no more interest in seeking the alliance of Prussia, where, in 1764, Ahmad Rasmi Efendi had gone as envoy, of which embassy he afterwards wrote his well-known *Sefâret-nâme*. The sultan himself was decidedly anti-Russian, but the diplomacy of the Russian minister Obreskoff and the pacifism of the 'ulamâ delayed the war, until, in August 1768, Mustafa obtained from the then *mufîs* Wâh al-Dîn a *fatwâ* authorizing the war with Russia. War was declared only on October 6, after the dismissal of the grand vizier Muhsin Zâde, who had advised delay until the spring. Obreskoff was imprisoned in Yedi Kule.

The war began in January with destructive raids of the Crimean Tatars in southern Russia under their newly appointed Khân Kırım Girây; at that time de Tott was an eye-witness with the Tatar army. In March 1769 the then grand-vizier Muhammad Emin Pasha left Constantinople with the Holy Banner; on this occasion there was an outburst of Muhammadan fanaticism against the Austrian Intendant and his party, who had come

to witness the procession. While the grand vizier went to the Dobruča, the Russians made an attack on Chotin (Turk. Khotin), which they were able to take only in August. In the meantime the grand-vizier had been deposed and executed; his place was taken by Moldowabdjî 'Ali Pasha, who had encounters with the Russians on both sides of the Dniestr. Other Russian armies took Jassy and Buczarest and advanced into Transcaucasia. The year 1770 was still more disastrous for Turkey. The Russians reached, through Rumania, the Danube and in the autumn they took Kilia, Bender and Braila, in the immediate neighbourhood of the Turkish general headquarters in Baba Daght. In the same year a Russian fleet appeared in the Mediterranean; several towns in Morea were conquered and evacuated again, but the heaviest blow was the burning of the Turkish fleet in the bay of Çeshme (July 1770). Moldowabdjî 'Ali — already dispossessed of his grand vizierate — was sent to strengthen, with de Tott, the defences of the Dardanelles. But the Russian fleet had ceased to be a danger and the Danube campaign of the following spring also was rather favourable for the Turks. In the beginning of 1771 the military organisation had been improved. That year, however, the Russians forced the isthmus of Perekop and conquered the entire Crimea. This was a definite loss for Turkey, and a great majority of the Tatars declared their allegiance to the Russian empress. The Turks were able, however, to remain in Olakow and Kilburna. In Constantinople meanwhile laborious diplomatic negotiations went on with the envoys of the European powers who offered to mediate, notably Austria and Prussia. With Austria the Porte concluded in July 1771 a secret "treaty of subsidy" for diplomatic services, while the Porte disinterested herself completely in Polish affairs, going so far as to propose a partition of Poland. The result was an armistice, concluded in June 1772 at Giurgewo, followed by the peace congress of Połani (August 1772), where Turkey's chief representative was the arrogant *nişancı* 'Othman Efendi. After the failure of the negotiations the armistice was prolonged and a new conference began at Buczarest in November. These negotiations were again broken off in March 1773, mainly from lack of agreement on the subject of the Turkish fortresses on the Black Sea; as to the Crimea, Turkey had already agreed to a formula such as was later adopted in the peace of Kütük Kalınardjî. In Constantinople it was chiefly the 'ulamâ who had opposed the Russian peace conditions. The war in 1773 was not very eventful; the general headquarters had been transferred to Shumna after Muhsin Zâde had become grand vizier a second time (Dec. 1771). The Russians won a victory at Karsu in the Dobruča, but attacked Silistra and Warna in vain. Bairût was bombarded by Russian ships in connection with the rebellion of the Mamlûk 'Ali Bey [q. v.] in Egypt, who was supported by them. In the summer of 1773 sultan Mustafa made known his desire to accompany the army against the Russians, but he was prevented from doing so by his *ostourage* and by his illness, to which he succumbed on December 24, 1773, to be succeeded by his brother 'Abd al-Hamid I. Mustafa was buried in his own *türbe*, connected with the Lâleli Djâmi'i, which he had begun to build in 1759 (*Hadîkat al-Djâmi'î*, I, 83).

Mustafa III is praised in the Turkish sources as a good ruler. He had a special liking for religious disputations in his presence and was particularly interested in astrological calculations. He took an interest in the least important affairs and this prevented him from such a real statesmanlike insight as was much wanted in the later years of his reign. In his way he was an "enlightened despot". But even a more able ruler would probably have failed to save Turkey from her military inferiority against the Russian armies; measures of military organisation were taken with the aid of de Tott, but this could not prevent the desertion of the troops from assuming disastrous dimensions during certain episodes of the war. Besides the *Laleli Dîmî*, Mustafa built the *Ayazma Dîmî* at Scutari for his mother; he caused a new suburb of Stambul to be built outside the *Yeni Kapu*. His reign is further marked by the extremely severe earthquake that laid large parts of the capital in ruins in 1766.

Bibliography: *The Tarih of Wâsil* (q.v.) is the chief historical source for Mustafa's reign; Wâsil himself played a prominent part as secretary during the long-drawn-out peace negotiations with Russia. It is completed by the *Tarih of Evverî*. The *Wakâ'î-nâmê of Diyârî*, son of Hâkîm Oğlu 'Ali Pasha, seems not to be preserved (*G. O. W.*, p. 300). The well-known Ahmad Rasmi Efendi wrote a history of the war with Russia under the title *Khutâat al-'irâk* (*G. O. W.*, p. 310). The *Talâhât* of the learned grand vizier Râghîb Pasha (*G. O. W.*, p. 288) give documents from the beginning of Mustafa's reign. A contemporary western source is the *Mémoires sur les Turcs et les Tartares* of Baron Fr. de Tott, Maastricht 1785. Further the historical works of von Hammer, Zinkeisen and Jorga.

(J. H. KRAMERS)

MUSTAFA IV, twenty-ninth sultan of the Ottoman Empire, was a son of 'Abd al-Hamid I and was born on Sha'bân 26, 1193 = Sept. 19, 1778 (Mehmed Thüreya, *Siddik-i 'otmânî*, i. 81). When the anti-reform party, headed by the *hâ'im-ma'âm* Müst Pasha and the *mufî*, and supported by the Janissaries and the auxiliary troops of the Yamaqs had dethroned Selim III (q.v.) on May 29, 1807, Mustafa was proclaimed sultan. Immediately afterwards, the unpopular *nişân-i 'âdîd* corps was dissolved and Kâhâk'dî Oğlu, the leader of the Yamaqs, was made commander of the Bosphorus fortresses. Turkey was at that time at war with Russia and England, but peace negotiations had already begun and, moreover, the foreign affairs of the empire were really governed by general European politics. A secret article annexed to the peace treaty of Tilsit (July 7, 1807) had in view — already at that time — a conditional partition of Turkey. Turkey's ally, France, tried to urge a peace with Russia and obtained a Russo-Turkish armistice at Siobozia (near Gîngewo), by the terms of which the Danube principalities were to be evacuated. When in the end Russia was unwilling to put into effect the terms of the armistice, relations with France became strained (departure of Sebastiani in April 1808) and new preparations for war followed, while overtures were made to England; the English admiral Codrington had already entered into negotiations with 'Ali Pasha of Yanina.

Meanwhile the *hâ'im-ma'âm* and the *mufî* were

the real rulers in Constantinople; the grand vizier Celebi Mustafa Pasha remained with the army in Adrianople and had no influence. The Janissaries and Yamaqs, however, continued to be rebellious; measures had to be taken against them and the sultan himself went so far as to favour secret plans for restoring the *nişân-i 'âdîd* under another name. In December 1807 Müst Pasha was dismissed from the office of *hâ'im-ma'âm* — on account of dissension with the *mufî* — and was succeeded by Tayyar Pasha. The latter, dismissed in his turn, fled to Bairakdâr Mustafa Pasha (q.v.), an acknowledged friend of the reform party, in Ruscuk. From here began the action against the régime in the capital. Bairakdâr went first to Adrianople and joined forces with the grand vizier in June 1808. They arrived in July before the gates of Constantinople at Dâvûd Pasha. Sultan Mustafa came there on July 23 to accept their terms, which for the moment were only the destruction of the ruling party and of the Yamaqs. On July 28 Bairakdâr, after having seized the sultan's seal from the grand vizier, began to act on his own account. He went with his troops to the palace, where the sultan — who had left shortly before for an excursion — returned in haste. He had only the time to order the execution of Selim III but was deposed immediately afterwards by the intruders, who put his younger brother Mahmûd on the throne. After having passed some months in confinement, he was killed by order of the new sultan on November 16, in the days of the general revolt against Bairakdâr's régime, when the existence of the former sultan had become a real danger for Mahmûd's position. Mustafa was buried in the *türbe* of his father 'Abd al-Hamid I, near the *Yeni Dîmî*.

Bibliography: Djewdet Pasha, *Tarih*, 2nd ed., viii. (Stambul 1303), p. 145-147; 'Âşim, *Tarih*, ii. (where large use has been made of Sa'id Efendi's *Tarih*; cf. F. Babinger, *G. O. W.*, p. 338); A. de Juchereau de St. Denis, *Révolutions de Constantinople de 1807 et 1808*, new ed., Paris 1825; Zinkeisen, *Geschichte des Osmanischen Reiches*, vii.

(J. H. KRAMERS)

MUSTAFA, name of several princes belonging to the Ottoman dynasty:

1. Mustafa Celebi, eldest son of Bayazid I; the date of his birth is not recorded. He disappeared in the battle of Angora (July 1402). This Mustafa is the first Ottoman prince to bear this name, which, like such other names as İsyazid and Murad, originated in mystical circles in Asia Minor in the sixth century. According to the Byzantine sources, this Mustafa is the same as the person called by the majority of the Turkish sources:

Döşme Mustafa, who came forward in 1419 as pretender to the Ottoman throne against Muhammad I. He was supported by Mirce of Wallachia and by the İmir Oğlu Dînaid (q.v.). Near Selânik they were beaten by Muhammad and Mustafa took refuge in the town together with Dînaid; the Byzantine commander refused to give them up to the sultan and sent them to Constantinople. In a treaty concluded with the emperor Manuel, the sultan promised to pay a yearly subsidy to provide for the maintenance of the prisoners, while the emperor undertook to keep them in custody. This treaty was observed until Muhammad's

death; Mustafa was relegated to a monastery on the island of Lemnos. After Muhammad's death, however, he was released and the emperor supported him against Murad II [q.v.]. In a short time he was master of the Ottoman territories in Europe; the army sent against him under Bayazid Pasha went over to his side at Sarız Dere between Serres and Adrianople. He was joined likewise by great feudal lords like the sons of Ewrenos. He soon felt strong enough to break his alliance with the Greeks and expelled them from the recently taken Gallipoli. After having resided some time in Adrianople, he went together with Djanaid to Asia Minor, where they met Murad's army in a battle near the bridge of Uludağ. By the treacherous retreat of Djanaid, Mustafa was beaten and fled to Gallipoli and Adrianople; from here he tried to reach Wallachia, but was taken by Murad's troops and executed at Adrianople. All this happened in the first year of Murad II's reign (1421—1422).

Bibliography: Ducas and Chalcondylas relate the events before Muhammad's death; so does the chronicle of Neshri, but the other early Turkish chronicles know only of what happened in the beginning of Murad's reign. On coins struck by Mustafa: *T. O. E. M.*, xv, 387; von Hammer, *G. O. R.*, i.; Mehmed Zeki, *Mahtûl Şekâideler*, Constantinople 1332, p. 45 199.

2. Mustafa, son of Muhammad I and younger brother of Murad II, was supported as pretender against the latter in 1423, while Murad besieged Constantinople. This Mustafa was about 13 years of age; he had fled to the Karman Oghla with his *tafa* İlyas. From here they took İznik and marched against Bursa. Mustafa even went for some time to Constantinople, but Murad, raising the siege, returned to Bursa, where Mustafa was delivered to him by the treachery of İlyas; he was executed by the sultan's orders.

Bibliography: The Byzantine writers Ducas and Chalcondylas; the old Turkish chronicles and after them the later historians; von Hammer, *G. O. R.*, i.; Mehmed Zeki, *Mahtûl Şekâideler*, p. 53 197.

3. Mustafa, son of Sulaimân the Magnificent, was born in 921 (1515) (Mehmed Thürciyâ, *Sifillat-ı Şahânî*, i, 79). He had been made, in 1533, governor of Sarukhân in Magnesia; later he became governor of Konya, while Sulaimân's favourite son Muhammad was given Sarukhân. When Muhammad died in 1545, Sarukhân was given to Mustafa's younger half-brother Selim and he himself was placed in Amasia. This setting aside of the elder, more talented and more brilliant son was the work of Khurram Sulân (Roxelane), mother of Selim, and of her son-in-law, the grand vizier Rustam Pasha. Already some years before there had been signs of Sulân Sulaimân's lack of confidence in Mustafa's loyalty. When, in 1553, a new campaign had been planned against Persia, of which Rustam was to be the commander, Sulaimân decided at the last moment to accompany the army himself, being warned again against Mustafa through the intermediary of Selim's favourite Shamsi Agha. Selim joined him on the way and, when at Eregh near Konya, prince Mustafa came to pay homage to his father, he was killed by order of Sulaimân on October 6, 1553. His corpse was conveyed to Bursa and buried in the *şâde* of Murad II. This execution of an Ottoman prince is one of those events that made the deepest impression in the

empire. It caused immediately the threatening of a Janissary revolt, which could only be appeased by the dismissal of the grand vizier Rustam Pasha. It is said that his brother Dîhangir died soon after him of grief; a minor son of his was killed in Bursa shortly after his execution. Mustafa had also made himself beloved as a patron of poets and scholars, amongst whom Surlî is to be mentioned in the first place. Several poets lamented his death in elegies, in which Rustam and others were openly accused of having caused the murder; best known is the *merthiye* of the poet Yahyâ Bey. Mustafa wrote poetry under the *tasallu* Mukhlîs. There is further strong evidence for the probability that Mustafa wrote a history of his father's reign, a *Sulaimân-nâme*, under the pseudonym Ferid (cf. *G. O. W.*, p. 83).

Bibliography: The historical works of 'Âlî, Solak Zâde and Peçewî. The tragic death of the prince is also treated with more or less veracity in contemporary sources, as the *Letters* of Busbecq. W.*, p. 398); Ahmad Rafîk, *Kadîmler Sultanat*, i, Constantinople 1914; Mehmed Zeki, *Mahtûl Şekâideler*, Constantinople 1336, p. 223 199. (J. H. KRAMERS).

MUSTAFA KÂMİL PASHA, leader of the second nationalist movement in Egypt (on the first, see the articles 'ARÂM PASHA and ENKIHV).

The son of an Egyptian engineer, he was born in Cairo on 1st Raddjâb 1291 (Aug. 14, 1874), studied at the Khedivial school of law there and after taking his examination went to study in Toulouse where in 1894 he took his "licence en droit". When still a student of 18 he began his political activity and entered into personal relations with the Khedive 'Abbâs II [q.v.]. On his return from France he founded in 1894 the second Egyptian nationalist party (*al-Hizb al-wahtanî*) with the object of inducing England by appeals to justice to abandon the occupation and restore the complete independence of Egypt. Later he also aimed at getting the Sûlân handed back to Egypt and tried to prepare the Egyptians by modern education for parliamentary government. As the representative of his party he spent each year a considerable time in Europe, especially France where he consorted with politicians and journalists and conducted a vigorous propaganda for his object. All his life he was very friendly with the journalist Juliette Adam; he had dealings with Rochefort, Drumont, Col. Marchand, Pierre Loti and in 1896 had a correspondence with Gladstone. Later he visited Constantinople where he was highly thought of because he insisted on the Sûlân's suzerainty over Egypt; Sûlân 'Abd al-Hamid II [q.v.] gave him in 1904 the title of Pasha. In Cairo he founded in 1898 a school for training the youth in nationalist ideas, and in 1899 started the newspaper *al-Liwâ* (The Banner), which appeared early in 1900, had a great success and from 1907 appeared also in English and French editions. From 1902 he published the nationalist quarterly *Mahtallat al-Liwâ*. In his speeches and articles he emphasised his aims with fiery eloquence; at the same time he expressed his approval of the building of the Turkish strategic Hijâz railway and his sympathy with the Japanese

in their war with Russia (1904—1905). Muştafâ Kâmil also regularly emphasised the privileged position of Muslims as belonging to the state religion and recognised the sultan as caliph and head of Islam and thus contributed to the pan-Islamic movement which began early in the twentieth century.

The "Entente Cordiale" concluded on April 8, 1904 between England and France was a severe blow to him and the nationalist party; by it France, in return for a free hand in Morocco, dropped its objections to the English occupation of Egypt. The Egyptian nationalists thus lost all hope of open or secret support from the French government and were thrown upon their own resources. This situation caused Muştafâ Kâmil to redouble his energy and in vigorous speeches and writings against France and England, in travelling and negotiating with statesmen of different lands, he endeavoured to make Egypt's point of view clear. As a result of the intensity of his agitation there was a breach between him and the Khedive 'Abdûs II (Oct. 1904); on the other hand, his following in Egypt rapidly increased and began to be troublesome to Lord Cromer who had so far treated the new nationalism created by Muştafâ Kâmil as a "quantité négligeable". The Dimhawî (a village near Tanja in the Delta) affair gave the nationalists a great stimulus; on June 13, 1906, some English officers on shooting were said to have wounded an Egyptian woman and were attacked by fellâhin with clubs and one of the officers was killed. A special court set up by the English government sentenced four fellâhin to death and 17 to prison or flogging and the sentence was carried out next day. The indignation in Egypt and Europe rose to great heights and even in the House of Commons the authorities were criticised. Muştafâ Kâmil hurried to London and discussed the matter with the Prime Minister, Sir Henry Campbell-Bannerman, whom he endeavoured to convince of the necessity of recalling Lord Cromer and giving greater freedom to Egyptians. On this occasion he mentioned as suitable representatives in a parliamentary system of government all those Egyptians who in the later political movement after the war played important parts. On his return to Egypt, through the press and mass meetings in which he urged Egyptians to unite against England, he gave a great stimulus to the nationalist movement and soon had the satisfaction of seeing Lord Cromer recalled — although he was not at all the only cause of this — and replaced by Sir Eldon Gorst. The latter adopted a milder tone with the Egyptians, was on good terms with the Khedive and endeavoured to support him with a newly founded party. Muştafâ Pasha attacked this representative of England vigorously also, in Oct. 1907 put his national party on a broader basis and summoned it to a "national congress", which met on Dec. 7 of the same year in Cairo; 1,017 delegates from all over Egypt appeared and after a speech by Muştafâ Kâmil which carried them away the latter was elected life-President of the party. This was however his swan-song — he had been ill since the summer of 1906; he died on Feb. 10, 1908 (8th Muharram 1326) at the age of 34 of a slow internal trouble (intestinal tuberculosis). The rumour spread that he had been poisoned at English instigation. His funeral was an impressive expression of the national grief.

Muştafâ's creations did not long survive him and his party, which produced no leader to equal him and was broken up by dissensions, gradually sank into insignificance. Although he obtained no positive results by his agitation, he prepared the way for the third and greatest nationalist movement (under Sa'd Zaghlûl Pasha from Nov. 13, 1918). It is to his credit that he conducted his whole campaign without any appeal to force, which would have been quite useless against the British Empire, and without bloodshed.

Of his numerous writings only the more important can be mentioned; many of them were only printed after his death, some in the great (never completed) biography by his brother 'Alî Bey Fahmî Kâmil: *al-Ma'ala 'l-shar'îya* (1898 and 1909); *Miqr wa 'l-Ihtilâl al-Ingilîzî* (collection of speeches and essays, Cairo 1313); *Diḡa' al-Miqr 'an Bilādihî*, Cairo 1324 (1906); *al-Shams al-mushriḡa* (Cairo 1904, on the Russo-Japanese war); *Lettres françaises-égyptiennes* (Cairo 1909; also in Arabic and English transl. His letters to Juliette Adam); *Égyptiens et Anglais*, Paris 1906 (speech of July 4, 1895 in Toulouse); *Le péril anglais*, Paris 1899; *What the National Party wants* (Cairo 1907, speech of Oct. 22, 1907).

AL-MUŞTAFÂ 'L-DÎN ALLÂH. [See NIZAR B. AL-MUŞTANIR.]

MUŞTAFÂ PASHA BAIRAKDÂR, Turkish grand vizier in 1808, was the son of a wealthy Janissary at Ruscuk, born about 1750. He distinguished himself in the war with Russia under Muştafâ III, and acquired in these years the surname of *bairakdâr*. After the war he lived on his estates near Ruscuk, and acquired the semi-official position of *a'yân* of Hesaḡḡrâd and later of Ruscuk. With other *a'yân* he took part in an action against the government at Adrianople, but became finally a reliable supporter of the govern-

ment. Having already received the honorary offices of *kaptan-ı bahri* and of *mîr asker*, he was, in 1806, promoted to the rank of Pasha of Silistria and at the same time was appointed *ar-râiser* on the Danube frontier against the advancing Russian army. This made him one of the most influential men in Rûm-ili. He had become a zealous supporter of Selim III's reform policy and, after that sultan's deposition, it was to him that the enemies of the new reactionary government turned. In June 1808 he was joined by the dismissed *âim-makâm* of the grand vizierate in Constantinople, Tayyar Pasha; from Rusuk they went to Adrianople, where they joined forces with the grand vizier Celebi Mustafa Pasha. So the entire Rumelian army marched against the capital, where they dictated their will to sultan Mustafa IV (July 23). On July 26 Baikadâr (or 'Alemdâr as he was called officially) was appointed commander in chief and on July 28, after having taken by force the sultan's seal from the weak grand vizier, he marched with his troops to the palace of the sultan, under the pretext of bringing back the holy standard of the prophet. At first he was allowed only to enter the first court of the serây, while sultan Mustafa — who had been absent — returned in haste from the seaside. As Baikadâr had made known his intention of restoring Selim III to the throne, Mustafa had just time to have his predecessor killed. But immediately afterwards he was himself deposed and Baikadâr now recognized Mahmûd II [q. v.] as sultan.

After this began the short personal regime of Baikadâr Mustafa Pasha as grand vizier. He had a number of the supporters of the former sultan executed, arranged a magnificent funeral for Selim III and began to form a corps of troops called this time *nişânîl 'asker*. At the same time he summoned a great imperial conference in the capital, to which all the high-placed officials of the empire were invited. Many of them answered the appeal and subscribed to the extensive programme of reforms which the grand vizier laid before them in a solemn meeting in the first days of October and which was also approved of by a *fatwâ* of the *mufî*. But the precipitation with which the new measures were taken in hand and the tactless procedure in the abolition of long established abuses, made him ever more unpopular. The influential '*ulama*' were also alienated by the exaggerated reforming zeal. His only support were his Rumelian troops and a small number of friends, such as Begdî Efendi and Râmîz Pasha, together with Kâdî Pasha of Karamân who had remained in the capital after the imperial conference. Matters came to a head on November 14, 1808, in the last days of Ramadân 1222, by a rebellion of the Janissaries. The night following that day they surrounded the grand vizier's residence and set the quarter on fire. Baikadâr, surprised by the fire, saw no way of escape; he hid himself in a tower of his palace, where his body was found three days afterwards, after the fire was quenched. The rumour had been spread that Baikadâr had escaped, which had caused much uncertainty.

The grand vizier was buried in the fortress of Yedi Kule, where his bones were dug up in 1911 during railway works; they were transported to the mosque of Zeinab Sultan.

(J. H. KRAMER)

MUSTAFA PASHA BUSHATLI, the last hereditary wasir of Scutari (hence often called *İşkodralı*), the son of the celebrated Kara Mahmûd Pasha Bushatli [q. v.], succeeded his uncle İbrâhîm Pasha about 1810 and received the rank of wasir in 1812. In 1820 the sandjak of Berat and in 1824 those of Ohrid and Elbasan were put under his government and he received the title of Ser'asker. Nevertheless like his father he aimed at greater independence and when Mahmûd II's reforms threatened to deprive him of his hereditary rights and privileges, he became strongly hostile to the Sultan and maintained friendly relations with the Serbian prince Miloš, the discontented Bosniaks (cf. i. p. 757) and the Egyptian Muhammad 'Alî (cf. J. Deny, *Sommaire des archives turques du Caire*, p. 264 and 553). He therefore maintained quite a passive attitude in the Russo-Turkish war (1828) and only towards the end of it, in May 1829, did he appear with his Albanians on the Danube (Vişin, Kabaovo), then went on to Sofia and Philippopolis, but without taking any active part in the fighting.

On the conclusion of peace the Porte (beg. of 1831) demanded of Mustafa Pasha that he should hand over the districts previously held by him (Dukakîn, Delvar, Elbasan, Ohrid and Trgoviste) to the grand vizier Reshid Mehmed Pasha (on him cf. *Sijill-i 'ethmânî*, ii. 391) and carry through certain reforms in Scutari itself. Mustafa Pasha resisted and with the financial and moral support of prince Miloš, led an army in the middle of March 1831 against the grand vizier. He was joined by the other Pashas of northern Albania and old Serbia who objected to reforms. The rebels had at first certain successes including the occupation of Sofia but they were completely routed at Pilep by the regular troops led by the grand vizier (beginning of May). Mustafa Pasha hurried back to Scutari via Skopje and Prizren and shut himself up in the fortress. When he surrendered on Nov. 10, 1831 after six months' siege, he was pardoned on Metternich's intercession and taken to Constantinople.

Fifteen years later he again held various governorships, chiefly in Anatolia (from 1846), then in the Herzegovina (1853) and lastly in Medina where he died on May 27, 1860.

Pavlović, *Pokret u Bosni i u Albaniji protiv reformama Mahmuda II*, Belgrad 1913, chap. viii. and ix.; Jorga, *Geschichte des Osmanischen Reiches*, v. 356 and 379 (brief). (FERİD BAKIRTAŞEVİÇ)

MUSTAFA PASHA KÖPRÜLÜ. [See KÖPRÜLÜ.]

MUSTAFA PASHA LALA, a famous military commander in the Ottoman history of the xviii century. The date of his birth is not given. He was a native of Şoğol, the

same Bosnian locality from which came the grand vizier Şokollı [q. v.], and began his service in the imperial seray. He rose in rank under the grand vizier Ahmed (1553—1555), but was not in favour with the latter's successor Rustam Paşa, who made him in 1556 *halî* to prince Selim with the object of ruining him. The outcome of this nomination was the contrary of what was expected; Muştafâ became the chief originator of the intrigues by which Selim came into conflict with his brother Bayazid and which ended with Bayazid's execution in Persia [cf. SELİM II]. After these events Rustam Paşa managed to relegate the intriguer in administrative functions to different parts of the empire; for eight years he was *valî* in Damascus. Nor was the grand vizier Şokollı favourably disposed to Muştafâ, but in the beginning of 1569 Sultan Selim II called back his former *halî* as *kubbe vezîri* in the capital. Very soon afterwards Şokollı appointed him *ser-asker* in the Yaman; Muştafâ went to Cairo to take charge of his command, but here he became involved in serious disputes with the *valî* Sinân Paşa on the equipment of his army. The end was that Sinân was appointed in Muştafâ's stead and the latter had to return to Constantinople. Sultan Selim's protection saved him from death and in the beginning of the following year he was appointed again *ser-asker* of the army destined for the conquest of the island of Cyprus. Lala Muştafâ Paşa led this memorable campaign with complete success; Nicosia was taken in July 1570, while Famagusta surrendered in August 1571. With the surrender of this town is connected the brutal and cruel execution of the Venetian commander Bragadino. After his return he became a serious candidate for the grand vizierate, should Şokollı disappear from the scene. His only rival was Sinân Paşa. When in 1577 the war with Persia broke out [cf. MUSAHD III] both were appointed *ser-asker*, but, on account of Sinân's arrogant character, the latter's appointment had to be withdrawn. In April Lala Muştafâ began his campaign in Georgia, fought the memorable victory of Căldir (August 1578) and took Tiflis besides a number of other towns. These military glories did not bring him to the ambition of his life. After Şokollı's assassination, Rustam's son-in-law Ahmed Paşa had been made grand vizier and, on the latter's death in May 1580, it was Sinân [q. v.] who got the sultan's seal. Lala Muştafâ died in October of the same year and was buried in the court of the mosque at Aylub. Apart from the unquestionably important events in which he played a prominent part, Lala Muştafâ Paşa has a particular importance in Ottoman historiography because the historian 'Alî [q. v.] had been attached to his person as scribe since the beginning of his career. Therefore his able, but intriguing and reckless character is known better than that of many other Turkish statesmen or generals. By his marriage with the grand-daughter of the last Mamlûk Sultan Kânûn Ghûri he was a very wealthy man, who, notwithstanding his reputed avarice, founded several mosques (as in Erzerûm) and many buildings of public utility in the different places where he resided as governor.

Bibliography: The chief Turkish source is, as has been said, 'Alî, not only in his *Künûh al-Ahşâr*, but also in a treatise entitled *Nâdirat al-Mahârib*, describing the war between Selim and Bayazid (MS. unknown; cf. Babinger, *G.O.* W., p. 132) and in his *Nuṣrat-nâme*, which

gives a description of the Georgian campaign. Other sources are the works of Pačewi and Solak Zâde. Western contemporary sources are the Diary of Gerlach, the Letters of Busbeck and, especially for the conquest of Cyprus, the Italian historical descriptions.

(J. H. KRAMER)

MUŞTAFĀ PAŞA RASHİD. [See RASHİD.]

MUSTAḤABB. [See SHARAF.]

MUSTA'IDD KHÂN, MUHAMMAD SAKT, born about 1601 (1650), was brought up as an adopted son by Muhammad Bakhtawar Khân, whom he faithfully assisted in various capacities. After the death of his patron he passed into the service of Awrangzeb. In the reign of Shâh 'Ālam Bahâdur Shâh I (1118—1124 = 1707—1712), he became the secretary of 'Inayat Allâh Khân, son of Mirzâ Shukr Allâh, the minister of Bahâdur Shâh, and by his desire Musta'idd Khân composed the history of the reign of Awrangzeb, entitled *Ma'athir-i 'Ālamgiri*. Part i. is a mere abridgement of Mirzâ Kāzīm's history of the first ten years of the emperor's reign; part ii. contains the history of the last forty years of 'Ālamgiri's reign (edited in the *Bibliotheca Indica*, Calcutta 1870—1871).

He died at the age of seventy-five at Dillî in 1136 (1723).

Bibliography: Khân Khân, *Muntahab al-Lubâb*, ii. 211; *Ma'athir-i 'Ālamgiri*, p. 255, 255, 407, 462; Ouseley, *Critical Essay*, p. 42; Rieu, *Cat. Br. Mus.*, p. 270; Eibl, *Ind. Offit. Cat.*, No. 365; and Elliot-Dawson, *History of India*, vii. 181.

(M. Hidayet Hosain)

AL-MUSTA'IN IBN 'ULĀH, ABU 'L-'ABRĀS AHMAD B. MUHAMMAD, an 'Abbāsid caliph. His father was a son of the caliph al-Mu'tasim, his mother a slave-girl named Mukharriq of Slav origin. After the death in Rabi' II 248 (June 862) of al-Mu'tasir the pretorians appointed his cousin Ahmad caliph under the name al-Musta'in. The choice aroused discontent in Sāmarrā and unrest broke out among those who supported al-Mu'tazz [q. v.] which was only put down after much bloodshed by the Turkish soldiers. When al-Musta'in was recognised as caliph he confirmed the governor of Baghdad, Muhammad b. 'Abd Allāh b. Tāhir [q. v.], in office. He bought all the property of al-Mu'tazz and his brother al-Mu'ayyad and then had them arrested. The Turks wanted to put them to death but they were protected by the vizier Ahmad b. al-Khashi who soon afterwards fell into disgrace and was banished to Crete. In 249 (863) trouble broke out as a result of a defeat of the army by the Byzantines; the rebels were however scattered by the vizier Utāmiḡ and the two Turkish generals Wasif and Bogha Junior. Utāmiḡ was soon afterwards murdered at the instigation of the latter. As the caliph no longer felt safe in Sāmarrā he went to Baghdad in Muharram 251 (Feb. 865). Al-Mu'tazz was then taken by his supporters out of his prison in Sāmarrā and a war broke out which ended in Dhū 'l-Hijja 252 (Jan. 866) in the abdication of al-Musta'in [cf. BAGHDAD]. By the arrangement made the latter was to live in Medina in future; but he was detained in Wasif and murdered in Shawwāl 252 (Oct. 866) at the age of 35. See also the article MUHAMMAD B. 'ABD ALLĀH B. TĀHIR.

Bibliography: Ibn Kutāiba, *Kiṣṣat al-Mu'arraf*, ed. Wüstenfeld, p. 200; Ya'qubī, ed. Houtsma, ii. 603—610; Tāharī, iii. 150 pp.;

to murder the heir-apparent when he entered his father's apartment. Al-Mustanjid however heard of the plot and had the instigator and her son arrested. A few years after his accession the Maryasids were expelled [q. v.]. The end of the Fātimids also fell within his reign although the 'Abbāsids were only officially recognised as caliphs of Egypt under his successor al-Mustaḍī. In 562 (1166–1167) Shmīla, lord of Khiristān, invaded the 'Irāq and demanded from the caliph the grant of a portion of the lower Euphrates territory as a fief. The caliph however sent an army against him. Shmīla's nephew, Kīlūf, was routed and Shmīla returned home. Al-Mustanjid died on 9th Rabi' II 566 (Dec. 20, 1170). When he was very ill, his physician arranged with his chamberlain Aḡad al-Dīn [q. v.] and the emir Kaṭb al-Dīn Kaīmar to give him a bath to hasten his end. The caliph refused to agree; he was nevertheless shut up in the bath until he died.

(K. V. ZETTERSTEN).

AL-MUSTANŠIR BI 'LLAH, ABU DĪ'FAR AL-MANŠŪR B. AL-ZĀHIR, 'Abbāsīd caliph; like his father whom he succeeded on the 14th Radsjab 623 (July 11, 1226), he is described as a just and devout man and was generally liked although he played no great part in politics. He acquired Irbil by a legacy in 630 (1232–1233) and eight years later his lands were increased by the acquisition of the town of 'Ana which he bought from its previous owner. About this time the Mongols began to threaten the lands of Islām. Čingis-Khān [q. v.] had died in Ramaḡān 624 (Aug. 1227) but his sons continued his campaigns of conquest. In 635 (1237–1238) the Mongols were defeated by the caliph's troops; the strongest defender of Islām however was Djalāl al-Dīn, Shāh of Khwārizm [q. v.]. Al-Mustanšir died on 20th Djumāda I or 10th Djumāda II 640 (Nov. 15 or Dec. 5, 1242). According to Ibn Khaldūn however, he did not die till the following year. The al-Mustanširiya university founded by him in Baghdād bears his name.

(K. V. ZETTERSTEN).

AL-MUSTANŠIR BI 'LLAH, ABU TAMīm MA'ADD B. 'ALĪ AL-ZĀHIR, eighth Fātimīd Caliph, born 16th Djumāda II, 420 (July 2, 1029) (according to Idrisi, on 16th Ramaḡān = Sept. 29), succeeded his father al-Zāhir [q. v.], 15th Shaḡbān 427 (June 13, 1036), and died 18th Dhu l-Hiḡḡa 487 (Jan. 10, 1094), after the longest recorded reign of any Muslim ruler and one which, besides being marked by the most violent fluctuations of fortune, was of critical importance in the history of the Fātimīd Imā'ili movement.

Internal history. During the childhood of

al-Mustanšir the authority remained at first in the strong hands of his father's waṣīr Abū 'l-Ḥāsim al-Jarḡarī. On his death (7th Ramaḡān 436 = March 28, 1045) it was seized by the evil genius of al-Mustanšir's reign, his mother, who was a Sūdān slave, and her former master, the Jewish merchant Abū Sa'd al-Tustarī. When Abū Sa'd was assassinated in 439 (1047), after an outbreak of rioting between the Turkish and Berber troops, his place as the queen-mother's agent was taken by his brother Abū Naṣr Ḥārūn (see however the documents published by Mann [ibid.]) and the kādī Abū Muḥammad al-Ḥasan al-Yazīrī, who eventually accepted also the waṣīrate (7th Muḡarram 442 = June 1, 1050) and held it for eight years (cf. AL-YAZIRI). Meanwhile there was considerable unrest and perhaps also economic unsettlement in the country. If a statement in al-Maḡristā (i. 82 [99]; ed. Wiet, ii. 4 [67]) is to be believed, the *sharaff* of the Egyptian provinces amounted only to one million dinars in the time of al-Yazīrī, but this may have been exceptional, though it is plain from other sources that the government had already been forced to the familiar expedient of confiscations and indemnities. The Delta was disturbed by Arab risings, the most serious of which, that of the Banū Qurra, was put down only with great difficulty by Naṣīr al-Dawla (see below) with the Tayi and other Arab troops at Kūm Sharīk in 443 (1051) (cf. Ibn al-Sārafi, p. 42 sq.; Ibn al-Athīr, ix. 396 sq. and for the date Ibn al-Kalānisi, p. 85). At the capital there was an increasing state of tension between the Turkish and Berber troops and the enormous bodies of Sūdān slaves raised by the Caliph's mother (cf. Maḡristā, i. 94 [ed. Wiet, ii. 45] and p. 335; detailed but probably unreliable figures also in Naṣīr-i Khusrāw, ed. Kāviani, p. 66). In striking contrast to this is the magnificence of the court and prosperity of Misr-Fustāt as described by Naṣīr-i Khusrāw [q. v.]. There can be little doubt that the source of much of this prosperity, apart from the manufacture and supply of luxuries to the court, is already to be sought in the commercial relations between Egypt and the Indian Ocean on the one hand (cf. Naṣīr-i Khusrāw's account of 'Aḡḡāb) and Constantinople on the other. The general insecurity deepened after the execution of al-Yazīrī, who was the last waṣīr to attempt to control the situation. He was followed by a rapid succession of puppets in office, many of whom, despite the pompous titles duly recorded by Ibn al-Sārafi, held the position for no more than a few days at a time.

The Fātimīd Caliphate was now destined to pass in a few shattering years through the same agony as the 'Abbāsīd Caliphate at Baghdād had suffered in the early part of the previous century. The breakdown of the civil administration and subsequent exhaustion of the treasury gave a free hand to the military, and the sinister policy of the Caliph's mother brought matters speedily to a head. In a pitched battle at Kūm al-Riḡḡ (close to Cairo) in 454 (1062) (sometimes confused with the previous battle at Kūm Sharīk) the Turkish and Berber troops led by Naṣīr al-Dawla Ibn Ḥamīdan, a descendant of the Ḥamdānids of Mūḡul, defeated and drove the Sūdāns into the Sa'īd, but the struggle continued for some years and the blacks were not finally routed and driven out until 459 (1067); thereafter they were confined to the Sa'īd.

(443) 7

Additions and Corrections

p. 701^a, l. 48. To be added: in an early period Turkish has also known the form *maḥar* (from Sanskrit *maḍra*, mong. *maḥar*, cf. W. Bang and A. von Gutsch. *Ferd. Turfan-Forsch.*, c. 31).

p. 701^b, l. 66. To be added: signature was something of a privilege. Of the surviving emperors of Istanbul two only possessed it: Ḥamīd, the son of a famous father of that name, and 'Ashīq. The personal seals in Latin characters, made up to this day (1933), are, with a few exceptions, barbarous.

The ethnographic museum at Ankara possesses a curious collection of metal seals presented from the sheikhs of the now dissolved *ḥalīs* of the *Beḥāshīs*.

p. 702^a. *Brassigraphy* of the art. *maḥar*. To be added: CG. Z. B., i. 28. rec. (aperture of a *maḥar*/a "Sogutmaḥar"). — On the "Second seal of the Prophet", cf. *P.O.E.M.*, ii. 372—377.

which suffered severely from their plundering and devastations. Nāṣir al-Dawla in turn quarrelled with the Turks, and, defeated in battle by a force commanded by al-Mustansir in person (461 = 1068-1069), appealed to the Saljuqid Alp-Arslan (q. v.). Without waiting for his help, however, he regained control of Cairo and the Delta with the aid of the Arabs and Lawāṭa Berbers, reduced al-Mustansir (it is said) to the state of a pensioner on a hundred dinars a month, assumed the title of Sulṭān al-Dawla, and attempted, but unsuccessfully, to restore the 'Abbasid *khilāfa*. In Rajab 465 (March 1073) he and all his house were killed by the rival Turkish faction, led by Iltigaz, under whom the Caliph fared little better. Meanwhile the constant anarchy and remorseless plundering of the country by the troops brought agriculture to a standstill (although the Nile floods seem to have been uniformly good). The result was a famine which lasted from 459 to 464 (1067-1072) and became progressively more severe. During these years the country was a prey to the utmost misery; the royal city and palaces were looted, and Faṣṭāṭ was twice plundered and even burned by Nāṣir al-Dawla. Large numbers of the population, including even the Caliph's own family, sought refuge in Syria and 'Irāq (for the depopulation and shrinkage of Faṣṭāṭ cf. Makrūṣ, I, 5; cf. Wiet, I, 12; on the fate of the royal library see also Noga Pinto, *Le Biblioteche degli Arabi*, Rome 1928, p. 25-26). The Sunni historians dwell on this famine with some complacency, regarding it as the retribution for the impious attack of al-Hamdanī on the 'Abbasid Caliphate (see below), and circumstantial stories are related of the extreme destitution to which al-Mustansir himself was reduced. That these must be accepted with some reserve is clear from such passages as Ibn Taghribardi, II/ii, 186, 18-19.

At length in 465 (1073) al-Mustansir, taking courage of despair, secretly invited the governor of Akka, the Armenian general Badr al-Djūmālī, to assume supreme control in Egypt. Badr accepted the commission, on condition of bringing his own troops with him, and sailing from Akka in the winter, reached Cairo on 28th Djuṣadā I, 466 (Jan. 29, 1074). His rapid and energetic movements took the Turks by surprise, and he put to death the whole body of their leaders, together with a large number of Egyptian notables and officials. For his further military and administrative measures, by which he restored order and relative prosperity in Egypt (the total revenue of Egypt and its remaining Syrian possessions, which in 466 had amounted to 2,800,000 dinars, rose by 483 to 3,100,000 dinars; Makrūṣ, I, 100; cf. Wiet, II, 68; cf. *Ann. Sult.*, fol. 71-99) see the article name al-Djūmālī. The alliance between general and caliph was cemented by the marriage of Badr's daughter to al-Mustansir's youngest son Abmad, the future Caliph al-Musta'li (q. v.). The Fatimid Caliphate was saved but, like its 'Abbasid rival, at the cost of abandoning its temporal authority to a series of military commanders, entitled *umara' al-djuyush*, from whose control it never afterwards succeeded in emancipating itself.

Al-Mustansir is described in contemporary sources as upright and amiable in character, and just and equitable in his dealings, but as a ruler his soundness is entirely obscured by the numerous

warres and generals who kept him virtually a prisoner. The statements of the later anti-Fatimid writers must, of course, be entirely discounted; the Fatimid sources, on the other hand, praise his sagacity and infallibility (*ṣiṣma*) as Imam.

External relations. The empire to which al-Mustansir succeeded was beyond any doubt the most powerful Muslim state of its time. It extended from Ifrikiya and Sicily to Mecca and Central Syria, and maintained an active propagandist organization in 'Irāq, Persia and Khurāsān (see the following section). Within a few years of his accession its territories were still further expanded by Anūshirvān's conquest of Aleppo in Shabān 429 (May 1038) [cf. the articles *FATIMIDS* and *HALAB*] and extension of his authority even across the Euphrates, on the one hand, and on the other by the conquests of 'Alī al-Salṭānī in the Yaman, after establishing himself at Maṣār in the same year (cf. *Ṣulṭ.*); also H. F. al-Hamdanī, in *Journal of the Royal Central-Asian Society*, 1931 p. 305-307, and in *J. R. A. S.*, 1932, p. 126-129. After the deaths of Anūshirvān and the wazīr al-Ljūdīkī, who in spite of their rivalry resolutely maintained the interests of the dynasty, the power and prestige of the Egyptian court steadily declined. The Arab tribes in Syria, though defeated in the field, remained unsubdued, and the Caliph had to be content with the little more than nominal allegiance of the Mirdāsids (q. v.) at Aleppo. At Damascus, the rivalries between the Berber and Turkish troops and the hostility of the citizens reduced the governors to impotence. The disturbed state of Syria was the more disastrous that it made it impossible for the Fatimid government to give effective support to the amir al-Baṣṣirī (q. v.; see the list of war material and subventions sent from Egypt; Ibn Taghribardi, p. 177) in his attempt to oppose the advancing Saljuqid power, with the result that his occupation of Baghdad and proclamation of al-Mustansir in 459 (1058-1059) was speedily brought to an end. The unseemly military and economic disorders in Egypt allowed a free hand to the Turkmen (*Ghuzz*) bands, who had appeared in Northern Syria as early as 447 (1055), though it was not until 463 (1071) that the first Saljuqid armies entered Northern Syria and the Ghuzz bands under Atis (q. v.) occupied Palestine and began to harass Damascus. In many of the other towns and districts of Syria the authority was seized by local chiefs, such as the *ḥallā* Ibn 'Ammār (q. v.; also G. Wiet, in *Min. Henri Barthe*, p. 279-280) at Tarsūs and Ibn Abī 'Akīl at Tyre, though both of these acknowledged the spiritual authority of the Fatimid Caliph (cf. also the account of the foundation of the castle of Sakhāb by Ḥasan b. Miamār al-Kalbi in 466 (1073-1074), quoted from Sibī b. al-Djwān in Ibn Taghribardi, p. 253). The menace of the Saljuqids became more substantial after the arrival of Tutuṣh (q. v.) in 470 (1077-1078), but the latter never actually organized a full campaign against the Fatimids. On the contrary, the offensive was taken by Badr, who succeeded in restoring Egyptian control on the coast as far as Tyre, Sidon and Djubail in 482 (1089), but not in recovering the interior of Palestine and Damascus (lost in 468), in spite of a certain revulsion of feeling in Syria in favour of the Fatimids. It is difficult to know how much weight to lay on the story (Ibn Taghribardi,

p. 272-273) that Tutuḡ at one time proposed to ally himself in marriage with Bādā.

The success of the Saljuḡids also affected the position of the Fāṭimids in Arabia. In 462 (1069) the 'Abbāsid Caliph was acknowledged in the Holy Cities, and after a brief return to the Fāṭimid obedience between 467 and 473 the Hijāz passed definitely to the 'Abbāsid cause. In the Yaman, the Sulāhid in the interior and the Zuhārid in the important commercial centre of 'Aden maintained the suzerainty of the Fāṭimids, the latter until the Ayyūbid conquest by Tārḡashāh in 569 (1173) [cf. the art. SALADIN].

Meanwhile the Fāṭimid empire had been similarly shorn of its possessions in the West. About 435 (1043-1044) al-Mu'izz b. Bādīs [q. v.], the Zirid lieutenant of the Fāṭimid Caliph in Kairuān, began a series of repressive measures against the Shī'ites of Ifrīkiya; in 440 he seems to have made the first overt gesture of independence, and in 441 superseded the Fāṭimid coinage; but it was not until 445 (1051) that he formally renounced the Fāṭimid suzerainty and obtained an investiture from the 'Abbāsid Caliph. According to the traditional account (already fully developed in Ibn al-Saīra), the wazīr al-Yazīd in revenge launched against him the nomad bands of the Banū Hilāl (q. v.; the tribes mentioned in the Egyptian sources are Zaghba, Riyāh, al-Aṭṭahjī, and 'Adī), who had been a cause of much trouble to the government in the Sa'īd and were now given a free hand to plunder the territories of the Zirids [cf. TRAVIS, vol. iv, §51^a]. As Wüstenfeld has already indicated (p. 234 n.), the story as it stands is open to serious objections, and there can be little doubt that it has been amplified by popular legend. The westward movement of the Hilāl tribes began as early as 440, and there is no reason to reject the account of Ibn 'Idhārī that it was al-Mu'izz himself who invited the Arab tribes, then in Barḡa, to enter Ifrīkiya as his *ghazā* (since he was not on good terms with the Saḥhāḡja), and that they, having set out in response to his invitation, began to plunder on their own account and already before the close of 445 had inflicted a severe defeat on his troops. The two traditions are not, however, mutually exclusive and may be reconciled by supposing that the Banū Hilāl were transported in the first instance to Barḡa (the governor of which had thrown in his lot with al-Mu'izz), and that their advance into Ifrīkiya was facilitated, for opposite reasons, by both al-Mu'izz and the wazīr (cf. also Ibn al-Aṭṭar, ix, 387-388). During the first years of his reign, the son and successor of al-Mu'izz, Tamīm (453-501 = 1061-1107), temporarily returned to the Fāṭimid allegiance (Lane-Poole, p. 138 n. 1), but with the conquest of Sicily by the Normans in 463 (1070) Barḡa became the western limit of the Fāṭimid state.

The diplomatic relations of al-Mustanṣir with non-Muslim states covered a wide field. In 429 (1038) the existing treaty with the Byzantine Emperor was renewed and relatively cordial relations established. If Nāṣir-i Khuraw (ed. Kaviṃi, p. 67) is to be trusted, the Egyptian government was in communication in 439 (1047) also with the Georgians, the Dailamites, the Khāḡān of Turkistān and even the rājā of Iḥlī, all of whom shared with Egypt a common hostility to the Saljuḡids and the Ghaznavids. The friendly relations with Constantinople, however, were broken off in 446

(1054), when the Empress Theodora demanded an offensive alliance against the Saljuḡids. Egyptian troops were despatched on an unsuccessful expedition against al-Iḥlīkiya, the Empress retaliated by opening negotiations with the Saljuḡids, and al-Mustanṣir seized the treasures of the Church of the Holy Sepulchre (*al-Kusāma*). This breach with Constantinople had important consequences for the future of Egypt, since to it may perhaps be ascribed the opening up of direct commercial relations with the Italian trading cities, though documentary evidence on the point is lacking (cf. Heyd, *Histoire du Commerce du Levant*, i, 105, 124).

Religious Conditions. The wide expansion of the Fāṭimid power under al-Mustanṣir is reflected also in the religious situation. Propaganda on behalf of the Fāṭimids is synonymous with the dissemination of the official state religion of the Fāṭimids, the Imā'ili-Shī'ite faith. Not only in Egypt and other lands in actual subjection to the Fāṭimid authority, but in all quarters of the Islamic world, we learn of missionaries (*da'īs*), who during the long reign of al-Mustanṣir struggled, in part with great success, to secure recognition of his claim to be the religious Imam. In the East, in Persia, and especially in Shīrāz, at the court of the Būyid prince Abū Kalbāḡir [q. v.], we can trace the activities at least since 429 (1037-1038) of the *da'ī* Alī Naṣr Hilāl Allāh b. Mūsā al-Mu'ayyad (cf. Dīn Allāh [see AL-MU'AYYAD]), doubtless the most prominent personality of his time in the Imā'ili *da'wa*. He endeavoured to win over the court and the Dailamite troops to the Fāṭimid cause, but was forced to leave his post in 439 (1047-1048) as the result of pro-'Abbāsid intrigues. In the first part of his autobiography (see *Bih.*) al-Mu'ayyad gives a detailed account of his activity, and in particular publishes his correspondence with an unnamed Sunni from Khurāsān, in which he explains the religious and political principles of his mission. To what an extent the power of the Fāṭimids and the success of their emissaries in Iraq and Persia was feared at Baghdad is shown by the fact that several times and latterly in 444 (1052), there was published a document, to which the 'Alids also subscribed, with the object of declaring false the claim of the Fāṭimids to descent from 'Alī. At the same time the Fāṭimid cause gained also new ground in the Yaman. After the political power of the Fāṭimids had been reduced there to a minimum in the course of the fourth century, it now acquired in the Sulāhid 'Alī b. Maḡammad a powerful supporter. He and his successors regarded themselves not only as political but also as religious representatives of the Fāṭimid Imām in the Yaman. The voluminous correspondence between the Sulāhid ruler and al-Mustanṣir, which is still preserved, collected in a separate work (*Kitaḡ al-Sigillāt wa'l-Tawḡifāt wa'l-Kutub li-Maḡmūn al-Mustanṣir bi'illāh*, MS. Sch. Or. St.; many of these letters are also reproduced in Idris, vol. vii. [see *Bih.*]), deals, along with political questions, in the first place with the position of the *da'wa* in the Yaman and in the Fāṭimid state.

In Egypt itself, soon after the accession of al-Mustanṣir, the doctrines of the moderate official Imā'iliyya were threatened by the appearance of extremists related to the Druzes [q. v.]. A pretender, al-Sikkīn, together with his associate al-'Anī, gave himself out as the returned Caliph al-Hākim, but

was promptly unmasked (Idris, vi. 296). Al-Mu'ayyad, who came to Cairo in 439 and won the goodwill of Mustanšir, was entrusted with the leadership of the religious mission as *ḥafīẓ al-dīn* (it should be remarked, however, that al-Yāfurī during his lifetime also held the title of *ḥafīẓ al-dīn*, cf. Ibn al-Sayrafī, p. 40). In the reopened seminary in Cairo, where the *ḥafīẓ* of the various countries received instruction, he gave his lectures and gathered into his hands the strings of the whole *da'wa*. He appears to have exercised a special influence over the development of the *da'wa* in the Yaman, as the future Yamanite *ḥafīẓ* Laṣṣak b. Maḥkūm was numbered amongst his pupils. From Persia the newly-converted Ismā'īlī Nāsir-i Khusrāw [q. v.] came to Egypt, to find his master in him. At the same time al-Mu'ayyad seems also to have played an important political role. In his autobiography he quotes numerous letters which he wrote to al-Bakrī and other generals of the Fātimids in Syria and Mesopotamia. In particular it was at his instigation that the *khawāṣṣ* for the Fātimids was introduced into the prayer at Baghdad in 450 (cf. Ibn Muyassar, p. 8, i; 10, 4-5). In his poems he eulogizes the Imām al-Mustanšir in a similar manner to Nāsir-i Khusrāw. Other Ismā'īlī authors of this period were the poet Ḥasan b. Maḥbūb, the *ḥafīẓ* Ahmad b. Ibrāhīm al-Nisābūrī, and the author of the *Kitāb al-Maḥfūl al-Mustanširīya* (lectures in which the Imām of al-Mustanšir is demonstrated with the aid of the Ismā'īlī *ḥafīẓ*), which are ascribed by the Fātimid tradition to Badr al-Dīn al-Ḥamālī. — For the Fātimid propaganda in Transoxania see also Barthold, *Turkestan* 2, G. M. S., p. 304-305.

(H. A. R. GUN and P. KRAUS)

MUSTA'RIB(A) (أ.), "arabized", the name of one of the groups into which the Arab

genealogists divide the population of Arabia. The first is the *'Arab 'Arabi*, the original Arabs of pure stock; they numbered nine (some say seven) tribes which are regarded as the descendants of Aram b. Sam b. Nuh [q. v.] and the first settlers in Arabia: 'Ad, Thamūd, 'Umayyīm, 'Abīl, Tasm, Dhiyās, 'Imīlī, Dharham and Wabār. These are extinct except for a few remnants incorporated in other tribes. The second group comprises the *mustaribā* [q. v.] who are not pure blooded Arabs. They are regarded as descendants of Kaḥṭān (the Yokān of the list of nations in Gen. x. 25-29) and live in southern Arabia. The third group is called *mustaribā*; this name is also applied to tribes who were not originally Arab; they trace their descent from Ma'add b. 'Adnān, a descendant of Ismā'īl [q. v.]. All the north Arabian tribes are included among the *mustaribā*, so that the Banī Kuraysh to which Maḥammad belonged is one of them; his genealogy is in this way traced back to Abraham and he thus thought he could prove his connection with the Biblical prophets. The old term *mustaribā*, for tribes not originally of Arab descent, obtained a new meaning after the conquest of Spain. It was applied to the Christian Spaniards who adopted Islam; the word *mustaribā* was corrupted to Mozarab [q. v.].

(ILSE LICHTENSTÄUVER)

AL-MUSTARSHID BI 'LLĀH, ABŪ MAḤMŪD AL-FADL, 'Abbasid caliph, born in 486 (1093-1094), son of al-Mustanjir and a slave-girl. Al-Mustarshid, who was proclaimed his father's successor after the latter's death on 16m Rabi' II 512 (Aug. 6, 1118), was the first caliph since the occupation of Baghdad by the Buyids who was not content with spiritual supremacy but also endeavoured to revive the caliph's authority in temporal matters. The Saljuq sultan had died before al-Mustanjir (Dhu l-Hiddjja 511 = April 1118) and his son Mahmūd [q. v.] was appointed his successor. His uncle Sanjar and his brother Ma'ūd both rebelled against the new sultan and the turbulent Mazyadī Duhais b. Saḍāḥa [q. v.] was raising trouble in the 'Irāq and had also quarrelled with the caliph. The latter defeated him in 517 (1123) and after al-Mustarshid had repelled a regular attack on the capital he was able to adopt a more independent attitude to the Saljuqs. But as his increasing power aroused the misgivings of the governor of Baghdad, the latter in Rajab 520 (July-Aug. 1126) went to Salṭān Maḥmūd and asked him to put a limit to the caliph's powers. Maḥmūd agreed and attacked the capital while al-Mustarshid sent an army against Wasīt in order to seize this town. The attempt failed however; towards the end of the year Maḥmūd entered Baghdad and al-Mustarshid could not hold out indefinitely but had to make peace, whereupon the sultan appointed 'Imād al-Dīn Zangī governor of Baghdad and all the 'Irāq. But in Dhu'l-Hiddjja 521 (July 1127) the latter was given the governorship of al-Mawjil and after Maḥmūd's death (525 = 1131) the succession was again disputed. In 526 Duhais and Zangī undertook a campaign against Baghdad but were defeated by the caliph at the

end of Rājshab (June 1132) and in the same year Mas'ūd [q. v.] had to give him complete control of Baghdad and the surrounding country. After some time he attacked the sultan but was taken prisoner in Ramadān 529 (Jan. 1135) and murdered in Dhū l-Ka'da of the same year (Aug. 1135) [cf. the art. DUBAD L. SADAQA].

MUSTASHAR (A.), councillor, Turkish pronunciation *müştəşār*, meaning "general secretary to a ministry" or "under-secretary of state". The word which means literally "one who is consulted" comes from the same root as *mushār* [q. v.] which properly means "he who gives advice". Sāmī Bey regards the word *müştəşār* as a synonym of the old Turkish *imāl*. — The office was called *müştəşārī* or more simply *müştəşārīllā*.

Like the title *mühür*, that of *müştəşār* was created by Mahmūd II. There were at first two *müştəşār* in the grand-vizierate, one for foreign and the other for home affairs. The latter was later replaced by a Minister of the Interior who had in his turn a *müştəşār*. The number of *müştəşār* gradually increased but some less important departments had *müştəşār* "assistant, deputy" (in 1296 for example there were *müştəşār* in the finance and police departments). The office has been retained under the present republic and each ministry or *meklûlât* has its *müştəşār*; that of national defence has three (for army, navy and air force).

The chief judge of Istanbul used to have a *müştəşār*. According to Lufti Efendi, the post of *müştəşār* of the Navy was created in 1253 (v., p. 91) and that of *müştəşār* of the treasury or of the two *hazines* in 1262 (viii., p. 127). On the honorary grades of *müştəşār* cf. the same author, vi., p. 66; cf. also p. 103, line 8 from below.

Müştəşār is also the name given to the "councillors" of Turkish or foreign embassies or legations. The title of *müştəşār* was also borne by the ambassador himself, sent by the Sultan of Morocco to Istanbul in 1197, is inexplicable to us (cf. Djewdet Pasha, edition 1309, ii., p. 251; cf. *Recueil de Mémoires Orientaux de l'Er. des Langues Orientales à Paris*, 1905, p. 6).

As to the term *müştəşir*, a synonym of the preceding and from the same root, it is applied to technical advisers, whether foreigners or not; *kubāḥ mūştəşirī* "legal adviser".

Bibliography: Cf. the various Ottoman encyclopaedias. The historians Ahmed Djewdet and Lufti, following their predecessors, give no details of the administrative organisation. (J. DERNY)

AL-MUSTA'ŠIM BI' ALLĀH, ABO AHMAD ABO ALLĀH B. AL-MUSTA'ŠIM, the 1211 'ABD-ŪS-ŪD caliph of Baghdad, born in 609 (1212/3). After the death of his father in Jumādī I or II 640 (Nov./Dec. 1242) he was raised to the caliph's

throne but he had neither the talent nor the strength to avert the catastrophe threatening from the Mongols; he allowed himself to be guided by bad councillors who were not agreed among themselves but working against one another. In 683 (1255/6) the Mongol Khan Hülāgū [q. v.] demanded that the Muslim rulers should make war on the infidels. The caliph did not trouble about this and in Rabi' I 655 (March/April 1257) a Mongol embassy came to Baghdad and demanded that al-Musta'šim should raise the defences of the city and appear in person before Hülāgū for further negotiations or send a deputy. As the caliph refused to meet these demands, Hülāgū threatened him with war. After another message in which al-Musta'šim tried to intimidate Hülāgū, the latter set out against the ancient city of the caliphs. On the way he met another embassy, offering him an annual tribute but this effort to appease the cruel foe was useless and by Muharram 656 (Jan. 1258) the Mongols were at the gates of Baghdad. Preparations for the siege advanced rapidly and after all attempts to resume negotiations had failed against the relentless Hülāgū, al-Musta'šim had to surrender on 4th Safar (10th Feb.) and the city was sacked. Ten days later Hülāgū had the caliph with some of his relations put to death [cf. the art. SAGHDAD].

Quatremère), i. 228 sq.; Hamd Allāh Mu'tawfi-i Karwīn, *Ta'rikh-i Gūda* (ed. Browne), i. 371—373; Weil, *Gesch. d. Chalifen*, iii. 470—478; Le Strange, *Baghdad during the Abbasid Caliphate*, see index; A. Müller, *Der Islam*, i. 640; ii. 228 sq.; Muir, *The Caliphate*, new ed., p. 590 sq. (K. V. ZETTERSTEN)

MUSTAWFI, an official in charge of government accounts. Under the Turkish systems, e.g. under the Ghaznawids and Seldjūks, the title was borne by a functionary of high rank who was at the head of the *dimās* concerned with keeping the tally of public income and expenditure. Under the Nizām al-Mulk the office of the *mustawfi* was second only to that of the vizier (Bundhart, ed. Houtsma, p. 100) and appears to have corresponded to the *drōn al-simān* or *drōn al-animma*, the "Bureau of (Financial) Control" of the 'Abbasids (Tahart, iii. 522), although the Seldjūks also had a *drōn* of this name tenable by the *mustawfi* himself (Bundhart, p. 58). The qualities requisite in him were such as to fit him for the vizierate itself (*ibid.*, p. 96), and indeed there were duties which were common to the two offices so that the same man could act as the *mīl* in both (*ibid.*, p. 129, last line). The vizierate might be refused by a powerful *mustawfi* holding all the reins of government in his hands and reluctant to expose himself to the dangers inherent in the nominally more exalted office (*ibid.*, p. 136, 141). But no officer was safe from a capricious or greedy monarch and the *mustawfi* Šafī al-Din suffered death and the confiscation of a large part of his property at the hands of Salāh Mas'ūd (*ibid.*, p. 171). It is probable that the actual title of the State *mustawfi* was *mustawfi kawnalaka* or something similar (*ibid.*, p. 31), the ordinary *mustawfi*, or accountant, holding a subordinate position (*ibid.*, p. 31, 3).

Under the Mongols the title was given to the superintendents of provincial finances (e.g. Hamd Allāh Mustawfī and his great-grandfather; cf. E. G. Browne, *Lit. Hist. of Persia*, iii. 87), and under the Timūrids, Safawids and Qājārs, the *mustawfī* 'Uzunmīlāh filled the office of a secretary of state in charge of the public treasury accounts while the ordinary *mustawfī* was one of the lesser officers of the court (R. du Maine, *État de la Perse en 1660*, ed. Schefer, Paris 1890, p. 26, 178 sq.; A. Olearius, *Voyages and Travels*, London 1669, p. 274; Sir J. Malcolm, *History of Persia*, London 1815, ii. 437; R. G. Watson, *History of Persia*, London 1866, p. 16 sq.). *Mustawfī* 'Uzunmīlāh might however, under the latest Qājārs, be a title personal to a particular individual, who might be the Minister of the Interior (as in 1890) or even Prime Minister (as in 1910).

In Egypt, under the Fatimids and Mamlūks, the *mustawfī* might be the head of a *diwān* (as of the *diwān al-ḥaṣṣ*) or hold a less exalted, but still important, position as financial controller in such matters as the *ḥaṣṣ*, or military fiefs (cf. Makrizī, *Khitaṭ*, Bulak 1270, ii. 193, middle and p. 227, under *ḥaṣṣ al-ḥaṣṣ*). The ordinary *mustawfī* was a minor official of the status of a clerk employed under a *ḥadd*, or overseer, in land-surveys or crop-estimation or else in a government office such as the depot of the government grain monopoly (cp. *cit.*, ed. Wiet, ii., ch. 32, p. 23—25).

MUSTAẒFĪ [see ḤAMD ALLĀH]

AL-MUSTAẒHIR BI 'LLĀH, ABU 'L-'ABBĀS AḤMAD B. AL-MUSTAẒFĪ, 'Abbāsid caliph. After the death of his father in Muḥarram 487 (Feb. 1094) the young al-Mustaẓhir succeeded him; about this time the power of the Saljuqs was beginning to be weakened by internal dissensions [cf. BARKIYĀRUK]. The Assassins, who had already appeared on the scene in al-Muqtadi's reign, were able to take advantage of the situation and fighting this dangerous sect soon became one of the most important tasks of the sultāns and caliphs. The Crusades also began at this time. In Shā'ban 492 (July 1099) Jerusalem was taken and in the following years numerous fugitives reached Baghdad who urged Salḡan Maḥammad to take part in the struggle. He therefore sent an army under the emir Mawḍūd against the Crusaders in 505 (1111/12). Al-Mustaẓhir, who is hardly ever mentioned in the political history of this period, died on 16 Rabi' II 512 (Aug. 6, 1118) at the age of 41.

MUSULMAN [see MUSLIM]

MUTA, a town in the centre of a fertile plain in the land east of Jordan, east of the southern end of the Dead Sea, about two hours' journey south of Kerk, celebrated for the defeat of the Muslims there in Dhu'l-Ḥijja 1 of the year 8. According to the Arabic account, the reason why Muḥammad sent 3,000 men to this region was that an envoy whom he had sent to the king (presumably the imperial commandant) of Bosra had been murdered by a Ghassanid, but the real reason seems to have been that he wished to bring the (Christian or pagan) Arabs living there under his control. If the story is correct that he chose three leaders for the expedition, Zaid b. Ḥarīthā [q.v.] and if he fell his cousin Dja'far b. Abi Ṭālib [q.v.] and if he also fell the poet 'Abd Allāh b. Rawḥa [q.v.], he must have fully recognised the hazardous nature of the enterprise; but the tendency of the stories to describe the dangers of the expedition and the overwhelming nature of the opposing force as very great in order to put the unfortunate result of the battle in a better light is quite evident. In Ḥassān b. Thābit (xii., cf. cxviii.) we are only told that the three leaders above mentioned fell in succession. When the Muslims arrived in Ma'ān in eastern Edom, they learned that no less than 100,000 Byzantine soldiers and Beduins — a much exaggerated figure which Ibn Hishām doubles — had assembled in Ma'ān. Muḥammad (Arabia Petraea, i. 29) locates this Ma'ān, which according to Tabari, i. 2108, was not a town but a camp (*ḥaṣṣ*), at Laḡdījā, a place near a spring with traces of an old Roman camp. But Abu 'l-Fida' identifies it with al-Kabbā which he describes as a village on the site of the former capital of the district, i.e. Rabbat Moab or Arcopolis (P. Thomsen, *Lea Sacra*, p. 25; Brunnow, *M. N. D. P. V.*, 1895, p. 70 sq. with photographs; Muḥ., *op. cit.*, p. 370 sq. 381). According to the Arab story, it was the emperor Heraclius himself who assembled this great army in Ma'ān, which is of course not true. When the Muslims heard this, we are told, they lost courage and wanted to wait until the Prophet could send them reinforcements but 'Abd Allāh b. Rawḥa was able to fill them with such enthusiasm for a possible martyr's death that they marched on the imperial army. According to Ibn Hishām, the latter met them at a village belonging to Balqa' called Maḡharif, but this must be a misunderstanding as this term means the Syrian fortresses on the edge of the desert. At the sight of the great force of the enemy, they withdrew to the south but fighting began at the village of Mu'ta and they were routed. When the three leaders named by Muḥammad had fallen in the order indicated, they wanted Thābit b. Arḡan to take command but he gave it to Khalid b. al-Walid who succeeded in saving the rest of the force; this was the first occasion on which his military talents benefitted the Muslims; how he did it, we do not know as the straggles related by Wāḡidī, p. 512 is not to be taken seriously. Besides the Muslim account, we have a Byzantine one, the earliest in the history of the Prophet, by the historian Theophanes, whose version bears the stamp of veracity. According to him Muḥammad sent four chiefs to the land east of Jordan against the Christian Arabs there. They went to a village named Mucneon, which de Goeje, *Mémoires sur la conquête de la Syrie* 2, p. 6 sq., takes

to be a copyist's error for Ma'ab, while Muail, *op. cit.*, p. 155, identifies it with Khirbat al-Mahna which lies in a broad depression, in order to fall upon the Arabs on a feastday (*ḥadṣa* 28; *al-Bihar* 20:22; *ḥadṣa*, which seems to indicate a heathen rather than a Christian population) but the *vicarius* Theodoros there learned of their plans and rapidly collecting the garrisons of the fortresses, fell upon the Muslims at Ma'm and defeated them. Three of the leaders and most of the force were killed and Chalefos who was called the "sword of God", alone succeeded in escaping. The tombs of the martyrs who fell there used to be pointed out at Mu'ta, where a mausoleum was built over them.

MUTA (A), temporary marriage (according to the Arab lexicographers "marriage of pleasure"), a marriage which is contracted for a fixed period on rewarding the woman.

1. Before Islam. According to Ammianus Marcellinus, *xiv*, 4, temporary marriage was in use among the Arabs already in the fourth century A. D.; but this can hardly be a reference to mut'a as the woman brings a lance and tent to the man and can leave him if she likes after the period has elapsed. It is also doubtful if there is a distinct mut'a character in the marriage of Hāshim with Salma bint 'Amr, whom he married during a temporary stay in Yathrib and left with her family there after the birth of her child (Caetani, I. 111, § 92). From the passage *Aghāni*, *xvi*, 65 (*mut'atun khaṭa* 'f-talla) as well as from Muslim traditions it may be concluded that mut'a was known in the Qabilis. If we remember that the same kind of temporary marriage as the mut'a was known in Erythraea (Coul. Rossini, *Principi di diritto consuetudinario*, Rome 1916, p. 189, 249) it seems to me certain that mut'a is an old Arabian institution. (Temporary marriage is also found among other peoples; cf. Wilken, p. 21 *sq.*; Westermarck, *History of Human Marriage*, London 1925, III. 267 *sq.*; cf. also the *ḥypaḡos γάμος* in Egypt, to which Grifflin, p. 327 calls attention; in a domestic document there is a reference to such a marriage for five months; cf. Mitteis-Wilcken, *Grundzüge der Papyrkunde*, *II*, p. 203 *sqq.*).

II. In the Qur'ān there is undoubtedly a reference to this form of marriage in the Medinan *sūra* *iv*, 28, although the orthodox explanation of this passage as early as the first century refers it to the ordinary *nikaḥ*; after giving a list of the classes of women with whom marriage is forbidden, it goes on: "And further you are permitted to seek out wives with your wealth, in modest conduct but not in fornication; but give them their reward (*uḡḡa*) for what you have enjoyed of them (*istamta'na*) in keeping with your promise". After *istamta'na*, 'Ubay' b. Ka'b and Ibn 'Abbas read the

words *lā aḡḡab minnamm* "for a definite period" (Tabari, *Tafsir*, v. 6), a reading which naturally has not found its way into Sunni circles but is often added in Shi'a books.

III. The traditions are contradictory on the question of mut'a. According to some, it was in use in the time of the Prophet and he was even said to have practised it (*mut'a* 242; Tabari, *An-nabī*, I. 1775, 1776; cf. Caetani, II. 478, N^o. 17 and 19). In return for a robe or a handful of dates one could take an unmarried woman (*ḡayām*) for a period of cohabitation (Muslim, *Nikaḥ*, II. 13, 17; Tayālis, N^o. 1637). Especially when a man came to a strange town he could marry a woman there for the period of his stay so that she could look after him (Tirmidhi, *Nikaḥ*, *lāb* 28).

On the other hand, according to one tradition related by 'Alī, it was forbidden by the Prophet on the day (or in the year) of Khaibar (Bukhārī, *Maḡḡā*, *lāb* 38; *Ḍaḡḡā*, *lāb* 28; *Nikaḥ*, *lāb* 33; Muslim, *Nikaḥ*, tr. 31-34; Nasa'i, *Nikaḥ*, *lāb* 71 ["on the day of Hunain" must here be a mistake for Khaibar]; *Sa'id*, *lāb* 51; Ibn Maḡḡā, *Nikaḥ*, *lāb* 44; Tirmidhi, *Nikaḥ*, *lāb* 28; *Aḡḡā*, *lāb* 6; Mālik, *Nikaḥ*, tr. 41; Ahmad b. Hanbal, I. 79, 103, 142; Tayālis, N^o. 111; Zaid, *Maḡḡā*, N^o. 718).

According to other traditions, he is said to have permitted it for a short time on particular occasions. In this connection we have a group of traditions which goes back to Salma b. Ma'ad; the various accounts of this, some long, some short, which supplement one another, are in part given without date (Muslim, *Nikaḥ*, tr. 20, 26; Nasa'i, *Nikaḥ*, *lāb* 71; Abū Dawūd, *Nikaḥ*, *lāb* 13; Ahmad b. Hanbal, III. 404), in part referred to the conquest of Mecca (Muslim, *Nikaḥ*, tr. 21, 24, 25, 27, 28; Tirmidhi, *Nikaḥ*, *lāb* 16; Ahmad b. Hanbal, III. 404, 405), and in part to the farewell pilgrimage (Ibn Maḡḡā, *Nikaḥ*, *lāb* 44; Tirmidhi, *Nikaḥ*, *lāb* 16; Abū Dawūd, *Nikaḥ*, *lāb* 13; Ahmad b. Hanbal, III. 404 *sq.*). Their substance is as follows: The Prophet permitted mut'a; Salma therefore went with a companion to a woman and each offered her his cloak. She chose the younger with the shablier cloak and slept three nights with him; thereupon the Prophet forbade it. According to the stories associated with the farewell pilgrimage, the woman wished mut'a only for a fixed period so that ten days or nights was agreed upon, but the Prophet forbade it after the first night, saying: "Whoever of you has married a woman for a period, shall give her what he promised and ask nothing of it back and he shall separate from her; for God has forbidden this up to the day of resurrection". (For the conclusion cf. also the fragments of this in Muslim, *Nikaḥ*, tr. 23, 30).

According to a second group of traditions, which goes back to Ḍaḡḡā b. 'Abd Allāh and Salma b. al-Akwa', the Prophet permitted mut'a for three days on a campaign (Bukhārī, *Nikaḥ*, *lāb* 71; Muslim, *Nikaḥ*, tr. 14, 15; Ahmad b. Hanbal, IV. 47, 51; according to Muslim, *Nikaḥ*, tr. 19 and Ahmad b. Hanbal, IV. 55, this was in the year of Awjās, i. e. shortly after the capture of Mecca). In Bukhārī we have at the end: "The partnership of the two parties lasted three nights; and if they agreed to extend it, they did so, and if they wished to separate, they did so". A prohibition is given only in two versions in this group.

According to other traditions, mut'a was first forbidden by the caliph 'Umar at the end of his caliphate (Muslim, *Nihāṣ*, tr. 16-18; Ahmad b. Hanbal, iii. 304, 380 and iii. 325, 356, 363, where there is a reference to the two kinds of mut'a, i.e. *tamattu'* on the pilgrimage and *mut'a al-ahwa'*). 'Umar threatened the punishment of stoning so that he regarded mut'a as fornication (Ibn Māḍja, *Nihāṣ*, bāb 44; Mālik, *Nihāṣ*, tr. 42; Faylālī, N° 1792). Cf. the angry exclamation of Ibn 'Umar when he was asked about mut'a: "By Allah, we were not immodest in the time of the Prophet of Allah nor fornicators" (Ahmad b. Hanbal, ii. 95, 104).

What then is at the bottom of these contradictory traditions? While Wellhausen regards mut'a as simply prostitution and not an old Arabian custom, Caetani points out that the traditions agree in connecting mut'a with an entrance of the Prophet into Mecca and sometimes even with the *hajj al-dī* and that a three days' duration is a feature of the mut'a; taking account of other considerations, he concludes that mut'a in the pagan period was religious prostitution on the occasion of the Meccan festival. However tampering this explanation may be, there is a complete lack of evidence for any religious prostitution in Mecca. With Wilken and Robertson Smith, we must rather regard mut'a as the survival into Islam of an old Arabian custom. The Prophet gives this custom sanction in the Qur'an and also practised it himself. The traditions, if examined carefully, only mention two cases of prohibition by the Prophet: Khaibar and Mecca. As both these are later than the above Qur'anic passage (years 3-5, according to Nöldake-Schwally, I. 198) this prohibition would be quite possible. But since on the other hand the caliph 'Umar prohibited mut'a, which there is no reason to doubt, we might regard the tradition of prohibition as representing later views, which, as is often the case, are put back to the time of the Prophet.

IV. Attitude of the fuḳahā'. Ibn Abīn (d. 68) was an ardent champion of mut'a (Bukhārī, *Nihāṣ*, bāb 31; Muslim, *Nihāṣ*, tr. 18; Tayalīn, N° 1792; Rāzī, *Maṭālib al-ḡhalīb*, Cairo 1324, iii. 195). In Mecca and the Yaman, according to Ibn Ruḡdā (*Ḥidāya*, Cairo 1339, ii. 54), he also had followers; but before his death he is said to have been converted to the opposite view (Tirmidhī, *Nihāṣ*, bāb 28; Rāzī, *loc. cit.*). In later times, people still spoke derisively of a marriage by a *fiṭwa* of Ibn Abīn. In the second half of the first century in Mecca, *fiṭwas* were still given permitting mut'a (Muslim, *Nihāṣ*, tr. 29). The Qur'an commentators Maḍḥid (d. 100), Sa'īd b. Djaḥr (d. 95), and al-Suddī (d. 127) also referred the above verse of the Qur'an to mut'a. Suddī says that it is a marriage for a fixed period and that it should be concluded with the permission of the *mawla* and with two witnesses; that after the expiry of this period the man has no longer any claim on the woman and that the two parties cannot inherit from one another (Tabarī, *Tafsīr*, v. 8). With the second century, the contrary view begins to predominate; although individuals like 'Aur b. Dīnār (d. 120), Ibn Djarūdī (d. 150) and the Zaidī sect of the Djarūdīya permit mut'a (Ibn Ruḡdā, *loc. cit.*; van Arendonk, *Ophomet* etc., Leyden 1919, p. 72, note 9), al-Thawrī (d. 161), Ibn al-Mubārak (d. 181) (Tirmidhī, *Nihāṣ*, bāb 28)

and all the Sunnī schools of law as well as the Zaidīs (al-Nuḥḥ bi'l-Ḥaḥḥ, *Takrīr*, Berlin MS., Glasses 74, fol. 53b) consider mut'a forbidden. Its recognition was now limited to the Shī'a. And if the caliph Ma'mūn tried to introduce mut'a again, this was certainly due to his Shī'a tendencies (Ibn Khallikān, *Wafayāt*, ii. 218).

At the same time, we still have in the second century the opinions of a period of transition. According to Zafar (d. 158), the marriage concluded under the form of mut'a was valid as a marriage but its limitation in time was invalid (Sarakhḥī, *Mabṣūṭ*, v. 133; cf. also Bukhārī, *Ḥiyāl*, bāb 4). According to al-Ḥasan b. Ziyād al-Lu'ī (d. 204), the mut'a was valid if the partners could not survive the time fixed, e.g. 100 years or more (Sarakhḥī, *loc. cit.*).

But in spite of their refusal to recognise mut'a, the Sunnīs made concessions by which mut'a gained a footing in another form. It became the practice not to insert a definite period in the contract; any agreement made outside the contract was not affected by the law. Al-Shāfi'ī (*Umm*, v. 71) for example, declared a marriage valid when it was concluded with the unuttered resolution (*niyya*) to observe it only for the period of stay in a place or for a few days only, so long as this was not expressly stipulated in the contract. Similarly if agreement to this effect (*sur'atunafā*) had been previously made and even if made on oath; but he describes such an agreement as *maḥrāḡ*. There are also traces in later literature of a decision by Mālik by which he permitted mut'a (Sarakhḥī, v. 152; Baḍ'ā'īnī, *Muntahān al-Tawārīḡ*, ed. Lees, ii. 208, 299), although only the contrary is recorded in the *Muwaṭṭa'* and *Mudawwana* (iv. 46).

A good exposition of the two opposite points of view is given from the Sunnī side by Kāḥnānī (d. 387), *Bad' al-Sunnā*, Cairo 1327, ii. 272-274 and in Rāzī, *op. cit.*, iii. 193-198 and from the Shī'a side by 'Alam al-Hudā al-Murtadā, *In-ṣifār*, Teheran 1315, p. 60-65. The Sunnīs refer the verse above mentioned from the Qur'an to regular marriage and declare the *agfir* to be *maḥr*, while the Shī'īs base their view on this verse and consider the traditions of prohibition not to be abrogatory and do not consider 'Umar authoritative for a prohibition. The Imāmīs even go so far as to say: "The believer is only perfect when he has experienced a mut'a" (al-Hurr al-'Amīlī, v. 69, 2).

V. The teachings of the Imāmīs.

1. Form. Mut'a is an irrevocable (*lāzim*) contract which, like every contract, comes into existence through *ṭabāṭ* and *ajfāḥ*. It may be concluded with the words *nihāṣ*, *ṭamattu'* or *tamattu'*, but must always contain a precise statement of the period (*ajfāl*) and a definite recompense (*agfir* or *maḥr*). This recompense may be the dowry usual in other marriages or a handful of corn, a dirham or such like. The period may vary from a day to months or even years. Witnesses are not necessary; nor need it be concluded before the *ḡdi*, if the partners are capable of using the formulae correctly. If the *maḥr* is not given, the contract is invalid. If the period is not given, according to some it is a regular marriage if the word *tamattu'* was not used at the end of the ceremony; in the latter case the contract is again invalid.

2. The two partners must naturally fulfil the usual conditions for the conclusion of an agreement. The woman must further be unmarried.

and chaste (*ʿafīf*) and if possible ought to know about mut'a, i.e. be a Shi'ī, and can only contract a temporary marriage with a Muslim. According to Ibn Bāṭūya (d. 381) and al-Mufīd (d. 413), mut'a with an unbeliever is forbidden, even with a member of the possessors of a scripture (*ḥudūdīy*). The *ṣawāḥib* (extreme Khāridjīs) are included among the unbelievers. According to most Imāmi (and Tūṭī also) however, mut'a with a Christian or Jewish woman is permitted but *makrūh* with a *madhūbiyya*. Mut'a with a slave-girl is only admitted with the consent of her master. Usually the woman contracts the marriage without a *maṭl*; only a virgin (*ḥikr*), according to some, requires her father's consent (Abū Ḥ-Salīh, d. 82; Ibn Bāṭūya, d. 381; Ibn al-Barrādj, d. 451; cf. Hilli, III, 92). The man may in this way take other wives in addition to his four legal wives, especially on journeys. He must not, however, take two sisters at the same time, not even during the *ʿidda*.

3. The mut'a ends on the expiry of the period agreed upon. It cannot be prolonged by arrangement between the two parties; a new temporary marriage with a new *maḥr* must rather be contracted at the end of the period. Divorce is impossible; according to some, however, *ḥāḍ* and *ḡhar* are permitted.

4. There is no obligation on the man to provide food and home for the woman. The two partners cannot inherit from one another; but according to some, inheritance may be provided for in the contract. The *ʿidda* after the expiry of the mut'a is two periods or 45 days, i.e. the *ʿidda* of a slave-girl. There is, however, disagreement whether on the man's death the period of waiting is the usual one for a wife or that for a slave. The children go with the father.

VI. Modern practice. Although these Shi'ī views have a certain amount of moral support, the mut'a in many cases can only be described as legalised prostitution. It is true that in Persia such marriages are made for very long periods, e.g. 99 years, but the Persian, when on a journey, temporarily marries in any place where he is stopping for some time and in the towns and caravanserais *mullās* and other brokers offer a wife to each new arrival. To make this business more profitable, the *ʿidda* period is evaded by concluding a second temporary marriage with the same man after the expiry of the first, for in the case of such a marriage the *ʿidda* is not necessary. This marriage and a woman of this kind is called in Persia *ḡḡḡ* (lit. 'form' i.e. of the contract). Cf. Orentius [1637], *Muscovit. u. pers. Reyer*, Schlesswig 1656, p. 609; Chardin [1673], *Voyages*, Paris 1811, II, 222–223, 225–227; Polak, *Persien*, Leipzig 1865, I, 207 ff.; E. G. Browne, *A year amongst the Persians*, Cambridge 1927, p. 505 ff.; H. Norden, *Persien*, Leipzig 1929, p. 148, 167; and the romance of the traveller James Morier, *The adventures of Hajji Baba of Isfahan*, 1824, part III, chap. 6–8.

The constantly quoted story (first in Wilken, p. 19) of Alex. Hamilton (*A new account of the East Indies*, Edinburgh 1727, I, 51) that at the beginning of the 17th century temporary marriages were publicly negotiated in Soanah (= San'a) in South Arabia and concluded before the *ḡḡḡ*, is a very improbable one; for Hamilton knew only the coast-towns from his own observation and wrote

his account of his travels later from memory. He seems to be confusing them with conditions in Persian towns, and he makes mistakes on other matters.

In Mecca, in modern as well as ancient times (for the middle ages cf. *Lisān al-ʿArab: wa-muṭʿat al-tawāḡif bi-Makha minha*), temporary marriages were concluded among the Sunnis but nothing is said of this in the marriage contract or this would make it invalid; everything necessary is arranged previously by word of mouth. On the conclusion of the contract, the man utters the *ṭalāq* formula with a time limit. Such agreements are as a rule kept (Snoeck Hurgonje, *Mekka*, II, 156; do., *Perser. Geschiedten*, VI, 150). The same practice is used in such cases as Shi'ī indicated long ago (cf. above).

(HEFFENING)

AL-MUTAʿALĪ. (See ALLĪ, II.)

MUTAʿARRIB(A) (A.) 'arabised', the term applied to the descendants of Kaḥṭān (the Biblical Yaktān) who were regarded by the genealogists as 'having become Arabs' in contrast to the supposed native 'pure' Arab tribes like ʿAd, Thamūd, etc. They settled in South Arabia and adopted Arabic from the 'pure' Arabs. The latter had learned it through Qurḥum, the only man who spoke Arabic in Noah's ark (all the rest spoke Syriac), and his son-in-law Aram b. Šam b. Nūh was the ancestor of the ʿAd and Thamūd etc. From South Arabia, their main centre, tribes of the Banī Kaḥṭān migrated to the north, so that there are in Northern Arabia also tribes whose genealogies make them belong to the Banī Kaḥṭān (cf. the article MUSTAʿRIB(A) where the literature is given). (See LITERATURES.)

MUTADARIK, name of the sixteenth metre in Arabic prosody, added to al-Khalīl b. Aḥmad's list by al-Aḥḥash al-Awsat [q. v.]. It is also called *maḥḥṭar*, *maḥḥṭaḥ*, *ḡḡḡ*, *maḥḥṭ*, *darb al-ḡḡḡ*, *raḡḡ al-ḡḡḡ*, and *al-nāḡḡ*. It does not seem to have been used by the poets before Iḥṣān or of the first century A.H.

It has four feet to the hemistich and two 'arūḍ and four *darḥ*:

1st 'arūḍ { *Fā'ilun fā'ilun fā'ilun fā'ilun*
fā'ilun fā'ilun fā'ilun fā'ilun
Fā'ilun fā'ilun fā'ilun
fā'ilun fā'ilun fā'ilun
 2nd 'arūḍ { *Fā'ilun fā'ilun fā'ilun*
fā'ilun fā'ilun fā'ilun
Fā'ilun fā'ilun fā'ilun
fā'ilun fā'ilun fā'ilun
Fā'ilun fā'ilun fā'ilun
fā'ilun fā'ilun fā'ilun

fā'ilun may change to *fā'ilun* (*fā'inn* =) *fā'ilun*.
 (MONT. BEN CHENED.)

AL-MUTADĪD BI'LLĀH, ABU 'L-'ABBĀS AR-
 MAD B. TALĪḤA, 'Abbāsid caliph, son of al-
 Mawaffak, co-regent with the caliph al-Mutamīd
 [q. v.], and a Greek slave named Dīnāt. Al-Mutadīd
 was already the real ruler in the two last years
 of al-Mawaffak's life and after the death of al-
 Mutamid in Raddah 279 (Oct. 892) he ascended
 the throne. The new caliph who had inherited
 his father's gifts as a ruler and was distinguished
 alike for his economy and military ability is one
 of the greatest of the 'Abbāsids in spite of his
 strictness and cruelty. On the accession of al-
 Mutadīd the Tālibid Khumārāwaih [q. v.], worried
 of the long war, concluded peace and gave the
 caliph his daughter in marriage. While the Khā-
 ridjīs in Mesopotamia were weakened by internal
 dissensions, al-Mutadīd in 280 (893–894) under-
 took an expedition against the rebel Banū Shāibān
 and brought them to obedience. In the next two
 years the allies of the Khāridjī chief Hārūn b.
 'Abd Allāh were defeated and in 283 (896)
 the latter fell into the hands of Husain b. Hamdān,
 and was sent to Baghdad where the caliph had
 him crucified. The influence of the Hamdānids
 now began to increase in Baghdad. The Dulafids
 [q. v.] who had given the caliph much trouble
 were soon finally conquered. After al-Hārith b.
 'Abd al-'Azīz called Abū Laṭīf had been defeated
 and slain in Dhu 'l-Hijjah 284 (Jan. 898) near
 Isfahān, al-Mutadīd had the other Dulafids im-
 prisoned and the family now disappears from history.
 The Sāmānids increased their power at the expense
 of the Saffarids and the 'Alids. In 287 (900) the
 Saffarid 'Amr b. al-Laṭīf [q. v.] was captured and
 brought to Baghdad. In the same year the 'Alid
 Muḥammad b. Zaid, lord of Tabaristān, occupied
 Dīrdj, marched against Khurāsān but was defeated
 by the Sāmānid general Muḥammad b. Hārūn and
 died of his wounds while Ibn Hārūn took possession
 of Dīrdj and Tabaristān in the name of the
 Sāmānids. About the same time the governor of
 Armenia and Adharbāidjān Muḥammad b. Abi
 'l-'Sād] endeavoured in combination with his freed-
 man Waṣīf to conquer Egypt. The latter however
 was taken prisoner by the caliph's troops and as
 the most influential men in Tarsus had promised
 their help, al-Mutadīd had them arrested and
 the fleet there burned. Muḥammad was however
 allowed to retain his post but died soon after-
 wards of the plague. The Karmānians [q. v.] now
 appeared on the scene and in the same year the
 Karmānian leader al-Djunnabi [q. v.] inflicted a
 complete defeat on the caliph's troops. Al-Mutadīd
 died in Baghdad on 22 Rabb' II, 289 (April 5,
 902) at the age of 40 or 47. According to some he
 was poisoned. — Cf. also the art. *IMĀTIL* B. *SULMIL*.

(K. V. ZETTERSTERN)

AL-MUTADĪD BI'LLĀH, ABU 'AMR 'ABBĀS
 B. MUḤAMMAD B. 'ABBĀS, the most important and
 most powerful sovereign of the 'Abbāsid
 dynasty [q. v.] who reigned over the little king-
 dom formed by his father Abu 'l-Kāsim Muḥammad
 b. 'Abbād, with Seville [q. v.] as his capital, at
 the time of the break up of the Umayyad caliphate
 of Spain and the rise of the *reyes de taifas* (*mulūk
 al-tamā'if*); in the course of a reign of nearly
 30 years (433–460 A.H. = 1042–1069 A.D.), he
 very considerably increased his territory by making
 himself the champion of the Spanish Arabs against
 the Berbers in Spain whose numbers, already very
 large in the tenth century, had been much increased
 since the period of the 'Amirid dictators.

When he succeeded his father, the new king of
 Seville, who was then 26, following the usual
 practice of the period, assumed the title of *ḥakīm*,
 and a little later the *ḥakīm* of al-Mutadīd bi'LLĀH
 by which he is best known. Gifted with real
 political ability, he was not long in revealing his
 character, that of an autocratic ruler, ambitious
 and cruel and little scrupulous in the means
 which he used to achieve his ends. As soon as
 he came to the throne he continued the war
 begun by his father against the petty Berber
 ruler of Cádiz [q. v.], Muḥammad b. 'Abd
 Allāh al-Birzūlī, then against the latter's son
 and successor Iṣḥāk. At the same time, al-Mutadīd
 was extending his kingdom in the west between
 Seville and the Atlantic Ocean. It was with this
 object that he attacked and defeated successively
 Ibn Tāifūr, lord (*ḥakīm*) of Merinā, and
 Muḥammad b. Yahyā al-Yahyūbi, lord of
 Niebla (Ar. *Lubla*) [q. v.] who in spite of his Arab
 descent had had the audacity to ally himself
 with the Berber chiefs. In face of these successes
 of the king of Seville, the other *mulūk al-tamā'if*
 who distrusted him formed a kind of league into
 which entered the princes of Badajoz [q. v.], Alge-
 ciras [q. v.], Granada [q. v.] and Málaga [q. v.].
 This soon became a war between the 'Abbāsid
 of Seville and the Afḥad [q. v.] of Badajoz al-
 Muḥaffar [q. v.]; it was to last for many years
 in spite of the efforts at mediation by the Djab-
 warid ruler of Cordova which only achieved their
 end in 1051. Down to this year, while harassing
 the frontiers of the kingdom of Badajoz, al-Mutadīd
 displayed other activities. In succession he defeated
 Muḥammad b. Aiyūb al-Bakrī, lord of Huelva
 [q. v.] and of Saltes [q. v.] (whose son was the
 famous geographer), the Banū Mazān, lords
 of Silves [q. v.] and Muḥammad b. Sa'īd Ibn
 Hārūn, lord of Santa Maria de Algarve [q. v.],
 and annexed their territories. To justify these an-
 nexations, al-Mutadīd used a very crude pretext:
 he alleged that he had found the unfortunate
 Hishām II, who had really died in obscurity a
 few years before, and would go on till he had
 restored to him his former empire subdued and

pacified in its integrity. In order not to be exposed to the cruelty of the king of Seville, the majority of the petty Berber chiefs settled in the mountains of the south of Andalusia, sequestered in this make-believe and paid homage to the 'Abbāsid and to the Commander of the Faithful miraculously restored to aid the cause of al-Mu'tadīd but at the same time carefully concealed by him. It was labour lost for them. One day the 'Abbāsid invited to his palace in Seville all these petty chiefs with their suites and put them to death by asphyxiating them in baths the openings in which he walled up. In this way he took Arcos (q.v.), the capital of the principality of the Banū Khirān, Moron (q.v.) defended by the Banū Dammār, and Ronda (q.v.), capital of the Banū Ifrān (1053).

This aroused the wrath of the most powerful Berber ruler in Spain, Bādīs b. Ḥabīb al-Zirīd (q.v.) who ruled in Granada and who alone seemed able to resist al-Mu'tadīd. The latter however found that fortune favoured him in this war and a little later took Algeciras from the Hammūdīd al-Ḳāsim b. Hammūd. He next tried to seize Cordova and sent an expedition against it in charge of his son Imā'ūl; the latter tried to profit by the occasion to rebel and create for himself a kingdom with Algeciras as capital. This rash plan cost him his life, which his father took with his own hand, just as before him 'Abd al-Rahmān III and al-Mansūr b. Abī 'Amr had inflicted the supreme penalty on their unworthy sons. This was the beginning of the political career of al-Mu'tadīd's other son, Muhammad al-Mu'tasimīd (q.v.) who was to succeed him on his death; by his father's orders he went with an army to support the Arabs of Malaga, who had rebelled against the tyrannical ruler of Bādīs, the despotic Berber of Granada. But the latter routed the Sevilian army and al-Mu'tasimīd in sorry state reached Ronda from which he sought and received the pardon of his terrible father. The latter had long before repudiated the fiction of the pseudo-Ḥabīb which he no longer needed. He was now by far the most redoubtable and the most feared of the Spanish rulers. He had no enemies but the Berbers, Muslims like himself but much further removed from his social ideal of a Spaniard than his Christian neighbours in the north. In another land he might have been called "Berberoktonos". But the bitterness of his hatred cast a shadow over his last days; it was not without fear that he followed events in the western Maghrib, hitherto the fief of Muslim Spain; at least in the sub-Mediterranean zone. The irresistible advance of the Almoravids (q.v.) following Yūsuf b. Tāshfīn through all Morocco would not find the straits of Gibraltār an insurmountable obstacle for long. Al-Mu'tadīd realised this very well. Death at least prevented him from seeing his kingdom, entirely built up by his own energy and bold initiative, pass in a few weeks into the hands of invaders, brethren of these Berbers of Spain whom he had detested and in part destroyed.

Bibliography: All the texts of Arabic historians relating to the 'Abbāsids (particularly Ibn Ḥayyān and Ibn Bazzām, *Ḍakhkhira*, Ibn Khaldūn, Ibn al-Athār, Maḳḳarī) have been published by R. Dozy in his *Scriptores arabum loci de Abbāsidis*, Leyden 1846. Add also: Ibn 'Idārī, *al-Bayān al-maghrib fī al-Abbās Mulūk al-Andalus wa'l-Maghrib*, vol. III, ed. E. Lévi-Provençal, Paris 1930, and appendices (cf.

indices); Ibn al-Khaṭīb, *Imāt al-ḥam fī man ḥayya fah al-ḥilām min Mulūk al-Andalus*, part relating to the history of Spain, ed. E. Lévi-Provençal, Rabat 1934 (in the press). Cf. also Dozy, *Histoire des Musulmans d'Espagne*, new ed., Leyden 1932, index; A. Prieto Vives, *Los reyes de laifor*, Madrid 1926; A. González Palencia, *Historia de la España musulmana*, Barcelona 1929, p. 73—75. (E. LÉVI-PROVENÇAL.)

MUTAFARRIḲA (A), name of a corps of guards, who were especially attached to the person of the Ottoman Sultān in the ancient Turkish court. The name is also applied to a member of the guard. Their occupations were similar to those of the *Ḳumūsh* (q.v.), not of military character, nor for court service only, but they were used for more or less important public or political missions. Like the *Ḳumūsh*, the *Mutafarrīka* were a mounted guard. In later times there were two classes, the *gedikli* or *al-ḡamdi* *Mutafarrīka*, and the *ḡamdi*. Their chief was the *Mutafarrīka Aghāz*. In course of time their number constantly increased; at the end of the xvth century the maximum was fixed at 120 (*G.O.R.* 2, iii. 890, after Rāshid), but in the beginning of the sixteenth century von Hammer gives the number 300 for the total. The Porte needed sometimes to lay stress on the importance of the office to make them acceptable as extraordinary envoys by foreign governments (*G.O.R.* 2, iii. 929, after Rāshid).

Among those who have occupied this rank was the well-known first Turkish printer İbrahim Mutafarrīka.

Although different explanations of the title *mutafarrīka* are given, the most probable interpretation is, that these functionaries were not given a special duty but formed originally a corps used for "different matters". This is still the use of the word in modern Turkish.

Bibliography: J. von Hammer, *Des osmanischen Reichs Staatsverwaltung und Staatsverwaltung*, Vienna 1815, ii. 55, 105; Ricaut, *Histoire de l'Etat Present de l'Empire Ottoman*, Paris 1670, p. 338. (J. H. KRAMERS)

AL-MUTAKABBIR. [See ALLĀH, II.]

MUTAKALLIM. [See KALĀM.]

MUTAKĀRIB, name of the fifteenth metre in Arabic prosody: it contains four feet to the hemistich. There are two 'arūḍ and six *ḡarib*:

	<i>fa'ūlun fa'ūlun fa'ūlun fa'ūlun</i>
	<i>fa'ūlun fa'ūlun fa'ūlun fa'ūlun</i>
	<i>fa'ūlun fa'ūlun fa'ūlun fa'ūlun</i>
1 st 'arūḍ	<i>fa'ūlun fa'ūlun fa'ūlun fa'ūlun</i>
	<i>fa'ūlun fa'ūlun fa'ūlun fa'ūlun</i>
	<i>fa'ūlun fa'ūlun fa'ūlun fa'ūlun</i>
	<i>fa'ūlun fa'ūlun fa'ūlun fa'ūlun</i>
	<i>fa'ūlun fa'ūlun fa'ūlun fa'ūlun</i>
	<i>fa'ūlun fa'ūlun fa'ūlun fa'ūlun</i>
2 nd 'arūḍ	<i>fa'ūlun fa'ūlun fa'ūlun fa'ūlun</i>
	<i>fa'ūlun fa'ūlun fa'ūlun fa'ūlun</i>
	<i>fa'ūlun fa'ūlun fa'ūlun fa'ūlun</i>

Outside of the *ḡarib*, the foot *fa'ūlun* often loses its *w* and becomes *fa'ān*; used as the first 'arūḍ, it further undergoes the following changes: *fa'ān* and (*fa'ān*) *fa'ān*. According to al-Kharrī, the foot which precedes the *ḡarib* cannot suffer any change. The first foot of the first hemistich of the first line of a piece of verse may become (*fa'ān*) *fa'ān* and (*fa'ān*) *fa'ān*. (MOT. DES CHIFFRES)

MUTAKĀWIS, term in prosody; cf. the art. *ḲAFIYA*.

MUTAMAD KHAN, MUHAMMAD SPARLY, WAS born in an obscure family in Persia, but coming to India, he attained high honours in the reigns of Djalāngir and Shāh Jihān. He received in the third year of Djalāngir a military command and the title of Mutamad Khān (the trustworthy Lord). Subsequently he joined prince Shāh Jihān in his campaign in the Deccan as a *babāshī* (paymaster). On his return to court, in the 17th year of Djalāngir's reign, he was entrusted with the duty of writing the Emperor's memoirs. He attained a higher rank in the service of Shāh Jihān and was appointed *amir babāshī* (adjutant-general) in the 10th year of the new reign. He died in (1639) (1639). He is the author of a history called *Ḥis̄t Nāmā Djalāngiri*, in three volumes: 1, the history of Akbar's ancestors; 2, Akbar's reign (MSS. in the India Office Library and in the Bankipore Library); 3, the reign of Djalāngir (printed in the *Bibliotheca Indica*, Calcutta 1865 and in Lucknow, A. H. 1286).

Bibliography: *Muṭṭah al-Umarā*, iii. 431; *Tauṣiṭ Djalāngiri*, p. 352; *J. N. A. S.*, N. S., iii. 459; Elliot-Dowson, *History of India*, vi. 400; Rien, *Cat. Br. Museum*, i. 255; Ethé, *Cat. of the India Office Library*, p. 121 and Morley, *Catalogue*, p. 120.

(M. HIDAYET HOSSAIN)

AL-MUTAMID 'ALA 'LLĀH, AMIR 'L-ABREX AHMAD & **DJA'FAR**, 'ABBĀSID caliph, son of al-Mutawakkil and a slave-girl named Fīyān from Kūfa. He ascended the throne on the deposition of al-Muḥtadī in Rādīyah 256 (June 870). He had no ability as a ruler, but relied on the vizier 'Ubayd Allāh b. Yahyā b. Khāṣṣān and left most of the affairs of government in the hands of his brother Abī Ahmad al-Muwaffaq. In Shawwāl 261 (July 875) he designated his son Dja'far al-Mufawwid as his successor and governor of the western provinces and al-Muwaffaq as his successor and governor of the east. The able al-Muwaffaq soon became the real ruler and gradually restored order in the empire again while the caliph himself exercised no influence. Already in the reign of al-Muḥtadī a dangerous rising had broken out among the Zaidī negro slaves in the lower Euphrates valley, but it was not till 270 (883) that its leader 'Alī b. Muḥammad [q. v.] was conquered by al-Muwaffaq. Some time after the accession of al-Mutamid — according to the usual statement in 259 (873) — the dynasty of the Tūhirids was overthrown by Ya'qūb b. al-Lath [q. v.] and soon afterwards the Sāmānids appeared in Transoxania. On the death of Ya'qūb in 265 (879) his brother 'Amr [q. v.] submitted to the caliph and received the eastern provinces as a fief. About the same time Ahmad b. Tūlūn [q. v.] made himself independent in Egypt and after his death (270 = 884) his son Khumārāwān waged a desperate struggle against the 'Abbāsid caliphate. In al-Mawwāl and the surrounding country the Khāridīs continued their destructive career, but were finally subdued. Peace was also often disturbed by 'Alid rebels and there was also the war with the Byzantines. The Paulicians who had stood by the Muslims faithfully were repeatedly defeated by the emperor Basil and in 263 (876) the latter retook the fortress of Lu'lu'a near Tarsus which al-Mutamid had taken. It was not till 270 (883) that the Muslims were able to inflict a complete defeat on the Byzantines. The war was however continued. After the death

of al-Muwaffaq in 278 (891) the caliph had to proclaim the latter's son al-Mutamid [q. v.] as his successor instead of Dja'far al-Mufawwid. In the following year al-Mutamid left Samarra and moved the capital to Baghdad again. Here he died in Rādīyah 279 (Oct. 892) at the age of 48 or 50. According to some he was poisoned by al-Mutamid.

(K. V. ZETTERSTEN)

AL-MUTAMID 'ALA 'LLĀH, the *ṣaḥāb* by which the third and last member of the dynasty of the 'Abbāsidīs [q. v.] of Seville in the 10th century is best known; his real name was MUHAMMAD b. 'ABBĀD AL-MUTAMID [q. v.] b. MUHAMMAD b. IMĀD b. 'ABBĀD. While still a boy — barely 13, having been born in 431 (1040) — he was placed by his father in nominal command of an expedition against Silves (Ar. *Shilb* [q. v.]), then in the possession of Ibn Muzān, and this town was taken by assault as was Santa Maria d'Algarve soon after (Ar. *Shanmariyat al-Gharb*, now Faro [q. v.]) which was held by Muhammad b. Sa'īd Ibn Hārūn [q. v.] (444 = 1052). The young 'Abbāsid prince was then appointed by his father governor of these two towns. His elder brother Imād having been executed in punishment for his rebellion (455 = 1063; cf. AL-MUTAMID), Muhammad al-Mutamid became heir-presumptive to the throne of Seville. A little later, the army which he was leading to the help of the Arabs of Málaga, who had rebelled against the tyranny of Balaḥ b. Ḥabbās, the Berber ruler of Granada of the Zīrid [q. v.] dynasty, was routed by the latter and al-Mutamid had to take refuge in Ronda [q. v.] to which his father, at first very angry at his failure, finally sent him his forgiveness. When the powerful ruler of Seville died in 461 (1069), his son succeeded to a considerably extended kingdom which included the greater part of the southwest of the Iberian peninsula.

A whole series of more or less romantic episodes is associated with the reign and life of al-Mutamid. If we may believe several authors of the Muslim west, an individual called Ibn 'Ammār, vizier and poet, exerted a very considerable influence during the greater part of the career of this prince from his governorship of Silves. Al-Mutamid's relations with a young slave girl al-Rumaykya, gifted with considerable poetic talent, has also been the subject of much literary embellishment. It was from the surname of this young woman *l'umayd*, that al-Mutamid is said to have adopted his which comes from the same root. She became his favourite wife and presented him with several sons. As to Ibn 'Ammār, exiled by al-Mutamid, he was recalled on the accession of his patron to Seville from which he went at his own request

to be governor of Silves before being appointed grand vizier.

In the second year of his reign, al-Mu'tamid was able to annex to his kingdom the principality of Cordova [q. v.], over which the Dshwarids had been ruling, in spite of the efforts of the king of Toledo, al-Ma'mun [q. v.]. The young prince 'Abd al-'Aziz was appointed governor of the old capital of the Umayyads. But at the instigation of the king of Toledo, an adventurer named Ibn 'Ukasha was able in 468 (1075) to take Cordova by surprise and put to death the young 'Abd al-'Aziz prince and his general Muhammad b. Martin. Al-Ma'mun took possession of the town where he died six months later. Al-Mu'tamid whose paternal affection had been wounded and pride insulted tried for three years vainly to reconquer Cordova. He was not successful until 471 (1078); Ibn 'Ukasha was put to death and the part of the kingdom of Toledo between the Guadalquivir and the Guadiana conquered by the armies of Seville. Nevertheless at this time it took all the skill of the vizier Ibn 'Ammar to conclude peace by paying double tribute with Alfonso VI of Castile when he sent an expedition against Seville.

This was just the time when through the energy and tenacity of the Christian princes taking advantage of the feuds which were setting the Muslim rulers of the *taifas* against one another, the *reconquista*, which had received a check and then a setback from the last Umayyads, resumed its advance on the south of the Peninsula. In spite of their successes, of which the Muslim chroniclers make a great deal, it must not be forgotten that by the middle of the 5th (11th) century, many Muslim dynasties of Spain were being forced to seek on payment of heavy tribute the temporary neutrality of their Christian neighbours. Shortly before the taking of Toledo, which had far-reaching effects, by Alfonso VI in 478 (1085), al-Mu'tamid began to be involved in serious difficulties. On the imprudent advice of his vizier Ibn 'Ammar, al-Mu'tamid tried to add to his kingdom, after the principality of Cordova, that of Murcia [q. v.], which was ruled by a prince of Arab origin, Muhammad b. Ahmad Ibn Tahir. In 471 (1078), Ibn 'Ammar went to the Count of Barcelona, Ramon Berenguer II, and asked him for assistance to conquer Murcia in return for a payment of 10,000 dinars; until this sum was paid al-Rashid, a son of al-Mu'tamid, was to remain as hostage. After animated negotiations which ended in the payment of a sum three times as large to the Count of Barcelona, Ibn 'Ammar resumed his plan of conquering Murcia and soon succeeded in doing so with the help of the lord of the castle of Bilibi (now Vilches), Ibn Rashid. In Murcia however, Ibn 'Ammar soon rendered himself obnoxious to his master by assuming the attitude of an independent ruler and on al-Mu'tamid's reproaching him he replied by insults to the king of Seville, his wife and his sons. Betrayed by Ibn Rashid, he had to take refuge in Murcia and then successively in Leon, Saragossa and Lerida. Returning to Saragossa, he endeavoured to assist its ruler al-Mu'tamin Ibn Hisham [cf. SARAGOSSA] on his expedition against Segura, but he was taken prisoner and handed over to al-Mu'tamid, who in spite of the bonds of friendship which had so long linked them together, slew him with his own hand.

In the meanwhile, Alfonso VI was no longer

concealing his designs on Toledo, the siege of which he began in 473 (1080). Two years later, when he sent a mission to enforce payment of the annual tribute due to him from al-Mu'tamid, its members were insulted and the Jewish treasurer Ibn Shalith who accompanied it was put to death because he had refused to accept debased money. He therefore invaded the kingdom of Seville, sacked the flourishing town of Aljarafe (Ar. al-Sharaf, q. v.), advanced through the district of Sidona (Ar. Shadhana, q. v.) as far as Tarifa [q. v.] where he uttered his celebrated remark expressing his pride at having reached the utmost limits of Spain.

The capture of Toledo by Alfonso VI dealt a serious blow to Islam in Spain. The king of Castile soon demanded of al-Mu'tamid that he should surrender those of his lands which had formed part of the kingdom of the Ibn 'Umayyads (a part of the modern provinces of Ciudad-Real and Cuenca). Throughout Muslim Spain, his demands which increased every day, made the position very serious. In spite of their reluctance, the Muslim rulers in Spain, led by al-Mu'tamid, were forced to seek the help of the Almoravid sultan Yusuf b. Tashfin [cf. ALMORAVIDS] who had just conquered the whole of Morocco in an irresistible advance. It was decided to send him an embassy consisting of the vizier Abd Bakr b. Zaidin and the *khadis* of Badajoz, Cordova and Granada. An agreement having been reached, not without difficulty, Yusuf b. Tashfin crossed the Straits of Gibraltar and on the 22nd Rabi' al-Awwal 479 (Oct. 23, 1085) inflicted on the Christian troops the disastrous defeat of Zalaka [q. v.] not far from Badajoz. We need not recall here how Yusuf b. Tashfin recalled to Africa, could not follow up his victory as the Muslim rulers of Spain had hoped, who through the influence exercised by the Spanish *fakhirs* on the Almoravid, soon lost all prestige in his eyes. After his departure the Christians began again to harass Muslim lands, to such an extent that al-Mu'tamid had this time to go in person to Yusuf b. Tashfin in Morocco to ask him to cross the Straits once more with his troops. Yusuf consented and landed at Algeiras in the following spring (482 = 1090). He laid siege to the fortress of Alcazar but without taking it; then stimulated by popular feeling and the advice of the *fakhirs*, he came to the conclusion that it would be more advantageous for him to wage the *ghihad* in Spain on his own account and proceeded to dethrone and dispossess the princes who had sought his intervention. With this object he sent an army to invade the kingdom of Seville under Sur b. Abd Bakr, who at the end of 1090 took Tarifa, then Cordova where one of al-Mu'tamid's sons, Fath al-Mu'min, who was in command of it, was killed, Carmona, then Seville, which was captured in spite of a heroic sortie by al-Mu'tamid. The latter was taken prisoner by the Almoravid and sent with his wives and children first to Tangier, then to Meknes and a few months later to Aghmat [q. v.], near Marrakech. There he led a miserable existence for several years until his death at the age of 55 in 487 (1095).

The sad end of al-Mu'tamid touched all his biographers, who are particularly numerous and expatiate on his natural gifts, poetical talents, generosity and chivalrous spirit. He is one of the most representative types of the enlightened Spanish Muslims of the Middle Ages, patrons of letters

and scholarship, liberal and tolerant, but living in an atmosphere of luxury and ease little compatible with the care of a kingdom with frontiers open to envious neighbours on all sides. Not so great a ruler as his father al-Mu'tadid, al-Mu'tamid is however a much more attractive figure, perhaps just on account of his misfortunes. He is entitled to a place among the great figures of Spanish Islam, alongside of Abd al-Rahmān III, al-Hakam II, al-Mansūr b. Abi 'Amr and at a later date Lisān al-Dīn b. al-Khatīb.

Cf. also the long discussion of al-Mu'tamid by Dozy in Bk. IV of his *Histoire des Musulmans d'Espagne*, new ed., Leyden 1952, vol. iii.; A. González Palencia, *Historia de la España musulmana*, Barcelona 1929, p. 77 ff.; E. Lévi-Provençal, *Inscriptions arabes d'Espagne*, Leyden-Paris 1931; A. Prieto Vives, *Los reyes de califas* (mainly numismatic), Madrid 1926. — The life and touching end of al-Mu'tamid have just been put on the stage in Cairo. He is also discussed in numerous monographs — mostly at second hand — composed in recent years in the east (mainly in Egypt) on the Muslim past of Spain.

(E. LÉVI-PROVENÇAL.)

MUTAMMIM = **NUWAIRA**, a poet, contemporary with the Prophet. He was the brother of Malik b. Nuwaira (q.v.), chief of the Banū Yarbū', a large clan of the Banū Tamīm. Mutammim owes his fame to the elegies in which he lamented the tragic death of his brother Malik and these poems have made the latter's name immortal. The Arabs said there was nothing comparable to these elegies, overflowing with emotion. They regarded their author as the type of brotherly devotion.

Mutammim does not seem to have played any prominent part before the Hijra. He was eclipsed by the striking personality of his brother, to whose qualities he never hesitated to pay homage. He is represented as having been of unprepossessing appearance, one-eyed and short in stature. The Bakri chief al-Hawfān eulogized the humanity with which Mutammim treated him during his captivity. Falling in his turn into the hands of the Banū Taghlib, Mutammim was delivered by a stratagem devised by his brother. He seems to have adopted Islam at the same time as his brother. Like the latter, he is numbered among the "Companions" although we never find him in direct relations with the Prophet. He escaped from the disaster in which Malik was overwhelmed; a few fragments of other poems suggest he did not write elegies exclusively.

But after the death of Malik he devoted himself to celebrating his memory and demanding vengeance for his death. Refused by the Caliph Abū

Bakr, he thought he might have more success on the accession of 'Umar. He hurried to Madīna where he was very well received by 'Umar. The latter listened with delight to his elegies, regretted that he himself had not the gift of poetry so that he might worthily celebrate his brother Zaid who had fallen in the wars of al-Yamama, but he refused to reverse Abū Bakr's decision and limited himself to dismissing Khalid b. al-Walid, a step which probably owed something to the poetical exhortations of Mutammim.

After this, tradition says that the poet became almost blind through weeping, and that he wandered over the many routes of Arabia, uttering his complaints everywhere. He found himself abandoned by his wives who became tired of his incurable sadness and wandering life. He left two sons Liswād and Ibrāhīm, also poets. He survived 'Umar II, as Ibn Khallikān says (ed. Wüstenfeld, No. 792), he is really the author of an elegy on the death of this caliph.

(H. LAMMENS.)

AL-MUTANABBI, "he who professes to be a prophet", the surname by which the Arab poet ABU 'L-TAYYIB AHMAD b. AL-HURAYM AL-DUB'Ī is usually known (cf. in Ibn Khallikān, *Wafayāt* [Cairo 1310], I. 36, two genealogies, which do not agree, going back to his great-grandfather). Abū 'L-Tayyib was born in Kūfa in 303 (915) in the Kinda quarter whence the ethnic *al-Kindi* sometimes given him. His family in very humble circumstances claimed descent from the Yamani clan of the Dju'f and he himself all his life was convinced of the superiority of the Arabs of the south over those of the north (cf. al-Wāḥidī, *Sharḥ Dima' al-Mutanabbi*, ed. Dieterici, p. 48—49; al-Yazidī, *al-Uṣṣ al-tayyib*, p. 29 [these two works will be quoted as *Wah.* and *Yaz.*]). The boy received his early education in his native town and soon distinguished himself by his intelligence, his prodigious memory and his precocity as a poet. He now passed under Shi'i influences, perhaps Zaidi (cf. 'Abd al-Kādir al-Baghādī, *al-Iḥṣā*, i. 382, 22) which affected the development of his philosophy, a subject to which we shall return. Circumstances were however to accelerate the speed of Abū 'L-Tayyib's religious development. Towards the end of 312 (924), undoubtedly under pressure from the Ḥarmatians (q.v.) who had just taken and sacked Kūfa, Abū 'L-Tayyib and his family made a first stay of two years (cf. al-Sam'ānī, *Ansāb*, 306 ba; al-Badrī, *al-Shubḥ al-munib*, i. 67) in Samāwa, the region lying between the Sawad of Kūfa in the east and Palmyrene in the west. The Banū Kalb who led a nomadic life in these desert steppes had been much cultivated by the Ḥarmatians *dā'ira*. It is possible that the young poet at this time came into contact with some of these heretics. It is however not very probable,

in view of his youth, that this first contact had any definite effect upon him. On the other hand, this stay among the Beduins certainly gave Abu 'l-Taiyib that profound knowledge of the Arabic language of which he was later so very proud.

On returning to Kūfa, at the beginning of 325 (927), Abu 'l-Taiyib seems to have decided to devote himself entirely to poetry. At this time he most admired the great panegyrist of the preceding century, Abū Tammūz and al-Buhturī [q. v.]. Like them and like the majority of his contemporaries, he sees in poetry a sure means of attaining wealth and power. He at once attached himself to a certain Abū 'l-Faḍl, of Kūfa, to whom he dedicated a short piece (Wah., p. 17—21; Yāz., p. 10—11). Perhaps a convert to Karmatism, in any case a complete agnostic — the praises which he allows to be offered him show this —, this individual seems to have exercised a considerable influence on the religious and philosophical development of al-Mutanabbi (cf. also *Adhūm*, I, 382 below). Prepared by the Shi'a atmosphere in which he had passed his childhood and by the relations he had had with the Karmatians in Samāwa, Abū 'l-Taiyib in contact with this patron cast off religious dogmas which he regarded as spiritual instruments of oppression. He then adopted a staid and pessimistic philosophy, echoes of which are found throughout his work. The world is made up of seductions which death destroys (cf. Wah., p. 39, l. 8—13; p. 162, l. 12—13; Yāz., p. 23 and 97); stupidity and evil alone triumph there (cf. Wah., p. 161, l. 8—10; Yāz., p. 97); the Arabs — representatives of a superior race in his eyes — are overwhelmed in it by cowardly and barbarous foreigners (cf. Wah., p. 148, l. 1—5; p. 160, l. 2—6; Yāz., p. 87 and 96). In contact with this world with which he was out of harmony, the consciousness of his talent, which Abū 'l-Taiyib had developed rapidly; his vanity increased to a degree which is almost inconceivable (cf. Wah., p. 60; Yāz., p. 34). His Arab particularism, as with all anti-Shi'ites (cf. *Abū 'l-Taiyib*), incited him to attack foreign oppressors (Wah., p. 58, l. 30—34; Yāz., p. 33). This is why, by a contradiction from which he is hardly ever free, al-Mutanabbi covered all his life those riches and power which he scorned in his heart, while he stands out from the mass of his contemporaries by his rigid morality and austerity (cf. al-Badī, *op. cit.*, I, 78—81).

At first however, Abū 'l-Taiyib thought only of conquering the world by his poetic gifts, and to find a more favourable field for his activity he left Kūfa towards the end of 326 (928), probably as a result of the town being again sacked by the Karmatians. He was naturally attracted to Baghdad (cf. al-Badī, *op. cit.*, I, 82—83) and there became the panegyrist of a compatriot of his, Muḥammad b. 'Ubayd Allāh al-'Alawī (cf. Wah., p. 6—7; Yāz., p. 3—4). From there he went to Syria. For two years he led the life of a wandering troubadour of the period (cf. *Mez. Renaissance des Islams*, p. 256). It is impossible to follow him in his wanderings for his *Diwan*, our only guide, does not present his poems in a satisfactory chronological order. Some pieces of the period are addressed to Beduin chiefs of the region of Manbij [q. v.] (cf. Wah., p. 24—25, 38—39, 86—87; Yāz., p. 12—13, 22—23, 28—29); others are dedicated to men of letters of Tripoli (Wah., p. 88—89; Yāz., p. 19—20), al-Ladhikiya (Latakia)

(cf. Wah., p. 116—133; Yāz., p. 66—78). The poems of this period are hurriedly written and mediocre in quality, but traces of his real genius are already apparent. With the exception of a *marthiya* (lament) and some impromptu pieces they are all *hazaj* in neo-classical lines. The influence of Abū Tammūz and al-Buhturī preponderates.

In the course of this period of experiment, Abū 'l-Taiyib was irritated at not finding his merit recognised. Gradually he looks forward to his dreams of domination being realised by violence (cf. Wah., p. 138, l. 3—7; Yāz., p. 79). Finally he abandoned the work of a paid panegyrist and returning to al-Ladhikiya he began revolutionary propaganda, the nature of which has long been misunderstood. According to Oriental writers (al-Badī, *op. cit.*, I, 25—30; Ibn al-Anbārī, *Nashat al-'Alawī*, p. 309), Abū 'l-Taiyib proclaimed himself a prophet in al-Samāwa, was taken prisoner by Ikhshidid [q. v.] troops and then received his epithet of al-Mutanabbi, Kratschkowsky (*Mutanabbi i Abu 'l-A'la*, St. Petersburg 1909, p. 9—11) does justice to these traditions, without however taking full account of some clear allusions in the *Diwan*. The latter contains pieces which prove beyond all possible doubt that a rebellion was led by al-Mutanabbi (cf. Wah., p. 49—58, 86; Yāz., p. 28—33, 50). This rising, as usual at this period, must have been political as well as religious. The rising began in al-Ladhikiya and then extended to the western borders of Samāwa where the Banū Kalb constituted an element always ready to rebel. Without adhering to Karmatism, al-Mutanabbi exploited its principles which found only too ready an echo among the marauding Beduins (cf. Wah., p. 57, l. 22—23; Yāz., p. 32; allusion to the massacre of pilgrims by the Karmatians Abū Tāhir, in 317 = 930). The ambiguity of the utterances of the rebel, the opportunism of his doctrines and his conception of the infinite on Karmatian lines, may have caused some misunderstanding of his preaching, since at this time any agitator was regarded as a Karmatian. After some initial successes, al-Mutanabbi and his Beduins were defeated; he was captured and imprisoned at Hama (towards the end of 322 = 933). After a trial and two years' imprisonment (*Diwan*, Faris MS., No. 3002, fol. 16^v), Abū 'l-Taiyib was condemned to retract his errors and set free. From this adventure he gained only the epithet of al-Mutanabbi and the conviction that poetry alone would lead him to the realisation of his ambitious dreams.

The poems composed by Abū 'l-Taiyib immediately before and during his rebellion are distinguished by spontaneity of inspiration, by the liberty which the poet takes with poetic forms, by the vigour of the style, which has a much more personal character than in his first manner.

As soon as al-Mutanabbi had returned to his profession of panegyrist, he naturally resumed his wandering life (beginning of 325 = 937). For several years he led a precarious existence and had to be content to sing the praises of citizens and minor officials of Antioch, Damascus, Aleppo etc. who paid him very badly (cf. Wah., p. 93—106; Yāz., p. 51—53; Yāz., *Irshād*, v. 203). Little by little however, his fame grew. At the beginning of 328 (939), we find him becoming court poet to the emir Badr al-Sharhūnī (the Badr b. 'Ammār of the *Diwan*), governor of Damascus for the *ex-amic al-amara* Ibn Ra'īq [q. v.],

who had just taken possession of Syria. Of Arab origin, Badr was regarded by al-Mutanabbi as the Maecenas for whom he had been waiting so long. The panegyrics and occasional poems which are dedicated to this emir reveal a sincere admiration for him and possess a sustained inspiration (cf. Wāḥ., p. 206—245; Yāz., p. 132—163). These pieces and those that precede them, after Abu 'l-Taiyib's return to literature, constitute what might be called the third manner of the poet. With the exception of a poem on hunting in the style of Abū Nuwās [q. v.] (cf. Wāḥ., p. 201—202; Yāz., p. 128—129) and a number of impromptu poems of no particular interest, al-Mutanabbi wrote only *ḥamās* during this period. He would seem then to have returned to his first manner, if the work of this period did not show considerable progress in form.

The friendship between Badr and al-Mutanabbi lasted only about a year and a half and as a result of intrigues of jealous rivals (cf. Wāḥ., p. 253, lines 13—16; Yāz., p. 169), Abu 'l-Taiyib feeling no longer safe, sought refuge in the Syrian desert (cf. Wāḥ., p. 251—252; Yāz., p. 168—169). There the idea of rebelling again took possession of him (cf. Wāḥ., p. 253—254; Yāz., p. 170—171). Fortunately the departure of Badr for the 'Irāk enabled him to leave his hiding-place and resume his profession of panegyrist. He now sang the praises of several individuals of second rank (cf. Wāḥ., p. 107—108, 284—348; Yāz., p. 60—61, 194—241). Lastly he succeeded in establishing himself at the Ḥamdānīd court in Aleppo where he became the official poet of the emir Saif al-Dawla [q. v.] at the beginning of 337 (948).

From the literary point of view, the work of this period which runs roughly from the middle of 329 (940), date of the quarrel with Badr, to the beginning of 337 (948), marks his fourth manner, to which he remained faithful till his death. It is characterised by a compromise between the pure neo-classical tradition and a freer form which the poet had adopted in the poems of the period of his rebellion. Without rejecting the framework of the neo-classical *ḥamāsa*, he reduces the erotic prologue to a minimum, sometimes even replacing it by a philosophical and lyrical opening which breathes his dreams, disillusionments and angers.

Al-Mutanabbi stayed nine years with Saif al-Dawla. He was genuinely attached to this patron, who was in his eyes the personification of the ideal Arab chief, brave, magnanimous and generous. Saif al-Dawla in his turn recognised the worth of his panegyrist whom he overwhelmed with gifts and never treated with arrogance. Al-Mutanabbi accompanied him on his expeditions and on returning to Aleppo sang of his exploits against the Byzantines and the Beduins of the desert. In the brief intervals of leisure between the campaigns of the Ḥamdānīd, the poet shared in the leisure of the court of Aleppo, devoting himself to improvisation and writing panegyrics at occasion arose (cf. Wāḥ., p. 322—337; Yāz., p. 376—395) or laments (*marḥūm*) on the deaths of relatives of Saif al-Dawla (cf. Wāḥ., p. 388—389, 408—409, 577—578; Yāz., p. 271—272, 286—287, 427—428). The difficult character of al-Mutanabbi and the repute which he enjoyed did not fail to gain him implacable enemies. A few devoted friends like the poet al-Babbaghā [q. v.] tried, it is true, to defend him but their zeal could do nothing against

the enmity of the hostile group led by the famous Abū Firas [q. v.]. Saif al-Dawla at first paid no attention to the attacks made upon his favourite. When he grew wearied and his protection ceased, Abu 'l-Taiyib no longer felt his life safe, and secretly from Aleppo with all his family and sought refuge in Damascus (end of 346—957).

Eastern critics generally are agreed that the poems composed by al-Mutanabbi during his stay with Saif al-Dawla mark the highest point in his work. Although there is a certain degree of exaggeration in this, it is certain that the poet, while continuing his fourth manner, reveals in the highest degree the mastery which he had acquired in his art during this period. Much more than Abū Firas, with whom he is often contrasted, he was able to depict the glories of Saif al-Dawla's campaigns against the Byzantines. His verse, it is true, has not the charm of that of Abū Firas but it is fuller and more epic in style.

From Damascus, Abu 'l-Taiyib went to Egypt to al-Faṣṭāṭ [q. v.] where he obtained the patronage of the Ḥshshid Kāfir [q. v.]. Al-Mutanabbi's career now reveals the necessities to which poets in the fourth (tenth) century had to submit. Deprived of moral and material independence Abu 'l-Taiyib was forced to sing the praises of a patron for whom in his heart he felt only contempt. The panegyrics which he devoted to him lately conceal his regret at losing the favour of Saif al-Dawla. They are somewhat forced and contain points against Kāfir (cf. al-Badrī, *op. cit.*, I, 125—126). The poet perhaps only agreed to celebrate this patron because the latter had promised him the governorship of Ṣaydā (Sidon) (cf. *ibid.*, I, 115). When he saw that these promises were not being fulfilled, he tried to gain the favour of another Ḥshshid general, Abū Shaddād Faṭk (*ibid.*, I, 131—132), but the latter dying in 350 (960) and relations with Kāfir still being strained, al-Mutanabbi had once more to decide to fly. On the day of the feast of sacrifices of this year, after writing a satire on Kāfir, he left al-Faṣṭāṭ secretly and crossing Arabia after great trials (cf. al-Badrī, *op. cit.*, I, 139—140), he reached the 'Irāk, spent some time in Kūfa, then settled in Baghdād. He perhaps thought of attaching himself to the famous Buyid vizier al-Muḥallabī who had gathered a very brilliant court around him. He had however to abandon hope of this in face of the hostility to him evinced by poets and scholars established at the court of al-Muḥallabī, such as Ibn al-Ḥadīdīdī [q. v.] and Abū 'l-Faraj al-Iṣḥāqī, author of the *Kātib al-Aghāni*. During his stay here, as he had already begun to do in Egypt (cf. Ibn al-Farajī, *Tarīkh al-Andalus*, No. 453), al-Mutanabbi gave lectures in which he expounded to a group of friends the work he had done till that date (cf. Dhahabī, *Tarīkh al-Islām*, Paris, No. 1581, fol. 265^v). The year 353 (964) was spent in this fashion. The poet perhaps also visited Kūfa about this time (cf. F. Gabrieli, *Vita di al-Mutanabbi*, p. 60, note 4). At the beginning of 354 (965) in any case, he left the 'Irāk and went via al-Ahwāz to Arrādīn [q. v.] in Sūsiya where he received the patronage of the Buyid vizier Ibn al-'Amīd [q. v.]. Al-Mutanabbi devoted some panegyrics to him (cf. Wāḥ., p. 740—741; Yāz., p. 564—565), then he left him to go to Sūsiya in Fārs where he rejoined the Buyid Sultan 'Aḍud al-Dawla [q. v.] who had expressed a desire to have him at his court. After

addressing to the Buyid Sultan several panegyrics which are among his best work. Abu 'l-Tayyib left Shiraz for reasons not clearly known, perhaps simply out of nostalgia (cf. Wab., p. 766, line 1—3; Yāz., p. 389). He was returning by short stages from Persia to Baghdad when he was attacked by marauding Beduins near Dair al-Aḥḥā [q.v.] at the end of Ramaḥān 354 (Aug. 955). He and his son were killed in the fighting and all his baggage, including the autograph MSS. of his *Diwān*, was scattered (cf. al-Badrī, *op. cit.*, i. 227—239).

Even in his lifetime, al-Mutanabbi had been surrounded by ardent admirers who defended his work in its entirety against the attacks of detractors no less eager to run him down. Among the latter however, the majority only criticised him as a poet because they objected to his character as a man. The criticism was therefore not distinguished by impartiality and only reflects the opinions of a coterie. It required the death of Abu 'l-Tayyib to produce a third class of admirers who were more clear-sighted than the first and sufficiently impartial not to fall into the exaggerations of the second (cf. al-Djurdjani, *al-Waḥīd*, p. 11—12, 45—46). It was the opinion of this new category that prevailed and when Mutanabbi's contemporaries had all disappeared, the literary public remained decidedly favourable to Saif al-Dawla's bard (except al-'Askari [q.v.] and Ibn Khaldūn). From the fifth (eleventh) century the name of al-Mutanabbi became a synonym for "great poet". His literary influence became one of the most considerable ever exercised on Arabic poetry. Annotated by Ibn Djinnī [q.v.] and later by Abu 'l-'Alā' [q.v.], by al-Wāḥidī, al-Jahizī, al-Ukbarī and Ibn Sida [q.v.], to mention only the most eminent, the *Diwān* of Abu 'l-Tayyib throughout the middle ages and in modern times has been made accessible to scholars and literary men from Persia to Spain by learned men, often more zealous than intelligent. Space does not permit us to estimate what later poetry owes to al-Mutanabbi. We are content to point out that in different ways all Arab panegyrists have been influenced by Abu 'l-Tayyib. At the present day he is still one of the most read in North Africa, Syria and Egypt also hold him in very high esteem and many critics have devoted studies full of praise to him. It seems however that in the last named country al-Mutanabbi attracts at least as much by the boldness of his philosophy and the ardour of his pro-Arab feelings as by his purely literary qualities.

Bibliography: Numerous biographies of al-Mutanabbi have been written by eastern authors; only five of these contain original matter. These are: 1. 'Abd Allāh al-Iṣfahānī, *Ṭabaqāt al-Muḥṣilāt li-Sayr al-Mutanabbi*, in the *Khiṣṣat al-Adab* of 'Abd al-Qādir al-Baghdādī (Cairo 1299), i. 382—389; 2. al-Tha'libī, *Yatimat al-Dahr* (Damascus 1304), i. 78—162, *passim*; 3. al-Khaṭīb al-Baghdādī, *Tarīkh Baghdad* (Paris MS. No. 2129), fol. 105—106, reproduced in the *Nuḥat al-Aḥbāb* of Ibn al-Anbārī (Cairo 1294), p. 366—374 and in the *Amūd* of al-Sam'ānī (Leyden 1912), fol. 506b; 4. Ibn Khaldūn, *Wafayāt al-A'yān* (Cairo 1310), i. 36—38; 5. al-Badrī, *al-Sayr al-muḥṣilāt 'an Ḥaithiyat al-Mutanabbi* (on the margin of the commentary of al-Ukbarī on the *Diwān* of al-Mutanabbi, Cairo 1308), i. 5—245. — Al-Mutanabbi's work has been studied in the east, in addition to

commentators, by Abu 'l-Ḥasan al-Djurdjani, *al-Waḥīd* *lata al-Mutanabbi wa-Khawāṣṣih* (Saida 1336); by al-Tha'libī, *op. cit.*; by Diyā al-Dīn Ibn al-Aḥir, *al-Muḥall al-ḥāṣṣ* (Istanbul 1282). A list of commentators, but incomplete, is given in Ḥādījī Khalīfa, *Lixicon*, iii. 306—312. The most celebrated commentaries are those of al-Wāḥidī, *Mutanabbi carmina cum commentario Wahidii* (ed. Dieterici, Berlin 1861); of al-Ukbarī, *al-Tibyan fi Sharḥ al-Diwan* (Cairo 1308); Nāṣir al-Yāzī, *al-'Urf al-fayyūḥ fi Sharḥ Diwan Abi 'l-Tayyib* (Bairūt 1305). Orientalists have often studied the work of al-Mutanabbi either in parts or as a whole. Here we only give general studies: Rohlen, *Commentatio de Motenabbi* (Bonn 1824); Hammer-Purgstall, *Mutanabbi, der grösste arabische Dichter* (Vienna 1824); Brockelmann, *G.A.L.*, i. 87—88; Nicholson, *A Literary History of the Arabs* (London 1923), p. 304—313; F. Gabrieli, *La Vita di al-Mutanabbi* (R. S. O., ii.), 27—42; do., *Studi sulla poesia di al-Mutanabbi* (*Rendic. della Accad. ... dei Lincei*, 1927); do., *La Poesia di al-Mutanabbi* (*Giornali della Soc. asiat. italiana*, 1929), ii/1; R. Blachère, *Le Poète arabe al-Mutanabbi et l'Occident musulman* (R. E. J., 1929), p. 127 sq.; do., *Mutanabbi* (monograph in preparation). (R. BLACHÈRE)

ḤAFIYA.

MUTARRIZI, Abū 'l-Faṭṭaḥ Nāṣir b. 'Abd al-Sayyid b. Alī b. al-Mutarriz, grammarian, *adīb* and jurist, was born in Kh̲w̲ārizm in Radjab 338 (1144). He was a pupil of al-Mawwāḥ b. Ahmad known as Akḥab Kh̲w̲ārizm. As he was born in the same province and in the year in which al-Zamakhshari died, he was called Khalīfat al-Zamakhshari; al-Suyūṭī's assumption that he was a pupil of Zamakhshari was deduced from this epithet and is of course wrong. Al-Mutarriz was an adherent of the Mutazila. As a jurist of the Ḥanafī school he enjoyed particular prestige and his work *al-Muḥṣilāt* b. 'l-Lughā, a dictionary, arranged alphabetically, of terms used in tradition and of the legal terms of the jurists of the Ḥanafī school, was regarded by the scholars of this madhhab with the same respect as the *Ghorib al-Fikḥ* of al-Azhari by the Shāfi'is. For his son he compiled a lexicon of synonyms entitled *al-Ḥuṣṣ li-mā ḥawṣa taht al-Kinā*, which the latter was to study after he had learned the Qur'ān by heart. It is a kind of text-book giving a comprehensive survey of the subject. In al-Mutarriz's opinion the existing works on this subject were either too big or not full enough. The work deals only with "good and usual" words, omitting the "bad and unusual" ones. Modern and ancient linguistic usage are distinguished and verses often quoted in illustration. His *al-Muḥṣilāt* b. 'l-Naḥw, which deals with the grammar of the Arabic language, was also written for his son. It was much used by students and often commented upon. Super-commentaries were added to the commentaries; one of the latter was even translated into Turkish. Al-Mutarriz was also an expositor and prepared a commentary on the *Maḥāṣil* of Hariri. He also was a poet, among his efforts being a poem in which he set himself to use nothing but synonyms. In 601 (1204) he was in Baghdad where he had

disputations with the scholars of that city. In *Ummat* I of 610 (1213) he died in his native town.

MUTAŠARRIF. [See SANJUAQ.]

AL-MUTAŠIM (عَلِيّ بْن أَبِي إِسْحَاقَ مُحَمَّدًا), an Abbāsid caliph, born in 179 (795–796) or 180 (796–7), the son of Hārūn al-Rashīd and a slave-girl named Mārīda. In the reign of his brother al-Ma'mūn (q.v.) he took part in the fighting against the Byzantines in Asia Minor and received the governorship of Egypt. After the death of al-Ma'mūn in Rājāb 218 (Aug. 833) he ascended the throne and was soon afterwards acknowledged even by his nephew al-Abbās b. al-Ma'mūn (q.v.) whom the troops had proclaimed caliph and the army also then paid him homage. An Abbāsid pretender, Muḥammad b. al-Kāsim, was disposed of by the governor of Khurāsān 'Abd Allāh b. Tāhir (q.v.). After concluding a truce with the Byzantine emperor Theophilus, al-Mutašim sent an army commanded by the Arab general 'Uḡayf b. 'Aḡḡab against the Zang (q.v.) who had migrated from India in the Sāsānian period and settled in the swamps between Baṣra and Wāsiṭ. They had been frequently used in their wars by the Muslims. After the death of al-Ma'mūn however, they began to ravage and lay waste the country round as if it were hostile territory. They submitted after seven months' fighting at the turn of the year 219–220 (834–835) and in Muḥarram 220 (Jan. 835) they were brought in ships to Baghdad and banished by al-Mutašim to 'Ain Zarḥa (q.v.). In the same year he appointed Ḥaidar b. Ka'us, usually called al-Aḡḡāh (q.v.), commander-in-chief in the war against Bābak (q.v.), but it was only after two years that he was victorious. The intolerance of the caliph against all those who would not share the opinions of the Muṭawila made him unpopular with the people and in addition there was the dissatisfaction of the citizens of the capital with the undisciplined Berbers and Turkish mercenaries whom al-Mutašim took into his service. At the end of 220 (835) he therefore resolved to move his residence to a smaller place. While his son Hārūn al-Waṣīf remained in Baghdad as governor, the caliph established himself first on the al-Kāṣāl canal and then in Sāmarrā three days' journey up the river. Here in the course of the year 221 (836) there arose a splendid palace with numerous buildings for the troops (cf. the art. *BAḤDĀD*). Very soon afterwards the war with the Byzantines blazed up again. The emperor Theophilus invaded Muslim territory on the Upper Tigris, captured Zābāṭa and wrought tremendous havoc in northern Syria and Mesopotamia. In *Ummat* I 223 (April 838) al-Mutašim himself took the field, accompanied by his ablest generals. The huge force advanced in three columns: the eastern army was commanded by al-Aḡḡāh, the two divisions of the western one by al-Mutašim and Aḡḡāh. Al-Aḡḡāh very soon put the emperor to flight and in Shawwāl (Sept.) of the same year

Amorium after 55 days' siege passed through treachery into the hands of the caliph who had the town destroyed. But the victory had no permanent results. As winter was coming on, al-Mutašim had to retire, particularly as a conspiracy in favour of his nephew al-Abbās b. al-Ma'mūn (q.v.) demanded urgent measures. About the same time the ispaḥbad of Tabaristān Māziyār b. Kārin rebelled, but the rising was suppressed by 'Alid Allāh b. Tāhir (q.v.). In 226 (840–841) or 227 troubles again broke out in Fārsistān where the Umayyads still had many supporters. The leader, Abū Ḥarīr al-Mubārka', claimed to be a descendant of the Umayyads and everywhere preached rebellion against the caliph until Rādjā b. Ayyūb al-Ḥidāri, whom al-Mutašim sent against him, took him prisoner and brought him to Sāmarrā. Al-Mutašim died on 18th Rādjā 227 (Jan. 5 842) in Sāmarrā. By favouring the Turks and suppressing the Arab element he hastened the decline of the Abbāsid empire. Unlike al-Ma'mūn, he was comparatively uneducated. That learning was not allowed to fall into oblivion in his reign is rather due to the chief kadi Ahmad b. Abī Du'ād (q.v.).

(K. V. ZETTERSTEIN)

AL-MUTAŠIM, MUḤAMMAD b. MA'N b. MUḤAMMAD (عَلِيّ بْن مُحَمَّدٍ ابْنِ تُوغْلُك), second ruler of the dynasty of Indjibids (q.v.) of the kingdom of Almería (q.v.), reigned from 443 to 484 (1051–1091). Gifted like his contemporary al-Mutamīd (q.v.) of Seville with a certain amount of poetic talent, he made his capital during his long reign one of the great centres of culture in the Peninsula. But like the other *amīr al-ḡḡāḡ* of Spain, he was for the most of his time at war with one or other of his neighbours. He was without doubt implicated in the conspiracy fomented by the Jew Yūsuf against his master Bādīs, king of Granada (cf. *MUḤAD*). Later his forces took part with those of Yūsuf b. Iḡḡḡāh in the famous battle of Zallāḡa (q.v.). Like the other Muslim rulers of Spain he felt in the following years the weight of the Almoravid sultan's arm. After unsuccessfully besieging the fortress of Aland and inciting Yūsuf to act harshly against al-Mutamīd, whom he hated personally, he realised on his death-bed that his capital would be besieged by the Almoravids as Seville had been. This is why he advised his son and successor Ahmad Mu'izz al-Dawla to seek an asylum with the lords of

Bougie [q. v.]. Almeria was taken very soon afterwards by the Almoravids.

LÉVI-PROVENÇAL.)

AL-MUTAWAKKIL ʿALA ʿLLĀH, ABU ʿL-FATĤ. DĪʾFĀR b. MUHAMMAD, an ʿAbbāsīd Caliph, born in Shawwāl 206 (Feb.-March 822), son of the caliph al-Muʿtāsim and a slave-girl from Kh̲wārizm named Shadīḡ. He ascended the throne in Dhu ʿl-Hijja 232 (Aug. 847) on the death of his brother al-Wathīq. His old opponent, the vizier Ibn al-Zayyāt, soon fell a victim to the cruelty of the new caliph and a similar fate befell the Turkish general ʿIṣḡh, although the latter along with Waṣīf had helped him to the throne. The caliph dreaded his influence and had him thrown into prison where he died of thirst (Djūmādā II 235 = Dec. 849-Jan. 850). From the religious point of view al-Mutawakkil was thoroughly orthodox. Soon after his accession he forbade any disputation about the K̲urʾān. Those who had been arrested because they would not recognize the teachings of the Muʿtazila were released and in 235 (849-850) he revived and intensified the regulations for special dress for Jews and Christians which went back to the caliph ʿUmar. The synagogues and churches recently built in Baghdad were taken down and the Muʿtazili chief kādī Aḥmad b. Abī Dīʾād [q. v.] with his sons dismissed and the office of chief kādī given to the Sunnī Yahyā b. Akṭham. The ʿAlids also fell under his ban. In 236 (850-851) he had the mausoleum of al-Ḥusayn in Kerbela destroyed and pilgrimage to this place forbidden. The provinces were frequently ravaged by rebels and foreign foes. In Adharbiḍjān in 234 (848-849) Muḥammad b. al-Baʿṭh rebelled; he had earlier been taken prisoner and brought to Sāmarrā but had escaped; he established himself in the strong town of Marand. The caliph's troops could do nothing against him until Bogha al-Sharīḡ [q. v.] took command. After a long siege the latter offered him a pardon; but when Ibn al-Baʿṭh tried to escape he was seized and brought to Sāmarrā, where he soon died in prison. When al-Mutawakkil attempted to treat semi-independent Armenia like a conquered province, a dangerous rising broke out there in 237 (851-852), which was suppressed in the following year, but only with difficulty, by Bogha al-Kābir. About the same time (238), the Byzantines landed in Egypt and plundered Damietta and in Asia Minor the war went on in the traditional fashion against the Byzantines. When the Paulician sect was persecuted by the empress Theodora they went over to the Muslims in masses. The Byzantines, however, succeeded in taking many prisoners. Those who would not become converted were massacred; but when al-Mutawakkil who had moved his residence in Suḡar 244 (May-June 858) to Damascus but left it after only two months, sent Bogha with the Turkish cavalry against the Byzantines, the fortune of war turned. Bogha fought with success against the enemy and in the following year the

emperor Michael himself was defeated at Samosata. In 246 (860-861) the Muslim generals took a considerable number of prisoners; but no permanent change in the situation was produced. In Syria also trouble broke out. Two governors in succession were driven out of Hims and only with the help of the troops from Damascus and al-Ramla was order restored (241 = 855-856). About the same time al-Mutawakkil sent an army under command of Muḥammad b. ʿAbd Allāh al-Kaṣmī against the rebel Beḡlā. The latter were completely defeated but their leader ʿAlī Bāḡā was pardoned. In the reign of al-Mutawakkil the dynasty of the Ṣaffarids [q. v.] was established in Sijḡstān. To keep the people of Baghdad in check, he sent for the governor of Khurāsān, Muḥammad b. ʿAbd Allāh b. Ṭāhir [q. v.], and when the turbulent praetorians made trouble he built a new residence at Dīʾfariya in 245 (859-860) outside of Sāmarrā, which swallowed up enormous sums. Poets and scholars were rewarded with princely munificence by this caliph. The extravagance, capriciousness and cruelty of the caliph, however, made him hated, and finally he quarrelled with the commander of the Turkish bodyguard. In Dhu ʿl-Hijja 235 (July 850) he had arranged that his eldest son Muḥammad al-Muntasir should succeed him and the two other sons Abū ʿAbd Allāh al-Muʿtazz and Ibrahim al-Muʿtāyad were each to receive a governorship with a claim to the throne after al-Muntasir. He began to favour al-Muʿtazz; however, and thus aroused al-Muntasir's discontent. The latter conspired with a few others of the same sentiments and in Shawwāl 247 (Dec. 861) al-Mutawakkil was murdered [s. AL-FATĤ b. KĪẖĀṢN].

(K. V. ZETTERSTERN)

MUTAWÄTIR (A.), part. act. vi. from *wa-t-r*, "that which comes successively". It is used as a technical term in two senses:

a. In the theory of cognition it is applied to historical knowledge (*ḥikāma*), if the latter is generally acknowledged; e.g. the knowledge that there is a city called Makka and that there has existed a king called Alexander.

Definitions of the term show slight differences. According to al-Djurdjānī knowledge is mutawātir, when it is supplied by so many persons that either their number or their trustworthiness excludes doubt of its truth (*Taʿrīfāt*, ed. Fliegel, p. 210; cf. Sprenger, *Dictionary of Technical Terms*, p. 1471).

According to Abū Ḥafṣ ʿUmar al-Nasafī († 537 = 1142) reports are mutawātir when handed down without deviation by persons who cannot be supposed to have plotted a lie. Taḥāzūl in his

commentary (p. 33 sq.) mentions two objections. The first is, that Jews and Christians accept as mutawātir reports that are rejected by Muslims. To this objection Tafāṣṣil simply replies that the possibility that these reports should be mutawātir, is excluded. The second objection is, that the reports of every single reporter (shāhid, q. v.) represent an opinion only and that an accumulation of opinions cannot be said to afford certainty. To this Tafāṣṣil replies that often plurality has a power of which singleness is devoid, e.g. a cord made of hair.

For the place of this source of knowledge within the theory of cognition, cf. the *Supplement*, s. v. 'ILM.

6. In prosody the term is applied to the rhyme in which one moving letter intervenes between the quiescents.

MUTAWWIF, Meccan pilgrims' guide. The word literally means one who leads the *ṭawāf* [q. v.]. The task of the *mutawwif* is however by no means limited to assisting pilgrims from foreign lands, who entrust themselves to their guidance, to go through the ceremonies required at the circumambulation of the Ka'ba. On the contrary they act as guides at the *ṣafā* also and at all other ceremonies which are prescribed or only recommended for the *ḥājj* or *umra* [q. v.]. The *mutawwif* also cater very completely for the physical welfare of the pilgrims. As soon as the pilgrims arrive in Ḥidda, their agents are ready on the arrival of the steamers to provide all the services they require from disembarkment to departure for Mecca. In Mecca the *mutawwif* or members of their families and servants take charge of the pilgrims. During the whole of their stay they provide the pilgrims with lodging, service, food, purchases (necessary and unnecessary), attend them if they fall ill and in case of death take charge of what they leave behind them.

The *mutawwif* of course do not do all this for nothing. They are appropriately paid for their trouble and see that, if the pilgrim is rich, their friends and relations also make something out of him. Of the money which they themselves receive, they have to hand over a considerable part in the form of fees, presents etc. to the shāikh of the gild and to the treasury. — another reason for getting as much as possible out of those entrusted to their care. It is therefore no wonder that many pilgrims have complained bitterly about the covetousness of these particularly prominent representatives of the Meccan pilgrim industry. Recently the fees for guides have been fixed by a legal enactment of the Ḥijāz government (*O. M.*, xii [1932], 249).

Reference has already been made to the fact that the *mutawwif* are organised in gilds; they

are divided up into separate groups who sometimes have the right to exploit the pilgrims from a definite area only (e.g. Lower Egypt). All these groups together form the gild with a chief shāikh officially recognised at their head. The gild is also very exclusive. "Wild" (i.e. independent) guides (*ḥarrār*) have to be content with the scanty pickings left over for them by the organised *mutawwif*.

(R. PARET)

AL-MUTĀZILA is the name of the great theological school which created the speculative dogmatics of Islām. The meaning of the name is clear from al-Mas'ūdī, *Murūj*, vi. 22: the *Mutāzilīs* are those who profess the doctrine of *ʿtād*, i.e. the doctrine of the *manzila baina 'l-manzilatayn* or the state intermediate between belief and scepticism, the fundamental doctrine of the school (see below). A tradition which emanates from the *ahl al-ḥadīth* derives the name *Mutāzila* from a schism which took place in the circle of al-Ḥasan al-Baṣrī: after laying down their doctrine of the *manzila baina 'l-manzilatayn*, Wāṣil b. 'Aṭ' and 'Amr b. 'Ubalid are said to have separated (*ṭāzala*) from al-Ḥasan's circle to found an independent school or rather to have been expelled from it by the latter. These traditions are not entirely without historical foundation but the interpretation of the name deduced from them is certainly wrong. The *Mutāzilīs* were proud of their name, which they certainly would not have been if it had been a nickname invented by their enemies. We have here, as the variety of versions also shows, a tendentious invention of the *ahl al-sunna wa 'l-ḥadīth* anxious to rehabilitate al-Ḥasan and brand the *Mutāzilīs* as heretics.

Origins and political history. There are quite definite indications that the *Mutāzila* was of political origin and that it arose under the same constellation as the *Shi'ī* and *Khārījī* movements. The accession of 'Alī (Ibn 'l-ḥadīth 35) is the great watershed in the currents of the history of Islām. It is well known that several notable Companions of the Prophet refused to pay 'Alī the homage which he demanded or offered it reluctantly. The most frequently mentioned were Talha and al-Zubair but the names of many others have been preserved: Sa'd b. Abī Waḥḥā, 'Abd Allāh b. 'Omar, Muḥammad b. Maslama, Usama b. Zaid, Ṣahāb b. Sinān and Zaid b. Thābit (al-Ṭabarī, i. 3072). Of these Talha and al-Zubair openly rebelled against 'Alī but the majority remained neutral. The Medinese in general followed the example of the latter and in Baṣra al-Aḥnaf b. Ka'is with 6,000 Tamīmīs and a group of Azalis under Ṣahra b. Shalmān also stood aside from the quarrel (al-Ṭabarī, i. 3169, 3178). In

speaking of the latter the text uses the verb *ʿaṣaba*, which still has its proper sense of 'to separate from', but which is already on the way to become a political term meaning 'to take up a neutral attitude in the quarrel between 'Alī and his adversaries'. Now al-Nawbakhti mentions (*Kitāb Firaḡ al-Ḥaḡa*, ed. Ritter, p. 5) a party which on the accession of 'Alī separated and followed Sa'd b. Abī Waqqās, 'Abd Allāh b. 'Omar, Muḥammad b. Maṣlama and Usāma b. Zaid. 'These separated (*ʿaṣabū*) from 'Alī and refused either to fight against him or to take his side although they had paid homage to him and had received him favourably; they were called *al-Mu'tazila* and are the ancestors of all the later Mu'tazila'. The Mu'tazila as a theological school must therefore have been preceded by a political Mu'tazila, which determined its structure.

This hypothesis seems to be confirmed if we analyse carefully what is recorded of the founders of the theological school. According to a unanimous tradition, this school originated with two natives of Basra, Wāṣil b. 'Aṭā [q. v.] and 'Amr b. 'Ubaid [q. v.]. The period of their activity covers practically the reign of the caliph Hishām and his Umayyad successors, i.e. the years 105–131 (723–48). We have a good deal of quite early information about them, not always free from lacunae, but sufficient to enable us to grasp the leading ideas in their theological work (see *Bibl.*). It is clear from all these traditions that the doctrine of *ʿaṣā* formed the starting point for the creation of the school, that Wāṣil was the first to formulate it and that he later won over 'Amr to his teaching. This is how al-Kharrāṣī records the origin of the idea of *ʿaṣā*. Muslims were agreed that he who committed a grave sin deserved the name of *fāsiq* and of *fāḡir*, but opinions varied as to the character of the individual who received these epithets. The Kharrāṣī said he was an infidel. The Murjī said he was a believer in spite of his *fisq* and his *fudḡar*; al-Ḥasan al-Baṣrī and his circle described him as a hypocrite (*munāfiq*). Wāṣil demonstrates that the description given in the Qur'ān of a believer and an infidel cannot be applied to a believer who has committed a grave sin; the latter is therefore neither believer nor infidel. Now it is impossible to regard him as a hypocrite as al-Ḥasan wants to do, for a hypocrite must pass as a believer until his hypocrisy is brought to light. The only possible course then is to put the *fāsiq* in a special category of those who are in an intermediate state (*munāfiḡ bain al-Imānīlātīn*). These same ideas are found in the conversation by which Wāṣil is said to have won 'Amr over to the doctrine of *ʿaṣā* (al-Saliyid al-Murṭaḡā, *Amālī*, I, 114 sq. = Ibn al-Murṭaḡā, *al-Mu'tazilah*, p. 22 sq.; source probably al-Kharrāṣī).

There are political problems concealed behind these speculations. The doctrine of *munāfiḡ bain al-Imānīlātīn* is not the result of interest in pure speculation, but arose out of a clearly defined opinion on the individuals who took part in the quarrels that raged round the caliphate of 'Alī. It is striking how much space is occupied by the question of 'Alī, of Talḡa, of al-Zuhair and of 'Ā'isha in the rather scanty information which we possess regarding the theology of Wāṣil and 'Amr; we cannot doubt that here they were dealing with a central problem. Wāṣil and 'Amr took neither side in the dispute

(*Kitāb al-Intiqār*, p. 97–98). According to them, 'Alī, Talḡa, al-Zuhair and 'Ā'isha were originally true and pious believers. But the war which broke out among them divided them into two parties who could not both be right; one of these parties committed a sin but we do not know which. We must therefore leave their cause to Him who knows it but in their relations with one another we cannot regard them as true believers in the strict sense of the word. As a result if one of these individuals bears witness against another of the opposite party, we cannot accept this evidence; relatively to the one, the other is *fāsiq* and vice-versa (cf. also Baghdādī, *Kitāb al-Farḡ*, p. 100). If we may believe the *ahl al-hadīṡ*, 'Amr showed himself more severe than Wāṣil; he is said to have refused to accept the deposition made by any member of these parties against any member of the community on any matter whatever (*Ta'rikḡ Baghdādī*, xii, 178; al-Baghdādī, *Kitāb al-Farḡ*, p. 100); for he declared guilty (*fasiḡ*) *per se* both the parties engaged in the battle of the Camel. It is therefore not surprising that Wāṣil and 'Amr have sometimes been confused with the Kharrāṣīs (verse of Ishāḡ b. Suxaid al-'Adawī, *al-Djāḡī, Bayān*, I, 13).

However, the opinion of the leaders of the Mu'tazila on 'Alī is based on quite a different foundation. To understand the position correctly it is important to note that 1. Wāṣil and the whole Mu'tazila were definitely enemies of the Umayyads and that 2. Wāṣil adopted a somewhat ambiguous attitude regarding 'Othmān and his murderers (*Kitāb al-Intiqār*, p. 97–98). This tacitly implies a declaration in favour of the 'Alids, the first actors in the drama played at Mecca in the year 35. Indeed Wāṣil was on somewhat intimate terms with the 'Alids of Medina (Ibn al-Murṭaḡā, *al-Mu'tazilah*, p. 20); the Zaidiyya reveres him as one of their leaders, and Zaidi theology is essentially based on that of Wāṣil. This is true not only of the speculative theology; there is agreement also on political doctrines. The Zaidis do not say that the first caliphs Abū Bakr and 'Umar were usurpers as the extreme Shī'is do; Wāṣil and with him the whole Mu'tazila regards the caliphate of Abū Bakr as legitimate (commentary of Ibn al-Ḥadīd on *Nabḡ al-Balāḡā*, Cairo 1329, I, 3); he left undecided the question of knowing who had the superior claim, Abū Bakr, 'Umar or 'Alī, but he credited 'Alī with a superior claim to 'Othmān. This attitude, a little complicated as regards 'Alī, and therefore prudent towards the extreme Shī'is, at the same time unreservedly hostile to the Umayyads, can in my opinion only be interpreted in one way. All these apparently dissimilar lines converge on a common centre: the 'Abbasid movement. It is precisely Wāṣil's attitude which we must regard as characteristic of the partisans of the 'Abbasids. The latter regarding themselves as the true *ahl al-bait*, it was evidently in their interest to lower somewhat the preponderating position attributed to 'Alī by the extreme Shī'is in order themselves to profit by the prestige enjoyed by the family of the Prophet; but on the other hand, they had every reason not to cut the links with the Shī'is who were indispensable as allies to them. It is obvious that in these circumstances it was particularly important for them to win over the relatively moderate Zaidi faction to their cause. In a general

way, the teaching of Wāṣil on *al-manāṣila* can only be perfectly understood if we see in it the theoretical crystallisation of the political programme of the 'Abbāsids before their accession to power. Everything leads us to believe that the theology of Wāṣil and of the early Mu'tazila represents the official theology of the 'Abbāsid movement. This gives an unforced explanation of the fact that it was the official doctrine of the 'Abbāsid court for at least a century. It seems even probable that Wāṣil and his disciples took direct part in the 'Abbāsid propaganda. In his *fatāwa*, mentioned below Saḥwān al-Anṣārī tells us that Wāṣil had emissaries (*da'īs*) in all parts of the Muslim world. Saḥwān describes them as ardent believers and ascetics who were distinguished from other men in physiognomy and dress; they were the supports (*awṣiā*) of God in all lands and centres in which his commandments were made manifest and in which the art of disputation (with the enemies of the faith) flourished. The period of this activity coincides exactly with that of the most intense 'Abbāsid propaganda, in which all the forces working for the ruin of the Umayyads were co-operating; it is impossible not to believe there was a connection between the two. That Wāṣil did actually extend his propaganda very far to the west is proved by the fact that there existed long after the fall of the Umayyads a Wāṣilī community at Tāshert (Vākūt, i. 815) numbering about 3,000 members who had allied themselves with the 'Rāfiḍa. They had rebelled against Manṣūr under Jāḥs b. 'Abd Allāh al-Hasanī (al-Shahrastānī, p. 31; on these happenings see Ṭabarī, iii. 561); they were therefore reckoned among the enemies of the first 'Abbāsid caliph. It is interesting to note that the connection between Wāṣil and the Kharijīs, supposed by Ishāq b. Suwaid al-'Adawī to exist (see above) was here an actuality.

The quarrels of Wāṣil and his followers with Ḍjāḥm b. Ṣafwān (q. v.) form a difficult problem which has not yet been solved. On the one hand, Ḍjāḥm's theology left distinct traces on that of the Mu'tazila; the doctrine of the created Qur'ān which was later to become a fundamental Mu'tazila thesis was probably formulated by Ḍjāḥm and in the doctrine of the divine attributes there are coincidences on both sides which cannot be accidental. On the other hand, there are many serious differences which are probably practical and political in their nature. Ḍjāḥm professed in the most extreme form the doctrine of predestination (*qāḍi*). All the actions of man are involuntary. Wāṣil maintained the opposite thesis of free will. Now once again we have political problems hidden behind these theological controversies; the Umayyads in general preferred the dogma of predestination while the opposition accepted the dogma of free will in its widest interpretation; in Damascus, Ghailān al-Dimashqī, who figures among the fathers of the Mu'tazila (Ibn al-Murtazā, *al-Mu'tazila*, p. 15-17), was put to death by the caliph Hishām for holding the doctrine of free will (al-Ṭabarī, iii. 1733).

Once the hypothesis of a definite connection between the Mu'tazila and the 'Abbāsids is admitted, the question of the relations between the Mu'tazila founded by Wāṣil and the early Mu'tazila of the period of 'Alī presents itself in a new aspect. It will be admitted that there is a striking resemblance

between the attitude of these former companions of the Prophet and that of the 'Abbāsids. It is true that 'Abd Allāh b. al-'Abbās entered the service of 'Alī after the death of 'Othmān but his true sentiments were somewhat ambiguous; he was a great friend of 'Othmān but a rather lukewarm partisan of 'Alī and after the latter's death he placed himself at the service of the Umayyads. His descendants did not remain at Medina, probably because the 'Alids were their rivals there; after a stay in Damascus, his son went to Hama near Adhram and here a formal rapprochement took place in 98 between the 'Abbāsids and the 'Alids (Wellhausen, *Das arabisches Reich*, p. 312 sq.). Before this event, we may regard the 'Abbāsids as a kind of Mu'tazila in the old sense of the word.

With 'Amr b. 'Ubaid a new element enters the Mu'tazila as founded by Wāṣil. 'Amr originally was one of the *ahl al-hadīth*; brought up in the circle of al-Ḥasan al-Baṣrī, he transmitted a large number of ḥadīths from his master and he is remembered as one of the *muhaddithūn*. His conversion to the doctrine of *i'tisāl* brought about a rupture between him and these circles; but with him a considerable section of the Ḳadariyāt of the *ahl al-hadīth* joined the Mu'tazila, thus reinforcing the more politically inclined Ḳadariya, of which Wāṣil was the champion. *Ḳadari* and *mu'tazilī* were soon to become synonymous terms. 'Amr seems to have been decidedly anti-'Alid (see above), in any case he preferred 'Abd Bakr to 'Alī (Ibn Abi Ḥadīd on *Nahj al-Balāgha*, i. 3). This attitude implies a certain predilection for 'Othmān, which is foreign to Wāṣil; indeed, a section of the old Baṣra, among them al-Djāhī, is said to have belonged to the party called *al-'Othmāniya*. 'Amr's point of view was of great importance for the development of the Mu'tazila. After their final triumph, the 'Abbāsids immediately dissolved the alliance with the Shī'a, which had only been a political instrument for them. As regards the extreme Shī'a, the Rawāfiḍ, the Mu'tazila unreservedly followed the direction of their new masters; but it is fairly evident that some of them did not decide to break so abruptly with the moderate Shī'a. It resulted in a schism. One section remained faithful to the alliance with the moderate Shī'a; this section was later to form a special Mu'tazila school in Baghdad. But the Mu'tazila of Baṣra with 'Amr at their head seem to have attached themselves without protest to the 'Abbāsid cause. 'Amr even became the intimate friend of Manṣūr and so to speak his spiritual father. In the west, the Mu'tazila allied with the Kharijīs rebelled against the 'Abbāsids (see above).

Let us sum up the characteristic features of the Mu'tazila at the beginning of the 'Abbāsid period. The Mu'tazila was: 1. in general devoted to the cause of the 'Abbāsid caliphs, only a faction being opposed to them; 2. decidedly hostile to the extreme Shī'a, the Rāfiḍa; 3. hostile to the Ḍjahmiya, by which however it was a little influenced; 4. *Ḳadari* in reuniting several of the old factions of this name; 5. in serious disagreement with the *ahl al-hadīth*, who soon declared it heretical. This position had a decisive influence in determining the structure of the Mu'tazila theology. The beginnings of this theology go back to Wāṣil and 'Amr and are connected with the fight against the Rāfiḍa. The extreme Shī'is had quite early assimilated a good number of

non-Muslim beliefs; we need not doubt that Manichaeism played a part in them; in any case certain gnostic and dualist ideas had found a way into Islam through the intermediary of these Shi'is. These tendencies, very marked in Kufa, were also represented at Basra; in the house of an Azdi who was a *ṣūfī* or Buddhist, Wāḡil and 'Amr had frequent meetings with 'Abd al-Karīm b. Abi 'l-'Awḡā and Siliḥ b. 'Abd al-Kuddūs, who professed dualist doctrines (*al-ḥamawīya*; we should probably understand by this Manichaean views) and the poet Baḡhār b. Burd [q.v.] (*Kitāb al-Aghāni*, iii, 24). A serious schism broke up this curious *madīna*. This event decided the whole future of the Mu'tazila. Henceforth the fight against *ṣanāda* and *ḥamawīya* is a cardinal point in the programme of the Mu'tazila. Wāḡil himself composed a refutation of Manichaeism which al-Bihili (c. 300 A.H.) was still able to peruse (*al-Mu'tazila*, p. 21). But they also found themselves compelled to combat these heresies in a positive fashion; to the doctrine of fire professed by Baḡhār they offered a theology of earth, so to speak, a theology based on the natural philosophy of the time. The poems of Saḡwān al-Anṣārī (al-Dīḡhī, *Kitāb al-Bayān*, i, 16—19) afford us a specimen of this theology; here we have one of the fundamental documents for the history of Mu'tazila dogmatics. It is not yet clear whence came the philosophy put at the service of theology but its general character is apparent; it is the philosophy of the alchemists, physicists of late antiquity, a kind of *summa* of the scientific principles which seem to have been accepted everywhere in Asiatic Hellenism. Saḡwān perhaps gives us a hint as to the circles from which it came to the Mu'tazila, when he tells us that Baḡhār called Wāḡil and his friends *Daḡhānī*; this is in any case worth noting. In a general way those who handed on this natural philosophy seem to have been the school called *Dahriya* by Muslims. The Mu'tazila fought these Dahris with a vigour which reveals the dependence on this heretical philosophy of which they were conscious. The true founder of the dogmatic system of the Mu'tazila was Abu 'l-Hudhail Muḥammad b. al-Hudhail al-'Alīf [q.v.]. Abu 'l-Hudhail, his friends and pupils, continued on a large scale the polemic against Manichaeism, a polemic which is certainly not unconnected with the persecution begun by the 'Abbāsids against the open or secret adherents of this religion. On the other hand, he fought the Rāfida most vigorously, then represented by the very remarkable theologian Ḥiḡām b. al-Ḥakam [q.v.]; and it was through his disputes with the latter that he was led to study the books of the philosophers, which furnished him with a system of dogmatics, a little bold, but full of fertile new ideas. Alongside of him there was a crowd of important theologians at Basra: Mu'ammār, an independent mind whose ideas have not yet been sufficiently analysed; Ḥiḡām b. 'Amr al-Fuwaṣṣ and al-Asamm, adversaries of Abu 'l-Hudhail and several others. Among the pupils of Abu 'l-Hudhail mention must first be made of Ibrāhīm b. Sa'yār al-Naḡām [q.v.]. These theologians gave Mu'tazila dogmatics its essential character. This theology is: 1. apologetic; it aims at defending the revelation of the Prophet; as a result it is 2. strictly Qur'anic; the sacred book is the only source of the theological denomina-

tions (*asmā'*) and of the precepts of religion (*aḥkām*); it is 3. polemical; it vigorously invaded the domains of other religions and other Muslim parties to fight them on their own ground; it is 4. speculative; it has recourse to philosophical means to refute its adversaries and formulate its dogmas; consequently it is 5. Intellectualist: it envisages the problem of religion under the purely intellectual aspect. Nothing could then be less justifiable than to regard the Mu'tazila as philosophers, free thinkers or liberals. On the contrary, they are theologians of the strictest school; their ideal is dogmatic orthodoxy; philosophy for them is only an *ancilla fidei*; they are nothing less than tolerant. What they created was Muslim scholasticism.

Parallel to the school of Basra, a Mu'tazila school was founded in Baghād by Biḡr b. al-Mu'tamī (q.v.; d. 210 = 825—826). This school was pro-'Alid ('Alī preferable to Abū Bakr), and Biḡr was persecuted by Ḥārūn al-Rashīd. But under Ma'mūn (q.v.; 198—218 = 813—833), a decidedly pro-'Alid caliph, the school of Biḡr gained a preponderating influence mainly through the theologians Thumām b. Aḡrās (d. in 210 = 825—826) and Ibn Abi Du'ād (d. in 240 = 854—855). This school particularly attacked those who held the doctrine of the uncreated Qur'ān [q.v.]. This attack however had disastrous consequences for the Mu'tazila. Abandoned by the caliph al-Mutawakkil (232—247) who adopted the doctrine of the uncreated Qur'ān, it rapidly fell from its influential position and soon found itself surrounded by implacable enemies. In the second half of the third century, Ibn al-Rawandī, a partisan of the Baghād school, made a stir when he left the Mu'tazila for the most advanced Rāfida; a man of violent temperament, he criticised the Mu'tazila in a scathing way which did it much damage. Towards the end of the third century, the Karmatian movement came on the scene, reinforcing the extreme Rāfida and causing trouble in every secular and spiritual sphere. In the struggle against the Karmatians it is no longer the Mu'tazila who appear at the head of the defenders of orthodoxy but the *ahl al-ḥadīth*. In the year 300, al-Aḡarī broke with the Mu'tazila of Basra, of which he had been a convinced supporter, to introduce speculative dogmatics among the *ahl al-ḥadīth*, who were soon to give its character to Sunni theology.

Among the Mu'tazila theologians of the third century we may mention the following. At Basra the tradition of Abu 'l-Hudhail al-'Alīf was propagated by a flourishing school represented by Vūsuf b. 'Abd Allāh al-Shahḥām, Abū 'Alī al-Aswārī and others. 'Abd b. Sulaimān was the pupil of Ḥiḡām al-Fuwaṣṣ. Ibrāhīm b. Ismā'īl known as Ibn 'Ulāya (d. 218) was the pupil of al-Asamm. The school of al-Naḡām developed certain special doctrines which the later Mu'tazila rejected (Faḡl al-Hadāthi and Ahmad b. Ḥalī, *Kitāb al-Intiqār*, p. 222—223); but among the disciples of al-Naḡām we also find al-Dīḡhī [q.v.]. In the second half of the century, the most important Basra theologian was undoubtedly Abū 'Alī Muḥammad b. 'Abd al-Wahhāb al-Djabbā'ī [q.v.]. In Baghād we find in addition to the theologians already mentioned 'Isā b. Subāh al-Murdār, contemporary of Biḡr b. al-Mu'tamī; then 'the two Dja'far': Dja'far b. Mubashshir (d. 234) and Dja'far

b. Harb (d. 236), at a later date Muhammad b. Shaddad al-Mirza'i, Zurkân (d. in 278) and Abu 'l-Husain 'Abd al-Rahim b. Muhammad al-Khayyâ, the great authority on the history of the Mu'tazila (d. at the end of the century). On the Mu'tazila of Syria we are not well informed; and only a little better on that of Egypt. The first Mu'tazili here was Ibn 'Ulayya (cf. above) who had disputations with al-Sha'fi; with him Hafs al-Fard came to Cairo; this last represented the official theology in Cairo during the *miḥna* of al-Walīd. Hafs was declared a heretic by al-Khayyâ (*Kitāb al-Intiqāṣ*, p. 133—134). — In Spain the Mu'tazili teaching was disseminated by Abū Bakr Parāzī al-Kurtubī who had visited the east and studied there with al-Djāhiz; it was therefore al-Djāhizīya — at bottom al-Nazzāmiya — that was known in Spain; very soon the Mu'tazila seems to have become undistinguishable from the Bāṭiniya (Asin Palacios, *Ahenamarra y su escuela*, Madrid 1914, p. 21—22).

The fourth century saw the Shī'a flourishing and Abhāsid power disappearing; the favour of several Būyid governors now to some degree made good the loss of prestige which had been suffered by the Mu'tazila. The schools continued their work and the Mu'tazila spread to the east. At Baṣra, al-Djubbā'i had left a large number of disciples but his school was soon surpassed by that of his son Abū Hāshim [q. v.]; representatives of the latter were among others Abū 'Abd Allāh al-Husain b. 'Alī al-Baṣrī (d. 369); Abū 'l-Husain al-Aṣṣāḥ (Ahmad b. Yūsuf b. Ya'qūb) al-Tanūkhī (d. 377), a member of the well known al-Tanūkhī family; Abū Ishāq Ibrahim b. 'Atyāsh al-Baṣrī and his pupil the Kāfi 'Abd al-Djabbār b. Ahmad al-Hamadhāni. The latter, the most remarkable of the Baṣra theologians of the period, migrated in 360 to Ra'y where he founded an influential school and died in 415. In Baghdad the school of Abū Bakr Ahmad b. 'Alī al-Djishdī (d. in 320) dominated the whole century. A very celebrated Baghdadī, Abū 'l-Kāsim 'Abd Allāh b. Ahmad al-Balkhī al-Ka'bi, a pupil of al-Khayyā, founded a school at Naṣaf, where he died in 319; among his pupils we find al-Aḥdab Abū 'l-Ḥasan. We also find the Mu'tazila in Isfahān, where Abū Bakr Muhammad b. Ibrahim al-Zubairī of the school of Abū 'l-Hudhail had introduced Mu'tazila doctrines; at Kirmīn (school of Abū Hāshim), Gurgān, Nīshāpūr and in several other towns of Khurāsān. During the fifth century it was the theology of 'Abd al-Djāhiz which dominated at Baṣra; one of his pupils, Abū Muhammad al-Ḥasan b. Ahmad b. Mattawāhi, handed down the great work on dogmatics of his master, *al-Muḥit bi 'l-Taklīf*; another theologian, Abū Raḥmān Sa'īd b. Muhammad al-Nasābūrī (d. in 460), compiled a résumé of the questions disputed in the schools of Baṣra and Baghdad. Several theologians of Baghdad are known; some of them must have belonged to the Zaidīya and generally speaking the Baghdad school becomes more and more merged in the Zaidīya. The last great theologian of the Mu'tazila was al-Zamakhshārī [q. v.] (d. in 538) but the schools continued to exist long after him, especially in the east. It was probably the invasion of the Mongols that put an end to them; the Mu'tazila has however survived to our day in the Zaidīya.

It was not speculative dogmatics alone that

formed the subject of Mu'tazila activity. Their part in the history of the exegesis of the Qur'ān is a very considerable one; it was they who introduced the strictly grammatical method. There is a very close connection between them and the philological school of Baṣra, the representatives of which in general taught Mu'tazila doctrines (e.g. al-Asma'i). The exegetical works of the Mu'tazila, for the most part now lost, were utilised to a large extent by their adversaries, e.g. Fakhr al-Dīn al-Rāzī. — All questions of *fiqh* were vigorously discussed in the Mu'tazila schools; the influence of the Mu'tazila on the *uṣūl al-fiqh* and the *madhāhib* has still to be examined. — Lastly the science of *ḥadīth* certainly received various stimuli from the Mu'tazila criticism of the *ahl al-ḥadīth*.

Madhhab. Mu'tazila theology is summed up under five principles (*uṣūl*) or fundamental doctrines which one must accept in their integrity to be recognised as a Mu'tazili (al-Mas'ūdī, *Mu'ūḍ*, vi. 22). As these were probably in origin the principal points in the programme of Mu'tazili propaganda, these *uṣūl* later became a kind of framework of speculative dogmatics.

1. *Ahl al-tawḥīd*: the strictest profession of monotheism (against any kind of dualism); denial of all resemblance between Allāh and his creatures (against the anthropomorphisms of the *muhaddithūn* on the one hand and those of the Rāfida and Manichaeans on the other); the divine attributes recognised (against the Djahmīya) but deprived of their real existence: they are not entities added to the divine being (this would be *shirk*; against the *Ṣifariya* among the *ahl al-ḥadīth*) but identical with the being (Wāṣil, Abū 'l-Hudhail); allegorical interpretation of the anthropomorphisms of the Qur'ān; denial of the beatific vision; vigorous affirmation of a personal God and creator (against the Dabīriya); integral affirmation of the revelation of the Prophet but distinction between a natural theology and a revealed theology. Problems discussed here: t. The nature of God and his attributes: a. omnipresence: God is in all places, in the sense that he directs everything (Abū 'l-Hudhail; al-Djubbā'i) — he is not in any place (general thesis); b. perceptibility: he is not perceived by the senses (thesis generally adopted) — he is perceived by the heart (Abū 'l-Hudhail) — he has a hidden *ma'āniya* which will be perceived in another world with the help of a sixth sense which God will then create (Hafs al-Fard and others; thesis declared heretical); c. the attributes (eternal; names of the essence): identical with the essence (Abū 'l-Hudhail; thesis generally adopted) — inherent in the essence through *ma'āni* (Mu'ammār) — through *shams* (Abū Hāshim); expressing positive aspects (Abū 'l-Hudhail and generally) — negative (knowledge: negation of ignorance etc.; al-Nazzām). 2. The structure of the created world: a. starting-point anthropology treated in a positive way (exact definition of religious duties) and negative (refutation of *ghana'īya*): man is the empirical phenomenon which we see, the body (*ḡaym*) which is composed of a certain number of indivisible entities (atoms) and which supports the accidents: life, the senses, colours etc.; *nafs* is *ma'nā* and distinct from *rūh* (Abū 'l-Hudhail) — man is composed of body (*ḡadan*) and *rūh* (identical with *nafs*) which are mutually interpenetrant (*muḍāḡḡā*); the colours, senses, sensations, forms and spirits form different categories of *ḡawāḡib* (not

AL-MU'TAZZ BI 'LLĀH, ABU 'ABD ALLĀH MUHAMMAD (OF AL-ZUBAIR) B. DJĀFAR, AN 'ABBĀSID

caliph, son of al-Mutawakkil and a slave-girl named Kabiṣa. After al-Mu'tazil had been forced to abdicate, al-Mu'tazz was proclaimed caliph on 4th Muharram 252 (Jan. 25, 866). When he wanted to get rid of the two Turkish generals Waṣīf and Bogha the younger, they got wind of his intentions and went back to Sāmarrā. On the other hand, he succeeded in putting his brother and successor designate al-Mu'ayyad to death and throwing the third brother Abū Aḥmad into prison. In the following year Waṣīf was killed by the troops when they mutinied for their pay and he attempted to appease them. After the death in Dhu 'l-Ḥiḍja 253 (Nov. 867) of the governor Muhammad b. 'Abd Allāh [q. v.], trouble broke out in Baghdad and in the following year Bogha was murdered at the caliph's instigation. As the latter could not pay the troops they mutinied. Al-Mu'tazz applied to his mother who possessed immense wealth, but she refused to help him and at the end of Raddj 255 (July 869) the cruel and faithless caliph was deposed. He was put in a subterranean dungeon where he died of starvation in 3 days at the age of 24. In his reign the dynasty of the Tullunids was founded and Ya'qūb b. Laith [q. v.] was recognised as governor of Sijistān. The Kharrīdīn sacked al-Mawṣil and in Asia Minor the Muslims were defeated by the Byzantines. Cf. also the articles AL-MUTAWAKKIL, AL-MUSTAḤIR and AL-MUSTA'IN.

MUTHALLATH, also MUTHALLATHA, plur. always *muthallathāt*, triangle; it forms the first category of plane surfaces bounded by straight lines (*al-baḥā'if al-mumṣṣṭaba al-mustakimāt al-ḥuṣūf*) (cf. al-Khwarizmi, *Mafāḥīṣ*, p. 206). Following Euclid's *Elements*, i., *Prop.* 24-29, the Arab mathematicians classify triangles from two points of view: either according to the sides (*ḥil'*, pl. *aḥlā'*) into equilateral (*al-muthallath al-mutawāṣṭi 'l-aḥlā'*, in Euclid *τρίγωνον ἰσοσκελές*), isosceles (*al-muthallath al-mutawāṣṭi 'l-ḥil' ain*, *τρίγωνον ἰσοκέλευς*) and scalene (*al-muthallath al-muthallath al-aḥlā'*, *τρίγωνον σκαλενόν*), or according to the angles (*ḥil'*, pl. *ḥawāṣṣ*), into right-angled (*al-muthallath al-ḥā'im al-aḥlā'*, *τρίγωνον ὀρθόγωνον*), obtuse-angled (*al-muthallath al-munfarid al-aḥlā'*, *τρίγωνον ὀβηρωγόνον*) and acute-angled (*al-muthallath al-ḥā'id al-aḥlā'* [*ḥawāṣṣ*], *τρίγωνον ἄκρωγόνον*).

In the equilateral triangle the base is called *al-ḥā'idā*, the apex *al-ra's*, the sides *al-ḥil'ān* (see above), in the right-angled triangle the hypotenuse is called *al-ḥuṣf*, i. e. "diameter" (because the hypotenuse represents the diameter of the circle described around the right-angled triangle); for the two sides the term *al-ḥil'ān* is generally used.

Muṣṣṭabāt al-muthallathāt as a technical term

means trigonometry (cf. Dozy, *Supplément*, i. 163).

MUTHALLATHA (always with the feminine ending) is a technical term in astrology. Astrology divides the zodiacal circle (*minṣajha* [q. v.]) into four *muthallathā* (Gr. *τρίγωνοι*, Lat. *trigona*, *triquetra*), each of which includes three signs 120° apart. These "are situated together in the trigonal plane" (*mutḥallith*, Gr. *τρίγωνοι*, Lat. *aspectus trinus*); the word *mutḥallith* itself is frequently found as a synonym of *muthallatha* which comes from the same root (*ḥ-l-th*) (cf. Dozy, *op. cit.*, p. 162b).

In star nomenclature *Kawkab al-Muthallath* is the constellation of the (northern) Triangle (in Eratosthenes *Διαγώνιον*, in Ptolemy *Τρίγωνον*) which is adjoined in the east by Perseus in the north by Andromeda, in the west by Pegasus and in the south by Aries. According to Ptolemy (*Almagest*) and al-Sūfi (ed. Schjellerup, p. 123 ff.), it consists of three stars of the third magnitude and one of the fifth. The star at the apex (*a Trianguli*) is an astrolabe star and is called *Rā's al-Muthallath*. The latter name is found in *Libros del saber de astronomia del rey D. Alfonso X de Castilla* in the corrupted form "alcededes".

AL-MUTṬI [See ALLAH, II.]

AL-MUTṬI LI 'LLAH, ABU 'L-KĀMM AL-FAṢL, an 'Abbāsīd caliph, son of al-Muṭṭadīr [q. v.], brother of al-Rādī and of al-Muttaqī [q. v.]. Al-Muṭṭi was a bitter enemy of al-Mustakfi [q. v.] and therefore went into hiding on the latter's accession and after Mu'izz al-Dawla [q. v.] had become the real ruler, al-Muṭṭi is said to have taken refuge with him and incited him against al-Mustakfi. After the deposition of the latter in Djumādī II or Shabān 334 (Jan. or March 946) al-Muṭṭi was recognised as caliph. His reign marks a very unfortunate period in the history of the 'Abbāsids. The caliph himself had not the slightest authority; the power was in the hands of Mu'izz al-Dawla and after his death (356 = 967) in those of his son Bakhtiyār. The Fātimids were growing more and more powerful and the Sāmānids also declined to recognise al-Muṭṭi as the legitimate suzerain. The Hamdānids were weakened by their wars with the Būyids and the Fātimids. In Baghdād the Sunnis and Shī'is were fighting one another and several Shī'ī usages were introduced by the Būyids who had 'Alid sympathies. At last the weak and sickly caliph was forced by the Turks to abdicate in favour of his son 'Abd al-Kārim al-Tā'ī (13th Dhū 'l-Ka'da 363 = August 5, 974). Al-Muṭṭi died in Muḥarram 364 (September—October 974) in Dair al-'Aḳūl.

Bibliography: Mas'ūdī, *Murūj* (ed. Patin), i. 29, ix. 48, 52; Ibn al-Athīr (ed. Tornberg), viii. 315, 338 sqq.; Ibn al-Tikīṭa, *al-Faḡhārī* (ed. Derenbourg), p. 390 sq.; Muhammad b. Shākir, *Fawā'id al-Wafāyāt*, ii. 125; Weil, *Gench. d. Chalifen*, iii. 1 sq. (K. V. ZETTERSTERN)

MUTLAQ (A.), part. pass. IV from *ḥ-l-q*, "to loose the bond (*ḥud*) of an animal, so as to let it free" (e.g. Muslim, *Ḍiḥād*, trad. 46; Abū Dawūd, *Ḍiḥād*, bāb 100). The term is also applied

to the loosening of the bowstring (Bukhārī, *Ḍiḥād*, b. 170), of the garments, the hair etc. Thence the common meaning absolute, as opposed to restricted (*muḥayyad*), and further the accusative *mutlaqan* "absolutely". The use of the term is so widely diffused, that a few examples only can be given.

In grammar the term *maf'ūl mutlaq* denotes the absolute object (cognate accusative), i.e. the objectivized verb of the sentence, such as "a sitting" in the sentence: he sat a sitting.

In the doctrine of the roots of *fiḥā* the term is applied to the *mutḥalliths* of the heroic age, the founders of the *mutḥalliths* who are called *mutḥallith mutlaq*, an epithet which none after them has borne (cf. *Ḍiḥād*).

In dogmatics the term is applied to existence, so that *al-wuḡūd al-mutlaq* denotes Allāh, as opposed to His creation, which does not possess existence in the deepest sense.

In ontology the term is also applied to existence (*wuḡūd*) in connection with the question of the nature of the latter. Here *al-wuḡūd al-mutlaq* is opposed to *al-wuḡūd al-maḥmūl li 'l-mawḍū'*. See the art. *MANTIḤ*, supra p. 259b.

In other surroundings the term has the meaning "general" as opposed to *ḥaṣṣ*; cf. the definition in *Ḍiḥād*: *Ṭa'īfāt*. *Mutlaq* denotes the one without specification. Cf. further the *Dictionary of the Technical Terms*.

On the meaning of *rawi mutlaq* in prosody, cf. Freytag, *Darstellung d. arab. Verskunst*, Bonn 1830, p. 311.

AL-MUTTAQI LI 'LLAH, ABU IḤSĀN IBRĀHĪM, an 'Abbāsīd caliph, son of al-Muṭṭadīr [q. v.] and a slave-girl named Khālīḥ. In Rabi' I 329 (Dec. 940) he succeeded his brother al-Rādī [q. v.]; by this time the caliphate had sunk so low that five days passed after the death of al-Rādī before steps were taken to choose his successor. Al-Muttaqī at once confirmed the Amir al-Umair Bedikem [q. v.] in office; after his death however, the Turks and Dailāms in the army began to quarrel with one another. Abū 'Abd Allāh al-Bayḍī [see AL-BAYḌĪ] seized the capital but could only hold it a few weeks. He was driven out by the Dailāmi chief Kūrtigin who however was soon overthrown by Ibn Rā'ik [q. v.]. When Abū 'Abd Allāh sent his brother Abū 'l-Ḥasan with an army against Baghdād, the caliph and Ibn Rā'ik escaped to al-Mawṣil to the Hamdānids (Djumādī II 330 = Feb.—March 942). After the assassination of Ibn Rā'ik the Hamdānīd Abū Muḥammad al-Ḥasan was appointed Amir al-Umair and received the honorific title of Nāṣir al-Dawla. The occu-

pation of Baghdad offered him no difficulty; the Turkish general Tuzun rebelled a little later and Nāṣir al-Dawla had to evacuate the capital which was entered by Tuzun in Ramaḍān 331 (June 943) as Amīr al-Umār'. Al-Muttaqī soon found himself forced to seek the protection of the Hamānids again and at the beginning of the following year (autumn 943) he fled to al-Mawṣil. Then he settled in al-Raqqa but when Tuzun made peace with Nāṣir al-Dawla, al-Muttaqī appealed for help to the Ikhshīd of Egypt; the latter came to al-Raqqa in Rajab 332 (March 944); the negotiations however were unsuccessful and finally the caliph put his trust in Tuzun, who after assuring him of his loyalty by the most sacred oaths had him blinded (Safar 333 = Oct. 944). Al-Muttaqī was then declared to have been deposed. He died in Sha'bān 357 (July 968).

(K. V. ZETTERSTEN)

AL-MUTTAQĪ AL-HINDĪ, author of several works in Arabic, whose real name was 'Alī b. Ḥusām al-Dīn 'Abd al-Malik b. Kāpī KHĀN al-SABĪH al-KADIRI, was born at Burhānpūr in Gūjārāt of a respectable family of Dīwānpūr [q.v.]. He first joined the Cīṣṭī order, as a disciple of 'Abd al-Karīm b. Shāh Bājā at Burhānpūr and afterwards went to Multān where he read with Ḥusām al-Dīn al-Muttaqī, after whom he is called al-Muttaqī. He spent the remaining portion of his Indian life at Aḥmadābād during the reign of Bahādur Shāh, but left India for Mecca after Ḥumāyūn defeated Bahādur Shāh in 941 (1534). He spent his last days in Mecca where he lived for thirty years more, during which he read with Ibn Ḥajar al-'Asqalānī and others and entered the Kāfirī and Shādhilī orders. His high spiritual life and learning led many people to become his *murīd* (spiritual disciple). He died a highly respected saint and scholar in Mecca 975 (1567) at the age of ninety. He is the author of the following works:

1. *al-Burhān fī 'Alāmāt Maḥdī aḥqir al-Zamān*, an account of the Mahdī and of his coming at the end of the world;
2. *al-Burhān al-Jalī fī Ma'rīfat al-Walī*;
3. *Talḥīq al-Bayān fī 'Alāmāt Maḥdī aḥqir al-Zamān*;
4. *Dīwān al-Kalīm fī 'I-Mawṣi' wa 'l-Hikām*, a collection of sentences on morals;
5. *Ḥidāyat Rabbi 'inda Faḥād al-Murabbī*;
6. *al-Hikām*;
7. *Kanz al-Ummāl fī Sunan al-Aḥwāl*, a combined edition of Suyūṭī's *Djāmī al-Masūdī* or *Djāmī al-Dīwānī* or *al-Djāmī al-kabīr*, newly arranged according to chapters (printed in Haidarābād 1312);
8. *al-Mawṣi' al-'aliya fī Djāmī al-Hikām al-ḥurūfīya wa 'l-hadīthīya*;
9. *Minhāj al-Ummāl fī Sunan al-Aḥwāl*, an abridgement of Suyūṭī's well-known alphabetically arranged work *al-Djāmī al-ṣāghir* containing a collection of traditions from authentic sources,

newly arranged according to chapters together with a supplement;

10. *Mukhtasar al-Nihāya*, an abridgement of Dhazārī's dictionary of traditions entitled *al-Nihāya fī Ghārīb al-Hadīth*;

11. *Nisām al-Mi'yār wa 'l-Mi'yār li-Ma'rīfat Marātib al-Nās*, a short tract on the classification of man.

MUWALLAD (A.) means properly one born of non-Arab parents but brought up among Arabs. This is how it is usually to be translated in the Hadīth (e.g. Malik, *Nihāya*, bāb 42). Later it was used to distinguish from the new convert the children of converts, who were brought up in Islām. The common translation "renegade" is wrong as is the *adoptado* of Pedro de Alcalá. In theory they had equal rights with the old Muslims but the caliph 'Umar in the interest of the state's finances ordered that they should pay the land-tax (*kharāj*) while the old Muslims only paid a tenth of the yield. The muwalladūn were of special importance in Muslim Spain, especially from the time of 'Abd al-Rahmān II, when conversions to Islām became more and more numerous. Some even retained their old family-names (Banū Angelino, Banū Sabarico). This section of the population among whom were often crypto-christians (*Christiani occulti*) played the largest part in the frequent revolutions against Muslim authority in Spain.

The post-classical poets were called muwalladūn in contrast to the *islāmīyān*, their language was no longer considered a model of grammar, lexicography and prosody. The boundary between the two lies about the end of the first century. Among best known muwalladūn were al-Buḥārī, al-Mutanabbī and, according to some, also al-Farāsidī and Djarīr.

(HEFFENING)

MUWASHSHAH, MUWASHSHAHJA or TAWSHIḤ, an ode or poem intended to be sung, is so called by comparison with the *wishāḥ*, which is a double belt ornamented with pearls and rubies or a band of leather studded with pearls which a woman wears across her body from the shoulder to the opposite hip, thus going round the body. The muwashshah is composed of two parts one of which contains complete lines and the other hemistiches.

The muwashshah, which belongs to the "seven kinds or branches" (*ṣunūn*) considered to be post-classical, is composed according to the rules of the purest syntax.

The muwashshah is divided into "stanzas", the technical name of which is not exactly settled; they are usually called *ḡun* or *ḡal*, i.e. its most perfect form, it usually begins with one or two lines, a sort of prelude to the actual poem; this prelude is called *madḥab*, *ḡhūn* or *maṭla'*; we

also sometimes find the *taqrīf*; if it is a distich, the first hemistich of each verse rhyme together and the two second hemistiches also. If A be the rhyme of the first hemistich and B that of the second, the *madhhab* or *ghayn* is of the following form:

2 lines	{	_____ A _____ B
		_____ A _____ B
1 line	}	_____ A _____ B

After the *madhhab* or *ghayn* come the stanzas proper called: *ghuz'* or *hail*.

The *ghuz'* or *hail* contains two parts: the first consisting of a varying number of hemistiches with the same or alternate rhymes, which however are never those of the *madhhab* or *ghayn*. This first part is called *dawr* or *simf*. The second part which is exactly like the *madhhab* or *ghayn*, both as regards number of lines and rhymes, is called *ḥaṣṣa* or *ḥuṣṣa*. The stanza therefore presents the following form:

First type	_____ C
	_____ C
	_____ C
	_____ A _____ B
Second type	_____ C
	_____ D
	_____ C
	_____ D
	_____ C
	_____ D
	_____ A _____ B
	_____ A _____ B

The rhyme or rhymes of the *dawr* or *simf* vary from one stanza to another; but those of the *ḥaṣṣa* are always the same as those of the *madhhab* or *ghayn*. The *ḥaṣṣa* is a sort of refrain which does not fail to make an impression on the listeners by the repetition of the same sounds and rhythms.

These are the most usual models of the *muwashshah*; but the poets, not being bound by hard and inflexible rules, have, each according to his temperament, exercised their imagination considerably in this genre.

Thus Ibn Sana' al-Mulk composed a poem in which the first foot of each hemistich is *fā'ilun* and has the same rhyme as the hemistich of which it forms part. This is the scheme:

<i>madhhab</i>	{	_____ A _____ A
or <i>ghayn</i>	}	_____ A _____ A
<i>dawr</i>	{	_____ B _____ B
or <i>simf</i>	}	_____ B _____ B
<i>ḥaṣṣa</i>	{	_____ A _____ A
		_____ A _____ A
		_____ C _____ C
<i>dawr</i>	{	_____ C _____ C
		_____ C _____ C
<i>ḥaṣṣa</i>	{	_____ A _____ A
		_____ A _____ A

etc.

The blind poet of Tudela shortened the hemistiches which gives a more lively rhythm:

_____ A _____ B
_____ C
_____ A _____ B
_____ C

It would be wearisome to give all the forms of stanzas which are found in the *muwashshah*.

From the point of view of metre, very great variety is found. Martin Hartmann recognised 146 which may go back to the 16 classical metres. Three other types which are found do not seem to be derived from any well defined form:

maf'ūlātū new type
mutafā'ilātū type approaching the *ḥaṣṣa*
mutaf'ilātū *mutaf'ilūn*

a type which might be connected with *dū hail*.

From the historical point of view, Freytag thinks that the *muwashshah* belongs to an old type which has now disappeared. There is certainly no doubt that the pre-Islamic poets composed poems similar to the *muwashshah*; these are known as *musammat*; we find here again the word *simf* applied to the longest part of the stanza or couplet of the *muwashshah*.

The *musammat* began with an opening line with *taqrīf*; then came four hemistiches rhyming together on a different rhyme from the first line; next came a fifth hemistich rhyming with the first and completing the stanza. A new stanza followed with four hemistiches not rhyming with those of the first stanza; it ended with a hemistich rhyming with the opening line. Here is the scheme:

_____ A _____ A
_____ B _____ B
_____ B _____ B
_____ A
_____ C _____ C
_____ C _____ C
_____ A

Ibn 'I-Kais is said to have composed a piece of this nature but it does not seem to be genuine.

The inventor of the *muwashshah* is said to have been Maqaddam b. Mu'āfā, a poet at the court of 'Abd Allāh b. Muhammad al-Marwānī who ruled in Spain (275—300 = 888—913). He was followed by Ibn 'Abd Rabbihī, author of *al-'Iḥd al-farid*. Their *muwashshah* are however believed to be lost.

The first to shine in this genre was 'Ubādat al-Qazās, a poet of al-Ma'tasim b. Šamādīh, prince of Almería. Al-A'lam al-Baṭalyawī records that he heard Abū Bakr b. Zuhri say: "All the composers of *muwashshah* are simply children beside 'Ubādat al-Qazās". In the opinion of all men of letters no contemporary writer could rival 'Ubādat al-Qazās in the days of the *mulūk al-fawā'id*.

After him comes Abū 'Abd Allāh Iḥdā' Ra'sah, the court poet of al-Ma'mūn b. Dhū 'I-Nūn, prince of Toledo. In the time of the Almoravid dynasty there flourished a group of poets among whom may be mentioned the blind poet of Tudela, Ibn Bakr, Abū Bakr b. al-Abyaḍ, Abū Bakr b. Rādja.

In the time of the Almohads the most famous

composers of muwashshah were Muhammad b. Ali al-Faḍl and Ibn Hālyūn. At a later period we have Ibrahim b. Sahl al-Iṣṣā'ī, a poet of Seville and of Ceuta, Ibn Khalf al-Djazzā'ī (of Algiers), Ibn Khazār of Bougie, the vizier and celebrated man of letters, Lisān al-Dīn b. al-Khatīb.

Eastern poets have followed those of Spain. One of them, Ibn Sana' al-Mulk al-Miṣrī (551—608 = 1156—1212), acquired a reputation in both east and west.

As to the subjects of the muwashshah they are the same as those of the traditional *qasidas*; but as they are composed with the definite object of being sung to the accompaniment of stringed instruments they are usually love-poems.

On the musical origins of the muwashshah see the article *Ṭarīk*.

AL-MUẒAFFAR, the honorific *laqab* by which the second of the 'Amirid dictators of Muslim Spain is best known, the son of the celebrated al-Manṣūr [q.v.]. **Abū MARWĀN** AND **AL-MALIK** IBN **Abū 'AMIR** AL-MUẒAFFAR. He was invested with the office of *ḥāfi* by the caliph Hishām II, on the death of his father, on 28th Ramaḍān 392 (Aug. 10, 1002) and ruled as absolute master the territory of al-Andalus until his death of angina as he was setting out on an expedition against Castile on 16th Šafar 399 (Oct. 20, 1008).

The relatively short period of the *ḥāfi*ate of 'Abd al-Malik al-MuẒaffar was until quite recently almost unknown for lack of documents and in his

Histoire, Dory had to pass it over almost in silence in spite of its importance in the history of the early 11th century in Spain. I have been able in the course of recent years to fill this gap, thanks to the discovery of accounts of the *ḥāfi*ate of al-MuẒaffar in the *Dhahira* of Ibn Bassām and the *Bayān* of Ibn 'Idhārī and the unpublished chapter devoted to him by Ibn al-Khatīb in his *l'māl al-l'ām*. The result is the discovery that the septennium of 'Abd al-Malik was for Muslim Spain a period of peace and prosperity, a regular golden age, just on the eve of the first upheavals which preceded the collapse of the Umayyad caliphate; the chroniclers compare this period to the first week of a marriage (*šabī' al-ʿarūs*; cf. Dory, *Suppl. Dict. Ar.*, i. 626—627).

Al-Manṣūr had actually left his son and successor an empire not only completely pacified and solidly organised but also enjoying an economic prosperity hitherto unprecedented. 'Abd al-Malik aimed at following scrupulously the line of conduct laid down for him in his father's last wishes: to preserve and justify the popularity of the 'Amirid régime by peace at home and the continual harassing of the Christian foe beyond the marches (*ḥuḡār*). Every year of MuẒaffar's rule was therefore marked by a summer expedition (*šāfi'a*) or a winter one (*ḡāfi'a*); in 393 (1003) he led his armies against Catalonia (*biṭāl al-Iṣṣā'iyā*), laid waste the country round Barcelona and destroyed 35 strongholds before returning to Cordova; in 395 (1005) an expedition was led against Castile by the *ḥāfi*; in the following year his objective was the town of Pampeluna [q.v.], which he seems to have approached but not reached; in 397 (1007) took place, against Catalonia, the expedition known as the "victorious" (*ḡāfi'a al-najr*): 'Abd al-Malik forced his way into Clania and carried off a vast booty. This triumph earned for him from the nominal sovereign the title of "Victor" (*al-MuẒaffar*) which henceforth replaced his previous *laqab* of Saif al-Dawla. In the course of the winter of 398 (1007—1008) there was an expedition which ended in the capture of a castle of San Martín which has not been identified. The last expedition undertaken by him as mentioned above came to nothing but at least enabled him to die like his father on the way to wage war on the infidel.

At home al-MuẒaffar maintained intact the strong administrative organisation which dated from the reign of 'Abd al-Raḥmān III [cf. Umayyads, ii.] which al-Manṣūr had maintained intact, while removing from it the representatives of the Arab aristocracy. On his accession to office, he won the good graces of the Cordovans by reducing taxes by a sixth. He was easily able to dispose of several conspiracies against him. He left to his brother 'Abd al-Raḥmān Sanchio a heritage which the latter might easily have preserved if he had not at once exasperated his subjects against him by displaying a hateful partiality and attempting to arrogate to himself the caliphate completely.

AL-MUZAFFAR B. 'ALLI. [See 'IMRĀN B. SHĀHIN.]

AL-MUZAFFAR 'OMAR B. AIVER. [See AIVU-RIDES, HAMA.]

MUZAFFAR AL-DĪN, fifth Shāh of Persia of the Kādjar [q.v.] dynasty, was born on March 25, 1853. He was Shāh Nāṣir al-Dīn's second son, the eldest son Zill al-Saltān being of lower birth by his mother. As crown prince Muzaḥfar al-Dīn had been some time governor of Adharbāidjān (a description of him as crown prince in *Curzon, Persia and the Persian Question*, i. 413). After his father's assassination Muzaḥfar al-Dīn was enthroned on June 8, 1896. With this new reign the rivalry between England and Russia for commercial and political influence in Persia became ever more apparent. The sympathy of the high officials, which was divided between the two powers, and the economic and military strength of the country was since long too weak to enable Persia to follow an independent policy. Under the relatively strong rule of Nāṣir al-Dīn popular discontent with the increasing misery had been suppressed; the new Shāh, however, though well-intentioned, did not possess the character of a strong ruler and, besides, did nothing to check the extravagancy of the court. His financial difficulties made Persia the debtor of Russia; in 1898, 1900 and 1901 considerable loans were given by Russia, guaranteed by large parts of the custom receipts, the collecting of the custom duties being administered by Belgian officials. A good deal of the borrowed money was used for the expensive journeys to Europe undertaken by the Shāh in 1900, 1902 and 1905. In the meantime, the condition of the people became more and more miserable; headed by some influential merchants and some high ecclesiastics they protested against the heavy taxes and the tariffs as fixed in the commercial agreements with Russia and England of 1903. The growing discontent took several forms: some wished to call in the Turkish Sultān as Caliph and at other times there were outbreaks against the Bābī's in Yazd and Isfahān. Besides there were special grievances against several high officials, amongst them the chief Belgian inspector of taxes. In December 1905 a popular movement took place in Teherān, with the aim of obtaining the deposition of the then grand vizier 'Ain al-Dawla (since 1903). An ever increasing number of merchants, mulla's and citizens took refuge (*hazf*) in the shrine of Shāh 'Abd al-'Azīm. At last the Shāh promised 'Ain al-Dawla's dismissal and some reforms, but in the course of the following year none of these promises were fulfilled. So in 1906 the discontent reached again a culminating point, directed this time by some more or less secret patriotic associations. In July large crowds of the people of the capital went with the mullas to Kum, to take refuge in the sanctuary there; at the same time the British Legation accorded asylum to a considerable number of merchants and citizens. The results were that on July 30 'Ain al-Dawla was dismissed and that on August 3, all the demands of the protesting people were granted, including

a constitution. The ecclesiastical leaders returned from Kum. There followed some friction with the government about the elections and other matters, but at last, on October 7, 1906, the first Persian *Majlis* or National Assembly was opened by the Shāh. The new *Majlis* had to face immediately some difficult problems and showed from the beginning its determination not to be a mere toy in the hands of the court party. Progress was hampered, however, by discussions amongst clerical and non-clerical members of the popular party, while there were disturbances in Tabriz, owing to the tyranny of the crown prince Muḥammad 'Ali. The Constitution (*Kānūn-i Asāsī*; q.v.) was ratified by the Shāh only on December 30, 1906. Muzaḥfar al-Dīn himself died on January 8, 1907 after a long illness, leaving his country to the eventful reign of Muḥammad 'Ali Shāh.

(J. H. KRAMERS)

MUZAFFARIDS, a Persian dynasty. Their ancestors came from Arabia and had settled in Khurāsān at the time of the Muslim conquest, where they lived for several centuries. On the approach of the Mongols, the emir Ghiyāth al-Dīn Ḥādījī, with his three sons Abū Bakr, Muḥammad and Manṣūr, retired to Yazd. The two first named entered the service of the Atābeg of Yazd, 'Ala' al-Dawla, and when Ḥādījī [q.v.] marched on Baghdad, Abū Bakr followed him with 300 horse. After the capture of Baghdad he was sent with an army to the Egyptian frontier. Here he fell in an encounter with the Arab tribe of Khafāja whereupon his brother Muḥammad succeeded him as a vassal of the Atābeg of Yazd while Manṣūr remained with his father in the little town of Maibūdh near Yazd. Manṣūr had three sons, Muḥarrir al-Dīn Muḥammad, Zain al-Dīn 'Ali and Sharaf al-Dīn Muzaḥfar, the latter of whom became the ancestor of the dynasty of the Muzaḥfarids. Appointed governor of Maibūdh by Yūsuf Shāh, 'Ala' al-Dawla's son and successor, he cleared the hills of the robber hands from Shirāz and when Yūsuf Shāh, who had put to death the envoys of the Ilkhān Arghūn had to take to flight and went to Sīstān, Muḥammad followed him but left him on the way and went to Kirmān where he was kindly received by Sultān Djalāl al-Dīn Sūrghatmush Kara Khitai (685 = 1286—1287). After some time he returned to Yazd and was presented to Arghūn who took him into his service. He was also on good terms with Arghūn's successors Galkhātū and Ghāṣān. The latter appointed him *amir-i hasāra* "commander of a thousand", and after the accession of Uljāitū (703 = 1303—1304) he was given custody of the roads from Ardistan to Kirmānshāh and from Herāt and Marw to Abarkūh. Muzaḥfar died on 13th Dhū l-Ka'da 713 (March 1, 1314). He was succeeded by his 13 year old son Muḥarrir al-Dīn Muḥammad who is described as brave and devout but at the same time cruel, bloodthirsty and treacherous. He continued to live at the court of Uljāitū; on the latter's death in Shawwāl 716 (Dec. 1316) and the accession of his son Abū Sa'īd he returned to Maibūdh. Along with the lord of the southern coast of Persia, the emir Kaikhosraw B. Mahmūd Shāh Indjā, he very soon fell upon the Atābeg of Yazd, Ḥādījī Shāh, and succeeded in taking

the town from him (718 or 719 = 1318 or 1319). A short time after this event the people of Satalin, the Nikūstārs, arose in rebellion; Muhammad attacked them and their leader Nawrūz was defeated and slain. The rebels however gathered together again and Muhammad had to fight no less than 21 battles before they were finally suppressed. After the death of Abū Sa'īd (736 = 1335-1336), complete chaos began and pretenders arose in different parts of the wide empire. The emir Abū Ishāq b. Mahmūd Shāh Indjū endeavoured to take the town of Yazd but was driven back. After some time Muhammad took this province from the Mongol governor in Kirmān, Malik Kutb al-Dīn. In the end however, Abū Ishāq succeeded in taking Shirāz and had the khutbas read and coins struck in his name. In Šafar 748 (May-June 1347) he set out to subjugate Kirmān and laid waste Sirdjān, but returned when he heard that Muhammad was ready to offer vigorous resistance to his advance. One of the viziers of Abū Ishāq then undertook a campaign against Kirmān but was defeated, whereupon Abū Ishāq put himself at the head of a new army and marched on Kirmān to take vengeance on Muhammad. But this effort also failed; Abū Ishāq was completely defeated and had to take to flight. In 751 (1350-1351) he went to Yazd and began to besiege the town but returned, having achieved nothing. In spite of all his failures however, Abū Ishāq never lost heart. In the following year he sent a new army under the emir Beg Dīkās to Kirmān and when the latter met Muhammad on the plain of Pandī Angūst in Djumādī I 753 (June-July 1352) a battle resulted. Dīkās was defeated. Muhammad to follow up his victory, went to Shirāz and laid siege to it. On the 3rd Shawwāl 754 (Nov. 1, 1353), the governor had to surrender and Abū Ishāq fled to Isfahān. In the following year Muhammad took the oath of homage to the 'Abbasid caliph in Egypt. Isfahān was now besieged. But as Muhammad had also to deal with other rebels the siege was somewhat prolonged. Resistance was in the end overcome and the town had to surrender. At the same time Abū Ishāq fell into his hands and was at once executed (21st Djumādī I 757 or 758 = May 22, 1356 or May 11, 1357). After Muhammad had defeated all his enemies and become undisputed lord of Fārs and the 'Irāk, an envoy appeared from the ruler of the Golden Horde, Džāni Beg Khān b. Urbeg Khān, who announced that the Khān had taken Tābriz and wanted to appoint Muhammad *yāzawāl* 'Marshal'. Muhammad gave the envoy an arrogant and unfriendly answer; but when he heard soon afterwards that Džāni Beg had returned home and left the emir Akhi Dīkās in Tābriz he decided to take the town. Soon afterwards the news of Džāni Beg's death arrived; Muhammad at once set out and met Akhi Dīkās at Miyanā in Ašharhāqjān. The latter was defeated and Muhammad entered Tābriz. But as a large army was approaching from Baghdad he dared not risk remaining but decided to begin to retreat. In Kamādān 759 (Aug. 1358) he was surprised and taken prisoner by his own son Shāh Shudjā (q.v.) who believed himself suppressed and ill-treated by his father, in concert with some other relatives. Muhammad was blinded and kept in prison for several years until his death at the end of Rabi' I 765 (Jan. 1364) at the age of 65. He was succeeded by Shāh Shudjā, who shortly before his death

appointed his son Zain al-'Abidin 'Alī his successor in Shirāz and gave his brother 'Imād al-Dīn Ahmad b. Muhammad the governorship of Kirmān. As soon as Zain al-'Abidin had begun to reign his cousin Shāh Yahyā b. Sharaf al-Dīn Muzaffar set out from Isfahān to attack him. Fortunately however, the threatened war was averted by a friendly agreement; but Shāh Yahyā could not stay long in Isfahān; he was driven out by the turbulent and fickle inhabitants and fled to Yazd whereupon Zain al-'Abidin appointed his maternal uncle Muzaffar-i Kāshī governor of Isfahān. In 787 (1385-1386) an envoy from Timūr arrived in Kirmān bringing assurances of his peaceful and friendly intentions and Sulṭān Ahmad hastened to offer his humble homage to the powerful conqueror. In Shawwāl 789 (Oct.-Nov. 1387) it was reported that Timūr had invaded the 'Irāk and that Muzaffar-i Kāshī had given him the keys of the towns and fortresses whereupon Zain al-'Abidin left Shirāz and went to Baghdad while Shāh Yahyā endeavoured to procure suitable gifts to pacify Timūr and ordered that a sufficient sum should be paid out to maintain his army. But when Timūr's officials appeared in Isfahān to take the money, they were attacked and killed by the citizens. In consequence the Mongols carried out a dreadful massacre among the people of Isfahān, in which 200,000 were said to have perished. Timūr then went to Fārs and confirmed Sulṭān Ahmad as lord of Fārs, the 'Irāk and Kirmān, whereupon he returned to Samarqand. When Zain al-'Abidin had left Shirāz, he met his cousin Shāh Manṣūr b. Sharaf al-Dīn Muzaffar at Shūstar and was at first welcomed, then suddenly attacked and imprisoned. Shāh Manṣūr was now able to occupy Shirāz without opposition, while Shāh Yahyā retired to Yazd. After the former had established himself securely in Shirāz, Zain al-'Abidin was released by his jailers and brought to Isfahān where the people welcomed him. In the meanwhile he had been persuaded by Shāh Yahyā to combine with Sulṭān Ahmad to take vengeance on Shāh Manṣūr. The plan failed however, the allies were defeated and Shāh Manṣūr seized the whole of the 'Irāk. When Zain al-'Abidin wanted to escape to Khurāsān, he was treacherously seized by the governor of al-Ray and brought to Shāh Manṣūr who at once had him blinded. The latter then tried to form a coalition against Timūr. In 795 (1393) however, Timūr left his winter quarters in Mazandarān and marched on Shūstar. After storming Kal'a-i Sefid which was considered impregnable he marched on Shāh Manṣūr's capital and a battle was fought near Shirāz. Although Shāh Manṣūr's chief emir abandoned him with most of his troops, the battle lasted till far into the night. The undismayed Muzaffarid fought with desperate courage, but finally fell in the mêlée, after fighting his way to Timūr and giving him two cuts with his sword, which however the strong helmet of the Mongol leader averted. Shāh Manṣūr's relations then submitted; nevertheless Timūr a week later (Radjab 795 = May 1393) had all the Muzaffarids executed.

(K. V. ZETTERSTERN)

MUZĀWADJA, a term in rhetoric (*badʿ*) which means the association of two things in the relation of condition (*ṣharf*) and result (*ḥisā*) and then employing the same combination for two other things in the same conditions. Here is an example from the *Diwān* of al-Baḥrī (Cairo 1329, p. 317):

*Idha ʿḥarabat yamman fa-faḍat dūmūʿuhā
tadhakkarat al-ḥarūʾa fa-faḍat dūmūʿuhā*

"When they (the boracemen) are one day fighting and their blood flows in profusion, they remember their bonds of kinship and their tears flow abundantly". The poet associates fighting with recalling bonds of kinship in the two parts of the conditional statement, then he completes the first by adding their blood flows in profusion and the second by saying their tears flow abundantly.

(MOH. BENCHENEN)

al-MUZDALIFA, a place roughly half-way between Minā and ʿArafāt where the pilgrims returning from ʿArafāt spend the night between the 9th and 10th Dhu l-Hijja, after performing the two evening ṣalāts. On the next morning they set off before sunrise and climb up through the valley of Maḥasir to Minā. Other names for this place are *al-Maḥṣar al-ḥaram*, from Sūra II, 194 and *Djām* (cf. *Lailat Djām*: Ibn Saʿd, II/I, 129, 4); but *Djām*, according to another statement, comprises the whole stretch between ʿArafāt and Minā, both included, so that *Yamun Djām* (*Kitaḥ al-Aḥqām*, VI, 30, 11) is explained as the day of ʿArafāt and *Ayam Djām* as the days of Minā. The rites associated with the night of Muzdalifa go back to the old pagan period, which the Arabs themselves recognise when they make *Kuṣayl* introduce the kindling of the sacred fire in this night and say that guiding of the departure for Minā is a privilege of the family of Adnān.

The sacred place in Muzdalifa was the hill of *Kuṣayl* [q. v.]. Even after Muḥammad in deliberate contrast to the pagan practice had declared all Muzdalifa to be *maṣrif* [cf. HADDAD, I, c.], this hill retained its ancient sanctity. According to Azraqī, there was a thick round tower upon it on which the Muzdalifa fire was kindled; in the time of Hārūn al-Raṣīd it was a fire of wood; later it was illuminated with wax-candles. In the Muslim period a mosque was built about 400 yards from the tower, of which Azraqī gives a detailed description while Muḥaddam speaks of a place of prayer, a public fountain and a minaret. Burton also mentions a high isolated tower at Muzdalifa but the illumination in the night of Muzdalifa now takes place on the mosque.

(FR. BURL)

MUZDAWIJ means among philologists the use of two terms in which the form of one is changed to make it resemble that of the other. For example in this *ḥadīth* (Ibn Maḍja, *Sunan*, Cairo 1313, II, 246): *irḡīnu maʿārāt ḡair maʿḡūrāt*, "return home laden with sin and not with rewards", the word *maʿārāt* from the root *w-ḡ-r* has been changed into *maʿḡūrāt* to give it the same form as *maʿḡūrāt*. It is similar in the phrases (cf. *Lisān*, XIX, 353): *ḡhāyāt wa-ʿaḡḡyāt*, *ḡhāyāt wa-ʿuḡḡyāt*, *bi-l-ḡhāyāt wa-l-ʿuḡḡyāt* "mornings and evenings" in which the form of the first word has been adapted to that of the second.

The *muzdawij*, among rhetoricians, consists in establishing a kind of alliteration between two adjacent words having the same form, the same metrical quantity and the same rhyme (*rawi*), e.g. in this verse of the *Kurʾān* (XXVII, 22): *wa-ḡḡḡḡba min Sabaʾin bi-nabaʾin* "I have brought thee news from Sabaʾin where we have the resemblance between *Sabaʾin* and *nabaʾin*". We may give as another example this *ḥadīth* (Ibn al-Aṭṭar, *Nihāya*, Cairo 1911, IV, 291 under 2-7-7): *al-muʾminūna ḡaiyūna ḡaiyūna* "Believers are peaceable and mild in character" and the phrase (cf. *Lisān*, XVII, 280, 331) *ḡaiyūna ḡaiyūna*.

The object of the *muzdawij* among poets is to make the hemistichs of a poem rhyme together two by two. As a rule, it is only used in dialectic *uḡḡḡḡas* (like the *Alfiya* of Ibn Mālik, al-ʿAmīlī, however, in his *Kaṣḥāt* (Cairo 1302) has used it with the *uḡḡḡḡ* and *ramal* metres (p. 76, 78, 83). In Persian and Turkish, it is called *maḡḡḡḡ* (*maḡḡḡḡ*) and composed in the metres *ramal*, *ḡḡḡḡ* and *maḡḡḡḡ*. In this kind of composition, it is necessary that the last foot of the two hemistichs should be alike. Among the Arabs there is a kind of poem in the *uḡḡḡḡ* metre (and sometimes some verses follow strictly the *uḡḡḡḡ* metre) called *muzdawijāt* (a collection of them was published in Cairo in 1299); they consist of strophes of five hemistichs in which the first four hemistichs rhyme together and the fifth have a common rhyme. Sometimes the strophe has only four hemistichs, the first three rhyming together and the fourth rhyming jointly as in *al-ʿIḡm bi-Muḡḡḡḡ al-Kaḡm* of Ibn Mālik (Cairo 1329) and *Nail al-Arab fi Muḡḡḡḡḡ al-ʿArab* of Ḥasan Kowāldir al-Khalīf (Bulāḡ 1301).

AL-MUZZAMMIL, title of sūra lxxiii, taken from the first verse: "O thou wrapped up", viz. Muhammad, who wrapped himself up in his garment or was wrapped up by others. For explanations of the allusion cf. Sale's note as well as the commentaries on the Qur'an. Variants of al-muz-

zammil, which stands for *al-muzammamil*, are *al-muzammal*, *al-muzammil* (Baidāwī).

Bibliography: Besides the works mentioned in the art., cf. Nöldeke-Schwally, *Geschichte der Qurān*, I, Leipzig 1909, p. 98.

N

AL-NABA', title of sūra lxxviii, taken from the opening verses: "Concerning what do the unbelievers ask questions of one another? Concerning the great news". According to the commentaries the great news alluded to is the resurrection, the subject of lively discussions among the Meccans.

Bibliography: The commentaries and translations of the Qur'an; Nöldeke-Schwally, *Geschichte des Qurān*, I, Leipzig 1909, p. 104.

NABATAEANS, an Arab people who lived in ancient times in Arabia Petraea. — As early as the seventh century B. C. the Nabayāti are mentioned by Assurbanipal (*Kellinschr. Bibl.*, II, 216 sq.). Whether the Nabayāti of the Old Testament are to be identified with them is uncertain (against the identification: Nöldeke in Schenkel's *Bibelleskon*, s. v. Nabatäer; for it amongst others: Mušl, *Arabia Deserta*, New York 1937, p. 492). The Nabataeans were never completely subjected either by the Assyrians, or the Medes, Persians or the Macedonian kings (Diodor. II, 48). In 312 B. C. Antigonos sent two expeditions against them without success. They were then a nomadic people of shepherds and traders, with a few natural fortresses like Petra, Bozra, Salkhad, al-Hidjir which served as depots for their arms and riches. Living round the Dead Sea they exploited from time to time the remunerative asphalt deposits on its eastern shore. They were often on friendly terms with their neighbours; e. g. with the Jews under the Maazabers and especially with the Salamians (Arab. Sulaim; cf. Yāqūt, *Mu'jam*, ed. Wüstenfeld, II, 594, s. v. Birma), with whom according to Stephanos Byzantios and the testimony of the Nabataean inscriptions, they were in close alliance (cf. SULAIM N. MANOJA and B. MORITZ, *Salamii*, in Pauly-Wissowa's *Realencykl.*, vol. I, A, col. 1824 sq.). The capital of the kingdom, called Nabatān in the inscriptions, was Petra on the Djabal Hārūn, according to Nöldeke (*Z. D. M. G.*, xxv, 259 sq.) Hebrew Sela', Arab. Ḥiṣn Sal' in the Wādī Mušl in the hills of al-Sharā (Yāqūt, *Mu'jam*, III, 117, 13; *Muhtariḥ*, p. 252, s.), while Mušl (*Arabia Petraea*, II, 337, note 2, on p. 318) identifies this with Kāṣr es-Sel'. The ruins reveal a peculiar mixture of Nabataean and Hellenistic architecture while they have yielded remarkably few Nabataean inscriptions (on these see Dalman, *Petra und seine Felskelligtümer*, 1908; do., *Neue Petra-Forschungen*, 1912; Bachmann, Watzinger, Wiegand, *Petra*, 1921; A. B. W. Kennedy, *Petra, its History and Monuments*, 1925).

The Nabataean kingdom comprised the lands

of southern and eastern Palestine as well as Idumaea and Peraea, from 88 B. C. also Hawrān; twice (85 B. C. and c. 34–62 A. D., perhaps also in the interval, cf. Mommsen, *Röm. Gesch.*, v, 476, note 3), Damascus also belonged to it (cf. I, p. 903). In the southwest it stretched over the ancient Midian as far as the coast of the Red Sea where 'Obodat I founded the town of Hawrān (Steph. Byz., s. v. Αὐαρά, probably = Αὐαὴ ἡμεῖς, now perhaps al-Hawrā'), in the interior as far as al-'Ula (Dedan) and al-Hidjir [q. v.] on the frontier of the Ḥijāz. The Nabataeans also penetrated into the nome of Arabia in the eastern Nile delta as an inscription from Tell el-Shughafīye in the Wādī Tūmīlāt shows (Clermont-Ganneau, *Les Nabatéens en Egypte*, in *Recueil d'Arch. Or.*, VIII, [1924], p. 229–257). A number of their kings can be dated with approximate exactness: Hārithat (Aretas) I 169 B. C., Hārithat II c. 110–96, 'Obodat (Obodas) I c. 90, Rabb'el Rabilos I c. 87, Hārithat III (Ἀρέτας Φιλάδελφος) c. 86–62, ['Obodat II c. 62–47?], Māliku (Malchus) I c. 47–30, 'Obodat II (III?) before 25–c. 9 B. C., Hārithat IV Kāhem-'ammeh (Φιλάδαμος) c. 9 A. D. — 40 A. D., Māliku II 40–70/71, Rabb'el II Zūrāy 70/71–106 A. D. (Māliku III, 106 A. D.; cf. Clermont-Ganneau, *Recueil*, VIII, 247). The real founder of their power is said to have been king Erotimos, who is probably the same as Hārithat III whose reign fell in the period of decline of the Seleucid empire (E. Täubler, in *Klio*, x, 251–253). As "allies", the Nabataeans were able to maintain to some extent their independence of the Romans. At a very early date, like the Palmyrans, they attained through their trade the position of monopolists in Nearer Asia. At the beginning of the Roman empire they dropped their nomadic life and became peacefully settled. Just as in the east they have left their inscriptions particularly on the trade-routes followed by their caravans, e. g. from Petra to Damascus and Tadmor, to Forat at the mouth of the Euphrates, to Gerrha (Arab. al-Djār'a near al-Katīf), to the Sinai peninsula and Egypt and to Gaza, so we find in the Roman empire epigraphic traces of Nabataean merchants as far as Upper Egypt (Dendera), in Miletus, Rome and Patroli. In 106 A. D. the emperor Trajan conquered Petra and made the most important part of the Nabataean kingdom the Roman *Provincia Arabia*. The remainder of the territory left to the Nabataeans in the desert suffered economic ruin about 200 A. D. when the Palmyrans gradually obtained control of the remunerative carrying trade.

The king, who was assisted by a vizier, the highest official (Greek *ἐπίσκοπος*), with the title "brother", had under him a number of *shakhs* (*ἑταῖροι*) of the separate tribes (*φύλας*); we also find the titles *eparchos* and *strategos*. The high social position of women is noteworthy; they could possess property independently and dispose of it as they liked (Nöldeke in Euting, *Nabat. Inschr.*, p. 79 *sq.*); the coins often bear portraits of the queens (Kammerer, *Petra et la Nabatène*, Paris 1929, p. 377; *Brit. Mus. Cat. of Greek Coins: Arabia etc.*, London 1922, Plates I and II).

Our only source for Nabataean law is their epitaphs, the threats of punishment in which are based on a formula of the Greek law of property and contract which elsewhere is only found in tomb-inscriptions in Asia Minor (B. Keil, *Hermet.*, xlili. [1908], p. 567—572).

As nomads, simple in their customs and rarely owning slaves, the Nabataeans, as a trading people, had a great respect for wealth. The mention in inscriptions of physicians, wise men and poets, shows a certain level of intellectual culture. Whether circumcision was practised among them is uncertain (Kammerer, *op. cit.*, p. 375 *sq.*).

The Nabataean pantheon is known to us mainly from tomb and votive inscriptions. The principal god was Dushara [cf. DHU 'L-SHARA], the principal goddess Allāt [cf. AL-LAT]; the goddesses Manāthu (= Aram. M'nāwāth; cf. MANĀṬ), Kaisha, Nutaba and Hubal [q.v.] are also mentioned. Their kings were perhaps worshipped as gods after their deaths (cf. C. I. S., ii. 354).

As Nöldeke was the first to emphasise, the Nabataeans were pure Arabs as their names show; but in written intercourse they used Aramaic, the usual written and business language of Nearer Asia. Many aramaisms thus entered their language in the north of the country (like *ḥabrā*, *nafḥā*, *arwā*). Arab writers therefore even used the term "Nabataean" for "Aramaic"; in the southern Hijāz (al-Hijāz) on the other hand, the Nabataean Arabic retained its greatest purity; the Arabic script developed out of the Nabataean cursive at the close of the ancient period [cf. ARABIA, d.].

In the Muslim period the Arabs called those inhabitants of Syria and of the 'Irāk, who were neither shepherds nor soldiers, "Nabataeans" (Ibn al-Kalbi in Yāqūt, *Mu'jam*, iii. 634), a term also applied in a somewhat contemptuous tone to the Aramaic-speaking peasants (Nöldeke, in *Z.D.M.G.*, xiv. 124). When then we find "Nabataeans" (Nabī, Nabī etc.) mentioned in Malaya as well as on the Djāhān, in Syria, on the Khābūr and in the 'Irāk, in 'Omān and Bahrain, the name is not to be taken in the ethnographical sense (Nöldeke, *op. cit.*, p. 125). As the grammarians of the 'Irāk paid special attention to the "Nabataean" language of the Aramaic country people, by "Nabataeans" was frequently meant the inhabitants of the 'Irāk and especially of the Baṣṣā (Nöldeke, *op. cit.*, p. 127).

The inhabitants of the district of Hīsmā in the most northern part of the Hijāz, once the Djūdham [q.v.], now the Hawāṣit [q.v.], are regarded as the descendants of the Nabataeans [cf. ARABIA, a.].

NABI (A.), prophet, borrowed from Hebr. *nabī* or Aram. *nebiyā*, is found in the Qur'ān from the second Meccan period in the singular and plural *nabīyūn*; in the Medina period we find also the broken plural *anbiyā'*. Lists of the *nabīyūn* are given in Sūra vi. 83 *sq.*; iii. 34; iv. 161 *sq.*; further information about them is given in several passages of Sūra xix. and in xvii. 57. The list consists exclusively of names from the Old and New Testaments (if we leave out Idriis in Sūra xix. 57, whose name Muḥammad had however also learned from a Christian source; see above ii., p. 442—450; Horowitz, *Koran. Unters.*, p. 88 *sq.*); while messengers of God (*rasūl* [q.v.], plur. *rasūl*; *muṣallin*) had also been sent to other peoples of the past — e.g. Hūd or Šālīḥ —, according to the Qur'ānic idea "prophets" had appeared only among the *Ahl al-Kitāb* [q.v.]. Only a minority of the individuals called prophets in the Qur'ān are so described in the Bible, and Yūnus b. Mattai [q.v.] is the only one of the *anbiyā'* of the Qur'ān who appears among the literary prophets of the Bible. Muḥammad himself did not claim the name nabī until he was in Medina when he was addressed as the Prophet (*ya ayyuha 'l-nabī*) and, as finally closing the series of prophets, is called their "seal" (*khātam*). When Muḥammad in Sūra vii. 156 and 158 is called *al-nabī al-ummi*, this is to distinguish him as the prophet who has arisen among the heathen; the Jews called the heathen *ummiyyūn* *al-islam* ("peoples of the world") and also recognised prophets who had arisen among them; among these they included e.g. Balaam and Job. This Jewish name for the heathen became the *al-ummiyyūn* of the Qur'ān (Sūra liii. 2; iii. 19, 69); that

ummiyūn refers to the heathen is quite clear from Sūra iii. 19, where they are contrasted with those who have received the scripture. When Sūra ii. 73 refers to the *ummiyūn min Ahl al-Kutub*, the reference is most probably (with Wellhausen, *Stimmen*, iv. 13, note 2) to originally pagan Arabs who had adopted Judaism. The derivation of *ummi* from Hebrew *ummi* *am-šam* therefore fits all the Qur'anic passages, while that most generally adopted from Hebrew *am ha-āreṣ*, "people of the country", a term for Jews who did not know the Jewish law, would at best fit only Sūra ii. 73, but even for this passage is not absolutely essential.

The post-Qur'anic ideas about the prophethood of Muhammad are discussed in the article MUHAMMAD (cf. also Tor Andrae, *Die Person Muhammads in Lehre und Glaube seiner Gemeinde*, Stockholm 1918). The accounts of the other prophets which found a way into Islām in the post-Qur'anic period are collected in the works on the *Kiṣaṣ al-Anbiyā'*. These, however, are not confined to the prophets proper who appear in the Qur'an by name or anonymously, and to other figures of Jewish and Christian Biblical and post-Biblical tradition, but deal also with the history of such personalities as Idrīs and Sulaymān to whom there is not the slightest reference in the Qur'an.

(J. HOROWITZ)

NABI, YŪSUF, an Ottoman poet; Yaṣmī Nābī came from Urfa (Ruhā, hence Rūhāwī, not Rūhīmī as one often finds). From there he came in the reign of Muhammad IV to Stambul and became a favourite of the grandvizier Kara Mustafa. He held a post as *ḥayyā*, made the pilgrimage after Kara Mustafa's death and later settled in Aleppo. When the governor there, Muhammad Rahadī [q. v.], became grandvizier, he took Nābī to Stambul and gave him the post of superintendent of the department of the Anatolian chief accountant (*Anadolu mühürbeğlisi*). Later he gave up this office for another and died aged about 90 on 3rd Rabi' I 1124 (April 10, 1712). He was buried in Skutari in the Karadja Ahmad cemetery near the Miskinler monastery; the inscription on his tombstone is given by Sa'd al-Dīn Nūzhet, *Meṣr Kutubleri*, Stambul 1932, p. 11.

Nābī wrote several historical works in a florid style which was considered classical in his time and even later, such as an account of the conquest of Kameniec in Podolia (1083 = 1672) called *Ta'rikh-i Wajih-i Kamīna*, *Fethnâme-i Kamīna* or simply *Ta'rikh-i Kamīna*. He also wrote in prose and verse a description of his pilgrimage to the holy places (1089 = 1678; the work was written only in 1093 = 1682) entitled *Tuhfat al-Haramain*. His very popular *Dimān* with supplement earned him the title of "king of poets". In his *Khair-nāme*, usually called *Khairiye*, he gives his son Abū 'l-Khair moral admonitions and advice. His letters (*Munshā'at*) were at one time highly esteemed and are of some historical value. He continued Wāsi's *Siyar* in a *Dhail-i Siyar-i Wāsi*. Printed works: *Dimān*, Bulak 1257 and Stambul 1292; *Dhail-i Siyar-i Wāsi*, Bulak 1248; *Khairiye* in: *Conseils de Nābī Efendi à son fils Abū 'l-Khair*, publiés en turc avec la traduction française et des

notes par M. Pavet de Courteille, Paris 1857; *Ta'rikh-i Kamīna*, Stambul 1281; *Siyar-i Khairiye*, s.l. (= Stambul, about 1870), deals with questions of pedagogues; *Tuhfa*, Stambul 1288; *Tuhfat al-Haramain*, s.l. [Stambul] 1265. For further information see F. Babinger, *G.O.W.*, p. 237–239.

NABI YŪNUS. (See NINAWA.)

NABIDH (A.), a comprehensive designation for intoxicating drinks, several kinds of which were produced in early Arabia, such as *mir* (from barley), *ḥit* (from honey, Bukhārī, *Maḥab*, bāb 60; *Ashriba*, bāb 4; *Asab*, bāb 80; or from spelt: Ahmad b. Hanbal, iv. 402), *fudhḥ* (from different kinds of dates: Bukhārī, *Ashriba*, bāb 3, 21).

Grapes being scarce in Arabia, it is said that in al-Madīna "wine" was usually prepared from kinds of dates, exceptionally from grapes (Bukhārī, *Ashriba*, bāb 2, 3; Muslim, *Ashriba*, trad. 3, 6). This may be true. Yet even these traditions betray a tendency connected with the question whether the prohibition of wine included that of intoxicating drinks. Generally speaking *ḥadīth* favours the affirmative answer and is consequently anxious to point out that the *ḥām* which was prohibited by Muhammad included nabidh.

The question was difficult in so far as these kinds of drinks were intoxicating to degrees which partly depended upon the duration of the process of fermentation. This appears e.g. from the copious traditions in which 'A'isha relates how nabidh was prepared for Muhammad and at what time the beverage was done away with (cf. KHAMR), as well as from the traditions in which the previous prohibition of certain vessels (*quntar*, *muṣaffat*, etc.) was abrogated and all kinds of vessels declared allowed, provided the drinks prepared in them were not intoxicating (Muslim, *Djāmi'*, trad. 106; *Ashriba*, trad. 63–65, 67–75 etc.). A series of traditions which could be adduced by the Hanafites in favour of their view, according to which nabidh is not included in the prohibition of wine, is to be found in al-Nasā'ī's collection, *Ashriba*, bāb 48. Cf. further the art. KHAMR.

Side by side with milk and honey nabidh was also the beverage that was offered to the pilgrims in Makka. The institution, *al-nāḥya* (also the name of the building, close to Zamzam, where the distribution took place), was an office held by the 'Abbasids (Ahmad b. Hanbal, *Musnad*, i. 372; Muslim, *Ḥaṣṣ*, trad. 347; Abū Dawūd, *Mamārik*, bāb 90). The descriptions by Ibn Sa'd († 230 = 845) and al-Azraqī († 244 = 858) give the impression of referring to the present state of things; in the time of al-Muqaddasī († about 1000 A.D.) the institution had already passed into desuetude. For details, cf. the work of Gaudefroy-Demombynes.

(A. J. WENHINCK)

NĀBIGHA AL-DHUBYĀNĪ, a famous poet of the pre-Muḥammadan period. His real name was Ziyād b. Ma'ūwiya and he belonged to the tribe of Dhubyān. He probably flourished in the second half of the century which preceded Muḥammad and died shortly before the beginning of Islām. Caussin de Perceval (*Histoire des Arabes*, 2nd ed., li. 502) puts the date of his birth in 535 A. D. and Father Cheikh (Poète arabe chrétien, p. 640) dates his death in 604 A. D. These dates however can only be conjectural.

The surname Nābigha has been variously interpreted by Arab writers. According to some, our poet was so called because in one of his verses he uses the verb *nabigha*: "She stopped among the Banū Kain b. Dīnār and they felt the effects of our attacks". But this verse is apocryphal and the process recalls that used to justify the etymologies of Muḥallil and of Mutalammis [q. v.]. According to others, he was so called because he did not write poetry until he reached manhood or more simply because in Nābigha poetry "flows from the spring".

We know nothing about his family; his noble birth asserted by the *Kitaḥ al-Aghānī* (ix. 162) and Ibn Kataliba (ed. de Goeje, p. 74) is doubtful and we know nothing definite about his childhood and youth.

At some date which it is impossible to ascertain definitely, Nābigha was admitted to the court of the Lakhmid princes (cf. *LAḤM*) of al-Hira, vassals of Persia; in the reigns of the kings al-Mundhir III and al-Mundhir IV in particular this Christian semi-Persian, semi-Arab city had become an important literary centre and the focus of a brilliant culture.

Our poet sang the praises of these two sovereigns and received gifts from them but his fortunes reached their zenith in the reign of Nu'mān Abū Kaḥbā whose boon companion and favourite singer he became. The poet lived on intimate terms with the king in the lap of luxury and opulence. Such favour could not fail to excite the envy and jealousy of the other courtiers; hence his enemies, notably Murra b. Sa'd, resolved to break the king's attachment to him. The trick attempted by his enemies was a crude one and the king was not deceived by it: the attack on the poet failed.

Far from being discouraged, Murra patiently awaited another opportunity to avenge himself: this soon appeared. According to the *Kitaḥ al-Aghānī*, Nābigha, who had free access to the palace of Nu'mān, one day unexpectedly entered the apartments of queen Mutadjarrida, famous for her beauty. Taken by surprise, she dropped her

veil, showing to the delighted eyes of the poet "a part of her statue-like body". By the time she could replace it, it was too late. Struck to the heart, Nābigha composed in honour of this "beauty" his famous poem which begins with the line "Go and leave Maiya in all haste . . ." (Derenbourg, *Dīwan*, xiv.). Unfortunately he was imprudent enough to recite it to his enemy Murra who hastened to report it to Nu'mān. The latter in his anger decided on the poet's ruin.

According to another tradition, one evening when Nābigha was seated beside the queen in company of the king and another poet, Munakhkhal al-Yashkuri, Nu'mān asked Nābigha to describe Mutadjarrida to him. Nābigha at once obeyed and recited the poem which he had composed shortly before. Munakhkhal, who was said to be the queen's lover, exclaimed: "Sire, this description is that of an eye-witness"; and the poet's days were now numbered. Warned by his friend, the chamberlain 'Iṣām, the poet hurriedly fled and sought refuge with the princes of Ghassān.

These stories, on the whole little probable, seem to have been invented to explain Nābigha's disgrace. In his book *Fi 'l-Adab al-ḡahilī* (Cairo 1927, p. 332), Tāḥa Ḥasān disputes their authenticity and acutely points out that nothing in poem xiii.: "It has reached me, mayest thou avoid the censure etc." supports these stories. He supposes on the other hand, relying on this *ḡazal*, that the princes of Ghassān won the good graces of Nābigha at some time by their largesse and the poet showed his gratitude by singing their praises; this having come to the ears of Nu'mān, the latter took umbrage and decided on the ruin of his favourite.

Nābigha was by no means unknown to the Ghassānids, phylarchs of Byzantium and rivals of al-Hira. He had been very well received by the princes al-Hārith b. Abū Shammār and al-Hārith al-Aḡhar. The former at the poet's request had released a large number of the Banū Asad taken prisoner at the battle of Ḥalima; the latter, also at Nābigha's request, had released a number of the Banū Asad and Banū Fāḥra after the battle of 'Alu Ubāḡh. This leads us to say a word about Nābigha's political activities.

The poet in the course of the wars of his tribe never lost interest in his fellow tribesmen and their allies; we have mentioned his interventions on their behalf with the Ghassānids; during the celebrated war of Dīḥ between 'Aḥu and Dhubyān, it was his constant care to maintain the alliances contracted with the Banū Asad and Banū Tamīm. In the reign of the Ghassānid Nu'mān b. Hārith Abū Kaḥbā, he had once more to intercede on behalf of the Banū Dhubyān defeated in the battle of Dīḥ Ukār; later, in view of his devotion to his patron and his love for his own tribe, he appealed to Nu'mān to abandon his war on the Banū Dhubyān allied with the Banū Hann. As a result of refusing to listen to him, the king was defeated.

At the court of Ghassān, Nābigha was overwhelmed with favours by 'Amr b. Hārith and later by his successor Nu'mān. He celebrates the former's generosity in a *ḡazal* full of gratitude (Derenbourg, iii.) and his elegy on the death of Nu'mān (Derenbourg, xiv.) is characterised by deep emotion.

In spite of his luxurious life, Nābigha felt his heart and his thoughts turning towards al-Hira and his king. Therefore on the death of Nu'mān b. Hārith Abū Karb he decided to return to al-Hira to attempt to regain the favour of the son of al-Mundhir.

Learning that Nu'mān was ill, he set out accompanied by two Fāsāris, Manḡlir b. Zabāla and Salyār b. 'Amr, friends of the prince; when they arrived at al-Hira, Nu'mān had recovered. Hearing of the arrival of his two friends, he had a tent of leather pitched for them and sent them a woman singer to entertain them. He himself often came to visit them. One evening at a party the singer sang Nābigha's poem "O abode of Maḡnā" (*Dumān*, l. 3); the prince delighted exclaimed: "That is an excellent poem!" The Fāsāris thereupon seized the opportunity to intercede on behalf of Nābigha and the generous prince forgave the poet. A little later Nu'mān was put to death by order of the Sāsānian king Kīrā Fārēz for having refused to give him one of his relatives as a wife. Nābigha lamented his patron and retired to his tribe. We do not know when he died.

Before giving an estimate of Nābigha as a poet, we have still to discuss his religion. Darnbourg makes him a monotheist, and in support of his opinion quotes a number of verses in which the poet speaks of God, of the feast of palms, of the cross of Zawa'. On the other hand, Cheikhō thinks he was a Christian. We find, he says (*Christianisme en Arabie avant l'Islam*, Beirut 1923, p. 429-430), in the poems of Nābigha evidence of his belief in God, of his religion and piety, but the arguments are not numerous or of great cogency: a vague mention of God, of David and his son Solomon, of priests present at the obsequies of Mundhir, of the cross of Zawa'. As a matter of fact, Nābigha was a pagan and there is nothing Christian in his poems. The allusions in his poems, even if we accept them as authentic, are in reality only rather faded memories of the Christian ceremonies which the poet had witnessed at al-Hira, and Ghassān and a distant echo of the religious ideas current in the peninsula at this period. As to the word Allāh, it is undoubtedly the result of a substitution for al-Lā [q. v.] made at a later date by some Muslim poet.

Nābigha al-Dhubyānī holds a high position among the poets of ancient Arabia; he is unanimously placed "in the first rank of poets".

In our opinion he possesses in a high degree the two qualities which make a great poet: sensitiveness and imagination. To sincerity of feeling, he adds splendour of imagery and freshness of expression. In him ideas and words, feeling and turn of phrase, matter and form are in perfect harmony. His verses are often bitter, ironical and scathing.

He is also an artist who skillfully uses all resources, all effects and all artifices. His verse is compact, solid and uniform and readily impresses itself on the memory with the idea which it expresses. Of course it is not without its faults: we find a few weaknesses and examples of lack of care.

Tāhā Ḥamīd (*al-Sā'ir al-Jāhili*, Cairo 1926) has recently raised the question once more of the authenticity of the poems of Nābigha and other pre-Islamic poets. Rejecting all that has been handed down about it he regards the old poetry as apocryphal. The discussion of this question however,

as can easily be understood, lies outside the scope of this article.

NABOB. (See NĒ'ĒB.)

NĀBULUS, a town in central Palestine, the name of which is derived from that of Flavia Neapolis built in honour of Vespasian. Its Old Testament predecessor was Shechem, which however lay more to the east, on the site of the present village of Balīza (the name is explained by S. Klein, in *Z.D.P.F.*, xxxv. 38 sq.; cf. R. Hartmann, *Ibid.*, xxviii. 175 sq., as "platanus", from the evidence of the pilgrim of Bordeaux and the *Midrash Gen. 48*, c. 84, § 3). According to Eusebius, the place where the old town stood was pointed out in a suburb of Neapolis. The correctness of this identification of the site of Shechem has now been completely proved by Sellin's excavations; and this also explains how the old name did not as usual drive out the late Greek one. In the time of the Arab writers, the name Shechem was long forgotten and what they tell us refers to Neapolis-Nābulus.

Nābulus is in a long valley (running from east to west) formed by two chains of hills, on the south side Garizim, Arabic [Jabal al-Tur or al-Kiblt] (2,900 feet high), on the north side Ebal, Arabic [Jabal ʿAlāmiya or al-Shamāl] (3,140 feet high). G. Hübscher (*Z.D.P.F.*, xxviii. 98) refers the older name of Neapolis: Mabartha (Mamortha) in Pliny and Josephus (i.e. "crossing", *na'haru*) to the low saddle running right across the valley. The town with its 22 springs is unusually rich in water, which is heard running everywhere and produces a very luxuriant vegetation. Where the road from the south turns westwards into the valley there is a well with the ruins of a church. Unanimous tradition since the fourth century A.D. locates here Jacob's well and it is undoubtedly the same as is mentioned in John iv. 5. About a thousand yards to the north is a building where tradition locates Joseph's grave.

In the post-exilic period Shechem belonged to the territory of the mixed people of the Samaritans whose capital it became after they had built on the hill of Garizim (the Samaritan text of Deut. xxvii. 5 has this name instead of Ebal) a temple as a rival to that of Jerusalem. They were continually at strife with the Jews and in the end John Hyrcanus

in 129 B.C. destroyed Shechem and its temple. At a later date this always turbulent people was equally hostile to the Romans, which caused Vespasian to attack them on Garizim when a large number were slain. Christianity gradually spread in the country and Neapolis became a bishopric. The result was that the Samaritans now turned their arms against the Christians and treated them with great cruelty. After a deadly raid by them, the Byzantine emperor Zeno (474—491) had them driven from Garizim and built a church there. They wrought still greater havoc in the time of Justinian who punished them with great severity and destroyed their synagogues while he rebuilt the churches. This finally broke their spirit; many of them fled to Persia while others became Christians. Their part had been played by the time when Nābulus with many other towns fell into the hands of the Muslims.

The notices of the Arab authors about the town are very scanty. They know that it was inhabited by Samaritans (cf. *al-Sāmīrī*) and some add that, according to the Jews, they are found nowhere else, but it should be noted that Balādhuri (ed. de Goeje, p. 138) speaks of Samaritans in Filasṭīn and Urdunn. Ya'qūbī mentions (p. 328), Nābulus a town near two sacred hills with a population of Jews, foreigners and Samaritans. Below the town is a subterranean city, hewn out of the rock. Muḥaddasī says "Nābulus lies in a valley between two hills, is rich in olive-trees and a stream flows through it. The houses are of stone and there are mills there; the mosque in the centre has a beautiful paved courtyard". In the Crusading period Nābulus is mentioned as unfortified. On Jan. 25, 1120, an assembly of prelates and secular notables was held here with the object of improving the morals of the Christians. Idriṣī mentions the well of Jacob where Christ had the conversation with the woman of Samaria; a fine church had then been built on the spot. The Jewish traveller Benjamin of Tudela (1160—1173) records that there were no Jews in Nābulus, but about 100 Kutannas (Samaritans) who offered burned offerings on the altar on Garizim at the passover and on other feast-days. His contemporary 'Alī al-Harawī says the Samaritans are very numerous. He, as does Yāqūt, always writes Garizim as Kariṣim, a corruption which we already have in the "Agazaren" of the pilgrim of Bordesous. A terrible earthquake in 1202 added to the miseries inflicted on the town by the continual wars between Franks and Muslims. Under the great Mamlūk Sultān Balbars (q.v.) it finally passed into possession of the Muslims. Yāqūt remarks on the wealth of water and fertility of the district; here, he says, is the hill on which according to the Jews, Abraham wanted to sacrifice Isaac (not Ishmael as the Muslims say). When praying, the Samaritans turn towards Garizim. Dimashqī says that Nābulus is like a palace surrounded by gardens; he mentions the pilgrimages of the Samaritans to Garizim where they sacrificed lambs. The Muslims had a fine mosque in the town, where the Qur'ān was recited day and night. According to Khalīl al-Zāhirī (d. 872=1467), the area included 300 villages.

The people of Nābulus retained their unfriendly character and fondness for rebellion so that the town was less visited by pilgrims. Only the modern period has brought order and greater security, but even now the dislike of the Samaritans to strangers as spectators during their passover sacrifices may give rise to trouble.

AL-NABULUSI. [See **ABD AL-GHANI.**]

NADHR (A., plural *nadhūr*; Sūra iii. 57), used as a noun agentis from *n-ḏ-h-r* iv., with the meaning of warner; sometimes also as an infinitive, e.g. Sūra lxvii. 17. The plural *nadhūr* is also found in the sense of an infinitive, e.g. Sūra lxxvii. 6. The term occurs frequently in the Qur'ān; it is even said to be synonymous with *warā*; its opposite is *baḥīr*, *nubāḥīr*. *Nadhūr* as well as *baḥīr* are applied to the prophets, the former when they are represented as warners, the latter as announcers of good tidings (cf. Sūra xvii. 106; xxv. 58; xxxiii. 44; xlviii. 8: *nubāḥīr* *wa-nadhūr*). As an epithet it is used especially in connection with Noah, the great warner before the Deluge, and with Muḥammad himself who thereby receives the stamp of a second Noah (cf. Sūra xxvi. 115; i. 51; lxxi. 2 with Sūra xxxix. 49; xxv. 21; xxxviii. 70; lxvii. 26). Sometimes Muḥammad emphasises his being only a warner (Sūra xli. 8), or his being the first warner who was sent to his people (Sūra xxviii. 46; xxxiv. 43).

The term is found in ḥadīth apart from the common use, known from the Qur'ān, in the curious expression *nadhūr 'uryūn* (Bukhārī, *Niḥāy*, liib 26; *Tiḥām*, liib 2; Muslim, *Faḍḥ*, trad. 16) with which Muḥammad denotes himself. The tradition runs as follows: "Myself and my mission are like a man who went to some people saying: I have seen the army (of the enemy) with my eyes and I am the naked warner". Several anecdotal stories are told by the commentators in explanation of this expression. It is also said by some of them, that in early Arabia a man who saw an approaching danger, stripped himself of his clothes and wound them around his head in order to warn his tribespeople. — The meaning *Nasirite* which in several dictionaries is given to the term *nadhūr* is in the first place does not occur in the Qur'ān, nor in ḥadīth, nor in *Lisān al-Arab* nor in *Taḍqīd al-Arūḥ*; it is, however, used in translations of the Bible.

Bibliography: *Lisān al-Arab*, vii. 54 sqq.; *Taḍqīd al-Arūḥ*, iii. 561 sq.; Ibn al-Aṭṭār, *Niḥāy*, iv. 136; Kasāllān, i. 305; Nawawī's commentary on Muslim's *Ṣaḥīḥ*, Cairo 1283, v. 71.

(A. J. WENSINCK)

NADHR, v.o.w., was taken over into Islām from the pre-Muḥammadian Arabs and underwent modification by the new religion. The idea of dedication is associated with the root *n-ḏ-h-r* which is also found in South Arabic, Hebrew and Aramaic and to some extent in Assyrian. An animal could

be the object of dedication among the Arabs. For example, they dedicated by *nadh*r certain of their sheep, etc., for the 'atira feast in Raddah (*Liṣān al-Arab* and *Djauharī*, s.v.); the dedication which was expressed in solemn formulae signified that the animals were removed from the mundane sphere and placed in the sacred one.

As a rule, a sacrifice was dedicated in order to obtain good fortune in a particular respect. The promise to dedicate an animal when the herd had reached the number of a hundred (*cf. cit.*) had an effect on the prosperity of the animals because the word anticipated the fact. According to the story, 'Abd al-Muṭṭalib similarly dedicated a son to be slain beside the Ka'ba if he should have ten sons and they grew up (*Ibn Hiṣḥām*, p. 97 ff.) but for his *nadh*r 100 camels were substituted. — A childless woman could also vow if she had a son to dedicate him to the sanctuary (*Ibid.*, p. 76; perhaps this story is a literary borrowing). According to the *ḥadīth* of Maimūn bint Karam, her father promised to sacrifice 50 sheep if he had a son (*Yāqūt*, i. 754; *Abū Dāwūd*, *Aimūn*, ḥāb 19; *Ibn Mājjā*, *Kuṣṣarāt*, ḥāb 18). If a child was sick, its mother could dedicate it by a vow as *aḥnas* (from *ḥams*) if it recovered (*Azrakī*, p. 123, s. *eqq.*). Escape from every difficulty was sought by a *nadh*r. During a battle a camel used to be dedicated as a sacrifice (*Wāḳidī-Wellhausen*, p. 39). The traveller in the desert used to make a vow on account of the danger (see the verse in Lane and *Liṣān al-Arab*, s.v.). In distress at sea one promised offerings to God or a saint or vowed to do something oneself, such as fasting (*Sūra* x. 23; xxix. 65; *Abū Dāwūd*, *Aimūn*, ḥāb 20; see also Goldziher, *Mus. Stud.*, ii. 311). During a drought 'Umar vowed to taste neither *sams*, nor milk nor meat till the rain fell (*Tabarī*, ed. de Goeje, i. 2573, s. *eqq.*).

Even if a sacrifice were promised, the vow also affected the person concerned, as we see from the fact that he had his hair shorn not only on the *ḥadīd* but also, for example, when sacrificing after a journey (*Ibn Hiṣḥām*, p. 15, 749; *Wāḳidī-Wellhausen*, p. 324, 381, 429 ff.; *Bukhārī*, *Ḥadīd*, ḥāb 125); for the cutting of the hair ended, as in the case of the Israelite Nazirite, the state of consecration. The vow therefore had always more or less the character of a self-dedication. This aspect was often quite prominent. Ordinary sacred duties such as participation in the *ḥadīd* were assumed as a consecration by *nadh*r (*Sūra* xxii. 30) at which special obligations were assumed e.g. to go to the sanctuary on foot, or barefooted (*Bukhārī*, *Djauhar* *al-Salāt*, ḥāb 27; *Tirmidhī*, *al-Nadh*r wa 'l-Aimūn, ḥāb 17). The sacred condition of *ḥikāf* was assumed as a *nadh*r; thus before his conversion 'Umar vowed to make a nightly *ḥikāf* in the Meccan sanctuary (*Bukhārī*, *Masāḥid*, ḥāb 54; *Aimūn*, ḥāb 29). Such a vow to separate oneself from everyday life in some special way was very frequent among the ancient Arabs; for Labid (p. 17, 19) compares an antelope buck alone among the bushes to one fulfilling his vow (*ḥāḍi* 'l-*nadh*r).

This isolation had the definite object of spiritual concentration and strengthening the soul and thereby influencing the deity. Abstinence was therefore practised in preparation for great deeds, especially in war. The Arabs 'touched no perfume, married no woman, drank no wine and avoided all pleasures

when they were seeking vengeance, until they attained it" (*Ḥamāsa*, p. 447, v. 3 *schol.*); avoidance of wine (*Ḥamāsa*, p. 237, v. 4 *eqq.*) and women (*Killab al-Aghani*, xv. 161; 2nd ed., p. 154) is specially mentioned. These abstinences like the *ḥadīd* rites and the *ḥikāf* are also the objects of a *nadh*r. The form of this vow is for example "wine and women are *ḥarām* to me until I have slain 100 Asadi" (*Aghani*, viii. 68; 2nd ed., p. 65). A definite term may be fixed, such as drinking no wine for 30 days in order to obtain vengeance (*Kais b. al-Khatim*, ed. Kowalski, iv. 28). Forms of abstinence are not to eat meat, not to wash the head, so that the *ḥanūka* is not removed (*Aghani*, ix. 149; 2nd ed., p. 141; xiii. 69; 2nd ed., p. 66; *Ibn Hiṣḥām*, p. 543, 980; *Ḥudhaylīnīlāder*, ed. Wellhausen, N^o. 189), not to anoint oneself (*Wāḳidī-Wellhausen*, p. 201). Refraining from meat, wine, ointment, washing and sexual intercourse are mentioned together (*Aghani*, vi. 99; 2nd ed., p. 97; viii. 68; 2nd ed., p. 66; *Ibn Hiṣḥām*, p. 543; *Wāḳidī-Wellhausen*, p. 73, 94). There is also evidence of complete fasting (*Wāḳidī-Wellhausen*, p. 105, 402). The abstinences, the offering and the deed to be done form the content of the *nadh*r. It is said: *nadh*rta 'ala nafsi and *nadh*rta mālī (*Djauhar* and *Liṣān al-Arab*, s.v.) as well as *nadh*ra dami fulān ('Antara, p. 21, 84; *Kais al-Ruḳaiyat*, p. 52, 5). After a wish has been fulfilled a vow of gratitude may also be taken (*Wāḳidī*, p. 290).

The consecration placed the person making the vow in connection with the divine powers, the *nadh*r was an 'add (*Sūra* ix. 76; xxiii. 27; xviii. 10), whereby he pledged himself. A neglect of the *nadh*r was a sin against the deity (*Imra' al-Kais*, p. 51, 10). The sacred obligation of living made this a *nadh*r or (synonymous) *nadh*r, which one should fulfil (*ḥāḍi*), instead of wandering aimlessly (*Sūra* xxiii. 23; *Wāḳidī*, p. 120; *Labid*, p. 41, 1; *Kumail*, *Ḥāḍiyyāt*, ed. Horowitz, p. 4, 48). The importance of the binding pledge gradually becomes more prominent (*cf. Liṣān al-Arab*, where *nadh*ra is explained by *amḥāda*, ironically *amḥāḍi*, p. 7, 1); the emphasis on the material dedication gradually became less. The abstinences mentioned receive their importance on the one hand from works meritorious to the deity, on the other from the unpleasant deprivations, by which the person taking the vow disciplines himself. Both points of view are seen in the examples quoted. The releasing of slaves or divorcing of wives often form the subject of a kind of vow by which a man pledges himself under certain conditions. A man may also vow to sacrifice all his camels if he is lying (*Ḥamāsa*, p. 667, v. 3). The strict obligation inherent in the *nadh*r makes it closely related to the oath (see *KASAM*).

One can also bind one's family by a vow. A mother swears not to comb her hair or to seek shade until her son or daughter fulfils her wish (*Aghani*, xviii. 205; 2nd ed., p. 205; *Ibn Hiṣḥām*, p. 319; ii. 90). The strength of this kind of "conjunction" is based on the relationship between the two partners. If a dying man vows that his tribe shall slay 50 to avenge him, this binds the tribe (*Ḥamāsa*, p. 442 19). There thus arose in Islām the problem of how far unfulfilled vows had to be fulfilled by the descendants (*Muslim*, *Nadh*r, trad. 1; *Bukhārī*, *Waqḍa*, ḥāb 19; *cf. Goldziher*, *Zshirten*, p. 80).

In Islām the vow and the oath are treated together. In the Qur'ān it is prescribed that unconsidered expressions (*laghw*) in an oath may be broken and expiated (Sūra ii. 225; v. 91). The context shows that the reference is to vows of abstinence, especially relating to food and women. Sūra ii. 226—227 in continuation says that those who bind themselves by *Uā'* not to touch a woman should either break the vow after 4 months or pronounce the formula of divorce. The breach of the oath then requires the *kaffāra*. The *qāḥar* formula is absolutely forbidden (Sūra lviii. 1—5; cf. xxiii. 4); it is a great sin in the eyes of the law, while the *Uā'* is not a sin (see Juynboll, *Handbuch*, p. 284 *sqq.*; Sachau, *Mus. Recht*, p. 13, 68 *sqq.*). The "release from the oath" promised in Sūra lxi. 2 refers to a vow of continence. The same *kaffāra* holds for a broken vow as for an oath. It is probable in this case that we have Jewish influence (cf. *Mishna, Nedūrim*) but the principle of releasing oneself from a vow by doing something else is certainly also originally Arab. But with Islām comes the view that *nagħūr* are useless because they cannot influence God (Bukhārī, *Amān*, bāb 26; *Kādar*, bāb 6; Muslim, *Nagħūr*, trad. 2). Thus we find hadiths which urge the fulfilment of vows as well as those that forbid them. Following hints in the hadiths, we find a systematic division into vows of piety (*nagħūr al-taharrur*), which are intended to acquire merit by a pious deed (*ʿibāʿa*), and vows by oaths which, since they are conditioned, serve to incite, prevent or strengthen. The latter are called *nagħūr al-ladīf* or *ʿiḥḥāf*. They are deprecated but must be treated like oaths. Their matter must not be sinful; according to some, such a vow is invalid, according to others, it is valid but must be broken. Their matter must not already be an individual duty (*wājib ʿind*). The person taking the vow must, like him taking an oath, be *mukallaf* and be acting of his own free-will.

(JOHS. PEDERSEN)

AL-NADIM, ABU 'L-FARAJ MUHAMMAD b. ABI YA'QUB ISHĀQ AL-WARRĀQ AL-NADIM AL-BAGHDĀDĪ, Arabic bibliographer, compiled the *Fihrist* in 377 (987—988). Little is known about his life. According to a statement which goes back to Ibn al-Nadīm's (d. 643 = 1245) *Ḍhal' al-Tarīkh* Baghdad (see Flügel's edition, p. xii, note 2), he died in 385, according to another statement (see Ibn Hadjar al-Asqalānī, *Lisān al-Millāt*, v. 72) probably 388 (the figure is damaged in the Haidarabad edition). Both dates are in contradiction to the fact that in the *Fihrist* events of 392 (p. 87, a) and "after 400" (p. 169, 13) are mentioned, unless these are additions by another hand. A clue to the date of his birth is given from his account (p. 337, a) of a meeting with a learned

man in the year 340; this suggests 325 as the latest date for his birth. Nothing is known of his family. There is no reason to connect him with Ishāq b. Ibrāhīm al-Mawallī al-Nadīm (d. 235 = 849) or with Vahyā b. al-Nadīm, a pupil of al-Balādhurī (d. 279 = 892). His father was a bookseller (*warraq*) (p. 303, 21, 318, 6, 351, 14). Whether the epithet *al-Nadīm* "table companion", i.e. member of the circle of a caliph or other great man, refers to the father or to a remote ancestor is unknown. It is not impossible that it refers to the author of the *Fihrist* himself; against this however is the fact that he is usually quoted as Ibn al-Nadīm. That Baghdad, if not his birthplace, was at least his place of abode is evident from passages, like p. 337, 26, 349, 17 (see below) and the frequent mention of Baghdad among his acquaintances (p. 132, 6, 219, 25, 236, 19, 266, 2). He several times mentions a stay in Mōsul (p. 86, 22, 160, 21, 190, 21, 265, 23; cf. also p. 283, 2). We know nothing of other journeys by al-Nadīm (Dār al-Rūm, p. 349, 24 is the name of the Latin quarter in Baghdad as V. v. Rosen has shown). His teachers and authorities also point to Baghdad. He most frequently quotes the authority of the grammarian al-Sirāfi (d. 368) (all the quotations can be found in the latter's *Akhbār al-Nahwīyīn al-Baghdādīyīn*). Personal relations are indicated by p. 56, 23 and the mention of his sons (p. 31, 23, 45, 11, 62, 23). Al-Nadīm also studied under Ibn al-Munajjid (p. 144, 11). He gives traditions heard from Muḥammad b. Yūsuf al-Nakīf (p. 24, 22, 23, 2). He also gives traditions from Abu 'l-Faraj al-Ishāqī (p. 141, 17 = *Kitāb al-Aghāni*, i. 3 *sqq.*) and from Abu 'l-Faḥ b. al-Nahwī (p. 145, 23) celebrated for the reliability of his transcripts (p. 145, 23). He also mentions as his teacher Abū Sulaimān al-Manṣūrī (p. 241, 14) whom we know from Abū Ḥayyān's *Muḥḥaṭṭar*. He was friendly also with the logician Ibn al-Djarrāḥ (p. 244, 6, 245, 12) and with the Christian philosopher Ibn al-Kharrāb (p. 245, 12) and with Vahyā b. 'Adī (p. 264, 8). This circle of friends is very much in keeping with al-Nadīm's friendly nature, the breadth of his intellectual interests, his intelligent interest in other religions and his tolerance, which finds expression in *Maḥāla*'s 5 and 9 of his work. That he was a Shi'ī and Mu'tazilī did not escape his biographers (cf. Goldziher, in *Z.D.M.G.*, xxxvi. 278 *sqq.*); thus he uses *Shi'ī* and *Imāmī* in the sense of Shi'ī and Sunni respectively, calls the Sunni traditionalists *al-Hadhwiya* (p. 231, 12), claims many of their leaders for the Zaidiya (p. 178, p. 23), says that al-Shāfi'ī was a man of decidedly Shi'ī outlook (p. 209, 12) and praises al-Wāḥidī (p. 98, 20) as a Shi'ī. Shi'īs were numerous among his friends (p. 139, 27 and p. 154, 23) and acquaintances (p. 178, 6, 190, 21, 197, 11, 198, 4). Al-Nadīm like his father was a bookseller. This is nowhere expressly stated but is evident from the whole plan of his work in which he faithfully records not only scientific literature but also the numerous diwāns of contemporary poets and the vast mass of anonymous light literature, love stories, fairy tales and books of adventure, indeed even works of a popular nature neglected alike by scholars and bibliophiles, books on good manners, cookery books, books on poison, books dealing with hunting and sport, down to collections of farces, books on magic and on prophecy, in brief everything that was on the Baghdad book market in the fourth

(tenth) century. That he was a bookseller is also indicated by the frequent particulars about the size of the books dealt with (cf. especially, p. 159, 12), about copies in the hand of famous scholars, about the demand for books (p. 70, 1; p. 77, 14; 79, 23) and about the book trade (p. 271, 3; 359, 20). He several times mentions other booksellers (p. 264, 1; 299, 4; 355, 12).

The *Fihrist* exists in two recensions (on the manuscripts, see *Z.D.M.G.*, lxxiv, 111 *sqq.* and the literature there given; to these may now be added a fragment in Tonk and a private manuscript in Medina). Both were made in the year 377 (987). The longer contains ten *maḥṣūṣāt*, of which the first six deal with the literature of Islām (1. *Qurʾān*, 2. grammar, 3. history etc., 4. poetry, 5. dogmatics, 6. law), while the last four deal with non-Islamic literature (7. philosophy and "ancient sciences", 8. light literature, 9. history of religion, 10. alchemy). The shorter version contains only the four last *maḥṣūṣāt* of the longer one, i.e. the Arabic translations from the Greek, Syriac, Persian and Sanskrit and the other literature based on these models. It is mentioned by Ḥajjī Khalifa (Sambul, ii, 211) under the title *Fann al-Ulūm*. The two recensions have in common an introductory section on the various forms of writing. — A survey of the contents of the *Fihrist* follows the preface (see also Flügel, in *Z.D.M.G.*, xiii, 190 *sqq.*). The arrangement there given is strictly adhered to in the book. The special quality of the book and its value lies in the fact that it gives the Arabic literature of the first four centuries in a bibliographical arrangement while the biographical method is the only one used in other contemporary sources. Al-Nadīm, it is true, as a rule treats of his subjects in biographical sketches but it is the list of works of the author that is the main thing. Sometimes a branch of literature is treated purely bibliographically under its various branches (e.g. the literature of *Qurʾānic* exegesis, p. 35, 20—37, 11; also p. 87, 88, 170, 171). This arrangement was necessary with the anonymous literature, especially in the eighth *maḥṣūṣa* (p. 305 *sqq.*). A further step towards treatment from the point of view of the literary historian is found in the brief introductions and surveys (e.g. on the pre-Othmanic recensions of the *Qurʾān*, p. 26 *sqq.* on the beginnings of Arabic grammar, p. 40 *sqq.*). In the last four *maḥṣūṣāt*, such sections (e.g. on the origins of philosophy, of medicine, of alchemy, the beginning of the translated literature, the origin of the "1000 tales") are so extensive that they have the character of a regular history of literature to a much greater degree than the more bibliographical first six *maḥṣūṣāt*. The ninth *maḥṣūṣa* occupies a special position; it is a treatise on the history of religion in which the bibliographical element is not at all prominent. — The sources used by al-Nadīm are mainly of a literary nature. He prefers to use works in copies from the hand of reliable copyists. He comparatively rarely quotes personal authority. — Although a younger contemporary of al-Nadīm's, al-Waṣṣṭ al-Maghribī (d. 418 = 1027), prepared an improved edition of the work, it seems at first to have had only slight influence. The earliest author to make considerable use of the first four *maḥṣūṣāt* (in al-Maghribī's edition) was Yāqūt (d. 626 = 1228) (see Bergsträsser, in *Z.S.*, ii, 185). He claims to have consulted a copy in al-Nadīm's own hand, as does the lexicographer

al-Saghānī, d. 650 (1252) (see *Kātibnāt al-Adab*, iii, 83 *po*). Ibn al-Kāfī (d. 624 = 1226) and Ibn Abī Uṣayb'a (d. 668 = 1269) copied much from the *Fihrist*. In later times it is only occasionally quoted, e.g. by al-Dhahabī (d. 748 = 1347) and Ibn Ḥajar al-ʿAsqalānī (d. 852 = 1448) and lastly by Ḥajjī Khalifa (d. 1067 = 1656) and al-Khafāḍī (d. 969 = 1561). — Al-Nadīm also wrote a *Kitāb al-Awṣāf wa 'l-Taḥṣībāt* (*Fihrist*, p. 12, 2) which has not come down to us.

Bibliography: *Das Kitāb al-Fihrist mit Anmerkungen* hrsg. v. G. Flügel, 2 vols., Leipzig 1871—1872; reprinted Cairo 1345 (also contains the text of the Leyden fragments published by Houtama, in *W.Z.K.M.*, iv, 217 *sqq.*). A new edition is in preparation for the *Bibliotheca Islamica*. — The earlier literature is given in the preface and in the notes to Flügel's edition. — Yāqūt, *Irshād al-Arīb*, ed. Margoliouth, vi, 408; Ibn Ḥajar al-ʿAsqalānī, *Liṣān al-Miʿān*, Haidar-ābād 1331, v, 78; Brockelmann, *G. A. L.*, i, 147; J. Fück, *Eine arab. Literaturgeschichte aus dem 10. Jahrhundert* (*Z. D. M. G.*, lxxiv, 11 *sqq.*); H. Ritter, *Zu den Handschriften des Fihrist* (*lit.*, xvii, 15 *sqq.*). Considerable sections of the *Fihrist* are dealt with separately in the following works: A. Müller, *Die griechischen Philosophen in d. arab. Überlieferung*, Halle 1872; Suter, *Das Mathematikerverständnis im Fihrist* (*Abh. z. Gesch. d. math. Wiss.*, vi, 1892); do., *ibid.*, x, 1900 and xiv, 1902; M. Steinschneider, *Die arabischen Übersetzungen u. d. Griech.* (*S. Z. D. M. G.*, i, 371 *sqq.*); Kessler, *Mani*, Berlin 1889, i, 331 *sqq.*; Berthelot, *La chimie au moyen-âge*, Paris 1893, iii, 26 *sqq.* (JOHANN FÜCK).

NADIM, AHMAD, an Ottoman poet, born in Stambul, the son of a judge named Muḥammad Bey who had come from Mersin. His grandfather (according to Gibb, *H. O. P.*, iv, 30) was a military judge named Muṣṭafā. Ahmad Raṣṣ mentions as his great-grandfather Kara-Çelebi-çāde [q. v.] Maḥmūd Efendi who also was a military judge. The genealogy given by Ahmad Raṣṣ is however wrong because he confuses Karaṣmūt Muḥammad Paṣha [q. v.] with Rūm Muḥammad Paṣha. The statement that Ahmad Nadim is descended from Djalāl al-Dīn is therefore simply the result of confusion. Little is known of his life. He was a *shadervān*, later on intimate terms with Ahmad III and his grandvizier Dāmūd İbrāhīm Paṣha [q. v.]. He probably got his *laqab* al-Nadīm from this friendship. Latterly he held the office of librarian in the library founded by his patron Dāmūd İbrāhīm Paṣha. On hearing of the end of İbrāhīm Paṣha and the deposition of the sultan, Nadim lost his life at the beginning of October 1730 (Rabī' I, 1143) in a horrible way; while escaping from the mob leaving the grand-vizier's palace he fell from the roof and was killed. He was buried in Ayās Paṣha in Pera beside the historian Fındıklı İbrāhīm Muḥammad Agha.

Ahmad Nadim is regarded as one of the greatest of Ottoman poets, who is still appreciated for his pure language, free from foreign additions. Many literary historians have discussed his merits as a poet (cf. the specimens collected by Gibb, *H. O. P.*, iv, 30 *sqq.*). His collected poems (*Diwān*; printed Būlak, n. d.; a more recent critical edition with introductions by Ahmad Raṣṣ Bey and Muḥammad Fu'ād Bey appeared in 1338—1340 in Stambul; there are manuscripts of the

Divan in Europe in Munich, London and Vienna) enjoys great popularity. Nadir translated into Turkish the history of Minedjidim-bashi Ahmad Efendi (cf. F. Babinger, *G. O. W.*, p. 234 sq.; cf. thereon *J. A.*, ser. 7, xlii, 272); he was also one of the Turkish translators of 'Aini's history (cf. F. Babinger, *G. O. W.*, p. 259 sqq.; the edict relating to this is in Ahmad Rafiq, *Ilari on ikinci azirda Istanbul kuyati, 1100—1200*, Stambul 1930, p. 84 sq.) but the MS. seems to be lost.

Bibliography: Ahmad Rafiq's preface to the new edition of the *Divan*; *Sigill-i 'othmani*, iv, 549 (very superficial; here his grandfather is said to have been a certain *Sadr* Muslih al-Din and his father the judge Muhammad); *Irsmali Muhammad Fu'ad, 'Othmani Mu'ellifi*, ii, 453 sq.; J. von Hammer-Purgstall, *G. O. D.*, iv, 310 sqq. (who does not appreciate him highly); Gibb, *H. O. P.*, iv, 30 sqq.

(FRANZ BABINGER)

NADIR SHAH, king of Persia (1147—1160 = 1736—1747).

Origins. Nadir b. Imam-kuli b. Nadir-kuli belonged to the Kirghiz clan of the Turkoman tribe of the Afshars, of which a section had settled in northern Khurasan, and was born on the 28th Muharram 1100 (Oct. 22, 1688) at Kukhan. Entering the service of Tahmasp II, he was called Tahmasp-kuli Khan but after his coronation his original name was improved to Nadir, "the rare one". At an early date Nadir distinguished himself in the incessant fighting with the Turkomans of Nasir, the Camishgazzak Kurds of Khabushan (Kūshān), the Orbeks, the Tatars of Marw and even against his Afshar fellow tribesmen. The little nucleus around Nadir consisted of his Afshar relatives, some Kurds of Daragaz and Ahiward, and 300—400 families of Djalayir Turkomans with their chief Tahmasp-kuli Wakil.

Fighting in Khurasan. During the Afghān invasion of Persia, Mashhad was occupied by Malik Mahmūd, a scion of the Sistan family. Nadir fought against Malik Mahmūd at first on his own initiative. When the Safawid Tahmasp II, driven from his other lands, arrived in Khurasan, Nadir very cleverly supplanted the commander-in-chief Fath 'Ali Khan Kadir and on 16th Rabi' II (Dec. 22) captured Mashhad with the help of treachery. Henceforth it became his headquarters. There were already signs of a breach between Nadir and Tahmasp II at this time.

The Shah urged Nadir to set out against his enemies the Ghilzai Afghans but Nadir wished first of all to dispose of the nearer enemy, the Abdali Afghans of Herat, but the campaigns of 1728 (against the Abdali and the Turkomans) had no success. Nadir however was able to extend the sphere of his activities; he ousted from Astarabad and Mazandaran the governors appointed by Tahmasp and came into conflict with the Russians and the Ghilzai Afghans.

The Abdali. In the meanwhile trouble had broken out in Herat between Allah-yar Khan and Dhu 'l-Fikar Khan. Nadir re-established Allah-yar Khan but transplanted many tribes to Khurasan (1147 = 1727).

The Ghilzai. At this time Ashraf Ghilzai laid siege to Simnan while his general Saydal had gone to Bistun. On the 6th Rabi' I (Nov. 27, 1729), Nadir defeated the Afghans on the banks of the river Mihnanduz. This victory he followed up by others.

Nadir in S.W. Persia. Tahmasp appealed to Nadir to complete the deliverance of the country. Leaving Shiraz and crossing Laristan, Nadir arrived in Burujird where the Shah sent him a crown set with precious stones and a commission (*shah-nama*) as wali of all Khurasan along with Mazandaran, Yazd, Kirman and Sistan (cf. also 'Ali Hasa, p. 189). Tahmasp also gave his sister Gawhar-ahad to Nadir and betrothed his other sister Fatima-sultan to Rida-kuli Mirza.

The Ottomans who then occupied the whole of western Persia and the greater part of Transcaucasia were reluctant to leave Persia. Nadir occupied Nihawand, defeated the Turks at Malayer, retook Hamadan and on the 27th Muharram 1143 (Aug. 13, 1730) Tabriz was retaken.

Nadir returns to the east. Nadir learned in Tabriz that Dhu 'l-Fikar Abdali having driven Allah-yar Khan from Herat was fighting Nadir's brother Ibrahim Khan under the walls of Mashhad. Nadir at once set out for Khurasan, crossing the steppe of the Yomut Turkomans and towards the end of Rabi' II (Nov. 1730) was at Mashhad where he reviewed 56,000 families of the tribes transplanted from other provinces.

On the 4th Shawwal (April 12, 1731) Nadir was 3 farsakhs from Herat. In the month of August the Abdali restored Nadir's candidate Allah-yar Khan but the latter regaining contact with his tribe now rebelled. It was not till Ramadan 1, 1144 (Feb. 27, 1732) that Herat was taken.

Failure of Tahmasp II. Taking advantage of the absence of his commander-in-chief, the Shah resumed the initiative in the military operations and in Djumada II 1143 (end of Dec. 1730) set out against the Ottomans. Fearing the return of Nadir the Ottomans on Jan. 10, 1732 signed a preliminary treaty at Baghdad by which the Persians retained only the lands south of the Araxes. Later on Jan. 21—Feb. 1, 1732 the Shah's representatives signed at Rasht a treaty with the Russians by which the latter bound themselves to evacuate the lands south of Saliyan (on the Kur) while the return of Bakli and Darband was made dependent on the reconquest of Transcaucasia by the Persians.

Deposition of Tahmasp II. Nadir was indignant at the peace with the Turks signed after a defeat. Setting aside the Shah's authority, Nadir Shah denounced the treaty and appointed his own governors everywhere. Tahmasp was deported to Khurasan and his son 'Abbasa III, an infant in the cradle, proclaimed king on the 17th Rabi' I 1145 (July 7, 1732).

First campaign against the Ottomans. Having punished the Bakhtiarys and the Kurds, Nadir occupied Zohab and besieged Baghdad (Jan. 1733). Ahmad Pasha made the negotiations drag on until the army commanded by Topal 'Othman Pasha had time to come to Mesopotamia. On 6th Safar 1146 (July 19, 1733) Nadir Shah lost the battle fought on the Tigris and returned to Hamadan via Bahriz and Mandandjin (Mandal).

Arriving there on 22nd Safar (Aug. 4) Nadir set out again for Zohab on the 22nd Rabi' II (Oct. 2) and then attacked Memish Pasha who had occupied the pass of Agh-darband (1st Djumada II = Nov. 9, 1733). Then Topal 'Othman Pasha with the bulk of his army intervened in the battle but lost it and had his head cut off. The Ottomans hastened to abandon Adharbaidjan. By the 15th Radjab (Dec. 22) Nadir was already on his way

to Persia via Baghshay (Ba-kushay), Bayat, Bayan and Shidaktar.

Mahmūd Bālūc. The reason of this hurried move was the rebellion raised by Mahmūd Khān Bālūc in S. W. Persia. Mahmūd Khān was quickly driven from the pass of Shūlīstān and on 27th Shawwāl (Feb. 1, 1734) Nadir reoccupied Shīrāz.

Campaign in Transcaucasia. In Isfahān Nadir received the Turkish ambassador 'Abd al-Karīm Efendi and informed him that the retrocession of Transcaucasia was a *pace qua non* of peace. On the other hand, prince S. D. Golitsine was received at Isfahān on May 20-31, 1734 and thereafter by Nadir's order accompanied him everywhere (his itinerary in Lerch-Schmese). On the 12th Muharram 1147 (June 17, 1734) Nadir left Isfahān for Āghar-bāydān and as the Turks did not reply, Nadir began by attacking the Daghestān chief (Ghāzi-Kumūk) Surkhay whom the Porte had appointed governor of Shirwān. Tahmasp Kuli Djalayir defeated the Daghestānians near Dīwā-batān (in the district of Kābala) while Nadir to cut off the retreat penetrated into the heart of the extremely difficult region of Ghāzi-Kumūk. In spite of the exploits of the Abdālī the success gained in Daghestān was only partial for Surkhay had escaped to the north.

On 6th Djumādā II (Nov. 3, 1734) Nadir was before the walls of Gandja, which was defended by 'Alī Pāshā. The siege necessitated considerable works and prince Golitsine procured Russian engineers for Nadir. On March 21, 1735 a treaty was signed at Gandja by which Russia and Persia became practically allies.

On 1st Muharram 1148 (May 26, 1735) Nadir went first to Kars but the encounter with 'Abd Allāh Pāshā Köprülü-bade took place near Erivān on the plain of Baghsward; on 26th Muharram (June 18, 1735) the Ottomans were defeated. Gandja thereupon capitulated on the 17th Safar (July 8) and Tiflis on 22nd Rabi' I (Aug. 13).

Nadir returns to Daghestān. Via Tiflis [q. v.], from which 6,000 families were transferred to Khurāsān, Nadir attacked the Lezgi of Dār and Tala (north of the Alazan). The Khān of the Crimea Kaplan Giray, who had in the meanwhile advanced as far as Darband and had placed his nominees everywhere, withdrew to the Crimea and Nadir endeavoured to pacify Daghestān but Surkhay still evaded capture.

Nadir proclaimed king. On 13th Ramaḍān (Jan. 27, 1736) Nadir came to Mughān [q. v.] where in the meanwhile the governors and notables of the province had assembled. It was explained to them that Nadir, having liberated Persia, wished to retire to Khurāsān and that the delegates were free to put the government in the hands of Tahmasp II or 'Abbās III "who were alive". Nadir finally accepted the crown but on condition that the Persians abandoned the Shi'a practices introduced by Ismā'īl I which were "contrary to the beliefs of Nadir's ancestors". The Persians were to form a fifth orthodox madhhab, placed under the patronage of the Imām Djalāl Sādiq. A document to this effect was sealed by the assembly. The five clauses of the treaty to be proposed to Turkey were next drawn up: 1. the Turks were to recognise the new Djalālī rite; 2. the latter was to be given a place of prayer (*rakna*) at Mecca; 3. Persia was to send an amir al-hudūd every year through Syria; 4. prisoners should be exchanged and 5. ambas-

sadors were to be exchanged after mutual approval of the appointments. The formal coronation of Nadir took place on Thursday, 24th Shawwāl 1148.

Kandahār. This principality in which Husain Khān, brother of Mahmūd, still asserted himself remained the only black spot on the horizon. Leaving Isfahān on 2nd Shawwāl (Feb. 3, 1737), Nadir was before Kandahār before Nawrūz 1149 (March 1737) and had a new town built on the site of his camp (Surkha-Shir) which was called Nadirābād.

Kandahār capitulated on the 2nd Dhu 'l-Ka'da 1150 (March 23, 1738). The citadel was dismantled.

Expedition into India. So far Nadir's military expeditions had been dictated by a desire to reestablish the old frontiers of the Safawid empire. The expedition to India was provoked solely by the attraction of ill-guarded provinces and by the desire to replenish the treasury exhausted by repeated campaigns. Ghazni was occupied on the 22nd Safar 1151 (June 11, 1738), Kābul on 12th Rabi' I (June 30), Djalālābād on 8th Djumādā II (Sept. 17). From the neighbourhood of the latter town, the prince Rida-Kuli was sent back to Persia to act as regent; he and his brother Naṣr Allāh were given crowns.

Going via Sarēbbā Nadir avoided the Khairat Pass and took prisoner Naṣr-Khān, governor of Faghāwar. On 15th Ramaḍān (Dec. 27) Nadir left this town. He next took Lahore and reappointed the local governor Zakariyā-Khān (a Khurāsānian). (Naṣr-Khān also was restored to his post). Leaving Lahore on 26th Shawwāl (Feb. 6, 1739) Nadir learned that Muhammad Shāh had reached Kānāi and was in a place between the jungle and the river. He succeeded in cutting Muhammad Shāh off from his capital and hastened to attack the reinforcements which Sa'ādat-Khān (a Khurāsānian) was bringing from the province of Oudh. Thus began the decisive battle of 15th Dhu 'l-Ka'da 1151 (Feb. 24, 1739) in which the commander-in-chief Khān Dawrān was mortally wounded and Sa'ādat-Khān captured. Nadir and Muhammad Shāh entered the capital where Nadir's name was inserted in the *khutbas* and coins struck in his name. On the 15th Dhu 'l-Hijjā (March 26, 1739) a rumour spread that Nadir had been assassinated and the populace massacred 3,000-7,000 of his soldiers. Next morning Nadir went to the mosque and gave the signal for the massacre of the inhabitants. On 26th Dhu 'l-Hijjā (April 6) Naṣr Allāh Mirzā was married to a Mughal princess. On 31st Safar 1152 (May 12, 1739) a great council was held in Dihli in the course of which Nadir replaced the crown on the head of Muhammad Shāh but the latter had in return to cede to Nadir all the provinces north of the Indus. The amount levied by Nadir cannot be estimated. According to Anandām, who was attached to the vizier's office, it amounted to 6,000,000 rupees in specie and 500,000,000 in jewels and precious stones, including the Koh-i-Nūr diamond and the Peacock throne. Large sums were distributed among the soldiers and the people of Persia exempted from taxation for three years.

Nadir left Dihli and reached Kābul on 1st Ramaḍān (Dec. 12). Now took place one of the most remarkable of his expeditions. He suddenly turned back to reduce the lord of Sind Khudā-yar Khān 'Abdālī (a native of Siwt, cf. Malcolm, *op. cit.*, ii. 88) and going via Bangash, Lākānā and Shahdād-pūr penetrated into the desert south of

the Indus and took Khudā-yār prisoner; he had shut himself up in Umārkot (north of Thar and Parkar in the province of Bombay). Having organised his Indian possessions in three provinces Nadir returned to Nadir-ābād (via Stwt and Shāl) on 7th Šafar (May 5, 1749).

Nadir in Turkestan. Nadir returned to Herāt on 10th Rabi' I (June 5) and after a fortnight devoted to festivities set out for Balkh which he reached on 7th Djumādā I (July 31). Arriving before Bukhārā on 19th Djumādā II (Sept. 22), Nadir treated Khān Abu 'l-Faiz kindly and renewed his investiture by crowning him with his own hands. The Oxus was proclaimed the frontier and the Khān had to supply Nadir with 20,000 Ozbegs and Turkomans, which indirectly left in the hands of the conqueror the control of the internal affairs of Bukhārā.

On the 16th Radjab (Oct. 7), Nadir had set out for Khwārizm. The fleet followed the army. The Khān Il-Bars of Hazārāsp retired to his fortress of Khanakāh which surrendered on 24th Šahbān after bombardment. Finally Khrwa, the capital of the kingdom, also capitulated. By 4th Shawwāl (Dec. 23) Nadir had returned to Čardjūly and entered Mashhad at the end of Shawwāl.

Nadir sets out again for Transcaucasia. While in India, Nadir had learned of the death of his brother Ibrahim Khān who had been killed by the Lari rebels of Džar and Tala. To punish them, Nadir left Mashhad and on his way learned that the Abdālī troops who had been sent in advance had already ravaged Džar, Džawukh (?) and Aškīr, but the pacification of Daghestān was by no means complete.

An incident that followed marks the turning-point in the career of Nadir Shah. On the 28th Šafar (May 15, 1741) near Kafā-yi Awlād (Mazandarān) an unknown man concealed in the brushwood shot at Nadir, wounding him slightly. Connecting this with events in Daghestān Mahdī Khān says that the crime was committed by a slave of the son of Dilāwar Khān Tāimani (q. v.) but suspicion very soon turned upon the prince Rījā-Kulī who had besides not behaved well during his regency. He was sent for the time to Tihīn while Nadir continued his march via Kāzwīn, Karadjadagh, Bards' and Kābala.

In June 1741, for the third time, Nadir entered Daghestān and remained there a year and a half. The shamkhāl of Tarkhān, the *umī* of the Kara-Kaytak and Surkhāy Khān of the Ghāzī Kumūk came over to Nadir but new difficulties kept cropping up. Relations with Russia became somewhat strained for the Russian representatives suspected Nadir of designs on the northern Caucasus. As a precaution the Russians in May 1742 concentrated 42,000 men at Kīrlar (s. Butbow, I. 220). Cares were undermining the health and character of Nadir. At the beginning of Dec. 1742 when the camp was at Bāghlu the heir to the throne Rījā-Kulī, denounced by the author of the attempt on Nadir in Mazandarān, was blinded after a form of trial. Nadir himself was thoroughly upset by this incident. Rebellion was now threatening everywhere (in Khwārizm and in Balkh).

Third campaign against the Turks. In Dhu 'l-Kāda I 1742, the Turkish ambassador brought from Constantinople a letter from the Sultan refusing to recognise the fifth *madghab*. Nadir then reminded the Sultan that the whole

of Persian territory had not been regained from Turkey and added that he soon would take the field to make his own terms.

Nadir left Daghestān on the 16th Dhu 'l-Hijja (Feb. 7, 1742) and came to Kirkūk (14th Djumādā II = Aug. 5, 1742) which capitulated as did Irbil. On the 26th Radjab (Oct. 5) Nadir arrived near Mawqil but the siege of this fortress was unsuccessful and on 2nd Ramaḡān (Oct. 20) he retreated to Kirkūk and Khanakān. Friendly relations were established with Ahmad Pasha of Baghdad. Nadir with his wives made the pilgrimage to the Shi' and Sunnī sanctuaries of Mesopotamia and on the 24th Shawwāl 1156 (Dec. 12, 1743) summoned a great assembly of ecclesiastics at Najaf. The document drawn up by Mahdī Khān summing up the discussions confirmed the renunciation by the Persians of the "heresy of Šahā Ismā'īl", while the "ulama" of Mesopotamia and Transcaucasia recognised the claims of Džāfar al-Šadīk and declared the special features (*farūq*) of the Persian beliefs compatible with Islām. The Sunnī theologian 'Abd Allāh b. Husain al-Suwaidī, *Kitāb al-Hudūd al-farīya li-tafah al-Firāk al-Ilāmīya*, Cairo 1324, also gives a very interesting summary of this dispute; cf. Ritter, *ib.*, xv., 1926, I. 106 and the detailed account by Prof. A. E. Schmidt, *Ishtori-i sunnī-ko-chīlīskīh atnashenī* in the *Id al-Djumāl* (Barthold Festschrift, Tashkent 1927, p. 69-107).

Rebellions. The strange abandonment of the campaign in Mesopotamia is to be explained by the new risings in the east. Much more important was the rising in Fārs led by the beglerbegi Taqī Khān, a great favourite of Nadir. He was ultimately captured and castrated. In Astarābād the Kādžars rose against the oppression of the governor's son (Hanway, *Hist. Account*, I. 192). Nadir had to send his nephew 'Alī Kulī to Khwārizm. Finally the Ottomans of Kārs disseminated in Aḡharbāldjān letters from the new pretender Šafī Mirzā (Muḡammad 'Alī Rafsīndjānī) and then refused to begin an exchange of prisoners.

Fourth Campaign against the Turks. In the meanwhile the Porte equipped a new army (150,000 horse and 40,000 janissaries) which advanced on Erzerum and Kārs under the command of the former vizier Yegen Muḡammad Pāshā while 'Abd Allāh Pāshā Džebedjī's army went via Diyārbakr and Mawqil. On the 21st Radjab (Aug. 20) came the news of the victory won by Naḡr Allāh Mirzā over 'Abd Allāh Pāshā's army (near Mawqil) and at the same time Yegen Muḡammad Pāshā died leaving his army in complete disorder. Nadir again won a brilliant victory (on the very scene of his first victory in 1735) but then, quite unexpectedly, wrote to the Sultan saying he was abandoning the first two clauses of Muḡhān. Personal fatigue may explain why Nadir could not exploit his success.

On Sept. 4, 1746, peace was signed with the Turkish envoys and on 10th Muharram 1160 (Jan. 22, 1747) the Shah's representatives (Muḡtafā Khān Šamlu and the historian Mahdī Khān) set out for Constantinople with the *ḡulsh-nāma*. Nadir renounced his famous religious clauses in favour of the Sultan, "the Khalifa of the people of Islām and the glory of the Turkoman race". By the treaty the frontier was restored to that of the time of Murād IV (cf. TABRIZ) but in a platonic fashion, Nadir expressed the wish to receive one

of the provinces which had belonged to the "Turkoman Sultans".

On the 10th Muharram, Nadir left for Kirmān marking his route by piles of skulls erected everywhere. After the Nawrūz, Nadir returned to Mashhad and devoted himself to "spilling the blood of the innocents". His conduct was now clearly abnormal. In an epilogue to his history written after the death of Nadir, Mahdī Khān records the denunciations, executions and extortions carried out by the agents of the treasury and the ruin of the country, which had however begun before the Indian expedition (Otter, *Résidents russes*, Hanway, I. 230). The Shī'ī opposition must also have been intensified in view of the frankly Sunnī turn which Nadir's "Khurāsānīan" policy had taken.

The rising in Sīstān, which brought matters at a head was provoked by the activities of the tax collectors who were demanding a contribution of 300,000 tumāns from the province. 'Alī Kulī Mirzā, nephew of Nadir, put himself at the head of the rebels. Even Tahmāsp Kulī Khān Dīlāyir, the most faithful prop of the throne, wanted to proclaim one of Nadir's sons as king. The troubles spread to Khurāsān and the Kurds of Khābāshān raided the royal stables at Rādān. Nadir marched on them but on the eve of 11th Djumādā II 1160 (June 20, 1147) he was assassinated in his camp near Fathābād by the Khājār and Afghār chiefs in conspiracy with the bodyguard. Father Barin was a witness of the disorder which broke out in the camp after the assassination. On the 27th Djumādā II (July 5, 1752) 'Alī Kulī Mirzā came from Herāt and was proclaimed king. All the royal princes were massacred.

The treasure amassed by Nadir was soon scattered to the winds; the country, utterly exhausted, was in the throes of crisis. Nadir's attempts to compose religious difficulties had failed completely, but Persian territory and its periphery were cleared of enemies. But for Nadir Shāh, Persia would probably not exist, even in its present bounds.

General surveys: Sir J. Malcolm, *History of Persia*, 1815, p. 33-108; C. R. Markham, *A general Sketch of the History of Persia*, L. 1874, p. 298-318; Müller, *Der Islam im Morgen- und Abendland*, 1887, II, 379-382; C. Horn in the *Grundriss d. Iran. Philologie*, II, 587-592; Sir P. Sykes, *A History of Persia*, 1915, II, 331-369; E. G. Browne, *A Liter. History of Persia*, IV, 132-138 (following Hanway). All these are obsolete or defective. A thesis on Nadir for a doctorate of London is in preparation by L. Lockhart. Cf. also R. Stuart Poole, *The Coins of the Shahs of Persia*, Brit. Mus., 1887, p. xlix, lxi, 72-84 (60 pieces described); R. B. Whitehead, *The Coins of the Durrani and of Nadir Shāh*, Oxford 1933; General Kishmishiev, *Pokhod Nadir Shaha v Herat, Kandahar, Indiyu i vostochnu v Persii poisle yego smerti*, Tiflis 1889 (Nadir's campaigns from the soldier's point of view; cf. *Zap.*, VI, 1892, p. 351); Sir Mortimer Durand, *Nadir Shah*, London 1908 (a novel, with several contemporary illustrations); do., *Nadir Shah*, in *J. R. A. S.*, 1908, I, 286-298 (general sketch); Sa'id Naftai, *Akhira-yi yadigar-i Nadir-shah*, Tibriz, *Madjalla-yi Sharh*, 1300, 31 pages (story in dramatic form). The career of Nadir Shah impressed the imaginations of the peoples whom he conquered. In addition to Indian and Persian panegyrics there is a poem in the *Gurani* dialect (spoken in Kurdistan): on Nadir Shah and Topal 'Othman Pasha and a Daghestanian song collected in the district of Ghunib: on the highlanders' fight against Nadir (cf. *Daghestanskii zhurnal*, Makhache-Kala, 1927, III, p. 31-33). In Europe of the XVIII century it was seriously discussed whether Nadir Shah was a European adventurer: there are also several contemporary works in French, German and Portuguese, the subjects of which are the deeds real or imaginary of Nadir Shah like *L'expédition de Thamas Kouli kan dans les cours de l'Europe* by the Abbé Rochebrun, Cologne 1746 etc. (V. MINORSKY).

NADIR (NĀDIR AL-SAMT or AL-NĀDIR *kar'* نادر), the bottom, the pole of the horizon (invisible) under the observer in the direction of the vertical, also the deepest (lowest) point in the sphere of heaven. The nadir is the opposite pole to the zenith [q. v.].

The word *nadir* (from *nāpara*, "to see", "to observe") originally (and generally) means the

point diametrically opposite a point on the circumference of a circle or the surface of a sphere; we find *muḥāḍir* as a synonym of *nadir* in this general meaning (cf. also *MUGHALA*).

(WILLY HARTNER)

NADIR (BANU 'I-), one of the two main Jewish tribes of Madina, settled in Yathrib from Palestine at an unknown date, as a consequence of Roman pressure after the Jewish wars. Al-Ya'qūbī (ii. 49) says they were a section of the Qudhām Arabs, converted to Judaism and first settled on Mount al-Nadīr, whence their name; according to the *Sira Ḥalabiya* (Cairo, iii. 2) they were a truly Jewish tribe, connected with the Jews of Khaybar. This seems the more probable, but a certain admixture of Arab blood is possible; like the other Jews of Madina they bore Arabic names, but kept aloof from the Arabs, spoke a peculiar dialect, and had enriched themselves with agriculture, money-lending, business in armour and jewels.

They were clients of the Aws, siding with them in their conflicts with the Khazraj, and entering with them into the compact with Muḥammad known as the Constitution of Madina in 1 A.H. Their most important chief at this time was Ḥuṣayf b. Akḥṭab, whose daughter Saḥīya became Muḥammad's wife in 7 A.H. For a list of Muḥammad's worst enemies among the Banu 'I-Nadīr see Ibn Hishām, *Sira*, p. 351—352.

Their fortresses were half a day's march from Madina, and they owned land in Wādī Buḥān and Buwaira; their dwelling places were south of the city.

The Banu 'I-Nadīr seem to have been in (commercial) relations with Abū Sufyān before the battle of Uhud. In 4 A.H., in Raḥī' I, owing to difficulties about the Banu 'I-Nadīr's contribution to certain blood-money which was being collected from the whole Muslim community in Madina, Muḥammad, who had personally negotiated the matter with their chiefs, became convinced of their enmity towards himself and suspected them of intending to kill him. He decided to get rid of such dangerous neighbours, and ordered them through Muḥammad b. Maslama al-Awsī to leave the city within ten days, under penalty of death, allowing them to take with them all their movable goods, and to return each year to gather the produce of their palm-groves.

The tribe, having no hope of help from the Aws, agreed to leave, but 'Abī Allāh b. Ubayy al-Khazrajī, chief of the *muḥāḍirūn*, persuaded them to resist in their fortresses, promising to send 2,000 men to their aid. Ḥuṣayf b. Akḥṭab, hoping the Banū Quraysh would also help them, prepared to resist, in the face of opposition from moderate elements in the tribe.

The siege lasted about a fortnight, help from the *muḥāḍirūn* was not forthcoming, and when the Muslims began to cut down their palms the Banu 'I-Nadīr surrendered. Muḥammad's conditions were much harder than formerly; their immovable property was forfeited, and nothing left them but what they could take away on camels, arms alone excepted. After two days' bargaining the tribe departed with a caravan of 600 camels; some went to Syria, others to Khaybar.

The Banu 'I-Nadīr's booty Muḥammad did not divide in the usual manner; the land was distributed among the *muḥāḍirūn*, so as to relieve the *Anṣār*

of their maintenance; part of it the Prophet kept for himself.

Sūrat al-Ḥaḡḡ (lix.) was revealed upon the expulsion of the Banu 'I-Nadīr.

From Khaybar the exiles planned with the Quraysh the siege of Madina in 10 A.H. The treasure of the Banu 'I-Nadīr was captured by Muḥammad in Khaybar in 7 A.H.

AL-NADJAF (MASHHAD 'ALĪ), a town and place of pilgrimage in the 'Irāq 6 miles west of al-Kūfa. It lies on the edge of the desert on a flat barren eminence from which the name al-Nadja has been transferred to it (A. Muall, *The Middle Euphrates*, p. 35).

According to the usual tradition, the Imām al-Mu'min 'Alī b. Abī Ṭālib [q.v.] was buried near Kūfa, not far from the dam which protected the city from flooding by the Euphrates at the place where the town of al-Nadja later arose (Vākūt, *Muḡjam*, ed. Wüstenfeld, iv. 760), also called Nadja al-Kūfa (Zamakhshari, *Lexicon geographicum*, ed. Salverda de Grave, p. 153). Under Umayyad rule the site of the grave near al-Kūfa had to be concealed. As a result it was later sought in different places, by many in al-Kūfa itself in a corner above the *ḥilla* of the mosque, by others again 2 farsakhs from al-Kūfa (al-Iṣṭakhri, ed. de Goeje, *B.G.A.*, i. 82 sq.; Ibn Hawḡal, *ibid.*, ii. 163). According to a third story, 'Alī was buried in al-Madina near Fāṭima's grave (al-Mas'ūdi, *Murūḡi al-Dhahab*, ed. Barbier de Meynard, viii. 289), according to a fourth, at Kaṣr al-Imāra (Caetani, *Annali dell' Islam*, x. 1926, p. 967 sq., A.H. 40, § 99). Perhaps then the sanctuary of al-Nadja is not the real burial-place but a tomb held in reverence in the pre-Islamic period, especially as the graves of Adam and Noah were also shown there (Ibn Baṭṭūṭa, *Taḡha*, ed. Deffremery and Sanguinetti, i. 416; G. Jacob in A. Nöldeke, *Das Heiligtum al-Husain in Kerbela*, Berlin 1909, p. 38, note 1). It was not till the time of the Hamdanid of al-Mawṣil Abū 'I-Haḍḍā [see 'ANTI ALLĀH b. HAMDĀN] that a large *ḥabba* was built by him over 'Alī's grave, adorned with precious carpets and curtains and a citadel built there (Ibn Hawḡal, *op. cit.*, p. 163). The Shī'ī Bayd 'Aḡud al-Dawla [q.v.] in 369 (979—980) built a mausoleum, which was still in existence in the time of Ḥamd Allāh Mustawfī, and was buried there, as were his sons Sheraf and Bahā' al-Dawla. Al-Nadja was already a small town with a circumference of 2,500 paces (Ibn al-Aṭhīr, ed. Tornberg, viii. 518; Ḥamd Allāh Mustawfī, *Nuṣṣat al-Kulūb*, ed. Le Strange, p. 32; in the year 366 = 976—977). Ḥasan b. al-Faḡl, who died about 414 (1023—24) built the defensive walls of Maḡhad 'Alī (Ibn al-Aṭhīr, ix. 154). The Maḡhad was burned in 443 (1051—1052) by the fanatical populace of Baghdad but must have been soon rebuilt. The Saljuḡ sultan Malikshāh and his vizier Niḡm al-Mulk who were in Baghdad in 479 (1086—1087) visited the sanctuaries of 'Alī and Ḥusain (Ibn al-Aṭhīr, x. 103). The Ilkhān Ghāṣān (1295—1304),

according to Hamid Allāh Mustawfī, built in al-Nadjaf a Dār al-Siyāda and a dervish monastery (*ḥanḡāh*). The Mongol governor of Baghdad in 1263 led a canal from the Euphrates to al-Nadjaf but it soon became silted up and was only cleared out again in 1508 by order of Shāh Ismā'īl. This canal was originally called Nahr al-Shāh (now al-Kenā) (*Lughat al-'Arab*, Baghdad, ii, 1930—1931, p. 458). This Shāh Ismā'īl himself made a pilgrimage to the *maḡḥad* of Kerbelā and al-Nadjaf. Sulaimān the Magnificent visited the holy places in 941 (1534—1535). A new canal made in 1793 also soon became silted up, as did the Zeri al-Shāh and al-Haidariya canals, the latter of which was made by order of 'Abd al-Hamid II. In 1912 iron pipes were laid to bring water from the Euphrates to al-Nadjaf (*Lughat al-'Arab*, ii, 458 sq., 491). A considerable part of the 'Irāq with Baghdad, al-Nadjaf and Kerbelā was temporarily conquered by the Persians in 1623.

According to the Arab geographers, al-Hira lay on the eminence of al-Nadjaf (al-Ya'qūbī, *Kitaḥ al-Buldan*, ed. de Goeje, B. G. A., vii, 309). Massignou thinks (*M. I. F. A. O.*, xviii, 28, note 1) that al-Hira lay on the site of the present al-Nadjaf, while Mas'ūdī (*The Middle Euphrates*, p. 35, note 26) places the centre of the ruins of al-Hira S. E. of the *tell* of al-Knēdeh which lies halfway between al-Kūfa and al-Khawarnak. Ibn Baṭṭūta entered Maḡḥad 'Alī which he visited in 726 (1326) through the Bāb al-Haḡra gate which led straight to the Maḡḥad. He describes the town and sanctuary very fully. According to al-Ya'qūbī (*loc. cit.*), the ridge on which al-Nadjaf stands once formed the shore of the sea which in ancient times came up to here. For the number of its inhabitants and its architectural beauty, Ibn Baṭṭūta reckoned the town among the most important in the 'Irāq. It has now about 20,000 inhabitants (Persians and Arabs), has a Shī'ī college and celebrated cemetery in the Wādī al-Salām. Near al-Nadjaf were the monasteries of Dair Mār Fāṭḥiyyūn (Yāqūt, *Mu'jam*, ii, 693) and Dair Hind al-Kubrā (Yāqūt, ii, 709), also al-Ruḡba (5 hours S. W. of the town; Yāqūt, ii, 762; Mas'ūdī, *The Middle Euphrates*, p. 110, note 61) and Kaṣr Abī 'l-Khaṣīb (Yāqūt, iv, 107). The lake of al-Nadjaf marked on many older maps has long since completely dried up (Nolde, *Reise nach Innerasien*, p. 105).

BANU NADJĀH, a dynasty of Abyssinian Mamlūks at Zabīd [q. v.] from 412 to 553 (1022—1158). When the last Ziyādi [q. v.] had been put to death in the vicariate of the Abyssinian Mardjān by one of his Mamlūk governors Naḡīf, the other Nadjāh came forward to avenge him. After desperate fighting, Naḡīf was slain and Nadjāh in Dhu 'l-Ka'da 412 (Feb. 1022) entered Zabīd where he had the vizier built alive into a wall in exact revenge for the Ziyādi. As his rival Naḡīf had already done, Nadjāh assumed the insignia of royalty, struck his own coins and inserted his own name in the *ḡhaḡḡa* after that of the 'Abbāsīd caliph. The latter found himself forced to recognise him under the title al-Ma'āyad Naḡīr al-Dīn. His kingdom extended over al-Tihāma, while the highlands beyond remained divided up among petty chiefs. When among the latter the Sulāḡī [q. v.] came to considerable power, their relationships with the Banū Nadjāh decisively affected the history of the latter. The first Sulāḡī 'Alī is said to have had this first Nadjāh poisoned about 452 (1060) through a slave girl sent him as a present. In the confusion that followed, 'Alī occupied Zabīd itself and Nadjāh's sons fled to the island of Dahlak [q. v.]. While the eldest Mu'ārik committed suicide, the other two resolved to regain their lands: Sa'īd al-Aḡwal and Abu 'l-Tāmi Djaīyāsh, whose last work al-Muḡdī fī Aḡḡār Zabīd was the foundation for 'Umāra's work (in Kay, see *Bibl.*). Sa'īd made his preparations in a place of concealment in Zabīd and had Djaīyāsh come later; the two then came out openly, fell upon and killed 'Alī al-Sulāḡī, who was on a campaign against Mecca, probably in 473 (1081). Zabīd at once recognised Sa'īd as its lord; he had appealed less to the Sunnis against the Shī'īs than to the racial feeling of the numerous Abyssinian soldier-slaves (*and raḡḡidū minhum wa 'l-'irāq 'ittakum*: Djaīyāsh in 'Umāra, p. 63, 2—4). But Asma', the widow of 'Alī al-Sulāḡī who was kept a prisoner in Zabīd, persuaded her son al-Mukarram to relieve the town (475 = 1082—1083). The Nadjāh again escaped to Dahlak. In 479 (1086) Sa'īd again returned as ruler but in 481 (1088) was put to death at the instigation of the Sulāḡī queen al-Saiyida, the wife of al-Mukarram. Djaīyāsh escaped to India with his vizier Khālāf b. Tāhir, said to have been an Umayyad, returned to Zabīd disguised as an Indian, plotted with his compatriots and easily

regained power in 482 (1089). With his death in 498 or 500 (1105–1106) disruption set in. He himself had had domestic difficulties. He executed the *khāfi* Ibn Abi 'Aljama whose ancestor had come to the country with the first Ziyādis; his former helper Khalf had to seek refuge in flight. A certain degree of strain in his relations with his brother Sa'id is already evident from Djalīsh's account and there were fierce family feuds among his descendants. His son Fātik I, the son of a girl bought in India, had to defend himself against his half-brothers Ibrāhīm and 'Abd al-Wāhid and died young in 503 (1109–1110). The latter's infant son al-Manṣūr was set aside by his uncles, who were quarrelling with one another, and fled to Saiyida, whose favourite al-Muḥaffar b. Abi 'I-Barakāt brought him back in 504 (1110–1111) as vassal of the Ṣulāhiṣ.

On account of the new ruler's minority, events repeated their course under the Ziyādis. The Mamlūk Anīs was Manṣūr's vizier and he even assumed royal honours. When he attained his majority Manṣūr disposed of him by murdering him with his own hand in 517 (1123) after inviting him to the palace. Manṣūr however was at once poisoned at the instigation of the next vizier Mann Allāh. In the following year, the latter defeated under the walls of Zabīd Nadjīb al-Dawla, whom the Fātimids had sent as the Ṣulāhiṣ power was weakening to restore their suzerainty in the land. Mann Allāh had made the boy Fātik II nominal king, the son of Manṣūr and a slave girl singer 'Alam who had been purchased from Anīs's estate. This woman (d. 545 = 1150) endeavoured with great skill to preserve the rights of her house against the encroachments of the viziers and played among the Nadjāh a part similar to that of Saiyida among the Ṣulāhiṣ. In particular she equipped and led regular caravans of pilgrims and thus unconsciously furthered the rise of 'Alī b. Mahdī who was finally to drive her own family from power. Mann Allāh in 524 (1130) was killed in his harem through a plot of 'Alam's. His successors were the Mamlūks Ruzāik and then al-Mudīh. Against the latter 'Alam put forward her favourites Surūr and Iqbāl, who were however not on good terms. In their quarrels the various parties several times brought the petty Arab princes who lived around it against Zabīd. Iqbāl had Fātik II poisoned (531 = 1137). As he had no heirs, he was followed by his cousin Fātik III b. Muḥammad b. Fātik I b. Djalīsh. The government had been in the hands of Surūr since 529 (1135). His career of indefatigable activity was ended in a mosque in Zabīd on the 12th Raddj 551 (Sept. 1, 1156) by an assassin, a 'Khāridjī' envoy of 'Alī b. Mahdī. When the Zaidī Imām al-Mutawakkil Ahmad b. Sulaimān was summoned to help them by the Abyssinians, he made it a first condition that Fātik should be deposed and he himself recognised as lord of Zabīd. The troops agreed to this but the victory lay with 'Alī b. Mahdī [q.v. and the article MAHDĪ]. On 14th Raddj 554 (Aug. 2, 1159) he entered Zabīd.

The Banū Ziyād and the Banū Nadjāh continually brought over shiploads of Abyssinian slaves to recruit their troops and thus continued that mixture of races, which already existed before Islām and is still very marked in the Yaman plains. These Mamlūks however became a great danger for the

Ziyādis and also for the Nadjāh themselves. Djalīsh had attempted to counteract them with a bodyguard of Turkish Oghuz [cf. *OGHUZ*]. But they were not suited to the climate; in particular it was impossible to establish a colony of them there permanently as their children, if they did not die, remained weaklings. The Abyssinian admixture was still further increased by the many slave-girls, who, particularly when they became mothers, exerted some political influence. The enormous harems of the notables created the most complicated family relationships. For example the settlement of the estate of the vizier Ruzāik became a notoriously difficult case in the law of inheritance which occupied the ablest *fuḥalā* for years until finally a very aged Hadramawtī found a solution in accordance with the *Shari'a*.

AL-NADJĀSHI, designation in Arabic of the king of Abyssinia. It is a loanword from *Aethiopic* ነገሥት 'king, prince' etc. In Arabic it is sometimes used as a proper noun, sometimes as a nomen appellativum. The word is also genuine Arabic, but as such it has the meaning of driver of game. It does not occur in the *Kur'ān*. In *Hadīth* it is the designation of the king of Abyssinia, just as *Kaṣair* [q.v.], *Kisrā* [q.v.] and *al-Mukawkas* [q.v.] are the designations of the rulers of Rūm, Fāris and Miṣr. In their totality they represent the Great Powers which in the time of Muḥammad surrounded the territory of Islām. On the fresco in the hall of the castle of *Kaṣair 'Amra* [cf. *'AMRA*], dating from the middle of the eighth century A.D., al-Nadjaṣhī appears as the fourth of these Powers, the place of the *Mukawkas* being taken by Roderick the Visigoth.

In the *Sīra* the Nadjaṣhī occupies a place of some importance, chiefly in connection with the two *hidjra*'s to Abyssinia, with Muḥammad's letter persuading him to embrace Islām, with his conversion from Christianity to Islām and with his equipping two ships in behalf of the return of the emigrants to Arabia, amongst whom was Umm Habiba, who was to marry Muḥammad (A. H. 7).

These traditions have been critically examined by Grimme, Caetani and Mrs. Vacca. Grimme denied the historical foundation of the traditions concerning Muḥammad's letters to the Great Powers. Caetani submitted the question to an elaborate enquiry. Mrs. Vacca reduces the traditions to the following historical facts: *a.* the return of Dja'far b. Abi Tālib from Abyssinia in 7 A. H., when Muḥammad was besieging *Khaibar*; *b.* the expedition of 'Amr b. Umayya in A. H. 6 in order to reconduct the emigrants from Abyssinia to al-Madina; *c.* vague traditions concerning the emigration from Makka to Abyssinia. To these groups several episodes agglomerated, viz. to *a.* the story that Umm Habiba, Abū Sufyān's daughter and widow of 'Uḥaid Allāh b. Djaḥsh, was asked in marriage by Muḥammad and provided with a marriage-gift of 400 dirhams by the Nadjaṣhī; to *b.* the story of Muḥammad's letter to the Nadjaṣhī, his embracing Islām and his becoming

the intermediary of the conversion of 'Amr b. al-'As.

In *Hadīth* the Nadjāshī is also mentioned in connection with the story that his death in Ramaḍān 9 A. H. was proclaimed, without previous intimation, by Muḥammad, who held on the *mujaḥallā* [q. v.] a funeral service in behalf of this fellow Muslim. As his proper name is given Aḥama or Aḥama b. Abḥar.

The title al-Nadjāshī is also given in Arabic literature to later kings of Abyssinia, as may be seen from this article.

(A. J. WESSINK)

AL-NADJĀSHĪ, KADĪB, 'AMR AL-HABIBI, an Arab poet of the seventh century A. D., lived at first in Nadjān [q. v.] and quarrelled with 'Abd al-Rahmān, son of Ḥassān b. Thābit [q. v.], because the latter had addressed in song a married female relative of Nadjāshī in Medina. After an exchange of lampoons with his opponent from his native place, he met him at the annual fair at Dhū l-Maḥjar and again in Mecca when 'Abd al-Rahmān not only proved inferior as a poet but suffered bodily injury, so that his aged father had to interfere on his behalf. Nadjāshī had a second conflict with Ibn Muḥallī, the poet of the Banū 'Adīlān; he was so unbridled in his defence that the caliph 'Umar punished him with imprisonment after procuring an opinion on his verses from Ḥassān and al-Ḥajāj. After 'Othmān's assassination, al-Nadjāshī appeared in Kūfa as one of 'Alī's poets, and for the latter exchanged political lampoons with Mu'āwīya's poets at the battle of Siffin. But his disorderly life lost him the favour of 'Alī and after a drinking-bout in Ramaḍān he was given the thrashing prescribed by law and put in the pillory. After a conflict with Kūfan notables, in which he expressed his wrath at this punishment in satirical verses, he was expelled by 'Alī and went over to Mu'āwīya. He then went back to his native country Yaman and died in Ibadj in the year 40 (669), in which year he wrote a lament on the death of Ḥassān.

(C. BROCKELMANN)

MIR 'ABD AL-'ĀL NADJĀT, a Persian poet, born about 1046 (1636—1637), the son of a Husaini Saiyid Mir Muḥammad Mu'min of Isfahān. Little is known of his life. Only this much is certain, that he, like many other Persian poets of this time, worked in the offices of different Persian dignitaries. For example he was a *mustawfi* [q. v.] with Šāh Mirzā Ḥabīb Allāh, later occupied the same office in Astarābād and ended his career in 1126 (1714) after being for many years *munshi* with the Šafawid princes Šāh Sulaimān (1667—1694) and Šāh Sulṭān Husain (1694—1722). He owes his fame mainly to a long poem *Gul u Kuḥl* ("Wrestling") which he finished in 1112 (1700—1701) and which deals with the theme of the *shir-khāna* [q. v.] still very popular in Persia. As the Persian athletes still form a special closed corporation they use a special language (a kind of slang) which is full of the technical terms of their art and is not intelligible to the outsider. Nadjāt used these technical terms very skillfully in his poem which makes it very difficult for laymen to understand. This produced several commentaries on his work, of which those of Arzū, Ratan Singh Zakhamī (printed Lucknow 1258) and Gobind-rām (lith. Morādābād 1884) are the best known. Of Nadjāt's contemporaries some did not approve of his peculiar style and thought his poem degraded the poet's art with its vulgar expressions and low humour. As a matter of fact, Nadjāt's tone differs considerably from the traditional lofty style of Persian court poetry and approaches the language of the Persian middle classes; this makes his work of considerable importance for the history of the Persian language. Besides the poem, we only know of a collection of lyrics by Nadjāt of which there are manuscripts in several libraries (see below).

NADJĀTĪ BEY, properly 'Isā (Nūh, also given, is not certain), the first great Turkish lyric poet of the pre-classical period, one of the founders of the classical Ottoman poetry. Born in Adrianople (Amassia and Kaṣtamūni are also given), the son of a slave, obviously a Christian prisoner of war for which reason he is called 'Abd Allāh, the name given to every one, he was adopted by a well-to-do lady of Adrianople, received a good education and was trained by the poet Sā'it. In spite of the fact that his non-Turkish origin was generally known, he was regarded as their equal in every way by the Turks in keeping with their democratic ideas. He early came to Kaṣtamūni and there began his poetic career and soon gained a great reputation. His poems are said here and there to bear traces of the Kaṣtamūni dialect. Coming to Constantinople, he at once gained the favour of Sulṭān Mehmed II by a *kaṣida* on winter; in 886 (1481)

he celebrated the accession of Bâyezid II in a *kasida* and was rewarded by an appointment as secretary in the Diwân. He gained such favour with the Sultan that he was appointed secretary to his eldest son 'Abd Allâh and was given the title of bey when the prince went to Karamân as governor (*mütearrif*). After the prince's early death (888 = 1483) Nadjâtî returned to Constantinople with an elegy on the death of the prince which showed deep emotion. After a long interval in which he wrote a great deal but was in continual need, through the influence of Mu'ayyad-Zâde [q. v.] he became *nishânî* to Bâyezid's younger son Mahmûd when the latter went to Sürûkhân in 910 (1504). Nadjâtî wrote his finest verse while on the staff of this prince; this was the happiest period of his life. Mahmûd also died prematurely in 913 (1507) in Manissa, the capital of Sürûkhân, and Nadjâtî again lost his patron. He returned with a beautiful elegy to Constantinople and finally retired from the service of the court on a modest pension. He took a house on the Wefâ Maidân where many friends gathered round him, especially his pupils, the poet and *teskeredji* Edîrnelî Sehi and the poet Sun'î. Nadjâtî died on the 25th Dhu 'l-Kâ'da 914 (March 17, 1509). He was buried near his own house, at the monastery of Shaikh Wefâ and a tombstone was put up by Sehi for him.

He left a *Diwân* which he had collected on the advice of Mu'ayyad-Zâde and dedicated to prince Mahmûd. There is also attributed to him a mesnewî, which is not otherwise known, entitled *Munâzara-i Gül u-Khorro*, also quoted as *Laila u-Magnân* and *Mîhr u-Mâh*. Even more uncertain seems to be the existence of the mesnewî mentioned by Sehi: *Gül u-Sabû*. Nadjâtî is also mentioned as a translator of Persian works but his pupil Sehi says nothing of this. He is said to have translated for prince Mahmûd the *Atayîz-i Sâ'id* of Ismâ'îl Ghazâlî (the Persian version of the Arabic *Îhyâ*) and the *Djâmî al-Hikâyât* (properly *Djâwîd al-Hikâyât wa-Lawâ'ih al-Ri'âziyyât*) from the Persian of Djâmî al-Dîn al-'Awfî.

His *Diwân* which is still unprinted, gives Nadjâtî a very prominent place in Ottoman literature; the Diwân was regarded as a model for all Ottoman poets. Nadjâtî, whom Idris Bidlisi in his *Heht Bihisht* calls *Khorro-i Shâ'arâ-i Rûm* and others *Malik al-Shâ'arâ* and *Tûs-i Rûm* (=the Firdaws of Asia Minor), was regarded as the best poet of Rûm. He does not, it is true, reach the heights that Nesîmî does but he surpasses all his predecessors, of whom Ahmad Pasha and Zâtî were the greatest, in originality and creative power. Only Bâkî and Fuzûlî have surpassed him. The problem to be solved by Ahmad Pasha, Nadjâtî and Zâtî was to incorporate completely into Turkish the matter borrowed and translated from Persian literature, which was still felt to be foreign, to adapt Turkish to Perso-Arabic metres and to domesticate fully the Arabic and Persian vocabulary. This was a great achievement for the time. Nadjâtî brought about a great change in the literature as regards outlook, feeling and language. In him the age of Suljân Bâyezid is most clearly reflected. Although he is not to be claimed as a very great poet, he was the king of the gild of poets of his time, who started a great literary movement. Nadjâtî combined a thorough knowledge of Persian

with a masterly command of Turkish. In the number of his ghazels he far surpasses Bâkî. His work as a poet of *kasidas* was original and stimulating. He was specially celebrated for his skill in the use of the proverb.

NADJD. [See NADJD.]

NADJDA v. 'AMIR. [See KHAKIYYES.]

AL-NADJDJÂR, AL-HUSAIN B. MUHAMMAD ABÛ 'ABD ALLÂH, a Mardî and Djabari theologian of the period of al-Ma'mûn, a pupil of Bîhr al-Mastar whose views were combated by Abu 'l-Hudhail al-'Alîf and al-Nazzâm. He probably lived in Bamm where he was a weaver. According to him, the divine attributes are identical with the essence and express its negative aspects. Vision of God is only possible through a divine act which transforms the eye into the heart by giving it the power of recognition. The word of God is created, accident when it is read, body when it is written. God who knows from all eternity all worldly things, wills them all, good as well as evil, faith as well as unbelief. God has a hidden essence (theory of *ma'hiyâ*); there is in him a hidden fund of grace (*lutf*) which would suffice to bring all the infidels back to him. Problems of the body and accidents: atom = accident; the body then consists of a conglomerate of accidents (= *Dirûr*) which are in juxtaposition without interpenetrating one another (against the *mutâhhalâ* of al-Nazzâm); momentariness of the accidents. This orientation of the problem is due to the theocentric tendencies of al-Nadjdjâr. All that takes place in the world comes from the incessant and unrestrained activity of God beside whom there is neither reality nor agent. God creates the actions of man. He gives his assistance to every good action and shows his desertion of every bad one; this assistance and desertion constitute the faculty of doing which accompanies the action (*al-isti'â'a ma'n 'l-f'*) against the Mu'tazila. The activity of man consists in his appropriation of the divine will (*kasb*). Man carries out one action only by one *isti'â'a*: the secondary effects (*al-muwalladât*) do not depend on man but on God (against the Mu'tazila theory of *tawallud*). Faith consists in the knowledge of God, of his apostles and his commandments and in the profession of this knowledge by the mouth. Faith consists of several qualities (*shâfiq*) each of which

is an act of obedience (*ʿāḍ*); complete faith is the sum of all *ʿāḍ*. Faith may increase but not diminish; it can be completely lost only through unbelief. He who commits a heinous sin and dies impenitent is doomed to hell from which he will emerge however, unlike the complete infidel. Al-Nadji denied the punishment of the tomb (*ʿadāb al-qabr*), probably as a result of his determinism. — Al-Nadji like his master Bihri represents the reformed and modified Djalma. The influence of Muʿtazila theology on this school is manifest; on the other hand, the Muʿtazila itself, especially that of Baghdad, seems to have received certain quite important stimuli from his school in spite of its opposition to it. Several of al-Nadji's doctrines are found at a later date in al-Ashʿari. — The Nadjiyariya flourished in Raiy and Gurgān. It was divided into three schools: 1. the Burghāthiya, the followers of Maḥammad b. ʿAlī Burghāth; 2. the Zaʿfarāniya, the followers of a certain Abū ʿAbd Allāh b. al-Zaʿfarānī; 3. the Mustadrīka, a reforming party which taught paradoxical doctrines on the divine word.

MUʿALLIM NADJĪ, properly ʿOMER, an important Ottoman author, poet, critic and man of letters, who occupies a special and somewhat hybrid position in the history of the Turkish moderns and has given his name to a whole literary period. Born in 1266 (1850) in Constantinople, the third son of a master saddler ʿAlī Agha (not Bey, as some literary historians say), he lost his father at the age of seven. The widow Fāṭime al-Zahrā, who was descended from a *muhājir* who had come to Constantinople from Rumelia, went to Varna to her brother, the Kalaydji Ahmad Agha. The latter in spite of his limited means, made it possible for ʿOmer to be educated at the medrese and ʿOmer's elder brother Sālim gave him considerable assistance. ʿOmer devoted himself at first to calligraphy and for his *leḥzās* used the *mashḥaf* Khulūst. A certain Khōḍja Hāfiz aroused in him a fondness for poetry and he took the *mashḥaf* Nadji for his poems (from a passage in the *Muḥḥafayāt* of ʿAlī ʿAlī Girdi). He also tried to obtain the title of *hāfiz*. His training in the medrese left a permanent influence on him. It was long before he decided to put off the turban and the *ghubba*. The spirit of the *mevlā* and a certain intolerant fanaticism however never left him.

In 1284 (1867) Nadji received an appointment as second master in the Rüşdiyye school in Varna. At an inspection the then *müttarrif* of Varna, Kurī Saʿīd Paşa (later Foreign Minister, President of the Council of State and several times an ambassador), made the acquaintance of the intelligent young teacher. He took him into his service as secretary, when he was moved to Tulca just before the outbreak of the Russo-Turkish war in 1877; thence he was moved to Tirmow and later to ʿOmān Pazarı. Nadji accompanied the much

travelled Paşa on his moves and journeys. After a brief stay in Constantinople, he went to Veñi Shehir Feaḥr (= Larissa in Thessaly) where Nadji made the acquaintance of the poet and Mewlawi ʿAwat Bey, who had a very good knowledge of Persian. Nadji who acted as secretary to the court and judge of investigation had here finally to lay aside the turban. When Saʿīd Paşa set out on a nine months' tour of inspection in Asia Minor, the Euphrates and Erzerum, Nadji again accompanied him. He recorded his impressions in the poem *Sāḥm-i Ghariḥān*. He had abandoned himself with other congenial wits to a life of dissipation at Tawḥ Pazarı, both earlier and after his return to Constantinople. The transfer of the Paşa as wali of the Aegean islands to Chios, where Nadji acted as *mutlimiys* saved him from this. Here he was able fully to develop his literary leanings. Already in 1292 he had published poems and articles in Varna in the *Tuna* newspaper of which some were even reprinted by the Constantinople paper *Baṣiret*, such as his *Bir Muʿallimih Şāḡir-dānna Kāif*. From Chios he began his association with Ahmad Midhat Efendi who was then editing the *Terjümān-i Hallak*; from his contributions in poetry and prose, which appeared in the *Terjümān* over the pseudonym Ahmad Masʿūd and Masʿūd-i Kharibāt, a close friendship arose which proved of decisive influence on his future career. When Saʿīd Paşa went as ambassador to Berlin, Nadji declined to go with him, which was much to be regretted in the interests of his literary development. He therefore resigned his post in the Foreign Ministry and devoted himself entirely to authorship. Midhat gave him the editorship of the newly formed literary section of his paper. At the suggestion of Midhat, whose son-in-law he had become, he learned French although he was now over 30. When he left the *Terjümān* for literary reasons, he undertook the editorship of the *Sāʿid* newspaper.

By his great literary and critical activity, he gained an influence which can hardly be estimated high enough on the intellectual life of Turkey in his time, not least through his position as lecturer on Turkish literature at the Mektebi Sultani in Galata Seral and in the law school. He became celebrated under the name *Muʿallim* (teacher) of which he was particularly proud. In 1307 (1889) he was appointed by imperial *irade* Turkish historiographer, *Tarih-i nuḥw-i Al-i ʿOsmān*, as a reward for his historical poem *Ertoghrul Ghāṣi*. But he did not live to do anything serious in this field except an introduction which survives in MS. He died on 27th Ramaḍān 1310 (April 14, 1893), at the age of 43 from heart failure and was buried in the garden of the *türbe* of Sultan Mahmūd.

As a literary figure, Nadji revealed two aspects. On the one hand, he was a fanatical admirer of the old literature out of which he had developed and for which he endeavoured to revive the taste of his milieu by every means, by his modest poetic talent and considerable skill in versification; on the other hand, he seemed in sympathy with the moderns but in view of his convinced belief in the decadence of western culture he had little real understanding of them.

Nadji's services to Turkish prose are undeniable. Over 50 years ago he was already writing the prose of the future, a model, clear, simple, style in the

language of a master who could not be surpassed. Two years before Sezâî's celebrated *Küçük Şairler* (1303) with its complicated prose, Nadjî gave a classic specimen of simple prose, in his *Ömerî Cefakâr* (1307) which was only properly appreciated and imitated at a much later date. In it we find the first suggestions of Turkish realism.

The forms not cultivated by the old writers, the story and the drama, he did not, it is true, entirely omit, but apart from autobiographical sketches and a translation from Zola, he wrote no stories and he was a failure as a dramatist. In theory, it seemed sufficient to him and his followers to put French stories of crime into the *orta eyvan* form in order to produce regular Turkish "dramas". Here also he approximated to the moderns but did not reach their level or ability.

As a poet and artist he is weak. He lacks fervour and creative fancy. He lacks that depth of feeling which carries one away; with him everything is trivial and superficial, and he never feels or expresses anything deeply. His prose style is simple and easy, the sentences short, the mode of expression concise and clear.

His main importance lies in his wide influence as a teacher, which he exercised not so much in the actual class-room as through his whole literary activity.

As a critic he confines himself to externals and goes no further.

Nadjî's prolific versatility is best shown by a list of his works. He wrote on many subjects and frequently lacked the time for adequate preparation.

Of his poetical works, the most celebrated is the collection *Ateş-pâre* (1300, 2nd edition 1303), which contains 52 poems in the new western manner. The best in it are: *Temîd, Kevâter, Kuz, Şâm-i Gharîb, Nisâb dîvânînde bir Wâdî, Tıvârî, Sâdîkade, Avcî*. — Next come two collections of ghazels in the old style: *Şerâre*, 1301 and *Furûân*; then three historical poems: *Hamîyet yâhûd Mûsâ b. EN 'I-Gharîb*, a description of heroic deeds in Granada in the time of the last king Abû 'Abd Allâh al-Sagîr; *Zat al-Nîşânî*, the heroic conduct of Esâmî, daughter of Abû Bakr, at the siege of Mecca with regard to her son 'Abd Allâh b. Zubair; *Gâzî Ertugral Bey*, cf. above; first printed after his death in *Khatîr-i Fânî*, 1310, ii., N^o. 11, 12. On the *Fikr-i Şâhânî-ermânîye* written in conjunction with A. Midhat cf. 'Alî Emîrî, in *T.O.E.*, v., N^o. 27, 1330, p. 131; other poetical works are: *Terâzî Bend or Terkîb Bend*, an imitation of Rûhî-i Baghdâdî and Zîâ Paşa; *Takîr yâhûd 'Arûs Nûmûnesi*, *Memurî Mu'allim Nadjî* and a collection of fugitive pieces edited by Shaikh Wâfî after Nadjî's death: *Vâdî-i Nadjî*, 1314.

Of his prose works the best known and most important is *Sinûle* (1299 and 1307). The first part contains poems like *Kûkûb bir Muşîk*, which is very important for the development of the Turkish poem, and translations from the French. The second part: *Ömerî Cefakâr*, gives in unaffected style intimate memories of his childhood up to the age of eight and has several times been translated: into German by A. Merx, *Aus Mu'allim Nadjî's Sinûle: Die Geschichte seiner Kindheit*, Berlin 1898; into Russian: VI. Gordlevskij, *Dittive Omara. Afşîbiyâtiye şerhî*,

Moscow 1914; and into Czech: Jan Rypka, *Omara Dittive al da jeko umihlo ruba*, in *Bibl. Selskova Kuthova*, Prag. — Memories of his student days were published in the *Terğümân-i Hâfîzât* and entitled *Medrese Khâfîzerî*, 1302; to the same year belongs *Şemâsî-Şeykhî* (*Medjmu'at-i Elm 'I-Zîyâ*, N^o. 41); also *Yazmîlî bulundum*, 1301 (letters and verses in simple language); *Khurde Furûsh* (verses and sayings of Arab and Persian men of letters, 2 parts). — A strongly personal note marks his *Denâme* (the title is chosen in allusion to Ekrem's *Zemâme*), a criticism of Memmenli-Zâde Tâhîr's *Takvî-i Elhân*, but it is primarily directed against Ekrem and his pronouncements on the stupidity of writing ghazels; it was so personal that its continuation was officially forbidden. — Equally vigorous is the criticism of the newspaper *Mîrân* and its owner Murâd Bey in Nadjî's *Mudâfâ-ı-nâmî*. — Translations and commentaries are found in *Şâhîdî*, 1303 (first published in *İmdâd el-Medâd*: verses of the Persian poet Şâh-i Tehrîz with commentary); *Sanihât el-'Arab* (over 1,000 Arabic maxims with notes); *Sanihât el-'Adem* (Persian maxims). — Religious in content are: *I'fâz-i Kur'an*, 2nd ed., 1308 (translation of the treatise by Fakhr al-Dîn al-Râzî on the *Fâtihâ*: *Enâr-i 'akliye* in the *Mefûh el-Ghâib*, first appeared in the *Terğümân*); *Tâlim-i Kur'an*, *Mu'ammâ-i lâhî* (on the *Harûf-i muhâfîfâ* at the beginning of certain Sûras); *Khatûrât al-Izzât*, 1304, the commentary on Sûra cxli. (*Izzât*) translated from the *Tefsîr-i kebir*; *Emâlî 'Alî*, sayings of the caliph 'Alî (*Kitâb-khânî Elm 'I-Zîyâ*, N^o. 1); *Hikem al-Rifâ'* (sayings of Saiyid Ahmad al-Rifâ'i); *Nevâdir el-Ekâbir* (wise sayings of Muslim celebrities); *Ushâdiyye*, 1305 (Persian originals and translations); *Mahârisim*, 1304: translations from Arabic, Persian and French; *Muhammed Muzaffer Medjmu'at*, 1306: literary essays based on a collected volume in MS. by an otherwise unknown M. Muzaffer 1279; *Nûmûnesi ruhban* (an able selection from celebrated authors). — His correspondence: *Mektûbât*, 1303 and 1311 (correspondence with his friends and pupils); *Muhâverât ve Muhâverât*, 1311 (correspondence with A. Midhat); *Shâhîr bile* (correspondence with Shaikh Wâfî); *Intihâ*, 1304 (correspondence with Behtîr Fu'ad on V. Hugo). — Works on literary criticism: *Mu'allim*: a collection of expositions of his critical theory which had appeared in the *Terğümân* and were regarded in their days as of fundamental importance; *Medjmu'at-i Mu'allim*, 1305—1306: a collection of the literary lectures which he had given in the Sultân and the Law School (58 in number, N^o. 1—3 even reached a third edition); *İspîhâbî edbiyye*, 1307 and 1314, his celebrated masterpieces on literary history, really only concerned with style; also *Mektûb-i Edib*, 1320. — His important lexicographical works include: *Kâmûrî-ı umûmî*, 1308, only 5 parts; first appeared in the *Murâmmat*; *Lughât-i Nadjî* = *Lughât-i 'umûmîye*, 1317. Nadjî only wrote the text as far as art. *Fetvâ*, p. 832; the remainder p. 833—1426 was prepared by his friend Mûsteşîb-zâde 'Ismet Bey. — The biographical works: *Ömürî Şâhîrî*, 1307, 2 parts (biographies of 13 Ottoman poets); *Emâlî*, 1308, about 850 somewhat arbitrarily chosen biographies in the style of the old *Takvî*'s. — His only drama *Hedi* (*Hâzîr Bey yâhûd Hedi*), 1326; *Terrî Rahîb*, the translation of Zola's *Thérèse Raquin*; a promised

translation of Fénelon: *Tarbiyyet-i Benâit* never appeared.

The four parts of his much used *Ta'lim-i Kirâat*, from 1300 on, were largely responsible for the development and spread of Nadjî's style in the widest circles. The first part reached the 31st edition by 1320.

Announced but never published were the following: *Ahenk-i millî*, *Muâmmekât-i Râghib* (on Kodja Râghib), *Ferâid-i tarîkiyye*, *Terdjemeten Terfeme*.

Nadjî was a contributor to a number of papers and magazines: the *Terdjümân-ı Hakikat*; the *Sâadet*, *Wakîl*, the periodicals *Afâk*, *Genç Kalem*, *Metâd el-İmâd*, *Çoğuş Baghçesi* etc.

With Nadjî neo-classicism came to an end although his followers, especially 'Alî Kemâl, made several attempts to revive it again in the *İdâm* against H. Dîhîd and in the *Sââh* against Dîcânîb Shihâb al-Dîn. The movement did not get beyond these efforts, for his followers were as little able as Nadjî himself to produce works of permanent value. The present generation has advanced quite out of Nadjî's world.

(TH. MENZEL)

NADJİS (Δ), impure, opp. *zâhir*, cf. *TAHARA*. According to the Shâfi's doctrine, as systematised by al-Nawawî (*Minhâdj*, i. 36 sq.; cf. Ghazâlî, *al-Wa'dî*, i. 6 sq.), the following are the things impure in themselves (*nadjîs*): wine and other spirituous drinks, dogs, swine, *malta*, blood and excrements; milk of animals whose flesh is not eaten.

Regarding these groups the following may be remarked. On wine and other spirituous drinks cf. the art. *KHAMA* and *NADJİH*. — Dogs are not declared impure in the Qur'ân; on the contrary, in the description of the sleepers in Sûra xviii. the dog is included (verses 17, 21). In *Hadîth*, however, the general attitude against dogs is very strong, as may be seen in the art. *KALB*. Goldziher considers this change due to an attitude of conscious contrast (*muqâbilat*) to the estimate of dogs in Parsism. It must not, however, be forgotten that the Jews also declared dogs impure animals, just as swine. The latter are already declared forbidden food in the Qur'ân (Sûra xvi.

116; vi. 146; v. 4; ii. 168). — As to *malta*, cf. the article. — Blood is mentioned in the Qur'ân (Sûra xvi. 116; vi. 146; v. 4; ii. 168) as prohibited food. As to the religious background of this prohibition cf. the art. *MAITA*. — As for excrements and several kinds of secretions of the body, the theory and practice of Jews and Christians sufficiently explain the attitude of Islam in this respect. It must also be admitted, though data are very scarce, that in early Arabia religious impurity included some of these things. — Details are to be found in the large legal works of each of the *madhabs* (cf. *Bibl.*).

Of the differences of the schools regarding this subject the most important only may be mentioned. Spirituous drinks are not impure according to the Hanafis [cf. *NADJİH*]. Living swine are not impure according to the Mâlikis. — The Shâfi adds to the things mentioned above the human corpse and the infidel. The human corpse was one of the chief sources of impurity according to Jewish ideas (cf. already *Numbers*, ch. xix.). A current in early Islam tending to follow the Jewish customs in ceremonial law was very strong; the Shâfi view regarding the human corpse may be a residuum of it. — The impurity of infidels is based upon Sûra ix. 28, where the polytheists are declared to be filth (*nadjîs*). The Sunnî schools do not follow the Shâfi in the exegesis of this verse.

The *nadjîs* enumerated above cannot be purified, in contradistinction to things which are defiled only (*mutanajjis*), with the exception of wine, which becomes pure when made into vinegar, and of hides, which are purified by tanning. On purification cf. the art. *TAHARA*, *GHUSL*, *WUḌŪ*.

NADJİM AL-DİN KUBRĀ, the founder of the order of the Kubrawiya or Dhababiyā, is one of the most striking personalities among the Persian Sufis of the xiith-xiiith century A. D. A large number of popular legends are associated with his name, many of which are not yet forgotten at the present day in Central Asia. His importance for the development of Sūfism is very considerable and in the long series of his pupils we find many distinguished representatives of Sūfi

teaching. Nadjim al-Din, whose full name was Ahmad b. Umar Abu 'l-Djannah Nadjim al-Din al-Kubra al-Khawak al-Khawarizm with the honorific title *al-Tammat al-tubra* (the "greatest visitation": Sura lxxix. 34) and *Shaykh-i Walt tarah* (the Shaikh who prepares saints) was born in the town of Khawak in Khawarizm in 540 (1145), spent his youth in travel during which he met in Egypt the famous Shaikh Rabihih al-Wazzin al-Misri. He became his *murid* and under the supervision of the Shaikh went through a course of most rigid ascetic discipline. The youth won the favour of his teacher who gave him his daughter to wife and adopted him as a son. Nadjim al-Din spent some years in Egypt where two sons were born to him. One day he heard the lectures on the sunna given by Imam Abu Nair Hafsa in Tabriz highly praised. He at once went off to Tabriz and studied there under the direction of this theologian who lived in the Khankhah Zahida in the Sarmaidan quarter. There Nadjim wrote his first theological treatise, a kind of inaugural dissertation entitled *Sawh al-Sunna wa 'l-Ma'aliq*. During a disputation which arose out of this work he made the acquaintance of the Shaikh Baba Faradj Tabrizi under whose influence he decided to give up the study of theology and devote himself entirely to the contemplative life of the mystic. Baba Faradj regarded all learning as something superfluous; in his view true knowledge could only be obtained through divine illumination. Nadjim al-Din soon recognised that he could hardly come any nearer his goal by this route. He turned to Shaikh 'Amir-i Yasir who advised him to train as a complete Sufi in the school of Isma'il Kasri. Nadjim al-Din received his second *khirka* at the hands of the latter, a so-called *khirka-i tabarruk* ("khirka of blessing"). After his return to his first teacher Shaikh Rabihih the latter found that he had thoroughly grasped all the depths of Sufi learning and recommended him to transfer his activities to his native land of Khawarizm. Nadjim al-Din settled there with his family, built a khankhah and founded the order of the Kubrawiya or Qubrawiya. His teaching met with great success and he soon found himself surrounded by pupils among whom were the most distinguished Sufis of the xiiith—xvth century such as Majid al-Din Baghdadi (the Shaikh of the famous poet Farid al-Din 'Attar), Sa'd al-Din Hamawi, Baba Kamal Djandi, Shaikh Razi al-Din 'Ali Lala, Saif al-Din Bakharzi, Nadjim al-Din Razi and many others. Baba al-Din Walead, the father of the great Djali al-Din Rumi, is also said to have been his pupil, but this is hardly possible. Nadjim al-Din met his death on 10th Djumada 1 618 (July 13, 1226) at the taking of Khawarizm by the Mongols. All his biographers are agreed that the Shaikh had gone out to meet the enemy in the open field and met a martyr's death with weapon in hand. The Institute for Oriental Research in Leningrad possesses a manuscript in Eastern Turkic entitled *Shaykh Nadjim al-Din Kubra-nij Shaid alif Shaker-i Khawarizm-ni Kharab kh-shadun Bayani* (How Shaikh Nadjim al-Din was martyred and the town of Khawarizm destroyed). It is a kind of historical novel dealing with the last days of Khawarizm and its fall. Nadjim al-Din appears in it as the protector of the city against the Mongols. By his power he makes Khawarizm invisible to the enemy and it only falls into the hands of the conquerors after the Shaikh decides to sur-

render it. It is possible that this book is a version of a Persian biography of Nadjim al-Din called *Tahfat al-Fuqara'* and mentioned by Haddad Khalifa (i. 234).

Nadjim al-Din was a prolific writer and left a number of valuable treatises on different questions of Sufism. The greater part of his works are written in Arabic. Haddad Khalifa gives the following list of his works: 1. *al-Uqul al-'ashara* (i. 339) — a brief exposition of the ten fundamental principles of Sufism (printed in Constantinople in 1256 with a Turkish commentary); 2. *Risala fi 'l-Suluk* (iii. 410—411) — or more correctly *fi 'l-I'm al-Suluk*, described in Ahlwardt No. 3456; 3. *Risalat al-Turuk* (iii. 418) — in Ahlwardt No. 3272—3273 & 'l-Turuk (possibly identical with No. 1); 4. *Tawallu' al-Tamir* (iv. 171) — unknown to me; 5. *Fawatish al-Djamil* in Persian — a treatise with this title is given in Flügel, *Wiener Katalog*, iii. 332, except that the latter is described as in Arabic; 6. *Lu'mat al-Lam* — or with the full title *al-Khawarizmi min Lu'mat al-Lam* in Ahlwardt No. 3087; 7. *Hidayat al-Talibin* — unknown; 8. *Tafsir* — probably the great commentary on the Kur'an entitled *Ain al-Hayat*, whose first volume I discovered in the Public Library in Leningrad (see *Islamica*, vol. 1, fasc. 2—3, p. 272). Nadjim al-Din is also known as a composer of Persian quatrains but it is still very difficult to decide whether the quatrains attributed to him are really his. Twenty-five of these poems were published in the *Comptes-rendus de l'Académie des Sciences de Russie* (1924, p. 36).

The Sufi writings of Nadjim al-Din form a transition from the older Sufism of the first theorists (the Nishapur school of the xth—xiith centuries) to the later Sufism of Ibn al-'Arabi and his successors (Sadr al-Din Qunawi, Fakhr al-Din 'Iraki). Like the earlier theorists Nadjim al-Din likes to deal especially with the practice of Sufism, the stations on the way to true knowledge. Metaphysical questions however are also considered by him and his works with the writings of Ibn al-'Arabi form the basis for the further development of philosophical theory in the xiiith century. This is not the place to go fully into his conception of Sufism; but it is not to be doubted that his teaching can hardly be neglected in a careful investigation of the history of the development of Sufism.

NADJIRAN, a district (Wadi) and town in northern Yaman, according to others (Ibn Khuradadhibh, *S. G. A.*, vi. 133, 248) in southern Najd or in the Hijaz (Bakri, *Mudjam*, p. 575). The position and course of the Wadi has not been exactly ascertained. It rises on the eastern slopes of the Yaman highlands, probably between 43°

and 44° East Long., and runs, perhaps turning north at first, mainly in a southeasterly direction behind 18° and 17° N. Lat. finally disappearing in the great sand desert. The distance from Šan'a [q.v.] is put at 6–7 days' journey (E. Glaser, *Stellen der Geschichte und Geographie Arabiens*, II, 50); according to Philby's investigations (*The Heart of Arabia*, II, 166 sq.), it is seven days' reasonable caravan journey south of Salaiyil. The older idea that the course of the Wādī Nadjirân ran N.E. (or that there was a more northerly twin Wādī Ḥabūna) arose out of the erroneous idea first finally corrected by Philby (*op. cit.*, p. 165, 222) that the Wādī Dawṣair, with which the Wādī Nadjirân was wrongly thought to be connected, runs from S.W. to N.E.

The Wādī Nadjirân drains a wide area of northern Yaman and 'Asir (Hamdān, *Sifat Dīqat al-'Arab*, p. 83, 110, 114, 247). It is, and was in antiquity, celebrated for its fertility. Of European travellers only Joseph Halévy visited it, in the spring of 1870. He describes (*Bull. de la Soc. de Géogr.*, series vi., vol. xiii., p. 478) the valley, some 2 miles broad, as exceedingly fertile and well cultivated with villages concealed in thick palm-groves. Strabo (xvi. 781) calls it a peaceful and rich country. To Muslim writers it is a miracle of fertility and wealth, even more so than the Yaman in general; its cereals, vegetables and fruits were unrivalled (Hamdān, p. 199 sq.); there were also mines there (Baladhuri, *Kitaḥ Futaḥ al-Bulḥān*, p. 14) and the staple products of the Yaman, leather and cloth, were also made there. To this day in less favoured parts of Arabia they talk of the prosperity of this Wādī (Philby, *op. cit.*, II, 226).

The population of the Wādī Nadjirân, according to Philby, is comparatively large; the majority belong to the tribe of Yām. But several unrelated tribes, often at comity with one another, share in the possession of this rich country. It was so in the early Muslim period. The Banu 'l-Ḥarith b. Ka'b, who appear in *Ḥadīth* as lords of Nadjirân, were not really such. They belong to the large group of tribes Maḥḥidj, which was represented by other tribes also. Their rivals were and are Hamdān tribes (Hamdān, p. 115, 9) among them Ḥāshid, important at the present day, (subdivisions Yām etc.) and Bakil (subdivisions Šakir etc.); other tribes like al-'Ad, al-'Al'a etc. should also be mentioned. We have no reliable information about places with a settled population. In the eastern part of the Wādī, Halévy visited a village of Maḥḥaf which was afterwards put on the maps at hazard. In the immediate vicinity was another village Ridjia, and an hour to the west Madinat al-Khudūd (see below). The Arab geographers mention villages (*ḥurū*) of Nadjirân and the names of some of them are given as well as those of districts, tributary wādīs, hills and springs.

Through Nadjirân runs the very old caravan road from Ḥaḍramawt through the Ḥidjāz to the eastern Mediterranean [cf. MARI'IN]. Nadjirân was of some importance as the last station in the Yaman on a caravan route from the Yaman to al-Yamāma and thence to Bahrain and the 'Irāq. During Persian rule in the Yaman and later in the 'Abbāsid period this road must have been of no less importance than the one just mentioned to Syria, which latter however owing to its importance in

the early period of Islām is almost alone mentioned in Muslim literature (A. Moherg, *The Book of the Himyarites*, p. lxi.; cf. also M. Hartmann, *Die sudarab. Frage*, p. 496, 509). On the stations on the road see Ibn Khurdaḡbih (*B. G. A.*, VI, p. 152 sq. and 193; A. Sprenger, *Post- und Reise-reuten*, p. 134–139). A series of forts served to keep it safe (Sprenger, *op. cit.*, p. 138; Hamdān, *B. G. A.*, p. 28; Yāqut, *Mu'jam*, IV, p. 541 v. v. al-Muḥaḡḡar and thereon Iyāl, *Mufaḍḍaliyāt*, II, p. 105). On the present importance of the road and of Nadjirân, see Philby, *op. cit.*, II, 226. The road in those days probably went several days' journey across the desert to the Wādī Dawṣair, which was the first station on the other side; at the present day Salaiyil [q.v.] corresponds to it. This road via Nadjirân was certainly that which connected the Yaman at different times with the ancient Babylonia in the east, with Syriac Christian as well as with Iranian culture.

Little is known of the town of Nadjirân. Ptolemy mentions it as a metropolis. Aelius Gallus attacked it and destroyed it (Strabo, *loc. cit.*; Pliny, VI, 28 [32]). From this Glaser (*loc. cit.*, II, 50; cf. p. 224) concludes that there was no town of Nadjirân after this but the existence of the town is proved in many ways for various later periods (see below). Now however, no town seems to bear the name. Halévy thought he had found the ruins of the old town in Madinat al-Khudūd (see below), which he describes as considerable ruins on the south bank of the river bed. Of the city wall roughly built of granite the south and west sides were less destroyed than the others. A mosque, which still stood among the ruins, belonged, according to local tradition, to the early Muslim or even pre-Islamic period (*J. A.*, ser. VI, vol. xix., p. 90 and 40). In remarkable agreement with this, Bakri, *Mu'jam*, p. 80 says: "Al-Ukhḍūd, which is mentioned in the *Kurān*, was in one of the towns of Nadjirân. This city however is now in ruins and nothing is left of it but the mosque which 'Umar b. al-Khaṭṭāb built".

On the history of Nadjirân we have only scanty and mainly legendary notes. The name occurs several times in the South Arabian inscriptions: there is one (*C. I. S.*, IV, No. 363) reference to the "towns" of Nadjirân (*ahḡār N.*; cf. above *ḥurū N.*). This means the Wādī. In the oldest inscription of north Arabia, the Naṣra inscription of the year 328, the name is also found.

In the tradition of the introduction of Christianity into the Yaman, Nadjirân plays a part in keeping with its importance for the communications between Yaman and Mesopotamia (see above). According to one reference (*Histoire Nestorienne*, ed. Addai Scher, I, 218 sq. = *Patrol. Orient.*, IV, 330), it was a merchant of Nadjirân who first spread Christianity there after he had been converted in al-Hira. Christianity is said to have received a further impetus in the time of Justinian from monophysite Christians who, expelled from Byzantine territory, came to al-Nadjirân also via Hira (*op. cit.*, II, 51 sq.).

The Christian tradition of later persecutions of the Christians in South Arabia connected with Abyssinian invasions of the Yaman is widely disseminated; Nadjirân was the principal scene of these, first perhaps under Šarahlil Yakkuf in the last third of the fifth century, notably under Dhū Nuwās, who died in 525. On this tradition

which exists in many forms, Greek, Syriac and Ethiopic, see A. Moberg, *The Book of the Himyarites*, p. xxiv.—lxiii., where the sources and other literature to be consulted are given.

Arabic literature has also something to say about these happenings, especially in the annotations of the Kur'anic exegetists on Sūra lxxv. 4 *sqq.* on the *Aḥḡāl al-Uḡhdūd*. But what there is of historical value in this Muslim tradition comes from Christian sources; only it is usually so distorted as to be almost unrecognisable. What it records regarding the introduction of Christianity into Nadjran by a certain Faimiyān or 'Abd Allāh b. al-Thāmir is on the other hand a distortion of certain episodes in a Syriac Christian cycle of legends about the Persian martyrs Pethion and Vardin and has really nothing to do with Nadjran or Arabia (A. Moberg, *Über einige christliche Legenden in der islamischen Tradition*, p. 5, 11 *sq.*, 22, 30 and the references given). The name Madinat al-Khūdūd from the ancient Nadjran is of course the result of the localisation of al-Uḡhdūd in Nadjran. Hamḡānī (*op. cit.*, p. 67, 169) mentions in the same region a Balad or town of al-Uḡhdūd; C. van Arendonk mentions a hill Uḡhdūd (*De ophanden van het middeleeuwse Imamāt in Yemen*, p. 168).

It is not till the time of Muhammad and the early Caliphs that we have really historical references to the Yaman and even these have to be critically used. We are told that Khalid was sent with 400 horsemen to the Bann 'l-Hārith b. Ka'b (and the Banū 'Abd al-Maḡḡn: Ibn Sa'd, i/i. 112, 3) in Nadjran and made them adopt Islam and send an embassy in homage to the Prophet (Ibn Hishām, p. 958; Ibn Sa'd, i/i. 72). 'Amr b. Ḥazm was appointed 'Amīr in Nadjran and 'Alī was ordered to collect the *ṣaddat* there (Wāḡidī-Wellhausen, p. 417 *sqq.*; Ibn Sa'd, i/i. 122). In addition to pagans and Jews there were many Christians there who formed, it seems, an autonomous community. Muhammad received an embassy from them also and concluded a treaty with them which guaranteed the possession of their property and the free exercise of their religion in return for a fixed contribution on their part (Ibn Hishām, p. 401 *sqq.*; Ibn Sa'd, i/i. 84 *sq.*, 35 *sq.*). This treaty was confirmed by Abū Bakr and 'Umar. 'Umar however at a later date drove the Christians and Jews out of the Arabian peninsula whereupon the Christians founded a new Nadjran in the 'Irāq, two days' journey south of Kūfa. The details are variously recorded and it is not quite clear to what extent 'Umar's orders were actually enforced. Bakrī (*op. cit.*) says that the Jews and Christians in Nadjran were not at all affected by the measure. In any case, at a much later date (see just below), there were not a few Christians in Nadjran and there are of course still many Jews in the Yaman. In the year 40 A. H. Nadjran was burned by Ḍjarira, 'Alī's general (Tabari, i. 3452). The scantiness of the historical tradition, fantastic accounts of the wealth of the region and the remarkable liberty enjoyed by Christians in Nadjran gave rise to legends and inspired poets. The 'material' which thus arose is very fully detailed and utilised in H. Lammens, *Le Califat de Yazīd Ier* (M. F. O. B., viii., p. 327—369).

In the end we find Nadjran an important fortified town, often simply called al-Hadjar (cf. Hamḡānī, p. 86), mentioned in the accounts of the fighting which led to the creation of the Zaidi imāmate

in the Yaman in the third century A. H. At this period there were still Christians and Jews there, who were obviously still an important element and enjoyed considerable consideration from their Muslim neighbours (van Arendonk, *op. cit.*, p. 128 *sq.*). On bishops of the Nadjranians or in the Yaman in the 12th and 13th century from Syrian sources see Moberg, *The Book of the Himyarites*, p. liv.

The tribes of Nadjran submitted to Turkish rule as little as those of eastern and northern Yaman generally. Nadjran now belongs to the kingdom of Ibn Sa'd.

On other places Nadjran see Yaḡūt, iv. 751, 757 *sqq.*; Hamḡānī, p. 85.

Bibliography: given in the article and in some of the works quoted there; on the history cf. especially Balāḡdhuri, *Futūḡ*, p. 64—68; Caetani, *Annali dell' Islam*, ii/i., p. 312 *sq.*, 317 *sqq.*, 321 *sq.*, 349—353; iv. 350—359. (A. MOBERG)

NAFAKA. [See NIKKḤ TALAK.]

AL-NAFI'. [See ALLĀH, ii.]

NĀFI' B. AL-AZRAK AL-HANAFI AL-HANFĀLI, Abū Rāḡid, according to some sources, the son of a freed blacksmith of Greek origin (Balāḡdhuri, ed. de Goeje, p. 56), chief of the extreme Khawridjites [q.v.], who after him are called Azrakites [q.v.]. At first, after his secession to Ahwā, Nāfi' joined 'Abd Allāh b. al-Zubair [q.v.] in Makka. Soon, however, he and his followers turned their backs on the holy city and arrived before Baḡra, where they spread terror among the inhabitants, who left the town in multitudes. Al-Muḡallab, however, succeeded in driving them back to Persia. They made a halt in Ahwā, where they practised *ist'rāḡ*, in accord with their doctrine. The bloody battle of Dūlāb, fought against Muslim b. 'Ubais, put an end to his life (64 or 65 = 683—684).

His special doctrine comprised the following points: 1. secession (*ḥar'ā'a*) from the quietists (*al-ḡā'ida*); 2. examination (*miḡna*) of those who wanted to join his encampment; 3. declaring infidels those who did not perform *ḡiḡra* to him; 4. declaring it allowed to kill the wives and children of opponents. This is al-Aḡḡari's enumeration, which differs slightly from that of al-Shahrastānī (p. 90).

NAFILA (A.), plur. *nawāfil*, part. art. fem. I from *nafila*, supererogatory work.

1. The word occurs in the *Kurān* in two places. *Sūra* xli. 72 runs: "And we bestowed on him [viz. *Ibrāhīm*] Isaac and Jacob as additional gift" (*nawāfilan*). In *Sūra* xvii. 81 it is used in combination with the *ḥudūd*, thus: "And perform vigils during a part of the night, reciting the *Kurān*, as a *nāfila* for thee".

In *ḥadīth* it is frequently used in this sense.

"Forgiveness of sins past and future was granted him [Muhammad] and his works were to him as supererogatory works" (Aḥmad b. Ḥanbal, vi. 250). — In another tradition it is said with reference to the month of Ramaḍān, that Allāh "writes down its wages and its *nawāfil* even before its beginning" (Aḥmad b. Ḥanbal, ii. 524). Of peculiar importance, also in a different respect, is the following *ḥadīth* *ḥudūd*: "When My servant seeks to approach to Me through supererogatory works, I finally love him. And when I love him I become the hearing through which he heareth, the sight through which he seeth, the hand with which he graspeth, the foot with which he walketh" etc. (al-Bukhārī, *Riḥāṣ*, bāb 38).

Finally the following tradition may be translated: "Whoso performs the *nawāfil* [q. v.] in this way [viz. in the way described in the foregoing part of the tradition], receives forgiveness of past sins and his *ḥajāt* and his walking to the mosque are for him as a *nāfila*" (Muslim, *Tahāra*, trad. 8; Mālik, *Tahāra*, trad. 30). In the parallel tradition (Muslim, *loc. cit.*, trad. 7), the term used is *ḥajāra* "expiation". — This parallelism is an indication of the effect ascribed to supererogatory works in Muslim theology, viz. the expiation of light sins (cf. al-Nawawī on Muslim, Cairo 1283, i. 308).

<i>Nawāfil</i> (Fatāwī 'Alamgiriya, i. 156, Ḥanafī)	{	<i>ḥunna</i> <i>mandūba</i> <i>tafawwū'</i>
<i>Ḥunna</i> (Fagnan, <i>Additions</i> , p. 23, Mālikī)	{	<i>mu'akkada</i> <i>raghibā</i> <i>nāfila</i>

Further it must be observed that in theological terminology *nāfila* is often applied to those works which are supererogatory in the plain sense, in contradistinction to other works which have become a regular practice. The latter are called *ḥunna mu'akkada*, the former *nāfila* or *ḥunna aḥida* (cf. *infra*, sub 2).

The place of supererogatory works in theology is further accurately defined in the *Waṣīyat Abi Ḥanīfa*, art. 7: "We confess that works are of three kinds, obligatory, supererogatory and sinful. The first category is in accordance with Allāh's will, desire, good pleasure, decision, decree, creation, judgment, knowledge, guidance and writing on the preserved table. The second category is not in accordance with Allāh's commandment yet according to His will, desire" etc.

The term for supererogatory works used here is not *nāfila*, but *ḥajāra*.

2. *Nāfila* is used in *ḥadīth* especially as a designation of the supererogatory *ḥajāt* (Bukhārī, *Ḍaḥīq*, bāb 11; *Tahāḥḥud*, bāb 5, 27). Sometimes it appears in the combinations *ḥajāt al-nāfila* (Ibn Māḍī, *Ḥāma*, bāb 203) and *ḥajāt al-nawāfil* (Bukhārī, *Tahāḥḥud*, bāb 36).

In *ḥadīth* this terminology is often, but not always followed, the other term for the supererogatory *ḥajāt* being *ḥajāt al-tafawwū'* (e.g. Abū Ishāq al-Shīrāzī, *Kitāb al-Tanbīh*, ed. A. W. T. Juynboll, p. 26), a term that goes back to the *Kurān* (*Sūra* ii. 153, 180; i. 80), and which occurs also in canonical *ḥadīth* (Abū Dāwūd has a *Kitāb al-Tafawwū'* in his *Ḥunna*). The whole class of supererogatory *ḥajāt* is called *nawāfil* as well as *ḥunna*. *Nawāfil*, as a general designation of supererogatory *ḥajāt*, covers three subdivisions. The following juxtapositions may give a survey of the terminology:

<i>Nawāfil</i> (Khalil, transl., Guidi, p. 95, Mālikī)	{	<i>ḥunna</i> <i>mu'akkada</i> <i>mandūba</i>
<i>Nawāfil</i> (Ghazālī, <i>Thiyā</i> , i. 174, Shāfi'ī)	{	<i>ḥunna</i> <i>mu'akkada</i> <i>tafawwū'</i>

It may be added that the term *nawāfil* is used especially for the supererogatory *ḥajāt* preceding or following the *ḥajāt*; they belong to the first subdivision.

In Shī'ī *ḥadīth* *nawāfil* is the widest term; by *nawāfil* the daily and non-daily supererogatory prayers are designated.

AL-SAYYIDA NAFISA, a mausoleum outside Cairo, south of the Mosque of Aḥmad b. Tūlūn

in the direction of the sepulchral mosque of al-Shāfi'ī. Among the female saints [cf. *WALI*] in Cairo next to Sayyida Zaynab bint Muhammad [q. v.] and "Sitt Sekina" (Sakina) "Sitt Nafisa" takes a very prominent place. In the official recitations of the *Kurān*, al-Sayyida Nafisa, where the reading is held on Sundays, takes third place among them all, immediately after Imām al-Shāfi'ī and Imām al-Hunaini (see Bergsträsser, in *lit.*, xli. [1933], 110 sq.). The sanctuary is visited by both men and women, especially in the evening. The door leading to the sarcophagus itself is only opened once a year. The foundation contains a number of other buildings besides a mosque, including a library and Sūfi cells. The land around it is a much sought after place of interment.

Nafisa was a daughter of al-Ḥasan b. Zaid b. al-Ḥasan [q. v.]. She came to Egypt with her husband Ishāq al-Mu'tamin, a son of Dja'far al-Sādiq [q. v.]. She had a reputation for learning and piety. Shāfi'ī frequently visited her to collect traditions; on his death, his body was brought to her house so that she might say the prayer for the dead over him. She had children but her descendants soon died out. She herself died in

Ramadan 208 (beg. of 824). Legend credits her with great *harāma* [q. v.]; for example as is told of several Egyptian, and not only Muslim saints, it is said that her prayers produced a great rising of the Nile in a single night. In contradiction of a story that her husband wanted to take her body to the family burialplace in the al-Baḥrī [q. v.] cemetery in Medina but was prevented by her devotees, is the general opinion that this is her tomb which she built with her own hands and in which she reail the Qur'an long before her death. — Several rulers took part in the development of the sanctuary, 'Abbasids and later Fatimids and Ottoman governors. The cupola over the grave was restored by the caliph al-Hāfi in 532 (1138) and the mosque in 692—694 (1294—1295) by the Mamlūk al-Malik al-Nāṣir Muḥammad b. Qalā'ūn.

(R. STROTHMANN)

NAFS 1) (n.), soul. *Nafs*, in the early Arabic poetry, meant the self or person, while *rūḥ* meant breath and wind. Beginning with the Qur'an *nafs* also means soul, and *rūḥ* means a special angel messenger and a special divine quality. Only in post-Qur'anic literature are *nafs* and *rūḥ* equated and both applied to the human spirit, angels and *djinn*.

I. The Qur'anic uses. *A. Nafs* and its plurals *anfus* and *nufus* have five uses: 1. In most cases they mean the human self or person, e.g., iii. 54: "Let us call... ourselves and yourselves"; also xii. 54; ii. 20, 21. 2. In six verses *nafs* refers to Allāh: v. 116: "Thou [Allāh] dost know what is in myself [says 'Isā], but I do not know what is in Thyself [*nafsiha*]"; also iii. 27, 28; vi. 12, 54 and xx. 43. 3. One reference, xxv. 4 (cf. xlii. 17), is to gods: "They [*āliha*] do not possess for themselves (*anfusihim*) any harm or benefit at all". 4. In vi. 130 the plural is used twice to refer to the company of men and *djinn*: "We have witnessed against ourselves (*anfusinā*)". 5. It means the human soul: vi. 93: "While the angels stretch forth their hands [saying,] Send forth your souls (*anfus*)"; also i. 15; lxiv. 16; lxxix. 40, etc. This soul has three characteristics: a. It is *ammāra*, commanding to evil (xii. 53). Like the Hebrew *nefesh* the basal idea is "the physical appetite", in Pauline usage *φύξις*, and in the English New Testament "flesh". It whispers (i. 15), and is associated with *al-hawā*, which, in the sense of "desire", is always evil. It must be restrained (lxxix. 40) and made patient (xviii. 27) and its greed must be feared (lix. 96). b. The *nafs* is *lawwāma*, i.e., it upbraids (lxxv. 2); the souls (*anfus*) of deserters are straitened (ix. 119). c. The soul is addressed as *nafsinna*, tranquil (lxxxix. 27). These three terms form the basis of much of the later Muslim ethics and psychology. It is note-

worthy that *nafs* is not used in connection with the angels.

B. Rūḥ has five uses: 1. Allāh blew (*nafakha*) of His *rūḥ*, s. into Adam, giving life to Adam's body (xv. 29; xxxviii. 72; xxii. 8), and s. into Maryam for the conception of 'Isā (xxi. 91 and lxi. 12). Here *rūḥ* equates with *rūḥ* and means the "breath of life" (cf. *Gen.* ii. 7), the creation of which belongs to Allāh. 2. Four verses connect *rūḥ* with the *amr* of Allāh, and the meanings of both *rūḥ* and *amr* are disputed. a. In xlii. 87, it is stated: "They ask thee [O Muḥammad] about *al-rūḥ*; say: *al-rūḥ min amrī rabbī*, and ye are brought but little knowledge". b. In xvi. 2, Allāh sends down the angels with *al-rūḥ min amrī* upon whomsoever He wills of His creatures to say: "Warn that the fact is, There is no God but Me, so fear". c. In xi. 15, Allāh "cast *al-rūḥ min amrī* upon whomsoever He wills of His creatures to give warning". d. In xlii. 52: "We revealed (*awḥaynā*) to thee [O Muḥammad] *rūḥan min amrī*; thou knewest not what the book was, nor the faith, but We made it to be a light by which We guide whomsoever We will of Our creatures". Whatever meanings *amr* and *min* may have, the contexts connect *al-rūḥ* in a, with knowledge; in b, with creatures, for warning; and in c, with Muḥammad, for knowledge, faith, light and guidance. Therefore this *rūḥ* is special equipment from Allāh for prophetic service. It reminds forcibly of Bezalel, who was "filled with the spirit of God in wisdom, in understanding and in knowledge" (*Exodus* xxxv. 30, 31). 3. In iv. 169, 'Isā is called a *rūḥ* from Allāh. 4. In xcvii. 4; lxxviii. 38 and lxx. 4, *al-rūḥ* is an associate of the angels. 5. In xxvi. 193, *al-rūḥ al-amīn*, the faithful *rūḥ*, comes down upon Muḥammad's heart to reveal the Qur'an. In xix. 17, Allāh sends to Maryam "Our *rūḥ*", who appears to her as a well-made man. In xvi. 104, *rūḥ al-qudus* sent the Qur'an to establish believers. Three other passages state that Allāh helps 'Isā with *rūḥ al-qudus* (ii. 81; ii. 254 and v. 109). This interrelation of service and title imply the identity of this angelic messenger, who may be also the *rūḥ* of 4. Thus in the Qur'an *rūḥ* does not mean angels in general, nor man's self or person, nor his soul or spirit. The plural does not occur.

C. Nafas, breath and wind, cognate to *nafs* in root and to *rūḥ* in same of its meanings, does not occur in the Qur'an, but is used in the early poetry (F. Krenkow, *The Poems of Tufail and al-Tirmidhī*, London 1927, p. 32). The verb *tanafas* (*Sūra* lxxxi. 18) is derived from that meaning, while the only other Qur'anic forms from the same radicals are *salafatunafas* 'i-mutanafasina' (lxxlii. 26) and are derived in al-Ṭabarī, *Djāmi' al-Bayān*, Cairo 1321, xxx. 57, probably correctly, from *nafisa*, "he desired".

II. The Umayyad poetry first uses *rūḥ* for the human soul (*Kitaḥ al-Aghāni*, ed. 1285, xvi. 126, last line; Cheikh, *Le Christianisme*, Paris 1925, p. 338) where the Qur'an had used *nafs* as in N^o. 5 above.

III. Of the early collections of traditions, Mālik's *al-Muwatta'*, Cairo 1339, i. 126 uses *nafama*, which does not occur in the Qur'an, and *nafs* (ii. 262) for the soul or spirit, while Ibn Hanbal's *Musnad* uses *nafam* (vi. 424), *nafs* (i. 297; ii. 364; vi. 140) and *nafs* and *rūḥ* (iv. 287, 296).

1) For the sake of convenience in this article *rūḥ* is treated as well.

Muslim's *al-Saḥīḥ* (Constantinople 1331), viii. 44, 162 sq. and al-Bukhārī's *al-Saḥīḥ*, Cairo 1314, iv. 133, both use *rūḥ* and *arwāḥ* for the human spirit.

IV. The *Taḥṣīl al-'Arūs* (iv. 260) lists 15 meanings for *nafs* and adds two others from the *Lisān al-'Arab*, as follows: spirit, blood, body, evil eye, presence, specific reality, self, tan, haughtiness, self-magnification, purpose, disdain, the absent, desire, punishment, brother, man. It states that most of these meanings are metaphorical. The *Lisān* (viii. 119—126) finds examples of these meanings in the poetry and the *Kur'ān*. Lane's *Lexicon* faithfully reproduces the material (p. 2827d). The lexical treatments of *nafs* disclose three facts: 1. Any attribution to Allāh of *nafs* as "soul" or "spirit" is avoided. 2. In man, *a. nafs* and *rūḥ* are identified, or *b. nafs* applies to the mind and *rūḥ* to life, or *c. man* has *nafsan*, two souls, one vital and the other discriminative, or *d. the discriminative soul* is double, sometimes commanding and sometimes forbidding.

V. The influences that affected the post-Kur'ānic uses of both *nafs* and *rūḥ* were the Christian and Neo-Platonic ideas of *rūḥ* with human, angelic and divine applications, and the more specifically Aristotelian psychological analysis of *nafs*. These influences are clearly shown in the records of the religious controversies.

A. Al-Ash'arī [q. v.] (H. Ritter, *Die dogmatischen Lehren der Anhänger des Islam von Abu 'l-Hasan 'Alī bin Ismā'īl al-Ash'arī*, Istanbul 1929) reports the Rāḍīya doctrines of the incarnation of *rūḥ* Allāh in Adam and its transmigration through the prophets and others (p. 6, 46), as well as the conflicting positions that man is body (*ḥisām*) only, body and spirit, and spirit (*rūḥ*) only (p. 61, 329 sqq.). His creed of the orthodox (p. 290—297) omits any statement about the nature of man.

B. Al-Baḥdādī [q. v.] (*al-Farḥ bain al-Firah*, Cairo 1328) records the same heretical doctrines about man's nature (p. 28, 117 sqq., 241 sqq.), says the transmigration theories were held by Plato and the Jews (p. 254) and describes the incarnation beliefs of the Ḥallāḍīya sects (cf. *ḥuḍūḍ*) among whom he includes the Ḥallāḍīya (p. 247). His position is "The life of Allāh is without *rūḥ* and nourishment and all the *arwāḥ* are created, in opposition to the Christian doctrine of the eternity of the Father, Son and Spirit" (p. 325).

C. Ibn Ḥazm [q. v.] uses *nafs* and *rūḥ* interchangeably of man's soul (*Kiṭāb al-Fiṣal fī 'l-Milal*, 5 parts, Cairo 1317—1321; v. 66). He excludes from Islam all who hold metempsychosis views, among whom he includes the physician-philosopher Muḥammad b. Zakariyya' al-Rāzī (l. 90 sqq.; iv. 187 sq.). He rejects absolutely the doctrine of some of the Ash'ariya of the continual re-creation of the *rūḥ* (iv. 69). He taught that Allāh created the spirits of all Adam's progeny before the angels were commanded to prostrate to him (Sūra vii. 171), and that these spirits exist in al-Barzakh [q. v.] in the nearest heaven until the angel blows them into embryos (iv. 70).

D. Al-Shahrastānī [q. v.] (*Kiṭāb al-Milal wa 'l-Niḥāl*, ed. Cureton, part i, London 1842) in his description of the belief of the pagan Arabs concerning survival after death does not use the terms *nafs* or *rūḥ*, but says the blood becomes a wrath bird that visits the grave every hundred years. One of his most important sections (p. 203—

240) deals with the orthodox and heterodox doctrines of *al-rūḥ*. Al-Hunafā', or true believers, debate with al-Sābi'a [q. v.], who are dualists, emanationists and gnostics. His account of the views of the Sābi'a faithfully reflects the doctrines of the Ikhwān al-Safā' (*Rasā'il*, 4 vols., Bombay 1305), who taught that man is a whole compounded of a corporeal body and a spiritual *nafs* (i/ii, 14), and that the substance (*ḥaywar*) of the *nafs* descended from the spheres (*al-afāk*). But al-Shahrastānī rejects the Neo-Platonic idea that human souls (*nufūs*) are dependent upon the souls of the superhuman spirit world (*al-nufūs al-rūḥāniyyāt*) (p. 210, 224 sq.), and the Hermetic doctrines that the *nafs* is essentially evil (p. 236) and that salvation consists in the release of the *rūḥ* from material bodies (p. 226 sq.). He applies the term *rūḥānī* to all spirits, good and evil (p. 213). His description of the nature of man (p. 216 sqq.) with three souls, vegetative, animal and human, each with its own source, need, place and powers, resembles that of the Ikhwān al-Safā' (*Rasā'il*, i/ii, 48 sqq.). Indeed, the Aristotelian analysis of the human soul as given in *De Anima*, and handed on by Alexander of Aphrodisias and Porphyry, had been adopted with little modification by the Muslim philosophers, such as al-Kindī [q. v.], al-Fārābī [q. v.] each of whom wrote a *Kiṭāb al-Nafs*, Ibn Sīnā [q. v.] who wrote two, and Ibn Miskawīh [q. v.], whose *Tahdhīb al-Akhlaq* has the same immaterial (p. 1) and functional (p. 7) psychology for its ethical basis. Al-Shahrastānī achieved the long needed interpretation of the conflicting images of *nafs* and *rūḥ* in the Greek and Christian heritage, and in the Kur'ān and Muslim tradition. But the philosophers, even with his support, were not able to force the Greek psychology upon orthodox Islam. The *Mutakallimūn* [s. art. *KALĀM*] and the great majority of Muslims broadened the Kur'ānic terminology, but retained the traditional views of the nature of the soul as a direct creation of Allāh having various qualities.

VI. Aristotle's principle of the incorporeal character of spirit had nevertheless found a permanent place in Muslim doctrine through the influence of Islam's greatest theologian, al-Ghazālī [q. v.]. In al-Tahānawī's *Dictionary of the Technical Terms* (ed. Sprenger, Calcutta 1862) are extracts of the doctrines of al-Ghazālī on man's *rūḥ* and *nafs*. He defines man as a spiritual substance (*ḥaywar rūḥānī*), not confined in a body, nor imprinted on it, nor joined to it, nor separated from it, just as Allāh is neither without nor within the world, and likewise the angels. It possesses knowledge and perception, and is therefore not an accident (p. 547 at top; cf. *Tahāfut al-Falāsifa*, Cairo 1302, p. 72). He devotes the second section of *al-Risāla al-Laduniya* (Cairo 1327, p. 7—14) to explain the words *nafs*, *rūḥ* and *qalb* (heart), which are names for this simple substance that is the seat of the intellectual processes. It differs from the animal *rūḥ*, a refined but mortal body in which reside the senses. He identifies the incorporeal *rūḥ* with *al-nafs al-muṭma'anna* and *al-rūḥ al-amrī* of the Kur'ān. He then uses the term *nafs* also for the "flesh" or lower nature, which must be disciplined in the interests of ethics.

VII. This position of al-Ghazālī's was that of the theistic philosophers in general, as well as some of the Mu'tazila and the Shāfi'a, but it has never dominated Islam. The great analytical philosopher

and theologian, Fakhr al-Din al-Rāzī, could not bring himself to accept it. In his *Mafātih al-Ghaib*, v. 435, commenting on Sūra xvii. 85, he quotes as the opinion of al-Ghazālī the statement that it is in the latter's *Tahāfut* (p. 72; cf. also al-Rāzī's *Muḥajjal*, Cairo 1323, p. 164), but on p. 434 (l. 9 and 8 from below) of the *Mafātih* he acknowledges the strength of the corporeal doctrine, and in his *Ma'ālim Uṣūl al-Dīn*, on the margin of the *Muḥajjal*, p. 117 *sq.*, he definitely rejects as baseless (*bāṭil*) the view of the philosophers that the *nafs* is a substance (*ḥaywar*) which is not a body (*ḥaym*) and not corporeal.

VIII. Al-Baidāwī's [q. v.] system of cosmogony and psychology is given in his *Tanzīl al-Anwār* (lithograph ed. with commentary Abu 'l-Thana' al-Iṣfahānī and gloss by al-Djurdjānī, Stambul 1303, p. 285 *sqq.*; Brockelmann, *G. A. L.*, i. 418, li. 111, printed Cairo 1323). He discusses 1. The classes of incorporeal substances, 2. the heavenly intelligences, 3. the souls of the spheres, 4. the incorporeality of human souls, 5. their creation 6. their connection with bodies and 7. their survival. His cosmogony follows: Allāh, because of his unity, created only one Intelligence (*'aql*). This Second Intelligence, that emanated first (*al-ḥādīth*) from Allāh, is the cause (*'illa*) of all other potentialities and is not body (*ḥaym*), nor original matter (*ḥayūl*) nor form (*ṣūra*). It is the secondary cause (*asbab*) of another intelligence with soul (*nafs*) and sphere (*falak*). There emanates from the second a third intelligence and so on to the tenth (p. 288) who is the *rūḥ* of Sūra lxxviii. 38 (cf. al-Baidāwī's *Anwār al-Tanzīl*, ed. Fleischer, li. 383, l. 4) whose effective influence is in the world of the elements and who is the producer of the spirits (*arwāḥ*) of mankind. Below these intelligences are the high or heavenly angels, which the philosophers call *al-nuṣūṣ al-falakīya*, and the low *nuṣūṣ*, which are in two classes: earthly angels, in control of the simple elements and the earthly souls, such as the reasoning souls (*anfus nāṭiqā*) controlling particular persons. In addition (p. 285) there are the incorporeal substances, without effect or control, who are angels, some good (*al-kurūbiyyūn*) and some evil (*al-ḥayūṣiyyūn*) and the *ḥaym*, who are ready for both good and evil. This is the classification he refers to in his comment on Sūra ii. 28 (ed. Fleischer, l. 47, 22). His psychology resembles that of al-Ghazālī, whom he mentions (p. 294). For the incorporeality of the soul (*anfus al-nuṣūṣ*) he presents five arguments from reason, four Qur'ān verses and one tradition. His commentator remarks (p. 300) that these prove only that the soul differs from the body. He then argues that all *nuṣūṣ* are created when their bodies are completed. The *nafs* (p. 303) is not embodied in and is not close to the body, but is attached as the lover to the beloved. It is connected with the *rūḥ* which comes from the heart and is generated of the finest nutritive particles. The reasoning *nafs* produces a force that flows with that *rūḥ* through the body, producing in every organ its proper functions. These functional powers are perceptive, which are the five external senses, and the five internal faculties of the *sensus communis*, imagination, apprehension, memory and reason, and the active (*al-muḥarrikā*) which are voluntary (*ikhtiyārīya*) and natural (*fakīya*, p. 308).

IX. The dominant Muslim doctrine concerning the origin, nature and future of *al-rūḥ* and *al-*

nafs is most fully given in the *Kitāb al-Rūḥ* of Ibn Kaṣīm [q. v.] (Haidarābād, 2nd ed., 1324). Of his 21 chapters Ibn Kaṣīm devotes the 19th to the problem of the specific nature of the *nafs* (p. 279–342). He quotes the summaries given by al-Ash'arī (*op. cit.*, p. 331–335), and by al-Rāzī (*Mafātih al-Ghaib*, v. 431–434). He denies al-Rāzī's statement that the *Mutaballim* consider man to be simply the sensible body, and says all intelligent people hold man to be both body and spirit. The *rūḥ* is identified with the *nafs*, and is itself a body, different in quiddity (*al-māhiya*) from this sensible body, of the nature of light, high, light in weight, living, moving, interpenetrating the bodily members as water in the rose. It is created, but everlasting; it departs temporarily from the body in sleep; when the body dies it departs for the first judgement, returns to the body for the questioning of Munkar and Nakir, and, except in the cases of prophets and martyrs, remains in the grave foretasting bliss or punishment until the Resurrection. He rejects (p. 256) Ibn Ḥazm's doctrine that Adam's progeny are in al-Barzakh awaiting their time to be blown into embryos. He presents 116 evidences for the corporeality of the *rūḥ*, 22 refutations of opposing arguments and 22 rebuttals of objections. He represents traditional Islām.

X. The earlier Sūfis had accepted the materiality of the *rūḥ*. Both al-Kaṣhānī [q. v.] (*al-Risāla*, with commentary of Zakariyā' al-Anṣārī and gloss of al-'Arūṣ, Bālāḥ 1290, li. 105 *sqq.*) and al-Hudjwī [q. v.] (*Kaṣf al-Maḥjūb*, ed. Nicholson, London 1911, p. 196, 262) call the *rūḥ* a fine, created substance (*'aīn*) or body (*ḥaym*), placed in the sensible body like sap in green wood. The *nafs* (*al-Risāla*, p. 103 *sqq.*; *Kaṣf al-Maḥjūb*, p. 196) is the seat of the blameworthy characteristics. All together make the man.

In addition to the philosophical position of the immateriality of *al-rūḥ* that al-Ghazālī had made orthodox, another interpretation of spirit developed which is essentially theosophical. Ibn al-'Arabī [q. v.] (H. S. Nyberg, *Kleinere Schriften des Ibn al-'Arabī*, Leyden 1919, p. 15, 11, 7 *sqq.*) divides "things" into three classes: Allāh, Who is Absolute Existence and Creator, the world, and an undefinable *tertium quid* of contingent existence that is joined to the Eternal Reality and is the source of the substance and the specific nature of the world. It is the universal and common reality of all realities. Man likewise is an intermediate creation, a *ḥarākāt* (p. 22, 42) between Allāh and the world, bringing together the Divine Reality and the created world (p. 21, 42) and a vicegerent connecting the eternal names and the originated forms (p. 96). His animal spirit (*rūḥ*) is from the blowing of the divine breath (p. 95) and his reasoning soul (*nafs nāṭiqā*) is from the universal soul (*al-nafs al-kullīya*), while his body is from the earthly elements (p. 95 *sq.*). Man's position as vicegerent (p. 45 *sq.*) and his resemblance to the divine presence (p. 21) come from this universal soul, who has various other names, holy spirit (*rūḥ al-qudus*), the first intelligence (p. 51), vicegerent (*khulīfa*), the perfect man (p. 45) and the *rūḥ* of the world of command (*al-amr al-awwal*), which al-Ghazālī held to be Allāh's direct creation (p. 122, 1). In his *Fuṣūḥ* (lithograph ed. with commentary by al-Kāshānī, Cairo 1309, p. 12 *sqq.*) he says that Allāh appears to Himself in a form which thus becomes the place of

manifestation of the Divine essence. This place receives a *rūh*, who is Adam, the *khālifa* and the perfect man. He discusses (Nyberg, *op. cit.*, p. 129 *sq.*) the essence and properties of the *rūh*, quoting among others the view he says is "attributed" to al-Ghazālī which is in *al-Tahfūt* (as above). He finds the differences of doctrine harmless since all agree that the *rūh* is originated. In his tractate on the *nafs* and *rūh* (M. Asin Palacios, *Tratado Acerca del Conocimiento del Alma y del Espíritu*, in *Actes du XI^{ème} Congrès international des Orientalistes*, Paris 1906, iii. 167—191) he describes how men may reach the distinction of "the perfect man" through the cultivation of the qualities of the *rūh* and the suppression of the *nafs*.

Ibn al-Arabi's contemporary, the poet Ibn al-Fārid (Nicholson, *Studies in Islamic Mysticism*, Cambridge 1921, chap. iii.), at times identifies his own *rūh* with that from which all good emanates (*al-Tā'ya al-kubrā*, on margin of *Divān Ibn al-Fārid*, Cairo 1319, ii. 4 *sq.*) and with the "pole" (*qutb*) upon which the heavens revolve (p. 113, 115). Al-Kāshānī, the commentator of *al-Tā'ya*, explains that this identity is with the greatest spirit (*rūh al-arwāḥ*) and the greatest "pole". The compiler of the commentaries on the *Divān* states (ii. 196) that incarnation (*ḥulūl*) and union (*iṭṭihād*) with Allāh are impossible, but there is real "passing away" (*fanā*) and attainment (*waṣl*) of the *rūh* and *nafs* in the *nafs* of Allāh, for His *nafs* is their *nafs*.

Abd al-Karīm al-Djīlānī carries this position of existential monism on to straight animistic pantheism. In *al-Insān al-kāmil* [q.v.] (Cairo 1334) the terms *rūh al-ḥudus*, *rūh al-arwāḥ* and *rūh Allāh* stand for a special one of the aspects of the Divine Reality (*al-Haqq*), not to be embraced under the command "be" nor created. This spirit is the divine aspect in which stand the created spirits of all existences, sensible and intelligible (p. 94). Existence itself subsists in the *nafs* of Allāh, and His *nafs* is His Essence (*dhāt*). Moreover, every sensible thing has a created spirit (*rūh*) (p. 94). One of the aspects of the angel of Sūra xlii. 52, who is named the command (*amr*) of Allāh, and who is an aspect of Allāh as above, is given to the *rūh* of Muḥammad, which is identified as the *rūh* mentioned in the verse. That angelic and divine *rūh* thereby becomes the *idea* (*ḥaṣṣa*) of Muḥammad (p. 95 *sq.*) and he thereby becomes the "perfect man" (p. 96, 131 *sq.*). The *rūh* which is the specific nature of the human *nafs* has five names: animal, commanding to evil, instinctive (*al-mulḥama*), reproving, and tranquil. When the divine qualities actually describe the *nafs*, then the names, qualities and essences of the gnostic (*ṣūfī*) are those of the One Known (*Ma'rūf*) (p. 130 *sq.*).

XI. In geomancy (*ilm al-raml*) the first "house" (*bayt*) of the *ummaḥāt* [cf. MADAGASCAR, *supra*, iii. 73^b] is called *nafs* because it guides to problems concerning the soul and spirit of the inquirer, and to the beginning of affairs (Muḥammad al-Zanṭī, *Kitāb al-Faṣl fī 'ilm al-Raml*, Cairo n. d., p. 7; cf. Henr. Corn. Agrippae, *Opera*, Leyden, n. d., but early xvijth cent., p. 412: *Nam primus domus personam tenet quatercentis*).

(E. E. CALVERLEY)

AL-NAFUSA, in Berber INFUSEN, name of a Berber tribe. According to the common genealogical scheme (cf. Ibn Khaldūn, *Kitāb al-Ibar*, i. 107—117 of the text), the Nafūsa are one of the four branches of the large body of the Boṭr, whose name derives from their chief Mādghis al-Abtar. At present the dwelling place of the Nafūsa is south-west of Tripoli, on the plateau of the same name which from the frontier between Tunisia and Tripolitania tends eastward, and, if taken in the largest sense, comprises the regions of Nālūt, Fassāto and Yefren. The inhabitants of these regions are generally called Nafūsa, although, in a genealogical sense, this name can be applied to some groups only. Probably the name Djabal Nafūsa (in Berber *Drar n Nafūsa*), which originally belonged to a part of the plateau, was extended to the large area between Wāzen and Yefren on account of the fact, that of the tribes inhabiting it, the Nafūsa were of prominent importance. This use of the name in its widest sense is also to be found in the book by Ibrāhīm b. Sīman al-Shammākhī "Castles and Ways of the Nafūsa plateau" (1302 = 1884—1885), in which all the territories of Yefren, Fassāto and Nālūt are described.

The scarce data on the history of the Nafūsa, which we possess, are to be found, for the largest part, in Arabic sources. In the Greek and Latin authors of pre-Islamic times there is no single sure allusion to them. The name occurring in Corippus' *Johannis* (second song, l. 146: *Quaeque nefanda colunt tristis montana Navus*), does not refer, in all probability, to a place or a tribe of Tripolitania, but rather of the Aurès (Awrās), its plateau or its neighbourhood. The fact that Navus represents a form closely connected with Nafūsa, proves only that the name was widely spread among the Berbers, that it is old and may be probably connected with such words as *unnefus*, fem. *tennefus* "right, to the right hand" in Augila.

In Islamic times the name is recorded for the first time in connection with the capture of the town of Tripoli by 'Amr b. al-'As (22 or 23). According to Ibn 'Idhārī (i. 2 *sq.*, text) during the siege the inhabitants called to their aid the Nafūsa, who came to their aid. At that time they were residing also in the vast plain of Djafāra, situated between the Djabal and the Sea; one of their chief towns, if not their capital, was Šabra on the coast (Roman Sabratha, formerly Phoenician), west of Tripoli, which by Ibn Khaldūn (*Ibar*, i. 181, l. 8, text) is called "the city of the Nafūsa". This town was taken

by surprise and plundered by a body of cavalry sent by 'Amr. This raid was probably undertaken not only to continue the conquest farther westward, but also to punish the Nafusa, whose territory 'Amr had invaded in order to conquer it (cf. al-Bakri, p. 9, 10, text), and which he had to abandon by order of the Caliph.

According to some sources, the Nafusa at that time were Christians; according to other reports, however, they were Jews. Our latest local information makes it probable that Christianity had spread widely among them; though the conversion of single groups to Judaism is not excluded. In fact traces of Byzantine basilicas have been found on the plateau, e.g. at Teméza, Iqarman etc., which are also mentioned in some sources and which must have been used by large numbers of the indigenous population.

When the Arab had conquered North Africa, the Nafusa of Sabra and of the coastal region retired, according to the common opinion, to the plateau, where they remained hostile towards the conquerors. A fresh study of the Tripolitan population, however, makes it clear that a part of them must have stayed in their old dwelling-places where they intermarried with other tribes and, in course of time, became arabicized. In fact there are tribes in the Western Džafra and in Tripoli, the town and its surroundings (the regions of al-Sāhil, Tagiura, etc.), that, according to the local genealogy, derive from the Nafusa. Apart from this ethnic tradition, there is the fact, recorded in several sources, that after the first case of intervention of the Nafusa in the affairs of the town of Tripoli — which may have been partly due to a Christian opposition to the Muhammadan invasion — they wanted, under successive dominations, to make their presence felt and their influence preponderant in the north-western region of Tripolitania, so that the outlines of the history of the small, but strong and civilized Berber unit may be supposed to be the following. Having its centre in the plateau, it intended to make felt, as often as possible, its dominion in the coastal region and thus keep the control of the main way of communication between Egypt and Ifrikiya, which ran along the coast and which was followed by the various expeditions to the Maghrib. Even at present such aspirations may be stirred in the minds of the most cultivated of these populations, to such an extent that even some of them have reckoned with an eventual reoccupation of their old territories in Western Džafra.

The period in which the Nafusa, according to the sources available to us, vigorous were most active and took a part in the events happening in North Africa, was that of the great Khāridjī [q.v.] revolts, which began in 122 (739—740) and did not cease before the 19th (8th) century, i.e. before the era of the Fātimids. When the Wahhī doctrines began to spread among the North African populations in the second century A. H., they embraced them and so joined the rebellious movement of the Berbers against the Arab conquerors, a movement which, prepared by several other causes, found also some support in the Khāridjī heterodoxy. The Nafusa embraced the Ibāḍī, i.e. the more moderate form of the Khāridjī doctrine, and remained ever faithful to it with heroic attachment. In alliance

with other Berber tribes, either Ibāḍīs or other branches of the sect, they repeatedly made war upon the Arab governors of Ifrikiya.

In 140 (757—758), they elected as their *imām*, probably with the intention of founding an Ibāḍīte principality — an intention which manifests itself also at other times — an Arab called Abu 'l-Khaṭṭāb 'Abd al-'Alī b. al-Samḥ al-Ma'fīrī [q.v.], one of the missionaries of Ibāḍism in North Africa. Under his command and in conjunction with other Berber groups, they occupied Tripoli, fought against the Sufrite [cf. AL-SUFRIYA] Wafardjūma, who had sacked Kairawān where they had settled, and against the armies sent by the Abbāsids to reconquer Ifrikiya. Finally, in 144 (761—762), Abu 'l-Khaṭṭāb and a large number of his followers perished near Tanorḡha (Tāwūghā) in a great battle against the general Muḥammad b. al-Aḥ'āl al-Khuzā'i, the governor of Ifrikiya.

Another notorious *imām* of the Nafusa was a Berber Abū Ḥatīm Ya'qūb [q.v.], whose enterprises survive in oral tradition on the plateau, who speaks of his 375 encounters with the Arabs. He was killed in battle in 155 (771—772).

When the Ibāḍī kingdom of the Rustamids [cf. RUSTAM], which had Tahert as its centre, had been founded, the Nafusa did not elect an *imām* of their own any more, but formed a part of this kingdom under a governor who depended upon it. Some of these governors, e.g. Abū 'Ubaida 'Abd al-Ḥamid al-Djanāwunī (of Igennāwen), Abū Maṣ'ūr Ilyās (of Tendemmira), are often praised by the Berbers of the Džafra, for their importance and ability in maintaining the interests of Ibāḍism, and also for their learning and piety.

The Nafusa were a valuable support of the kingdom of the Rustamids, of which they formed the eastern bulwark. Being near the territory of the Aghlabides [q.v.], they shared to some extent the vicissitudes of this state which had arisen in Ifrikiya in the beginning of the 9th century A. D. The town of Tripoli was in the possession of those princes; Western Džafra, on the other hand, till near the Sea, and probably also part of Eastern Džafra, was in the power or under the influence of the Nafusa. When Tripoli was beleaguered in 267 (880—881) by the Tulunid prince al-Abbās, who, having revolted against his father Ahmad, sought to conquer Ifrikiya at his own risks, the Nafusa were called to aid, and, appearing without delay, they defeated the army of the invaders (according to other sources, their help was invoked by the inhabitants of Lebda). This fact, which reminds of the first siege of Tripoli by the Muslims, proves clearly the influence the Nafusa possessed in northwestern Tripolitania and it accounts also for the severe blow dealt to them in 283 (896—897) by the Aghlabides, when Ibrāhīm II b. Ahmad, who led an expedition from Tunis to Egypt, found his passage through the coastal region of Tripolitania barred by the Nafusa. The bloody battle of Mānū, which was followed by acts of terrible cruelty inflicted upon hundreds of Nafusa prisoners, and which is narrated in a more or less anecdotal form in the Sunnī as well as in the Ibāḍī sources, is ascribed, ultimately, to the desire of the Caliph to punish the Nafusa who were the principal support of the heretical state of Tahert; or to the resentment of the Aghlabides at acts of enmity committed

by the Berbers, as well as in the humiliation they had suffered when the expedition of the Tūlūnid al-Aḥḥas, which was directed against them, had been avorted by the Nafūsa, to whom this exploit became a point of glory.

In reality, however, taking into account the whole political situation as well as the historical antecedents, it is evident that that battle, which is still mentioned in the oral tradition of the Ibadites as the most terrible disaster they ever suffered, was the inevitable encounter between the Aghlabide power and the supremacy of the Nafūsa exercised in the former's immediate vicinity and even in its own territory.

When the power of the Aghlabides as well as that of the Rustamids had been destroyed by the Fāṭimids [q. v.], the Nafūsa found themselves face to face with those new masters of Eastern Barbary. There exist reports of an instance of their strenuous opposition to Fāṭimid power which endeavoured to subdue them in 310 (922—923), and which defeated them in the following year.

There are, however, reports concerning the part taken by the Nafūsa, or at least by tribes from the plateau, in the great Khāridjī rebellion, which was led by Abū Yaṣīd and which ended with the victory of the Fāṭimids. Probably the Ibadite populations of the Djabal, although having given up the idea of forming one large autonomous state, endeavoured to avoid any dependence upon the various kingdoms and empires which successively held the supremacy in North Africa, while the latter, on the other hand, endeavoured, as far as possible, to obtain a footing also in the mountainous region which forms the strategic key to the plain stretching towards the coast.

When the Almoravides [q. v.] undertook the conquest of Eastern Ifrīqiya under 'Abd al-Mu'min (554—555 = 1159—1160), the Nafūsa were also subdued by his army. Their territory became the scene of violent struggles and massacres, of raids and partial conquests during the long period of the revolt of the Banū Ghāniya who attempted to restore the Almoravid empire and who, from 580 (1184—1185) onwards, for nearly half a century and with varying success, fought chiefly in Oriental Barbary. In these fights Arabs of the tribe of Debbāb (belonging to the Banū Sulaim), took part who had come to Tripolitania during the well known invasion of the Banū Hilāl and Sulaim. Some clans of the Debbāb, especially the Maḥmūd and the Djuwārī, settled in the coastal region west of Tripoli, where the Nafūsa had exercised their power before. Yet the great mass of the latter must have retired to the plateau not at the time of the conquest, but in consequence of the Arab invasion.

The Nafūsa remained in nearly the same attitude of defence of their independence, during the supremacy in Ifrīqiya of the Hafṣids [q. v.], and, afterwards, of the Turks. While other populations in the neighbourhood gave up their Ibadism in order to embrace Sunnism, and consequently became arabised, the Nafūsa stuck to their faith and to their Berber vernacular, withdrawing themselves to the rough crests of their mountains, and from time to time taking part in the acts of hostility and in the rebellions which the interior opposed to the efforts of the government of Tripoli to maintain its own authority and, chiefly, to levy taxes.

In the nineteenth century, the Turks, after having retaken in 1251 (1835—1836) the direct administration of Tripoli, had to fight long and bitterly for the conquest of the plateau of the Nafūsa also. The struggle lasted, with varying success, till 1274 (1857—1858); in this period the ṣaikh Ghāma b. Khālifa distinguished himself by courage and endurance; he is usually represented as the hero of Berber independence defended against the Turks. In reality, however, he was an Arab and the Arab tribe of the Maḥmūd had the largest share in the wars, while the Berbers, according to all appearance, did not take part in them on a large scale. During the Italian occupation of Tripolitania, which began in 1911, the Nafūsa were at first hostile in accordance with their old aspiration to found an independent Ibadite kingdom which should extend up to the Sea and include the region of Sabratha. Defeated in 1913 by the valiant general Lequie near al-Aḥḥas they offered their submission to the Italian authorities and ever since have proved very faithful subjects. When inner Tripolitania, in consequence of the effects of the Great War, was troubled by rebels, they showed an heroic attachment to Italy, fighting her enemies under great sacrifices. When in 1922 the reconquest of the inland had begun, they voluntarily took part in it, side by side with the regular troops, with perfect loyalty.

AL-NAPUSI AND SAHL AL-FARSI, Ibadite scholar of the Rustamid family, who lived in Tahert in the 11th (12th) century. Some say that he was one of those who by their learning and religious zeal helped to make that town famous. He was a complete master of Berber and served as interpreter under the *amir* Adah b. 'Abd al-Wahhab in the first half of the third century A.H., or even till 258 (871—872), and under Abu Hatim Yusuf b. Muhammad who, with a short interruption, was *naib* from 281—304 (894—907). This shows that the Rustamid princes of Tahert spoke Arabic, as was to be expected from their Oriental origin, and needed interpreters in their dealings with the Berber speaking peoples. When the Fatimids had destroyed the Ibadite power, Abū Sahl settled at Marras 'l-Khurei (La Calle, between Bône and the Tunisian frontier); or at Marras 'l-Dajidjadj on the Algerian coast, between 'Ain Taya and Capé d'Or (cf. e.g. al-Bakri, ed. de Slane, Algiers 1911, p. 64 ff., 82).

Al-Napusi is best known as the author of a big Berber *Divan*, containing religious and historical poems, both dealing probably with the doctrines and history of Ibadism. It has been lost, like so

many other works of Berber Ibadites; yet perhaps parts of it may be recovered by further search in the Maali, at Gerba and among the Nafusa. At any rate, Abū Sahl has an important place in the literary history of the Berbers, especially the Ibadites, who composed books on theology and law, chronicles, poetry and biographies.

Such a literary movement is usually explained by the need which the heretics felt of making clear their doctrine, especially the points in which it differed from the *sunna*, to the inhabitants of the interior of the Central and Eastern Maghrib, who did not know Arabic, and who must have been numerous about 1000 A.D. Yet another thing, which can be seen to-day, must not be forgotten, viz. the attachment of these peoples to their own tongue as a symbol of opposition to the Arabic speaking world in general and Muslim orthodoxy in particular. At the end of the nineteenth and beginning of the twentieth century, some Berber groups in the neighbourhood of Yefren in Tripolitania were led by Sūnī propaganda to give up their old Ibadite faith and embrace orthodoxy. This change in its turn caused the Berber dialect to be less used; as if heresy were bound up with the national language, and the giving up of the heresy removed the last obstacle to complete arabisation. This assumption is confirmed by some religious poems (they deserve to be called literature) in the region of Fasilā, where the love of the national language is still strong. In them the author says explicitly that he uses Berber to uphold and strengthen the Ibadite faith, which once flourished gloriously, but afterwards decreased, and is now well nigh disappeared. In past times also, the Berber literature of the Ibadites was partly a symbol of non-conformity and nationalism; so when Abū Sahl, who was rooted in Arabic civilisation by his origin, devoted himself to the study of Berber so as to become the best Berber scholar of his time and to compose in it his works. He must have felt in his deeply religious mind the connection between that language and the faith he professed.

(F. BÉGUINOT)

NAGPUR, a city, tahsil, district, and division of the Central Provinces of British India. The modern Central Provinces and Berar, which formed part of the eighteenth century Bhonsla kingdom of Nagpur, lie between 17° 47' and 24° 27' N. and 75° 37' and 84° 24' E., with an area of 113,285 square miles, and a total population of 17,951,147. Nagpur division contains a population of 3,595,578; Nagpur district 933,168; and the city 215,003 (1931 Census Report).

The history of this area, which roughly corresponds to Gondwana, has been profoundly influenced by the long range of the Satpura hills through which the Borhampur-Aurangabad gap provided the chief route from Hindustan to the Deccan. When the Muhammadan invaders first came into contact with Gondwana, it contained four independent

Gond kingdoms: the northern kingdom of Garha-Mandla; two central kingdoms with their capitals at Dēogarh and Kherla respectively; and a southern state with its capital at Cāda. In the reign of Akbar the imperial forces overran the northern kingdom forcing it to pay tribute, despite the heroic efforts of the Dowager Rani Durgavati. After this the political predominance of the Gond chiefs shifted to Dēogarh which in its turn also suffered from the aggressive schemes of the Moghal emperors. Early in the reign of Aurangzib a punitive force under Dilir Khān entered both Cāda and Dēogarh, with the result that, in 1670, the ruler of Dēogarh embraced Islām as the price of the restoration of his kingdom (*Alamgir-nāma*, p. 1022—27). Both these states paid tribute to the emperor through a Muslim agent stationed at Nāgpur. This however is not the earliest reference to Nāgpur in the Muhammadan period, for the *Padshāh-nāma* of Lahauri describes its capture by Khān Dawūd, in 1637 (for a still earlier identification see Hira Lal, p. 10).

The most famous ruler of Dēogarh was the converted Gond chief, Bahkt Buland, who visited the court of Aurangzib (*Ma'āthir-i Alamgiri*, p. 273). Because of his contumacious attitude he was replaced by another Muslim Gond named Dindār (*ibid.*, p. 340). For some years after this Bahkt Buland remained in imperial service, until, escaping from imperial control, he once more raised the standard of revolt in Dēogarh (*Muntakhab al-Lubāb* of Khāfi Khān, ii. 461). Although Dēogarh was recaptured for a time by Aurangzib's forces, Bahkt Buland remained in open rebellion and was never really subdued. Eventually under this able ruler the Dēogarh state comprised the modern districts of Chindwara and Betul, together with portions of Nāgpur, Seoni, Bhandāra and Bilāshpur. The last important Gond ruler was Cānd Sulṭān who died in 1739. It was he who fixed the capital at Nāgpur which he converted into a walled town.

Internal dissensions led to the intervention of Raghudjī Bhonsla, who was governing Berār on behalf of the Marāṭha Peshwā. Eventually, in 1743, the Marāṭha leader took over the administration of the country. By granting a nominal authority to the Gond Rājā, Burhān Shāh, and his descendants, the Bhonslas possessed a useful pretext for disavowing, when expedient, the rights of the Peshwā, but in practice reference was usually made to Pūna on important matters, such as the succession. Burhān Shāh's descendants have continued to occupy the position of state pensioners, and the representative of the family resides at Nāgpur with the title of Rājā or Samsthānik. Raghudjī's reign witnessed a great influx of Kunbis and other Marāṭha into Nāgpur. The treacherous attitude of his successor Dīnādjī led to his defeat by the combined forces of the Nāṭm and the Peshwā, and to his acknowledgement of the latter's supremacy.

It was under Raghudjī II that the Nāgpur kingdom attained its greatest extent and included practically the whole of the modern Central Provinces and Berār, together with Orissa and certain of the Cātā Nāgpur states. Unfortunately for the solidarity of his kingdom he joined forces with Sindhiya against the British, and, in 1803, after the battles of Assaye and Argaon, was compelled to subscribe to the treaty of Dēogūn, by which

he was deprived of a third of his dominions (Atchison, I. 415—417). He was succeeded in 1816 by his son, Farudjī, an imbecile, who was murdered in the following year by the notorious Appā Sāhib. On the outbreak of war between the British and the Peshwā, in 1817, Appā Sāhib attacked the British Residency but his troops were defeated in the brilliant action at Sitabaldi. This resulted in the deposition of Appā Sāhib, who was succeeded by Raghudjī III, on whose death, in 1853, without heirs, natural or adopted, this dependent principality was declared by Dalhousie to have lapsed to the Paramount Power.

The British administered Nāgpur by means of a Commission until the formation of the Central Provinces in 1861. To-day, the city of Nāgpur supports a flourishing Muhammadan community, in the suburb of Mehdiāgh, the members of which are Dā'ud Bohras of the Shī'a sect (see HOMERAS). The members of this community live together in the buildings of the institution, where their children are educated and their women taught suitable accomplishments.

Bibliography: Hira Lal, *Descriptive Lists of Inscriptions in the Central Provinces*, 1916; Muhammad Kāzīm, *Alamgir-nāma*, in *Bibl. Ind.*, 1868; Muhammad Sāqī Musta'jīd Khān, *Ma'āthir-i Alamgiri*, in *Bibl. Ind.*, 1870—1873; R. Jenkins, *Report on the Territories of the Raja of Nagpur*, 1827; C. V. Chatterton, *Story of Gondwana*, 1916. (C. COLLIN DAVIES)

NAHĪYE, an administrative district in the Ottoman empire which corresponds somewhat to the Swiss canton or French *commune*. It is a subdivision of the *ḥaḍa* (*ḥaḍ*, q. v.), which may be compared with the French *arrondissement* and is governed by a *ḥā'im-maḥāḥ* (q. v.) while the *nahīye* is under a *mudir*. This official who used to be appointed by the *wāli*, the governor of the province, received his instructions from the *ḥā'im-maḥāḥ*, to whom he was subordinate. The subdivisions of the *nahīye* are called *ḥeyr*, i.e. village. The term *nahīye* for an administrative district is of recent origin. For the earlier provincial administration which did not know this name, cf. A. D. Mordtmann sen., *Stambul und das moderne Turlinthum*, N. S., Leipzig 1878, p. 149.

Bibliography: V. Culnet, *La Turquie d'Asie*, vol. I, Paris 1893, p. 2v.

(FRANZ BAHINGOR)

NAHĪKI, *nabhi* from the pre-Islamic divine name *Nabhi* noted by Wellhausen and Nöldeke among the Tamim, the *Nakha'* (of Madhādij) and in Mecca before Islām. — In Kūfa and Sāmarrā it was the name of the Al Nahik, a family of Shī'i scholars of the tribe of *Nakha'* descendants of Nahik, grandfather of Kumail b. Ziyād, a partisan of 'Alī, also celebrated as the founder of the Kumailiya sect (or Kāmiliya: Ibn Sa'd, vi. 124; *ḥajala* of Mī'dan Sam'ī in *Ḥikāḥ*, *Ḥayawān*, ii. 98). Two of its members settled in Sāmarrā (Jāsi, *Fakhrī*, p. 203; cf. p. 179, 196): the first 'Abd Allāh b. Muḥammad (Nahik, p. 6) was the heterodox writer of the *Mintya* sect mentioned by Mas'ūdī and Ibn Ḥarm whose name Friedländer, following Barbier de Meynard, had read 'Shanki' (sic: in

Metempsychosis of the al-Hīṭat, II, 102-103; cf. Astara-bādī, *Maṣābiḥ*, p. 299; Wellhausen, *Reise Arab. Hist.*, p. 67, 245). (LOUIS MASSON)

AL-NAHL, "the Bee", Sūra xvi of the Qur'ān. The title is taken from verse 70: "Thy Lord has made this revelation to the Bee". Khāim (III, 105) says that it was also called "Sūra of the Herds" because there are references in several passages to cattle. As to its date, it is reckoned among the later Meccan Sūras and includes several verses of Medinese origin; the commentators however are not agreed on this point.

The Sūra of the "Bee" contains four abrogated verses: verse 69 is annulled by v. 92; verse 84 by ix. 5; verse 108, part 1, annulled by the end of the same verse and by ix. 5.

Bibliography. (MAURICE CHEROUX)

AL-NAHR, the constellation of the River (Eridanus). It corresponds to the *Περαιός*, *Εἰναίος*, *Ἄνδρος* of the ancients (cf. Aratos, *Phaenomena*, I, 358; Geminus, *Εἰσαγωγή*; Ptolemy, *Almagest*). Aratos observes (I, 360) — probably one of the first to do so, — that the river of heaven represents Eridanus ("Ἰσίδανος, river of the morning; or river of darkness, of the west") turned into stars, into which Phaeton, son of Helios, fell, struck by the thunderbolt of Zeus, after his unsuccessful attempt to ride to heaven. [The opinions of the Greek authors varied regarding the identity of the earthly Eridanus. It is often identified as the Po (Padus), in later times however sometimes with the Rhone (Rhodanus, probably on account of the similarity of sound with "Eridanus") or even with the Rhine (Rhenus) while Strabo denies there was such a river for he calls it *ῥέμα πᾶσιθεν ὄρεσιν* "the nowhere existing"]. According to another view (Eratosthenes, c. 37), the constellation of the river represents the Nile since "this alone flows from the south" just as the river of heaven at the time of its culmination seems to flow from the south point of the horizon to the north; a third group of authors see in it the figure of Oceanos.

While Aratos clearly names only that portion of the river of heaven which lies between Orion and Cetus (the Whale), Eratosthenes and Hyginus continue it in a southeasterly direction as far as the neighbourhood of Canopus (α Carinae), on the other hand, Ptolemy, like all later writers, gives it its southwesterly direction and already calls the star of the first magnitude at its southern point (α Eridani, Achernar; cf. below) *ἑρπαιός*, *ῥέμα Περαιός*, the position of which however he gives incorrectly as he could not himself observe it in Alexandria on account of its great southern declination ($\delta + 126 = -67^{\circ} 25'$).

Al-Nahr is one of the constellations of the southern heavens. In the north it is adjoined by the Bull (*al-Zabur*), in the east by Orion (*al-Djabbār*, the Giant, or *al-Djinn*, the Bride), the Hare (*al-Armah*) and the most western subsidiary stars (*al-ḥarīḍ al-qāna*) of the Great Dog (*al-Kalb al-aḥbar*), which are now included in the constellation of the Dove and the Sculptor's Tool, in

the west by the Whale (*Ḳīṣṣ* or *Ḳāṣṣ*). The constellation of al-Nahr contains, according to 'Abd al-Rahmān al-Sūfī (210 aḥ.), primary stars (i.e. those which form the figure, *ḥawāḍir min al-qāna*); there are no subsidiary stars included in it. It begins with α Eridani on the left foot of Orion (β Orionis, Rigel), winds westwards to α Eridani, then southwards to about γ' and eastwards via γ² as far as γ³ to γ¹ Eridani and finally in a southwesterly direction via λ, γ, δ Eridani to α Eridani.

The fresco in the dome of Kūṣayr 'Amra shows in the surviving portion the constellation of al-Nahr as a narrow ribbon, which runs directly westwards from the raised foot of Orion, a little below the equator and parallel with the latter in the direction of the Whale.

The Arabs give to the inverted quadrilateral formed by γ Orionis, λ, β and α Eridani, which appears to support the left foot of Orion (Rigel) the name "fore throne (foot-stool) of Orion", *Ḳurṣ al-Djannat al-muḥaddam*, in contrast to his "back throne", *Ḳurṣ al-Djannat al-mu'abḥḥar* or *Arṣ al-Djannat*. The stars ζ, ρ, π and γ¹—γ³ Eridani together with α and π Ceti, which enclose an area with very few stars in it, are called *Uḍḍ al-Na'īm*, "Ostrich Nest", the numerous small stars surrounding it are called *al-Raiḍ*, "the eggs", or *al-Ḳaiḍ*, "the egg-shells". The most southerly star in Eridanus, also the brightest (α Eridani, first magnitude), is called *al-Zalim*, the "male ostrich", or *Aḥḥir al-Nahr*, the "last of the river" (in the Alfonsine Tables) whence comes the name still used at the present day Achernar or Acamar. Between Achernar and Fomalhaut (i. e. *Faw* [*Faw*] *al-Ḳat*, "mouth of the fish", α Piscis Austrini) in the region of the present Phoenix are a considerable number of stars which the Arabs called *al-Riḍā*, "the ostrich chicks". Al-Sūfī states that in Shīrāz he observed a series of stars near the horizon which had the shape of a ship (*ṣawraḥ*) (α, π, ρ, β, γ, γ' Phoenix). The brightest among them (α, according to Sūfī, of third, in reality of second magnitude) forms with a Piscis Austrini and β Ceti [*Dawḥ* (*Dhanab*) *Ḳaiṣ*, "tail of the whale"] an approximately right-angled isosceles triangle with a line from α Piscis Austrini to β Ceti as base, the stars within which according to al-Sūfī are also to be included in *al-Riḍā*. The star α Phoenix is called *al-Difda' al-thāni* "the Second Frog", in contrast to the "First Frog", *al-Difda' al-awwal*, which is represented by α Piscis.

(W. HARTNER)

NAHR AL-MALIK. [See DĠJLA.]

AL-NAHRĀWĀLĪ (NAHRĀWĀNĪ), Arab historian. KUTĒ AL-DĪN MUHAMMAD B. 'ALĀ' AL-DĪN AHMAD B. SHAMS AL-DĪN MUHAMMAD B. KĪṢ KĪṢ MAHMUD AL-MAKKĪ AL-KĀDĪBĪ AL-KHARĀNĪ AL-HANAFĪ was born in 917 (1511) in Mecca, to which his father, a member of a scholarly Indian family, had migrated from Nahrwāl in Gujjarāt. To complete his studies which had been

begun under his father, he went in 943 (1536) to Cairo, where he was taught by al-Sayyid's pupils, and to Istanbul. On his return home he received a teaching appointment in the Madrasa al-Aghrafiya. In 965 (1557) he again went to Istanbul via Aix Minor and afterwards was appointed to the Kanbayliya in Mecca. When in 975 (1567) the al-Sulaimaniya Madrasa was founded for all four orthodox rites, he went to it and later became Mufti of Mecca. He died in 990 (1582; according to others in 988 or 991).

His first literary effort seems to have been a description of his second journey to Istanbul, which has not survived. His other works cannot be chronologically arranged with certainty. These are the poetical anthology, intended to supply quotations for letter-writers which in the Leyden (*Cat. cod. ar.*, i. 356) MS. is called *Tamthil al-Amthal al-adira fi l-ahyāt al-farida al-nadira*, in the Cairo (*Fihrist*, iv. 220; iii. 68) *al-Tamthil wa l-Muḥādara fi l-Ahyāt al-mufrada al-nadira*, and a collection of riddles entitled *Kanz al-Awā' fi Fann al-Ma'mūn*, which is preserved in Berlin N^o. 7346, in the Escorial (*Cat. Derembourg*, N^o. 556'), in Istanbul (*Aghir El.*, iii. 107, 296) and in Cairo (*Fihrist*, iii. 307), which is quoted by 'Abd al-Kādir al-Baghādī (*Kāshānāt al-Aḍab*, iii. 113), and on which Mu'in al-Din 'Abd al-Mu'in b. Ahmad al-Baklā' in 993 (1585) wrote a commentary entitled *al-Tiḥāz al-awā'* (MSS. in Uppsala, N^o. 63; Paris, N^o. 3417, 3; Escorial, *op. cit.*, N^o. 536, 2; extracts in Leyden, *op. cit.*, N^o. 523). It is not possible also to date his collection of biographical matter of which there only survives the synopsis *Muntahā al-Tarīkh* in Leyden (*op. cit.*, N^o. 1045).

His two principal historical works date from the last decade of his life. On 10th Ramaḍān 981 (May 3, 1573) he finished his history of Turkish rule in the Yaman entitled *al-Barq al-Yamānī fi l-Fath al-Oṭmānī*; it begins with the year 900 (1494), describes the first Turkish conquest under the vizier Sulaimān Paṣha, the return of the Zaidis and the second conquest by the grand vizier Sinan Paṣha, to whom the work is dedicated; an appendix describes his conquest of Tunis and Goletta. He prepared a second edition after the accession of Sulṭān Murād III in 982 (1574); cf. S. de Sacy, in *N.A.*, iv. (1787), p. 412—521 and to the MSS. in *G.A.L.*, ii. 382 add Leyden, *op. cit.*, N^o. 944; Paris (Blochet, *Cat. des Mss. Ar. des nouvelles acquisitions*, N^o. 5927), Escorial (Levi-Provençal, N^o. 1720; Cairo, *Fihrist*, v. 56), also D. López, *Extractos da historia da conquista da Yaman pelas Othmanns tratao ar. con trad. e notas*, Lisbon 1892. In 985 (1577) he finished his history of Mecca dedicated to Sulṭān Murād, entitled *al-Fihā al-ʿAlam al-Balad al-haram* (*Basit*) *Al-lah al-haram*, which Wüstenfeld published in the *Chroniken der Stadt Mekka*, vol. I, Leipzig 1857, and is printed Cairo 1303, 1305 (on the margin of Ahmad b. Zaki Dahlan's *Kutub al-Kalam fi Bayan Umar al-Balad al-haram*), 1316; to the MSS. given in *G.A.L.*, ii. 382 may be added Tübingen, N^o. 23; Paris, N^o. 1637—1642, 4924, 5932, 5999; Leyden (*Cat.*, i. N^o. 926—930); Cambridge (Brown, N^o. 4—44); Ambrosiana, B, N^o. 116 (*Z.D.M.G.*, lxi. 77); Vatiana, N^o. 284; Sulaimaniya, Istanbul N^o. 815; Niri Oṭmāniya, N^o. 3047; Cairo (*Fihrist*, v. 32); Cat. Bankipore, xv. 1085; Asafiya, p. 178. This work was translated into Turkish

by the famous poet Hāfi [q.v.] (MSS. in Gotha, N^o. 158; Vienna, N^o. 893; Or. Ak., Kraml, N^o. 260; Cambridge, *Suppl.*, N^o. 72; ed. by Gottwaldt, Kasan 1286). A synopsis entitled *Fihā al-Ulam al-ʿAlam al-Balad al-haram* MSS. Leyden, *op. cit.*, N^o. 931; Cairo, *Fihrist*, v. 32; Bankipore, xv. 1089, was made by his nephew Bahā' al-Din 'Abd al-Karīm b. Muḥibb al-Din b. 'Alī al-Din, b. 29th Shawwāl 961 (Sept. 26, 1554) at Ahmadiyā in Guḡarāt, brought up in Mecca by his uncle, then teacher in the Madrasa al-Muḥalliya, 982 (1573) Mufti of Mecca, 990 (1582) Imām al-Haram, d. 15th Dhū l-Hijja 1014 (April 24, 1606) (al-Majma, *Aḥlāt al-Aḥar*, iii. 3).

His son Muḥammad in 1005 (1596) wrote a history of Mecca and Medina and of the exploits of Hasan Paṣha who became wāl of Yaman, entitled *Itihād al-Tarīkh wa l-Zaman fi l-Iḥād al-wāqif il l-Iḥaramain min al-Yaman al-Muḥādina l-ʿAdil al-Bāḡḡ Hasan*, Leyden, *op. cit.*, N^o. 937; Cairo, *Fihrist*, v. 2; v. 3.

Bibliography: *Dhāt al-Shaḡir al-Nu'māniya*, p. 268 (quoted from Sachis, *Muḥam al-Maḥḥal*, p. 1871); al-Nu'mānī, *al-Rawq al-ʿatir*, cod. Berlin, N^o. 9856, fol. 262; Ibn al-Aḍarūs, *al-Nūr al-wāḥid* (cod. Bankipore), fol. 194; al-Khulafā, *Kāshānāt al-Aḍab* (Cairo 1294), p. 153—157; Wüstenfeld, *Geschichte der Araber*, p. 534; Brockelmann, *G.A.L.*, ii. 382. (C. BROCKELMANN)

NAHRAWĀN, or, according to the popular pronunciation, NAHRAWĀN (Yāqūt, iv. 846 *agg.*), name of a large territory between Baghdad [q.v.] and Wasil [q.v.], known through the battle between 'Alī and the Khārijites [q.v.] in 38 (658).

NAḤW (A.), lit. direction, path, also intention, but gradually acquired the special meaning of grammar. The Arab philologists divide it into two branches: *accidence*, *ilm al-qarf* or *taṣrif*, comprising the theory of verbal stems and their conjugation, the formation of nouns and adjectives, the formation of the plural and of the feminine, etc., i.e. with individual word-forms only, and *syntax*, *ilm al-maḥw* in the narrower sense. The fundamental grammatical conceptions of the Arab philologists are taken from Aristotelian logic, which came via Syrian scholars to the Arabs (on the dependence of the Arabic phonetic system on the Indian, cf. Brockelmann, *G.A.L.*, i. 97). As the beginnings of Arabic learning in general are lost in obscurity, so also is the origin of the appellation *naḥw* uncertain even to the Arabs themselves. The caliph 'Alī is said to have instructed Abu 'l-Aswad al-Du'ālī, who is regarded as the founder of the *ilm al-naḥw*, how he should divide up the subject and to have ended by saying: *unḥu*, "take this path", whence the new science received the name of *naḥw*. According to another story, Abu 'l-Aswad himself laid down the principles of Arabic grammar and said to the people: *unḥu*, "follow this", from this the name *naḥw* is said to be derived. The stimulus to deal with the problems of language is said to have come from the caliph 'Alī; he, the story goes, taught Abu 'l-Aswad the fundamental principles of *naḥw* and expounded to him the division of all language into three categories: *ism*, *fi'l* and *ḥarf*. Another explanation as to how Abu 'l-Aswad came to lay down the principles of Arabic grammar seems to

be nearer the actual facts. Ziyād b. Abīhi (q. v.) asked him to put on record the principles of grammar which 'Alī had taught him; but he was reluctant to do this and asked the governor to excuse him this task. When however on one occasion he heard a Qur'ān reader make a mistake, which destroyed the sense, in reading the sacred book, he declared himself ready to carry out the task. He therefore had a clerk come to him, to whom he dictated and said: "When you see me in pronouncing a letter open the mouth completely (*foṣṣa*), put a point above the letter; when I close it completely (*ḍamma*), put a point in front of it, and when I half close it (*ḥasara*), put the point below the letter". In this way the invention of vowel signs is traced back to Abū 'l-Aswad. Another story, which deals with the same question, tells how a newly converted mawlā made a grammatical error in the hearing of Abū 'l-Aswad; one of the latter's household laughed at this but Abū 'l-Aswad said: "These are mawlās who long for Islām, who accepted it and thereby have become our brethren. How would it do if we were to draw up the laws of language for them? He thereupon prepared the chapter on subject and object". There must certainly be an element of at least probability in these anecdotes. By the accession of non-Arabs to Islām the danger arose that the Arabic language might be corrupted by foreign elements; there was further the demand that the sacred text of the Qur'ān should be read aloud without error and its meaning accurately interpreted; these thus arose the necessity for a systematic investigation of the language of the sacred book and the laying down of the rules of its language, so that those ignorant of the language could guide themselves. Other anecdotes which relate to the problem of the origin of *nāḥw* and all of which, of course, like those already given, are to be regarded as *anecdotes*, also describe Abū 'l-Aswad as its founder, so that he may with justice be called the earliest Arabic philologist (*muṣṣaf*). None of his writings has come down to us. He is regarded as the founder of the philological school of Basra, the origin of which must therefore go back to a very early period (Abū 'l-Aswad died about the end of the first century A. H.). Only to mention some of the most important, to this school also belonged Abū 'Amr b. al-'Alī and his pupils Abū 'Ubayda and al-Asma'i, to whom we owe much of our knowledge of the Qṭābiyya. Sibawayhi, whose great work on grammar became "the book" par excellence, Khalil, who is regarded as the inventor of the system of prosody, and many others. Very early there arose in the new city of Kūfa a rival to the scholars of Basra. There also learned men began to deal with linguistic problems. While at first ideas were exchanged between the two schools, and students went from Kūfa to Basra to study, and well known Basran scholars came to Kūfa; gradually a considerable rivalry arose between the two. The Basrans laid greater stress on grammatical principles than the Kūfans and were in general regarded as more faithful and more accurate transmitters. The questions disputed and the differences between the two schools are dealt with in a work by 'Abd al-Rahmān b. Muḥammad b. 'Ubayd Allāh b. Abī Sa'īd b. al-Anḥārī. To the Kūfan school also belonged al-Kinā'ī and al-Mufaḍḍal al-Jabbāl. After the third century the centre of Arab learning was transferred

to the capital of the Islamic empire, Baghdad. In the new Baghdad school which arose there the differences in point of view between the Kūfan and Basran schools gradually disappeared.

(**HESE** LICHTENSTÄDTER)

NĀ'IB (A.), literally "substitute, delegate" (nomen agentis from *nawā* "to take the place of another"), the term applied generally to any person appointed as deputy of another in an official position, and more especially, in the Mamlūk and Dhīlī Sultanates, to designate a. the deputy or lieutenant of the Sultan and b. the governors of the chief provinces (see also the article *ḥukm*, above, vol. II., p. 185). In the Mamlūk system the former, entitled *nā'ib al-sultān al-muḥaqqaq wa-ḥāfiḥ al-mamlūk al-ḥarīf al-islāmīya*, was the Vice-Sultan proper, who administered all the territories and affairs of the empire on behalf of the Sultan. This was, however, only an occasional office, and its holder is to be distinguished from the *nā'ib al-ghayb*, the temporary governor of Cairo (or Egypt) during the absence of the Sultan or of Damascus during the absence of the *nā'ib al-sultān*. The six *niyāḥas* of Syria which replaced the Ayyūbid *mamlakas* — Damascus, Halab, Tripolis, Hamā, Ṣafid and al-Karak (their number was from time to time increased by the erection of Ghazza and other districts into separate provinces) — were each administered by a *nā'ib al-sultān* (also entitled *ḥāfiḥ al-mamlaka*), who was an "amir of a thousand", the *nā'ib* of Damascus being superior to the others. At the end of the viiith (xivth) century Egypt also was divided into three similar *niyāḥas*: Alexandria (from 767), Upper Egypt (*al-waḥīḥ al-barri* or *al-ḥilāl*) and Lower Egypt (*al-waḥīḥ al-baḥrī*). The plain title of *nā'ib* was held by the commanders of the citadels of Cairo, Damascus, Halab, etc., who were not under the jurisdiction of their respective governors, and by various amirs of lesser rank holding subordinate commands. (For an instance of more recent use, see art. *ḥukm*.)

In the Dhīlī Sultanate the *nā'ib* was the powerful minister who was the deputy of the king himself. The earliest reference to the office seems to be the appointment of Iḥṣiyār al-Dīn Altūm as deputy on the accession of Sultan Ma'izz al-Dīn Bahrām Shāh in 637 (1240) (*Minḥādī al-Dīn, Tabaḥṣṣuṣ Nāḥirī*, in *Bibl. Ind.*, p. 191). In fact, the support of the nobles was conditional upon the appointment of this person to the deputyship. Although this was a separate office from that of the *wazir*, nevertheless under powerful *nā'ibs*, like Malik Kāfir in the reign of 'Alā' al-Dīn Khaldī and Khusrāw in the reign of Mubārak Shāh, its existence was not conducive to the growth of the powers of the *wazir*.

In its most common acceptance, in Persian and Turkish as well as later Arabic, *nā'ib* signified a judge-substitute, or delegate of the *qāḍī* in the administration of law. In modern Arabic it

means usually a Parliamentary deputy, while *al-nâ'il al-ummi* is the Public Prosecutor, the head of the Barquet (*al-nizâh al-ummiya*).

NAWÂB [for *nawwâb*, intensivism of *nâ'ib* (but not employed in Arabic), a puristic correction for *nawâb*, shortened from *nawwâb*, the Arabic plural of *nâ'ib*, employed as plur. dignitatis], the term used under the Mughal rulers of India to designate a viceroy or governor of a province. It is not known when the title first became current. It is sometimes found in combination with other titles, e.g. the Nawâb-Wazir of Oudh, the Nawâb-Nâ'im of Bengal. The Nawâb of Arcot (Carnatic) was a governor under the authority of the Nizâm of Haidarâbâd.

Nawwâb (Nawâb) is used also in Persia as a title of royal princes, and in India as an honorific, without necessarily having any office attached to it.

NABOB is an English corruption of Nawâb, which was also applied in a derogatory sense to wealthy Anglo-Indians who had returned from the east. It has been suggested that the term first became familiar to Englishmen in the second half of the eighteenth century.

NÂILA. [See **NEFI**.]

NÂİLİ, properly **YENİ-ZÂDE MUŞTAK ÇELEBİ**, called after his father Pîrî KHALİFA also **Pîrî-ZÂDE**, a celebrated Ottoman poet. He is usually described as Nâ'il-i Kadim, "old Nâ'il", to distinguish him from **YENİ NÂİLİ**, young Nâ'il, the poet and mawlawi Nâ'il Şâlih Efendi of Monastir, author of several Şu'î works who died in 1293 (1876) in Cairo.

Nâ'il was one of the greatest Ottoman poets of the post-classical period, the period of the weak sultans (Murâd IV, İbrâhîm and Mehmed IV, 1058—1115 = 1648—1703), of rule by women and eunuchs (Kösem Sultân, Bektâsh Agha and Murâd Agha) and of the grand vizierate of the Köprülü. He is a link between **Nefî** and Yahyâ and Nâzî and Nedîm. He and Yahyâ are the best poets between **Nefî** and Nâzî, the reviver of Ottoman literature.

Born in Constantinople, on the conclusion of his education he became secretary in the *Divân-ı Humâyûn* and was ultimately a khalîfa in the office of the Department of Mines (*mâden hâlemi*). As his *Divân* shows, he belonged to the Khalwetî order. He was a weak, delicate man of feeble constitution who died in 1077 (1667—1668) in exile, it is said, into which he had been sent by Fazıl Âhmad Paşa Köprülü. Brissaut Mehmed Tâhir's statement that his tomb was in the cemetery of the Sümbülî monastery in Fındıklı and that his remains were removed to the cemetery of Pera, when the road was widened, cannot be quite reconciled with the story of his banishment.

Nâ'il is one of the most interesting figures in

the history of Turkish poetry. He did not, it is true, contribute anything essential to the actual development of Ottoman literature and gave it no new inspiration. He was an innovator but only in the field of style and language. He steadily worked to break down the rigidity and monotony of the post-classical school. His style is extremely artificial. His language is full of Persianisms but not in quite the same way as in the preceding periods. His diction is full of unusual Persian images and expressions with which he enriched the Turkish language in brilliant verses, somewhat exhausting however through the obscurity of their allusions. The fine new phrases and expressions are however not his own but are simply borrowings. Nâ'il succeeded in clearing away the stagnation of the literary language of the time by dropping the trite and hackneyed metaphors and phrases, which had been found in all *divân*s since Hâkî and borrowed new phrases and constructions from the Persian.

Although he wrote in Turkish his diction is purely Persian. He follows his Persian models so slavishly that his language is unintelligible to a Turk who does not know Persian. But the Ottoman poets wrote only for themselves and their equals and not for the people whom they ignored.

Nâ'il is the chief representative of the highly developed and marvellously elaborated literary language in which, as Gibb says, a rich and delicate Persian embroidery is harmoniously sewn upon the Turkish background, while the two languages remain sharply distinguished from one another.

Nâ'il's characteristics are a charming freshness of phraseology, subtlety of imagination, an artificial, individual style, gracefulness, clarity and purity of language, succinctness of expression and polished style such as no poet of his time possessed. According to Mu'allim Nâdî, no Turk can read him without enthusiastically trying to imitate him, which is however hardly possible. His language is so finished and free from all asperity that the meaning is often obscure and unintelligible. There is however a great deal that charms the reader, especially as his language is most melodious.

As a poet he has not the same powers as he has as a master of language and style. It is his language and not his poetic conception that is his strong point. He did not seek inspiration from his surroundings, like Yahyâ, but from his Persian models.

Nâ'il's literary work consists only of a *Divân*, which was printed in Bulâk in 1253 (1837) (only about a third of the MSS. was printed however). It consists of four very fine hymns in honour of the Prophet (*na'î*), some 20 kasidas the language of which resembles that of **Nefî** and shows the same exaggeration. The *basides* are dedicated to Murâd IV and Mehmed IV, to the grand-viziers Karam Mustafa Paşa (1048—1053), Mehmed Paşa (1053—1055), Şâlih Paşa (1055—1057), Şu'î Mehmed Paşa (1058—1059), to the Shaikh al-Islâm Behâ' Efendi, Yahyâ Efendi, Hâkî Mahmud Efendi, the Defterdar and others. The *Divân* also contains a touching *mercû'ye* (elegy) written in the *tercîzî-bend* manner on the death of his brother who died young, which is almost too extravagant with its effective refrain; also a *takdim*, and some *mürâddes* in the *tercîzî* and *terkîb* manners and a *terkîb-bend*.

His most important and most characteristic work

is however over 200 ghazels in which he imitates Fuzûlî. In them he continually produces new expressions, new ideas and images, new significances of words. Besides a passion kept within natural bounds and a tenderness of feeling, which reminds one of Nedim and makes a deep impression on any lover, there is an undeniable pessimism, reminiscent of Nâzî, in his outlook on life, probably as the result of political conditions and his poor health. Occasionally there is something cold and forced about him. One feels that his spirit is ill and troubled.

Nâ'il especially influenced Thâbit and Nazîm. His principal successors as poets were Harisî, 'Arif Hikmet and Venîghehîlî 'Awat.

Bibliography: A monograph on him was written by Müstefâhâzâde İsmet, *Nâ'il-i Kadim*, İstanbul 1318; do., *Nâ'il-i Kadim*, in *Khatim-i Punhan*, ii, 1312, p. 320—323, 326—329 (*Estâf*, N° 76); Rîzâ, *Tashîr*, İstanbul 1316, p. 95—96; M. (MEXCEL)

NÂ'ÎM, MUSTAFÂ, a Turkish historian. Mustafâ Nâ'im known as Nâ'im was born in 1065 (1655) in Aleppo. After becoming a *halberdier* (halberdier) in 1100 (beg. Oct. 26, 1688) in the imperial palace, he was promoted to be a secretary in the *Divân* under the grand vizier Kâzîlikos Ahmad Pasha. On the 28th Dîni'âda I 1116 (Nov. 28, 1704) he became chief accountant of Anatolia and in 1121 (1709) succeeded Nîmetî as master of ceremonies and imperial historian (*vezir-i muvakkil*; q. v.). He later filled several other offices (cf. F. Babinger, *G.O.W.*, p. 245) and during the campaign in the Morea was assistant to the commander-in-chief (*serasker*). He died at the beginning of 1128 (Jan. 1716) at Old Patras, where he was buried in the outer court of the mosque which has now disappeared. On his tombstone cf. Brusaîl Mehmed Tâhir, *'Osmânî Mâ'ullîfîleri*, iii, 151 below, and on his death the *firman* of the middle of Shawwâl 1128 in Ahmad Rafik, *Hicri on ihvat anrda İstanbul hayatı* (1100—1200), Stambul 1930, p. 52 sq.

The candid and accurate history of the Ottoman empire, which he wrote in his official capacity and which he based upon earlier histories like the works of Kâzî Celebi-zâde (q. v.), Weddîhî (q. v.), Ahmad Sharîk al-Mansûr-zâde, Hâdîdî Kâhîfî (q. v.) and the imperial Ottoman history mentioned at the end of his work as begun but not finished by a certain 'İsmetî (cf. J. v. Hammer, *G.O.R.*, iii, 326), covers the years 1000 (beg. Oct. 9, 1591) to 1070 (beg. Sept. 8, 1659). The full title of this much esteemed and largely used work is

Rawzat al-Husnâ fî Khulliyat Akhbâr al-Khâfî-bân, in Hâdîdî Kâhîfî, N° 14525 called simply *Târîkh-i Weddîhî*.

Mustafâ Nâ'im also wrote several political treatises (*Risâ'ih-i siyâsiye*), which have survived in a collected volume.

Nâ'im interpreted his duties as a historian very seriously and his incorruptible love of the truth secured his work a superiority over those of all other Ottoman historians of the time. On Nâ'im's view of the "duties of the historian" cf. his own words in A. W. Dada, *Türkische Post*, year iii, Stambul 1928, N° 324, p. 2. The original MS. of his *Târîkh* is in Stambul in the collection of the Ertuğ-Koşuk. On the four editions and their variations cf. F. Babinger, *G.O.W.*, p. 246; on the third edition see also J. A., 1868, i, 468. A French translation (still in MS.) was prepared by Antoine Galland (Fonds Français, N° 12,197 in the Bibliothèque Nationale); specimens of it were published by N. Jorgu in the *Actes et fragments de l'histoire des Roumains*, i (Bucharest 1895) p. 55.

Bibliography: Cf. F. Babinger, *G.O.W.*, p. 246 and particularly *Yeni Medîni'â*, Stambul 1918, N° 55, p. 49 sq.; Ahmad Rafik, *Alimler ve San'atkarlar*, Stambul 1924, p. 256 sq.; Sâlim, *Târîkh*, p. 681 sq. (according to whom he also studied chemistry and other arts and sciences and was a carefree jolly boon companion) and 'Ali Dîşîb, *Nâ'im Târîkh*, Stambul 1927. (FRANZ BABINGER)

NAKHÇUWÂN (NAKHÇEWÂN), a town to the north of the Ataxza.

The town *Nakhçawâ* is mentioned in Ptolemy, v, ch. 12. The Armenians explain the name of Nakhçawan (Nakhçuan) by a popular etymology as *nakhç-egwan* "(Noah's) first stopping-place" (although the name is apparently compounded with *-awan* "place") and locate the town in the province of Waspurakan (cf. Yâkût, i, 122), or in that of Siunik. According to Moses of Chorene, i, ch. 30, Nakhçewân was in the area peopled by Median prisoners (*mar*) in whom we should see the ancestors of the Kurds of this region (cf. Balâdhuri, p. 200; *nakh al-Akrâd*). In the early Arab sources we find the form *Nakhçawâ*, Balâdhuri, p. 195, 200; Ibn Miskawayh, ii, 148; Sam'ânî, p. 560; *Nakhçawâ*. In the Seldjûk and Mongol period the predominant form is *Nakhçuwân* (as early as Ibn Khurdâdhbih, p. 122).

The town was conquered under 'Othmân by Habbî b. Maslama. It was rebuilt under Mu'âwîya by 'Asîd b. Hâtim. In 87 (705) the Arabs hanged a large number of Armenian notables, whereupon the town acquired a Muslim character. For a short time (about 900) the power was in the hands of the Bagratuni, but the town was reconquered by the Seldjûk (q. v.) and belonged henceforth to the domain of their vassal, the smir of Goltin (Ordubâd); cf. Markwart, *Südarmenien*, Vienna 1930, preface, p. 79, 93, 99—101, 115; text, p. 300, 362, 567. It figures in the wars of the Dailami period (Ibn Miskawayh, ii, 148) and in the events of the Seldjûk period (cf. Ibn al-Athîr under 514 A. H.).

Nakhçuwân is more particularly associated with the family of Ildegizid atbegs of Adharbâidjân (531—632 = 1136—1225), cf. Mirhâwand, *Rawzat al-Safâ*, Lucknow 1894, p. 875—876) whose main centre it was, as is shown by the fine buildings and the tomb (*mashhad*) of al-rû's al-ajallî Rukn al-Dîn Dîwânî

al-Islām muḥaddam al-mashā'ir Yūsuf b. Kāthir al-Ḥafṣī (7), dated 557 (1162—1163); b. the tomb built by Shams al-Dīn Nuṣrat al-Islām Ildegiz for the *malika Djalāl al-Dunyā wa 'l-Dīn Mā'mūna Ḳāṣimā* (probably his wife, former wife of the Seljuq Tughril II, d. 368, *Ta'rikh-i Ghasidā*, p. 472); on Ildegiz's stay at N. in 568, cf. Ibn al-Aṭhār, xi. 290; c. the portico (now in ruins) built in 582 (1182) by the Atabek Abū Dja'far Muḥammad Pahlawān b. Ildegiz. Some localities depending upon N. (Erudjak etc.) were given in fief to the Georgian prince Elikum Orbelian by his brother Ḳilā Arslan. When the Khwārizmshāh Djalāl al-Dīn exercised power in Ādharbāidjān, N. belonged to al-Malik al-Djālālīya, daughter of Muḥammad Pahlawān, Nasawi, ed. Houdas, p. 76, 266, 300. Under the Mongols the town was devastated, as is attested by Rubruck who visited it in 1253, ed. 1839, p. 384, cf. Howorth, *History of the Mongols*, iii. 82. The town suffered also from the wars between Turkey and Persia (under Murād IV); Ewliya Çelebi, ii. 240, Tavernier (1664), ed. 1713, l. 53—55; and Chardin (1673), ed. 1711, l. 179, found it in ruins. Nakhčuwān was only rebuilt after 1828 when the khanates of Eriwān and Nakhčuwān were ceded to Russia. Under the Persians, Nakhčuwān (with the district of Āsā-Djirān = Ordubād) was directly under Ādharbāidjān and not Eriwān. Kalb 'Alī Khān of Nakhčuwān was blinded by Aḳa Muḥammad, founder of the Kādjar dynasty. The last chief of Nakhčuwān before the Russian occupation was Karīm Khān Kangarī. The *nā'ib* appointed by the Russians were Ḥasan Khān and Shaikh 'Alī Beg. The *malik* of the khanates were: Nakhčuwān, Alindjā-ṣay (Armenian *Erznka*), Mawān-khātūn, Khok, Darabegs, and those of Āsā-Djirān: Ordubād, Akulis, Dasta, Bilāw, Cinanāb. Among the dependencies of Nakhčuwān, Djulfa (since 1828) on the Russian-Persian frontier is very well known (Armenian *Djula*) with the ruins of the old town and of an old bridge. (*Zafar-nāma*, l. 399; *ḡul-i dīyā al-Mulk*) and the bridge on the Tahriz-Djulfa railway (built in 1906).

In 1834, after the Russian occupation (Duhov's) the khanate (the town and 179 villages) numbered 30,323 inhabitants (besides 11,341 inhabitants of Ordubād and its 52 villages). In 1896 the town numbered 7,433 inhabitants (4,512 Muslims and 2,576 Armenians) and the district (*uyezd*) 86,878. In 1913 the town had 8946 and the district 121,365. After the Russian revolution of 1917, the greater part of Nakhčuwān was made an autonomous republic (area 5,988 sq. km. with, in 1926, 12,611 urban, 92,345 rural inhabitants). This republic formed a kind of dependency of the more important Muslim republic of Ādharbāidjān (Bikā), from which it is separated however by the Armenian lands of the High Karabagh.

Nakhčuwān on the Don is the settlement of Armenian colonists founded in 1780 on the Don and is at the present day a suburb of Rostov.

(V. MINORSKY)

NAKHSHAB, a town in Bukhāra, also called Nasaf by the Arab geographers (cf. the similar evolution of Nashāwa from Nakhčawan). The town lay in the valley of the Kashka-Daryā, cf. Ibn Hawkal, p. 376: Kashk-rūdī, which runs southwards parallel to the Zarafshān (river of Samarkand) and runs towards the Amū-Daryā [q. v.] but before joining it disappears in the sands. Nakhshab lay on the road joining Bukhāra to Balkh 4 days' journey from the former and eight from the latter (cf. Maḳaddasī, p. 344). In the time of Isṭakhri (p. 325) the town consisted only of one quarter (*rabāṭ*) and a ruined citadel (*ḡulandis*). The river ran through the centre of the town (Ibn Hawkal, p. 378).

The Mongols from the time of Čingis Khān (1220) used the region of Nakhshab for their summer encampments. The Čaghatai Kābāk (1318—1326) and Ḳazan (killed in 1347) had palaces built there, as a result of which the whole district was called *Ḳarshī* ("palace" in Mongol) [q. v.] *Ḳarshī* is often mentioned in the time of Timūr (*Zafar-nāma*, l. 111, 244, 259 etc.) but it was eclipsed by Kish (Shahr-i Sabz, q. v.), the birthplace of Timūr, 3 days' journey above *Ḳarshī*. The citadel of *Ḳarshī* was of considerable strength and valiantly resisted Shāhīnī Khān (cf. *Shāhīnī-nāma*, ed. M. Ioransky, p. 29) and 'Abd Allāh Khān of Bukhāra (in 965 = 1558). From the xviiith century onwards *Ḳarshī* began to rise at the expense of Kish and before 1920 was the second town of the khānate of Bukhāra with a population of 60—70,000.

The problem of identifying the ruins in the district of *Ḳarshī* has been studied on the spot by L. A. Zimin, who formulates his conclusions as follows: 1. The ruins of the ancient Nakhshab are around the hill of Shālūk-tāpa (cf. Mahdī Khān, *Ta'rikh-i Nādir*) on the events of 1149 which marks the site of the old citadel, already in ruins in the xth century. 2. As a result of the erection of the Mongol palaces somewhere to the south of the river, the town begins to shift southwards, and at the end of the sixth century when Timūr built a citadel there it must have occupied in part the site of the modern *Ḳarshī*. 3. The remains of this citadel (which Shāhīnī Khān and 'Abd Allāh Khān besieged in vain) ought to be sought near the ruins of Ḳāl'a-yi Zahk-i Mārān (about 2 miles S. W. from *Ḳarshī*).

S., p. 134—142 (mentions about 60 villages dependent on Nakhshab); do., *Kistorii vostochnykh Turkistanov*, Petersburg 1917, p. 126 (valley of Kashka); L. Zimin, *Nakhshab, Nasaf, Karshi*, in *Isl. al-Djumiān* (Festschrift for V. Barthold), Tashkent 1927, p. 197—214. (V. MINORSKY)

NAKSHABI, SHAikh DIVĀ' AL-DĪN (d. 751 = 1350), a famous Persian author (not to be confused with the famous Sāfi Shaikh Abū Tarāb Nakhsabī, d. 235 = 860). Very little is known of his career.

His *nishā* suggests that he came from Nakhsab [q. v.] but he went to India where he became a murid of Shaikh Farid, a descendant of the celebrated Shaikh Hamid al-Dīn Nāgūrī. The *Akhbār al-Akhbār* of 'Abd al-Hakk Dihlawi (Dihlī 1309, p. 104—107) says that he died in Badā'un after a long and contemplative life and that his tomb is there. Nakhsabī was a prolific writer who used his knowledge of Indian languages to translate Indian books into Persian. His best known work is the *Tuḥf-nāma* ("Book of the Parrot") very popular in India and Central Asia, based on the Sanskrit *Cakrapāṇī* (partly translated into Greek by D. Galanos, Athens 1851). In the preface to this book Nakhsabī tells us that one of his patrons showed him an old Persian translation of this work and persuaded him to do it again as the language of the old translation was too simple and artless. Nakhsabī set to work and made a book of 52 chapters (called "nights") replacing some stories which did not seem to him sufficiently interesting by better ones.

The book, completed in 730 (1330), is in the usual form of a framework with inset stories and is characterised by unusually fine language and bold metaphors and similes. Nakhsabī's language however seems to have been too difficult and precious for later generations as by command of the Emperor Akbar, Aḥmad 'Alī Faḡl b. Muḥammad rewrote the book in a simplified version (Rieu, p. 753^b). This version however was completely supplanted by Muḥammad Kādirī (xviiith century) who reduced it to 35 chapters. Kādirī's version became the foundation of a large number of translations into Hindi (Awāri and Ghawwāri), Bengali (Caṇḍīcarṇa Munshī), Turkish (Sāfi 'Abd Allāh Kēndī, pr. Būlak 1254 and Constantinople 1256) and Kazan Tatar. There is also a metrical version in Persian by Ḥamid Lihūrī (Bland, in *J. R. A. S.*, ix, 163). The same theme is taken by a number of popular versions which were disseminated in Persia in cheap lithographs under the title *Chī (Hāl) Tūpī* ("40 parrots"). The text of one of these was published by V. Zhukovski (St. Petersburg 1901). Nakhsabī's work was known in Europe as early as 1792 when M. Gervais published a free English translation of 12 nights. Kādirī's version was translated into German by C. L. L. Iken (Stuttgart 1822); this edition contains an essay on Nakhsabī and specimens of his *Tuḥf-nāma* by Kosegarten. The Turkish version was translated into German by L. Rosen (Leipzig 1858). So far no complete translation of the original work of Nakhsabī has been published although there is a French translation in MSS. in Munich. E. Berthels has translated the book into Russian but this version is also still in manuscript. The eighth night was published in original text and German translation by H. Brockhaus (Leipzig 1843 and in *Blätter für literarische Unterhaltung*, 1843, No. 242, 243, p. 969 sqq.). Nakhsabī's other works never attained anything like the popularity of the *Tuḥf-nāma* but have almost all come down to us. Among them are: *Gulab* "Scattered Roses", a novel dealing with the loves of Ma'jam-shah and Nūshāla (pr. by Agha Muḥammad Kāsim Shīrāzi and K. F.

Azoe, Calcutta 1912, in *Bibl. Ind.*); *Djūshyāt u-Kulliyāt* ("Particulars and Generals") also called *Chī Nāmū* (Rieu, p. 740^a), an allegory which deals with the descriptions of the various parts of the human body considered as the noblest work of God and as proof of His greatness; *Ladh-dhat al-Nisā'*, a Persian version of the *Kola-Sūtra*, an Indian work on different temperaments and sexual intercourse; *Silk al-Sulūk*, a collection of sayings of celebrated mystics (lith. Dihlī 1895); and *Nazā'ik u-Mawā'iz*, a brief treatise of a Sāfi nature (Rieu, p. 738^a). His treatise *Aghara Mu-lashshara* is only known from its mention in the *Akhbār al-Akhbār* (see above). All the prose works of Nakhsabī are embellished with *ghī'ān* scattered through them, which show that he was also an excellent poet.

Bibliography: On Nakhsabī: J. Pertsch, *Über Nakhsabī's Papagenbuch*, in *Z.D.M.G.*, xli, 305 sqq.; Benfey, in *G.G.A.*, 1858, p. 329; H. Ethé, *Gr. I.P.A.*, ii, 258, 261, 324—326, 335; Elliott, *History of India*, vi, 485. Besides the MSS. and editions mentioned: Kādirī's version in text and English translated by Gladwin, Calcutta 1800 and London 1801; *Tuḥf-Kahkūni*, a Hindustāni translation (ed. by D. Forbes, London 1852). On *Gulab* s. also Ch. (E. BERTHELS)

NAKĪR. [See MUNKAR.]

NAKSHBAND, MUHAMMAD B. MUHAMMAD BAHĀ' AL-DĪN AL-BUKHĀRĪ (717—791 = 1317—1389), founder of the Nakhsbandī Order. His name, which signifies "painter" is interpreted as "drawing incomparable pictures of the Divine Science" (J. P. Brown, *The Darwish*, 2nd ed., p. 142) or more mystically as "holding the form of real perfection in the heart" (*Atīqah al-Ma'iyā* quoted by Ahlwardt, Berlin Catalogue, No. 2188). The title *al-Shāh* which is given him in a dirge cited in the *Rushdāt* means "spiritual leader". The *nishā* al-Uwaisī implies that his system resembled that of Uwais al-Karānī. His *Acta* were collected by one of his adherents, Salāh b. al-Mubārak, in a work called *Makāmāt Sayyidīn al-Shāh Nakhsband*, which furnished material to the author of *Rushdāt 'Ain al-Hayāt* (893 = 1488), and from which large citations, apparently in the words of Nakhsband himself, but translated from Persian into Arabic, are given in the modern work *al-Hadā'iq al-wardīya fi Ḥaqā'iq Adjillāt al-Nakhsbandīya* by 'Abd al-Majīd b. Muḥammad al-Khānī (Cairo 1306). He was born in a village at the distance of one *farasāh* from Bukhārā, called Kushk Hinduwān, but afterwards Kushk 'Arīfan. At the age of 18 he was sent to Samkās, a village one mile from Ramithan and three from Bukhārā, to learn Sūfism from Muḥammad Bībī al-Sammāṭ. In this person's system the *ghī'ān* was recited aloud; Nakhsband preferred that of 'Alī al-Dawī 'Abd al-Khālik al-Ghuḥdāwānī (d. 575 A. H.), who recited it to himself; and this led to ill-feeling between him and the other adherents of al-Sammāṭ, who however, it is stated, ultimately confessed that Nakhsband was right, and on his deathbed appointed him his *khalīfa*. After this person's death he went to Samarkand, and thence

to Bukhārā, where he married, and whence he returned to his native village; thence he went to Naṣaf, where he continued his studies under a *ḫalīfa* of al-Sammāst, Amīr Kulāl. He then lived for a time in villages near Bukhārā given as Zewartūn and Aḥlikta, then studied with a *ḫalīfa* of Amīr Kulāl named 'Arīf al-Dīk-kirānt for seven years; after this he spent twelve years in the service of the Sultān Khāhīl, whose rise to sovereignty is described by Ibn Baṭṭūṭa (iii. 49), and whose capital appears to have been Samarkand. After this monarch's fall (747 = 1347) he returned to Zewartūn, where he practised philanthropy and the care of animals for seven years, and road-mending for another seven. The last years of his life appear to have been spent in his native village, where according to the *Rashahūt* he was buried. Vámbéry (*Travels in Central Asia*, 1864) gives Baveddin, two leagues from Bukhārā, as the name of the village which contains his tomb, "whither pilgrimages are made even from the most remote parts of China, while it was the practice in Bukhārā to go thither every week, intercourse with the metropolis being maintained by means of some 300 asses plying for hire".

The biographies bring him into connection with various places and persons. At Herāt a banquet was given in his honour by the Amīr Ḥusain (b. Ghīyāth al-Dīn al-Ghūrī; cf. Ibn Baṭṭūṭa, *loc. cit.*), where in spite of the Amīr's assertion that the food had been honestly obtained Nakshband refused it, and it had to be given away in charity. He was with this prince also at Sarḫas. Two or three pilgrimages and visits to Baghdād, Nisābūr and Tāyābād are mentioned. His sayings were collected by Muḥammad b. Muḥammad al-Ḥafīṣ al-Bukhārī at the request of 'Alī al-Dīn 'Aṭṭār al-Bukhārī (d. 802 A.H.) (Brit. Mus. Add. 26,294). Persian writings by him are mentioned in the *Ḥudūd*.

Bibliography: Besides those mentioned above: *Nafahāt al-Umūr*, No. 442; *al-Shaḥā'ik al-Naṣāniya*, transl. Rescher, p. 165.

(D. S. MARGOLIOUTH)

NAKŪS (A.), pl. *namūṣ*, a kind of rattle used and in some places still used by Christians in the east to summon the community to divine service. It is a board pierced with holes which is beaten with a rod. The name, which comes from the Syriac *nāḫūṣā* is not infrequently found with the verbs *faraka* or *ṭakka* in the old Arabic poets, especially when early morning is to be indicated, e.g. 'Antara, app.; Lahid, No. 19, 6; *Z.D.M.G.*, xxxiii. 215; Matalammis, ed. Vollers, p. 178, v. 6; al-Aḥṣā in Nöldeke's *Dialects*, p. 26; *Kinn al-Aḥṣā*, xix. 92. According to tradition, Muḥammad hesitated between this instrument and the Jewish trumpet before deciding on the call to prayer by the mu'adhḥins [A. ABHAR].

(Fr. Buhl)

AL-NAMĀRA, i. a place in Syria. It is situated in the *ḥarra* of al-Safā' on an eminence in the Wādī 'I-Shām, which runs from the Djebel al-Drūz (Djebel al-Hawrān) to the plain of Raḥba, at the spot where it joins the Wādī 'I-Sa'ūf. It

corresponds to the Roman military post of Namara (Waddington, *Inscriptions*, No. 2270). Less than a mile S. E. of al-Namāra, Dussaud found the Nabataean-Arab tomb inscription of the "King of all the Arabs", Maru 'I-Kais bar 'Amru, i.e. the Lakhmid Imru 'I-Kais b. 'Amru, of the 7th century 223 of the era of Boṣrā = Dec. 7, 328 A.D. (cf. vol. i., p. 382).

Bibliography: R. Dussaud (and Clermont-Ganneau), *Inscription nabatéo-arabe d'en-Namara*, in *Revue Archéol.*, series iii., vol. xli., 1902, ii., p. 409-421; J. Halévy, in *Revue Sémitique*, xi., 1903, p. 58-62; F. E. Peiser, *Die arabischen Inschriften von En-Namara*, in *O.L.Z.*, vi., 1903, p. 277-281; M. Hartmann, *Zur Inschrift von Namara*, in *O.L.Z.*, ix., 1906, p. 573-584; M. Lidbarski, *Epigraphia für semit. Epigraphik*, ii., 1908, p. 34-37; Th. Chabot, *Répertoire d'épigraphie sémitique*, No. 483; R. Dussaud, *Topographie historique de la Syrie*, p. 255, 269, 353, 371, 378.

Three other places bore the same name in ancient times:

2. Namara (Waddington, No. 2172-2185), the modern Druse village of Nimra in the Djebel al-Hawrān northwest of al-Mughennel.

Bibliography: Nöldeke, in *Z.D.M.G.*, xxix. 437; Buhl, *Geographie des alten Palästina*, Freiburg 1896, p. 253; Thomsen, *Loca sancta*, p. 92; Dussaud, *Voyage archéol. au Safa*, Paris 1901, p. 148, 184; *Publications of the Princeton University Archaeol. Expedition to Syria in 1904-1905*, division ii., section A, p. 342; division iii., section A, p. 350; Dussaud, *Topographie*, p. 395.

3. Namara, a village in Batanaia, probably the modern Nāmīr al-Hawā', N.E. of Der'a.

Bibliography: Schumacher, in *Z.D.P.V.*, xii. 291; xx. 211; Dussaud, *Topographie*, p. 341, 359 sq.

4. Namara, Nam(a)r west of Sanamān, between al-Hāra (Edessa) and Džāsim (Gazimeh), mentioned on an ancient boundary stone.

Bibliography: Clermont-Ganneau, in *R.A.O.*, i. 3-5; Dussaud, *Topographie*, p. 341 (cf. Namr in Nöldeke, in *Z.D.M.G.*, xxix. 437?); (E. HONIGMANN)

NĀMĪK KAMĀL BEY. [See KEMĀL MEYMED NĀMĪK.]

AL-NĀML, the Ants, the title of Sūra xxvii. of the Qur'ān, the whole of which was revealed at Mecca. Nöldeke puts it among the Sūras of the second period. It contains 95 verses. Its title is taken from verse 18: "When the armies reached the valley of the Ants one of them said: 'O ye ants, return to your homes lest Solomon and his armies crush you without noticing it'". It contains one verse that was abrogated (verse 94 annulled by ix. 5).

Bibliography: cf. AL-NAHL.

(MAURICE CHEMOUT)

NAMRUD, also NAMRUDH, NIMRUD, the Nimrod of the Bible, is associated in Muslim legend, as in Haggada, with the story of the childhood of Abraham. The Qur'ān, it is true, does not mention him but probably, as in many other cases, only from dislike of mentioning names. That Muḥammad was acquainted with the legend

of Namrūd is evident from the following verses. "Do you not see how he disputed with Ibrāhīm about the Lord who had granted him dominion? When Ibrāhīm said: It is my Lord who gives life and death, the other replied: I give life and I slay. When Ibrāhīm said: God makes the sun rise in the east; do you make it rise in the west; then the liar was humbled" (II. 260). The Kur'an exegetists are probably right when they see Namrūd here disputing with Ibrāhīm and also when they refer to Namrūd the verse: "What did Ibrāhīm's people answer? They only said: Kill him, burn him; but God saved him from the fire" (xxix. 23). The legend is already richly developed in Tabari, but it is at the beginning of the romance of 'Antar in the Abraham midrash that we find its most luxurious development.

Tabari already numbers Namrūd among the three or (with Nebuchadnezzar) four kings who, like Sulaimān b. Dāwūd and Dhū l-Karnain, ruled the whole world. His astrologers told him that a child would be born who would overthrow his kingdom and destroy his idols. Ibrāhīm thus becomes one of those heroes of legend who are persecuted from the moment of birth by a tyrant, to whom they are destined to prove fatal, like Moses, Gilgamesh, Semiramis, Sargon, Karna (in the *Mahābhārata*), Trakhan (King of Gilgit), Cyrus, Perseus, Telephus, Aegisthus, Oedipus, Romulus and Remus, Jesus (see Frazer, *Folklore in the Old Testament*, II. 437-455). Usha, the wife of Āzar or of Tārīkh (Terakh), is able to deceive Namrūd and his searchers. Ibrāhīm is born in concealment; maturing rapidly, he engages in a religious dispute with Namrūd; Namrūd cannot be God for God gives life and death. Namrūd replies that he can do this also for he can execute or pardon a man condemned to death. Namrūd has Ibrāhīm thrown into the fire; it becomes a cool health-resort. An angel keeps Ibrāhīm cool at which Namrūd marvels like Nebuchadnezzar at the preservation of the three young men in the fiery furnace (Daniel III. 24-27). Namrūd resolves to attack the God of Ibrāhīm in his heaven. He feeds four young eagles on meat and wine till they are of a great size, ties them to the four corners of a chest, fastens a spear at each corner with a piece of meat on the point and sits in the chest; the eagles, trying to reach the meat, fly higher and higher. The mountains appear like anthraps and later the whole world looks like a ship in the water. It is in vain however for he falls to earth. Next he builds a tower in order to reach the god of Ibrāhīm, then the tongues are confused; in place of one Syriac tongue, 73 arose. God's angels admonish Namrūd. But he equips his armies against God. God sends an army of gnats against him, who eat the flesh and drink the blood of Namrūd's men. A gnat enters Namrūd's brain through his nose. For 400 years he had exercised his tyrannical rule and for 400 years he was tortured by the gnat until he died.

Muslim legend derives the name Namrūd from *namarrada*: he who rebelled (against God). But there is another derivation, viz. from *namra* "tigress" in that version of the Namrūd legend in which Namrūd is suckled by a tigress. This version resembles the Romulus and Remus story (Jean de l'Ours) and culminates in the Oedipus story for Namrūd, brought up unknown, kills his father and marries his mother. Al-Kisā'ī has preserved

this version and it is given at greater length in the introduction to the romance of 'Antar.

Namrūd's father Kana'an b. Kūsh has a dream which troubles him; it is interpreted to mean that his son will kill him. The child is born, a snake enters his nose, which is an ominous sign. Kana'an wants to kill the child, but his mother Sulkhā entrusts him secretly to a herdsman; the latter's flocks scatter at the sight of the black flat-nosed infant. The shepherd's wife throws the child into the water; the waves wash him to the bank where he is suckled by a tigress. Already dangerous when quite a boy, as a young man he becomes a robber leader, attacks Kana'an with his band, kills him (without knowing that he is killing his father), marries his own mother and becomes king of the country and later lord of the world. Āzar (already in the Kur'an the father of Ibrāhīm) builds him a marvellous palace flowing with milk, oil and honey, with mechanical singing birds — in the mediæval epic the wonderful feature of the Chrysotriklinion in Byzantium. The lore of astrology, the inheritance of Idris and Hermes he acquires by force from the pupils of Idris. Iblis teaches him magic. He has himself worshipped as a god. Then dreams, voices and omens frighten him. In spite of all Namrūd's cruel orders, Ibrāhīm is born, brought up and soon shatters the belief in Namrūd. Namrūd throws those who believe in God to the wild animals but they do not touch them. He denies them food; the sand of the desert becomes corn for them; on every grain of it is written: "gift of God". Namrūd throws Ibrāhīm into the fire but he is unharmed. Namrūd builds up a pile of fuel, the flames of which burn the birds for miles round — it is impossible to approach it. Iblis then designs a ballista which hurls Ibrāhīm on to the flaming pile. Ibrāhīm spends the finest time of his life there under blooming trees and amid rippling brooks. Namrūd then decides to attack the God of Ibrāhīm in heaven: Starved eagles fly up with his litter, until he hears a voice saying the first heaven is 500 years in width, it is 500 years between heaven and heaven, then comes infinity. Namrūd shoots an arrow against God; the arrow comes back stained with blood. Namrūd suddenly becomes grey and old and falls to the ground. But he plumes himself on having slain God. Then a gnat puts an end to his life.

The history of the Namrūd legend. Very little can have been taken from the Bible. Kur'an expositors and collectors of legends call Namrūd *ghabūr* (tyrant) no doubt after the *ghibor* applied to Namrūd in the Bible (Gen. x. 6); Geiger also sees in *ghabūr* 'amid' (xl. 62) an allusion to Namrūd. Tabari (I. 217) also describes Namrūd as a *mutaḡabbir*. Muslim legend and Haggada (*Targ. Sheni* on Esther I. 1; Midr. Hagadol, ed. Schechter, p. 180-181; Gaster, *Exempla of the Rabbis*, N. 1) make Namrūd ruler of the world. From Haggada comes the association of Namrūd with the Tower of Babel and in particular with the childhood of Abraham, and with the latter's rescue from the fire (*Gen. Rabba*, xlix. 1). The death of Namrūd caused by the gnat is also based on Haggada, which makes Titus, the destroyer of the Temple, die in this way. Nebuchadnezzar comes to a similar end (see Grünbaum, *Neu Bittre*, p. 97-99). The flight to heaven especially in the romance of 'Antar with the intervals of 500 years recall the ascent of Nebuchadnezzar in

the Talmud (*Chagiga*, p. 13^a). But the slight has far more resemblance to that of Shālī Kai-Kū'ūs as described by Firdaws (ed. Mohl, ii. 31–34). The Namrūd legend borrows from many directions. Talmud mentions that Namrūd had been identified as the Persian Dāhāk (*Annales*, i. 253) but he refutes this idea (*Annales*, i. 323, 324). Bible, Haggada and Persian epic were further developed, the marvels increased, an early history invented, Namrūd made an Oedipus, and in the *Sīrat 'Antar* he becomes the hero of a romance. The Muslim Namrūd legend then found its way into the late Jewish legend of Abraham. Bernard Chapira (see below) has published one such in Hebrew and Arabic. He is certainly wrong in taking seriously the authorship of Ka'b al-Akhbar, this is one fiction out of many thousands. But the mutual influence of Haggada and Muslim legend is indisputable. The later *Midrāsh*, as M. Grünbaum has clearly shown, *Pirḥi R. Eliezer*, *Tanna de B. Elyashu*, *Midrāsh Haggadol*, *Sifre ha-yashar*, *Shibos Mūsar* of R. Elivah Hakkohen from Smyrna, is influenced in the sections on Abraham and Nimrod by Muslim literature.

(BERNARD HELLER)

NĀMŪS (A.) is a word of many meanings. In St. John's Gospel xv. 26, the coming of the paraclete is announced. In the preceding verse a passage from the Psalms referring to the waters is quoted and is *qā' nāmūs aḥadū* given as source. The verses in the Gospel from 23 on were already known to Ibn Ishāq in an Arabic version which came from a Syriac one as the reproduction of "paraclete" by *al-manaḥimūn* shows. In the same source the word *nāmūs* was left untranslated, for we find it in Ibn Hishām in the form *nāmūs*. Biographical tradition makes Waraka b. Nawfal expressly assert the identification of Muḥammad with the paraclete promised by Jesus mentioned in the passage from the Gospel. The oldest form of the tradition giving this episode represent a combination of the Gospel passage with Sūra lxi. 8. In later developments of the tradition the idea of a paraclete gradually falls into the background till it was finally interpreted as the name of an individual and even received an epithet. Thus we read in Ibn Hishām, p. 153 that Waraka replied as follows to his cousin who asked him about Muḥammad's first vision: "If thou hast reported the truth to me then truly the greatest *nāmūs* has come to him, who used to come to Mūsā, and then he (Muḥammad) is the prophet of this *umma* etc." In Talmud the "greatest *nāmūs*" is in a gloss expressly said to be Djibril.

As the personal interpretation is not sufficiently explained by meanings, known to be really old, of the true Arabic word *nāmūs* (root *n-m-s*) which exists alongside of the Greek loanword, and meanings like "the trusted one, confidant of a secret" seem rather to come from the Greek loanword already known in its reference to Djibril (against Dozy, *Supplément*, s. v.), it was natural to look for a specific use of the word *nāmūs* which admitted of a personal interpretation and could at the same time have been known to the Arabs. Nyberg was reminded by the *nāmūs* doctrine of the Ikhwan al-Safa' (see below) of the pseudo-Clementine writings; and T. Andrieu derives the *nāmūs* of the Waraka tradition from the *νῆμας* *nēmās* of the pseudo-Clementines, which according to the book *Κεφάλαια Πίστεως* was revealed to Adam and afterwards again appeared to all prophets worthy of such an honour, lastly to Moses and to Jesus. However startling the agreement of the conception of *νῆμας* *nēmās* with the later forms of the Waraka tradition, the question still remains open, by what way a personal conception of *νῆμας* could have entered Islam. Haumastark quoted a passage from the liturgy of St. James of Jerusalem: *καλίστας αἰῶνι διὰ νῆμας, ἐπαπαύσας διὰ τῶν προσφύτων* and observes that the liturgy was the authoritative one in the Beduin camps and must have existed in an Arabic translation. It is really quite natural to understand *νῆμας* personally here. No explanation of our Waraka tradition can on the other hand be obtained from Mandaeen writings as Lidbarski has already pointed out in his translation of the *Ginza*, p. 247–48.

That there is a true Arabic word *nāmūs* has already been mentioned. The dictionaries give such varied meanings for it that we can only consider as old and original those that are confirmed by quotations. This holds for the meanings "hiding place, hunter's hut, monk's cell" probably also for "buzzer, midge" as *nomen agentis* from *n-m-s* to "buzz". On the other hand, not only the meaning "cunning" and its derivatives must be secondary, but also the already mentioned meanings referred to persons, the latter especially because the word so far as we know, is used also in the later literature predominantly in the material sense and the person connected with the idea is called *shāhīd al-nāmūs* etc. (counter-example: Dozy, s. v.). Just as the material meanings predominate generally, so also does the meaning of the Greek loanword predominate, apart of course from the old poetry, from which the meaning "midge" and particularly the word *nāmūṭiya* "mosquito net" have survived into the modern vernacular. Below we shall therefore deal only with the development of meaning of the Greek loanword.

The favourite meaning is divine law, with or without the addition of *ilāl*. This law is revealed through the prophets, and only men of prophetic spirit can be *shāhīd al-nāmūs* in this sense. The double character, political and religious, of the Muslim constitution naturally very much favoured this conception. Thus, for example, al-Kalāshandī, *Ṣaḥīḥ al-A'ṣḥā*, i., Cairo 1903, p. 280 gives as the first among the *uṭmān shāri'ya*, *ḥim al-nāmūs al-mutā'allāh* N. I. *ḥimūnawna*. The Sina expressly observes in his encyclopaedia *Aḥām al-ʿUṭmān al-ʿAshīya* (in *Maḥfūẓ al-Naṣīḥ*, Cairo 1328, p. 230 ff.) in treating of politics that the pertinent works of Plato and Aristotle understand

by *ḥuṣūṣ* not "cunning" and "deceit", corresponding to the usage of the vernacular, but *ḥuṣūṣ*, revelation, etc., for the laws of the community are dependent on prophecy and the divine law; similarly Sprenger, *Dict. of Technical Terms*, I, 40. Abū al-Ḥaiyūn al-Tawhīdī devotes the fourth of his *Mafāḥiṣ* to the *nāmūs* (1241 (new ed., Cairo 1929)).

Here we may mention Miṣkawayh's (Ibn Miṣkawayh) definition which is also of literary interest. In connection with his discussion of the function of the *dīnār* as a measure of the equivalence (*qābūḥ*) of service and reward (*Taḥḍīb al-Aḥḥāb*, maṣṣala iv., e.g. Cairo, Khayrīya, 1322, p. 38), he quotes an alleged saying of Aristotle according to which the *dīnār* is a just *nāmūs*. *Nāmūs*, he adds, in striking contrast to Ibn Sina, means in Greek, *zīna* and *ḥadīṣ* [q. v.]; Aristotle says in the *Ēth. Nic.*, the greatest *nāmūs* proceeds from God, the second is the judge, the third the *dīnār*; the first, as a condition for just settlement between the claims of men, is the example which the two others follow. The well-known citation of the Muslim books on Hellenistic ethics has resulted in this explanation finding a place in later derivatives from Miṣkawayh, e.g. in Naṣr al-Dīn al-Ṭūsī, *Aḥḍāṯ al-Nāṣirī*, i, 2, 7 (e.g. Tabriz 1320, p. 152), also Kharrāzīde 'Alī b. 'Amr Abū al-Ḥinū' al-Aḥḍāṯī 'Alī' (1248, i, p. 78) and each more fully than the preceding. As a result of these expositions al-Ṭūsī in the economic part of his book (ii, 2, p. 254) calls gold briefly the smallest *nāmūs* (translation in Fleissner, *Der ökonomische des Neopythagoreers „Pythagoras"*, 1928, p. 63); and Kharrāzīde also follows him (ii, p. 7).

The *nāmūs* doctrine of the Ikhwān al-Safā' can only be briefly outlined here. In part i, p. 56 (Bombay ed.), the *nāmūs* is defined as a spiritual kingdom (*mamlaka rūḥāniyya*) which is upheld by 8 kinds of men. God appears as the *wāḥid al-nāmūs*. *Sāhib al-nāmūs* is from the context Muhammad, in so far as one can identify from the context any individuals in the pages of the Ikhwān al-Safā'. A few pages later Muhammad is described as the *wāḥid al-nāmūs*. In part iv., p. 57, the angels appear as teachers of the *aḥḍāṯ al-nāmūs*. Any one who does not guide his life according to the commands and prohibitions of the latter, has no share in divine *nāmūs* (iv, 147). This spiritual kingdom is the element of the Ikhwān al-Safā'; they slept in the cave of their father Adam [q. v.] for a long period until the fore-ordained time (*waḥd*) came under the rule of the Lord of the greatest *nāmūs* (Muhammad?) and they perceived their spiritual state (*maḥal*) which was raised in the air and from which Adam and his wife had been banished (iv, 107). If the Ikhwān al-Safā' by common effort and uniform self instruction succeed in building a perfect spiritual state (*fayḍ*, cf. al-Fārābī?), this state will belong to the kingdom of the Lord of the greatest *nāmūs*, who has dominion over souls and bodies (iv, 211). The *nāmūs* thus even becomes a kind of divine being, where there is a discussion of the "philosophic service of God", which represents the higher stage in comparison with that of the Muslim teaching regarding obligations and duties. This philosophic service of God had been, they say, practised by the ancient Greeks on the first, middle, and last day of the month. The night of the first day was divided into three parts. The first was spent in

worship of *nāmūs*, the second in meditation on the *maḥal*, the third in humble prostration before the Creator, confession of sins and repetition of prayers by Plato, Idris and Aristotle until the break of day (iv, 273 sq.). Nevertheless the *nāmūs* here has not exactly taken the place of God. But in several passages of the encyclopaedia he is represented as giving names. Thus he calls the spirits of the planets angels (ii, 97; cf. iv, 244); he does the same with the natural forces (ii, 102) and (iii, 10) with the nature of origin and decay. Above the spheres (*ḥamā'ir*) of the three kingdoms of nature and of man is the sphere of the divine *nāmūs*, whose members deal with the affairs of the *nāmūs* and the divine revelations and which corresponds to the "surrounding" (united) sphere of the astronomers (iv, 251). As the *nāmūs* and the ability to become creative in him involves a special organisation of man, he has found an allegorical place in the physiology and psychology of the Ikhwān al-Safā'; here indeed the conception changes from page to page. Thus in the first part of the work (2nd half, p. 48) five kinds of soul are described, two above and two below that of man. The former two are the soul of the angels and the divine (*ḥamā'ir*) soul, one of which is the stage of the soul of wisdom, the second that of *nāmūs*-prophethood. On the very next page the one is the intellectual soul of wisdom and the other the *nāmūs*-like angel soul. On p. 54 we find the following gradation: nature, soul, intellect, *nāmūs*. Nature receives through the soul free-will, through the intellect the power of thought and through the *nāmūs* commands and prohibitions. The parts of the soul are as follows: vegetable, animal, logical (human), intellectual (*wisdom*), *nāmūs*, angels, which latter serves the *nāmūs*. Here again there is the tendency to personification. It is in keeping with this when in iv, 119 (cf. also iv, 146) the story of Socrates in prison (in agreement with the Greek tradition and mentioning the *Phaedo*) it is related that Socrates will not escape from prison for fear of the *nāmūs*; he justifies his attitude with the words: "He who does not respect the *nāmūs* is slain by it". When immediately afterwards the *nāmūs* is identified with the *ḥamā'ir*, it is difficult to say whether this is serious or only done out of caution. It is nevertheless remarkable that the sixth essay of the fourth part which treats of the nature of divine *nāmūs*, of the qualifications for prophethood and the qualities of a prophet, does not contain the word *nāmūs* at all but instead of it always has *ḥamā'ir*. The Ikhwān have spiritual powers of their own; these form a series of four stages, the third of which is the *ḥamā'ir nāmūsīyya*; man attains it at 40 and it is the special characteristic of kings and rulers. Possessors of this power are called the distinguished and noble (*fayḍ*, cf. *ḥamā'ir*) brethren. Above it is only the *ḥamā'ir walāhiyya* (iv, 154 sq.).

The origin of the meaning "cunning" cannot be given with certainty; it possibly comes from the Arabic meaning "place of concealment". That it was particularly common in the spoken language is evident from the quotation given above from Ibn Sina. In any case this meaning has undergone a remarkable amalgamation with the Greek "law" in the literature of magic for the word is there used for magical formulae, particularly those which are based on illusions of the senses. The pupil of al-Anṣārī [q. v.] in his

Qibla on the latter's *Taḥḥira*, s. v. *simiyā* (iii, Cairo 1924, p. 56), gives the *namūs* as the first section of the science known by this name. But the meaning of the word is not limited to this kind of magic formulae.

Through translations from the Arabic the word entered the Hebrew literature of the middle ages with the meaning "law, religious law (of other peoples), morality, propriety"; in the latter meaning it has survived in the modern Hebrew vernacular. It is interesting to note that in the modern dialect of Mecca a similar change of meaning is found; according to Snouck Hurgronje, *Mekkanische Sprachwörter*, No. 10, *namūs* means the "spotless, honourable name" which one has among men; its opposite is *ar*, "shame".

The word *namūs* also plays a considerable part as the title of books.

The "greatest *namūs*" also occurs as the title of a book; cf. Irmow, *Catalogue*, I. 335 sq.

(M. FLEISSNER)

NĀR. [See DJAHANNAM.]

NARSHAKHĪ, ABD BAKR MUHAMMAD b. DJAFAR (d. 348=959), author of the "History of Bukhārā", the original Arabic version of which he presented to the Sāmānīd Nūh b. Nāṣir in 332 (943–944). In 522 (1128–1129) the book was translated into Persian by Abū Naṣr Aḥmad b. Muḥammad al-Kūshāwī who omitted several "redundant" passages. Then in 574 (1178–1179) Muḥammad b. Zafar prepared a new abridged edition of the book which he presented to Sadr 'Abd al-'Azīz b. Burhān al-Dīn, governor of Bukhārā. Finally an unknown author continued it down to the Mongol conquest. It was in the last form that the book was published by Schefer. The book contains many interesting notes on the situation in Central Asia before Islam and details not found elsewhere of the Arab conquest (from Madā'iri!). The Persian translator added further details from the works of Abū Ḥasan 'Abd al-Rahmān b. Muḥammad al-Nahāpūrī and probably from [Abū Ishāq] Ibrāhīm

[b. al-'Abbās al-Suh], d. in 243 (857). The information about the townships of the district of Bukhārā, their monuments, their products, their old customs (such as lamentation for Siyāwush, p. 21) is very interesting.

Bibliography: *Description topographique et historique de Boukhara par Muhammad Nersakhī suivie de textes relatifs à la Transoxiane*, publ. by Ch. Schefer, Paris 1892 (*Publ. de l'École des Langues Orientales Vivantes*, III^e série, vol. xiii, p. 1–97). There is also an edition lithogr. in Bukhārā. The only translation so far is that into Russian by N. Lykoshin, Tashkent 1897 (ed. by Barthold). Cf. Lerch, *Sur les monnaies de Boukhara-Khondak*, in the *Travaux de la 3^e session du congrès international des orientalistes*, St. Petersburg 1879, II. 424; Barthold, *Turkistan*, Engl. transl., G. M. S., p. 14; Marquart, *Erānshahr*, s. index; Marquart, *Wehr- und Arang*, [1907], p. 139 and *passim*. (V. MIKOLAJEV)

NASĀ (often NĀSĀ), the name of several places in Persia: in Khurāsān, Fars, Kirmān and Hamadhān; cf. Yāqūt, iv. 778. (According to Bartholomae, *nišāya* means "settlement").

1. Nāsā in Khurāsān was situated in the cultivated zone which lies north of the range separating Khurāsān from the Tarkoman steppes. It corresponds to the *Nirāza*, *Nirāz* *raḥim* of the classical authors, celebrated for its breed of horses (Herodotus, III. 106; cf. Strabo, XI, ch. xiv., § 7). Alexander the Great is said to have built an Alexandropolis at Nāsā. According to Isidore of Charax, ed. W. Schoff, Philadelphia 1914, p. 8, the tombs of the Parthian kings were in the town of Nīrā. Rawlinson, in *J.R.A.S.*, 1839, p. 100, believed he saw in the stock of Turkoman horses descendants of the *Arre*, *Nirāza*; [Arvesta, *Vidvādāt*, I. 7 seems to have a different locality in view].

According to Iṣṭakhri, the town of Nāsā was very like Sarakhs (i. e. like the half of Marw) and had much water, many gardens and green places and the country round was very fertile. Muḥaddas, p. 320, 331–332 says that the ten gates of the town were buried in verdure. He confirms the abundance of springs but says the water was not of good quality. Muḥammad Nāsawī, *Strat. Dīlāl al-Dīn*, ed. Houdas, p. 22, says that the place was very unhealthy on account of its very warm climate and that the Turks could only live a short time there. According to Nāsawī, p. 50, the town had a strong citadel. The number of tombs of shahs and famous men was so great that the Sults called Nāsā "little Damascus", cf. the biography of Shāhshāh Sa'īd (*Arwāḥ-i Tanqīd*, ed. Zakowsky, p. 45) written in the 13th century.

Yāqūt, iv. 776–778 places Nāsā 5 days' journey from Marw, one day from Abiward and 6–7 days from Nishāpūr. Of its dependencies he mentions: I. 480: Bāfīz (> Firān); I. 857: Taftān; III. 343: Shahrīstān; III. 866: Farāwa (= Kāfi-Arwat); IV. 328: Kauk Durān, with the fortress Tak (afterwards Yazir) also belonged to Nāsā, cf. Barthold, *A history of Greater Turkistan*, p. 37–41. Cf. also the *Tarīkh-i Nādiri* of Mahdī Khān (Nādir's son was at Khurramābād, cf. under the year 1044). The ruins of the capital of Nāsā are near the little town of Bagir about 12 miles from Aikhabād and 8 from the station of Bāsmān on the Trans-Caspian railway.

2. The Nāsā in Hamadhān perhaps cor-

responds to the Nisāya placed by the inscription of Carius (Behistūn, i. 13) in Media. It is possible that the reference is to the plains of northern Luristān [q. v.] (Alighar, Khawa) where the well-known bronzes of Luristān were found; cf. Minorsky, in *Apollon*, London, Feb. 1931.

(V. MINORSKY)

NASAF. [See NAKHSHAB.]

AL-NASAFI, *nisha* [cf. NASAF] of several eminent persons of whom the following may be mentioned:

1. ABU 'U-MU'IN MAHMUD B. MUHAMMAD B. MUHAMMAD ... B. MARHUL ... AL-HANAFI AL-MAKRU'ULI (d. 508 = 1114), one of the *mutakallimūn* [q. v.] whose scholastic position is between that of the early period as represented by 'Abd al-Kābir al-Baghādī [q. v.], who is still endeavouring to find a convenient arrangement and an adequate formulation of the contents of *kalām*, and the younger *mutakallimūn* who have at hand the necessary formulas for ready use. Of his works the following are known to me:

1. *Tamhīd li-Kawā'id al-Tawhīd* (Cairo, MS. 2417, fol. 1–50; cf. *Fihrist* ... *Maṣr*, ii. 51), a treatise in which the contents of the creed are proved according to the scholastic method. The first chapter consists of an exposition of the doctrine of cognition, the last of the doctrine of the imānate. The work closes with a *surghida* which contains the doctrine of Deo in an abridged form; 2. *Tahyīrat al-Adilla* (Cairo, MSS. 2287, 6673; cf. *Fihrist* ... *Maṣr*, ii. 8), an elaborate work on dogmatics of nearly the same scheme as the *Tamhīd*; 3. *Bahr al-Kalām*, printed at Cairo 1329 (1911), differs from the two foregoing works in so far as it deals with heresies and is polemical. It is identical with *Mubāhāṭat Ahl al-Sunna wa 'l-Djama'a wa 'l-Firaq al-Qalla wa 'l-Mubtada'a* (Leyden, cod. or. 862) as well as with *Aḥādīd* (Berlin, N^o. 1941; cf. Ahlwardt, *Verzeichniss*, ii. 400). The work is preserved in several libraries under one of these titles (Bruckelmann, *G. A. L.*, i. 426, where the number of five works must be reduced to three).

Bibliography: in the art.; cf. also Hādījī Khalifa, ed. Flügel, index, N^o. 6453.

II. ABU HAFS 'UMAR NAJIM AL-DIN (d. 537 = 1142), jurist and theologian. Of his works the only one edited is the *Aḥādīd*, which has the form of a catechism. It became popular and was much commented, probably because it was the first abridged form of the creed according to the scholastic method of the new orthodoxy. In Europe it became known as early as 1843 through the edition by Careton (*The Pillar of the Creed*, N^o. 2). For editions of and commentaries on this work as well as for the other works of this scholar that have come down to us, cf. *G. A. L.*, i. 427–29.

Bibliography: Bruckelmann, *G. A. L.*, i. 428 and the references given there.

(A. J. WENTZICK)

AL-NASAFI, HAFIZ AL-DIN ABU 'U-BARAKAT 'ABU ALLAH B. AHMAD B. MAHMUD, an important Hanafi legist and theologian, born in Nasaf in Sogdiana, was a pupil of Shams al-A'imma al-Kardari (d. 643 = 1244–1245), Hamid al-Din al-Darir (d. 666 = 1267–1268) and Badr al-Din Khawāzindā (d. 651 = 1253). He taught in the Madrasa al-Kutubiya al-Sultaniya in Kirman, came in 710 to Baghād and died in Rahi' 1 710 (August 1310; according to Kuraḥi and Ibn Ta-

ghribirdi: 701) apparently on his way back to Idjād (in Khuzistān), where he was buried. His pupils were Muṣaffar al-Din Ibn al-Sa'ati, author of the *Maṣāna' al-Baḥra* (d. 694 = 1294–1295), and Husām al-Din al-Sighāḥi, a commentator on the *Hudaya* (d. 714 = 1314–1315) [cf. AL-MARQHIFANI].

The best of his works is thought to be the *Kitaḥ al-Manār fi Uṣūl al-Fikḥ*, a concise account of the foundations of law (Dehli 1870, Constantinople 1326 and often later); there are numerous later commentaries but he himself wrote two, one of which is entitled *Kaḥf al-Aṣrār* (2 vols., Bulaḥ 1316). Out of his original plan of writing a commentary on the *Hudaya* of al-Marghinani [q. v.] there came the lawbook modelled on it *Kitaḥ al-Waṣf*, on which he composed in 684 a special commentary, the *Kitaḥ al-Waṣf* (delivered in lectures in Kirman in 689). He had previously prepared a synopsis of the *Wāṣf* entitled *Kana al-Daḥiṭ* (Cairo 1311, Lucknow 1294, 1312, etc.) which Ibn al-Sa'ati in 683 (this is no doubt the correct reading for 633 in Kaffawi) heard him deliver in Kirman. This synopsis was used as late as the sixteenth century in Damascus and at the al-Ashraf in Cairo (v. Kramer, *Mittel-Syrien u. Damaskus*, Vienna 1853, p. 136; do., *Aegypten*, Leipzig 1863, ii. 51). The best known printed commentaries on the *Kana* are: a. *Tahyīn al-Haḥiṭ* of al-Zallāḥi (d. 743 = 1342–1343) in 6 vols., Bulaḥ 1313–1315; b. *Rams al-Haḥiṭ* of al-'Aini (d. 855 = 1451) in 2 vols., Bulaḥ 1285 and 1299; c. *Tahyīn al-Haḥiṭ* of Mollā Miskīn al-Harawī (written in 811 = 1408–1409), Cairo 1294, 1303, 1312; d. *Tawḥīd al-Kaḥiṭ* of al-Tāḥi (d. 1192 = 1778), Cairo 1307 etc.; e. the most important: *al-Baḥr al-rūḥ* of Ibn Nudjaim (d. 970 = 1562–1563) in 8 vols., Cairo 1334.

He also wrote a series of commentaries, e. g. two on the *Kitaḥ al-Waṣf* of Najm al-Din al-Samarkandi (d. 656 = 1258) entitled *al-Mustafā* and *al-Manāḥ*; on the *Maṣāna'* of Najm al-Din Abū Hafṣ al-Nasafi (d. 537 = 1442–43) on the differences of opinion between Abū Hanifa, his two pupils, and al-Shāfi and Mālik entitled *al-Mustafā*, as well as a synopsis entitled *al-Muṣaffā* (finished on 20th Sha'ban 670; cf. Bruckelmann, *G. A. L.*, i. 428; also on the *Muntaḥab fi Uṣūl al-Din* of Akhḥikari (d. 644 = 1246–1247; Ibn Taghribirdi, Hādījī Khalifa, N^o. 15095). On the other hand, he did not write a commentary on the *Hudaya*, as Ibn Kutūbiyghā and Hādījī Khalifa, vi. 484 say (cf. the story of the origin of his *Wāṣf* according to al-Iḥṣān [d. 758 = 1357] in Hādījī Khalifa, vi. 419). He also wrote a commentary on the *Kur'ān*, *Madārik al-Tamīl wa-Haḥiṭ al-Ta'wīl* (printed in 2 vols., Bombay 1279, Cairo 1306, 1326).

His confession of faith *al-Sūnda fi Uṣūl al-Din* (apparently also called *al-Manār fi Uṣūl al-Din*; Kuraḥi, Ibn Duḥmāk) became known quite early in Europe from Careton's edition (*Pillar of the Creed*, London 1843). In it he closely follows the *Aḥādīd* of Najm al-Din al-Nasafi (see above) and also wrote a special commentary on it: *al-Fitḥ li-'l-Sūnda*.

(HEFFENING)

AL-NASARĀ ABU 'AHM AL-RAḤMĀN AHMAD B. SHU'AYB R. 'ALĪ B. BAHR B. SINĀN, author of one of the six canonical collections of traditions [cf. *Ḥādīdī*, d. 303 (915)]. Very little is known about him. He is said to have made extensive travels in order to hear traditions, to have settled in Egypt, afterwards in Damascus, and to have died in consequence of ill-treatment to which he was exposed at Damascus or, according to others, at Ramla, in consequence of his feelings in favour of 'Alī and against the Umayyads. On account of this unnatural death he is called a martyr. His tomb is at Makka. Al-Nasā'ī's collection of traditions is divided into 51 chapters, each of which is subdivided into *bāb*. As to the subjects, considerable space is given to traditions dealing with the ceremonial duties (*ibādāt*); the chapters *ihkām*, *nuḥūl*, *ruḥū* and *'umrā* (forms of bequest, donation etc.) do not occur in any of the other collections, although a part of the materials contained in them appears under different heads. On the other hand, chapters on eschatology (*āḥzān*, *ḥaywāna*, etc.), on hero-worship (*manāḥib* etc.), on the *Ḥur'ān* are lacking.

Brockelmann mentions two other works by al-Nasā'ī: *Fi Faḥl 'Alī*, published at Cairo 1308, under the title *Kitāb Khawāṣṣ Amir al-Mu'minin 'Alī b. Abi Ṭālib*, and *Kitāb al-Du'aḥ* (*G.A.L.*, i. 182).

Bibliography: Ibn Khallikān, N^o 28; al-Dhahabī, *Tahāṣūt al-Huffā*, ii. 266 399; Ibn Ḥajar al-Asqalānī, *Tahāṣūt al-Tahāṣūt*, Haidarābād 1325, i. 36 399; al-Sam'ānī, *Kitāb al-Ansāb*, G.M.S., xx, fol. 559; Goldziher, *Mohammedanische Studien*, ii. 141, 249 399; do., in *Z.D.M.G.*, l. 112; Wüstenfeld, *Der Islam als Schöpf und seine Anhänger*, in *Abh. G. W. Göt.*, xxxvii. 108 39. (A. J. WENSINCK)

NASARĀ. Christians, more especially the adherents of the Oriental churches living under Muslim rule (differentiated from *Kūm* "Greek Christians", *Iḥrāṣī* "Western Christians"). The word is derived from the Syriac *Nasrāyā* (Horowitz, *Koran. Untersuchungen*, p. 144 399); the Arabic singular is *Nasrānī*.

A. Before Islām.

A complete investigation of the materials for the history of Christianity in Arabia and among the Arabs before the rise of Islām has not yet been made, and only the principal facts can be summarily given here.

Christianity naturally spread into Arabia from Syria and al-Jazīra though no date can be given for the earliest infiltration. Bishops of the encampments are early mentioned but they should probably be assigned to Syria. Arab Christian history

may be said to begin with the conversion of Ghassān [q. v.]; the chief al-Hārith b. Dhabala was an ardent monophysite and in A. D. 542 or 543 he persuaded the empress Theodora to appoint Jacob Baradaeus as bishop of Edessa with a wandering commission, and Theodore as bishop of Basra in the monophysite cause. Nestorian Christianity came to Hira [q. v.] at an early date. Its bishops are often mentioned from A. D. 410 till c. 1000 and a monastery was built there by 410. Three Nestorian patriarchs were buried there. Al-Mundhir III (d. 554) [cf. *LAKHM*] was a pagan though he had a Christian wife, who built the convent called after her Dair Hind, while some of the notables were also Christian. Theological controversy in the Greek empire drove many monophysites into exile in Hira; in 518 a monophysite monastery existed, and from 551 monophysite bishops are recorded. Nu'mān III was converted c. 593 by the Nestorians.

Nestorian missions followed the trade routes, one of which followed the coast. Bishops in the district of Bahrain are recorded in 575 and 676, in the island of Samāhidj in 410, and in 'Uman in 424. Another route was across the peninsula. One story says that Nadjran was evangelised by a native who was converted in Hira; another sends monophysite exiles thither from Hira, while a third brings the evangelist from Syria. Christianity had probably reached Nadjran before 400. The Abyssinians invaded south Arabia in the beginning of the sixth century and conquered the country. As soon as they had withdrawn, a chieftain Masruq or Dhū Nuwās, who was a Jew by religion, attacked and persecuted the Christians not only in Nadjran but also in Hadramawt in 525. A second Abyssinian expedition defeated Masruq, who was slain or drowned, and Abyssinian rule was firmly established. Probably these expeditions were part of Greek policy to set up an obstacle to Persia and crusading motives were secondary. The invaders would have introduced the monophysite faith if it was not already present. When the Persians conquered south Arabia they naturally then favoured the Nestorians. The great church of San'a' seems to have been built on the site of a pagan sanctuary and a Nestorian bishop was appointed c. 800 A.D. [cf. *ABBAHA*, *YIMYAR*, *SAN'A'*].

From the borders Christianity percolated into the interior. Bishops are recorded at Aila [q. v.], Dūma [cf. *DJAWF*] and Taimā, and most of the tribes in the north had some knowledge of the faith even if the saying attributed to 'Alī, "All they know of Christianity is wine-bibbing", is exaggerated. The tribes most affected were, in the west Salīb, Ghassān, Djudhām and Lakhm, in the east Taghlib, Bakr with 'Idjī, Hanifa, Rab'a, Tamim and Taṣūkh, and in the centre Tayi with Thālab and part of Ḥudā'a.

B. Under Islām (medieval period).

1. **History.** It is generally recognised that the attitude of Muḥammad towards the Christians, which had at first been favourable, changed towards the end of his life; probably when the expanding boundaries of the Muslim state brought him into contact with Christian tribes [cf. art. *MUHAMMAD*, lili. 735^v]. The problem of subject Christians scarcely arose during his lifetime, since his relations with Christian tribes and settlements (e.g. Aila, Dūma) were generally regulated by

treaties, the best known of which is that concluded with the Christians of Nadjran [q. v.]. By the terms of this treaty, the latter were allowed to keep their religion and manage their own affairs, if they paid a fixed tribute, entertained the Prophet's representatives for a month, gave certain supplies in the event of a war in the Yaman, and abstained from usury. To the same period belongs the general command given in the *Kur'ān* (ix. 29) to fight against those who have received a book until they pay tribute (here called *al-ḡisya*, q. v.) and are humbled.

The conquests of Khalid b. al-Walid suddenly made the problem acute. During the reign of 'Umar it was solved, like all the problems of the state, in a hand to mouth way, usually by applying the precedent of the Nadjran treaty. Hira, the cities of Syria and Mesopotamia made individual treaties with the Muslim commanders; the terms differ in detail, but all include a fixed tribute. Muslim governors were set over the provinces and big towns, but the minor officials were not changed. The people paid much the same taxes as before and there was little interference with their social and religious life. Sometimes a church or part of one was taken and turned into a mosque; more often, probably, churches and monasteries were respected, as also were existing property rights. On the occupation of al-Irak there was a movement among the tribes to seize the conquered lands, and it would seem that a district was for a time assigned to the tribe Badjila (cf. Baladhuri, p. 267 sq.; *Kitaḥ al-Umm*, iv. 192), but in the end 'Umar applied the precedent established by Muhammad on the conquest of Khaibar and left the conquered lands to their owners, to be administered as a trust for the benefit of the conquerors [see art. *FAT*]. On the other hand, he exiled the Christians of Nadjran to al-Irak so that "there might be but one religion in Arabia", though isolated Christians lived in al-Madina itself. 'Umar had a Christian slave who was set free at his death (Ibn Sa'd, vi. 110), and Abū Mūsā had a Christian secretary who accompanied him to al-Madina. 'Umar is represented, even in Christian sources, as friendly towards Christians, and in his last charge he recommended the *dhimmis* to the care of his successor as "the support of your families".

During the following decades the treatment and status of Christians shows many contradictions, and was often determined apparently by individual caprice. While new churches were built even in towns founded by the Arabs, such as Fustāt and Baḡra, and the caliph even helped to restore the church at Edessa (*Corp. Script. Chr. Or.*, ser. iii., xiv. 288), in many other places churches were destroyed, and both Mu'awiya and 'Abd al-Malik tried to seize the cathedral at Damascus before al-Walid finally incorporated it in the mosque. Christians continued to hold high offices in the administration: Mu'awiya had a Christian secretary, Sārdjan, who was succeeded by his son, and 'Abd al-'Aziz had as his treasurer a wealthy Christian, Athanasias, though 'Abd al-Malik despoiled him of much of his wealth. State accounts in Syria and Egypt were kept in Greek until the reign of 'Abd al-Malik, and local accounts in Egypt were still kept in Greek for long afterwards. There were Christians in the Muslim armies, and some gave military service instead of tribute. When the Djaradima of Mount Lebanon were defeated,

a clause in the treaty stipulated that they should wear Arab dress (Baladhuri, p. 161). Yet there was some persecution as well as cases of forced conversion. Jews were settled in some of the conquered towns because they were enemies of the Christians (Baladhuri, p. 127). The Jacobites paid a special tax to Mu'awiya (*Corp. Script. Chr. Or.*, ser. iii., iv. 70), and the government sometimes prevented the election of a patriarch. The Christian Arabs of Mesopotamia formed a special category; these paid double *sakk* instead of tribute, but a chief of Taghlib was savagely tortured because he would not renounce his faith. Personal relations between Muslims and Christians were often friendly. It is said of a poet that "he never made love poems about the wife of a Muslim or a *dhimmi*" (*Kitaḥ al-Aghāni*, iii. 291). 'Uthman showed great honour to Abū Zubaid, and the relations of 'Abd al-Malik with the poet al-Akḥal are notorious [see art. *AL-AKHḤAL*].

From this time, however, the condition of the subject Christians began to deteriorate. 'Abd al-Malik changed the system of taxation in Egypt, Syria and Mesopotamia (Dionysius of Tell Mahrē, ed. Chabot, p. 10; Abū Yūsuf, p. 23 sq.), and introduced the personal tax on non-Muslims. In many districts the form of receipt was a leaden seal fastened round the neck or wrist. 'Umar II gave orders to dismiss all *dhimmis* from government service, but such confusion resulted that the order was soon afterwards ignored. He was also the author of the famous "ordinances", in later times attributed to 'Umar I (cf. Abū Yūsuf, p. 73), which prescribed the restrictions to be placed on *dhimmis* and the wearing of the *sumnār* [q. v.] as their distinctive badge. (According to the Nestorian Chronicle [*Patr. Or.*, xiii. 630], this had earlier been the badge of Christian scholars).

By the end of the second century, as may be seen from the works of Abū Yūsuf and al-Shāfi'i, the customs governing the *dhimmis* were more or less fixed, but insistence on them depended on the whim of the governor and the temper of the populace. It was now accepted that no new churches might be built in towns where Muslims lived, though the old might be repaired. A governor's fancy or a riot might destroy churches and there was no redress; the cathedral at San'a, for example, was destroyed for its wealth. At least six rebellions of the Copts took place during the century. Hārūn al-Rashid reenacted the "ordinances" forbidding Christians to be like Muslims in dress and style of riding; but during the reign of Ma'mūn, the Christian headman of Būra in Egypt wore black on a Friday and rode in state to the door of the mosque, when his deputy entered and led the prayers. Their use of horses and riding saddles began to raise objection, and restrictions were placed on religious processions; crosses were sometimes tolerated though banners were forbidden. Taxation became heavier and cases of extortion are recorded. The caliph kept a careful eye on the Church and a patriarch had to get his approval and do him homage, often at a price. A discontented Christian found it easy to get government help in making trouble for his opponents. At this time Christian doctors became prominent as favourites of the caliph and they did not always use their influence in a Christian manner. Discussions on religion took place; at one, when Ma'mūn was present, the Catholicos, the Head

of the Dispersion, the heads of the Sabians, the chief priest of the fire temple and Muslim theologians took part. Many Christians were in government service or were secretaries to public men, and even the fanatical al-Mutawakkil had a Christian secretary. In 236 (850) this caliph intensified the repressive laws. A Christian had to wear a yellow *palṭama* and the *ẓannār* and a woman had to wear a yellow wrap out of doors. If he rode he must have wooden stirrups and two balls on the back of the saddle. Men (or slaves) had to wear the *ghiyār* [q. v.]. They were to be dismissed from the civil service. All new churches were to be pulled down and the cross might not be displayed at festivals. Their graves had to be flush with the ground. The tithe was levied on their houses and wooden devils fixed to them. Four years later they were forbidden to ride horses and were told to wear two yellow *ḥurraʿa*. These laws are the limit of legal persecution and continued to govern in theory though not always observed in practice.

Christians were always to be found in the civil service; some even were connected with the army. In Egypt it was enacted that they should be present on Fridays when the Muslims were absent (Maḳṣṣat, *ii*, 227). One was called *wasir* in the time of al-Muʿtamid; it seems, however, that the title had become cheap and he was only a high official (Yāḳūt, *Irṣād*, *ii*, 130, 259). The first rulers to promote Christians to the highest rank were the Buʿyids (see 'APUD AL-BAWLA) and the Fatimids. This was quite exceptional, but their strength and influence in the administration at all times can be seen from the constant complaints of the dishonesty of Christian secretaries. More especially in the finance department they possessed a quasi-monopoly, which lasted in Egypt down to the nineteenth century.

That Muslim intolerance did grow more bitter is shown by comparing the accounts of al-Aḳḥal in the *Kitāb al-Aḥḥāl* with the remarks of Ibn Raṣṣīk (*ʿUṣṣā*, *i*, 21). In later times the rulers were often more tolerant or far-sighted than the populace; nevertheless, additional taxes were sometimes laid on the *dhimmīs*. In Egypt an extra *ḍinār* was exacted from them between 1260 and 1280, in addition to the poll-tax, which was then called *ḡāṭiya* (Maḳṣṣat, *i*, 106). At intervals fresh attempts were made to impose a distinctive dress upon them. Their request to wear white turbans with a badge was refused at the instance of Ibn Taimiya [q. v.] and in Egypt blue became their distinctive colour. On the whole, they were worse off than their Muslim fellow-subjects, for, while both suffered from oppression by the ruler, they were liable in addition to be attacked by their fellow citizens. Cases of mass conversion still occurred, but the disappearance of the large Christian population of northern Mesopotamia, which continued down to the late middle ages to be the chief centre of Christianity in the Muslim dominions, is probably to be connected with the general decay of agriculture there.

2. Legal status. Here as elsewhere the facts of history do not fit the systems of the theorists, who condemned the laxity of the people on the one hand and the highhandedness of the rulers on the other. The general legal position and the legal view of taxation are outlined in the articles *DIHMA*, *ḤIRYA* and *KHAKK*. To this outline some details may be added from the system of

Malik, which is less liberal than that of Abū Ḥanīfa. Malik taught that a treaty once made with *dhimmīs* cannot be changed. They may not enter mosques or Mecca and the blood money for them is half that for a Muslim. New churches may not be built in or near the towns of Islām though the old may be repaired. Malik, when consulted, said that a Christian, who had blasphemed the Prophet, should be put to death, and this was done. A Muslim may not borrow from them, nor become a partner with them in business unless he is present at all transactions. Another opinion would let them be sleeping partners. A Muslim should not rent land from them as a *mitayer*, but it is not illegal, and one who is part owner of a house with a Muslim has the right of pre-emption. One, who is trading in his own town, pays no tax beyond the general tribute; if he goes to another town and buys goods with money brought with him, he pays the trade tax (tithe), but there is no tax on the sale of these goods. *Dhimmīs* must not kill sacrifices for Muslims; if they do, the sacrifices must be repeated. A Muslim woman should kill a beast rather than ask them to do so. If one marries a Muslim woman with the consent of her guardians, they shall all be punished, but if he pretended to be a Muslim, the marriage is invalid. They may not arrange a marriage for a Muslim woman nor a Muslim that of his *dhimmi* sister. Married *dhimmīs* are divorced by the conversion of the woman. Malik did not approve of *dhimmi* foster-mothers for Muslim children. If a Muslim commits adultery with a *dhimmi* woman, he is punished according to his law and she is handed over to her co-religionists to be dealt with according to their law. The evidence of a *dhimmi* is not accepted. Should he turn Muslim, his evidence is still not accepted (i. e. about things that happened while he was a *dhimmi*), consequently *dhimmi* women cannot give evidence about a birth. If a Christian buys or is given a Muslim slave, the transaction is valid, but the slave must be sold to a Muslim. Muslim law applies to all business dealings between *dhimmīs*, except mury, though they may practise this among themselves. They may not be taught the *Ḳarʿān*. A Muslim may not prevent his Christian slave from drinking wine, eating pork and going to church. It may be noted that Māwardī admits the possibility of a *dhimmi* becoming *wasir* (*wasir al-taṣfiḍa*).

One authority says that eight acts put a *dhimmi* outside the law: an agreement to fight the Muslims, fornication with a Muslim woman, an attempt to marry one, an attempt to turn a Muslim from his religion, robbery of a Muslim on the highway, acting as a spy or guide for unbelievers, or the killing of any Muslim.

3. Social status. The fact that Christians, like other *dhimmīs*, were citizens as it were at second remove, was of course reflected in their social position. The full consequences of this disability were to some extent mitigated by their numbers and influence in the public administration, and by their monopoly or quasi-monopoly of important professions. Christians were distinguished more especially as doctors (the family of Bukḥṭīshūʿ, Ibn Būṭlān [q. v.] etc.) and druggists. A Muslim complained that he could get no patients in an unhealthy year because he spoke good Arabic and not the dialect of Djundaiṣḥur [q. v.] and

wore cotton instead of silk (Djābir, *Kitaḥ al-Bukhārā*, p. 85) and al-Ghazālī says that in many towns the only doctor was a *dhimmi*. Some were rich, and it was often their imprudent display which provoked the mob to violence. The prohibition of usury in Muslim law operated in favour of the *dhimmis* as merchants and money-changers, and gave them the monopoly of such trades as those of goldsmiths and jewellers.

Apart from numerous instances of friendly personal relations between individuals, the generally good relations between the Muslims and Christians is shown by the universal celebration of the great festivals of the Christian year, and the holidays and fairs which accompanied the feasts of the patron saints at the principal monasteries (cf. A. Fischer, in *Berichte über d. Verh. d. Südh. Ak. d. Wiss. zu Leipzig*, Phil.-hist. Kl., 1929). Christians took part in the intellectual life of the community, and the books they wrote are named with approval by the Muslim historians. The strict letter of the law regarding non-Muslims was not always applied. While marriage to a Muslima was always forbidden, fornication with one was not always punished with death. At times the Muslim murderer of a *dhimmi* was executed. Even the apostate sometime found mercy, on the ground that forced conversions were not valid. Christians kept Muslim slaves, both male and female, and acted for Muslims in business.

In spite of all this, the stigma of inferiority remained. The humiliating regulations, the need for constant watchfulness, the constant recourse to intrigue and influence to circumvent the law, the segregation of *dhimmis* in many cities, inevitably sapped their morale. Still more serious were their legal disabilities; there could be no true justice for the *dhimmi* when his evidence was excluded from the Muslim courts, even though *ḥāfīs* were enjoined not to discriminate against them in other respects, nor could there be any permanent social relationship in the absence of intermarriage. It is not surprising therefore that the Christian communities of the East gradually dwindled not only in numbers, but also in vitality and moral tone.

C. The Ottoman Empire.

Since the period of the *Tangmūt* [q. v.] the Ottoman Empire has gradually abandoned the governmental traditions of Muhammadan states, and this change has fundamentally affected the treatment of its Christian subjects. On the other hand, this change was actually brought about by the very

problems with which the Ottoman government became confronted through the existence of a large Christian population in its territory.

Up to the beginning of the sixteenth century the treatment of Christians in the Empire was, on the whole, in accordance with the prescriptions of the *shari'a* after the Hanafi *madhhab* as to the treatment of *dhimmis*, the chief authority on these questions being the *Mulṭaḥa 'l-Abhur* of Ibrāhīm al-Ḥalabī (cf. the Constantinople edition of 1309, p. 90). Christians were subject to the payment of the *ḡiyā-i geyārān*, more often called *ḡharāj* in Turkey (cf. these two articles), whence the expression *ḡharāj-gusār*. This tax was levied in three classes, according to the financial capacity of the payers. D'Othson (*Tableau*, III, 4, 199) says that in his time (about 1800) each year 1,600,000 tax-forms were issued for the non-Muslims, of which 60,000 were in the capital. The regulations as to the building and restoration of Christian churches were observed in principle; the Hanafi *madhhab* allows the restoration of decayed churches but not of churches deliberately demolished; Sheikh Zāde, however, in his commentary on the *Mulṭaḥa* (*Maḡīma 'l-Anhur*, printed Constantinople 1276, p. 415) complains that this distinction was not duly observed in his time (1666). From the xvth century indeed the building and rebuilding of churches was a subject of frequent intervention by the representatives of foreign Christian powers. The turning of churches into mosques by the Ottoman conquerors — such as the case of the Aya Sofia — was generally in concordance with Islamic laws of war. Likewise the prescriptions about clothing were observed and from time to time reinforced; as late as the xviii century certain sultāns such as 'Othmān III and Muṣṭafā III are known to have given special attention to this point.

We also find in the *ḡāḡān-nāme* — the contents of which were declared in accordance with the *shari'a* by the Sheikh al-Islām — some special clauses about non-Muslims (*kāfers*). A *ḡāḡān-nāme* of the time of Sulaymān I prescribes that, in the case of certain crimes that are punished by fines, the fines of non-Muslims shall amount to only half the sum inflicted on a Muslim in each case (cf. the second *ḡāḡān-nāme*, published as appendix to *T. O. E. M.*, III, 3, 4, 6). The same *ḡāḡān-nāme* gives directions with regard to the inheritance of non-Muslims.

The Christians thus constituted in the Ottoman Empire, just as in other Muhammadan states, a section of the population which, so far as their relations with the Government went, had minor rights compared to Muhammadans and to which the high functionaries of the state never belonged. They were improperly designated by the term *ra'īyā*, which word originally means all subjects of a Muhammadan ruler, in allusion to a well-known tradition which compares the ruler with a shepherd and his subjects with a flock (*ra'īyā*, cf. al-Bukhārī, *Ḍuḡa's*, ḥāḡ 11). Hence the use of the term *rayas* in European works when speaking of the Christian subjects of the sultān. *ḡlaw* [q. v.] was a more or less contemptuous expression in the idiom of Muslim circles.

There had been, however, since the coming into existence of the Ottoman Empire, several circumstances that presented the problem of the Christian subjects in forms quite different from those prevailing in contemporary Muhammadan states. The

beginnings of the Ottoman state itself had been anything but orthodox. Ertoghral, according to most sources, was only a converted Muslim and Oghlūn and Orghūn, the founders of the state, had many dealings with the Christian aristocracy of Bithynia, some of whom joined readily the cause and the creed of the new conquerors. Christianity was at that time still widely spread in Asia Minor and was at first adapted to the rather unorthodox mystic form in which the Turcomans of Rūm had made acquaintance with Islām. Large parts of the population adhered for centuries to a Christian-Islamic mixture of religious convictions, such as appeared in the derwish revolt under Simawna Oghlu Badr al-Dīn (cf. Babiager, in *Isl.*, xl.), and as survived in the beliefs and practices of the Baktāshis and the mixed worship of certain saints by both the Islāmic and the Christian population. Survivals of this mixed creed were also observed among the so-called Crypto-Christians of Trebizond (cf. Hasluck, in *Journal of Hellenic Studies*, xli, 199 sqq.). It was only after the restoration of the Empire in the xvth century that the orthodox Islāmic attitude prevailed in the government of the sultāns, who repeatedly had to take strong measures against the heterodox elements.

During this same period it was of no less importance that the Ottoman Empire came to incorporate more and more territories in Europe exclusively inhabited by Christians. With the exception of eastern Thrace, northern Macedonia, Bosnia and Crete, the new subjects were never Islamized in great numbers; in the Empire they came to form a very considerable minority, which was counterbalanced only by the large Muḥammadan population of the Asiatic territories. So long as the government and the Muḥammadan ruling class were strong, this did not affect the political system. But this ruling class itself, as well as their powerful military instrument, the Janissaries, were recruited in a large measure from the Greek and Slavonic Christian population of the European provinces and often kept up friendly relations with their non-converted kinsmen (one of the many instances is that of Djandaril Khān Pasha under Muḥammad II). Accordingly much consideration was shown to large parts of the Christian population, and the more so as many Christians served on minor posts in the state chanceries, where they performed important administrative duties (Crusius, *Turcogræcia*, p. 14). Besides, many high-placed persons, including the sultāns themselves, had, through their harems, many Christian relations without and within the Empire. So the domestic and foreign policy of the state often brought about measures of toleration, which were not altogether in accordance with the strict demands of Muḥammadan law. An outstanding example is the way in which Constantinople and its Christian inhabitants were treated after the excesses of the first days of the conquest were over. Muḥammad II did all that he could to repopulate his new capital, even with Greeks, when the Muḥammadan element proved insufficient; he even had a new Oecumenical Patriarch chosen not long after the conquest (cf. Fr. Giese, *Die Stellung der christlichen Untertanen im Osmanischen Reich*, in *Isl.*, xli, 1937, p. 264 sqq.). Only afterwards, in the first half of the xvth century, when Muḥammadan fanatics had increased, there was a party which invoking the fact that the town had been taken by force (*anwatan*), claimed the destruction of all

churches that were left to the Christians, and only with great difficulty was evidence constructed to prove that Constantinople was really taken by a capitulation (cf. J. H. Mordtmann, *Die Kapitulation von Konstantinopel im Jahre 1453*, in *Byzantinische Zeitschrift*, xxi, 1912, p. 129 sqq.). Other signs of fanaticism in the same period are i. a. the intention attributed to Seltm I to convert all Christians to Islām, the wish of Murād III to turn all churches into mosques and the alleged oath of Murād IV to exterminate all Christians. Still, apart from these occasional outbursts, tolerance prevailed. In the capital a Greek Christian aristocracy and plutocracy was permitted to live in the quarter of Phanar; from their midst came influential persons such as Michael Kantakuzenos, the "pillar of the Christians" (Jorga, iii, 211) in the xvth century, and the well-known Phanariote families who later supplied dragomans to the Porte and the princes of the Danube principalities.

The official attitude towards the Christians was complete abstinence from their domestic religious and secular affairs so long as this did not affect the public order. This explains also the tolerance towards the activities of the Roman Catholic missionaries who were sent from the xvth century onwards to convert the eastern Christians. The government took no interest in the different denominations of Christians, while their internal divisions reinforced its authority. R. Gragger in his article *Türkisch-Ungarische Kulturbeziehungen (Literaturdenkmäler aus Ungarns Türkei)*, in *Ungarische Bibliothek*, I, No. 14, Berlin 1927, depicts the tolerant attitude and the sometimes amused interest of the Turkish Pashas in Hungary in the religious disputes between Roman Catholics and Protestants. On the other hand, the serious domestic troubles amongst the Greeks belonging to the much decayed Oecumenical Patriarchate, as the result of which the party of the patriarch Cyrillus Lucaris took, in the first half of the xvth century, a definite anti-Roman Catholic attitude, could not be wholly indifferent to the Porte, because from that time on the only political protector of the Greeks was the Ottoman government. Arbitrary measures, such as occasional executions of the patriarch (for the first time in 1657; v. Hammer, *G. O. R.*, 3, iii, 474) and excesses in war time are not sufficient to refute the statement that the attitude of the government was on the whole tolerant.

What, at length, came to influence most deeply this attitude was the interest shown in the lot of the Christians by the governments of the Christian powers with whom the Porte began to enter into peaceful relations. In the first centuries those foreign Christians who were allowed to reside in the seaport towns fell within the category of *musta'min*. Legal conceptions of that time did not distinguish sharply between religious denomination and nationality, both being designated by the word *millet*; therefore a foreigner who embraced Islām was entirely assimilated to the Muḥammadan subjects of the sultān. In course of time *millet* came to be used also for the different "national" denominations of the Christians within the Empire. The first foreign power to be interested in the Christians of Turkey was the Vatican, as was manifested several times by the inevitable participation of the Popes in the preparation of anti-Turkish crusades. The Cardinal Protettore di Levante in Rome exercised, through his vicar, considerable influence

on the Latin Roman Catholic community of Pera, which, since the conquest of Constantinople, had enjoyed, like the other Christian communities, administrative independence. This "religious protection" was not altogether in conformance with the wishes of the Christians themselves (G. Young, *Corps de Droit Ottoman*, Oxford 1905, II, 124), but at those times the Porte followed a policy of non-intervention and did not seize the opportunity of placing these Christian inhabitants of her territory under her more direct control. The same policy made her accept without difficulty the remonstrances of a second, more powerful, protector, the King of France, who already before the conclusion of the treaty of 1535 had begun to act as intermediary between the Catholics in Jerusalem and other places in the Levant and the Porte. This intervention of France — which, in the eyes of Christian Europe, served her as an excuse for her entering into diplomatic relations with the Porte — was tolerated equally in favour of other than French ecclesiastics and missionaries, and of non-French Christian prisoners. Occasionally France's protection was also invoked by other than Roman Catholics; in 1639, the Oecumenical Patriarch himself asked the French King to declare himself protector of the Eastern Church. The French capitulation of 1673 recognized at last the protectorate of the King of France over the Roman Catholic foreign Christians, though a general protectorate over all the Christians in the Empire had been demanded originally; the famous capitulation of 1740 confirmed the dispositions of that of 1673 (cf. G. Pellissier du Rausas, *Le Régime des Capitulations dans l'Empire Ottoman*, Paris 1911, I, 80 sqq.). A third powerful protector of Christian interests, this time of the Greek Orthodox Christians, arose in the XVIIIth century in the person of the Russian Czar. Shortly after the fall of Constantinople Ivan the Great had begun to regard himself as successor of the Byzantine Emperors and, as the power of Russia increased, the Greek orthodox Christians in the western and eastern parts of the Empire came to look upon the Czar as their natural protector. Especially the Christian institutions in Jerusalem and the much impoverished patriarchate of that town benefited by the Russian religious interest. On the other hand, Russia learnt to use her influence with the Orthodox Christians as a powerful political instrument. The peace treaty of Küçük Kaynardje (1776) recognized at last the right of the Russian diplomatic representatives to interfere in favour of the Christians in the Empire.

With the weakening of the Empire in the XVIIIth century the so-called "religious protection" became a heavy burden on Turkey's inner political conditions. Especially after the disastrous happenings under Mahmd II's reign, it became clear that the old Muhammadan conception of the state, which left the non-Muslims entirely to themselves, or to others, could no longer be maintained. It was one of the chief stimuli to the introduction of the *Tanzimat*. In order to retain as much control as possible over her Christian subjects the Porte now had to apply her governmental activity equally to non-Muslims and Muslims. Accordingly the *Khatt-i Sherif* of Gül-Khane (1839) declared that perfect security was guaranteed to all subjects, Muslims or *resaya*, as to their lives, their honour and their possessions. Still in the following years

no important administrative measures were taken, while on the other hand the intervention of foreign powers in Christian affairs continued and led amongst other incidents to the outbreak of the Crimean War in 1853. An incident of 1843, in the meantime, had made the Porte give a formal assurance to the French and English ambassadors with regard to the non-application of capital punishment to persons who had renounced the Muhammadan creed (Young, *op. cit.*, II, 11 sqq.).

The law of May 10, 1855 is an important landmark in the history of Ottoman policy towards the Christian subjects; this law abolished the capitation tax for non-Muslims and envisaged the possibility of their service in the army (cf. *DIKKA* and the *Bibliography* of this art.). This legislative measure was completed by the *Khatt-i Humayun* of February 18, 1856, which may be regarded as the Magna Charta of the rights of the non-Muslim subjects of the Empire; in this memorable edict the rights and privileges of the different religious denominations and their members were proclaimed with more detail; as to their military service the edict laid down the principle that it could be replaced by the payment of an exemption tax, which, under the name of *bedel*, came to be regularly applied to all non-Muslims. In accordance with the contents of the *Khatt-i Humayun*, the Ottoman legislation now began for the first time to take notice officially of the existence of the great number of Christian communities existing in the Empire. Organic statutes were elaborated for the more important of these communities (called *millet*): in 1860 for the Armenian Gregorian community and in 1862 for the Greek Orthodox community. In 1870 followed the institution, with the cooperation of the Porte, of the Bulgarian Exarchate, while in course of time a host of laws, decrees and regulations were issued, containing more detailed provisions with regard to these and the minor communities: Patriarchates of Antioch and Jerusalem, Mount Athos, the Serbian Church, the Nestorians, the Latin communities, and the different churches united with Rome (Armenians, Chaldeans, Maronites, Melkites). This highly complicated legislation aimed at making these Christians Ottoman subjects in the full sense of the word, but met with great difficulties created by the existence of an age-old system of autonomy and by the frequent intervention of the foreign powers. The leading principle of the government was to divest the purely religious authorities as much as possible of their power and to reinforce the power of the lay institutions. This policy led to endless troubles in which new regulations continually tried to restore order. In the constitution of Midhat Pasha (1876) Islam was proclaimed as the State religion, but immediately afterwards there follows the declaration that the profession of all recognized religions in the Empire is free and that all privileges granted to the different religious communities shall be maintained (art. 11). Art. 9 guarantees the personal freedom of all Ottoman subjects and art. 17 their complete equality before the law.

All the time during the period of reforms the Turkish government had to reckon with reactionary feelings against the *ghams* in large sections of the Muhammadan population, which in many instances made the application of equal treatment, before the law and elsewhere, illusory. This justified to a certain extent the never ending remonstrances

of the European powers, who lost no opportunity of insisting on new reforms in favour of the Christians. Art. 62 of the treaty of Berlin (July 13, 1878) stipulated again for the equal treatment by the Ottoman government of all non-Muslim subjects, amongst others that every one, without difference of religion, should be admitted as a witness before the law courts.

The effect of the foreign intervention in their favour encouraged on the other hand large sections of the Christian population to disloyal feelings and actions against their legal government. While the latter did what it could do to assimilate the different groups of the population, the factors of dissolution became at the same time ever stronger. Even the peaceful relations that had hitherto characterized on the whole the intercourse between Muhammadans and Christians — especially in the cities — began to make way for religious hatred between group and group, in which the government officials were often unable to observe the required neutral attitude. Amongst many other symptoms the Armenian troubles which began in 1889 in the Armenian wilāyets — where a racial antagonism between Muhammadan Kurds and Christian Armenians had existed for centuries — were the most disastrous. They led to repeated Armenian attempts at revolt and to the notorious massacres in Constantinople of 1897.

By this development the treatment of the Christian subjects ceased to be a religious problem; it became a problem of nationality (*millet* in the new acceptation of the word) and of race, and at the same time one of the vital problems for the Empire. After the revolution of 1908 and the re-establishment of Midhat's constitution, these facts were not yet fully recognized. The Ottomanisation of all subjects of the Empire was seriously attempted; the new representative bodies included a number of Christian members; occasionally there were Christian ministers. Then the world war precipitated the inevitable course of events. This time non-Muslims were for the first time incorporated in the Turkish army, but only for service behind the front. At the same time, the domestic policy of the Young Turks took a pan-Turkish turn, from which religious motives were quite absent. National Turkish feeling prevailed. The measures of deportation of Christian inhabitants from the frontier zones — measures from which the Armenians especially suffered terribly — were inspired by fear of disloyalty towards Turkey, though in their execution remnants of religious fanaticism, notably on the side of the Kurds, certainly played a large part.

The events after the armistice of Mudros have proved that a great part of the Christian population preferred independence or incorporation into a Christian state to remaining with Turkey. And the Turks themselves also were ready to part with their Christian subjects. Under these circumstances were concluded at Lausanne, in 1923, the agreements with Greece for the exchange of the Greek population of the new Turkish state against Turks established on Hellenic territory; only Constantinople and some islands were excluded from this measure. Since by the events of the war the number of Armenians and other Christians in Asiatic Turkey had already been reduced to a very small minority, the result was that the present Turkish republic has only to deal with

a Christian population of no numerical importance, most of whom live in Constantinople. The Lausanne Treaty of 1923 contains in its articles 37–45 only the obligation for Turkey to treat the minorities on an equal basis with the Turkish subjects; it provides for their right to live after a personal legal statute of their own. Finally the treatment of Christians in Turkey has definitely ceased to be a legal problem in the old sense of the word since, by the alteration of the Constitution on April 5, 1928 the state has been completely secularized (cf. *Tarih*, Istanbul 1931, iv. 213) by cancelling the article declaring that the state religion is Islam.

(J. H. KRAMERS)

AL-NASAWI, MUHAMMAD b. AHMAD b. 'ALI b. MUHAMMAD, an Arabic historian, biographer of the last Khwārizmshāh Djalāl al-Dīn Manguvīrti [q. v.], was born in Kharandis (Vākū, li. 415), an estate in the district of Nasā [q. v.] in Khurāsān where his family was reputed to have been already settled in the pre-Muhammadan period (*Hist.*, ed. Houdas, p. 53). During his father's lifetime he represented him when the vizier Nizām al-Mulk, dismissed from office by Sultān Muhammad, visited the family estates on his journey to Khwārizm and was received by him (*ibid.*, p. 30). He only mentions incidentally that he had stayed in his youth with Inānkhān in Māzandarān before the latter had risen to power. When the Mongols invaded Khurāsān in 1221 he had already succeeded his father in his ancestral citadel, which he saved from sacking by payment of 10,000 ells of cloth. Nizām al-Dīn al-Sam'āni was his guest at this time; he enabled him to escape to Khwārizm before the arrival of the enemy and in gratitude Nizām al-Dīn procured him a rich grant of land from Oslāgh Shāh, son of Muhammad (p. 57 *seq.*). When in Nasā, the capital of his district, Nuṣrat al-Dīn Hamza b. Muhammad, the representative of a local royal family, came to power as successor to his nephew Ikhtiyār al-Dīn (p. 99), he appointed him his *naib* (p. 104) and in this capacity he took part in a battle fought by Inānkhān, as governor of Khurāsān, at Nakhduwān near Nasā against the Mongols; according to the full story of the battle (p. 66), this was the only occasion on which he personally took part in a battle. When after the death of Sultān Muhammad (1220) his eldest son Ghiyāth al-Dīn ascended the throne, Nuṣrat al-Dīn took the side of his younger brother Djalāl al-Dīn, and for this an expedition was sent against him under Tulāk, son of Inānkhān. To save himself he sent Nasawi with 1,000 dinārs to Ghiyāth al-Dīn. After long wanderings and a two months' sojourn in Isfahān, he succeeded in giving the money to Djalāl al-Dīn's minister Sharaf al-Mulk, who then wrote a despatch to Tulāk ordering him to abandon the siege of Nasā; but this arrived too late and Nuṣrat al-Dīn had already been slain (p. 109). Nasawi did not now dare to return home but went to Djalāl al-Dīn when the latter had entered Marāgha. He was appointed by him *Kātib al-Inshā'* (p. 110) and henceforth accompanied his master on all his campaigns. When Diya' al-Mulk 'Alā' al-Dīn to escape the jealousy of the vizier Sharaf al-Mulk had himself appointed governor of Nasā he aroused such discontent there by his misgovernment that he was dismissed. Nasawi was appointed in his stead governor of his native town with the title of vizier but had to stay with Djalāl al-Dīn and sent a deputy to his governorship (p. 149).

When Djālāl al-Dīn in 1230 was surrounded by the Mongols at Hānt and fought his way out once again, Nasawī became separated from him and was kept a prisoner for two months in Āmid but finally made his way to Maiyāfāriqn where he learned of the sad end of his king who had been murdered by a Kurd on Aug. 16, 1231 (p. 245).

Ten years later in 639 (1241), he wrote the history of his sovereign entitled *Sīrat al-Sulṭān Djālāl al-Dīn Munkhshīrti*. He opens with a confused and romantic account of the early history of the Mongols and begins his subject with Muḥammad's campaign to the 'Irāk in 614 (1217). He relies for his facts mainly on the stories of high officials of his hero's court; as a result his interest is mainly in diplomatic documents and administrative measures while military matters, which were his hero's main occupation, are dealt with rather briefly. His model was apparently the *Kitāb al-Yamīni* of al-'Uṭbī which his master Nasrat al-Dīn was said to know by heart (p. 104); but he had not al-'Uṭbī's secure command of Arabic so that his style is fortunately much simpler and and more matter of fact, in spite of all his attempts at rhymed prose and plays upon words. Persian influence on his style, which Houdas claims to notice, is on the other hand nowhere marked.

NASHĀT MİRZĀ 'ABD AL-WAHHĪD of Isfahān, one of the best Persian poets and stylists of the period of the early Qājār. He was a physician in Shirāz and in his native city, devoting his leisure hours to poetry in which he displayed a great facility. He wrote verse in Arabic, Persian and Turkish and was further celebrated for his great skill in *shakar*. Rumours of his poetical gifts induced the Qājār Fath 'Alī Shāh (1797—1834) to invite him to Teherān as court poet. There Nashāt soon rose to great honour and in 1809 was appointed Munshī al-Mamālīk (secretary of state) with the title of Muṭṭam al-Dawla. In this capacity he carried through several important negotiations for the Shāh, such as the restoration of peace among the nomad tribes of Khurāsān in 1812 and 1818. Besides his own poems, he wrote an introduction to Sa'di's famous *Shāh-nāma* and drew up a whole series of important diplomatic documents. Specially celebrated is the letter written by him to George III in which he expressed regret at the interruption of the friendly relations between England and Persia. He died in 1244 (1828—1829). He collected his poems into a book published in Teherān in 1266 (1850) under the title *Ganāzina-yi Nashāt* (the "Treasury of Joy"). Nashāt's ghazels are all imitations of those of his great predecessors, particularly Hāfi; but are distinguished by elegance and simplicity, smooth rhythm and considerable depth of feeling.

Times, p. 225, 307, 311; E. Berthels, *History of Persian Literature* (in Russian), Leningrad 1928, p. 81—82; text and English transl., with commentary of 100 ghazels (for some reason only nos. 76—175) has been published by Kh. Sh. Dastur, *Divān-i Nashāt*, Bombay 1916.

(E. BERTHELS)

NASHWÂN B. SA'ID B. NASHWÂN AL-HIMYARĪ AL-YAMANĪ, an Arab philologist. The notices of this individual and his career are exceedingly scanty. In Yāqūt's *Irshād* and in Suyūṭī's *Enghya* he is described in laudatory terms in the usual phrases as a great scholar, authority on *ḥikm*, philology and *naḥw*; he was also distinguished as a historian and poet and was equally versed "in the other branches of *adab*". He compiled a dictionary entitled *Shams al-'Ulūm wa-Daw' al-'Arab min al-Kutub* in eight (according to others eighteen) volumes which his son later revised and condensed into two volumes; he also wrote a treatise on rhyme, *Kitāb al-Kawāfi*, and a book of a religious and philosophical nature, *Kitāb Hūr al-'In wa-Tanbīh al-Sāmi'n*. We know neither the year nor the place of his birth, nor with whom he studied nor in what places he lived. Only one story of his life has survived and that sounds improbable. Yāqūt says he was a great chief who besieged cities and fortresses and ruled over a hill-tribe in the Ṣabr range. Al-Suyūṭī takes this story from Yāqūt. According to al-Suyūṭī, he was a follower of the Mu'tasila. He is said to have died on the 24th *Ḥu* 1-Hijjā 573 (1117). The importance of Nashwān lies in the fact that he was particularly well acquainted with the South Arabian tradition. He took up the work of his predecessor al-Hamdānī [q.v.], the task of rescuing from oblivion the legends of the South Arabian kingdoms. He uses these as the basis of his work and gives long quotations from the writings of his predecessor. His famous so-called Himyarite *Qasida*, *al-Qasida al-Himyarīya*, is based on such traditions of the Himyarite rulers; it celebrates their deeds and the splendour of their ancient kingdom. In the commentary on this poem the annotator gives very full notes, in which he narrates legends of South Arabian princes and their history. Von Kremer supposes, relying on internal evidence, that the author of the *Qasida* and the commentator are the same person i.e. that Nashwān himself wrote the commentary on his *Qasida*. The commentator, whose name is not given, must at any rate have been very well acquainted with Himyarite tradition. In the already mentioned dictionary *Shams al-'Ulūm*, Nashwān also uses his knowledge of South Arabian history. Whether all the facts given by him are historical cannot be discussed here; many of them are certainly based on tradition, since Nashwān himself, as his *nishā* shows, was of South Arabian blood. His works played a part in the struggle of the tribes of south Arabian origin against the northern Arabs for predominance in the Muslim world.

(LSE LICHTENSTÄUTER)

NASH (A.), intercalary month, intercalation, or man on whose authority an intercalation is undertaken, a word of uncertain meaning in Sūra ix. 37 and in Muḥammad's sermon at the farewell pilgrimage (Ibn Hiṣḥām, p. 968; cf. the article **HADJĪ**). *Nashī*, *nary* and *naṣ* are variants and the word is connected with *nashā'a* to "postpone" or "add" or with *nashī'a* to "forget". In any case, it is given in Muslim tradition a meaning which brings it into connection with the method of reckoning time among the pagan Arabs. The Qur'ānic verse describes *nashī* as "a further expression of unbelief" and it is therefore forbidden to the believers.

For the meaning of the word in the calendar we have the context of the above mentioned passages where sometimes the number of months in the year is put at twelve and sometimes the number of "holy" months at four. Qur'ānic exegesis as a rule connects *nashī* with the "holy" months and explains it sometimes, it is true, as the postponement of the ḥajj from the month fixed by God for it, but sometimes, and preferably, as "transference of the sanctity of one holy month to another, in itself not holy". The expositors are also able to give the reasons for such a postponement in full detail. As a rule however, these are pure inventions in which suggestions and perhaps memories of old traditions are freely expanded. A collection of such expositions in the form of regular ḥadīths is given in Tabart, *Tafsīr*, 2nd ed., x. 91—93.

The critical examination of these explanations reveals however traces of an older conception not quite unknown to Tradition, even in the form in which we have it, according to which *nashī* means either the intercalation of an intercalary month or the month itself. This interpretation of the word is the only one really acceptable in the circumstances. The association of the pre-Islamic ḥajj with annual markets made it necessary to fix the ḥajj in a suitable season of the year. For that purpose a prolongation of the lunar year in some way was necessary and nothing contradicts that older tradition according to which it was obtained by the intercalation of an intercalary month. The lunar month was the only unit of time available for the purpose because it was the only one which the Beduins, the customers at the markets, could observe directly. Thus one had only to let them know at the ḥajj of a year whether they had to reckon to the next ḥajj twelve or thirteen months.

Definite evidence of this intercalation of a month is found in the astronomer Abū Ma'ṣar al-Balkhī (d. 272) in his *Kitāb al-Ulūf* (see *J.A.*, ser. v., vol. xi. [1858], p. 168 sqq.) and following him in al-Bīrūnī who also deals at length with this intercalation in his *Chronology* (ed. Sachau, p. 11 sq., 62 sq.). According to him, the Arabs took this intercalation from the Jews. How much in what these scholars tell us is really historical knowledge and how much intelligent reconstruction can hardly be decided. It is remarkable however

that al-Bīrūnī when dealing fully with the Jewish intercalation (*op. cit.*, p. 52, 17) connects the Hebrew word for intercalary year, *šabbūr*, with *al-shabbārāth* "pregnant woman" and observes: "they compare the addition of a superfluous month to the year to the woman carrying something which does not belong to her body". In this connection we may recall that Tabart (*op. cit.*, p. 91, 8) explains the Arabic *nashī* as *nashī* "pregnant woman" among other interpretations, saying *nashī* *al-al-ma'a*, "on account of the increase which the child in her means". This agreement in the two explanations, which can hardly be accidental, might really indicate that *nashī* in the sense of intercalation or intercalary month is modelled on the Jewish *šabbūr* and thus support al-Bīrūnī's statement which is in itself not impossible. Cassin de Perceval (*J.A.*, ser. iv., vol. i., p. 349) even quotes the Hebrew *nashī* (prince) as a title of honour of the leader of the Sanhedrin, to whom fell the duty of dealing with the intercalation (cf. *Bab. Talmud*, *Sanhedrin*, p. 11: "the intercalation of the year may only be done with the approval of the *nashī*"). According to one of the meanings of the Arabic *nashī* given in Tradition, it was really the "name of a man" (see above), a meaning which is all the more remarkable in this connection, as it does not suit the Qur'ānic passage. There is a definite agreement in the fact that in the Jewish intercalation only the month following Adar was an intercalary month while in the Arab system, as the critical examination of Tradition — contradicting the literal interpretation of its text — shows, only the month following *Ḥaḡḡ al-Hiḡḡ* i.e. the intercalated month in both cases was inserted between the normal last month and the normal first of the year, Nisān or al-Muḥarram.

Nothing certain is known about the process of intercalation among the Arabs. It can only have been periodic and irregular attempts at correction based on observation of nature, particularly vegetation. The technical part must have been exceedingly simple and primitive. The same is true of the Jewish intercalation in the older period (see *Bab. Talmud*, *op. cit.*, p. 106—13). As the Jewish system served to move the feast of Pesah to a suitable season of the year, the Arab system can only have been intended to do the same for the ḥajj and the fairs associated with it in the vicinity of Mecca. It was not intended to establish a fixed calendar to be generally observed. The Beduins had never had one and they have no use for one. According to Tradition, the management of the *nashī* was a prerogative of the Banū Kināna; and indeed fairs were held on the lands of the Kināna.

(A. Moberg)

NASHĪ (A.), the introductory lines of the Arabic *qasida* (q.v.) which are devoted to recalling the memory of a woman whom the poet loved long years before. The *nashī* is, so far as we know, the only kind of love-poem which has survived to us from the Arabic literature of the pre- and early Muhammadan period and is almost the only place where women are the subject in the poetry of the Arabs. The essential feature is that the subject of the *nashī* is always the lament of a man for a lost beloved. Even in the earliest *qasidas* that have survived the *nashī* is already

in the stereotyped form. It treats its subject again and again in the same way with only the slightest variations. We can distinguish three constantly recurring principal motives:

I. A Beduin on his wandering through the desert passes a spot where there are the traces of a tent-trench which has fallen in, dried camel dung, sooty moses, which once formed a cooking place, and tent-pots. From these things he sees that this spot has been the resting-place of wandering Beduins. After some reflection he recalls that his tribe encamped here long before, jointly with another tribe, during the spring grazing and that he himself spent a happy time with his beloved. The poet usually then gives a description of the deserted camping place, the *afāl*; it can only be traced with difficulty as the wind and the rain which has fallen upon it have obliterated it and made it almost unrecognisable. The rain has produced a rich vegetation and gazelles and antelopes with their young have found shelter there.

II. The poet recalls the day when the two tribes, his own and that of his beloved, struck camp. There had been various signs of the approaching departure. The camels were brought back from the pastures and loaded; the raven, the bird of ill omen, also foretold the separation to the poet. In his mind he again sees the camels with their litters before him and compares them to ships. The women sit in the litters, among them his beloved. They go off and he follows them in spirit.

III. While grief for his lost beloved is keeping the poet awake, she sends him from far away her *ḥajjāl*, a vision of herself. He is surprised that his delicate beloved has been able to travel so far, as she was never a good walker. The vision arouses painful memories in him and he weeps copiously as he recalls the beauty of his beloved.

Each of these three themes may be followed by a full description of the personality and journey of his beloved; she is a distinguished and modest lady, one of the noblest of her tribe; she is frequently married and sometimes even has children. Her husband is held up to ridicule. She is coquettish and likes to torment her lover. Her physical charms are described very fully and the various parts of her body celebrated in fine similes (in the style of the *ṭayf*, cf. the Song of Solomon and the *Alt-ägyptischen Liebeslieder*, ed. W. Max Müller). Her dress, her perfume and her jewellery are described in laudatory terms. The feelings of the lover are then detailed. Grief has made him old and grey; he is ill with longing for his beloved and after all these years his tears still flow at the thought of her.

Like all early Arabic poetry the *nasīb* in matter and structure follows with considerable strictness a definite chain of ideas so that there is a certain uniformity about it. We constantly find the same or similar comparisons; the ideas of the different poets do not differ essentially from one another but only the form and method of expressing them. The traces of the *afāl* look like writing made by the *ḥalam* on parchment. The girl is like a gazelle or an antelope, a simile which continuously recurs with new variations. The tears of the poet run like water from a leaky skin or fall like pearls from a necklace when the string is broken and so on. In consequence of the wealth of the Arabic language in synonyms these similes

have an ever-new charm in spite of the many repetitions. Stereotyped metonymies, such as we find in all branches of Arabic poetry, are also common in the *nasīb*. Thus the beloved, the *afāl*, the showers of rain, and parts of the body etc. are designated by metonymy. The *nasīb* usually begins (in so far as it has survived in its entirety) with formal phrases: *li-man al-diyār* etc.; frequently it ends with *ad-ḍāḥ* "leave this", whereupon the poet turns to the description of the camel.

The *nasīb* had already become fixed in form in the pre-Muhammadan period, and no poet could break away from it. Gradually its contents became more and more colourless; it became more and more stereotyped and stiff. In the old Arab poetry there is already no difference between the *nasīb* of a Beduin and that of a townsman. *Ḥais b. al-Ḥaṭm*, *Ḥassān b. Thābit* and 'Adī b. Zaid describe the beauty of their beloved in the same way as, for example, *Imra' al-Kais*, and lament their separation from her just like a Beduin poet. We must remember however that in the pre-Muhammadan period even a townsman knew Beduin life (of 'Adī b. Zaid we know that he spent a part of the year in the desert; cf. *Kitāb al-Aghāni*, Cairo 1928, II, 105). In later times however, the poets no longer knew the life of the desert from their own experience; the *nasīb* thus became more and more stereotyped. In the end it became a matter of ridicule that every *ḥasida* began with the lament at the *afāl*; a critic of the 'Abbāsid period (cf. Goldziher, *Abhandlungen*, p. 144) asks whether every man with a command of language who would write a good poem must of necessity be lovesick.

From the *nasīb* we learn of amatory relations of a kind which probably played a considerable part in pre-Islamic Arabia. These were unrestricted relations, not contracted in the forms which were already used in pre-Islamic Arabia at a marriage. They were based on natural inclination and spontaneous devotion and ended with this. As is evident from the *nasīb* such unions were usually concluded in the spring grazing season when different tribes were encamping peacefully side by side. When the end of this fine season of the year came these love affairs also came to an end as a rule. The position and the reputation of the *ḥajjāl* (as the beloved is often called) were not affected by this illegitimate relation; she remained in her tribe and went off with them, while a *ḥajjāl* did not live with her tribe.

As is the case with all Arab poetry, the question what is the oldest *nasīb* and its origin cannot be answered. Arab tradition records that Muḥallil was the first to put a *nasīb* in front of a *ḥajjāl*; this does not mean however that he was the first to compose one. In the *Kitāb al-Aghāni* (Cairo 1928), II, 123 sq.) we find a parallel to the *nasīb*. Al-Na'mān sent to King Anuṣhirwān a girl with an accompanying letter which described her merits of mind and body. In the tales of the *1001 Nights* also, *nasīb*-like poems are inserted but these are all of a comparatively late period. Many parallels may be found in the *Song of Solomon*, and old Egyptian love-poems resemble in spirit and conception and frequently often in phrase the Arabic *nasīb*.

NASHIBIN, a town in Mesopotamia. The name is certainly of Semitic origin and to be derived (with Philon Byblicos in Steph. Byz.; Müller, *F. H. G.*, iii. 571, fig. 8) from *Nāshib* = *נָשִׁיב* (*nashib*). The idol of Nashibin is said to have been called Abnīl (Assamoni, *Bibl. Orient.*, i, Rome 1719, p. 27), i.e. "stone of El" (according to W. Robertson Smith, *Religion of the Semites*, London 1927, p. 210, note 1). On coins the usual form of the place-name is *NEZIBI* (Uranios in Steph. Byz.; *Nēzibē*; Pliny, *Nat. hist.*, vi. 42; Nesebis); in the *Scriptores Historiae Augustae* and elsewhere we find the forms *Nitibi(n)*, *Nitibeni*, *Nizibi* etc. (J. Markwart, *Südarabien u. d. Tigrisquellen*, Vienna 1930, p. 259 sq., note 1). In Armenian the town is usually called *Meibin* (on the form see Markwart, *op. cit.*, p. 166 sq., note 3); Mattēos of Edessa (ed. Watarhapat, 2nd ed., 1898, p. 245 = Dulaurier's transl., p. 206) calls it *Nēpī*, also called *Meibin* or *Nēpīn* (also on p. 62 *Nēpī*). But he also mentions a *Nēpīn*, which is the town of *Sīlār* (p. 187 = p. 158, ch. xcvi. of Dulaurier's translation which (p. 413) wrongly connects these with our Nashibin and Sippara) which lies on the left bank of the Euphrates on the road from Severak or Sevaverak (Arabic Suwaida) to Hīgn Manjūr (Armen. Haršan Mēroy) (Mattēos, p. 157 = 130 Dulaurier; 186 sq. = 157 sq. Dulaurier). This *Nēpīn* corresponds to the "town of Nashibin on the bank of the Frāt, called Nashibin al-Rūm, 3—4 days journey from each of Amīl and Harrān on the road from Harrān to the land of Rūm" (Vāhik, *Futūḥ Dīyar Rabḥ wa-Dīyar Bakr*, transl. by B. G. Niebuhr, in *Schriften der Akademie von Ham.*, vol. i/iii, Hamburg 1847, p. 30, 175 sq.) mentioned along with Suwaida, i.e. Sīverek, as Nashibin al-Saghir, the name of which is marked on the Turkish General Staff's map of 1333 (1917—1918), scale 1:200,000, sheet Sīverak-Kharpūt, 20 miles almost due west of Sīverak and 1½ miles from Kanbara at a bend of the Euphrates. The Syriac authors usually identify Nashibin with the *Sōlḥā* of the Bible and say that Nimrod founded the town (Michael Syr., *Chron.*, transl. Chabot, i. 20; Barhebraeus, *Chron. Syr.*, ed. Bedjan, p. 8).

The town lay in the plain below the *Mārosv* *ḥor* [see *ḥor* *ABDIN*] on the river Mygdonios (Theophyl. Simok., ed. de Boor, v. 5, 3: *Mōyḍaw*), the *Hirmā* of the Arabs, *Nehar Māsā* or *Māshl* of the Syrians (Assyr. *Kharmish*?; Nöldeke, in *Z. D.M.G.*, xxxiii. 328), the modern *Djaghdlagh*. The country between Nashibin and the Tigris was called *Beth 'Arabāyē* by the Syrians (Theophyl. Simok., i. 13, 2: *Βεθαβαιε*, iii. 16, 1; v. 1, 2: 3, 2: *Αραβιαι*; G. Hoffmann, *Anzüge aus syr. Akten pres. Mart.*, p. 23, note 170), by the Armenians *Arvastan* (cf. *Arvastan*, in *J. A.*, 1869, p. 168; *Arvastan*-

ḥām: Justi, *Beiträge*, i. 16, 24; Marquart, *Erden-
buch*, p. 162 sq.).

The town is mentioned as early as Assyrian times under the name *Nashibina*, first, so far as we know, about 900 B.C. in the reign of Adad-nirari II (O. Schroeder, *W. F. D. O. G.*, xxxvii, N° 84, i. 41 sq.). In the period between 852 and 715 B.C. it was the capital of a province whose governors were allowed to hold the eponymate (Foerster, *Provinzeinteilung des assyr. Reiches*, p. 32, 106; Schachermeyr, article *Nashibina* in *Reallexikon d. Vorgesch.*, viii, 1927, p. 449). In the last wars of the Assyrians with the Babylonians *Nashibina* is mentioned in 612 B.C. (C. J. Gadd, *The Fall of Nineveh*, London 1923, p. 35; Cuneiform tablet, British Museum 21901, reverse, l. 48).

Seleucus I is said to have settled *Nashibis* with Greeks (*C.I.G.*, iv. 6856; Tschirikower, *Philologus*, suppl.-vol. xix., part 1, p. 89 sq.). The Macedonians called the town *Αντιόχεια ἡ ἐν τῇ Μοysiῶνι* (Strabo, xvi. 747). In the reign of Antiochus IV the town struck coins with the legend *Αντιόχεια τῆς ἐν τῇ Μοysiῶνι* (Brit. Mus., *Catal. Seleucid. Kings*, p. 42, N° 86—88; Head, *Historia Numorum*, 2, p. 815). Tigranes of Armenia took the town from the Parthians, who then held it, and put his brother Guras (*Ghor*) in command of it; in the war against him, Lucullus occupied it in 68 B.C. (Plutarch, *Luc.*, p. 32, 4 sqq.). The Armenian historians say that the town was from the middle of the second century A.C. to the beginning of our era the capital of the Arghakuniid kings and later of king Sanatruk (St. Martin, *Mémoires sur l'Arménie*, i, Paris 1818, p. 161; Marquart in Herzfeld, in *Z.D.M.G.*, lxxviii. 659 sq.). About 37 A.D. the Parthian king Artabanus III took it from the Armenians and gave it to king Irates of Adiabene (Joseph., *Ant.*, ix., 3, 2). In the period of the Parthian war of Corbulo (62 A.D.) it was Parthian or Adiabene (Tacit., *Annal.*, xv. 5). The emperor Trajan took *Nishis* again and Hadrian restored it to the Parthians (Dio Cass., lxxviii. 23). In the Parthian war of Lucius Verus, it again suffered a siege by the Romans, as a result of which a pestilence broke out in it (Lucian, *De concordi. hist.*, p. 15). The Parthians fled across the Tigris and the town then doubtless repassed into the hands of the Romans. After the victory of Septimius Severus over Pescennius Niger, the princes of Osroene and Adiabene asked that the emperor should withdraw the Roman troops from *Nishis* in return for an acknowledgment of his suzerainty (Dio Cass., lxxv. 1, 2 sqq.). The emperor then went to *Nishis* in 195 A.D. and made it the capital of a new province; it was now given the name of *Septimia Nesibi Colonia Metropolis* (Dio Cassius, lxxv. 3, 2; Hill, *Catal. of Greek Coins, Brit. Mus., Arabia, Mesopotamia and Persia*, London 1922, p. cviii sq. and 119—124; MacDonald, *Catal. of the Hunterian Collection*, iii. 315, pl. lxxix.). After the emperor's departure the governor Laetus defended the town against the attacks of the Parthians. After the assassination of Caracalla in 217 A.D. the Parthians again besieged the town but then made peace with Macrinus. The first Sassanian *Ardaysh* at once besieged *Nishis* (Zonar., xii. 13; Geogr. Synkel., p. 674). It was taken by the Persians in the reign of Maximinus but in 242 regained by Gordian III's son-in-law Timesitheus; Philip the Arabian, under whom it was given the name of *Julia Septimia Colonia Nishis Metropolis*, soon withdrew however from the whole

of Mesopotamia. Odenathus of Palmyra in 261 again took Nisibis from the Persians and destroyed it (*Histor. Aug.*, Trebellianus Pollio, *Triginta tyranni*, p. 13, 3). Diocletian made the town, which had become Roman again at the peace of 297 A.D. (Marquart, *Erzählung*, p. 169), the sole centre of trade between Persia and the Roman empire (Petr. Patric., fig. 14, in *F.H.G.*, iv, 189; *Cod. Just.*, iv, 65, 6; *Expositio totius mundi et gentium*, p. 22 in Riese, *Geogr. lat. min.*, p. 108) and one of the principal fortresses on the Mesopotamian *limes* (on the *limes* see Poidebard, *Syria*, xi, 1930, p. 33–42). In the Persian wars of Constantius, Nisibis, *Orientalis fronsimum claustrum* (Ammian. Marcell., xxv, 8, 14), was thrice besieged (338, 346 and 350 A.D.) (Peeters, *Anal. Bell.*, xxxviii, 1920, p. 285–373). During the first siege died the monk Jacob of Nisibis, the teacher of Ephraim, who had built the great church in his native town in 313 A.D.; perhaps he is to be regarded as the founder of the "Persian school" of Nisibis, which Ephraim transferred from there to Edessa in 363 as a result of the persecutions by Shapur II (on it see I. Guidi, *Gli statuti della scuola di Nisibis*, in *Giornale della Società Asiatica Italiana*, ix, 1890, p. 163–195; J.-B. Chabot, *L'école de Nisibis*, in *J.A.*, ser. ix, viii, 1896, p. 43–93; Baumstark, *Geich. d. syr. Literatur*, Bonn 1922, p. 113 sq.; Th. Hermann, *Die Schule von Nisibis vom 3.—7. Jahrh.*, in *Zeitschr. f. neutestam. Wiss.*, 1926, p. 89 sq.).

In the war of 359 Shapur II at first passed by Nisibis on his way to Tels and Amida, while the Roman army was stationed at Nisibis (Ammian. Marc., xx, 7, 1–3). After the death of Julian, Jovian had to cede among other things the great fortress of Nisibis by the peace of 363 (Ammian. Marc., xxv, 7, 91). The inhabitants were allowed to migrate to Amida (Ammian. Marc., xxv, 8, 1–9, 6; Zosim., iii, 33 sq.; Ps-Dioscorus of Tellmahré, *Chron.*, under the year 674; Syr. Vita of Ephraim, ed. Lamy, p. 24 sq.; Faustus Byz., Venice 1832, p. 26; Nau, in *R.O.C.*, ii, 1897, p. 58). They were perhaps sent on from here and settled in the above mentioned "Little Nisibis". From this time the fortress on the *limes* was Sargathion, 70 *stadia* west of Nisibis, the modern Serdije-Khan (Hönigsmann, *Syria*, x, 1929, p. 283 sq.). The Romans made frequent attacks on the lost town but always without success, for example in 421–422 A.D. after their victory at Sargathion (Socrat., *Hist. Eccl.*, vii, 18), in 503 under their general Atsobindos (Joa. Styl., ch. 54, p. 44, ed. Wright; Mich. Syr., transl. Chabot, ii, 159), in 526–527 under the Dux and Strategos Timostratos (Zach. Rhet., ix, 1, p. 256) and in 572 under Patricius Marcianus (John of Ephesus, iii, 6, 2). In the sixth century the inhabitants were still inclined to be friendly to the Romans (Ps-Zach. Rhet., vii, 5, p. 211, ed. Land). After the Nestorian academy of Edessa had been transferred to Nisibis in 489 by the Metropolitan Barsawmā as a result of the persecutions of the Nestorians in the Byzantine empire, the town remained for centuries the intellectual centre of Nestorianism (cf. also Mas'udi, *Kitaḥ al-Tanbih*, ed. de Goeje, p. 150). In the reign of Khusrav II the Church of St. Sergius in Nisibis was built (Theophyl. Simok., v, 1, 7). Sergius Strategos was held in particular veneration by the nomad tribes of this region (Nöldeke's *Tahart*, p. 284, note 1; Peeters, in

Harvardian, Vienna 1911, p. 187; Herrfeld-Sarre, *Archäol. Reus im Euphrat u. Tigrisgebiet*, i, 1911, p. 138, note 2).

In the year 18 (639) Isād b. Ghannam advanced against Nisibis which after a brief resistance submitted to the Arabs on the same terms as had been granted to al-Ruhā' (Caetani, *Annali dell' Islam*, iv, 35, 37, 55, 57, year 18 A.H., § 83, 87, 127, 129; according to al-Baladhuri, ed. de Goeje, p. 175 sq. and al-Khwarizmi, ed. Baethgen, in *Abd. f. d. Kunde d. Morgenl.*, viii/iii, 110 sq. not till the following year; cf. Caetani, *op. cit.*, p. 165, 19 A.H., § 42, 43). In the reign of 'Abd al-Malik in 684 A.D. Buraida rebelled in Nisibis (Mich. Syr., ii, 469; Barhebr., *Chron. Syr.*, ed. Bedjan, p. 111; Caetani, *Chronographia islamica*, i, 755, 65 A.H., § 15). An earthquake devastated the town in 717 (al-Khwarizmi, *op. cit.*, p. 122, year 99 A.H.). The Metropolitan Cyprianus in 758–759 completed the choir of the Church (4672) and the altar of the Cathedral of Nisibis (al-Khwarizmi, *op. cit.*, p. 128, year 141 A.H.). In the period of troubles in Mesopotamia the people of Umrā, Nisibis and Amid used to go out on plundering expeditions (Mich. Syr., iii, 103; Barhebraeus, *Chr. syr.*, p. 153). A band of Karmatians in 315 (927–928) attacked Kafartūlā, Rks al-'Ain and Nisibis (al-Mas'udi, *Kitaḥ al-Tanbih*, p. 384).

Saif al-Dawla began his campaign against Armenia in 328 (940) from Nisibis (Freytag, in *Z.D.M.G.*, x, 467). Byzantines in 331 (942) under John Korkmas invaded Mesopotamia and took Maiysfirikto, Arzan and Nisibis (Barhebraeus, *op. cit.*, p. 179; Weil, *Geich. der Chal.*, ii, 690). Nisibis by this time probably belonged to the Ḥamdānīd Naṣir al-Dawla (cf. Barhebraeus, p. 183 under the year 347 [958]; *Z.D.M.G.*, x, 482). After his death in 358 (968–969) his son Abū 'l-Muṣaffar Ḥamdān was for a short time governor of Nisibis (*Z.D.M.G.*, x, 485). The Byzantines again attacked the town under the Domesticus (the Armenian Mēh) on the 1st Muharram 362 (Oct. 12, 972) and instituted a dreadful massacre in it (Barhebraeus, p. 192; *Z.D.M.G.*, x, 486; Weil, iii, 19 sq.; Yahyā b. Sa'īd al-Antākī, ed. Krackovskiy-Vasiliev, p. 145 = *Patrol. Orient.*, xxiii, Paris 1932, p. 353 wrongly makes the Emperor John Tzimiskes himself conduct the campaign; cf. against this: I. N. Anastasievich, in *Rys. Zeitschr.*, xxx, 1929–1930, p. 403 sq.).

Toghrulbeg's army in 435 (1043) laid waste the country round Nisibis (Barhebraeus, *op. cit.*, p. 226). Salḡān Ghilyāth al-Dīn in 1106 sent Abū Manṣūr al-Djāwālī, lord of al-Mawālī, to Nisibis against the Franks (Mich. Syr., iii, 193). Soon afterwards the Ortokid Ilghazi Naḡm al-Dīn took the town (Mich. Syr., *op. cit.*; Barhebraeus, *Chron. Syr.*, p. 273) and after the Sulṭān had granted it to the emir Mawḥūd b. Altantekin (Mich. Syr., iii, 215) Ilghazi took it again in 513 (1119–1120) (*ibid.*, p. 217). But it changed hands again very soon, when in 515 (1121–1122) Sulṭān Maḥmūd gave it to the emir Burakī along with al-Mawālī, Djāstrat b. 'Omar and Sindjār (Barhebraeus, p. 283). The Franks in 523 (1128–1129) advanced as far as Amid, Nisibis and Ra's al-'Ain (Barhebraeus, p. 289). In 1134, Zangī put down a rising in Nisibis (Mich. Syr., iii, 242). Bābek, installed there as governor by Zangī himself, destroyed all the fortresses in the neighbourhood so that Zangī might have no base against him (Mich. Syr., iii, 264). Nūr al-Dīn of

Halab in 1171 took the town without opposition and dealt rigorously with the Nestorian Christians there. All their new buildings were destroyed the treasures plundered and about 1,000 volumes of their writings burned (Mich. Syr., iii. 339 sq.). After his death, his nephew Saif al-Dīn of al-Mawṣil seized the town (Mich. Syr., iii. 360). It surrendered to Salāḥ al-Dīn in 1182 (Barhebraeus, *Chron. Syr.*, p. 360). In the following year the latter gave to Imād al-Dīn Sindjār, Naṣībīn and other towns in exchange for Halab (Barhebraeus, p. 362) and he ruled there till his death in 594 (1198) (Barhebraeus, p. 398, 402). In the region of Naṣībīn there was fierce fighting in 582 (1186—1187) between Kurds and Turkomans (Barhebraeus, p. 370). Imād al-Dīn was succeeded in 1198 by his son Kuṭb al-Dīn but Nūr al-Dīn Arslānshāh of Mawṣil immediately took the town from him. But when a severe epidemic wrought great havoc in his army, he abandoned it and Kuṭb al-Dīn returned thither (Barhebraeus, p. 402). Nūr al-Dīn in 600 (1203—1204) had to break off a second siege of Naṣībīn prematurely (Barhebraeus, p. 416 sq.). Malik al-Adīl took the town in 606 (1209—1210) from Kuṭb al-Dīn (Barhebraeus, p. 424). After his death (615 = 1218—1289) it passed to Malik al-Ashraf of Ḥarfā (Barhebraeus, p. 424, 439).

The Arab geographers placed Naṣībīn in the fourth climate, the southern boundary of which ran about 12 farsakh south of the town on the direction of Sindjār (al-Mas'ūdī, *Kitaḥ al-Tanbih*, p. 32 sq., 35, 44). According to Yāqūt, it lay on the upper course of the Hirmās in the midst of numerous gardens. Ibn Hawqāl, who in 358 (968—969) visited the town which lay at the foot of Djabal Bāḥmā, speaks of the pleasant life in it, apart from the dangerous scorpions found there. Al-Maḥdī describes the fine houses and baths, the market, the Friday mosque and the citadel. Ibn Dībair also visited it in 580 (1184—1185) and mentions its gardens, the bridge over the Hirmās inside the town, the hospital (*mārisān*), several schools and other places of interest. In the viiith (xvth) century it was already for the most part in ruins; but the Friday mosque was still in existence and the gardens around it from which rose-water was exported (Ibn Bāḥmā). Ḥamd Allāh Mustawfī, according to whom the walls had a circumference of 6,500 paces, praises its fruits and wine but laments the unhealthy moistness of the climate, the large number of scorpions and the plague of midges.

Hilālī in 657 (1259) occupied al-Ruḥā, Naṣībīn and Ḥarrān (Weil, *Gesch. der Chalifen*, iv. 10). The Mongol Khān Mangū Timūr (q.v.) died, poisoned in Ḥarrān b. 'Omar, on his way from there to Naṣībīn on the 16th Muḥarram 681 (April 26, 1282; Barhebraeus, p. 546 sq.). When Timūr Khān in 1395 was on his way to Tūr 'Abdīn, the people of Naṣībīn and Ma'arra hid in caves from the Mongols but were suffocated in them with smoke (App. to Barhebraeus, *Chronography*, ed. Wallis Budge, ii. p. xxxiv.). The Ḥasanāyē Kurds in 1403 pillaged Naṣībīn and the country around (*ibid.*, p. xxxvi.).

The town passed into the hands of the Ottomans in 1515 (v. Hammer, *G. O. R.*, ii. Pest 1828, p. 449 sq.). It became the capital of a sanjak in the pashalik of Amid (Ḥadīdī Khāḥā, *Dihān-namā*, Stambul 1732, p. 438). Later it was placed in the sanjak of Mardin in the pashalik of Baghdad (St. Martin, *Mémoires sur l'Arménie*, i., Paris

1818, p. 161 sq.). To its position on the southern border of the highlands and on the road from al-Mawṣil to Syria it owes its great strategic and commercial importance. The building of the Baghdad railway has brought it new life; it is said now to have about 50,000 inhabitants.

NĀSĪF AL-YĀZIDĪ. [See AL-YĀZIDĪ.]

NĀSIKH. [See NĀSIKH.]

DAYA SHANKAR KĀUL NĀSĪM (1811—1843) was a Kāshmirī paṇḍit who studied poetics under Aṭīsh. His fame rests entirely on one poem, a romance called *Gulzar-i Nāsim*, composed when he was 22. It greatly resembles Mir Ḥasan's *Sifr al-Bayān*, and is generally awarded the second place among Urdū poetic romances. Nāsim also translated the Arabian Nights into Urdū. Nāsim is among the great Urdū mathnawī (mathnawī in the sense of poetic romance) writers, and is one of the very few Urdū authors who were Hindūs.

AL-NĀSĪR LI-DĪN ALLĀH, ABU 'L-'ABBĀS AHMAD b. AL-MUSTAḌĪ BI-AMR ALLĀH, the 34th 'Abbasid caliph (575—622 = 1180—1225), was

the son of a Turkish slave-girl named Zumurrud.

He was the only caliph of the later period of the caliphate who was able to pursue a consistent policy. This was entirely directed towards restoring the temporal power of the caliphate. The caliph was assisted by the fact that the Saljuq empire which had previously held the secular power had begun to collapse. In the confusion which brought about its final downfall, the caliph did all he could to hasten its end and did not hesitate to support the Khwārizmshāh Takash as the strongest rival of the dying Saljuq empire in his fight against the last Saljuq Sultan Tughril II. This struggle finally ended in the defeat of the Saljuqs at Ray where Tughril died fighting (Rabī' I, 590 = March 1194).

As a result of the diversity of the political aims of the two allies a quarrel broke out between the caliph and the Khwārizmshāh as soon as negotiations for the partition of the Saljuq territory were begun. The caliph wished to seize the opportunity to extend his personal estates by incorporating the Persian provinces while the Khwārizmshāh in the exercise of the temporal power wished to succeed to the whole inheritance of the Saljuqs. While Takash was involved in war in the east, Ibn al-Kamāb, the caliph's vizier, was able to conquer Khūzistān and other Persian provinces (beg. of 591 = 1195). His troops were however completely routed by Takash on his return (Shabān 592 = July 1196) so that the caliph had to abandon his conquests. Only Khūzistān was left to him.

In the years following, the caliph had a hand in the intrigues of local rulers in Persian 'Irāk, usually against the Khwārizmshāh (from 596 = 1200 'Alā' al-Dīn Muhammad). The disputes with the latter culminated in 613 (1216) when the caliph had a supporter of the Khwārizmshāh, Oghalmish, vizier of the governor of Persian 'Irāk, assassinated by Ismā'ili envoys. The Khwārizmshāh now began to prepare for the decisive struggle against the caliph; he prepared for war and in 614 (1217) invaded Persian 'Irāk. Here, in order to destroy the caliph as a political force also, he had his 'ulama' in a *fatwa* declare the caliph al-Nāsir unworthy of the caliphate and appointed an 'Alid named 'Alī' al-Mulk from Tirmidh as imam. The caliph in vain attempted through negotiations to persuade the Khwārizmshāh to retreat. Instead he advanced on Baghdad from Hamadān. But he was unable to deal his blow at the caliph owing to an unexpected circumstance; for in consequence of the early coming of a severe winter, which destroyed his army, the Khwārizmshāh was forced to abandon his march and return home with the intention of advancing on Baghdad next year.

In order to meet the danger threatening him, the caliph however in the meanwhile began negotiations with the Mongol Cingis Khān in order to persuade him to attack the Khwārizmshāh. In 616 (1219) the latter was attacked and decisively defeated by Cingis Khān before he could resume his intended campaign against Baghdad. He died while fleeing from the Mongols on an island in the Caspian Sea (617 = 1220).

The caliph had thus achieved his immediate aim and rid himself of his most dangerous opponent for the moment. But the Mongols were approaching perilously near him, especially after the conquest of Marāgha (618 = 1221) had established them

in Adharbāidjān. At first however, there were only minor complications with the Mongols.

On the other hand, after the temporary withdrawal of the Mongols, the young Khwārizmshāh Djālāl al-Dīn Mangubartī, Muhammad's son and successor, attacked al-Nāsir and took Khūzistān from him.

As al-Nāsir had concentrated his whole attention on the east where he was fighting to strengthen and increase his private domains, he took no interest in the west where Saladin was waging his great struggle with the Crusaders and gave Saladin very insufficient help in spite of several appeals from him.

Al-Nāsir's policy seems also to have aimed at the restoration of the internal unity of Islām in addition to restoring the temporal power of the caliphate. He himself had a leaning to the Shi'a of the Imāmi sect (Twelver-Shi'a) and invited Alids to his court; he seems to have wished to reconcile in his person the claims of 'Abbāsids and 'Alids. He also established an agreement with the extreme Ismā'ili sect of the Assassins. In 608 (1211-1212) the Grand Master of the Assassins, Hasan III, abandoned his claims to the imamate and paid homage to the 'Abbāsid caliph.

Al-Nāsir's efforts to centralise round his person the order of chivalry known as the *futuwwa* in a reorganised form are also perhaps connected with his political plans; in 578 (1182-1183) he had himself been admitted by the Shaikh 'Abd al-Djabbār b. Salih into the *futuwwa* order. He then only allowed those of the organisations of the order to remain in existence which acknowledged his personal control. By admission into the order he was then able to establish connections with the princes of the Muslim world, who now regarded him as the head of their order (the chroniclers tell of this in the year 607 = 1210). Ibn al-Furāt gives us a description of the robing of a prince as an external sign of his admission into the order in the presence of the caliph's envoy (the story is reproduced in v. Hammer, in *J. A.*, 3rd ser., vi., 1853, p. 285 sq.). The strict regulations introduced by the caliph into the *futuwwa* order are well illustrated in the edict of 9th Šafar 604 (Sept. 4, 1207), published by P. Kahle in the *Oppenheim-Festschrift*, which the caliph had issued on the occasion of the murder of a member of the order.

Al-Nāsir died on the last night of Ramaḍān 622 (Oct. 6, 1225) at the age of about 70. Ibn al-Athīr describes him as tyrannical towards his subjects and inconsistent in his measures; his fondness for the *futuwwa* and its sporting activities (cross-bow shooting, training carrier pigeons) seems to him a strange caprice. Ibn al-Jikāḩ judges him more favourably; he describes him as unceasingly engaged in the duties of a ruler and lays stress on his rich endowments, although he also mentions his fondness for money. When a mediæval Muslim ruler is reproached with covetousness it usually only means that he was endeavouring to carry through a sound and cautious financial policy. Al-Nāsir is further reproached with having allied himself with the Mongols and thus being the cause of the great disaster which the Mongol hordes later inflicted on the lands of Islām.

Among buildings known from inscriptions to have been built by al-Nāsir are the Talisman Gate in Baghdad (618 = 1221-1222; blown up in March 1917 on the retreat of the Turks from Baghdad) and

the sanctuary of the Mahdi (Ghaibat al-Mahdi) in Samarra. Both are interesting and suggestive for his political aims, the latter as a distinctly Shi'a sanctuary for his Shi'a tendencies and the Talmisan Gate for the remarkable pictorial representation once visible upon it; the caliph seated between two dragons, the jaws of which he is tearing apart and grasping their tongues. According to M. van Berchem's brilliant interpretation, we have here the caliph represented as victorious over two enemies, who had disputed his spiritual power: the Grand Master of the Assassins Hasan III as for a time the representative of the most radical opposition to the orthodox 'Abbasid Caliphate, who had finally paid homage to the caliph in 608 and died in 618; the other, the Khawāsimshāh who had dared in 614 to set up an anti-caliph but was overcome in 617 and died a fugitive. In this connection the inscription also is interesting; in it the caliph uses the expression *al-dā'ira al-hādīya*, which is a name the Assassins gave themselves (cf. M. van Berchem, in *J. A.*, ser. 9, vol. ix., 1897, p. 456 and 462), for his own caliphate.

AL-NĀSIR IBN 'ALIENĀS (the last name is also written 'Alnas, 'Annās and even Ghinnās by Ibn 'Idhar), fifth ruler of the Hammādid dynasty, succeeded his cousin Balukkin b. Muḥammad in 454 (1062). His reign marks the apogee of the little Berber kingdom founded by Hammād [q.v.]. The ephemeral rise of the Hammādid was the immediate result of the downfall of their relations and neighbours, the Zirids of Ifrīqiya, the first victims of the Hīlāl invasion. On his accession, al-Nāsir, who lived in the Kal'at Banī Hammād, was already ruler of a little kingdom, the chief towns of which were Ashīr [q.v.], Millana, Algiers, Hamma (Beira), Ngous and Constantine. Shortly afterwards, he regained Biskra whose governor had rebelled against Balukkin; but his chief hope of extending his territory lay in the decline of the kingdom of Kaṭrawān.

The abandonment of the old capital by the Zirid al-Mu'izz and his flight to al-Mahdiyya (1057) had left Ifrīqiya a prey to anarchy. The country districts were in the hands of the Arabs and the towns had chosen their own rulers; on all sides governors were in rebellion; leaders of the tribes imposed their authority on the threatened citizens; some towns turned to the Hammādid who were able to protect them. The people of Kaṭīliya [q.v.] for example sent a deputation to al-Nāsir to convey him their homage; the people of Tunis did the same. At their request the Hammādid sent them as governor 'Abd al-Hakk of the Sanhādja family of the Banū Khurāṣān. The latter worked wonders; he negotiated agreements with the marauding Arabs which secured the safety of the city. Later, after casting off Hammādid suzerainty, he made Tunis the capital of a kingdom.

If the arrival of the invading nomads had meant an immediate accession of strength to al-Nāsir and an increase of population and economic activity to his capital, they were not without danger as neighbours. The Arabs soon involved him in a dangerous adventure. In 457 (1064) the Aḥbadj, one of their tribes, asked him to help them against their enemies, their brethren the Riyāh, who had joined the Zirid ruler Tamīm [q.v.]. Al-Nāsir agreed, seeing an opportunity to invade and perhaps annex Ifrīqiya. He put himself at the head of a large army which included Arabs, Sanhādja, and even Zenāta, led by the king of Fās, al-Mu'izz b. 'Atīya. The Riyāh in their turn received subsidies and arms from al-Mahdiyya. The armies met at Sbiha, near the ancient Sufes. From the first the Zenāta of Fās, won over by the enemy, gave way, which resulted in the rout of al-Nāsir. With great difficulty he reached Constantine with 200 men, then the Kal'a the outskirts of which were systematically sacked by the Arabs.

After this disaster al-Nāsir tried to make terms with the prince of al-Mahdiyya; the negotiations failed, perhaps through the fault of the ambassador, and al-Nāsir incited again by the Aḥbadj, resumed hostilities against the unfortunate Zirid kingdom. He entered Larbus and Kaṭrawān (460 = 1067) but these successes led to nothing; he had to abandon them again as he could not hold his conquests. These adventures, into which he was dragged by the Arabs and which brought him no lasting advantage, lasted for some ten years. In 470 (1077) al-Nāsir made peace with the Zirid Tamīm and gave him his daughter in marriage.

The Arab scourge which had ruined the kingdom of Ifrīqiya began now to threaten seriously the Hammādid kingdom. The Zenāta, hereditary enemies of the Sanhādja lords of the Kal'a, found among the immigrant nomads allies always ready to resume the conflict. In 468 (1075), the Zenāta chief Ibn Khazrān, supported by the Arab Banū 'Adī of Tripolitania seized Milla and Ashīr. Al-Nāsir succeeded in driving him back to the desert where, drawing him into a trap, he had him murdered. He sent his son al-Manṣūr against the Zenāta Banū Taḡfin, who had joined the Banū 'Adī and were laying waste the country districts of the Central Maghrib. The rebels were caught and tortured.

The Aḥbadj Arabs themselves, of whom al-Nāsir had hoped to make valuable auxiliaries, proved most undesirable neighbours. Although he seems to have put down — not without cruelty — the majority of the revolts, life in his ancestral capital became more and more difficult from year to year. This decided him to select another. Occupying the lands of the Būḡjāya Berbers, he founded there, on the site of the ancient port of Saldā, a town which was first called al-Nāsirīya and later became known as Bougie. There he built the splendid Palace of the Pearl (Kaṣr al-Lu'lu'). "Having peopled his new capital he exempted the inhabitants from the *gharāḍī* and in 461 (1068) he settled there himself" (Ibn Khaldūn). The exodus of the Hammādid royal family to the coast was caused by the same event as had led the Zirids of Kaṭrawān to move to al-Mahdiyya: the settlement of the nomad Arabs in Barbary and the insecurity which resulted in the interior. This exodus was only completed under al-Nāsir's successor, his son al-

Manṣūr [q. v.]. The latter assumed power at his father's death in 481 (1088).

(GEORGES MARCAN)

AL-NĀSIR, the name of two Ayyūbids.

I. AL-MALIK AL-NĀSIR ṢALḪ AL-DĪN DĀWUD B. AL-MALIK AL-MU'AZZAM, born in Dīmuḍd 1603 (Dec. 1205) in Damascus. After the death of his father at the end of Dhu 'l-Ka'da 624 (Nov. 1227) Dāwud succeeded him on the throne of Damascus and the Mamlūk 'Izz al-Dīn Aibak acted as regent. Dāwud's uncles however, covetous of territory, did not leave him long in peace. Al-Malik al-Kāmil [q. v.] first of all claimed the fortress of al-Shawbak [q. v.] and when it was refused him he occupied Jerusalem, Nābulus and other places (625 = 1228). In this perilous position, Dāwud appealed to another uncle al-Malik al-Ashraf, who administered the Ayyūbid possessions in Mesopotamia. The latter came to Damascus but then took al-Kāmil's side and arranged with him a formal division of the whole kingdom. By the arrangement between the two brothers al-Ashraf was to receive Damascus and Dāwud Ḥarrān, al-Raqqa and Hims, while al-Kāmil took southern Syria with Palestine, and Ḥamāt was left to Dāwud's brother al-Malik al-Muṣaffar. But when Dāwud would not consent to this, al-Ashraf began to besiege Damascus. After al-Kāmil had concluded peace with the Emperor Frederick II he joined al-Ashraf and after a three months' siege, forced his nephew to yield (Sha'bān 626 = June–July 1229) whereupon al-Ashraf was recognised as lord of Damascus under al-Kāmil's suzerainty while Dāwud had to be content with al-Kerak [q. v.], al-Shawbak and several other places. In spite of this unfriendly treatment, Dāwud remained loyal to al-Kāmil when the other Ayyūbids [q. v.] combined against him, and entered his service in Egypt. Soon after al-Kāmil accompanied by Dāwud had taken Damascus, he died in Rajab 635 (March 1238) and Dāwud whom al-Kāmil had appointed governor of Damascus had to return to al-Kerak. In Egypt al-Kāmil's son al-Malik al-'Adil was recognised as his successor and appointed his cousin al-Malik al-Djāwūd Yūsuf governor of Damascus. When Dāwud tried to assert his claims to Damascus he was defeated at Nābulus. In the following year Yūsuf, who did not feel secure against Sulṭān al-'Adil, exchanged Damascus with his cousin al-Malik al-Ṣāliḥ Aiyūb for Sīdīyā, al-Raqqa and 'Ana. This pleased neither al-'Adil nor Dāwud so they joined forces for an attack on Aiyūb. The events that followed have already been fully related in the article AL-MALIK AL-ṢĀLIḤ NADIM AL-DĪN AİYÜB so that the reader may be referred to it. After Dāwud had lost all his possessions except al-Kerak he appointed his youngest

son al-Malik al-Mu'azzam 'Izz as his deputy and fled to Ḥalab (647 = 1249–1250) where he was kindly received by al-Malik al-Nāsir Yūsuf (see below). His private fortune in the form of valuable jewels, valued at least 100,000 dinārs, he entrusted to the care of the caliph al-Musta'īm, who acknowledged the receipt of them but never could bring himself to restore the treasure entrusted him. Soon afterwards Dāwud's two older sons, who had felt themselves neglected, turned to Sulṭān al-Malik al-Ṣāliḥ Aiyūb and offered him al-Kerak in return for fiefs in Egypt which offer the latter gladly accepted. Alleging unfavourable reports about Dāwud, al-Malik al-Nāsir Yūsuf had him brought to Hims in the beginning of Sha'bān 648 (Oct. 1250) and put under arrest. In 651 (1253–1254) he was released on the intercession of the caliph on condition that he was not to stay in any lands under the rule of al-Malik al-Nāsir Yūsuf. He therefore wanted to go to Baghdad but was not admitted into the city. He then lived for a time very wretchedly in the region of 'Ana and al-Ḥaditha until he found a place of refuge in al-Anbūr. His appeals to the caliph were not answered; finally however, the caliph obtained him permission to settle in Damascus. After several unsuccessful efforts to get back his property in Baghdad which had been confiscated, he was in the desert when he was taken prisoner by al-Malik al-Mughthi, then lord of al-Kerak and al-Shawbak and brought to al-Shawbak. As the caliph thought he could be of use to him in the impending fight with the Mongols, he sent an envoy to al-Shawbak to fetch him; the envoy was bringing him back to Damascus when he heard of Hülāgū's capture of Baghdad; he thereupon left Dāwud who went to al-Bawā'idā, a village near Damascus. Here he died of the plague on 27th Dīmuḍd 1, 657 (May 12, 1259). Abu 'l-Fida' speaks highly of Dāwud's eloquence and poetical gifts.

II. AL-MALIK AL-NĀSIR ṢALḪ AL-DĪN ABU 'L-MU'AZZAM YÜSUF, born in Ḥalab on 19th Ramaḍān 627 (Aug. 1, 1230). His father was al-Malik al-'Azzā, lord of Ḥalab, his mother Fātima, daughter of Sulṭān al-Kāmil. On 4th Rabī' 1 (Nov. 5, 1236) Yūsuf succeeded his father under the guardianship of his paternal grandmother Dā'ifa Khātūn bint al-Malik al-'Adil (see HALAB). After her death in Dīmuḍd 1 640 (Nov. 1242) Yūsuf himself assumed the reins of government and soon extended his power over most of Syria. When Aiyūb the Sulṭān of Egypt with the help of the Khwārizmians had conquered Palestine and also Damascus Yūsuf became ultimately involved in the conflict. The Khwārizmians were dissatisfied with Aiyūb, went over to al-Malik al-Ṣāliḥ Ismā'īl, lord of Ba'albek and Bosrā, and laid siege to Damascus on his behalf. The lords of Hims and Ḥalab then appeared on the scene. The Khwārizmians were completely

routed (644 = 1246) and Ismā'il had to flee to Halab and take refuge with Yūsuf [see AL-MALIK AL-KHILĪ NADJIM AL-DIN AYYUB]. In 646 (1248—1249) the latter's general Shams al-Din Lu'lu' al-Armani attacked Hims [q. v.] and after a two months' siege forced the emir al-Malik al-Ashraf to capitulate and cede the town to Yūsuf in return for Tell Bāḥir [q. v.]. Two years later, the latter conquered Naṣibin, Dāra and Karkisiyā from the Atābeg of al-Mawālī Badr al-Din Lu'lu' [see LU'LU']. After the assassination of Tūraqshāh [see AYYUBIDS] in 648 (1250), Yūsuf was made sultān by the Damascus emirs and in Rabi' II (July 1250) he entered Damascus. To avenge the murder of Tūraqshāh he prepared for war against Egypt and proposed an alliance with Louis IX of France; but these negotiations came to nothing. In Radjab of this year (Oct. 1250) the Syrians were defeated by the Egyptian emir Fāris al-Din Aḥṭai near Ghazza. Yūsuf did not lose courage however but prepared for a new attack on Egypt. In the vicinity of al-'Abbāsa [q. v.] he met the Egyptian army (Dhu'l-Ḥiǧga 648 = beg. of Feb. 1251); victory was within Yūsuf's grasp when the treachery of his Turkish mamliks turned the scale in favour of Egypt. Yūsuf had to take to flight, several Syrian princes were taken prisoners and Aḥṭai invaded Syria where he occupied Nābulus and several other important towns until a strong Syrian force finally checked his further advance. After long negotiations, peace was finally concluded at the beginning of the year 651 (1253) by which Yūsuf had to give up any claims on Egypt, but a year or two later war very nearly broke out again. On the advance of the Mongols under Hūlaǧū [q. v.], Yūsuf endeavoured to avert the danger by showing a humble frame of mind and sent envoys with presents to the Mongol camp; but when he began to calculate on getting support from other Muslim rulers and answered a threatening message from Hūlaǧū in a challenging fashion, the latter laid siege to Halab. Yūsuf seems at first to have thought of advancing against him to raise the siege. He encamped in front of Damascus and sent messengers with appeals for help in all directions but as neither Syrians nor Egyptians answered him and Halab fell into the hands of the Mongols (658 = 1260), there was nothing left for him but to abandon Damascus and go south. Hamāt, Ba'albek and Damascus were taken and Yūsuf had finally to surrender to Hūlaǧū. The latter had him executed, probably after the defeat of the Mongols at Hims towards the end of the year 659 (1261; see also the article HALAB). According to Abū 'l-Fida', Yūsuf was distinguished for his scholarship and poetical gifts; he was further kindly and good natured and fond of good living and so lacked the strength to maintain order in his kingdom.

(K. V. ZETTERSTEN)

AL-NĀSIR, the name of two Mamliks rulers.

I. AL-MALIK AL-NĀSIR NĀSIR AL-DIN MUHAM-

MAD, the ninth sultān of the Bahri Mamliks, son of Sultān Qalā'un [q. v.] and a Mongol princess named Aslun (Ashlun) Khātun. Born in the middle of Muḥarram 684 (Dec. 1285), he received homage as sultān after the assassination of his brother al-Malik al-Ashraf Khalil in Muḥarram 693 (Dec. 1293). After the two emirs Zain al-Din Ketbogha al-Manṣuri and 'Alam al-Din Sandjar al-Shudja' had agreed that the former should hold the office of administrator of the government (*niyābat al-saltana*) and the latter the visierate, these appointments were confirmed by the nine year old sultān; but the agreement between the two high officials was not long maintained. When al-Shudja' tried to get rid of his rival, he was unsuccessful and was himself killed. In order to get all the power into his own hands, Ketbogha pardoned the two murderers of Sultān Khalil, who naturally felt it necessary to overthrow Nāsir in order to escape his vengeance, and when al-Khalil's old Mamliks mutinied out of indignation, they were brought to terms by the loyal troops. Ketbogha then succeeded without much difficulty in persuading the emirs that the political situation required a man and not a child on the throne, whereupon al-Nāsir was deposed and Ketbogha proclaimed sultān with the title al-Malik al-'Adil (Muḥarram 694 = Dec. 1294). Two years later (Muḥarram 696 = Nov. 1296), Ketbogha shared the fate of his predecessor. He was succeeded by one of al-Khalil's murderers, al-Malik al-Manṣur Husām al-Din Lādjin al-Manṣuri who was murdered in Rabi' II 698 (Jan. 1299). The emirs in authority then agreed to recall the 14 year old Nāsir who was in al-Kerak and in Djamādi I (Feb. 1299) he entered the capital in order to receive for the second time the diploma of sultān from the caliph and the oath of fealty from the emirs. The actual rulers were now the administrator of the kingdom Salār al-Manṣuri and the commander-in-chief of the troops, Raku al-Din Baibars al-Djaghmagr. The most important event in the period was the war with the hereditary enemy, the Mongols. In Rabi' I, 699 (Dec. 1299) the Ilkhān Ghāzān [q. v.] crossed the Euphrates and was soon before Halab. In the same month Nāsir who had left Cairo in Dhu'l-Hiǧga 698 (Sept. 1299), because the Egyptians had long been afraid of a Mongol invasion, reached Damascus. The sultān encountered the much superior enemy near Hims, his tried emirs were defeated and the army returned to Egypt in great disorder while Hims fell into the hands of the Mongols. Damascus met the same fate, except the citadel which was bravely defended by its Egyptian commander Ardjawāsh. In the meanwhile the Egyptians were preparing with desperate energy to resume the struggle and in Radjab 699 (March-April 1300) a new army left Cairo. But when the Mongols found they could not take the citadel of Damascus, they withdrew before it came to a battle and the Egyptians reoccupied Damascus, Halab and the whole of Syria. After an unsuccessful campaign against northern Syria in Rabi' II 700 (Jan. 1301) which only resulted in the pillaging of the region visited by the Mongols, Ghāzān sent an embassy to open up peace negotiations; but as these overtures came to nothing, the decision was left to arms for the third time. In Shabān 702 (April 1303) the Mongol general Kutushāh (Kutlagshah) crossed the Euphrates and at the same time a portion of the Egyptian army under the command

of Baibars al-Djāhūr entered Damascus. On 25th Rāmāḍān (April 20), a battle was fought on the plain of Mardj al-Suffar after the rest of the Egyptian troops under Sulṭān al-Nāṣir and the caliph al-Mustaḥfi had joined Baibars. Nightfall put a stop to the desperate fighting but it was renewed next day and ended with the total defeat of the Mongols; 10,000 prisoners are said to have fallen into the hands of the victors. Ghāṣān died soon afterwards and his successor Ūldjaitū did not dare to measure his strength with his formidable opponent. For the rest al-Nāṣir's second reign was a fairly peaceful one apart from a few military enterprises of slight importance. At the beginning of the year 702 (1302), an expedition was sent against the Templars who had established themselves in the island of Arwād on the Syrian coast and harassed the mainland opposite [see TAKTŪS]. The district of Sīs [q. v.] was also invaded; its ruler had made common cause with the Ilkhān and did not send Egypt the usual tribute promptly. The Egyptian authorities were on the whole on good terms with foreign powers; on the other hand, home affairs gave cause for anxiety. After the defeat at Hims, the Beduins in Upper Egypt rebelled against the authorities and levied taxes on their own account. A large army was therefore equipped to punish the rebels. At the same time, the governor of Kūfā advanced from the south and cut off their access to the southern desert. The rebellion was put down with ruthless vigour, the men massacred without mercy, the women and children taken prisoners and property carried off. Many took refuge in caves difficult of access but they were suffocated with smoke in them. The large Christian and Jewish elements in the population had also to suffer a great deal. Several of the Umayyad, 'Abbāsid and Fātimid caliphs had already issued special regulations affecting non-Muslims and the 'Abbāsid al-Mutawakkil had gone furthest in this direction; in general however, such measures were only enforced for a short period and were therefore usually repeated after a time; at least this is true of Egypt. In al-Nāṣir's reign many Christians were holding honoured positions as officials when suddenly from some insignificant cause the secret jealousy of the Muslims flared up and in 701 (1300-1301) an edict was issued which ordered among other things that in future Christians should wear blue and Jews yellow turbans in order to be at once distinguishable from the true believers nor were they to be allowed to carry arms or ride horses. Very soon a prohibition was issued against the appointment of Christians and Jews to the offices of the sulṭān or of the emirs. The immediate consequence of this measure was that several churches were destroyed by the fanatical mob and the others remained closed until the authorities allowed them to be reopened at the demand of the Byzantine emperor and other Christian rulers. On the 23rd Dhū 'l-Hijja 703 (Aug. 8, 1303) the whole of Egypt was affected by a terrible earthquake in which not only many private houses but also palaces and mosques were destroyed and large numbers of people perished. All traces of the catastrophe were however obliterated with the greatest energy and the emirs and well-to-do citizens vied with one another in spending lavishly to restore the shattered buildings. After an unsuccessful attempt to escape from the tutelage of the two emirs

Sallār and Baibars, both of whom aimed at the sole power and regarded each other with suspicion, the sulṭān, who was prevented from exerting any influence in the government, left the capital on the 24th Rāmāḍān 708 (March 7, 1309) under the pretext that he wished to perform the pilgrimage to Mecca but went instead to al-Kerak. On reaching the citadel, he told the emirs who accompanied him that he was abandoning the pilgrimage and abdicating in order to live in peace in al-Kerak. Baibars was proclaimed his successor under the title al-Malik al-Muṣaffar on the 23rd Shawwāl (April 5, 1309) while Sallār remained in office as administrator. Baibars however enjoyed no real popularity; an oppressive rise in prices made him hated among the people who without justice blamed him for the difficult times. Sallār was intriguing secretly and al-Nāṣir was vigorously adding to the number of his followers in Syria. When Baibars heard that al-Nāṣir had entered Damascus and the Syrian emirs had gone over to him, there was nothing left for him but to abdicate and appeal for mercy to his rival. The latter pardoned him and even offered him the lordship of Ṣihyawn [q. v.]. But after he had made his entry into Cairo al-Nāṣir had Baibars strangled (beg. of Shawwāl 709 = March 1310). Very soon afterwards, Sallār was also disposed of; he died of starvation in prison. The Mongols not long after this resumed hostilities. Two emirs who did not feel safe with the sulṭān went to the Ilkhān Ūldjaitū and urged him to invade Syria. The Mongol expedition did not however go beyond the siege of the town of al-Rahba (Rāmāḍān 712 = Jan. 1313). When the Mongols saw that their efforts were unavailing, they abandoned their plan of campaign and retired. At the beginning of the year 715 (1315) a campaign was undertaken against Malatya, on the course of which see the article MALATYA. At the same time, the lord of Sīs had to cede several strongholds and increase his annual tribute. Little Armenia was several times invaded by the Mamluks who wrought great havoc there. In Mecca the sons of the Sharif Abū Numayr [q. v.] were engaged in a prolonged struggle for supremacy; as the Mamluk sulṭāns claimed to exercise a kind of suzerainty over the two holy cities, al-Nāṣir intervened without however playing any very effective part. His authority was recognised in Madīna in 717 (1317) and when he intervened in the domestic troubles of the Yaman and sent troops thither to support al-Mudjahhid, one of the pretenders to the South Arabian throne, he was assisted by the Meccans (725 = 1325). In the meanwhile, the situation had improved in favour of al-Mudjahhid so that the troops sent to his help by al-Nāṣir had to return amid great hardships after achieving nothing. Al-Nāṣir also tried to extend his power into Nubia. For this purpose he sent in 716 (1316-1317) a Nubian prince named Abū 'Allāh, who had been converted to Islam and brought up in Egypt, with an army to put him on the throne. He succeeded in driving out the legitimate heir but the latter was able after a time to return and expel the intruder 'Abū 'Allāh whose tyrannical rule had made him generally hated. Al-Nāṣir was more successful in N. W. Africa; in 711-717 (1311-1317) he was mentioned as sulṭān in the khutba in the pulpits of Tunis, whose ruler, the Hafsid Abū Zakariyā' Yahyā, owed his throne to him. In 723 (1323) he finally concluded peace with the Ilkhān

Abū Saʿīd. After the latter's death in Rabīʿ II 736 (Nov. 1335), Ḥasan Buzurg pledged himself to recognise al-Nāṣir's suzerainty if the latter would support him with an armed force. Al-Nāṣir, who was a better diplomat than soldier and had not the courage to intervene at the decisive moment, did not fulfil the condition. Al-Nāṣir had diplomatic relations with most of the rest of the known world and at his court appeared embassies not only from the Golden Horde, the Ilkhāns, the Rāṣulids of Yaman, the king of Abyssinia, and the Ḥafṣids of Tunis, but also from the Emperor of Byzantium, the Czar of Bulgaria, the Pope, the King of Aragon, Philip VI of France and Sultān Muḥammad b. Tughluq of Dihlī. Al-Nāṣir died in Dhū l-Ḥijja 741 (June 1341); he left eight sons, who reigned one after the other but were themselves ruled by the emirs who were usually quarrelling among themselves. His immediate successor on the throne was al-Malik al-Manṣūr Saif al-Dīn Abū Bakr, who was deposed after only two months in favour of another son of the late sultān.

In al-Nāṣir's third reign the position of the Christians improved, and he frequently tried to alleviate their hard lot, although his efforts sometimes failed against the stubborn opposition of the Muslim clergy. The ordinances of the period when Sallār and Balbārs were the real rulers were at least not enforced to the full extent and we even find that the sultān put Christians, i.e. Copts, into the government offices, presumably simply because they were cleverer and more wily than the Muslims. Men of learning were treated with a benevolent interest, and the Ayyūbid Abū l-Fidāʾ (q.v.), celebrated as a historian and geographer, was the sultān's trusted friend "perhaps the only one among all the nobles whom al-Nāṣir treated till his death with equal love and respect" (Weil, iv. 400). Al-Nāṣir further abolished many taxes which oppressed the people. He built canals and roads and carried out other public works for the improvement of means of transport. Architecture in particular flourished exceedingly; among the splendid buildings which date from his reign special mention may be made of al-Kaṣr al-Aḥlāq, al-Madrasa al-Nāṣiriyya, and Dīwān al-Nāṣir. These works however cost large sums of money and there were really no bounds to his extravagance. He was able through his long reign to maintain the Mamlūk state in its place among the great powers, and he was also able to make his authority felt at home. In some respects he reminds one of Sultān Balbār I; like the latter he was little scrupulous in his choice of means. To undeniable gifts he added suspicion, covetousness and a revengeful nature, and it has been observed, undoubtedly with justice, that al-Nāṣir inspired more awe than respect.

Reiske, v. 85, 117, 133, 155, 199; Makrizi, transl. by Quatremère, *Histoire des sultans Mameluks de l'Égypte*, ii. 2; Ibn Khaldūn, *al-ʿIbar*, v. 406 199; Ibn Yās, *Tārīkh Miṣr*, i. 129 199; Zettersteed, *Beiträge zur Geschichte der Mamluken-sultane*, see index; Weil, *Gesch. d. Chalifen*, iv. 191 199; Stanley Lane-Poole, *A History of Egypt in the Middle Ages*, p. 248, 276, 284, 288, 289, 292, 294–317, 342, 344; see also the article MAMLUKA.

II. AL-MALIK AL-NĀSIR NĀSIR AL-DĪN ḤASAN, the nineteenth sultān of the Bahri Mamlūks, son

of the preceding. After the murder of his brother al-Malik al-Manṣūr Saif al-Dīn Ḥādīdī, Ḥasan who was then only eleven, or, according to others, thirteen years old was proclaimed sultān on the 14th Ramaḍān 748 (Dec. 18, 1347). Another son of the sultān al-Malik al-Nāṣir Muḥammad b. Kalāʾūn, called Ḥusain, was also put forward but this plan fell through and he never attained the throne at a later date. More important than the elevation of this minor prince to the throne was of course the distribution of the high offices of state among the emirs; the emir Balboghā Arwās became administrator of the kingdom, his brother Mendjek al-Yūsuf vizier, and the chief emir Shaikhū, Atābeg of al-Malik al-Salīh Salāh al-Dīn Salāh (q.v.), afterwards sultān. Thanks to Balboghā's adroit policy, al-Nāṣir was able to survive for four years, although, except for the last few months, he exercised no influence worth mentioning on affairs of state. His reign was filled with unedifying quarrels among the ruling emirs and systematic raiding by the Beduins. The most noteworthy event of the period was however the visitation of a great part of the world by the devastating pestilence, which, known in Europe as the "Black Death", spread from Asia through Egypt and over almost all Europe to England and Scandinavia. In Egypt the plague raged in the second half of the year 749 (1348–1349) being accompanied by a no less fatal cattle-plague. In Syria it had appeared a few months earlier. Everywhere countless men fell victims to the angel of death and it is not surprising that the political and economic life of the state was crippled. The plague only died down in the following year. In Shawwāl 751 (Dec. 1350) the sultān succeeded in getting rid of the most powerful emirs and taking the reins of government into his own hands, but after a very few months he was deposed and his brother al-Malik al-Salīh Salāh al-Dīn Salāh, the eighth of the sons of sultān Muḥammad b. Kalāʾūn, was placed on the throne (Djumādī II 752 = Aug. 1351). He ruled only for three years; on the 2nd Shawwāl 755 (Oct. 20, 1354) he was deposed and his brother al-Nāṣir restored. The real ruler at first was Shaikhū; but in 758 (1357) the latter was waylaid and so severely wounded that he died a few months later. His successor Sarghatmish, who was suspected of having instigated the murder, did not allow the sultān the slightest independence, but was however arrested in Ramaḍān 759 (Aug.–Sept. 1358). In Muḥarram 761 (Nov.–Dec. 1359) the governor of Ḥalab undertook an expedition against Sis and established Muslim garrisons in Adana and Tarsus. About the same time, the troops who had been sent to Mecca by the Egyptian government to settle the endless family feuds there were defeated by the Meccans and those taken prisoners sold in Yanbuʾ as slaves. On hearing this the sultān is said to have sworn to exterminate the sharifs completely; but before he could carry out this plan, he was himself deposed. For, as he wished to preserve his independence, he quarrelled with the powerful emir Yalbhoghā, who had reproached him with his extravagance. The latter combined with several other dissatisfied emirs and prepared to fight. Al-Nāṣir was defeated and had to abandon his plan of escaping secretly to Syria. Instead he was taken prisoner and handed over to his enemy Yalbhoghā (Djumādī I 762 = March 1361). His ultimate fate is unknown; according to one, in

itself quite credible, story he was strangled and his body thrown into the Nile. His mosque (*Ḍiḡmī* *Sullām Ḥasan*) built in Cairo in the years 1356-1363 is considered the most important example of Egyptian-Arabic architecture.

(K. V. ZETTERSTEEN)

AL-NĀSIR, honorific of the fourth sovereign of the Maghribi dynasty of the Mu'minids or Almoḡhads [q. v.], **ABU ʿABD ALLĀH MUḤAMMAD B. YAʿQUB AL-MANŠUR B. ʿUSUF B. ʿABD AL-MUʿMIN**. He was proclaimed on the death of his father on the 22nd Rabiʿ I 595 (Jan. 25, 1199). The beginning of his reign was marked by the suppression of a rising led by an agitator in the mountainous country of the Ghumāra and a long stay at Fās during which he rebuilt a part of the wall of the *ḡḡḡḡ* of this city. Hearing of the rising of Yahyā b. Ishāḡ Ibn Ghāniya in Ifriḡiya, he set out for the eastern part of his empire and laid siege to the town of Mahdiyya [q. v.] which was taken on the 27th Djuḡmāda I 602 (Jan. 9, 1206). He returned to Morocco in the following year leaving as his deputy in Ifriḡiya the shaikh Abū Muḡhammad ʿAbd al-Wāḡid b. Abi Ḥafḡ al-Hināḡḡi, ancestor of the Hafsids [q. v.]. At the same time, he sent from Algiers against Majorca [cf. BALEARIC ISLANDS], which had belonged to the Banū Ghāniya since the period of the last Almoravids, a fleet which took the island; this remained in Muslim hands till 627 (1230). In 607 (1211) al-Nāsir sent an expedition to Spain which ended in a disaster to the Muslim troops in front of Hīḡn al-ʿIḡḡab or las Navas de Tolosa [q. v.] on 15th Ṣafar 609 (July 16, 1212). This severe reverse deeply affected al-Nāsir who returned to Morocco and made his subjects take the oath of allegiance to his son Yūsuf. He then retired to his palace. He died in Ribḡḡ al-Faḡḡ (Rabat, q. v.) on 10th Shaʿḡān 610 (Dec. 25, 1213). According to some chroniclers, he died a violent death on the same date in Marrāḡḡḡḡ, his capital, the victim of a conspiracy hatched by his visiers.

Bibliography: cf. the article **ALMOḡHADS**.
(E. LÉVI-PROVENÇAL)

AL-NĀSIR. [See **UTRUGH**.]

AL-NĀSIR LI-DIN ALLĀH, official name of several Zaidi imāms.

I. Among the Caspian Zaidis this title was borne by 1. **AL-NĀSIR AL-KARīm AL-UTRUGH** [q. v.] and his great-grandson 2. **AL-NĀSIR AL-ṢAGHİR AL-ḤUSAYN B. AL-ḤASAN B. AL-ḤASAN B. ʿALL**. The latter gained for himself a dominion beginning in Hawsam, where he could find associations with the earlier period of Zaidi rule. He laid great emphasis on the religious character of Zaidism; he gave out of the state treasury funds to support people who learned the Qurʾān by heart. He was also a poet. After his death (476=1083), his tomb in Hawsam was a much visited place of pilgrimage.

II. Among the Yaman imāms this title was borne by 1. **AL-NĀSIR AḤMAD**, son of al-Ḥādī Yahyā and his brother's daughter Fāḡima. In the heavy fighting which the father had to wage in order to found the new state, Aḡmad had been more distinguished than his elder full brother Muḡhammad. Homage was, it is true, paid first to

the latter as al-Martaḡḡ shortly after the death of al-Ḥādī (289=911); but after 6 months he abdicated as he could make no progress against the Ḳarmāḡian ʿAlī b. Faḡḡl, and suggested as his successor the vigorous Aḡmad, whom the Banū Ḳhawḡḡ especially favoured. As a poem composed when allegiance was sworn to him in Ṣafar 301 (Aug.-Sept. 913) challenged him to do, he made war on the Ḳarmāḡians his first duty and played a considerable part at least in damming back the threatened Islamisation of the Yaman. He died at Ṣaʿda, probably in 315 (927); his tomb is there. All succeeding bearers of the title except the next one: 2. **ABU ʿL-FATH AL-NĀSIR AL-DĀLAMĪ**, so called from his first Caspian sphere of activity, were of his family although of different lines. In the Yaman, in contrast to his predecessors, he began operations south of Ṣanʿā, fell in 447 (1055) fighting ʿAlī al-Ṣulāḡḡ there and was buried near Dhamār. The life of 3. **AL-NĀSIR ṢALḲY AL-DIN** was marked by internal strife which ultimately caused his death. In the first half of the viiith (xivth) century, several imāms had disputed the succession. About the middle of the century, his father al-Mahḡḡ ʿAlī b. Muḡhammad attained considerable influence, which was however much reduced in the period before his death at Dhamār in 774 (1372). Ṣalḡḡ al-Din became sole imām and advanced as far as the Tihāma against the Rasūḡids [q. v.]. But when in 793 (1391) he died at Ṣanʿā, his death was concealed for two months on account of the insecurity and his body was concealed in the castle in a coffin covered with plaster. It was only when rumours of his death reached the Ḳāḡḡ al-Dawwār in Ṣaʿda that the latter arranged for his burial in Ṣanʿā. The son ʿAlī b. Ṣalḡḡ al-Din could only obtain recognition as ʿImām of the Dḡḡḡ and fell in 840 (1336), one of the many victims of the great plague. When in spite of opposition a Zaidi power was once more built up, it was destroyed by the young dynasty of the Ṭāḡirids from the Tihāma (850-923=1446-1517), especially by its second member ʿAbd al-Waḡḡḡ b. Dāwūd, from 885 (1478), until at the end of the ixth (xvth) century Al-Ḥādī ʿIzz al-Din b. al-Ḥasan again reestablished and extended their power. His son 4. **AL-NĀSIR AL-ḤASAN B. ʿIZZ AL-DIN** (c. 900-929=1494-1523) who had primarily inherited from his father a love of learning, could only maintain a limited power in the north. He had to put up for a long time with an anti-imām al-Manḡḡḡ Muḡhammad b. ʿAlī al-Saʿḡḡḡ in Ṣanʿā. 5. **AL-NĀSIR AL-ḤASAN B. ʿALI B. DĀWUD** at the end of the xth (xvith) century organised in the north one of the centres of resistance to the Turks who had been penetrating into the country since 927 (1521) and 943 (1536) but was taken prisoner by them in 1004 (1596-1597). Among the pretenders within the family of al-Manḡḡḡ b. al-Ḳāḡīm (d. 1029=1620), the liberator from the first Turkish conquest, was 6. **AL-NĀSIR MUḡHAMMAD B. ISḲĀḡ B. AL-MAḡḡḡ AḡMAD**; he set up first in 1136 (1723-1724) in the north in the hills of Sufyān among the Banū Bakīl, then in 1139 (1726-1727) away in the south at Ṣafar but had finally to submit to his cousin's son al-Manḡḡḡ al-Ḥusayn b. al-Ḳāḡīm b. al-Ḥasan b. al-Mahḡḡ Aḡmad and died in 1167 (1753) as a private individual in Ṣanʿā. In 1252 (1836) the dissatisfied troops who had been discharged by the very extravagant imām al-Manḡḡḡ ʿAlī b. al-Mahḡḡ ʿAbd Allāh

summoned 7. AL-NĀSIR 'ABD ALLĀH B. ḤASAN to the imānate. He had inherited strong religious tendencies from his grandfather al-Mutawakkil al-Ma'mun and from his great grandfather al-Mahdi 'Abd Allāh and insisted on the strict observance of the neglected shari'a. He had even to appoint teachers to instruct in the divine service. He was ambushed and murdered with 6 followers in 1256 (1840) while on a peaceful excursion to the Wādī Ḥaṣr northwest of Ṣan'a' by people of the Banū Ḥamdān and was succeeded by the brother of his predecessor, al-Ḥādī Muḥammad b. al-Mahdi 'Abd Allāh b. Ḥasan. — As required of an imām, most of the above wrote a great deal; a number of works, chiefly of a legal nature, have survived, mainly by the earlier Yamān imāms.

(R. STROTHMANN)

NĀSIR 'ALĪ of Sarhind (d. in Dihlī on the 6th Ramaḍān 1108 = March 29, 1697), one of the best of the Persian poets of India, who were by this time very numerous; their productions however are for the most part of little artistic value. Of his life we know only that he travelled a great deal but finally settled in Sarhind where he enjoyed the favour of the governor Saif Khān Badakhshī and of the Amīr al-Umārā' Dhu 'l-Fikar Khān. His principal work is a version of the love story of Madhumalar and Manūhar in Persian verse, the original having been written in Hindi by Shaikh Djamāl. The same subject was taken after Nāṣir 'Alī by Mir 'Askar 'Adil Khān Rātī (d. 1696), one of the governors of Delhi under 'Ālamgir (1659—1707), who called his poem *Mīr u-Māh*. Besides the poem Nāṣir 'Alī wrote a short mathnawī, Ṣafī in character, and a description of Kāshmir both of which still survive. His lyrical *Dīwān* was collected by his friends after his death; it consisted of the usual ghazels, some *Safī-nāma*'s and poems in praise of the Kalandar dervishes (lith. Lucknow 1244 and 1251 and Cawnpore 1892).

Bibliography: H. Ethé, *G.I.P.*, ii, 252, 310; V. Ivanow, *Cursus Collection Cat.*, No. 278—279 and *Asiatic Society of Bengal Coll.*, No. 813—817. There are MSS. in most European libraries.

(E. BRETHELS)

NĀSIR AL-DAWLA ABU MUḤAMMAD AL-ḤASAN a. 'ABD ALLĀH, a prince of the Ḥamdānīd dynasty [q. v.]. From the year 308 (920—921) he acted as lieutenant to his father, Abu 'l-Ḥaiḍja 'Abd Allāh [q. v.], in the governorship of al-Mawṣil, and on the latter's death in 317 (929) succeeded to the leadership of the Ḥamdānīd family. Owing to the part played by Abu 'l-Ḥaiḍja' in the second temporary deposition of the 'Abbāsid caliph al-Mu'taḍi [q. v.], the latter, on his restoration, attempted to put an end to the Ḥamdānīds' control of al-Mawṣil by appointing a governor unconnected with them. Nevertheless when this officer died during the same year, al-Ḥasan was confirmed in all his father's holdings.

The Ḥamdānīds profited by the rapid decline in the power of the 'Abbāsid dynasty that set in from this time to extend their rule; and though they remained tributary to the caliphs, by 332 (943—944) they had secured control of most of the Ḥarām and of northern Syria. Al-Ḥasan also made two unsuccessful attempts, in 322 (934) and 326 (938), to add Adharbāydjān to his dominions. During

the early part of this period of expansion al-Ḥasan was much occupied in the suppression of local rebellions. He was anxious also to remain in the caliph's good graces, and for this reason declined to assist the general Mu'nis [q. v.] in his quarrel with al-Mu'taḍi, which ended in the latter's death. In 323 (935), however, the caliph al-Rāḍī attempted to displace him in the governorship of al-Mawṣil in favour of his uncle Sa'īd. Al-Ḥasan thereupon had Sa'īd murdered; and though al-Rāḍī at first sought to impose his will by force of arms, he was in the end obliged to agree to al-Ḥasan's restoration.

The reign of al-Rāḍī saw the final collapse of the traditional 'Abbāsid system of government with the appointment of Ibn Rā'ik as *amīr al-umārā'* [q. v.]. This development resulted in a still greater weakening of the caliphs' power; and in 327 (938—939) al-Ḥasan made an attempt to withhold his dues, which, however, were promptly exacted by Ibn Rā'ik's successor, Badjkam [q. v.]. In 330 (941—942), again, when the caliph al-Muttaḥ [q. v.] and Ibn Rā'ik (who had meanwhile been restored) fled to al-Mawṣil from Baghdad on its occupation by the brothers al-Baridī [q. v.], al-Ḥasan had Ibn Rā'ik assassinated, forced the caliph to give him the amirate together with the *ḥaṣn* Nāṣir al-Dawla, and later married his daughter to the caliph's son. But though he and his more celebrated brother 'Alī, who was at the same time entitled Saif al-Dawla [q. v.], were able to restore al-Muttaḥ to his capital and drive the Baridīs back to al-Basra, they were almost immediately obliged by a revolt of the Turkish troops under Tūṣūn [q. v.] to retire again to al-Mawṣil. Al-Muttaḥ now appointed Tūṣūn *amīr* in Nāṣir al-Dawla's place. But his evident helplessness encouraged Tūṣūn to abuse his power; and in 332 (943—944) the caliph again sought refuge with the Ḥamdānīds. Saif al-Dawla now tried, though without success, to defeat Tūṣūn in battle, while al-Ḥasan removed the caliph for greater safety from al-Mawṣil to Raḥka. After some months, however, al-Muttaḥ was persuaded by Tūṣūn's professions of loyalty into returning to Baghdad, only to be met on the way by the *amīr*, who blinded and deposed him. On this Nāṣir again withheld his dues. But Tūṣūn and al-Muttaḥ [q. v.], the new caliph, came against him and forced him to pay. Tūṣūn, however, died in 334 (945—946), whereupon Nāṣir made a bid to recover the amirate. But later in this same year Baghdad was occupied by Ahmad b. Būyeh Mu'izz al-Dawla [q. v.]; and henceforward Nāṣir's career hinged chiefly upon the maintenance of his power against that of the Būyids.

The struggle began immediately. As soon as he was established in Baghdad Mu'izz al-Dawla led an expedition against the Ḥamdānīds, and though Nāṣir al-Dawla forced him to return to the capital by himself occupying the east bank and blockading the Round City, in the end he drove the Ḥamdānīd forces out. Nāṣir retired to 'Ukbara, and from there sued for a peace that should grant him the tributary lordship of all the country north of Takrit, as well as Syria and Egypt. But a revolt among his Turkish troops forced him to flee before this was concluded, and it was only by the aid of a force sent by Mu'izz that he succeeded in suppressing it. Mu'izz's object in helping him was no doubt to preserve some order in the Ḥamdānīd

dominions until he should be ready to absorb them. For he now took one of Nāsir's sons as a hostage for his obedience, and two years later led another expedition against al-Mawṣil. This again came to nothing, however, since Mu'izz was obliged to make peace before attaining his object, owing to the outbreak of trouble in Persia, where his brother required his assistance. Nāsir now agreed to pay tribute for Diyār Rabi'a, the Ḥuzra and Syria, and to have the names of the three Būyids pronounced in the *ḥuṭba* after that of the caliph throughout this territory.

It was not till 345 (956-957) that further trouble arose between the rival potentates. In that year Mu'izz was called away from Baghdad to deal with a revolt, whereupon Nāsir sent two of his sons to occupy the capital. Mu'izz, however, succeeded in overcoming the rebel; and on his return the Ḥamdānids decamped. Yet in spite of this provocation Mu'izz contented himself with exacting an indemnity and a renewal of Nāsir's contract to pay tribute, and it was only when Nāsir withheld the second year's payment that he took further steps against him. He then advanced into his territory, took al-Mawṣil and Niṣibin, and finally sent a force to al-Raḥba. Nāsir, who had fled first to Maiyāfāriḳin and then to Aleppo, which was now held independently by Saif, attempted to make peace. But Mu'izz rejected his advances, and came to an agreement only when Saif offered to take his brother's place as tributary for al-Mawṣil, Diyār Rabi'a and al-Raḥba.

Five years later, in 353 (964), Nāsir opened negotiations to recover his position as tributary for these territories. But he included in his demands one, for the recognition of his son Abū Taghlib al-Ḥaḍanfar [q. v.] as his successor, which Mu'izz was unwilling to grant. He again attacked the Ḥamdānids, occupying both al-Mawṣil and Niṣibin. But they were more successful in withstanding him on this occasion; and an agreement was arrived at whereby Abū Taghlib undertook the payment of tribute for his father's former holdings.

In 356 (967) both Mu'izz and Saif died. Almost the last action recorded of Nāsir is the advice he then gave his sons to refrain from attacking Mu'izz's son and successor Balḫitīyār till he should have exhausted the resources bequeathed to him. For on the death of Saif, to whom he had been much attached, Nāsir lost all interest in life, and so antagonized his family by his avarice that they resolved to take the control of affairs into their own hands. Abū Taghlib, who had in any case taken his place as tributary, and his mother, Nāsir's Kurdish wife Fāṭima bint Aḥmad, contrived to gain possession of all his property and fortresses; and when Nāsir attempted to enlist the help of another son, they imprisoned him in the castle of al-Salāma in the fortress of Ardūmashūt. He died, still in confinement, either the next year, 357 (968), or the year after.

Nāsir al-Dawla's rule was disastrous for the territory over which he had control. The contemporary Ibn Hawḳal [q. v.] refers in several passages to his ruinous exactions and tyrannical seizures of land (see his descriptions of al-Mawṣil, Balāḥ, Sindjār and Niḡibin). And Miskawaih notes that by bringing fictitious claims against landowners he would force them to sell to him at low prices, till he became not only the lord, but also the owner, of most of the region of al-Mawṣil.

NĀSIR-I KHUSRAW, whose full name was ABU MU'IN NĀSIR b. KHUSRAW b. HAKIM, one of the most important Persian poets of the 11th century.

Life. Nāsir was born in 394 (1003) in Kūbādīyān in the district of Balkh. The Persian historians usually call him 'Alawī which in this case can hardly mean descent from the caliph 'Alī but simply indicates his adherence to the Shī'a. His father was probably a small landowner in the vicinity of Balkh. Nāsir received a good education and was early acquainted with almost all branches of the learning of his day. In the forties of the 11th century we find him as an official in Marw where, according to his own confession, he led a rather dissolute life. In 1045 however, a sudden change came over him, the real reasons for which are unknown, but which Nāsir himself explained by a prophetic dream. He decided to give up his position and all his pleasures and went on pilgrimage to Mecca on which he visited the Ka'ba four times. This journey had important results for Nāsir. He left Persia at a difficult period, when the country was being laid waste by the continued wars between the various princes. He found the same wretched picture in all the other Muslim countries which he had to traverse on his journey. Only Egypt proved a pleasing exception; there he saw prosperity, rich bazaars, harmony and tranquillity. As the Ismā'īlī dynasty of the Fāṭimids were ruling in Egypt at this time, Nāsir concluded that Islām had diverged from the true path and that only Ismā'īlism could save the true believers from inevitable ruin. Nāsir made the acquaintance of several Ismā'īlī dignitaries, joined their sect and finally received the blessing of the caliph al-Mustanzir (1036-1094) in order to spread the new teaching in his native Ḳhurasān. He was consecrated as a *ḥafṣiyya*, a fairly high official in the complicated Ismā'īlī hierarchy. Returning to Balkh he devoted himself with the greatest zeal to his new task. But the Saldjūqs who ruled the land soon became convinced that Nāsir's activity was a serious threat to them. He was persecuted and had to flee from Balkh. He went first to Mīrāndarūn but found that this also was not safe enough and was finally forced as a last resort to take refuge in the Yungūn valley among the inaccessible mountains of Badakhshān. There in these poor and inhospitable highlands the aged poet spent his last years; there his most important works were written and there he died in 1060 or 1061 (452-453). Down to the present

day there has survived in this region a little sect known as the Nāṣiriya, which owes its origin to the "saint Shō Nosir" and tells fantastic stories about its founder.

Works. Nāṣir's works were probably very numerous but have survived only in very imperfect and corrupt form. The most important is the great philosophical *Divān*, which was composed in the miserable years of his exile. The artistic value of his poems is not especially high, the style is often clumsy and awkward but the philosophical matter which still awaits its investigator is of very great importance for the history of Persian literature. It is a complete encyclopedia of Ismā'īlī teaching but of course unsystematic and disconnected. From the linguistic standpoint also the work is of extraordinary interest. A good edition of the Persian text appeared in Teherān in 1928. Two not very long didactic poems are appended to the *Divān*: *Rūḥanī-nāma*, which presents a whole philosophic system having an undeniable similarity with the teaching of Avicenna, and *Ṣa'ādāt-nāma* which sharply criticises the aristocracy of the kingdom and praises the peasant, "the nourisher of every living creature".

The best known of Nāṣir's prose works is the *Safar-nāma*, a description of his pilgrimage to Mecca which is an exceedingly valuable source of the most varied information. Unfortunately this work has come down to us only in a very mutilated form and has probably been edited by a Sunnī hand. The other works of Nāṣir are mainly Ismā'īlī textbooks. Among them first place should be given to the *Zād al-Muṣāfirin*. It is an encyclopedia of a special character which deals with the most varied questions of a metaphysical and cosmographical nature. A good edition of the Persian text was published in Berlin in 1923 (Kaviani). No less important is the *Wajḥ-i Dīn*, an introduction to Ismā'īlī beliefs by means of quotations from the Qur'ān cleverly put together. A number of other similar pamphlets like *Umm al-Kitāb*, which were quite recently fairly widely disseminated among Ismā'īlīs of the Pamirs are credited to our author but so far nothing definite has been ascertained about their authenticity.

Although a considerable portion of Nāṣir's works is now available in good editions, one cannot yet assert that sufficient light has been thrown upon his striking personality. It would be particularly valuable if his philosophical system could be studied as it is of far reaching importance for the history of thought in Persia.

Toussaint, (*Z. D. M. G.*, xxxvi. 96-114); Ch. Schefer, *Sefer Namesh* (text and transl. with introduction), Paris 1881; this edition is now somewhat obsolete and it is advisable to use for the text the new edition, Berlin 1923 (Kaviani), which also gives as an appendix the text of the *Rūḥanī-nāma*

and of the *Ṣa'ādāt-nāma*. — Translations: Guy Le Strange, *Nāṣir-i Khusrāw, Diary of a Journey through Syria and Palestine*, London 1888; A. P. Fuller, *Account of Jerusalem* (*J. R. A. S.*, 1872, p. 142-164); E. Berthels, *Safar-nāma* (Russian), Leningrad 1933. — In addition to the new edition of the *Divān*, already mentioned there is also an oldest lithographed text, Tabriz 1280. A *Tarǧūm* hand, the authenticity of which is doubtful, has been publ. with Russian transl. by V. Zhukovski, in *Zapiski* (iv. 386-393). Text of the *Wajḥ-i Dīn* pr. Berlin 1925 (Kaviani). (E. BERTHELS)

AL-NĀSĪRA, Nazareth, the home of Jesus, lies in a depression sloping to the south surrounded by hills in a fertile district. While the hills to the north and northeast are not very high, in the northwest the Djebel al-Sikh rises to 1,600 feet above sea-level. The name of the town, which does not occur in the Old Testament, is found in the New and in the Greek fathers of the Church in the varying forms *Nazara*, *Nazareth* and *Nazareth* with ζ, but according to Jerome it had in Hebrew a *galde*, which is confirmed by the Syriac *Nāṣrat* and the Arabic *Nāṣira* as well as by the Talmudic derivative form נוצרי, pl. נוצרים while the Christian Arabic has ζ. All these forms as well as *Nazāran* (Mark i. 24) have in the first syllable an *a* obscured to *e* in Talmudic. In Christian Aramaic there is a subsidiary form נוצר with *e* in the second syllable with which is connected the derivative *Nazōranos* (Matt. xxvi. 71; John xviii. 5), cf. *ṛw Nazōranos alipser* (Acta xxiv. 5). The Mandaeen term *Nagoran* (e.g. Dalman, *Aram. Gramm.*, p. 178; Gressmann, in *Z. A. T. W.*, xliii. 26 sq.) is usually connected with this but Lidzbarski (*Mandäische Literatur*, p. xvi. 29; *Z. S.*, l. 230 sqq.) wants to explain it as "observers", while Zimmermann (*Z. D. M. G.*, lxxiv. p. 429 sqq., 76, 46) seeks its origin in the Babylonian *nāṣira*. That the Arabic *nāṣrā*, Christians, *nāṣrān*, and *nāṣrāniya* come from the name of the town is known to the Arab writers.

Nazareth, which in the time of Jesus was a little town of no importance (cf. John i. 47: "what good can come out of Nazareth?"; it is not even mentioned by Josephus), was not in the early Christian period one of the places of the New Testament to which large numbers of pilgrims went. According to Epiphanius, it was inhabited exclusively by Jews till the time of Constantine the Great. The number of Christians however gradually increased and was maintained after the Muslim conquest (636). In the time of Arculf (c. 670) it had two churches, and in 332 (943) Mas'ūdi mentions a church held in great veneration there, no doubt the church of St. Mary. Before Galilee was conquered by Taucrad and the Crusaders, Nazareth was destroyed by the Saracens; it revived under Christian rule, especially after the bishopric of Scythopolis was transferred thither. The Russian abbot Daniel (1113-1115) has given us a very good picture of the Church of the Annunciation and of the Well of Mary there in this period. In 1187, Saladin took Nazareth and at the peace between him and Richard (1192) it remained in his hands. In 1251, during the last unsuccessful crusade, Louis IX. undertook a pilgrimage from Akka to Nazareth. Yāqūt (623 = 1225) who relies on the Gospel story instead of Muslim legend mentions *Nāṣira* as a village 13 miles from Tabariya. In 661 (1263) the Mamlūk

Saltū Baibars ordered the emir 'Alī al-Dīn to destroy Nazareth and particularly the Church of St. Mary. Dimashki (c. 1300) calls it a Jewish town belonging to the province of Safat and inhabited by Yamanis, and Khalil al-Zahiri (d. 872 = 1468) numbers it among the townlike villages in Safat. The Christian visitors however describe Nazareth as a wretched village inhabited by very few Christians with a ruined church and complain of the hostile attitude of the Muhammadan population. It was not till 1620 that better days dawned when the Druse chief Fakhr al-Dīn [q. v.] opened the town to the Franciscans. The Roman Catholic monastery with the Church of the Annunciation was rebuilt, although not completed till a century later. There were only a few Christians in addition to the monks in the town, until in the middle of the xviiith century the Shēkh Zahir al-'Amr of 'Akka increased its prosperity after which they gradually grew in number. In 1890 according to G. Schumacher, there were 7,419 inhabitants in the town of whom 1,825 were Muslims, 2,870 Greek Catholics and the remainder Christians of other confessions; since then the number has increased. Jews were not allowed to live there. The great monastery with the Church of the Annunciation in the southeast belongs to the Roman Catholics, the Church of the Annunciation in the northeast to the Greek Church. The Muslims have a mosque of considerable size and five *walīs*. The well of Mary which has a dome over it and is open on one side, has its water brought from a spring below the Greek Church of the Annunciation.

NĀSIRĀBĀD. [See **SHIRĀN**.]

NASHH (أ), infin. I from *n-sh-h*, with the technical sense of "abrogation (of a sacred text)".

See **KUR'ĀN**, 3.

NASHKI. [See **ARABIA**, 2.]

AL-NASR, the vulture. It gets its name from the fact that it tears the dead animals on which it feeds to pieces with its beak and devours them. It eats till it can no longer fly. It is said to attain the age of 1,000 years. Its eyes are so sharp that it can see its prey at a distance of 400 farsakh; its sense of smell is equally sharp but fragrant scents are so deadly to it that they destroy it. It shows great endurance in flying and follows armies and pilgrim caravans in order to fall upon the corpses of man and beast. It also follows flocks because it is particularly fond of stillborn lambs, a statement which is confirmed by Brehm who says it attacks lambing sheep. It lays its eggs on high cliffs and is said not to sit on them but to leave them to the heat of the sun. It is however very anxious lest its eggs or

young be eaten by bats and therefore covers them with the leaves of the plane-tree. The use of the gall, brain, flesh and bones in medieval times corresponds to the usage in ancient medicine.

al-Nasr was also the name of a deity in pre-Islamic Arabia (see Weillhausen, *Reise*, p. 23).

Bibliography: Kazwini, ed. Wüstenfeld, i. 424; Damiri, ii. 476; Ibn al-Baitār, ii. 370. (J. RUSSA)

AL-NASR, the title of Sūra ex., taken from its first verse. The word means "help, assistance" and is often used of God's help in war and then with the meaning of "victory". Sūra lxi. 13 is also associated with *al-fath*, cf. alviii. 13. The Sūra clearly belongs to a later period and verse 2 in particular recalls the year 9, the Year of the Embassies. It is therefore natural to refer *al-fath* (verse 1) in keeping with the frequent use of the word to the capture of Mecca, except that it is not mentioned as a fact (as Weil, *In Hishām*, p. 933 translates it) but is represented as an assumption, which is also true of verse 2. This is perhaps only a rhetorical figure intended to emphasise the general prevalence of the idea and does not exclude reference to a particular event.

Bibliography: Noldeke-Schwally, *Geschichte des Qur'ān*, i. 219 sq. (FR. BURL)

NASR b. AHMAD b. ISMĀ'IL called al-Sa'id, a Sāmānid. After the murder of his father in Djamādā II, 301 (Jan. 914) the eight year old Nasr was put on the throne and the able vizier Abū 'Abd Allāh Muhammad b. Ahmad al-Djāhizī given the regency. Soon afterwards the people of Sistān rebelled against the Sāmānids and placed themselves under the rule of the governor Badr al-Kabir appointed by the caliph al-Muktadir. At the same time the caliph's generals al-Faql b. Humaid and Khalid b. Muhammad al-Marwazi occupied the towns of Ghazna and Bost which were in the possession of the Sāmānids. When al-Faql fell ill, Khalid rebelled against al-Muktadir, routed the troops sent against him and went to Kirman where he encountered a force sent against him by Badr. The battle ended in Khalid's defeat; he was himself wounded and taken prisoner; he died soon afterwards of his wounds. In the same year, the uncle of Nasr's father Ishāk b. Ahmad b. Asad rebelled in Samarkand and marched on Bukhārā, accompanied by his son (Rasā'idān 301 = April 914) but was driven back by Hamūya (Hammūya) b. 'Alī. A second attempt also failed; Ishāk took to flight again and Samarkand fell into the hands of the government troops. He then tried to hide himself but had finally to come out of his place of concealment and throw himself on Hamūya's mercy. The latter took him to Bukhārā where he remained till his death, while his son Ilyās went to Farghāna. In the year 302 (914—915) another son of Ishāk's, Abū Salih Mansūr, stirred up trouble in Naisābūr in combination with al-Husain b. 'Alī al-Marwazi (al-Marwarrūdhī), who had rendered great service to the Sāmānids but felt he had been neglected by them. After Mansūr's sudden death Husain, who was suspected of having poisoned him, went to Naisābūr and seized the town. In Rabi' I 306 (Aug.—Sept. 918) he was taken prisoner by Ahmad b. Sahl, a tried general, who had been long in the service of the Sāmānids, and brought to Bukhārā, while Ahmad took up his residence in Naisābūr. Husain was after some time released and given a position at

the court of Naṣr; for some unknown reason he was again thrown into prison and ended his days there; in the following year, Ahmad b. Sabl deserted the Sāmānids because Naṣr had not kept his promise to him, and recognised only the caliph's authority. He went from Naisābūr to Džurdžān and drove out its governor Karategin. He then returned to Khurāsān and entrenched himself in Marw; in Raddjāb 307 (Dec. 919) however, he shared the fate of Husain. Hamūya cunningly succeeded in enticing him out of the town. Ahmad was defeated and taken prisoner and died a few months later in Bukhārā in prison. In Ṭabaristān also there was fighting. After the death of the Zaidi imām al-Uṭrūsh [q. v.], al-Ḥasan b. al-Ḳāsim, called al-Dā' al-Ṣaghir, was recognised as his successor. In 308 (920-921) the latter sent his general Lailā b. al-Nu'mān al-Dailami to Džurdžān. From there he went first to Dāmaghān and then to Naisābūr where he had the khutba read for al-Ḥasan b. al-Ḳāsim (Dhu 'l-Hiddja 308 = April-May 921), after Karategin had been put to flight. In the neighbourhood of Tūs he encountered Hamūya b. 'Alī whom the government of Bukhārā had sent against him. At first a considerable part of the Sāmānid army took to flight but Hamūya himself stood firm and Lailā had no further success; he had to take to flight, was captured and beheaded by Hamūya's orders (Rabī' I 309 = July-Aug. 921). Karategin then returned; but when he left Džurdžān and Abu 'l-Ḥusain b. al-Ḥasan b. 'Alī al-Uṭrūsh seized the town, Naṣr sent 4,000 horsemen there, led by Simdjūr al-Dawātī, who at once laid siege to Abu 'l-Ḥusain. When the latter made a sortie with a force twice this size, he fell into an ambush but escaped to Astarābādḥ and thence to Sārīya. Simdjūr then went to Astarābādḥ; but when his efforts came to naught he bribed Abu 'l-Ḥusain's deputy Mākān b. Kāki and persuaded him to pretend to vacate the town for a time and then to reoccupy it. This was done as arranged; Simdjūr occupied Astarābādḥ but soon returned to Naisābūr whereupon his subordinate, only left there as a feint, was driven by Mākān first out of Astarābādḥ and soon afterwards out of Džurdžān. In 310 (922-923) Ilyās b. Ishāq rebelled in Farghāna and went to Samarkand; this enterprise came to nothing through the ability of Abū 'Amr Muḥammad b. Asad, who with 2,300 men prepared an ambush and scattered Ilyās's army, said to have numbered 30,000 men. After some time, the latter joined the governor of al-Shāh, Abu 'l-Faḍl b. Abī Yūsuf, but had again to take to flight and went to Kāshghar where he joined the Dihhān Toghtātegin. After failing in an attempt to invade Farghāna he returned to Kāshghar. He was finally pardoned by Naṣr and settled in Bukhārā. About the same time Abu 'l-Faḍl Muḥammad b. 'Ubaid Allāh al-Bal'ami [cf. BAL'AM] was appointed vizier in place of Abū 'Abd Allāh Muḥammad b. Ahmad al-Djāhānī. In the year 314 (926) Naṣr at the instigation of the caliph al-Muqtadir undertook an expedition against al-Rāy where Fātik, a freedman of the rebel governor Yūsuf b. Abī 'l-Saffī, was ruling. He took the town in Džumāda II (Aug.-Sept. 926) and returned to Bukhārā after two months' stay there. Al-Rāy remained in possession of the Sāmānids till the beginning of Shā'ban 316 (Sept. 928) when the governor appointed by Naṣr fell ill and surrendered the town to the 'Alid al-Ḥusain

al-Dā' and his general Mākān b. Kāki. In 317 (929-930) or 318 (930-931) Naṣr's brothers, Yahyā, Maṣṣūr and Ibrāhīm, whom he had imprisoned in the citadel of Bukhārā, succeeded in regaining their freedom with the help of their followers among the dissatisfied elements of the citizens and seized the town. When Yahyā claimed the throne, Naṣr who had gone to Naisābūr at the head of a large army to assist the caliph against the rebel Asfār b. Shīrīya had to return as quickly as possible and after several encounters with Yahyā was able to restore order. Yahyā was pardoned and the governorship of Khurāsān given to the emir of Sughāniyān Abū Bakr Muḥammad b. al-Muṣaffar. On the fighting in Džurdžān and Kirmān see the article Mākān b. Kāki.

The last year of Naṣr's reign was marked by a great revival of Shī'a propaganda, which had never ceased in Khurāsān and had been particularly encouraged just at this time by the rise of the Fātimid caliphate. When the people of Naisābūr paid homage to an 'Alid named Abū 'l-Ḥusain Muḥammad b. Yahyā as caliph, Naṣr invited him to Bukhārā and when he left not only gave him a robe of honour but also granted him an annual allowance from the treasury. Husain b. 'Alī al-Marwānī had been converted to the Shī'a by Fātimid emissaries in Khurāsān. He was followed by Muḥammad b. Ahmad al-Nakhsabi (al-Nasafi) who transferred his activities to Bukhārā and gained a number of proselytes among the high officials. He finally succeeded in winning Naṣr himself over to his party and in inducing him to pay the Fātimid caliph al-Kā'im [q. v.] a considerable sum to atone for the death of Husain b. 'Alī who had pined away in a Bukhārā prison. This naturally aroused the wrath of the orthodox clergy, who were joined by the Turkish guards and provoked a powerful reaction. Naṣr regretted his complaisance and is said to have abdicated in favour of his son Nūh, who had not been guilty of any heresy. Naṣr's ill-health may have contributed to this decision. The details are variously recorded; in any case, the Shī'as in Bukhārā and Khurāsān were persecuted and al-Nakhsabi with several followers executed.

According to the usual statement, Naṣr died after thirteen months illness of pulmonary consumption on 27th Raddjāb 331 (April 6, 943); others say he was murdered like his father. According to some reports, he died earlier, on 12th Ramaḍān 330 (May 31, 942). This latter date perhaps refers not to his death but to his abdication. Nūh's formal accession in any case only took place after his father's death.

If we may believe Ibn al-Athīr, Naṣr was distinguished by a singular gentleness of character; according to other sources however, this was not the case. He was also celebrated as an enlightened patron of poets and scholars and is particularly held in honour for encouraging the poet Rūdagi [q. v.] in every way.

NAṢR b. SAIYĀR AL-LATHI, governor of Khurāsān. As early as 86 (705) we find him distinguishing himself in the campaigns of Kataba b. Muslim [q.v.] in Central Asia and from this time onwards his name is often mentioned in history. In 106 (724) he took part in the campaign conducted by Muslim b. Sa'īd al-Kilābi, governor of Khurāsān, against Fārgāna. When the two tribes of Rabi'a and al-Asd refused military service, Naṣr was sent with the Mūjaris against the mutineers and defeated them at al-Barūkān near Balkh. After serving for some years as commander of Balkh he was relieved of his office but afterwards restored to it. When the governor of Khurāsān Asad b. 'Abd Allāh al-Ka'bi [q.v.] died and the caliph Hishām b. 'Abd al-Malik sought counsel of a trusted adviser, who was acquainted with the conditions in Khurāsān, regarding the filling of the vacant post, the latter proposed among other names that of the seventy-four year old Naṣr because he was "abstemious, experienced and shrewd" (*ʿafif munjarrab ʿāḥṣ*), and in Rabi' 120 (June—July 738) he received the diploma of investiture. He honestly endeavoured to live up to the above description of him. The old cities of Khurāsān were four in number: Merw, Nisābūr, Merw al-Rūdh and Herāt; there were also special commands in Balkh, Samarkand and Khwārizm. After taking over the governorship, Naṣr transferred his headquarters from the remote Balkh to the more central Merw. In 121 (738—739) he declared war on his Turkish neighbours and advanced to Samarkand. From there he penetrated to Ushrāsān and thence on to al-Shāsh. The Turkish chief Kurul, who had shortly before killed the Khāḡān and was regarded as one of the leading personalities among the Turks, along with al-Hārith b. Suraidj, a Murdji who had rebelled against Arab rule and taken refuge among the unbelieving Turks, endeavoured to check his progress; when the opposing forces actually met however, Kurul was taken prisoner and killed. Naṣr then made peace with the ruler of al-Shāsh on condition that he banished al-Hārith, whereupon the latter went to Fārs while Naṣr continued his campaign into Fārgāna without winning any considerable success. The result was that he had to be content with concluding a treaty of peace. The Soghdians who had at an earlier date migrated to join their Turkish neighbours in al-Shāsh and Fārgāna, but found the troubled conditions prevailing after the assassination of the Khāḡān intolerable and wished to return to their old Iranian home, were treated by Naṣr with a wise leniency and an agreement was come to by which the Transoxanians who had been converted to Islām but had gone back to the faith of their fathers were not to be persecuted in any way, the private debts and arrears of taxes of the emigrants were remitted and the Muslim prisoners taken by them were only to be restored to liberty after the evidence of witnesses had been taken and

a judicial decision given. These measures, it is true, provoked not only the displeasure of the Arab emirs in Khurāsān but also the dissatisfaction of the caliph Hishām; nevertheless Naṣr succeeded in carrying out his plans. As regards domestic politics he regulated the relations between the Muslims and those under their protection by an important reform in the system of taxation, by which he ordained that all landowners, including Muslims, should pay the land-tax (*kharaḡ*) while the poll-tax (*diya*) should be imposed on non-Muslims exclusively. But the deep rooted clannishness of the Arab caused him continual difficulties. In the first four years of his tenure of office he chose his subordinates exclusively from the tribe of Mudar; then he began to be little more broad-minded in this respect and to pay some attention to the Yamani and thus gradually to pave the way to a reconciliation of the tribes at feud with one another. In the year 123 (740—741) the governor of the 'Irāk, Yūsuf b. 'Omar al-Thakafi, endeavoured to arouse the caliph's suspicions of him; Hishām however saw through his plan and left Naṣr in his post. When al-Walid II ascended the throne in Rabi' II 125 (Feb. 743) he confirmed Naṣr in office but soon afterwards allowed himself to be persuaded by Yūsuf b. 'Omar to recall him and therefore ordered him to come to Damascus and to bring with him all kinds of hunting-birds and musical instruments. Naṣr however did not hurry and before he reached the frontier of al-'Irāk, the news of the caliph's assassination reached him and he at once turned back. When al-Walid's successor, Yazid III, appointed Mansūr b. Djamhūr governor of al-'Irāk and Khurāsān, Naṣr refused to recognise him. In 126 (743—744) trouble broke out among the Asd and Rabi'a in Merw. When Naṣr wanted to pay the troops not in money but with the gold and silver instruments procured for the caliph al-Walid they mutinied; Djudai b. 'Alī al-Kirmāni put himself at their head and appealed to their feelings by demanding vengeance for the Banu 'l-Muhallab who had been mercilessly persecuted by the Umayyads, a course which he knew would appeal to them. When the Mūjaris appealed to Naṣr to render al-Kirmāni innocuous, he declined at first but later yielded to them and had him arrested (end of Ramaḍān 126 = middle of July 744); but a month afterwards he escaped from prison. Negotiations were then opened between Naṣr and al-Kirmāni but they led to no real decision. A much more dangerous opponent was al-Hārith b. Suraidj who at the end of Djumādī II 127 (beginning of April 745) again appeared in Merw after a many years' sojourn among the Turks. In order to be safe from this rival, Naṣr had unfortunately secured a pardon for Hārith and his followers from the caliph Yazid III and after his arrival in Merw he endeavoured to win al-Hārith over by the greatest indulgence and friendliness. He even went so far as to confer on him the governorship of Transoxania; but all his efforts were in vain; al-Hārith adhered firmly to his Murdji conceptions and stubbornly refused to recognise Naṣr as governor. As his following was steadily growing, he finally demanded that Naṣr should resign his office and leave the choice of his successor to a court of arbitration. Naṣr said he would agree to this, but when he declined to obey the judgment of the court insisting on his

resignation, open fighting broke out. Al-Hārith tried to take the city by surprise but was driven back (end of Dhu'l-ḥiǧǧ II 128 = end of March 746). He then joined forces with al-Kirmānī and they attacked Naṣr with their combined strength. After several days' fighting, the latter had to abandon Merw and retire to Naisābūr; it was not long however before the two rebels fell out. Among other things al-Kirmānī's cruelty made him hated; in addition there were the endless feuds among the various Arab tribes. After al-Hārith's most influential follower Bishr b. Džurmūz al-Dabbī had left al-Kirmānī with 5,000 men, al-Hārith soon followed his example but was killed in the fighting that ensued (end of Raddjāb 128 = April 746). Al-Kirmānī was now lord of Merw. The Vamanīs stood by him while the Muǧarīs sought refuge with Naṣr in Naisābūr. Naṣr's position was by no means an enviable one. So long as al-ʿIrāk was in the hands of the Khāridjīs and the ʿAlid rebel ʿAbd Allāh b. Maʿāwīya [q. v.], Naṣr's communications with the caliphate were cut and even after Yazīd b. ʿOmar b. Hubaira had regained al-ʿIrāk for Marwān II, he could not reckon on any very considerable help. There was therefore nothing left for him but to concentrate his efforts on the reconquest of the city of Merw. After repeated encounters between his troops and those of al-Kirmānī, he went there in person and pitched his camp opposite that of his opponent. The two rivals continued to fight with varying fortunes without being able to bring about a decision. Naṣr's appeals to Marwān and Ibn Hubaira for reinforcements remained unheeded; in view however of the danger that threatened from Abū Muslim [q. v.], the leader of the ʿAbbāsīd propaganda, negotiations were begun between Naṣr and al-Kirmānī. After a son of Hārith b. Suraidj had killed al-Kirmānī to avenge the death of his father, the Khāridjī Shalāh b. Salama took his place and in the name of the Aṣd concluded a truce for one year. Abū Muslim was able however to bring this agreement to nothing by persuading ʿAlī b. Džudāl al-Kirmānī that Naṣr had instigated the murder of his father and the Aṣd who were devoted to him broke the truce just concluded and resumed hostilities against Naṣr. When Abū Muslim was approached for assistance by the two combatant parties he was able to come forward as an arbiter and decided in favour of the Aṣd against the Muǧar. He then entered Merw, according to the most probable statement in Rabīʿ II 130 (Dec. 747), and made the inhabitants swear allegiance in general terms to a caliph of the family of the Prophet without a name being mentioned. For Naṣr there was nothing left but to seek safety in flight. From Merw he fled via Sarakhs and Tūs to Naisābūr, where the news reached him that his son Tamīm, whom he had sent against Abū Muslim's general Kaḥḥaba b. Šabīb al-ʿIrāqī [q. v.] had been defeated and slain at Tūs. From Naisābūr he went to Kūmis and thence to Džurdjān. Nubāṭa b. Hanzala al-Kilābī was here with a large army which Ibn Hubaira had at last sent him by the caliph's orders. But Naṣr and Nubāṭa did not cooperate and in addition the Kaṣmīs went over from the former to the latter. On the 1st Dhu'l-ḥiǧǧ 130 (Aug. 1, 748) Nubāṭa was defeated by Kaḥḥaba and fell in the battle. After his defeat Naṣr could no longer stay in Kūmis but fled, pursued by Kaḥḥaba's son

Hasan, to al-Rāy, without receiving any support from the Umayyad officials. Reaching al-Rāy, he fell ill; nevertheless he wished to continue his journey to Hamadhān but was no longer able to move without assistance; he had to be carried and died in 12th Rabīʿ I 131 (Nov. 9, 748) in Sāwa [q. v.] at the age of 85. Naṣr combined with his eminent qualities as a statesman considerable gifts as a poet.

NAṢR ALLĀH b. MUHAMMAD b. ʿABD AL-HAMID ABU ʿL-MĀʿLĪ of SHIRĀZ, a Persian author and statesman, vizier of the Ghaznavid Khwarazm Malik (1160–1186) by whose orders he was arrested and executed. Naṣr was the first Persian to succeed in giving a satisfactory Persian version of the celebrated *Kāshīd al-Dimna*. His version is based on the Arabic of ʿAbd Allāh b. Mukāḥḥa and was completed about 538–539 (1144), i. e. in the time of Bahramshāh (1118–1152). For a long time his translation was regarded as a model of elegant Persian style which could not be surpassed and served as the basis for the metrical version by Kānī (658 = 1260) and for a series of Turkish translations. It was only in the xvth century when even Naṣr Allāh's language appeared too homely and archaic that his translation was superseded by the celebrated *Anwār-i Suhaili* of Husain Wāʿi al-Kāshifi [q. v.], d. 939 (1532–1533).

(E. BERTHELS)

NAṢR AL-DAWLA ABU NAṢR AHMAD b. MARWĀN, third and most important prince of the Marwānīd dynasty [q. v.] of Diyār Bakr. He succeeded to the provincial sovereignty on the death of his elder brother, Mumahhid al-Dawla Abū Manṣūr Saʿīd, in 401 (1010–1011), after a struggle with the latter's murderer, and was in the same year formally recognized by the ʿAbbāsīd al-Kādir, from whom at the same time he received his *laqab*, and by the Būyīd amīr, Sultān al-Dawla. Though now established in the capital, Malyāfāriqīn, he was unable to obtain effective control of Amid, the next most considerable city of the province, until 415 (1024–1025), when his tributary, Ibn Damna, who had hitherto ruled it, was assassinated; and during his reign of over fifty years, he suffered several ineffective attacks on his territory from the Uḡailīds of Diyār Rabīʿa, to whom he appears, at one period at all events, to have paid tribute (see Ibn al-Athīr, ix. 121),

and to whom, in order to compose a quarrel arising out of his divorce of a lady of that family, he was obliged, in 421 (1030), to cede Nisibin. In 433 (1041–1042) Diyār Bakr was invaded from Adharbāydjān by the bands of Ghuzz Turks which had pushed northwards on the advance of the Seldjūkid leaders into the Djabāl; and for two years parts of it were subjected to their depredations. Otherwise the province enjoyed, throughout his reign, a tranquillity remarkable in this troubled age.

The ruler of Diyār Bakr was regarded as a principal guardian of the frontier of Islām, and as such was expected to harass the Christians whenever opportunity offered (see the letter addressed to Naṣr al-Dawla by the Seldjūkid Tuḡhril-beg: Ibn al-Athīr, ix. 275). Nevertheless Ibn Marwān's relations with the Byzantine Empire were for the most part amicable, being based on a pact of mutual non-aggression, to which both parties appealed when it was infringed. The only important breaches of this agreement occurred in 418 (1027), when Naṣr al-Dawla seized Rubā (Edessa), which, however, was recovered by the Greeks four years later, and in 426 (1034–1035), when an attempt was made by the Christian inhabitants of that city, in league with Arabs of the Numair tribe, to invade his territories. Later their good relations were of use to the Emperor — Constantine X —, who in 441 (1049–1050) obtained Ibn Marwān's help in securing from Tuḡhril-beg the release of the Georgian general Lipuriti with whom he had been in league against the Georgian king, and who had been captured the year before by Tuḡhril's half-brother Ibrāhīm Ināl. Up to 436 (1045) Armenia, which also marched in part with Diyār Bakr, was still independent of the Empire; and in 423 (1032) a Marwānid commander led a successful raid into this country. In 427 (1035–1036), on the other hand, a hadjī caravan from northern Persia was attacked and looted near Anī by Armenians of the Sunkuna tribe, upon which Ibn Marwān forced the aggressors to give up their prisoners and booty.

Early in Naṣr al-Dawla's reign the north of Syria and parts of the Djabala contiguous to Diyār Bakr were obliged to acknowledge the suzerainty of the Fātimid caliphs, though their hold on these parts remained somewhat precarious. And his own territories were menaced by Fātimid pretensions, when in 430 (1038–1039) the governor of Damascus, Anūshīrīn al-Dīsharī, who was then reasserting his rule in northern Syria, projected an attack on Diyār Bakr. This, however, came to nothing.

The reign of Naṣr al-Dawla saw the rise of the Seldjūkids from complete obscurity to the empire of Persia and the Irāk. His first communication with them occurred as early as 435 (1043–1044), on the Ghuzz invasion of Diyār Bakr, when he addressed a letter of protest to Tuḡhril, who, though he was scarcely in a position to do so, undertook to restrain the marauders. (It may be noted, nevertheless, that Ibn al-Azraq describes this Ghuzz invasion as having been actually instigated by Tuḡhril, who, he says, granted the province as a fief to its two leaders in advance; cf. Amedroz, *The Marwānid Dynasty of Maiyāfāriqin*, in *J.R.A.S.*, 1903, p. 137. Surely this author is mistaken in considering the date 434 as wrong, since it agrees exactly with those given by Ibn al-Athīr). Eight years later Naṣr al-Dawla acceded

to Tuḡhril's demand for recognition as suzerain; and this subservience, which was renewed in 446 (1054–1055), when Tuḡhril made a triumphal tour through Adharbāydjān and Muslim Armenia, spared Diyār Bakr the experience of a Seldjūkid visitation. In the following year, however, Tuḡhril's attention was drawn to the murder of a Kurdish chieftain by Naṣr al-Dawla's son Sulaimān, his lieutenant in the Djabala; and in 448 (1056–1057), when the sultan was obliged to visit al-Mawṣil in order to oppose a combination of Shī'ī leaders headed by al-Basāsiri [q. v.], he forced an indemnity from Ibn Marwān by laying siege to Djabrat Ibn 'Umar.

Naṣr al-Dawla was sagacious, or fortunate, in his choice of the three wazirs who served him in turn, namely Abū 'l-Kāsim al-Isfahānī, to whom he owed his throne (in office 401–415 = 1010–1025), Abū 'l-Kāsim al-Maghribī [q. v.] (in office 415–428 = 1025–1037) and Abū Naṣr Ibn Djabr (afterwards entitled Fakhr al-Dawla) [q. v.] (in office 430–453 = 1039–1061). It was no doubt owing in part to their abilities that the remarkable tranquillity enjoyed by Diyār Bakr during his reign was turned to advantage and resulted in an equally remarkable prosperity. This Naṣr al-Dawla fostered by a reduction of taxation and by renouncing the practice of fining the rich in order to augment the revenues. Nevertheless his court is said to have surpassed those of all his contemporaries in luxury, and many instances are quoted of his profusion and generosity. Maiyāfāriqin became during his reign a centre for men of learning, poets and ascetics, as also a refuge for political fugitives. Among the latter were the Būyid prince al-Malik al-'Aziz [q. v.], who was ousted from the amirate in 436 (1044–1045) by his uncle Abū Kādhjār [q. v.], and the infant heir of the 'Abbāsīd al-Kā'im — afterwards al-Mu'tadī [q. v.] — who was removed with his mother from Baghdad on the occasion of its occupation in 450 (1058) by al-Basāsiri.

Naṣr al-Dawla is described as being resolute, just, high-minded and methodical, and though much addicted to sensuality, he was strict in his observance of religious injunctions. He died, aged about eighty, on 24th Shawwāl 453 (November 1061), leaving Fakhr al-Dawla still in office to secure the succession to his second son, Abū 'l-Kāsim Naṣr, Niḡm al-Dīn.

(HAROLD BOWEN)

NAṢR AL-DĪN (pron. Naṣreddīn) КИРОВА, the hero of the stories of wit and stupidity among the Turks, who bears a strong resemblance to the German Till Eulenspiegel, the English Joe Miller, the Italian Bertoldo, the Russian Balakirew, etc. Various opinions are current about his life. One tradition for example makes him a learned man of the time of Hārūn al-Rashīd, but another makes him a contemporary of the Khwārizmshāh 'Alī al-Dīn Takash (reigned c. 1172–1200). The two traditions are not to be taken seriously; at most they might be regarded as an indication that many of the jests of the Khodja date from the period of the caliphate or that some of them came through a Persian intermediary.

The other versions of the life of Naṣreddin can be divided into two groups, of which the first puts him in the xvth and beginning of the xvth century (the period of Bāyazīd I, Timūr and the eighth Karamanid 'Alā' al-Dīn), and the second in the xiiith century (the period of the Saldjūq 'Alā' al-Dīn).

The first view appears to come from the *Travels* of Ewliya Çelebi (iii. 16—17). There, for example, the story of Timūr's meeting with the Khodja in the baths is told, when the Khodja said that he would give 40 *akçe* for Timūr's shirt but nothing for him himself. In spite of all the improbability of such an utterance and in spite of the fact that the older *teğhbir*s put this answer in Ahmadi's [q. v.] mouth (cf. also E. J. W. Gibb, *Ottoman Poems*, 1882, p. 166—167) Ewliya's story, was given currency in Europe by Castelnau, Dies, Goethe, von Hammer, etc. When Mehmed Tewfik accepted this story of Ewliya's in his editions of the jests of Naṣreddin and Buadam (since 1883) which were later translated into German (about 1890), it was given renewed life and became almost the predominant opinion in Europe.

The second group of traditions champions the xiiith century as the period of Naṣreddin and relies on the following facts. Firstly the poet Lāmī'i (d. 1532—1533) asserted in his *Leṭā'if*, that Naṣreddin was a contemporary of Shaiyād Hamza who lived in the xiiith century; secondly in old manuscripts the Khodja is associated with the Sultān 'Alā' al-Dīn Kōprülü-Zāde (see *Bibl.*) therefore inclines to the view that he was a contemporary of the Saldjūq 'Alā' al-Dīn (xiiith century). Sh. Sāmī Bey (*Kāmūs al-A'lām*, vi. 4577) and P. Horn (see *Bibl.*) had already decided for the Saldjūq and the latter definitely for 'Alā' al-Dīn, but Kōprülü-Zāde supported his view by evidence, partly new, which we proceed to quote: 1. the inscription on the tomb of Naṣreddin in Akşehir bears the date 386, which on the supposition that it is reversed, would indicate that the Khodja died in 683 (1284—1285); 2. on two authentic charters of endowment (*waḳfiya*) of the year 655 (1257) and 665 (1266/7) respectively, a certain "Naṣreddin Khodja" appears before the *qādi* as a witness, and 3. the statement which the former mufti of Siwri-Hişar, Hasan Efendi, made about 45 years ago in the *Majmū'a-i Me'arif* about Naṣreddin, agrees with this assumption. According to Hasan Efendi, Naṣreddin was born in the village of Khorto (خورتو) near Siwri-Hişar in the year 605 (1208—1209), held there the office of Imām in which he succeeded his father, and moved in 635 (1237—1238) to Akşehir where he died in 683 (1284—1285).

Although this evidence is by no means to be rejected off hand, it seems to have been completely neglected by other scholars (Kryniski in 1927 [see *Bibl.*] does not even mention Kōprülü's book) except for my article entitled *Ye il Naṣreddin-khodja tirso?* ("Did Naṣreddin Khodja really live?") in the Christmas supplement to the Belgrade *Politika* (Jan. 6, 1932), where it was described as worthy of consideration, if not yet absolutely convincing.

After all these traditions and opinions, it is not a matter for surprise that some scholars (H. Ethé, R. Basset, M. Hartmann, A. Wesselski [see *Bibl.*]) have been more or less sceptical about the historicity of the Khodja.

These doubts are to some extent closely connected with the question of the origin of Naṣreddin's jests. Basset, for example, thinks (in *Recherches sur Si Dje'd'a...*) that they are a translation of the old Arabic droll stories which were current in large numbers at the end of the fourth (tenth) century about a certain Djuḥā (Djohā) of the tribe of Fazlra in Kūfa. Djuḥā's stupidity became proverbial among the Arabs, as is already evident from Maiddnī (d. 1124) (cf. *Arabum proverbialia*, ed. G. Freytag, i. 403, No. 175), and a *Book of Anecdotes of Djuḥā* (کتاب نوادر جحا) is expressly mentioned as early as the *Fihrist* of al-Nadīm (d. 995) (cf. Flügel's edition, i. 313). This collection, which had previously reached the west through oral transmission, was translated into Turkish in the xvth or xvth century and the hero identified with a certain Naṣreddin Khodja, whose existence Basset thinks is at least doubtful.

This thesis of Basset's was not everywhere accepted without demur. Horn and Christensen (see *Bibl.*), for example, do not believe in a translation from the old book of Djuḥā's jests and Wesselski holds the view "that there is no evidence of the existence of any story of Djuḥā in the period before that of Naṣreddin's alleged or actual life, which could with certainty be assumed to be the source of one of the jests of Naṣreddin". M. Hartmann describes Naṣreddin's jests as the common property of the literature of the world, expressed to some extent in a specifically Turkish guise and therefore regards any question as to whether there ever was such a person as of little importance. Horn and Kryniski also regard the Khodja's jests as folk stories found almost everywhere. Christensen thinks similarly but admits that these jests form an independent collection "into which probably very many stories from the old book (of Djuḥā) have been incorporated".

Whatever the truth may be, one thing seems to be certain: the immediate source for most of the stories of Naṣreddin is to be sought, as Basset and Hartmann say, in the world of Arabic culture and Islām where Djuḥā certainly is often the hero of such anecdotes. In other words, Djuḥā might be regarded as the ultimate prototype of many of the adventures of Naṣreddin. While Basset's theory then may not be correct in all details, it seems to be right in its main features, especially in the fact that it has directed the student of Naṣreddin to the influence of the rich Arabic literature of humorous anecdote. That many of these stories are originally not Arabic but Persian, Syriac, Indian, Greek, etc. is quite natural, especially when we remember that they are common to many literatures, but in this case it must often have been the Arabic version that was the source upon which the Turkish drew.

For the problem of Naṣreddin it is also important to put on record that stories of Djuḥā are very early mentioned by Persian poets and authors (Minūshihri, d. 1040—1041) or transmitted (a story in Anwarī [d. c. 1190], three stories in Djalāl al-Dīn Rūmī [d. 1273] and a dozen stories in 'Ubaid-i Zākānī [d. 1370—1371]). When we remember the part played by Persian culture among the Saldjūqs of Rūm and their Ottoman successors, we cannot consider it impossible that some stories of Djuḥā may have come to the Turks through Persian literature.

This is all the more probable as Djalâl al-Dîn Rûmî himself spent the greater part of his life in Anatolia (especially in Konya) and used Djûhî's (as Djûhî is called among the Persians) popularity to illustrate his mystic ideas (cf. Mathnawî, ed. Nicholson, II, 3116 sq.).

Particularly in view of this popularity and the fact of oral transmission, it is not impossible that the common people altered the name Djûhî (Djôhî), which was strange to them, into Khodja, as Basset repeatedly insists (*Mélanges africains et orientaux*, Paris 1915, p. 49). On the other hand, there may have been a droll Khodja named Nasreddin among the Ottomans (or Seljuks), around whom gathered humorous stories of others, in addition to his own jests, and thus became the typical representative of wit and stupidity. For this reason he was probably also credited with the tales of the simplicity of Karakûsh (q. v.), Saladin's steward, who had been dead since 1201.

Other jests attributed to Nasreddin go back several centuries further which is proof that they cannot originate with him. The fact that most of the jests are not original is obvious (cf. e.g. Wesselski's parallels), in spite of all the changes and transformations they have undergone among the Turks.

One of the Turkish versions (with additions) was, according to Basset, translated in the middle of the xth (xvth) century into Arabic and thus the Turks returned to the Arabs part of what they had formerly borrowed from them. Nasreddin and Djûhî, being similar types, later became amalgamated in such a way that the Arabic editions identify the two in the title: *Nawâdir al-Khoddja Nasr al-Dîn Efendi Djûhî*. Sometimes however, the Arabs distinguish between the two by calling Nasreddin the "Rumelian Djûhî" (Djûhî al-Rûmî).

This Djûhî of the *Nawâdir* easily reached the Berbers through the Arabs as Si Djeha (Djôhî). In a similar way the Nubians procured their Djeha and the Maltese their Džahan. Whether the fool of Sicilian popular story, Giufà or Giuca also comes from Djûhî is a further question.

On the other hand, the Turkish version of the jests of Nasreddin (under his or another name or anonymously) became known not only to the Rumanians, Bulgars, Greeks, Albanians, and Jugoslavs but also in Armenia, Georgia, the Caucasus, the Crimea, the Ukraine, Russia, Turkestan etc. On these long travels, Nasreddin naturally underwent many changes; distortions and additions were made which are quite foreign to the Turkish text, so that the number of his (or Djûhî's) stories increased to several hundreds (in Wesselski to 515 or 555). The oldest manuscript (Leyden, N^o 2715), which was already in the possession of a European in 1625, only contains 76 jests.

The first edition of the chapbook on Nasreddin, which was the foundation of many later editions, appeared in 1837 (125 jests). Mehmed Tewfik's edition (1899 = 1883) in which the coarse stories of the chapbook are omitted only contains 71 but a few months later Tewfik published a further 130 under the name *Bu Adam* ("This Man", i.e. the same Nasreddin) (in the final edition of 1302 *Bu Adam* only contains 96 stories). Anecdotes of Nasreddin were later collected by I. Kânos from the lips of the people between Aidin and Konya and separately published (Budapest 1899, with 166 stories and introduction, and in

Radloff's *Proben der Volkslitteratur der türkischen Stämme*, vol. viii., St. Petersburg 1899). The fullest, but uncritical, Turkish edition is that of Behâ'î (pseudonym of Weled Celebi), the fourth edition of which (1926) contains nearly 400 anecdotes.

The Turkish editions in the Roman alphabet are much shorter (e.g. *Nasrettin Hoca Hikayeleri*, 1928 [only 79 pp.] and *Lehaifi Nasrettin Hoca*, 1929 [only 96 pp.]) or are divided into various periods of Nasreddin's life (like the *Nasrettin Hoca* of Kemalettin Sükrâ 1930—1931, in four parts).

The first European translations were based on the early editions of the Turkish chapbook: the German by Camerlöher and Prelog (Triest 1857, with 126 jests) and the French of Decourdemanche (*Les plaisanteries de N. hadjia*, Paris 1876, also containing 126 anecdotes) which was increased in the second edition (1908) by those about Karakûsh. Decourdemanche also provided a translation based on much larger material (he drew upon unpublished manuscripts also) entitled *Sottisier de Nasr-Eddin-Hodja* (Brussels 1878, with 321 humorous anecdotes). While the translation by Camerlöher and Prelog made it possible for R. Köhler to find many stories told of Nasreddin in European collections and to trace many of them back to an Indian origin (*Orient und Occident*, I, [1862]; a later edition with additions in his *Kleineren Schriften zur Märchenforschung*, I, [1898]), Decourdemanche's translation served Dragomanov as the basis for his studies on the dissemination of stories of Nasreddin in the Ukraine (*Atewshaya Starina*, 1886).

Later (about 1890) Mehmed Tewfik's edition, including a portion of *Bu Adam* was translated into German by Müllendorff (Reclam N^o 2735). The remainder of the *Bu Adam* stories (N^o 131—226) were translated by Menzel; the much too long *Abenteuer Budams* (= N^o 197) in the *Türkische Bibliothek* (vol. xiii., 1911) and the others in the *Beiträge zur Kenntnis des Orients*, vol. ix. (1911), p. 124—159. Nasreddin's jests have also been translated into English, Russian, Hungarian, Greek, Serbo-Croat, Little Russian, Bulgarian, etc. Wesselski's *Der Hodscha Nasreddin* (1911) is at present the most complete translation of these anecdotes in a number of versions (see *Bibl.*).

In conclusion, it may be mentioned that some anecdotes of Nasreddin were retold by A. Fann in Rumanian (1853), by Murad Efendi (= Fr. v. Werner) in German (1878), by V. Velicko in Russian (1892), by V. Séurat in Little Russian (1896) and by Köprülü-Zade in Turkish verse (1918).

(1930); deals very briefly with Khodja's life on p. 7—8 and gives French translation of his jests arranged under 4 periods of his life). — Also the catalogues of MSS. in Leyden, Vienna, London, Berlin, Paris etc. (FRIEDRICH BAJAKTAREVIC)

NAṢRÂNĪ. [See NAṢARĀ.]

NAṢRIDS, AR. BANU NAṢR, also sometimes called BANU 'L-AḤMAR, a Muslim dynasty which ruled over the kingdom of Granada in the north of Spain from 629 to 897 A. H. (1231—1491).

While, thanks to the narratives of the contemporary Ibn al-Khaṭīb [q. v.] and Ibn Khaldūn [q. v.], we are very well informed about the history of the kingdom of the Naṣrids down to the second half of the xvth century, we have for the later period only a very few sources available in Arabic — and it is not always easy to fill the gaps from Christian sources —: a few pages of al-Maḳḳarī's *Nafḥ al-77ib* and the short anonymous chronicle published in 1863 by Müller.

We give below a chronological list of the Naṣrids; when a date A. D. is not preceded by its equivalent A. H., this is because it is not given either by Muslim historians or Arabic inscriptions.

1. Abū 'Abd Allāh Muḥammad I *al-Ghālib bi'l-Ḥak*: 629—671 (1232—1273).
2. Abū 'Abd Allāh Muḥammad II *al-Faḥḥ*: 671—701 (1273—1302).
3. Abū 'Abd Allāh Muḥammad III *al-Muḥallib*: 701—708 (1302—1309).
4. Abū 'I-Djuyūḡ Naṣr: 708—713 (1309—1314).
5. Abū 'I-Walid Ismā'īl I: 713—725 (1314—1325).
6. Abū 'Abd Allāh Muḥammad IV: 725—733 (1325—1333).
7. Abū 'I-Hadidjādī Yūsuf I *al-Mu'ayyad bi'l-Ḥak*: 733—755 (1333—1354).
8. Abū 'Abd Allāh Muḥammad V *al-Ghani bi'l-Ḥak*: 1^o. 755—760 (1354—1359); 2^o. 763—793 (1362—1391).
9. Abū 'I-Walid Ismā'īl II: 760—761 (1359—1360).
10. Abū 'Abd Allāh Muḥammad VI: 761—763 (1360—1362).
11. Abū 'I-Hadidjādī Yūsuf II *al-Mustaghni bi'l-Ḥak*: 793—794 (1391—1392).

12. Abū 'Abd Allāh Muḥammad VII: 794—810 (1392—1408).

13. Abū 'I-Hadidjādī Yūsuf III *al-Nāṣir bi'l-Ḥak*: 810—820 (1408—1417).

14. Abū 'Abd Allāh Muḥammad VIII *al-Aṣar*: 1^o. 1417—1427; 2^o. 1429—1432; 3^o. 1432—1445.

15. Abū 'Abd Allāh Muḥammad IX *al-Ṣaghīr*: 1427—1429.

16. Abū 'I-Hadidjādī Yūsuf IV: 1432.

17. Abū 'Abd Allāh Muḥammad X *al-Aḥnaf*: 1445—1455.

18. Abū 'I-Naṣr Sa'd *al-Musta'in bi'l-Ḥak*: (1455—1465).

19. Abū 'I-Ḥasan 'Alī: 1465—1482.

20. Abū 'Abd Allāh Muḥammad XI (Boabdil): 1^o. 887—888 (1482—1483); 2^o. 892—897 (1487—1491).

21. Abū 'Abd Allāh Muḥammad XII *al-Zaghall*: 888—892 (1483—1487).

I. Foundation of the Naṣrid kingdom. At the time when the power of the Almohads was beginning to collapse in Spain, two influential families, the Banū Mardaniḡ in Valencia [q. v.] and the Banū Hūd in Murcia [q. v.], took advantage of the civil strife to form for themselves little principalities in the east of the Peninsula. At the same time a member of the Arab family of the Banu 'I-Aḥmar, settled in Arjona, a little town some 20 miles north of Jaen, who traced their descent from the chief of the Banū Khazraj, Sa'd b. 'Uḡada, also tried his fortune at profiting by the troubled times. He was Muḥammad b. Yūsuf b. Aḥmad b. Naṣr and was known as al-Shaikh. In 629 (1231) he found a few supporters to proclaim him; these were mainly members of his own family and of another, related to it, the Banū Ashkilīla. The towns of Jaen, Guadix and Baza rallied in the following year to his standard. After various exploits the details of which are somewhat obscure, Muḥammad I, ancestor and founder of the dynasty of the Naṣrids, took Granada, in 635 (1237—1238) and made this town his capital. He soon decided to build a royal residence on the famous hill of the Alhambra ([q. v.]; al-Ḥamra' or Hamra' Gharnāṡa). In the course of the following year, he made himself lord successively of Malaga and Almeria. The little town of Lorca did not come under his sway until 663 (1264—1265). Hitherto Muḥammad I had had to employ all his forces to fight against his Muslim rivals and in order to have his hands free he declared himself the vassal of Ferdinand I, king of Castile (1217—1252) to whom he undertook to pay a considerable annual tribute. He had to take part with his overlord in the capture of Seville from the Muslims in 1248 and be a passive witness of the triumphs of the armies of the king of Castile in the south of Spain. When on the death of Ferdinand I, Alfonso X succeeded him, Muḥammad I had to renew his oath of vassalage to the latter. His kingdom, "the kingdom of Granada", was now the only area in the Peninsula ruled by a Muslim prince; bounded by the Mediterranean from the Straits of Gibraltar to Almeria, this kingdom did not go farther inland than the mountains of the Serrania de Ronda and the Sierra d'Elvira.

II. The Naṣrid kingdom in the xvth century. — Muḥammad I died in 671 (1273) and was succeeded by his son Muḥammad II, called al-Faḥḥ, who on his accession sought an

alliance with the Marinids who were finally putting an end to Almohad rule in Morocco. The Marinids answered his appeal. On coming to the throne Muhammad II had found himself faced with the necessity of putting down threatening rebellions; the most serious was that of the Banū Ashqilūlā, governors of Malaga and Guadix. He was able to rout the rebels near Antequera, with the help of forces sent him by the Infante Don Philip and Don Nuño de Lara. On the other hand, he soon realised that the king of Castile, his suzerain, had every interest in letting the kingdom of Granada exhaust itself in internal strife. This is why the Nasrid turned to the Marinids. In consideration for the return of Algeciras [q.v.] and Tarifa [q.v.], the sultan of Fās Abū Yūsuf Yaḥyā b. 'Abd al-Hak̄k agreed to cross into Spain where he inflicted two defeats on the Castilian troops. The chroniclers of the Marinid dynasty record the four expeditions of the king of Fās into Spain and give details of the loss of Tarifa which the Spanish leader Alonso Perez de Guran, celebrated in legend as Guran el Bueno, was to defend heroically a little later, in 1293. But it is from this time that the permanent intervention of the sultans of Fās in the affairs of the Nasrids of Granada dates; under pretence of a *ḡhiād* they were able at every opportunity to add to the confusion of a political situation already much troubled and to weigh heavily upon the destinies of the Nasrid throne by playing a game of alliances which were often broken as readily as they were made. The kings of Granada henceforth were to have at their side a regular body of Moroccan soldiers, the *ghawāt* (sing. *ghawī*) under the command of a Marinid *ghawāṭī*, consisting of adventurers of fortunes who had become more or less undesirable in their native land.

When he died in 701 (1302) Muhammad II was succeeded by his son Muhammad III who was later to be known as al-Makhliṣ (the deposed). It was he who built the great mosque of the Alhambra. He had to put down risings by the governors of Guadix and Almeria but had to bow before the rising of a prince of his family, Abū 'Iḍyūṣāh Naṣr b. Muhammad, who assumed the power in 708 (1309). Muhammad III abdicated and withdrew to Almuñecar [q.v.].

Naṣr's reign was hardly any longer or happier than that of his predecessor. After a display of energy by which he forced the king of Aragon to raise the siege of Almeria and the king of Castile to raise the siege of Algeciras, he failed against a conspiracy hatched by a Nasrid prince Ismā'il, who seized the power in Granada and left only the town of Guadix to Naṣr. The latter established himself here in 713 (1314) and stayed there till his death in 722 (1322).

The fifth Nasrid ruler, Abū 'l-Walid Ismā'il I b. Faraj b. Ismā'il b. Yūsuf b. Naṣr, was one of the most remarkable members of the dynasty. As soon as he had assumed the power, he showed a certain strength of character and did his best to put his frontiers in a state of defence. He regained for a time the old Nasrid lands which had passed to the Marinids: Algeciras, Tarifa and Ronda. In 719 (1319) he had to meet an offensive from Castile and with the help of the Shaikh al-Ghurāt, Abū Sa'id 'Uḥmān b. Abi 'l-'Ulā al-Marīnī, he inflicted heavy defeats on his enemies at Alicum and in the Sierra d'Elvira. In this last battle the Infantes Don Juan and Don Pedro, guardians of

king Alfonso XI, were killed. Soon afterwards, Ismā'il I regained the fortresses of Huescar, Orce and Galera, then that of Baza. In the following year he took Martos. In 725 (1325) he was assassinated in his palace at the instigation of one of his relations with whom he had quarrelled, the lord of Algeciras Muhammad b. Ismā'il. He left four sons of whom the eldest, Muhammad, succeeded him on the throne of Granada.

Muhammad IV was still a minor on his accession and remained for several years under the strict guardianship of his ministers, notably of the vizier Muhammad Ibn al-Mahrūk. The latter, after a long struggle with the Shaikh al-Ghurāt Ibn Abi 'l-'Ulā, was finally put to death by orders of his sovereign who then took the reins of power into his own hands. The remainder of his reign was continually troubled. The help which he sought from the Marinid Sultan Abū 'l-Ḥasan 'Alī against the Christians earned him the enmity of the family of the Banū Abi 'l-'Ulā. In succession he lost Ronda, Algeciras, Marbella and Gibraltar and was ultimately assassinated in 733 (1333).

His brother Abū 'l-Ḥadīd Yūsuf I b. Ismā'il succeeded him and reigned for a considerable period. His first care was to avenge his brother by expelling from his kingdom the Banū Abi 'l-'Ulā who took refuge in Tunis and in giving the office of Shaikh al-Ghurāt to a Marinid lord, Yahyā b. 'Umar Ibn Raḥḥō. The struggle with the Christians was resumed in his reign. He sought and obtained the help of the Marinid Abū 'l-Ḥasan, who crossed the Straits of Gibraltar in 741 (1340) with a large force and laid siege to Tarifa. This expedition ended disastrously. The king of Castile, Alfonso XI, with his army and that of the king of Portugal inflicted a sanguinary defeat on the Muslims near the mouth of the Río Salado, on the 7th Dhu-mādh 1 741 (Oct. 30, 1340). Abū 'l-Ḥasan had to take refuge in Algeciras, whence he was able to reach Morocco. Yūsuf I returned with all speed to Granada, while Alfonso XI profiting by the confusion of the Muslims seized Alcalá la Real, Priego and Benamejí. After taking Algeciras he granted the Nasrid king a truce of ten years, at the end of which he laid siege to Gibraltar. Alfonso XI however died of the plague during the siege. Yūsuf I himself was assassinated by a madman in the great mosque of Granada on the day of the feast of the "Breaking of the Fast" of 755 (Oct. 19, 1354). This Sultan's name will always be associated with certain monuments of the Alhambra. It was he for example who built the great gateway of the enclosure, called *Bāb al-Sharī'a* (gate of the Esplanade; commonly called wrongly "gate of Justice", in Spanish "Puerta Judicaria" or "de la Justicia") the inscription on which records that it was finished in Rabi' I 749 (June 1348; cf. my *Inscriptions arabes d'Espagne*, No. 171). It was also Yūsuf I who in 750 (1349) built the madrasa of Granada (*ibid.*, No. 172).

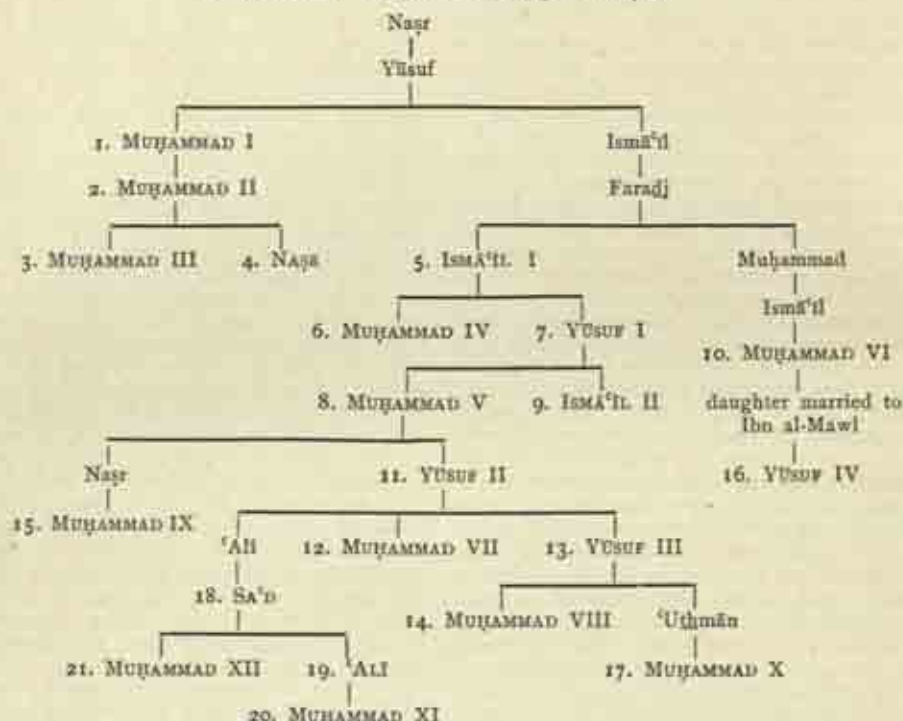

His successor was his eldest son Muhammad V, who bore the honorific *lubb* of al-Ghānī bi-llāh. This sultan left the exercise of power in the hands of his father's old minister, the ḥadīb [q.v.] Ridwān, who maintained peaceful relations with Castile. After a few years, a conspiracy of dissatisfied Nasrid princes forced Muhammad V to abdicate and take refuge in Guadix, and afterwards in Morocco where he was well received by the Marinid sultan Abū Salīm (760 = 1359).

Ismā'il II b. Yūsuf I, brother of Muḥammad V, a Nasrid prince devoid of personality and prestige, was put on the throne, but only for a few months. In 761 (1360) he was assassinated at the instigation of the *ra'īs* Muḥammad VI b. Ismā'il b. Naṣr, who seized the power; his troops soon afterwards suffered a defeat at the hands of the Christians at Guadix. He was soon overthrown by Muḥammad V who had returned to Spain and asked the help of Peter the Cruel of Castile to recover the throne. Muḥammad VI also appealed to the Christian ruler but the latter had him put to death in 763 (1362).

Muḥammad V's second reign lasted for good or evil another 30 years. It was mainly occupied by family quarrels and civil strife. It was at this time that the famous vizier Līṣān al-Dīn Ibn al-Khaṭīb had to seek refuge in Morocco, which however did not save him from assassination. It

(1392) and the throne passed to his son Muḥammad VII. The latter imprisoned his elder brother Yūsuf in the fortress of Salobreña and resumed the offensive against the Christians, who took the fortress of Zahara from him in 809 (1407). When he died next year his elder brother Yūsuf III, the prisoner of Salobreña, assumed power and held it till his death in 820 (1417). After him his eldest son Muḥammad VIII became king of Granada; he is usually called by the chroniclers *al-Aṣḥar* ("the left-handed"). It was in his reign, also much troubled, that we find the family of the Banu 'l-Sarrāj, the Abencerages [q. v.] and that of the Zegrī (Arabic *ṣagārī*; "man of the frontier") beginning to play an important part in the history of Granada and the civil wars which characterise it. After various adventures, Muḥammad VIII had to abandon his

GENEALOGICAL TABLE OF THE NĀSĪDĪ SULTĀNS.

is also at this date that the history of the Nasrid dynasty not only by Ibn al-Khaṭīb, but also by Ibn Khaldūn, stops. Our information about the later rulers is not only scanty but also inaccurate. The relations of the kings of Granada and of the rulers of Castile continued to be much what they had been, traces or expeditions of short duration with limited objectives. But gradually the ultimate aim of Castilian policy became apparent and generally became more and more easily attainable: the capture of Granada, which was at the same time to put an end to the Nasrid dynasty and to Muslim rule in Spanish lands. Below we give only a brief sketch of the last period of the history of the Nasrid kingdom.

III. End of the Nasrid kingdom. — Muḥammad V died in 793 (1391) and was succeeded by his son Abu 'l-Ḥadīd Yūsuf II who reigned only a short time. He died in 794

capital for a time and went to seek an asylum with the king of Tunis, while Muḥammad IX known as al-Saghir assumed power. Muḥammad VIII soon returned and his second reign was marked by the disastrous battle of Higueruela, near Granada, in which the Muslims were routed by the army of John II on July 1, 1431. Al-Aṣḥar had to take refuge in Malaga for some months during which the throne passed to Yūsuf IV b. al-Mawl, a grandson of Muḥammad VI. Al-Aṣḥar then resumed the throne for a third time but the frontiers of his kingdom were shrinking every day. The towns of Jimena, Huescar (1435) and Huelma (1438) fell into the hands of the Christian power and in 1445 Muḥammad VIII was forced to abdicate in favour of his nephew Muḥammad X, while the Abencerages, gathered at Montefrio, proclaimed Abu 'l-Naṣr Sa'd sultan. It was during the latter's reign that in 1462 Gibraltar was taken by Rodrigo

Ponce de Leon and the Duke of Medina Sidonia. Archidona also fell to the Christians. In the reign of his successor Abu 'l-Hasan 'Alī, the Christian offensive, with the accession of the Reyes Católicos, Ferdinand of Aragon and Isabella of Castile, developed an extent and energy which it had rarely displayed previously. The second last Nasrid king Muḥammad XI, generally known in history as Boabdil (a corruption of his kunya Abū 'Abd Allāh), was forced to declare himself the vassal of the Reyes Católicos and the last Muḥammad XII called al-Zaghall ('the brave') in spite of initial successes at the siege of Loja (1482) and the battle of al-Sharḥiya (1483), had no alternative but to bow to the triumph of the Castilian armies, and withdrew when the situation became hopeless to his estates of Alpujarra [q. v.]. Loja (1486), Vélez-Málaga, Málaga and Almería (1487), Baza (1489) fell in succession. There was nothing left for Granada but to open its gates to the conquerors who entered it on 2nd Rabi' I, 897 (Jan. 1492). Muḥammad XI became an exile in Morocco where he ended his days in poverty and misery.

NASS (A.), etymologically: what is apparent to the eye, as a technical term: text. In this sense the word does not occur in the Qur'ān nor in the *Hadīth*. Al-Shāfi', on the other hand, appears to be acquainted with it. In his *Risāla* he uses it chiefly in the sense of *nass* = *ḥukm* (p. 7, 16, 30, 41) or *nass* = *ḥukm* (p. 5) "what has been laid down in the Qur'ān". In other passages *nass* al-*ḥukm* is distinguished from *sunna* (p. 21, 4, infra, 24, 7, *passim*, 30, 22, 63, 22). The combination *nass sunna* occurs, however, also (p. 50, 14, 66, 2). From these passages it may also appear that al-Shāfi' uses the term chiefly to denote legal precepts. In accordance with this is the definition of the term as given in the *Lisān al-'Arab*: "the *nass* of the Qur'ān or of the *sunna* means the precepts (*ahkām*) contained in the plain words (*ṣāḥih*) of these sources".

An extension of the term has taken place chiefly in three directions, so that *nass*, apart from the general sense of text, may mean: a. the text of a precept of the law, written or not written; b. the *ṣāḥih* [q. v.] of a sacred text; c. the sense of such a text. For other special meanings of the term, cf. Dozy, *Suppléments aux dictionnaires arabes*, u. v.

NASSADS were the light wooden warships built in Nassau or Hohenau (Lower Austria), the "Nassauer" or "Hohenauer", Magyar *nassád*, pl. *nassádok*, Slav. *nasad*, which were used on the Danube. They were usually manned by Serbian seamen who were called *martaloses* (from the Magyar *martalo*, *martalo*, lit. "robber"). According to a Florentine account, this Danube flotilla in 1475 consisted of 330 ships manned by 10,000 "nassadiats" armed with lances, shields, crossbow or bow and arrow, more rarely with muskets. The larger ships had also cannon. About 1522 the commander of the Danube fleet was Radić Bošić who reorganised it at Peterwardein (cf. K. J. Jireček, *Geschichte der Serben*, III, 258 sq.). Through want of money, the Serbian seamen then deserted to the Turks (*ibid.*, p. 262) who after the fall of Belgrade seized the Danube fleet and developed it into a powerful arm. About 1530 the Danube fleet consisted of 800 nassada and was commanded by the voivod Klišim (cf. J. v. Hammer, *G. O. R.*, III, 85).

NASTA'LIK. [See ARABIA, I, 391b.]

NAṢUH PASHA, an Ottoman grand vizier, was of Christian descent and was born either in Gümüldjina (the modern Komotini, Thrace, Greece) or in Drama. According to some sources (e. g. Bandier and Grimestone in Knolles), he was the son of a Greek priest, according to others (e. g. Na'imī, *Tārīkh*, first edition, p. 283: *urnaud*

(*gjinë*) of Albanian origin. He came early in life to Stambul, spent two years in the Old Seray as a *tiberdar* (halbardier) and left it as a *janik*. Through the favour of the *anjan's* confidant Mehemmed Agha he rapidly attained high office. In quick succession he became woiwod of Zile (Anatolia), master of the horse and governor of Füleke (Hungary). He married the daughter of the Kurdish Mir Sherif and thereby obtained riches as great as his power, which every one was now beginning to fear. His ambition and arrogance, his venality and cruelty knew no bounds and he was even said to be aiming at the throne. In 1015 (1606) he was to conduct the campaign against Persia, as the son-in-law of Mir Sherif and on account of his local knowledge, with the rank of third vizier and ser'asker, but his attention was claimed by the trouble in Anatolia which was affecting the whole of Asia Minor; through Kurd treachery he lost a battle and it was only in the autumn of 1608 that his troops joined the army of the grand vizier who received him very coolly (cf. J. v. Hammer, *G. O. R.*, iv. 412 sq.). In 1011 (1602) Naşuh Pasha had been appointed governor of Siwan, the next year of Halab and in 1015 (1606) of Diyarbakir. His goal was the grand viziership. He did not hesitate to ask the sultan to give him the imperial seal and the post of commander-in-chief in return for a sum of 40,000 ducats and the maintenance of the army at his own expense. Ahmad I handed on the offer to the grand vizier, who summoned Naşuh Pasha to him and fined him that sum as a punishment (cf. J. v. Hammer, *G. O. R.*, iv. 446 sq.). When soon afterwards the grand vizier, the Croat Kuyudju Murid Pasha died at the age of over 90, Naşuh Pasha became his successor (Aug. 22, 1611). In the following year he married 'A'isha, the three year old daughter of Sultan Ahmad I (Feb. 1612). His arrogance now knew no bounds; all his opponents were ruthlessly disposed of. His personal qualities dazzled everyone: "Of imposing appearance, brave and eloquent, never weary of talk or action, but at the same time passionate, impetuous, quite incapable of kindly conduct and flattering words and always intent on humbling the other viziers" (J. v. Hammer, *G. O. R.*, iv. 472). As human life was nothing to him but wealth everything, he accumulated vast treasures. Sycophants and astrologers nourished in him the delusion that he was born to rule. The number of his enemies increased from day to day as a result of his intrigues and his ruthlessness. When on Friday the 13th Ramadan 1023 (Oct. 17, 1614) he was to accompany the Sultan to the mosque, suspecting no good, he said he was ill. The *bestanji bashi* sent to him had him strangled by his own garden guards. His body was buried on the Oğ Maidan. His estate which fell to the coffers of the state was enormous: pearls, jewels, carpets, cloth and bullion without number (cf. J. v. Hammer, *G. O. R.*, iv. 474 sq. quoting Merzeray, ii. 195). — Naşuh Pasha left several sons, one of whom Hussin Pasha (d. 1053 [1643]; cf. J. v. Hammer, *G. O. R.*, v. 260 and Hâdjidi Khalifa, *Fedhike*, ii. 226) had a son named Mehmed. The latter wrote a history of the Ottoman empire (*Dhikri Tawârihi-i Ahi 'Othmân*) from the death of Murid IV (1048 = 1639) to 1081 (1670) the original MS. of which is in Dresden (cf. F. Bahinger, *G. O. W.*, p. 211).

Bibliography: The historians Na'imâ and Peçewî, utilised by J. v. Hammer, *G. O. R.*, iv. 319, 384, 412, 446, 448, 463, 471, 475; also O. Barozzi and G. Berchet, *Relazioni degli ambasciatori Veneti: Turchia*, i. 259; Hurmuzaki, *Suppl.*, i. 142 sq.; Hans Jakob Amann, *Reise ins GLOBE Land*, ed. A. F. Ammann (Zurich 1919—1921), p. 44, 107 sq., 119, 125, 127—130. — On an Arabic work dealing with Naşuh Pasha's governorship in Halab cf. F. Bahinger, *G. O. W.*, p. 211, note. — Sources of secondary value are *Sig'ill-i 'Othmânî*, iv. 556 and *Hâdikat al-Wuward*, p. 59 sq. (with many errors). — On the rumour that Naşuh Pasha had made an arrangement with the Persians and that the discovery of this treachery caused his death, cf. the contemporary stories mentioned by J. v. Hammer, *G. O. R.*, iv. 474, note, as well as the Paris pamphlet of 1615. (FRANZ BAHINGER)

NATIDJA (A.) is the usual name for the conclusion resulting from the combination of the two premisses (*muşadidamâr*) in the syllogism (*hiyâ*). It corresponds to the Stoic *ἐκφορά*; this word in the works of Galen known to the Arabs is applied to the various discharges from the body but also means, as with the Stoics, the conclusion. Aristotle used the word *ἐκφορά*: that which concludes or completes the syllogism.

In place of the usual *natidja* we also find *ridf* or *radf* (= deduction). (TJ. DE BOER)

NÂTIK. [See *SAR'IVA*.]

NAVARINO (*Ναβάρνο*), a little seaport in the southwest of Messenia not far from the ancient Pylos, opposite the promontory of Koryphasium on which there was in prehistoric times an acropolis and later, during classical antiquity, an often mentioned settlement. The harbour of Navarino is one of the safest in the Greek east for it is sheltered by the island of Sphacteria, which lies right opposite it and has intimate connections with many ancient, medieval and modern events. Recent research has shown that Navarino has no connection with the Homeric Pylos. The latter was in Triphylia near the village of Kakobatos where prehistoric tombs were recently excavated. The derivation of the name Navarino cannot be given with certainty. According to Fallmerayer, *Gesch. der Halbinsel Morea*, i. 188, the name Navarino is a distinct survival of Avar rule in Morea between 587 and 807. On the other hand, Hopf thought that it owed its name to the Navarrese (cf. below). Fallmerayer's view has been adopted by E. Curtius, *Peloponnesos*, i. 86; ii. 181 and W. Miller among others. According to M. Leake, *Travels in the Morea*, i. 411, the name Navarino developed from *sic* τὸ 'Αβάρνο. Hopf's view is however wrong, for Navarino is mentioned before the appearance of the Genoese in the Morea. In the middle ages the country round Navarino

was called Zonglon (Zonchio), from which came the French name of the place Junch (Old French *junc* 'rush'). One of the earliest mentions of Navarino is in the geographical treatise, the *Nushat al-Mushat* of Idrisi; he refers to the place as Irouda and adds that it has 'a very commodious harbour'. After the period of Frankish rule, information about Navarino becomes fuller. The Knights, who under Guillaume de Champlite and Godefroy de Villeharduin had planned the conquest of the Morea, in 1205 took its inhabitants and governor prisoners after the capitulation of Navarino.

Later the Baron of Thebes and Marshal of Achaia, Nicolas St. Omer (d. 1294), built for his nephew Nicolas III St. Omer, the Neocastro (New Castle) of Navarino. This is said, according to Buchon, to have been called Neo-Avarino in contrast to Palio-Avarino. At the end of 1381 or early in the next year, the Navarrese company seized Navarino and made it the chief centre of their military power. Navarino then became known as Château Navarres (*Voyage d'Oultremar, par le Seigneur [Nompur] de Caumont*, publ. par la Grange, Paris 1858, p. 89). The Greeks however at this time called Navarino Spanochori (= village of the Spaniards, after the Navarrese). In 1417 Venetian soldiers occupied Navarino and six years later the republic of St. Mark became the lawful owner of the place. In the summer of 1460 Sulṭān Muḥammad II appeared before Navarino with an army, which, in spite of the recently concluded peace treaty, laid waste the country round the town. In August 1500 the Turks took Navarino from the Venetians without difficulty after taking Modon and Koron shortly before, although the garrison of Navarino numbered 3,000 soldiers and had provisions for about three years. Soon afterwards the Venetians were able to retake Navarino by a stratagem and to destroy the Muslim garrison. 'Alī Paṣhā now advanced from the land and Kemāl Rē's attacked with his fleet by sea and in 1501 they took finally Navarino, inflicting great losses on the Venetians. Navarino retained its importance under Turkish rule and was often the place of concentration of the imperial fleet. Ḥādīdī Khālifa and Ewliyā Çelebi give some important information about Navarino and the former says that its original name was Anavarin. In the year 1686 the Venetians again took the town which they held till 1715. The Turks then entered upon their last period of occupation.

During the first Russo-Turkish War in the reign of Catherine II (1768—1774) Navarino played an important part. After a stubborn defence for six days by the Turkish garrison and the Muslim civilian population, the Russians on April 10, 1770 forced the fortress of Navarino, no longer strongly enough fortified but still amply provided with munitions and artillery, to capitulate. By the terms of the treaty, the Turks of Navarino went to Chania (Crete) leaving behind them a number of Christian women whom they had had imprisoned in their harems. Soon afterwards the Russians made Navarino, the fortifications of which they renovated, their principal base of operations in the Morea. Fate decided that the Russians had to evacuate Navarino again. On June 1, 1770, the Russian ships sailed from the harbour of Navarino. The Turks next day occupied the well placed fortress, which was in part burned and destroyed.

During the last decades of Turkish rule in the Morea, the Turkish family of Bekir-Agha of Navarino played a prominent part. Soon after the outbreak of the War of Liberation, the Greeks laid siege on March 29, 1821 to Navarino where the Turks of Arcadia (Cypritis) had also taken refuge. On Aug. 7, 1821 the Turks surrendered to the Greeks who massacred them all without mercy in spite of all agreements. In the spring of 1825, Ibrāhīm Paṣhā of Egypt occupied Navarino and the neighbouring fortress in spite of a heroic defence by the Greeks.

What gave Navarino its special place in history was the naval battle fought on Oct. 20, 1827 in its harbour between the combined fleets of England, France and Russia on one side and those of Turkey, Egypt and Tunisia on the other, in which the latter were almost completely destroyed. It is calculated that the Turks lost 6,000 killed and the allied losses were only about 1,000. Soon after the battle, Ibrāhīm Paṣhā concluded a truce with Admiral Codrington.

Navarino remained in Ibrāhīm Paṣhā's hands until the spring of 1828. The French under General Maison then relieved the Egyptian-Turkish troops. Alfred Reumont gives a fine picture of Navarino under French occupation in 1832.

NAVAS DE TOLOSA (LAS), a place in the south of Spain in the province of Jaen on the frontier of Andalusia, a short distance from the modern town of Carolina. Its site corresponds to that of a fortress called *Ḥiṣn al-Ḥāsh* in the Muslim period. It was in the plain which lies in front of it that there was fought on the 15th Safar 609 (July 16, 1212) the great battle between the Christians and the Almohads which ended in the rout of the latter.

As a result of the defeat of Alarcos [q.v.], the king of Castile, Alfonso VIII, had concluded a truce with the Muslims. On its expiration at the end of the xiith century, the Christian troops began a series of surprise attacks on the Muslim frontiers. Disturbed at this, the Almohad ruler al-Nāṣir [q.v.] prepared a great expeditionary force in Morocco while on his side the king of Castile secured the help of the kings of Aragon,

Navarre and Leon, as well as of the Count of Portugal and the Pope, who preached a crusade against the infidel. The Christian troops gathered in Toledo and set out on June 20, 1212. The encounter was a bloody one. The Muslim volunteers from Morocco and the Andalusian contingents soon lost ground and the Almohad *ʿabid* were in their turn decimated. The victors were able to exploit their success and took Ubeda [q.v.], Baza [q.v.] and other strongholds. The Christian victory of las Navas de Tolosa was certainly one of the most important steps in the "Reconquista".

Bibliography: The Arab historians given in the bibliography to the article ALMOHADS and Ibn ʿAbd al-Munʿim al-Himyari, *al-Rawaf al-miʿyar*, article AL-ʿISKĀN. — A study on the campaign of 1212 by A. Huici, *Estudio sobre la campaña de las Navas de Tolosa* appeared in *Anales del Instituto General y Técnico de Valencia*, Valencia 1916.

NAWĀR. [See NURĪ.]

AL-NAWAWI (OF AL-NAWĀWI), MUHYI AL-DIN ABU ZAKARIYĀʾ YAḤYĀ B. SHARAF B. MURĪ following Nawawī's own spelling, Suyūṭī, fol. 53^b) B. HĀSAN B. HUSAIN B. MUHAMMAD B. DĪNAR B. HIZAM AL-HIZĀMĪ AL-DIMASHQĪ, a Shāfiʿī jurist, born in Muḥarram 631 (Oct. 1233) in Nawa south of Damascus in Djawlān. The ability of the boy very early attracted attention and his father brought him in 649 to the Madrasa al-Rawāḥiyya in Damascus. There he first of all studied medicine but very soon went over to Islamic learning. In 651 he made the pilgrimage with his father. About 655 he began to write and was called to the al-Ashrafiyya school of tradition in Damascus in succession to Abū Shāma who had just died. Although his health had suffered severely during his life as a student, he lived very frugally and even declined a salary. His reputation as a scholar and a man soon became so great that he even dared to approach Sultān Balbars to ask him to free the people of Syria from the war-taxes imposed upon them and to protect the teachers in the madrasas from a reduction in their income. This was in vain however, and Balbars expelled al-Nawawī from Damascus when he alone refused to sign a *fatwā* approving the legality of these exactions. (This action of al-Nawawī's is commemorated in the popular romance *Strat al-Zāhir Balbars*, Cairo 1326, xli. 38 199, in which the Sultān, cursed by al-Nawawī, becomes blind for a time.) He died unmarried in his father's house in Nawa on Wednesday 24th Rabiʿ al-Thani 724 (Dec. 22, 1277). His tomb is still held in honour there.

Al-Nawawī has retained his high reputation to the present day. He had an exceptional knowledge of Tradition and adopted even stricter standards than later Islām; for example he admits only five works on Tradition as canonical, while he expressly puts the *Sunan* of Ibn Māḍja on a level with the *Musnad* of Ahmad b. Ḥanbal (cf. *Sharḥ Muslim*, I, 5; *Aḥkām*, p. 3). In spite of his fondness for Muslim, he gives a higher place to Bukhārī (*Tahqīq*, p. 550). He wrote the principal commentary on Muslim's *Ṣaḥīḥ* (pr. in 5 volumes, Cairo 1283); as an introduction to this, he wrote a history of the transmission of this work and a sketch of the sciences of Tradition. He gives not only observations on the *ṣunūn* and a grammatical explanation of the traditions but he also comments on them,

mainly from the theological and legal aspect, quoting when necessary not only the founders of the principal schools but also the older jurists like al-Awāzī, ʿAṣā, etc. He also inserted headings (*tarjama*) in Muslim's work. We may also mention his frequently annotated *Kitāb al-Arbaʿin* (pr. Hildesheim 1294 and often since) and portions of commentaries on al-Bukhārī (*G. A. L.*, I, 158) and Abū Dawūd (Ibn al-ʿAṭṭār, fol. 10^v); and an extract from Ibn al-Ṣalāḥ, *ʿUlūm al-Ḥadīth* with the title *al-Tahṣīl wa ʿl-Taḥṣīl*, partly transl. by Marçais, in *J. A.*, ser. 9, xvi.—xviii, and printed at Cairo 1307, with a commentary by al-Suyūṭī, *Tahṣīl al-Rawāf*.

Al-Nawawī's importance as a jurist is perhaps even greater. In Shāfiʿī circles he was regarded with his *Minḥāj al-Tālibīn* (finished 669; pr. Cairo 1297 and frequently; ed. van den Berg with French transl., Batavia 1882—1884; cf. thereon Snouck Hurgronje, *Verspreide Geskr.*, vi. 3—18) as the highest authority along with al-Rāfiʿī and since the tenth (xvth) century the two commentaries on this work, Ibn Ḥajjar's *Tuhfa* and al-Ramli's *Nihāya*, have been regarded almost as the law books of the Shāfiʿī school. The book consists of excerpts from the *Muḥarrar* of Rāfiʿī and, as the author himself says, is intended to be a kind of commentary on it. It certainly owes the estimation in which it is held also to the fact that it goes back via al-Rāfiʿī and al-Ghazālī to the Imām al-Haramain. We should also mention the *Ramḍā fī Muḥṭasab Sharḥ al-Rāfiʿī* (on Ghazālī's *Wafāʾ*) finished in 669 on which commentaries have often been written and the commentaries on Shīrāzī's *al-Muḥaddithāt* and *al-Tanbīh* (*G. A. L.*, I, 387) and al-Ghazālī's *al-Waṣīṭ*, which do not seem to have survived, and a collection of *fatwā*'s put together by his pupil Ibn al-ʿAṭṭār (Cairo 1352).

His biographical and grammatical studies resulted in the *Tahqīq al-ʿAsmāʾ wa ʿl-Lughāt* (Part 1 on the names, Wüstenfeld, Göttingen 1842—1847; Part 2 only in Ms. in Leyden; included by Ibn al-ʿAṭṭār among the unfinished works and there are certainly gaps in it) and *al-Tahṣīl fī Alfāz al-Tanbīh*. To his mystical tendencies — he had attended lectures on the *Risāla* of al-Kunhāfi and transmitted it — we owe works like the *Kitāb al-Aḥkām* on the prayers, finished in 667 (pr. Cairo 1331 and frequently), the *Riyāḍ al-Ṣāliḥīn* (finished in 670; pr. Mecca 1302, 1312) and the incomplete *Ḥusn al-ʿArifin fī ʿl-Zuhd wa ʿl-Taqawwuf*. An almost complete list of his some 50 works is given in Wüstenfeld, p. 45 199, those that are still in MSS. are given in Brockelmann, *G. A. L.*, I, 394 199, and index and those that are printed in Sarkis, *Maʿjmaʿ*, col. 1876—1879.

Bibliography: Ibn al-ʿAṭṭār (d. 724 = 1324), *Tuhfat al-Tālibīn fī Tarjamat Shaikhīn al-Imām al-Nawawī* (with many *marʿat*'s), MS. Tübingen, N^o. 18; al-Sakhāwī (d. 902 = 1496—1497), *Tarjamat Kitāb al-Awāzī* ... al-Nawawī, Ms. Berlin, Wetstein, II, 1742, fol. 140—207 (Ahlwardt, N^o. 10125); al-Suyūṭī, *al-Minḥāj fī Tarjamat al-Nawawī*, MS. Berlin Wetstein II, 1807, fol. 53^r—68^r (Ahlwardt, N^o. 10126); al-Sabkī, *Tahqīq al-ḥikāya al-kubrā*, Cairo 1324, v. 165—168; al-Qḥabāt, *Tahqīq al-ḥikāya*, Haidarābād n.d., iv. 259—264; al-Yāfiʿī, *Mirʾat al-Dīnān*, Haidarābād 1339, iv. 182—186; the other sources are printed in Wüsten-

feld, *Über das Leben und die Schriften des Scheich Abu Zakariya Yahya al-Nawawi*, Göttingen 1849; Snouck Hurgronje, *Verspre. Geschriften*, ii. 387 sq. For the reference to the popular romance I am indebted to Herr cand. phil. Wangelin.

(HEFFERING)

AL-NAWAWI MUHAMMAD b. 'OMAR b. 'ARABI al-Djawi, an Arabic writer of Malay origin, born in Tanjara (Banten), the son of a village judge (*pangulu*), after concluding his studies made the pilgrimage to Mecca and settled there permanently about 1855, after making a short visit to his native land. After he had studied further and completed his education with the teachers of the holy city, he set up as a teacher himself and gained great influence over his fellow countrymen and their kinsmen. From 1870 he devoted half his time to authorship. He was still alive in 1888.

He wrote a large number of commentaries on popular textbooks, which are listed by Brockelmann, *G. A. L.*, ii. 501 in addition to Snouck Hurgronje, *Mekka*, ii. 362 sqq. Of these the following may be mentioned, with some information additional to what is contained in these two works.

He expounded the *Kur'an* in his *al-Tafsir al-muntazir li-Ma'ālim al-Tanzil al-murfi 'an Wafiqū Maḥsin al-Tawil*, Cairo 1305. In the field of *Fiqh* he annotated the *Fatḥ al-Karīm* of Muḥammad b. al-Kāsim al-Ghazālī (d. 918 = 1512), a commentary on Abū Shudjā' al-Isfahānī's *al-Taḥrīr*, entitled *al-Tawḥīd*, Cairo 1305, 1310, and again entitled *Kut al-Ḥadīth*, Cairo 1301, 1305, 1310. — He wrote a commentary on al-Ghazālī's *Biḍāyat al-Hidāya* under the title *Marāḥiṭ li-Uḥūdīya*, Bulāq 1293, 1309; Cairo 1298, 1304, 1307, 1308, 1319, 1327. — On the *Manāḥib al-Ḥafīd* of Muḥammad b. Muḥammad al-Shirīnī al-Khaṣīb (d. 977 = 1569) he wrote *al-Fatḥ al-muḥīḍ*, Bulāq 1276, 1292; Cairo 1297, 1298, 1306; Mecca 1316. — On the *Safinat al-Salāḥ* of 'Abd Allāh b. Yahyā al-Ḥadramī he wrote the *Sullam al-Munāḥiṭ*, Bulāq 1297; Cairo 1301, 1307. — He wrote a commentary on the 601 questions of Ahmad b. Muḥammad al-Zahid (d. 819 = 1416) put into verse by his fellow countryman Muṣṭafā b. 'Othmān al-Djawi al-Karīm as *al-Fatḥ al-muḥīḍ* on *salāt*, *ahm*, *fast* and *pilgrimage* under the title *al-Ḥidāya* under the title *Marāḥiṭ li-Uḥūdīya*, Cairo 1300; the *Safinat al-Naḥḍ* of Salīm b. Samīr of Shīr in Ḥadramawt, ended in Batavia, was expounded under the title *Kawāḍif al-Saḥā*, Cairo 1292, 1301, 1302, 1303, 1305; Bulāq 1309. — On the exposition of the *uṣūl al-dīn* by his colleague Muḥammad b. Sulaimān Ḥaṣṣb Allāh entitled *al-Riyāḍ al-tadī'a* he wrote the commentary *al-Thimār al-yūnūs*, Cairo 1299, 1308, 1329; Bulāq 1302.

In the field of dogmatics he annotated al-Sanūsī's *Umm al-Barāhīn* (d. 892 = 1496) entitled *Ḍaw'at al-yafīn*, Cairo 1304; the *Aḥḍat al-'Aḍām* of Ahmad al-Marzūqī (c. 1281 = 1864) entitled *Nūr al-Zalām*, Cairo 1303, 1329; al-Būḥārī's *Riḍāla fi 'Ilm al-Tawḥīd* entitled *Tiḍwān al-Dawr*, Cairo 1301, 1309, Mecca 1329; the *Maḥāṣil* of Abū 'I-Laili entitled *Kaṣr al-Ghaith*, Cairo 1301, 1303, Mecca 1311; the anonymous *Fatḥ al-Rahmān* entitled *Ḥilyat al-Shayān* in a *Maḥmūd*, Mecca 1304; the *al-Dawr al-farīd* of his teachers Ahmad al-Nahrāwī entitled *Fatḥ al-muḥīḍ*, Cairo 1298.

In the field of mysticism he wrote a commentary on the *Manṣūma Hidāyat al-Aḥkīyā*

līlā Tarīk al-Awliyā' of Zain al-Dīn al-Malibārī (d. 928 = 1522) entitled *Salām al-Fuḍāḥ*, Cairo 1301, Mecca 1315; and on his *Manṣūma fi Sāw'ah al-Insān* he wrote the *Kāṣi' al-Tiḥyān*, Cairo 1296. On the *al-Manḥaḥ al-atamm fi Tahwīḥ al-Ḥukm* of 'Alī b. Ḥusām al-Dīn al-Hindī (d. 975 = 1567) he wrote *Miṣṣah al-Zuḥm*, Mecca 1314. — His commentaries on stories of the life of the Prophet may be classed as edifying popular literature; such he wrote on the *Mawlid al-Nabī* under the title *al-'Arw*, Cairo 1926, which is ascribed by some to Ibn al-Djawi, by others to Ahmad b. al-Kāsim al-Ḥarīrī, entitled *Fatḥ al-Samad al-'Alīm 'alā Mawlid al-Shaikh Ahmad b. Kāsim wayuzammā al-Buḥūq al-Fawāḥ li-Ḥaym Aḥṣā Mawlid Ibn al-Djawi*, Bulāq 1292, entitled *Buḥyāt al-'Aḍām fi Sharḥ Mawlid Sayyid al-Anām li-Ibn al-Djawi*, Cairo 1927 and *Fatḥ al-Samad al-'Alīm 'alā Mawlid al-Shaikh Ahmad b. Kāsim*, Mecca 1306, as well as on the *Mawlid* of Dja'far al-Barzandī (d. 1179 = 1765) entitled *Targhib al-Muḥtashin*, Bulāq 1292, and again under the title *Maḥāṣil al-Su'ūd*, Bulāq 1296, and on his *al-Khaṣṣi' al-nabawīya* entitled *al-Durār al-bakiya*, Bulāq 1299. He made an excerpt from al-Kastallānī's (d. 923 = 1517) *Mawlid* entitled *al-Sirt al-dāni fi Mawlid Sayyidnā Muḥammad al-Sayyid al-'Aḍām*, Cairo 1299.

In the field of grammar he wrote a commentary on the *Adjurrūmiya* entitled *Kawāḍif al-Murūfiya 'an Sifāt al-Adjurrūmiya*, Cairo 1308 and on a versification *Fatḥ al-Ghāṣir al-Khaṣṣi' 'alā 'I-Kawāḍif al-djāliya fi Naḥḥ al-Adjurrūmiya*, Bulāq 1298, on 'Abd al-Mun'im 'Iwād al-Djirdāwī's (c. 1271 = 1854) *al-Rawḍa al-bakiya li-'Abd al-tayyib* entitled *al-Furūq al-yāḥiyya*, Cairo 1299. In the field of rhetoric he completed in 1293 (1876) a commentary on the *Riḍālat al-Ṣi'arāt* of Ḥusām al-Nawāwī al-Millīki entitled *Zuhb al-Bayān*, Cairo 1301.

Bibliography: In the article; cf. also J. L. Sarkis, *Muḥḍam al-Maḥḍāt*, vol. 1879—1883. (C. BROCKELMANN)

NAWBA, an art-form in the music of the Islamic East similar to the European cantata or suite. There are two varieties: 1. the nawba of chamber music, and 2. the nawba of military music (for the latter see *ṬARĪK KHẖNA* in the *Supplement*). The nawba of chamber music varies in construction according to its provenance, and does not always carry this particular name. As early as the viiith century A.D. we appear to see this nawba in its nascent stage. The musicians at the court of the Caliphate under the early 'Abbāsids performed in turn (*dawr*) and succession (*nawba*), and by the time of al-Wāḥidī (d. 847) we know that a court musician had a particular day for his nawba (*Kitaḥ al-Aḥḍāt*, iii. 177; v. 82, 120; vi. 73; x. 123; xvii. 131; xxi. 150). Some musicians were famous because they specialized in certain genres of music, such as Ibrāhīm al-Mawālī in the *māḥūrī* and Ḥakam al-Wālī in the *ḥanaḍī* rhythms (*Aḥḍāt*, vi. 12, 66), and a programme made up of these diverse types of music probably led to the term nawba being transferred to the programme itself (Ribera, *Las Cantigas*, p. 48).

Although we read in the *Alf Laila wa-Laila* of a nawba (ii. 54), a *dāriq* (a quick movement; cf. the modern *dawr*) of a nawba (ii. 87), as well as a complete nawba (iv. 173) being played, yet it is not until the xivth century A.D. that we

possess precise information about the nawba and its integral parts. 'Abd al-Kādir b. Ghāibī [q.v.] tells us that among the ancient forms of musical composition were the nawba, *naẓm* and *ḥarf*. The nawba, he says, was made up of four movements (*ḥikā'*) viz., the *ḥawī*, the *ghazal*, the *tarāna*, and the *furū ḍāḥḥ*. In the year 1379, whilst at the court of Djalāl al-Dīn al-Ḥusain the Djalā'irid sultan of al-Ḥirāḥ, Ibn Ghāibī introduced a fifth movement to the nawba, which he called the *mustafīd*. During this occasion, he tells us, he composed fifty *namūdāt* for the court, and the words of one of these have been preserved (fol. 95v). These five movements were instrumental as well as vocal, and besides the verse-form being specified (the *tarāna* for instance was in *ruḥḥ*), the rhythms (*ḥikā'*) for the instrumental accompaniments were also prescribed, one of the *ḥikā'* group being essential. The purely instrumental movements are also mentioned by Ibn Ghāibī including the overture called the *ḥikā'*, which even to-day is the prelude to the nawba. He calls it *naẓm* ("embroideries"), and says that the *ḥikā'* *al-furūḥ* has three, five, or seven sections (*ḥayāt*).

In days of old the nawba was considered the most important art-form in the music of Islamic peoples. To-day it has fallen into neglect and in some countries will probably soon disappear. Two distinct cultures may be found in the modern nawba, the Eastern and Western. The former is clearly a survival of that nawba described by Ibn Ghāibī in the sixteenth century A.D. The latter is claimed (Yāfil) to have had its origin in al-Andalus in the eighth–eleventh century, and is known to-day as the *nawba ḡharṇāfi*. It is confined to North Africa, the purest type being found in the West, whilst the nearer the East is approached the more we find the influence of the Eastern nawba.

The Levantine nawba to-day comprises the following movements: 1. The *ṭāḥīm*, an instrumental prelude played by the *ma'allīm* or *chef d'orchestre*; 2. the *ḥikā'* or *ḥarf*, an instrumental overture; 3. the *ḥār*, a vocal movement; 4. the *ṣurabā'*, whose name recalls the form of the sixteenth century *tarāna*; 5. the *naẓm*, also reminiscent of the *naẓm* of old, since its function is tonal "embroidery"; 6. the *ḡḡḡ samā'i*, in slow rhythm; 7. the *ḡḡḡ*, comprising verses; 8. the *yūḡḡ samā'i*; 9. the *ḥikā'* *ḡḡḡ*, an instrumental finale (cf. Thibaut and Lavignac, v. 286f). A shorter nawba is described by Ducoudray (p. 22), whilst the famous British musician Sir Arthur Sullivan has related (*Fortnightly Review*, 1905, p. 86) his experiences as an auditor of the nawba. The various movements, especially the instrumental ones, are also cultivated in the Near East as sole items of performance, the *ḥikā'*, *ṭāḥīm*, and *ḡḡḡ* being special favourites. The *ḥikā'* or *ḡḡḡ* is still composed in sections as of old, but these are called *ḡḡḡ* instead of *ḡḡḡ*. Another interesting type of nawba in Egypt includes the dance, and an example is given in complete score by Victor Loret. It comprises seven movements: 1. The *ḡḡḡ*, for instruments and voices; 2. the *ṭurḡḡḡ al-ḡḡḡ*, for the ballet; 3. the *ṭāḥīm*, for the solo dance; 4. the *ṭurḡḡḡ al-ḡḡḡ*, for the ballet; 5. the *ṭāḥīm*, for the solo dance; 6. the *ṭurḡḡḡ al-ḡḡḡ*, for the ballet; 7. the *ṭāḥīm*, for the solo dance. The whole is accompanied by choir and instruments.

In Western Turkestan the nawba of to-day

shows that in the Middle East it has developed somewhat differently from that of the Levant. Here, more attention has been paid to the purely instrumental movements, and they have been kept separate. The nawba is here called a *maḡmūḡ*, a name which properly stands for "a melodic mode". It is divided into three parts, the first two being the most important. These two are the *muḡḡḡḡḡ* or instrumental pieces, and the *naw* comprising vocal-instrumental pieces. The names of most of the sections of the *muḡḡḡḡḡ* and *naw* refer to either rhythmic (*ḡḡḡ*) or melodic modes (*maḡmūḡ*), although two of them, the *ḡḡḡ* and the *ṭāḥīm*, retain names which occur in the sixteenth century Ibn Ghāibī treatise. In Bukhārā, only six *maḡmūḡ* (= *namūdāt*) appear to have survived, although the Uzbeks claim that they know others. These six have recently been described by the Uzbek poet Fitrat, whilst the notation has been published by a Soviet Union official, Colonel V. A. Uspensky. There is also another but shorter type of *maḡmūḡ* known in Bukhārā, and six of these have also survived. In Khwārizm, the *muḡḡḡḡḡ* of the *maḡmūḡ* (= *namūdāt*) differ from those of Bukhārā, and here an additional one has been spared the ravages of time. The Khwārizm *muḡḡḡḡḡ* are probably purer than those of Bukhārā because they appear to have been handed down, not *visu voce* as elsewhere, but by means of a notation which was known as early as the time of the Khwārizm Shāh 'Alī al-Dīn Muḡammad (d. 1220) (cf. *Pre-Musica*, New York 1927, v.; *The Sackbut*, London 1924, iv.).

In North Africa, as already stated, a different tradition in the nawba has been followed. Here there are several varieties, but the most highly esteemed is the *nawba ḡharṇāfi*. As the name signifies, al-Andalus is the place of origin, and this is claimed for both the words and music. Although MSS. exist which contain the words of the Granadan *namūdāt*, yet we only know the music itself from modern Moorish practice. We read of the "twenty-four *namūdāt*", which tells us that the *namūdāt* were composed in the twenty-four modes (*ḡḡḡ*). Others say that the Andalusians only possessed twelve or fourteen *namūdāt* (F. Salvador-Daniel, p. 52; Yāfil, Pref.) but it has now been shown (Farmer, *An Old Moorish Lute Tutor*) that there were twenty-four originally, but their names are different from those which some writers have presumed (Delphin et Guin, p. 62; Lavignac, v. 2859). The *nawba ḡharṇāfi* as performed in Algeria to-day comprises the following movements: 1. the *ḡḡḡ*, a short vocal prelude; 2. the *ṭurḡḡḡ*, an instrumental prelude; 3. the *ṭāḥīm* or *ṭurḡḡḡ* ("ornamenting"), the overture proper; 4. the *maḡḡḡ* or *maḡḡḡḡḡ*, a vocal movement, preceded by a short instrumental prelude called a *ḡḡḡ*; 5. the *ḡḡḡ* or *ḡḡḡḡḡ*, a vocal movement preceded by a *ḡḡḡ*; 6. the *ḡḡḡ*, also a vocal movement preceded by a *ḡḡḡ*, and whose name is practically identical with the old *ḡḡḡḡḡ* (cf. above); 7. the *ḡḡḡḡḡ*, a vocal movement which is introduced by a *ṭāḥīm*; 8. the *ḡḡḡḡḡ* or *muḡḡḡḡḡ*, the finale (British Museum MS., Or. 7007; Yāfil, *Maḡmūḡ*; cf. Lavignac, v. 2941; Delphin et Guin, p. 65). The words of the classical Granadan *namūdāt* have been edited from MS. sources and *visu voce* by Edmond Yāfil in his *Maḡmūḡ al-ḡḡḡḡḡ*, whilst with the collaboration of Jules Rouanet he issued his *Répertoire de musique arabe*

et mours which contains the music of a complete *nawba gharnafi* and sundry movements from others. In 1863, Christianowitsch published his *Esquisses historiques de la Musique arabe*, which also contained the major portions of seven Granadan *nawāṭ*. Another type of *nawba* practised in Algeria, but of secondary importance, is the *nawāṭ al-ihlālī*. In Morocco the five movements of the *nawba* are the *ḥarī*, the *ḥā'im wannaf*, the *ḥafā'ih*, the *ḥaddām*, and the *dardj*, as well as the overture *ṭāhiya*.

NAWBAKHT. This Iranian patronymic (*naw* or *na* + *bakht* "new fortune") was borne in Baghdad during the first two 'Abbāsid centuries by a family remarkable for its influence on the advancement of learning and on the political legitimism of the Imāms.

It claimed descent (cf. Baḥturi, *Dirwān*, p. 115) from the Persian hero Giw son of Gudarz celebrated in the *Shāhnāma* (cf. Justi, *Iranisches Namenbuch*, p. 399 and Christensen, *Koyanides*, p. 59, 117). Its first known representative Nawbakht, an astrologer, owed his fortune to the future caliph al-Manṣūr, to whom in prison he is said to have foretold the throne and later the victory over the Zaidī rebel Ibrāhīm in the same year (144 = 762) in which, having drawn up the horoscope of Baghdad, the new capital, he was granted fiefs in it. His son Abū Sahl Timāḡh (on this curious premonition cf. Ibn Abī Usāib'a, ed. Aug. Müller, Leipzig

1884, iii., p. xli. [Vorwort] and H. Ritter, *op. cit.*, p. 9) (d. 170 = 786) had seven sons by his wife Zerrin, the founders of the various branches of the Al Nawbakht in which we find theologians like Ibrāhīm b. Iḥlāl b. Abī Sahl (wrote about 350 = 961 the *Kitāb al-Yāfī*, on which a commentary by 'Allāma Hilli has been found by A. Eghbal; an earlier commentary had been written by Ibn Abī 'l-Ḥadīd, according to his *Ṣūrah al-Nahj*, iv. 575; and the *Kitāb al-Riḥāḡ*), Abū Sahl Ismā'īl (cf. NAWBAKHTI), Ḥusain b. Rūh, third wazīr of the Imāms (cf. Ibn Xūy), and Ḥasan b. Mūsā (cf. NAWBAKHTI); astronomers like Faḡl b. Abī Sahl (Ibn al-Nadīm, *Fihrist*, p. 275; who has been confused with al-Ma'mūn's minister) and Mūsā b. Ḥasan Ibn Kibriyā; secretaries of state; and finally enlightened students of poetry to whom the editors of the diwāns of Abū Nuwās, Ibn al-Rūmī and Baḥturi went to establish the texts.

Bibliography: 'Abbās Eghbal, *Khāna-dāne Nawbakhtī*, Teheran 1933, 16 + 297 pp. with a genealogical tree, and useful indices, among others that of the Shī'ī sects, p. 249—267; H. Ritter in his edition of the *Firaḡ* of Ḥasan Nawbakhtī. (LOUIS MASSIGNON)

NAWBAKHTI, *nishā* of the Nawbakht family.

1. FAḢL B. (ABī SAHL) B. NAWBAKHT (d. 200 = 815) an astronomer like his father (with whom he is confused) and, like his brother Ḥasan, attached to the *Dār al-Ḥikma* to translate from Persian, wrote at least seven books (Ibn al-Nadīm, *Fihrist*, p. 274). All that survives of them is a fragment of the *Kitāb al-Nuḡmaḡān* (or "Yakubūḡān") on questions relating to horoscopes (*Fihrist*, p. 238—239).

2. ISMĀ'IL B. 'ALĪ ... B. NAWBAKHT (235 = 311 = 849—923), the real political leader of the Imāmi party, who kept in close touch with the famous vizier 'Alī b. al-Furīḡ (whose father, Muḥammad Mūsā b. Ḥasan, we may note, had been a follower of the Nusairi heresy; cf. Nawbakhtī, *Firaḡ*, p. 78), and was also a theologian (cf. Massignon, *Pasien d'al-Hallaj*, p. 142—159) who disputed with the learned Thābit b. Qurra, the Mo'tasili Djubbā'i, and the mystic Hallāj; he also refused, after their deaths, Abū 'l-Atāhiya, Abū 'Isā al-Warrāk and Ibn al-Rāwandī. Of his 32 works (Ibn al-Nadīm, p. 176; Tusi, p. 57) only a fragment of the *Tanbīh* survives (in Ibn Batawāib, *Uḡwāb*, p. 53—56) (cf. Ibn al-Nadīm, p. 176) which gives us the first outline of the Shī'a *ghaiba*.

3. ḤASAN B. MŪSĀ ... NAWBAKHTI, d. before 310 (922), classed in this family through his mother, sister of the preceding: an Imāmi theologian, student of Hellenistic philosophy, author of 44 works (Ritter, *l.c.*, p. 17—20; Eghbal, p. 129—134) of which there survives, besides fragments of the *Kadd 'ala 'l-Ghūḡā* (in Khāṣṣī, vi. 380) and of the *Arā wa-Diyānāt* (Murrāḡ, ii. 156; Ibn al-Djāwī, *Talḥīḡ*, p. 42—43; 47, 49, 69, 74, 81—82, 88, 91), only one complete text, of very great value for our knowledge of the sects of the Shī'a, the *Kitāb Firaḡ al-Shī'a*, ed. H. Ritter (Istanbul 1931, vol. iv. of the *Edi. Isl.*). In an interesting chapter (*op. cit.*, p. 143—161), A. Eghbal has collected the passages of the *Firaḡ* found in a contemporary, Sa'd b. 'Abd Allāh Aḥ'arī (d. 299 = 911), which shows either plagiarism or the use by both of an earlier source.

(LOUIS MASSIGNON)

NAWI, MUHAMMAD RUKA of Khabūshān in the vicinity of Mashhad, a Persian poet. The son of a merchant, in his youth he spent some time in Kāshān where he studied under the Mawlānā Muḥammad. Moving to Marw, he became intimate with the Ḥakīm Nūr Muḥammad Khān there. Like the majority of Persian poets of the xvth century, however, he was attracted by the brilliant court of the Moghuls and went to India where at first he found a patron in the person of Mirzā Yūsuf Khān Maḥmūdī but soon afterwards entered the service of Khānkhānān Mirzā 'Abd al-Rahīm and remained with him and with prince Dāniyāl till his death, which took place in Burhānpūr in 1019 (1610). Nawi's best work is his poem *Sūs u-Gudāz* ("Burning and Melting") which has a touching theme, the devotion of a Hindu princess who accompanies her late husband in death on the funeral pyre. It is written in excessively artificial language and distinguished by the originality of its subject, which had not been taken by any Persian poet before Nawi. Nawi's works were very highly esteemed in India, and he is said to have received 10,000 rupees, an elephant and a horse with valuable trappings for a *Sūfi-nāma* dedicated to the Khānkhānān. His *Divān*, which is entitled *Lubb al-Aḥṣā*, has come down to us but has so far attracted little attention.

Bibliography: G. Ouseley, *Biographical Notices of Persian Poets*, London 1846, p. 161—166; Ethé, *G. I. Ph.*, ii. 254—255; Bada'uni, iii. 361; Blochmann, *Pin-i Akbari*, p. 606; Kieu, *Catalogue*, p. 674; *Sūs u-Gudāz*, pr. Lucknow 1284 (at the end of the first part of the *Akbar-nāma*). It has been translated: *Burning and Melting: being the Sūs u-Gudāz of Muḥ. Rūkā Nawi of Khabūshān*. Translated into English by Mirza J. Dawūd of Persia and Ananda K. Coomaraswamy of Ceylon, London 1912.

(E. BERTHELS).

NAWRŪZ (v.), New (Year's) Day, frequently represented in Arabic works in the form *Nawrūs* (Kālkashandī, *Subḥ al-Aḥṣā*, ii. 408). It was the first day of the Persian solar year and is not represented in the Muslim lunar year (Mas'ūdī, *Murūj*, iii. 416 sq.). In Achaemenid times the official year began with Nawrūz, when the sun entered the Zodiacal Sign of Aries (the vernal equinox). Popular and more ancient usage however would appear to have regarded the midsummer solstice as Nawrūz (Birūnī, *Chronology*, transl. Sachau, p. 185, 201). It was the time of harvest and was celebrated by popular rejoicings, but it also marked the date when the *khwarūdī* was collected. The two different dates were retained in Persia proper and also in 'Irāk and Djibāl under Islām, and Hama al-Isfahānī states (*Tar'ikh*, Berlin 1340, p. 104) that Nawrūz in the first year of the Hidsra fell on the 18th Ḥaṣṣrū (June), which he erroneously equates with the 1st Dhū 'l-Ka'da. Confusion arose however because the intercalation of one day every four years which allowed the date to correspond with the position of the sun was omitted in Islām (Mas'ūdī, *Kitāb al-Tanbih*, p. 215) and unscrupulous revenue officials found it to their advantage to keep to the false calendar date rather than to the correct traditional one because it permitted them to collect their dues earlier (Maḥrizī, *Khizāf*, ed. Wiet, iv. 263 sq.). By the time of the Caliph Mutawakkil the date of collection of *khwarūdī* had advanced by almost two

months and in 245 A. H. he fixed the date of Nawrūz as the 17th Ḥaṣṣrū, which approximated to the old time (Tabarī, iii. 1448; Birūnī, *Chronology*, p. 36 sq.). The reform had no lasting effect and the Caliph Ma'tadid was compelled again to move the date which was fixed as the 11th Ḥaṣṣrū (Tabarī, iii. 2143). Later again, in Sulṭān Malikshāh's reform of the calendar, the Persian astronomers proclaimed the vernal equinox as Nawrūz (Ibn al-Athīr, x. 34; 467 A. H.) and the first day of the new era fell on the 10th Ramaḍān 471 (March 15, 1079).

Nawrūz was adopted in Egypt as elsewhere and has been retained by the Copts as the New Year's Day (Maḥrizī, *Khizāf*, iv. 241 sq.), but it now falls on September 10 or 11.

Popular festivities have marked Nawrūz wherever it has been celebrated. In Sāsānīan Persia the kings held a great feast and it was customary for presents to be made to them while the people who gathered to make merry in the streets sprinkled each other with water and lit fires. Both in 'Irāk and Egypt these customs persisted in Muslim times (Tabarī, iii. 2163; Mas'ūdī, *Murūj*, vii. 277; Maḥrizī, *loc. cit.*; Kālkashandī, ii. 410) and although Ma'tadid attempted to prevent the customary horseplay in the streets during the midsummer saturnalia he was unsuccessful (Tabarī, *loc. cit.*). In the various parts of the Turkish Empire the day was celebrated as a public holiday and in Persia it has throughout its history been marked by great festivities as the chief secular holiday of the year.

Mez, *Renaissance des Islams*, p. 400 sq.; Lane, *Thousand and One Nights*, ii. 496 sq. (he regards it as not improbable that Nawrūz originated from the Jewish Passover); Carra de Vaux, *Notice sur un Calendrier Turc*, in *Studies presented to E. G. Brown*, p. 166 sq.; A. V. W. Jackson, *Persia Past and Present*, p. 99 sq. (R. LEVY).

NAZAR (A.) probably did not receive until the ninth century A. D. the meaning of research in the sense of scientific investigation as a translation of the Greek *ἔρεσις*. With Aristotle (e.g. *Metaph.*, 1064 b 2) the philosophics were then divided into theoretical (*nazarīya*) and practical (*'amalīya*); the latter seek to obtain the useful or the good for man, the former pure truth, in physics, mathematics and metaphysics.

Nazar is primarily an epistemological conception and after the example of Ammonius Hermias, a pupil of Proclus, is dealt with among the Arabs in a work prefixed to the *Isagoge* of Porphyry (*Προλεγόμενα τῆς φιλοσοφίας*) [cf. the article *MAṬALĪS*]. Nazar is also discussed as an activity of the human 'aql in psychology but in this case as a rule under synonyms like *ikr*, *tafakkur* etc. [cf. *NAFS*].

The history of this terminology has still to be written. In the oldest, still incomplete, *logic* (edited by 'Abd Allāh b. al-Muḥallaf or his son Muḥammad) 'ilm and 'amal are already distinguished as branches of philosophy (*ḥikma*), but 'ilm is defined as a *taḥqīq* and *tafakkur* of the *ḥāl* (i.e. of the mind) (cf. G. Faruqi, *Di una presunta versione araba di alcuni scritti di Porfirio e di Aristotele*, in *R. R. A. L.*, ser. vi., vol. vi. [1926], p. 207).

The old speculative theologians of Islām were

perhaps more familiar with the distinction *'ilm* *'aql* > *shar'i* than with *nazar* > *'amali*. The *'aql* is generally recognised as a "root" of the Mu'tazili system. The Zaidi al-Kāsim mentioned it (beginning of the third century A.H.) among his *uṣūl*: *'aql*, *Qur'ān* and *sunna* (R. Struthmann, *Die Literatur der Zaiditen*, in *Isl.* II. [1911], p. 54). *Nazar* was felt to be an innovation like *ra'y* and *ḥiyāz* in *fiqh*. The Hanbali school objected to the adoption of *nazar* but its greatest representative Ibn Ḥazm admitted *'aql* without hesitation — of course the *'aql* created and equipped by God — as a source of knowledge. Not blind belief (*taḥlīl*) nor deduction from the unknown (*ḥiyāz*) were to lead it to the acceptance of the Qur'ān, *sunna* and *ijmā'*, but quite certain knowledge. There is nothing which Ibn Ḥazm insists upon so often and so emphatically as this; there is no other way to certainty than that of tracing to sensual perception (*ḥiss*) and intuition of the intelligence (*'aql*). Indeed sensual perception is so much preferred by him that comprehension by the reason is called a *with idrāk* (*Killāh al-Faṣl*, i. 4–7). The philosophical position of Ibn Ḥazm, which requires closer investigation, recalls Hellenistic eclecticism according to which all human cognition arises either from sensual perception or intuition or is derived from these sources through the intermediary of proof. Many however emphasise the direct evidence of sensual perception and reason, and regard the method of proof as a difficult and uncertain one. Hence we have from the Stoics onwards the emphasis laid on general agreement (*Ar. ijmā'* and *ijmā'at*) as a criterion of truth. Only where there is no agreement is investigation necessary.

The dualistic epistemology of the eclectics (senses × reason) was very greatly modified in Islam by the penetration of the intellectual monism in the Neo-Platonic mysticism and Aristotelian logic. While different stages in human knowledge were distinguished, true knowledge was only to be attained by rational intuition and the intermediary activity of the mind. The main thing for the Neo-Platonist was intuition (*nazar*, *ḥaṣar*). It is remarkable how in the Neo-Platonic *Theology of Aristotle* the latter is made to say (Arabic, ed. Dieterici, p. 163): "Plato recognised all things *bi-nazar al-'aql* (intuition), *lā bi-manḥūl wa-ḥiyāz*", i.e. Plato as the divine perceives everything at once like God himself and pure *'aql*. *Nazar* in this sense of direct perception is constructed with *fi*, in other cases however with *fi*. For *nazar fi*, transmitted reflection of the human intelligence, the *Theology* generally uses *ḥikr* and *rawiyya* and the world of the senses, with which our soul is associated, is called *'alam al-ḥikr wa 'rawiyya*. Following the *Theology*, the Muslim mystics generally used *nazar* for spiritual perception (cf. L. Massignon, *Essai sur les origines du lexique technique de la mystique musulmane*, Paris 1922, index).

In Kalam however, in the disputes of the theological sects, *nazar* receives the dialectic meaning. Logical proof seems to have first been admitted into the *uṣūl al-dīn* by the Shā'is. In his *maḥṣūlāt* (ed. Ritter, i. 51 sq.) al-Ash'arī gives a survey of the different views of the eight parties of the Rawāfiḍ *fi 'l-nazar wa 'l-ḥiyāz*. According to him, groups 1–3 consider all cognitions (*ma'arif*) as necessary (*lāzīm*) (i.e. given with the mind itself or not given) so that *nazar* and *ḥiyāz* can add nothing to them; these as well as group 8,

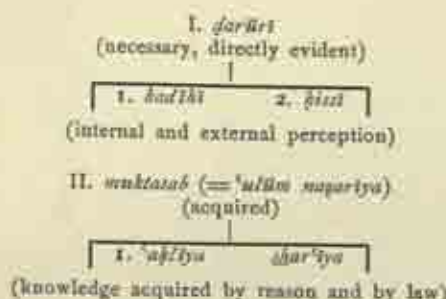

which traces all knowledge to the Prophet of God and the Imām, differ from the rest on this point. The other four recognise some kind of acquired knowledge (in both cases the reference is to the apprehension of God) as follows: 4 (the Ash'ab Hishām b. al-Hakam) by *nazar wa 'istidlāl*; 5 (al-Ḥasan b. Mūsā) possibly by a kind of *ḥaṣr* which cannot be more exactly defined (cf. this *ḥaṣr* with the *ḥaṣr al-af'āl* of the later Ash'ari school); 6 and 7 (anonymous) by *nazar wa 'l-ḥiyāz*, with appeal to the testimony (*ḥudūd*) of the *'aql*. We are also told (p. 144) of a section of the Murjī'is that a belief (*imān*) without *nazar* is in their opinion not a perfect belief.

Ash'ari himself is probably the best evidence of the fact that the speculation of the human *'aql* was not regarded as a source (or method) of knowledge of God for the first time in his school but before him by several sects. *Nazar* (like *ra'y* in *fiqh*) was most probably applied to the activity of the mind of the reflecting theologian (besides *nazar* we find synonyms like *ḥaṣr*, *ḥaṣr*, *ra'y*, *ḥaṣr*, *ḥikr*, *ḥikr*, *ḥikr*, *ḥikr*, *ḥikr*, *ḥikr*, perhaps also others). The logical methods here used are called (perhaps here still synonyms) *ḥiyāz* (deduction by analogy) and *istidlāl* (proof by circumstantial evidence). From what we know of *ḥiyāz* in *fiqh* (cf. the article *Uṣūl al-Fiqh* by J. Schacht, and Snouck Hurgronje, *Verspr. Gesch.*, II. 140 sq.) and of *ḥiyāz* in medicine (see Mas'ūdi, Paris 1861–1877, IV. 40; VII. 172 sq.), we have probably to think of a process which is a mixture of induction and deduction, often used very arbitrarily. Analogous cases, often superficially regarded as similar (cf. *Maḥṣūlāt al-'Uṣūl*, ed. v. Vloten, p. 8 sq.), were sought for, the *'illa*, i.e. not the actual cause (*causa*) but the reason (*ratio*) in a higher conception of method or species, under which the further cases could be grouped. For Aristotle and his followers in Islām (Fārābī etc.) deduction had one meaning; they believed in causality or even in the creative activity of abstract thought. The great majority of Muslim theologians, jurists and physicians did not rise so far. It was not till the school of Ash'ari that the method of *nazar* superficially grasped penetrated into *kalām* and *kalām* was defined as *'ilm al-nazar wa 'l-istidlāl*. Rejected at first by the majority, gradually tolerated and used as an instrument against heretics and sophists, *nazar* in the orthodox school was finally recognised as a religious obligation.

Let us now turn back to the general conception of the *'ulūm nazarīya*. Al-Fārābī (d. 950) distributed them from the philosophical point of view in a special treatise (*Ḥikm al-Uṣūl*, Cairo n.d.) in a way which became the model for later times. It was he who first worked on the logic of Aristotle wherefore his school was often called that of the *Manṭiqiyyūn*. He assumed with Aristotle that the *'aql* contained in itself the fundamental principles of all knowledge, the evidence of which had simply to be acknowledged. But the way of reflection and proof leads to the non-evident, the culmination of which, apodeictic proof (*ḥukm*), is described in the "Second Analytic". From this eminence the branches of knowledge can be surveyed. After some observations on philology (cf. the Stoics) first and most fully logic — whether as instrument of philosophy or as a part of it is a matter of indifference. Logic itself is of course a *nazar* with an object

of its own. Next come the science of physics, mathematics and metaphysics with main and subsidiary branches. Each is a *naẓar*. But it is noted that for example among the physical sciences medicine is a mixture of theoretical and practical and similarly music and mathematical subjects. Metaphysics is however like logic purely theoretical. Finally the three practical sciences of Aristotle, ethics, economics and politics, are united under the head of political science, with the addition of *ḥikm* and *kalām*; al-Fārābī remarks that the science of *ḥikm* and the art (*ḥunūʿ*) of *kalām* have to do partly with opinions (*ʾarāʾ*), partly with actions (*afʿāl*).

In conclusion let us compare with this philosophical division that of the Ashʿarī theologian ʿAbd al-Kāfir b. Tāhir al-Baghādī (d. 1037—1038) in his *Uṣūl al-Dīn*, Constantinople 1928, p. 8-14. After the distinction between divine knowledge and the knowledge possessed by other living creatures is laid down, the latter is classified as follows:

The *ʿulūm naẓariyya* are further divided into four according to the way in which they are acquired:

1. *ʾitidāl bi 'l-ʿaql min ḥikmat al-ḥiyās wa 'l-naẓar* (speculative theology);
2. *Maʿlūm min ḥikmat al-taʿarīb wa 'l-ʿadāt* (e.g. medicine);
3. *Maʿlūm min ḥikmat al-ḥarāʾ* (legal science);
4. *Maʿlūm min ḥikmat al-ikhām* (prophetology).

Compared with the *ʿaql* monism of Fārābī this division still looks rather eclectic. But from the 15th to the 18th century A.D. philosophy and theology, without becoming one, were approaching one another more closely. Ibn Sīnā, who builds upon Fārābī, was the intermediary. Ghazālī sought to combine the *naẓar* of the Neo-Platonic mysticism with the *naẓar* of the rationalist thinkers, and Fakhr al-Dīn al-Rāzī appropriated the methods of proof of Aristotelian logic to a much greater extent than his theological predecessors.

NAZARETH. [See AL-NẒĪRA.]

al-NAẒĪRĀT, title of sūra lxxix, taken from the opening word.

NAẒIM, properly MUṢṬAFĀ b. ISMĀʿĪL, a notable Ottoman religious poet. The son of a Janissary, the inspector Veni Baghḍeli Ordek Ismāʿīl Agha, he was born in Constantinople and succeeded his father in his office, after rising through all the grades in the Janissary office: he became *shāḡird*, *khālīfe*, *baḡh* *khālīfe* and finally in 1108 (1696) *yenīleri kâtibi*. He died in this year on the campaign against Belgrade.

Naẓim wrote an extensive *Divân*, the poetical value of which is not very great but which contains much that is religious and mystical in its 550 *ghazels* and about 50 *taʾrīḥ* of the end of the reign of Mehmed IV.

Bibliography: Thureiya, *Saḡīr-i 'aṭṭamānī*, iv. 534; Hammer, *G.O.D.*, iii. 572—576; Baasmodjan, *Essai sur l'histoire de la littérature ottomane*, Constantinople 1910, p. 127; Flügel, *Wiener Handschriften-Katalog*, i. 664—665.

(MENZEL)

NAẒIM, YAḤYĀ, the most important Ottoman religious poet of his period, as is apparent from his epithet *Nāṣ-ḡh*, the singer of hymns. Born in 1059 (1649) in Kāsim Paḡa in Constantinople, he entered the Serai as a boy where he received the education of the Enderūn and had the opportunity to acquire special proficiency in Arabic and Persian. He showed a talent for poetry and considerable musical ability. His beautiful voice and his work as a poet and composer gained him the favour of Sulṭān Murād IV. He was given important offices at the court as a result: the office of a *ḡaznāsh aḡhā* to the *ḡaznāsh khāḡḡe*; he next became *newbakhsh khāḡḡ* and *ḡaznāsh khāḡḡ* and attained considerable influence. He then retired of his own accord and became *ḡaznāsh khāḡḡ*. Later he made the pilgrimage to Mecca. He remained in Medina as *muḡjāwīr* where he died at the age of 80 in 1139 (1726). According to another statement (Brusali Mehmed Tāhir), he died in Adrianople.

He flourished under Mehmed IV and down to the reign of Ahmed III. He was a member of the Mewlewī order. Shākh Neshānī Mewlewī was his teacher in poetry and probably also in music. Naẓim is the most religious poet of his period. He devoted the whole of his poetical talent to the *naʿt*, the hymn. His *Divân* therefore resembles a warrant of pardon (*ḡazāl-i ḡhuḡrān*). He also gave special attention to the devotional forms of the *ṭawḡīd*, *ṭahmīd* and *munāḡḡāt*.

His *Divân*, printed in Constantinople in 1257 (1841), forms a thick volume of 500 pages, of which one third is devoted to the *naʿt* in the form of 60 *ḡazāda's*, hundreds of *ḡazāl's*, *ṭawḡīd's* and *ṭahmīd's*, *māṣṣada's* and *muḡḡhamma's*, *ruḡā'a's* and a *methnawī* for the Prophet. The *Divân* is divided into five parts, each of which is in turn a kind of *Divân* in itself. He also wrote *medḡhiy's* for Mehmed IV and Muṣṭafā II, Ahmed III, Selīm Girai Khān, Muḡḡḡīb Muṣṭafā Paḡa and the vizier Ahmed Paḡa; also *taʾrīḡh's* in imitation of Nefʿī and Nābī and *ḡazāl's* in imitation of Nedīm.

Naẓim is a clever technician who gives expression to his effort for variety and change, not in the matter but in the form. In all his works however, a deep religious belief, even fanaticism is marked. His poems are a true reflection of the inclination of the period for religion and Sūfism.

NAZİM FARRUKH ḤUSAIN, a Persian poet. Mullâ Nâzīm, son of Shāh Rīdā Sabzwārī, was born in Herāt about 1016 (1607) and spent the greater part of his life there. Little is known of his career, except that he made a journey to India and, after spending several years in Dīhān-gīrān, returned to his native town where he died in 1081 (1670—1671). He was court poet of the Beglerbegs of Herāt and his greatest work, the *Yūsuf u-Zulâikḡā* begun in 1058 (1648) and finished in 1072 (1661—1662), was dedicated to one of these governors, 'Abbās Kālī Khān Shāmī. This, a poem of considerable length, is an imitation of Firdawsī's work of the same name and follows the original quite closely but endeavours to surpass it by using the most elegant language. Ethé calls the language of Nâzīm's images distorted and thinks that some of the details put in by him can only have a humorous effect on the reader. But it must be agreed that Nâzīm judged the taste of his period very well for his work became extremely popular, especially in Central Asia. While Firdawsī's poem is now known to only a few enthusiasts, manuscripts of Nâzīm's *Yūsuf u-Zulâikḡā* are still quite common in the bazaars of the larger cities of Central Asia as are those of the even more celebrated version of the same subject by Dīdāmī. His lyrical *Dīwān* is less well known, but it contains many excellent poems (especially ghazels) some of which are even at the present day sung by the classically trained singers of Bukhārā and Samarkand.

Bibliography: H. Ethé, *G. I. P.*, ii. 231—232; Rieu, *Catalogue*, p. 692^b and 370^a; *Yūsuf u-Zulâikḡā*, lith. Lucknow 1870.

(E. BERTHELS)

NAZİR AL-MAZĀLİM (A.), "reviewer of wrongs". His office "combined the justice of the kādī with the power of the sovereign" and was instituted by the later Umalyāds, who sat in person to receive petitions complaining of *zulm*. The early 'Abbāsids, from Mahdī to Muḡtadī, followed their example (Māwardī, p. 129; Baiḡakī, *Kitāb al-Maḡāzīn wa 'l-Maḡāzīl*, ed. Schwally, p. 577; Mas'ūdī, *Murūj*, viii. 21; Tabarī, iii. 1736), but after them the duty was undertaken by the vizier, whose failure to carry it out was regarded as a serious fault ('Arīb, ed. de Goeje, p. 25). At Baghlād the Caliph Muḡtadī ordered the *qāḡib al-shurḡa* to nominate faḡḡās who were to hear pleas in each of the mahallās. The court of the Nāzīr concerned itself with: a. *zulm* committed by the Caliph's officers; b. injustice in the levying of taxes and c. wrongful acts of *kādīs* in public offices. Other matters proper for the cognizance of the court were complaints by officials of non-payment of their salary or of excessive reduction of salary, the interests of *awāḡif* and the enforcement of decisions made by *kādīs* not strong enough to

have their judgments put into execution. The Nāzīr had much wider powers than the kādī. He could postpone decision on a case in order to consider and investigate evidence, a proceeding not open to the kādī, who is compelled to give judgment out of hand; he could use *irāḡā* (intimidation) to overawe a defendant into admission and could refer litigants to persons of responsibility who could act as arbitrators. The officer presiding, if he was the vizier or other highly placed official deputising as Nāzīr for the sovereign, set aside a special day or days for the review of *maḡāzīm*. The Niḡm al-Mulk (*Siyāsat-nāma*, p. 10) regarded it as essential for the king to sit two days a week for the purpose, and in Egypt during the Fāḡimīd rule, the vizier or the *qāḡib al-shurḡa* sat on two days of the week at the Golden Gate of the palace at Cairo. Complaints were there made orally if the petitioner lived at Fustāt or Miḡr and each plaint received was sent for necessary investigation to the *nāḡib* of the police or the kādī of the quarter concerned. If the person against whom complaint was made lived outside the two cities the petition was presented in writing.

(R. LEVY)

NAZMÎ, SHAİKH MEHMET B. RAMAZÂN, Ottoman poet and Khalwetī Shaikh. The son of a merchant named Ramazân b. Rustem, he was born in Constantinople in the Kodja Muḡaffī Pasha quarter in 1032 (1622—1623). He became a disciple of 'Abd al-Aḡḡad al-Nūrī. In 1065 (1654—1655) he became shaikh (*pir-niḡm*) in the Khalwetī monastery of Yawashḡje Mehmed Aḡa near Shehr Emīnī, later (1105—1693) also preacher (*vaḡīz*) at the Sulḡān Walīde mosque. He died in 1112 (1700) and was buried in a special *türbe*. His son was 'Abd al-Raḡmān Rafī'ā. Nazmī was considered a high authority on Hadīth. He wrote a number of works, none of which have been printed, namely: *Hadiyat al-Shāḡwān* ("Present of the Brethren"); biographies of the seven greatest Khalwetī personalities (Yūsuf Makhdūm; Muḡammad Rakīye; Shāh-Kobādī Shīrwānī; 'Abd al-Maḡḡid-i Shīrwānī; Shams al-Dīn-i Swāsī; 'Abd al-Maḡḡid-i Swāsī; 'Abd al-Aḡḡad al-Nūrī) and some accounts of their successors.

His poetical works consist of the rhymed Turkish translation of the first book of the *Miḡnawī* of Djalāl al-Dīn Rūmī, a *Dīwān* of the usual type (with many hymns and sacred songs); also the *Miḡyār al-Tarīḡat* ("Touchstone of the Order").

Bibliography: Thureyā, *Sifill-i 'Othmânî*, iv. 560; Hilmi, *Ziyāret-i Endīyâ*, Istanbul 1325, p. 120—121; Sīmlī, *Kāḡūs al-'Alām*, vi. 4589—4590; Brusaîl Mehmed Tâhir, *'Othmânî Mî'âllîfîrî*, i. 175; Hammer, *G.O.D.*, iii. 596—597; Basmadjian, *Essai sur l'histoire de la littérature ottomane*, Constantinople 1910, p. 127.

(MENZEL)

NAZMÎ, MEHMET (according to the *Sifill-i 'Othmânî*: Nazmī Niḡmī), Ottoman poet of Adrianople in the period of Sulaimân al-Kānūnī. He was the son of a janissary, later himself became a janissary, then silḡḡār and sipāḡh. He died in 996 (1588) in Adrianople, where he is buried in the *türbe* of Shaikh Shudjā'.

Nazmi possessed great poetic gifts and ability, which he displayed particularly in the clever and accurate imitation of other poets, in so-called *naḡīr*'s (pl. *naḡīr*). He also himself wrote *ghazels*. He rendered a great service to Ottoman literary history by collecting an enormous anthology of the best Ottoman poems, arranged under the eight principal metres. This anthology contains 4,000 *ghazels* by 125 Turkish poets and *naḡīr*'s by himself in addition: *Maḡīma' al-Naḡīr*. He presented this work, which he brought down to the year 930 (1524), to the Sultān. Hammer deals fully with it, as it deserves.

He also wrote a *ghazal* with the rhyme *elīf* on each *baḡr* of the *Risāla-i 'arūṣiye* of Wahidī Tabrizī.

Bibliography: Sehi, *Heft Bihisht*, Istanbul 1325, p. 133; Iḥrāmī, *Sidjill-i 'othmānī*, iv, 560; Sāmī, *Kūmūs al-'Alam*, vi, 4589—4590; Rusall Mehmed Tahir, *'Othmānī Mīl-i ḥifri*, ii, 436; Hammer, *G.O.D.*, II, 61—73.

(MENZEL)

AL-NAZZAM, IRKĀHIM B. SAYYAR B. HĀNĪ B. ISḤĀQ, a Mu'tazilī theologian of the Baṣra school. Brought up in Baṣra, he spent the latter part of his life in Baghdād, where he died between 220 and 230 (835—845) while still, it seems, at the height of his powers. A brilliant poet, a philologist of note, and above all an extremely perspicacious and subtle dialectician, he is one of the most interesting figures in the culture of the 'Abbāsid period. He occupies a most important place in the development of Muslim ideas. He studied speculative theology in the *madāris* of Abū 'l-Ḥudhail al-'Alīf, from which he soon separated to found an independent school. In Baṣra he vigorously continued the struggle waged by his teacher against Manichaeism but devoted his abilities mainly to the refutation of the Dahrī philosophy, with which he was thoroughly acquainted. So far as we can judge, it was al-Nazzām who began the struggle, which was continued by Islām for centuries, against the philosophy of Asiatic Hellenism, the classic document in which is the *Tahḍīb* of al-Ḡhazālī. In Baghdād he engaged in lively disputations with Murjī and Dḡhālī theologians, the traditionalists and the *fuḡhā*, submitting their views to a searching criticism which had considerable repercussions in the history of Sunni theology. On the other hand, his ideas seem to have had a considerable influence on the Mu'tazilī school of Baghdād in spite of the resistance which it offered to him. Al-Nazzām was above all a theologian. Two tendencies dominate his thought: zeal for *tawḥīd*, for the strictest monotheism, and zeal for the Qur'ān, which compelled him to set aside any other source of theology and ethics. His interest in religion was purely intellectual and emotion seems to have played a very limited part in it. His opponents described him as a Dahrī; this is to misconceive completely the fundamental idea of his theological work; nevertheless it is quite true that it was the dispute with the Dahrīya which imposed upon him the first principles of his dogmatics and which determined their structure, so much so that Islām in his hands assumed a rather strange form. His dogmatic extravagances brought down upon him the condemnation of almost the whole of the Muslim community and even of the Mu'tazilīs; it was however he who was the first to state several of the principal

problems of Sunni theology. His writings are lost but considerable fragments have been preserved, mainly in the works of his pupil al-Dīshāqī. Many of the teachings which are attributed to him in books of writers on heresies were handed down by his pupils, not always correctly, as al-Kharrāzī tells us. The exposition of his theology given by al-Baghdādī in his *Kitāb al-Farq* probably goes back to Ibn al-Rāwandī; it is a typical example of misrepresentation and deliberately false interpretation. — On the main features of his theology and of his school, cf. the article AL-MU'TAZILĀ. Here we give a few observations on the problems of his theology.

1. *Aḡl al-tawḥīd*. Al-Nazzām's main interest here is to defend the Qur'ānic doctrine of the creation against the Dahrīya which teaches the perpetual circulation of the elements and therefore the eternity of the material world. It is with this object that he develops the doctrine of the *ḡalīl* and the *ḡalīl*, a strictly anti-Dahrī thesis and one already adopted by Abū 'l-Ḥudhail al-'Alīf. His ideas regarding the body and its relations are the logical result of this teaching. The structure of these ideas is however strongly influenced by the polemic against Manichaeism, the fundamental problems of which al-Nazzām had studied deeply. In his positive demonstration of the dogma of the creation one occasionally thinks there are traces of Aristotelianism: the creation was a setting in motion and the created world is in a continual state of movement (even rest is defined as a form of movement). God is then himself immobile but at the same time the primordial moving power. The *ḡalīl*, the distinction between the creator and creation, is carried a considerable distance. The divine attributes are represented to us by negations. The divine word is a body (therefore created) but that of man is an accident. The Qur'ān is miraculous because of the information it gives about the past and on account of the secrets which it reveals but not on account of its style, which men could have imitated if God had not prevented them (in reality there is no *mu'araḡa* in al-Nazzām). Al-Nazzām fundamentally rejects the arbitrary interpretations of the Qur'ān given by the great authorities on Tradition, an 'Ikrima, a Kalbi, a Suddī or a Maḡāzīlī b. Sulaimān; he demands a strictly literal exegesis. Prophethood has always been universal, i.e. all the prophets and not Muḥammad alone have been sent to the whole of humanity (against the traditionalists; al-Nazzām thus did not deny the prophethood of Muḥammad).

2. *Aḡl al-'adl*. The freedom of the human will is restricted, according to al-Nazzām in a way that anticipates the Ash'arī theology. All the actions of a man are movements, therefore accidents and movements which relate only to the man himself; the effects which are realised outside of the man are not due to him but to the natural forces which God has placed in his body (denial of *tawallūd*). Man is the *rūḡ*, which penetrates the body; the body in its turn represents an infirmity (*ḡifa*) of the *rūḡ*. Now it is the body, different from man in the strict sense, which sets in motion the action of which man (i.e. the *rūḡ*) is capable. It follows that man (the *rūḡ*) is capable of the action before it is realised (*al-istiḡā'a ḡaliba 'l-ḡifā'*), but at the moment when it is realised, the man is not capable of it.

3. *Aḡl al-'adl wa 'l-tawḥīd*. Al-Nazzām is very

keenly interested in practical problems of *fiqh*; we know his views and those of his school on the *jalāl*, on fraud and on ritual purity (in which connection he gives some very curious psychological explanations). But he is particularly concerned with the *uṣūl*. He waged a passionate campaign against the *uṣūl al-ra'y wa 'l-ḥyās*, therefore against the Hanafis who were the representatives of the Murjīs. He flatly refused to admit *ra'y* and *ḥyās* and did not shrink even from attacking the great men among the *jaḥāḥa* who in his opinion had been guilty of using them. He was in this way led to criticise violently the institution of the *idjma'* which however he admitted to a certain extent. Through all this he prepared the way for Dāwūd al-Zāhiri and the Zāhiriyya school.

(H. S. NYBERG)

NEBUCHADNEZZAR. [See *BUKHT NAṢAR*.]

NEDJD, the highlands of Arabia in contrast to the low-lying ground along the coast (*Tihāma*) or the depression (*Ḥawr*). In the dialect of the Hudhail Nedjd is pronounced *Nadjd*. The exact application of this originally topographical conception is very differently understood and sometimes it means more generally the elevated country above the coastal plain or the extensive country, the upper part of which is formed by the Tihāma and the Yaman and the lower by Syria and the 'Irāk, or the part of Arabia which stretches from the frontiers of al-Yamāma to al-Madīna and thence across the desert from al-Baṣra to Bahrain on the Persian Gulf (Iṣṭakhṭī, Ibn Hawkal) or the territory between the 'Irāk (al-'Udhayn) and Dhāt 'Irāk (Ibn Khuradadhbih) or from the 'Irāk to al-Tihāma (Ḥudama) or the land which lies behind the so-called Ditch of Chosroes (Kisrā) as far as the Ḥarra (al-Bāḥilī), or lastly, the territory between the depression of the Wādī 'l-Rumma and the slopes of Dhāt 'Irāk (al-Asma'). That originally the name was applied to the plateau only is evident not only from the definitions of the separate authors but also from the fact that Nadjd appears in combination with various place-names; thus al-Asma' (Yāqūt, iv. 745) knows of Nadjd Barḳ (in al-Yamāma), Nadjd 'Uṣ, Nadjd Kabkab (near 'Arfaṭ), Nadjd Mar' (in the Yaman), al-Bakrī (ii. 574) besides the three last named mentions Nadjd al-Yaman, Yāqūt (iv. 750 *sq.*) further mentions Nadjd al-Hijāz, Nadjd Alwadh in the country of the Hudhail, Nadjd al-

Sharā, al-Hamdānī (p. 55) Nadjd Himsyā and Nadjd Maḥdijl along with a number of places not otherwise known which are combined with Nadjd. Hamdānī (p. 177) further makes a distinction between upper Nadjd (*Nadjd al-Uḥā*) which is regarded as Nadjd proper (*al-Nadjd*) and in which he includes the district (*ḥara*) of Dharāḥ and the town of Yahambam, and lower Nadjd (*Nadjd al-Suḥā*) which is described as *Arḍ Nadjd* and with the Hijāz and al-'Arūd forms Central Arabia (p. 1, 2 *sq.*, 36, 12 *sq.*), the territory in which pure Arabic is spoken (p. 136, 2 *sq.*). The original meaning is also seen in the dual Nadjdān, which, it is interesting to note, is used for two mountains in the Adja' range, as well as in the place-name Nadjdān Mar' and in the spring pasture ground Nadjdān in the land of the Khath'am mentioned by the poet Ḥumaid b. Thawr (Yāqūt, iv. 745).

That the wide interpretation of the name Nadjd above given is not unjustified is shown by the foundation in the second half of the fifth century A.D. by Ḥārith, chief of the Kinda, of a short lived kingdom which extended from the Syrian *limes* and al-medina to al-Yamāma or from the hill of Tamiya in the N.E. on the Wādī 'l-Rumma to Dhāt 'Irāk. At a later date, the whole of al-Nadjd belonged to the administrative district of al-Yamāma (Yāqūt, iv. 746).

The widest area to which the name Nadjd has ever been applied is probably that of the present kingdom of the same name which owes its origin to the Wahhābī chief 'Abd al-'Azīz b. 'Abd al-Rahmān Al Sa'ūd, who, as Amir of Nadjd conquered Riyāḍ in 1903, was chosen sultān of Nadjd and the adjoining lands in the summer of 1921, on Jan. 19, 1926 conquered the Hijāz and on Jan. 19, 1927 was proclaimed king of Nadjd and its dependencies at Riyāḍ. The frontiers of his kingdom are: in the east, the Persian Gulf from Dīfara and Kaṭar to Ras al-Miḥāb, then the neutral zone between Nadjd and Kuwait from this promontory to Ras al-Killīya; in the west the kingdom of the Hijāz; in the south the line which runs from the port of Kunfudha on the Red Sea south of Abḥā in 'Asir and south of the Wādī 'l-Dawāsir and includes Nadjdān. The war at present going on between the king of Nadjd and the Imām of al-Yaman may perhaps alter this frontier, especially as Dīfār in the Yaman has previously been a bone of contention. The northern frontier which was delineated by treaties between the ruler of Nadjd with the 'Irāk and England on the one side (signed at 'Uḥair on Dec. 2, 1922) and Nadjd, Great Britain and Transjordan on the other (signed on Nov. 2, 1925 at Hadda in the Hijāz) runs along the neutral zone between Nadjd and the 'Irāk (29–30° N. Lat. and 45–46° East Long.) and is then continued in a line running N. and N.W. to the intersection of 39° E. Long. and 32° N. Lat. and leaves the Dīfār 'Anḥa on its north, then S.W. to the Wādī Radjil and passing through in the S.E. the point where 38° East Long. and 30° N. Lat. intersect. The Wādī Sirhān is thus still in Nadjd. This line continues towards the south from 25' to 38° East Long. and crosses the Hijāz railway towards 'Aḥaba. The extent of the territory is estimated at 900,000 square miles and its population at 3,000,000. The capital is al-Riyāḍ; the more important towns are Buraida (Berēda), 'Anḥa ('Anḥa), Ha'el (Ḥayil), Tharmala,

Wādī l-Rumma and in May in 'Anṣe between Djabal Salma and 'Anṣe (1884 Ch. Huber), and Philby (ii. 10) noticed thundershowers in May as well as drizzle, while Doughty met with hail at Khabra (near 'Anṣe) in April. That the climate here cannot have changed very much is evident from Ibn Djabair who records very heavy showers in this district in April 1184 A.D. Huber met with rain in June 1884 between 'Anṣe and Mecca, Sadlier at the end of July 1819 between al-Haṣā and Darīya heavy thunderstorm and rain, which however was described by the natives as unprecedented. Philby (i. 141, 147) records thunder and rain in December. The rainwater collects in the hollows below the thick layer of sand and enables palms to grow and also, on chemically decomposed fertile soil, wheat and barley, vegetables and fruit-trees. The hot summer of course everywhere makes it necessary to water the crops from wells. On the other hand, the frequently very sudden flooding of the water-courses led in quite early times to the building of dams to hold back and store the water; such were built in the Wādī l-Rumma at 'Anṣa (Bakri, i. 207; Vākūt, iii. 738), Darīya (Bakri, ii. 637) and on the road from al-Yamāma to 'Anṣa (al-Hamadhinī, p. 174, 192). Doughty found remains of such dams in the Djabal Adja'.

The district of al-Sharāf is the richest part of al-Nadjd, and the valleys of the Wādī l-Djarir and Wādī l-Milāh are celebrated for their pastures. Here the early caliphs had vast grazing grounds (*himā*) e.g. in Darīya, al-Rabāḥa, Faḍl, al-Nir, Dhu l-Sharāf and Naḡf. The most famous was that of Darīya, where the caliph 'Omar I secured an area six Arab miles in diameter as pasture for 300 horses and 30,000 camels for the army. 'Othmān extended this area until the diameter was ten miles. The 'Abbāsīd al-Mahdī abandoned it, as the policy of this dynasty was to neglect Arabia deliberately in contrast to the Umayyads who, for example, intensively colonised western Naḡd. In the sixth century A.D. Naḡd was still well wooded, and al-Sharba, south of the Wādī l-Rumma, and Wajra were particularly celebrated in this respect, while at the present day they only possess scanty remnants of these forests. Many areas seem to have been ruined by drought or disastrous inundations (Philby, i., p. 115; ii., p. 9); the decline of al-Yamāma is probably due to the latter cause. Crops are sometimes damaged by sharp frosts — in winter (January) the temperature sometimes sinks from a maximum of 53° F. by day to below 23° and ice and snow have been occasionally seen at the higher levels — while the summer draught with a maximum temperature of 113° destroys the crops. The two most important wādīs are the Wādī l-Rumma about 650 miles long, which runs right across the plateau of North Arabia, rising in the Harra of Khaibar and entering the Euphrates plain at Baṣra, and the Wādī l-Dawṣar. These have formed since ancient times the two main routes of traffic in Central Arabia.

It is with the object of improving agriculture that the king of Naḡd is endeavouring to keep the Bedu to the soil. Every tribe or clan has therefore been allotted a definite area of ground near a well where huts are being erected and the ground planted. These new settlements are called *hiḍra*. In the last ten years, since the revival of Wahhabism, about 70 of these colonies with

2,000—10,000 inhabitants have been established; the most important is Irtawīya built in 1912; Rihani (p. 198) gives a list of others. In this way not only is the cultivation of the land secured but the revenues of the state are increased; these consist of the *zakāt* (10% on movable property), the customs, a fifth in case of war and (formerly) £60,000 subsidy from England. The coins in circulation, in addition to the Maria Theresia dollar, are the English and Turkish sovereign, the Indian rupee and copper coins of 'Omān of the last century, 60 of which go to the dollar. The once famous gold mines of the Banī Salaim at al-'Aḳīḳ, al-Mudjira and Biḥa (Hamdūn, p. 154, 157) are now no longer of importance and unlike al-Yaman, the country possesses no industries.

(ADOLF GROHMANN)

NEDROMA (Ar. NADRŪMA), pron. *Nadrūma*, and sometimes *Medrūma*, 40 miles S.W. of Tlemcen, has since the dawn of the modern period been the most important town in the hilly country between the sea on the north, the lower course of the Tāfna on the east, the plain of Lalla Moghniya (Marnia) on the south and the Algero-Moroccan frontier on the west. It is the country known since the xvth century A.D. as the land of the Trāra, Berbers converted to Islam and Arab culture in the period of the Idrīsids who were known in the middle ages as Kūmya. This little Berber bloc, speaking Arabic, forms with Nadrūma, which is as it were the heart of it, a whole so homogeneous that they cannot be dealt with separately.

1. Past History. We may reject the childish etymology *Ned-Roma* "resembling Rome" given by Leo Africanus (ed. Schefer, iii. 13). Nadrūma was first of all the name of a tribe, a section of the Kūmya family of the Berber stock of the Baṭū Fstn (Ibn Khaldūn, *Barbaries*, transl. de Slane, I. 251). The name is mentioned by al-Balḍī (ed. Lévi-Provençal, *Doc. inéd. d'Hist. Abnaki*, Paris 1928, p. 44; transl., p. 66) where we must understand by al-ḥarya Nadrūma "the people of the citadel (i.e.) the Nadrūma". This passage, written in the xth century, would tend to show how the name of the tribe of the Nadrūma became attached to the little town which was then their principal centre.

Before this period however, Nadrūma was the name of the town; for al-Bakrī (xth century) gives it this name and gives us a brief description of it; he qualifies it as *madīna* "town" and not as simply *ḡarya*. In the time of al-Idrīsī (cf. the *Bilād*) in the xth century, the town was a prosperous one surrounded by walls and had an important market. There is no doubt also — although these two geographers do not mention the fact — that Nadrūma had a mosque.

In the ixth century A.D., the Muslim geographer al-Ya'qubī (*Kitāb al-Buldan*, ed. de Goeje, p. 18 and transl., *Descr. al-Maghrib*, Leyden 1860, p. 117) mentions a considerable town inhabited by Berbers at the extreme boundary of the lands ruled by the descendants of the Idrīsīd Muḥammad b. Sulaymān. The name of this town, written in the Arabic text *فيلوسين*, might be Fīlāusen or Fīlāusen, but with difficulty "Fellousen" (cf. R. Basset, *Nidromak et les Trarai*, p. 7, No. 2) on account of the present day pronunciation of the word by the natives of the country. René Basset (*ibid.*) thinks this town could be identified with Nadrūma, built on the N.W. flank of mount Fīlāusen (modern local pronunciation) — the Fīlāusen of the maps.

The Almoravids of the xth—xith centuries gave Nadrūma an important mosque and a pulpit, in-

spired, G. Marguin says, by that of the Great Mosque of the Umayyads of Cordova as that of the Almohad Kutubiya of Marrākush was later to be. This fact alone would suffice to show the importance in the Almoravid period of this Muslim centre which must have been the greatest in the land of the Kūmya at this period.

Nadrūma had access to the sea by several small ports, the most important of which, Honain, which also served Tlemcen (cf. Marguin, *Honain*, in *R.A.*, 1928, p. 333—350) was however somewhat difficult of access from Nadrūma by the very steep N.W. flank of mount Tāfira. This town had therefore rather to use the port of *Māzin* (al-Bakrī) which was only 10—12 miles away, easy of access at the end of a valley (Wādī Māzin) north of Nadrūma.

In the Almohad period Nadrūma as well as all the land of the Kūmya, where 'Abd al-Mu'min, the first caliph of the dynasty, was born, must have been the object of special solicitude by these rulers, who were lords of Africa and Spain. Moreover it was on the Kūmya, the tribe in which they originated, that the Almohad caliphs relied for support — like all Muslim rulers —: these Berbers were the best auxiliaries in the conquests and the most reliable supports of the throne of Marrākush. Although the name of the Kūmya has now disappeared and has been replaced by that of Trāra, it would be too much, as we shall see, to think that the Kūmya tribes disappeared in the wars of the Almohads.

The name Trāra is quite recent; it appears, it seems, for the first time in a treaty of union — of which the Arabic text is given by R. Basset (*loc. cit.*, *App.*, p. 212—218) — between the Arab and Berber tribes of the N.W. of Oman and eastern Morocco, prepared in 955 (1548—1549) in anticipation of the struggle with the Spaniards, then lords of Tlemcen. In the text the Trāra are described as made up of many sections, the names of which are unfortunately not given. At later dates we again find this name of Trāra in various authors without being able to say to which it refers. As in the xth—xith centuries, Nadrūma is still the capital and the principal town for these tribes.

Most of the Trāra tribes of to-day have preserved the names which the same Kūmya tribes bore in the time of the caliph 'Abd al-Mu'min.

This little Berber capital was undoubtedly never very large if we may judge by the traces still visible of its walls, which have hardly changed since the time of al-Bakrī. It appears in the history of the middle ages, as in modern times as one of the chief towns of the province of which Tlemcen was the capital, whose political and religious influence dominated it and whose destinies it followed.

When in the xth—xvth centuries, Tlemcen being the capital of the 'Abdulwāhid kingdom, Nadrūma, a peaceful town with a temperate climate, in a charming position, overlooking the blue sea a few miles away, became the country resort of the rulers and princes of the royal house. They had a fortified palace there (the *ḡayḡa*) of which considerable remains of the surrounding wall still stand as well as the walls of the buildings. It commanded the town, standing quite near it on the south, and its ruins are still called *ḡayḡa* or *ḡayḡa*. It was to this place that Abū Ya'qub Yūsuf, renouncing the royal throne of Tlemcen to the advantage of his two younger brothers Abū Sa'ūd

and Abū Thābit, retired in 749 (1348) to live far from the court and politics in meditation and prayer (Ibn Khaldūn, *Beṭṭāḥ*, transl. iii. 422 sqq.; Yahyā b. Khaldūn, *Hist. des Rois de Tlemcen*, ed. and transl. A. Bel, Algiers 1903-1910-1913, ii. 14, 18).

It was here that his son Abū Ḥammū II (reigned at Tlemcen 1359-1389) lived with him and the latter's son was born, Abū Tāghfīn II who dethroned his father and reigned after him (1389-1393).

This pious withdrawal of Abū Ya'qūb to Nadrūma was only to last about four years until the conquest of Tlemcen and Nadrūma by the Marinids of Fās in 1352.

No king and apparently no prince was ever buried at Nadrūma. There is however the mausoleum of a saint in the midst of the ruins of the palace. The individual whose tomb it is believed to mark is called "Sidi Sulṭān". Neither the name, nor history, which does not mention him, nor legend, which simply makes him come from Egypt at a remote period, tells us anything of value about him. Nevertheless, in view of the numerous similar examples of the creation of holy places sacred to saints by the Berbers, who are of a deeply religious nature, and in particular by the Berbers of Nadrūma and the Trāra, it is easy to reconstruct the process of the foundation of the mausoleum in question. The sojourn in the palace of Nadrūma of a great prince who had abandoned his rank for a life of devotion must have impressed the people of the time and long afterwards the spiritual merits of this "sultān" must have been related, as one who had certainly been touched by the grace of Allāh. When many years later the name and story of this devout king had been forgotten, the place where he had lived, this *ḡar ṣ-ṣulṭān*, this *ḡarḡa* as it is still called, although in ruins, impregnated with his sanctity — his *baraka* — remained a holy place. It was only a very short step from this to localise the centre of radiation of this *baraka* in a little sanctuary in which prayers could be addressed to the unknown saint who is alleged to be buried there. At the present day this little white dome covering the so-called tomb of Sidi Sulṭān under a very old wild olive tree is the goal of the pilgrimage of numerous women; they come there particularly to seek the cure of a sick child; they expect to obtain this by the fumigation of the invalid with leaves from the olive-tree. Men also visit it. Every year the negroes of Nadrūma (who say that Sidi Sulṭān was a descendant of Bilāl, the Prophet's *mu'aḥḥidīn*) go there on a mass pilgrimage and sacrifice a bull calf; they hope thereby to obtain the regular rainfall needed by the district.

If we have dealt rather fully with this feature of the religious mentality of the people of Nadrūma, it is because it is a sign, among many others, of one of the most characteristic aspects of the religion of the Berbers and of those of Trāra. Maraboutism is so developed among them that René Basset in his study of Nadrūma and the Trāra has collected the names and sanctuaries of 296 holy men and 9 holy women, which is a large number for so small an area. This however does not prevent the people from observing as well as they can the ritual duties of Saḥrī Islām and of zealously attending the many mosques in Nadrūma and in all the villages of the Trāra.

It has been mainly since the xvth century,

during the great popular mystical movement which spread through all North Africa, that the people of Nadrūma and the Trāra have developed this cult of saints and placed all their trust in men of religion and Ṣūfism. Particular evidence of this was seen in the assembly on the banks of the Wardaḡa, on the borders of the land of the Trāra, of the tribes of the region of Nadrūma and the adjoining country when in 1548 the holy man al-Ya'qūb, whose venerated *ṣūfiya* [q.v.] is a little to the west of Nadrūma, led them against the Spaniards who then held Tlemcen.

As a matter of fact the Spaniards who were established in Orna and Tlemcen were never able to occupy Nadrūma and the land of the Trāra. The Turks who finally occupied Tlemcen and the province were not always warmly welcomed there. On several occasions the sultān gharrā of Morocco were able to advance their frontiers to the lower Tāfna. However the Turks ended by establishing their authority which lasted until the conquest of Algeria by the French. Nadrūma and the Trāra did not at once accept the rule of 'Abd al-Kādir; they preferred to be under the sultāns of Morocco. Later they took the side of the emir against the French and it was in these mountains that 'Abd al-Kādir often found a safe asylum when he was defeated, even after 1842 when the French occupied Nadrūma, and notably in 1845 at the time of the famous affair of Sidi Brāhīm (cf. P. Aron, *L'Emir Abd el Kadir*, Paris 1923, p. 207-214) a few miles west of Nadrūma.

II. The Present. Nadrūma, surrounded by gardens full of olive and other fruit-trees of various kinds, rises in terraces which lie on a well-marked hog's back sloping from N. to S. running from the Kaṣba; it is enclosed in a quadrilateral of about 15 to 20 hectares, which is still marked by the traces here and there of its old walls.

This town has preserved the appearance of a city of Western Islām with the Great Mosque dominating the houses with its high square minaret. A small square (*ṣarḡa*) off which open the streets gives a little open space for this building and the central quarter which also bears the name of *ṣarḡa*. Other smaller mosques are in the different quarters but they are hardly to be distinguished from the surrounding houses because they do not have minarets or only a very low one hardly rising above the roof. The chief of these mosques is the *Djāmi' al-Kādirīn*, the "mosque of the potters", which is said to be the oldest of all. It and the Great Mosque are the only two in which the Friday *ḡuṣṣa* is held. It is in the Bani Zid quarter in the S.W. of the town. In the Rīs Esīmā'a quarter in the S.W. are the chapels of Sidi Bu 'Alli and Lāilla 'Aīya; those of the *Djāmi' Haddādīn*, *Dj. Arriya*, *Dj. Sidi Syādī* are in the quarter of Darb al-Sūḡ, to the north of the great mosque and town. At the hours of prayer all these mosques are filled with pious Muslims, many of whom possess a certain amount of Arab culture and religious knowledge; most of them are anxious to have a Muslim education and to give it to their children in addition to French education in the French elementary schools.

Petty traders of experience and agriculturists tilling their fields, the people of Nadrūma also include a considerable number of capable artisans. We shall here confine ourselves to mentioning two of the oldest and most important local industries

of Nadrûma; that of the weavers (*darrâbs*) and that of the potters (*haddârin*).

The weavers of Nadrûma have retained their ancient loom with low warp without any modern improvement not even the picker, and all the old equipment of their ancestors, notably the warper (*adâra*) and spinning wheel (*addâna*). On the loom, material and method of working, one may compare what is done in Tlemcen in identical fashion (cf. A. Bel and P. Picard, *Le travail de la laine à Tlemcen*, Algiers 1913, p. 63 sq.). The weavers of Nadrûma now make only woollen blankets (*hârâdâq*), white or decorated with stripes of colour, hooded cloaks with very short sleeves (*afallûba*), the white *hâq* for men (particularly old men here) which is a long piece of wool without seams, which is wrapped round the body in a certain way. Nadrûma makes several kinds of *hâq* (cf. *L'industrie de la laine*, loc. cit., p. 109).

The potters have for centuries from father to son had their ateliers in the upper part of the town in the S.E. beside the *Kasba*. They make pots and other articles on wheels (*maïm*) of the usual type driven by the foot: cooking pots of rounded shape without handles called *hadra* (whence the name *haddârin* given to the potters), cooking dishes for ragouts (*adîm*) and fat barley or wheat girdle cakes or different kinds of cakes (*maïla*), portable ovens (*madîmar*), *thârrâda* which is in the form of an oven with an earthenware dome above, it shaped like the bottom of an inverted pot on which is poured the liquid paste of these pancakes, as thin as paper, which on account of their thinness are called by the Bedouins in Orania *afâq* "slices" and in Nadrûma as in the towns are called by the old Arabic name of *thârd*. When required the potters of Nadrûma also make other earthenware articles such as flower-pots (*maïlâda*) and the musical instrument called *agnâl*, used by women, consisting of a large earthenware tube, one of the ends of which is closed by a skin stretched over it which is beaten.

The total population of the town of Nadrûma is 7,051 of whom 6,124 are Muslims, 850 Jews and about 200 Europeans (chiefly French). The Jews do not actually have a special quarter but they live almost entirely in the two streets of the Darb al-Sûk and in another in the Bant Zid quarter; they are petty traders, labourers and artisans (it is they who make the saddles for the mules and asses). The majority are of Berber origin; they are usually poor. Although they only marry with one another and live apart from the Muhammadans, the Jews live in houses quite like those of the Muhammadans, lead the same kind of life and use an Arabic dialect among themselves.

The negroes (*adîd*) who are not very numerous are called *ganza* (Guineans) and live in a separate quarter in the west centre of the town. They are in very humble circumstances, stokers of the bakers' ovens or the furnaces of the baths, labourers and workmen. Although regarded as Muslims, their religious life is not at all regular and they are regarded, as elsewhere, as more or less of *sonneers*.

The French element is very small; it consists almost entirely of officials and their families. They live by themselves in the public buildings (schools, gendarmerie etc.) and in European houses roofed with red tiles, which form an entirely distinct quarter outside the native town (to the N. and N.E.).

Nadrûma is the capital of a mixed commune. The civil administrator who lives there has under his authority the town and the Trâra tribes of the neighbourhood: Ljâbâla, Zawiyat al-Mia, Sawâhliya, in the West and N.W., Bant Muir, B. Mahal, B. Khalîd, B. Abed, in the N.E., E. or S.E. the population of which numbers 47,224 native Muslims and 83 Europeans.

The other Trâra tribes are not under Nadrûma; these are the Maïda, in the extreme N.W. who belong to the mixed commune of Marnia; the B. Warûs and the Ukhâsa Ghirâba, to that of Remchi-Montagnac.

On Thursday which is the market-day there come into Nadrûma large numbers of people from all the country round; they bring in their stock, especially sheep, goats, cattle and mules and, according to the season, the produce of their fields and gardens (wheat and barley, almonds, carrots, figs, grapes, etc.) and of their flocks (wool and goat-skins, butter, turds etc.) as well as chickens, eggs and honey. The country artisans (men and women) bring in the articles they have manufactured (articles of woven grass, walking-sticks and little articles of wood carved with the knife with Berber designs), wool, articles of terracotta, notably Berber pottery decorated with geometrical designs, made by the women of Maïda (and similar to the other Berber pottery made by the women of Kabylia, the Târl and elsewhere).

It is on market-day that one realises that Nadrûma is the economic centre of the whole district of the Trâra and sees the variety of products of the soil and industry of these Berbers.

The abundance and variety of these products are not due only to the activity of the inhabitants; the climate and the soil also help. The climate is fairly equable: tempered by the proximity of the sea it is never extreme as in the case of continental districts. For the rest, the height of the hills, while sufficient to encourage rainfall, is not very great: it does not exceed 3,500 feet at Fallaussen and 2,200 at Nadrûma. It is therefore only in the very hardest winters that snow for brief periods whitens the summits of the range. As to the soils of this coast range, which, between the depression of the Tâfâ in the east and the neighbouring plains of the Moroccan frontier in the west, run from the Wâd Mulla (2 miles N. of Marnia) to the sea, they offer a certain variety in their nature and origin. Around the primary massif, which includes the highest peaks, Fallaussen and Tadjra, are several eruptive (islets (granite) and hills of secondary formation (Jurassic). The lower areas, especially the plains of the N.W., as far as the coast (where there are several old eruptive mameïnes) and the depressions of the S.E. and E. along the Tâfâ, are middle Miocene formations.

The mountains also possess numerous perennial springs which feed little streams which irrigate the gardens; there are also various minerals, several of which have been recently or are still being exploited by Europeans.

It is due to the quality of the clay around Nadrûma and the granitic sand used for moulds that the pottery industry is one of the oldest and most prosperous in the town. The native vegetation is abundant and varied; in addition to the many varieties of trees of the highlands (notably sumach (*sîgha*), the wood of which is exported

to Europe through the port of Nemours), we may mention many kinds of plants used for medicinal purposes or dyeing. It is for example thanks to the madder abundant in these regions and used by the natives for dyeing the dwarf palm leaf that the people of Uthāqaghrib are able to make a fine and famous straw work (men's hats with high crowns and broad brims called *nefall* — baskets of various shapes all of dwarf palm leaves). All these articles are prettily decorated in red on the yellowish white foundation of the palm leaf; they are known and purchased by the natives of the whole of Oran and eastern Morocco.

It is also owing to the abundance of pasture in these hills that the rural dwellers, none of whom however are nomads, can raise so many flocks especially sheep. The wool from their flocks is almost entirely used in the country by the weavers of Nadrūma and by the country women who by their weaving, using the loom with a high rail like all the women in North Africa, make a considerable part of the family's woollen garments. All these women are excellent spinners; they have a great reputation for the fineness of their work.

Even from chickens — to feed which the country women in the autumn collect the red fruit of the mastic which is very abundant in this country — the people, who are greedy of gain, make a profit; thousands of eggs also are exported every month from Nadrūma via Nemours, to France and particularly to England.

Bibliography: Besides the works quoted cf. especially: al-Bakrī, *Description de l'Afrique septentrionale*, Arabic text, ed. de Slane, Algiers 1857 (republ. in 1911), p. 80; French transl. in *J. A.*, 1839, series v., liii. 142-143; al-Idrīsī, *Description de l'Afrique et de l'Espagne*, transl. Dory and de Goeje, Leyden 1866, text, p. 172; Fr. transl., p. 209; Leo Africānus, *Description de l'Afrique*, ed. Scheler, Paris 1898, lii. 12 sqq.; Marmol, *L'Afrique*, transl. Paris 1667, li. 324-325; Canut, *Mémoires de l'Aréopage de Tlemcen* (in *Bull. soc. d'arch. et de géol. d'Oran*, 1888, viii. 62-65); René Basset, *Nédromah et les Trarars*, Paris 1901; A. Bel, *Tlemcen et ses environs; Guide illustré du touriste*, Toulouse n.d., p. 92-94. — For the history cf. the *Bibl.* in the article 'AHDAWAKHUS', completed by that under ZAYĀRUS, adding the reference to al-Balḡhāq, quoted above. For the rest and especially for the ancient period as well as for the modern, there is a very full bibliography in the notes and references in *Nédromah et les Trarars* by R. Basset. (ALFRED BEL.)

NEFİ, the greatest satirist of the Ottomans. 'Omer Efeendi whose nom de plume (*makhlūs*) was Neḥī came from the village of Hasan Kef'a near Erzerūm (Eastern Anatolia). Not much is known of his early life. He spent his early years in Erzerūm where the historian 'Alī [q.v.], who was a *defterdar* there, became acquainted with him. During the reign of Ahmad I fate brought him to the capital Stambul where he worked for a time as a book-keeper. He failed in an attempt to gain the sultan's favour or that of his son, the unfortunate 'Othmān II, with some brilliant *kāsidās*. It was not till the reign of Murād IV that he gained the imperial favour but his malicious, sarcastic and indecent poems soon brought him into disgrace. He was appointed

to the post-tax office and later again became a member of the sultan's circle. His irresistible impulse to make all the notables of the empire the butt of his mockery made him a host of enemies. A satire on Bairām Paṣhā, the sultan's brother-in-law and vizier, who had succeeded in being recalled from banishment and again attaining influence, cost him his life. The sultan gave his sanction to the execution of the great poet. With the sultan's consent he was shut up in the wood-cellar of the serāy, then strangled and his body thrown into the sea. The year of his death is 1044 (beg. June 27, 1634), not 1045 as Hādīdjī Khalīfā, *Fihrist*, li. 183 wrongly says (cf. on the other hand his *Katḥf al-ḥunūn*, lii. 318 and 631 where the correct date is given).

Neḥī wrote Turkish and Persian with equal ease. His mastery of technique and natural poetical talent make him one of the greatest Ottoman poets; he is also undoubtedly one of the greatest, although hitherto little known satirists. The reason why he is so little known is that a scholarly edition with full annotations of his Turkish *Divān* entitled 'Arrows of Fate', *Şihm-i Kuds*, has so far never been undertaken, so that at the present day hardly any one is able to understand the countless allusions to particular circumstances and the veiled attacks on the individuals dealt with. The publication of his poems demands a knowledge of the conditions of his period and particularly of life at court which it is hardly possible to attain and which it would be very difficult to gather from the existing sources. Many of his flashes of wit and allusions are very difficult to understand. Many of his poems are distinguished by an obscenity which can hardly be surpassed and however great may be their importance for the social history of his time, they are of little value as evidence of his poetic gifts. The 'Arrows of Fate' are directed against almost every one prominent in politics and society in his time. In *G. O. D.*, lii. 241, J. v. Hammer has compiled a list of them. Some of his poems which pillory existing institutions, like the popular saints, the Kalender-dervishes [q.v.] etc. are of value for social history. Hardly one important contemporary was able to escape his scorn and ridicule. They were all made targets for his 'Arrows of Fate' without mercy. He attacked the jurists (*ulama*) particularly unsparingly. Neḥī's Turkish *Divān* has been several times printed: two parts at Bulak in 1253 and in 1269 at Stambul. Selections (with ample evidence of 'Abd al-Hamid's censorship!) were published by Abu 'l-Diyā' Tewfik in 1311 at Stambul. There are MSS. in European collections in London, Leyden and Vienna. Mr. Walther von der Porten now (1933) in Zurich owns two particularly beautiful and old MSS. A short *Saḡi-nāme* by Neḥī is mentioned in the catalogue of MSS. of the Leipzig council library by H. L. Fleischer (p. 547^b). On his death, cf. Farā'istūda, *Ta'rikh-i ḡalib-i Mo'arif*, i., Stambul 1252, p. 668, and Na'imā, *Ta'rikh*, li. 489.

Bibliography: In addition to the sources mentioned cf. also Gibb, *Ottoman Poets*, p. 208 and *H. O. P.*, iii. 252 sqq.; the history of Na'imā (i. 586) and Beḥāll Meḥemmed Tāhīr, *Ölüm-nāme Mülâhizat*, li. 441 sq. (according to which parts of his Persian *Divān* were published in the *Kānūn-i Fannī*).

(FRANK BARINGHUR)

NEFTA, a town in the south of Tunisia, lies 15 miles W. of Tozeur on the isthmus which separates the depressions of the *Shott al-Djârid* and the *Shott Gharsa*. In the middle ages it was considered one of the principal centres of the land of *Qastiliya* [q.v.] along with al-Hamma, Takina and Tozeur, which was the capital. It was regarded as a very old town. Nefta as a matter of fact replaced the town of Nepte or Aggarcel-Nepte. The Roman town must now be buried in the sands close to the present town. We may presume that there still existed in the early centuries of the Muslim period visible traces of the old town. Al-Bakrî tells us that the town was built of large blocks of stone (*qasâr*). The author of the *Istihqâr* regards the wall which surrounds it as having been built by the ancients. The dam on the Wed Nefta is made of Roman blocks if it is not actually of Roman work (Tissot).

Memories of the pre-Islamic past were also found among the people of Nefta. Its large population was regarded as consisting for the larger part of descendants of Christians (*Ya'qûbî, Istihqâr*) who must have retained their faith for a considerable period. Ibn Khaldûn (*Berberes*, I. 146, transl. I. 231) remarks on the presence of Christians in the province of *Qastiliya* at the end of the sixth century. The outlying position of this province perhaps explains the survival of a Christian colony, which was exceptional in Barbary. It is moreover worth noting that the attitude of the people of Nefta in religious matters has often been non-conformist. In the tenth century, according to Ibn Hawkal, *Khâridjism* still survived there; in the eleventh century, according to al-Bakrî, the people of Nefta still professed the *Shi'a* so that this town is called *Little Kûfa*. We shall see that at the present day it is an important centre of maraboutism.

The remoteness of the capital assured Nefta, like other towns of the *Djârid*, a fairly regular political independence. Like al-Hamma and Tozeur, it was long (probably from the period of anarchy which followed the Hilâlî invasion) governed by a council of notables, the president of which held the position of a feudal lord, indeed prince. In the sixteenth century this office was held by the family of the Banû Khalaf, who claimed to be of Ghassânid Arab origin. The Banû Khalaf and the people of the oasis whom they ruled maintained regular relations with the Sulaimid Arabs of the great tribe of *Qo'ûb* who periodically frequented the country around. A tradition of reciprocal service united these immigrant nomads and settled natives, the nomads defending at need against the attempts of the central power the settled population who in turn assured them their subsistence and the provision of their supplies. The central power when it felt sufficiently strong naturally endeavoured to bring the *Djârid* under its authority again. Nefta thus underwent alternatively periods of subjection and independence. In 744 (1343) the Hafsid caliph Abû Bakr sent his son Abû 'l-Abbâs who secured the submission of the people of Nefta by cutting down a part of their palm-trees and putting to death nearly the whole of the Banû Khalaf. A century later (845 = 1441) the caliph Abû 'Omar 'Othmân, having taken Nefta, sacked it, executed the chiefs of the Banû Khalaf and placed the town under a *hâ'id* of his own choice.

If the partial destruction of the palm-trees — a classical procedure — had brought the people

of Nefta to terms, it was because these trees supplied the greater part of their income. Very abundant springs (the largest of which rising north of the town forms the Wed Nefta) assured and still assure the life of this splendid oasis. There is at the present day a forest of 275,000 palm-trees there. Nefta was however also a commercial town, a wealthy emporium and a centre of the exchange of goods. Before the establishment of the Protectorate, trade was mainly carried on at two periods of the year: at the beginning of spring, when the expeditionary force which had come from Tunis to collect taxes could guarantee the security of the routes and at the end of summer when the marauding Arabs had left the country to buy corn in the north.

Consisting of merchants and farmers with the important aristocracy of the *Shorfa* [q.v.], the population of Nefta (estimated at the present day at over 13,000) is distributed over eight quarters separated from one another by palm-groves. Each of the quarters has its mosque. Al-Bakrî tells us that Nefta in his day had already a great mosque, several smaller places of worship and many baths. The places of worship belonging to the *zâwiya* of the various brotherhoods are still characterized by their hemispherical or ovoid domes. The most important *zâwiya* is that of the *Kâdiriya*, an influential centre of worship. The architecture of the houses, the decoration of their façades with reliefs of brick, contribute to give to Nefta an imposing appearance which is also characteristic of Tozeur.

NEHÂWÂND. [See Nihâwând.]

NERGISI, properly NERGİZ-ZÂDİR MEHMED EFENDİ, an important and distinctive stylist of the old school, poet and calligrapher. Born about 1000 (1592) in Serajevo (Boana Serai) the son of the *nâ'ib* Nergiz Ahmad Efendi, he received his education in Constantinople where he attached himself as a pupil to Kâf-zâde Faiz 'Abd al-Halî. On the completion of his studies he served as *muderris* and *nâ'ib* in Gabala, Mostar, Yeni Pazar (Novibazar), Elbasan, Banyaluka and Monastir. He was on intimate terms with the Shaikh al-Islâm Yahyâ Efendi. He travelled a great deal. Nergisi was appointed imperial historiographer (*ta'rif nâ'ib*) when Murâd IV set out for Baghdad on the campaign against Eriwan. He died on the march at Gebize (Gebelze) on the Gulf of Ismid as the result of a fall from his horse and was buried there (1044 = 1634). The other statement (Hafiz and Riyâzî) that he was buried in Aiyûb is not at all probable.

Nergisi is celebrated less as a poet than as a stylist. His stilted and unnaturally affected style (*Nergisi İsmi*) and his bombastic, overlaid language were regarded as unsurpassed models for the whole of the period fascinated by this stylistic foolishness. Even in the older stylists far more importance had been attached to the word than to the sense. But Nergisi completely sacrificed sense to sound and let it all disappear in bombast. He is the most perfect master of this style with a language even more florid than that of Walis, whose *Siyer-i Nebi* he tries to outdo; his style is even more extravagant and artificial, more laden with rare words, *seğ* expressions and obsolete similes than any other.

The most celebrated of his works is his *Khamse* (Quintet). Originally this consisted only of the *Khamse* of the *Nihâlîsân* (the quintet of "offshoots") which was composed in imitation of Sa'di's *Gulistan* and *Bûstân* in Monastir. It consists of five parts (*nihâl* = offshoots), viz. stories of liberality and magnanimity; of love; legends; stories showing how every one gets the reward he deserves; lastly, legends glorifying virtue and penitence. The contemporary allusions in the very realistic tales, little influenced by superstition, are important.

This original *Khamse* was later expanded into the great *Khamse-i Nergisi* by the addition of four other pieces: 1. *İhtir-i Şadî* (also called *İhtir-i Dewlet*: Elixir of Happiness), the translation of a portion of the *K'utub al-Sa'ade* of the Imâm Ghazâlî, which had already been translated by the poet Sîhâbî. Only Nergisi's translation however has become celebrated. The obligations of social life are dealt with in stories. This work, which also appeared separately, is of value for its ethical teaching; 2. *Maşâhîb al-Uşshâk* (the sorrows of lovers): love-stories, which Nergisi collected when Kâdî of Elbasan. As several of the stories in it were later included in the *Nihâlîsân* this part looks very small in print; 3. *Künûn al-Rehâd* (canon of the straight path), a translation of the book written for the Cingizid Sultan Muhammad Khubabanda: *Ahklâk al-Salâm*: the duties of a ruler, a kind of mirror for princes. It is prefaced by a panegyric (*medîha*) of Sultan Murâd IV, the Shaikh al-Islâm Es'ad Efendi and the two Şadrs of Rûm and Anatolia: Ghani-zâde and 'Azmi-zâde; 4. *Ghazavât-i Maslama*: the wars of religion waged by the Omayyad Maslama b. 'Abd al-Malik against the Greeks and Byzantium. Maslama on his different campaigns had advanced as far as Constantinople, which he besieged; on this occasion he built the 'Arab Mosque in Galata. The book is taken from a work of Muhyî al-Dîn. The *Khamse* was twice printed (Bulâk 1255 and Constantinople 1285).

Nergisi also left a collection of 50 letters: *İnşâ'* or *Munîha'at*, which were collected by Shaikh Mehmed b. Mehmed Shaikhî, the continuator of the *Shâhîk al-Nu'mâniye*.

Nergisi also wrote a historical work: *Wasf al-kamil fi Ahrâk al-Watir al-İslîl*, five years on the history of the governorship of the warlike Bosniak Murterâ Pasha, Pasha of Ofen, who died in 1636; this was written in Banyaluka in 1038 (1628). The holograph of his work is in the Enderûn-i Humûyûn Library in the Rewân Kûshki. No work exists from his brief tenure of the office of Imperial historiographer.

Nergisi was also a great calligrapher particularly celebrated for his speed in writing. There are works written by him in several libraries.

NESH'ET KHODJA SULAIMAN, an Ottoman poet. He was born in Adrianople in 1148 (1735), the son of the poet Ahmad Rafî' Efendi, then in exile; the latter is known as *Muâhib-i Shahryârî*. With his father, who had regained the sultan's favour by writing a *sharh*, which met with general approval, he came to Constantinople. He also accompanied his father on a journey to the Hijâz and the young Hadjîdî, on his way back, joined the Mawlawî order in Konya. After his father's death, he devoted himself to study, especially Persian, in order to understand the *Mathnawî*. In Persian, which he came to love passionately, he attained a high degree of perfection with the result that he had more pupils than an ordinary school in his house in Molla Gürânî, where he taught Persian and expounded the *Mathnawî* (*Mathnawî Kâzânî*). He enjoyed great prestige among the people. Later he attached himself to the Nakshbandî Shaikh Bruzewî Emin Efendi. He held a fief and therefore took part in 1182 (1768) in the Russian campaign. He could use the sword as well as the pen. Nesh'et died in 1222 (1807) and was buried outside the Top Kapu.

He received the nom de plume of Nesh'et from Djâdî. Nesh'et was a moderate poet but an admirable teacher. No one would say an unkind word about him and they winked at his smoking the *hish* which was otherwise forbidden. He wrote poetry in Turkish and in Persian. Many of his pupils far surpassed him, such as Ghâlib Dede. He left a *Divân* which was printed in two parts in Bulâk (1252 = 1836). His *Makhlûq-nâm*'s (about 20 in the *Divân*) are distinctive in character; these are poems in which he bestowed epithets upon gifted pupils. In addition he left writings on the Nakshaye: *Tâfîs-i Ma'rîfet*; *Tarjimai al-'Ulûk*; *Maalak al-Anwar wa-Manab al-Ahrâr*. His *Tarjimai Sharh-i dâ Bait-i Molla Djâmî* was printed at Constantinople in 1263. A biography of him by his pupil Pertew Efendi which was continued by Emin Efendi is said to exist.

Hu... zu Wien*, i. 686. (MENZEL)

NESHRI, MEHMET, an Ottoman historian, with the nom de plume (*seudonym*) of Neshri; his origin is not definitely known. According to Ewliya Celali (*Seyahatnâme*, i. 247), he belonged to Germian-elli [q. v.]. 'Ali, *Kunî al-Ashraf*, v. 225 sketches the career of a certain Mewlûs Mehmed b. Neshri among the 'ulama' of Murâd II. According to him, the latter came at an early age to Brussa, studied there at the Sultân Medrese, was appointed *muderris* there and died in Brussa. In view of the rarity of the name — indeed it is not otherwise known —, it is probable that this Mehmed b. Neshri was the grandfather of the historian. As to the latter we know only that he was a teacher in Brussa and it may be assumed that he died there in 926 (1520).

Neshri wrote under the title *Dihân-nümâ* a history of the world in six parts, of which only the sixth, dealing with Ottoman history, seems to have survived. This, usually called *Tarîkh al-'Othmân*, is obviously a compilation but the question is still unsettled whether Neshri was the compiler or whether he copied a compilation already in existence in order to add it as a sixth part (*hizm*) to his own compilation on the history of the world (cf. P. Wittek, in *M. O. G.*, i. 130, who decides for the second hypothesis). There are suspicious echoes of the work of 'Ashûk Paşa-Zâde and of Bihishti's Chronicle (cf. F. Balinger, *G. O. W.*, p. 43 sq.) and it should perhaps be investigated whether the *usûl* Neshri made a popular version of Bihishti's *Tarîkh* which was written in an elevated style, or the stylist Bihishti rewrote the work of Neshri in elegant language. The sixth part of the *Dihân-nümâ* is divided into three sections (*fakhs*): *Evâlat-ı Oğuz*, *Salâh-ı Rûm* and the *House of 'Othmân*. The history of the Ottomans is narrated down to the time of Bayazîd II; the work comes down only to the year 1485; that is, as far as his sources go, of which one went up to 1485. He concludes with a *hazâin* in praise of the ruling sultan in the middle of the reign of Bayazîd II. Neshri had considerable influence on contemporary and later historiography and is frequently cited as a source, e.g. by 'Ali, Sa'd al-Din, *Şoluk-nâmê* and *Minedjîm-heshi*. A full survey of the contents of the *Tarîkh* of Neshri is given by Wittek, in *M. O. G.*, i. 77—130. It has so far not been published. There are a number of good manuscripts in existence, e.g. in the Bibliothèque Nationale in Paris (*Suppl. Turc.*, N^o. 153, a very handsome MS.) and N^o. 1183 of the Charles Schefer collection, and in Vienna, Nat. Bibl., N^o. 986 (cf. Flügel, *Kat.*, ii. 209). Specimens of his text have often been published; see a list of them in F. Bahinger, *G. O. W.*, p. 39.

Bibliography: Cf. the sources collected by F. Bahinger, *G. O. W.*, p. 39, notably J. H. Mordtmann, in *Isl.*, x. (1920), p. 159 sq.; al. (1923), p. 168 sq.; also J. v. Hammer, *G. O. D.*, i. 310. (FRANZ BÄRINGER)

NESİMİ, SA'İM HAVÂ AL-DÎR, known as Nesimî, an early Ottoman poet and mystic, believed to have come from Nesim near Baghdad, whence his name Nesimî. As a place of this name no longer exists, it is not certain whether the *lughat* should not be derived simply from *nâsim* 'asphyx, breath of wind'. That Nesimî was of Turkoman origin seems to be fairly certain

although the 'Saiyid' before his name also points to Arab blood. Turkish was as familiar to him as Persian; for he wrote in both languages. Arabic poems are also ascribed to him. Little is known of his life; it fell in the reign of Murâd I (1359—1390) as his biographers tell us. He was at first a member of the school of Shaikh Shibli (247—334 = 861—945) but about 804 (1401) he became an enthusiastic follower of Fâdî Allah Harûfî [q. v.] with whom he was undoubtedly personally acquainted. He championed the views of his master with ardour and at the risk of his life. The poet Refî'i, author (811 = 1408) of the *Dehşet-nâme* (copies in London, cf. Rieu, *Cat.*, p. 164 sq. and Vienna, cf. Flügel, *Kat.*, p. 461 and 462 (two MSS., the second more complete)), and presumably a *Ghaff-nâmâ* (in Vienna, cf. Flügel, *Kat.*, i. 720) was his pupil. A certain Shâh Khandân who was a dervish mystic is mentioned as his full brother. Nesimî met a cruel death in 820 (1417—1418) in Aleppo where he was slayed for his heretical poems on a *fermâ* of the extremely fanatical mufti. He is considered the greatest poet and preacher of the Harûfî sect. His work consists of two collections of poems, one of which, the rarer, is in Persian and the other in Turkish. The Turkish *Dihân* consists of 250—300 ghazels and about 150 quatrains, but the existing MSS. differ considerably from the printed edition (Stambul 1298 = 1881). No scholarly edition has so far been undertaken. The Persian *Dihân* has not been examined at all. Nesimî's spiritual influence on the dervish system of the earlier Ottoman empire was considerable. The pro-'Alid guilds in particular honour Nesimî as one of their masters, testimony to whose far-reaching influence is found even in the earlier European travellers like Gioy. Antonio Monavino (c. 1540; cf. F. Balinger, in *Isl.*, xi. 19, note 1, from which it is evident that Nicolas de Nicolay copied him and therefore cannot be regarded as an independent source, as Gibb, *H. O. P.*, i. 356 sq. thought) and Sir Paul Ricaut (xviii century; cf. Gibb, *H. O. P.*, i. 357 sqq.). Nesimî's importance as a poet and mystic can only be estimated and realised in connection with a thorough study of the older Harûfî texts, among which a most important one is that mentioned but not recognised by W. Perich, *Pers. Handschr. Berlin*, p. 264 sq. N^o. 221 by Saiyid 'Ali al-A'în (d. 822 = 1419) because it might show the connection of the Harûfîya with the Bektaşîya. Nesimî's poems were made popular in earlier times, especially by the wandering *Kalender dervishes* [q. v.] and were known to every one.

Bibliography: Gibb, *H. O. P.*, i. 343 sqq.; J. v. Hammer, *G. O. D.*, i. 124 sq.; also the Ottoman biographers of poets who however contribute practically nothing to the life history of Nesimî. (FRANZ BÄRINGER)

NESTORIANS. The Christian community (*millet*) which we know as Nestorians is at the present day better known under the name of 'Aḡirā or *Gile*. Down to the war of 1914 they lived in the central part of Kurdistan which lies between Mawil [see 2091], Wân and Urmîya [see 2091A]. Their main nucleus was represented by the highland Nestorians, in practice independent, living in the inaccessible regions of the highlands on the middle course of the Great Zâb, Tiyârî, Tikhman, Tkhub, Dîlî, Dîra, Uri, Salabekân, Bâz, etc. Outside of this national centre the Nestorians are

found scattered in enclaves among the Mahammadan population, Kurd and Persian, of the adjoining districts: Gawar, Targawar, Margawar, Shamdînâ (q. v.); on the plateau of Urmîya (some sixty villages), in this town itself; finally in the north at Salamas, Bâshkâl's Khoshâb and in the south in Mawjil and around it (Alkosh etc.).

Geography. It may be useful here to touch on some of the salient features of the Nestorian country in the strict sense, which is but very little known. We mean by this the area on both sides of the middle course of the Great Zâb, in the part where it describes an arc towards the east, between 37° and 37° 30' N., 43° 30' and 44° E. In Layard (*Ninewa*, I) we have a description of the Nestorian districts on the right bank: the upper Tiyârî with Çambî and the greater part of the Lower Tiyârî with Aghita and Lîsan. We shall give here a general account of those on the left bank, namely, going from N. to S. and from W. to E.: Dîza, Kîr, the eastern part of the Lower Tiyârî, Tal, Walto, Tkhûma (with Tkhûb); further to the east, Dîlâ, Bâz and lastly Ightarin. All these districts lie in the folds of the massif which the Turks know by the general name of Dîlâ Dâgh, but which for the natives has a number of summits. This massif of Dîlâ Dâgh to some degree forms a curve in the inverse direction of the arc of the Great Zâb.

History. The teaching of the Nestorians, who were very active missionaries, was at one time very widely disseminated in Asia. An inscription in Chinese and Syriac was discovered at Singanfu. At Travancore, in South India, there is still a Nestorian community in existence. It was under the Sâssânians that the Nestorians played an important part. It is true that under Shâpûr II (309-379), Yazdegerd I (399-420) and Bahram V (420-438) severe persecutions took place for various reasons, of which the extraordinary spread of the sect was not the least. On the other hand, purely political reasons, fear of Byzantine influence, made the Persian government distrustful of them. We know for example, that the Byzantine emperor demanded from Bahram V and Khuraw I the free exercise of the Christian religion. Permanent good relations between the Nestorian Church and the state therefore date only from the declaration of independence of the Eastern Syrian church under a Catholicos of Seleucia with a dyophysite confession of faith. The most flourishing period of Nestorianism was therefore in the reign of Hormîz IV and at the beginning of the reign of Khuraw II, i.e. from 578 to 603 A.D. Under the influence of Gabriel of Sîgar, who had gone over to the monophysites, Khuraw II began to persecute the Nestorians; one result was that from 609 to 628, the year of Khuraw's death, the position of Catholicos remained vacant. Two events in this period are of special importance to us. The first was the establishment of Christianity in Central Kurdistan, where we still find direct and indirect traces of it at every step: churches, monasteries, traditions, place-names. In the fifth century the faith gained ground daily among the people of the high plateaus of Irân proper and among the Kurds. Pethion (d. 447) conducted a very successful missionary campaign in these mountains, which was crowned by his martyrdom. Emulating him, Saba, the "teacher of the heathen", went among the Kurds, who were sun-worshippers,

His eloquence supported by numerous miracles gained many converts (J. Labourt, *Le Christianisme dans l'Empire Persan sous la Dynastie Sassanide*, Paris 1904). Let us not forget this first Nestorian advance into Kurdistan. The oldest Nestorian churches in Central Kurdistan date from the fourth and fifth centuries. These are Mâr Zaya at Dîlâ; Mâr Bîshu at Dîl; Mâr Saba (ruins) at Kôfânîs; Mârî Memo at Oraman. The monastery and church of Mâr Saba at Aghita in Tiyârî were also held in great veneration but we do not know their date. Secondly we must note here how relations were established between the Nestorians and Islâm (Tor Andrae, *Der Ursprung des Islams und das Christentum*, Upsala 1926). The part played by the Nestorians at a certain period under the Sâssânians explains the conversion of the Yaman to Nestorianism at its conquest by the Persian general Wahrîs in 597. It was in the Nestorian form that Christianity penetrated into Analis in the zone of Persian influence, i.e. from Hâdramawt to Palmyra. We know the names of six Nestorian bishops on the eastern shore of Arabia. The first to be founded was that of 'Omân (acts of Councils 424, 544, 576, 676). A Christian community on the island of Soqôtrâ used to receive its priests from the Catholicos of Persia. Relations with Persia were established by sea. By the time of Muhammad the South Arabian church was already Nestorian. We have definite evidence of this in the fact that Saiyûd, prince of Nejdân, came with the bishop Ishô'yâh to Muhammad to seek favours. Bar Hebraeus who records the incident adds that the Prophet gave them a document ordering the Arabs to see that no injury was done to the Christians and to help them to rebuild their churches. The priests and monks were to be exempt from the poll-tax, which besides was not in general to exceed 4 *âîr* for the poor and 12 for the state. According to another source, the bishop only wrote to Muhammad. A passage in a letter of Ishô'yâh III (647-648) shows that the relations between Arabs and Nestorians were very good. This may be attributed to the fact that the Christology of the Nestorians was much more acceptable to the Muslims than that of the monophysites. Every Nestorian church in the east possessed its own version of the letter of protection alleged to have been given by the Prophet (cf. for example that given by George Dav. Malech in his *History of the Syrian Nation and the old Evangelical-Apostolic Church of the East*). In any case this letter did not prevent (see below) the proclamation of the *ghîyâd* from which the Nestorians later suffered so much.

The life of the Nestorian Church during the period from the Mahammadan conquest to the establishment of the Mongols need not detain us here, as it is part of the religious history of the Christian sects. We need only mention as particularly concerning Agharwâdjân that the Jacobite and Nestorian rites were rivals there. Thus from 630 to 1265 we have a line of Jacobite bishops. We know also (Assemani, *Bibl. Or.*, III/ii. 707) of Nestorian bishops both to the east of Lake Urmîya and also in the country of Lake Wân and Central Kurdistan. It is not always easy to identify the names found there. We have good evidence of the antiquity of Nestorianism in Salamas where there is in the burial ground of Khosrâwâ an epitaph of the sixth century recording the name of Khosro Eskolâyâ "the student Khuraw" (cf.

Daval, *Dialecte néo-araméen*, 1883). Under the Mongols we find at first that the Nestorian priests (*arshans*) were treated with consideration at the taking of Baghdad (Hammer, *Ussan*, ii, 132). We know also that Hülegü's wife was a Christian: at the taking of Arbil, the son of an important Nestorian metropolitan (Adharbāshijān was also under it), the lances of the Mongol horsemen bore little crosses. Later, in proportion as the Mongols became converted to Islam, the Nestorians became subjected to persecution, and particularly after the invasion of Timur they sought refuge in the mountains of Kurdistan from which they did not begin to emerge till the beginning of the xvth century when they spread eastwards towards the region of Urmiya and S. E. towards Mawād; Daval (*op. cit.*, p. 9, note 4) gives notes on the different residences of the Nestorian patriarchs after the taking of Baghdad in 1258. It was under the Patriarch Simeon IV in 1450, that an innovation was introduced, making the episcopate hereditary; this produced a schism in the Nestorian community in 1551 when Sulakha was elected in opposition to Simeon Bar Mama. From this dates the term "Chaldeans" henceforth applied to these Nestorians who recognised the supremacy of Rome, while English and American writers speak constantly of the "Assyrians"; and lastly the Nestorians themselves like to be called *Sāriā*. In Russian the name used is *aisort*. In the second half of the xvth century, the bishop Mār Vāsiḥ recognised the authority of Rome and received the title of Catholic Patriarch of Babylon and Chaldeas, while one of his near relatives, elected patriarch of the Nestorians and remaining faithful to this rite, was enthroned under the name, henceforth hereditary, of Mār Shim'un and at once set out for the mountains of Central Kurdistan, where his residence was sometimes at Ruḥānā and sometimes at Dūlāmārk. Thus originated this quasi-autonomous community of Nestorian highlanders in which an ecclesiastical authority exists alongside of a purely tribal organisation. Indeed while the supreme power is in the hands of a hereditary Mār Shim'un (passing from uncle to nephew) having the title of *patriarch d-malānā*, who was consecrated patriarch by the Metropolitan Mār Hunnāshu, living in Dera Kesh at Shamūmān, each tribe (*shakā*) had alongside of a bishop (*shūnā*), the ecclesiastical chief, a *malik* or lay chief, distinguished by peacock feathers fixed on his conical felt hat, a characteristic feature of dress. The custom of the men arranging their hair in little pig-tails may also be mentioned. The *malik* had power to declare war on another tribe and to conclude peace.

The tribal organisation and mode of life of these highlanders have caused some writers to give them the name of "Christian Kurds" (Garzoni, Lerch).

A. Wigram in the introduction to his *History of the Assyrian Church* thinks that some at least of the Christians of Hakkāri (cf. *gurs*) are of Kurd origin although they deny it vigorously. On the other hand, there are Kurd tribes who remember that they were once Christians. Other writers (Grant), led astray perhaps by the theocratic aspect of Nestorian society, the names and certain Biblical traditions, see in them evidence in support of the hypothesis that the Nestorians are the descendants of the ten tribes of Israel. We know however which actually are the Jewish communities in Kurdistan, quite distinct from the Christian groups

in dress and customs. Only their language is also a Neo-Aramaic dialect. — The Highland Nestorians annually pay Mār Shim'un a contribution called *riḥ d-shita*. The arrears due to the Turkish treasury were simply left to mount up. Caint (p. 749—751), speaking of the autonomous tribes, gives the total of arrears as already 160,000 *ET* in his time. There was besides somewhere in the Nestorian country (cf. Lalayan, who gives a photograph) a "rock of the collector of taxes" marking the limit beyond which this official never risked going. — The relations of the Nestorian hillmen with their Kurdish neighbours were no worse than those of the highlanders with one another usually are. The interest of the tribe came before every consideration of religion, so that *ad hoc* alliances could be concluded between the Kurds and the Nestorians for joint action against their co-religionists.

"The grass grows quickly over the blood spilt in a just battle". A kind of fair play is therefore the ruling principle of the inter-tribal code. There are, it is true, exceptional cases. The pan-Islamism of 'Abd al-Hamid had its unpleasant repercussions in Kurdistan; the Turkish officials appointed there after the revolution of 1907 only complicated the position still further. Since the affairs of the Nestorians and Kurds were conducted on a tribal basis, we find the door of the patriarch's residence open to Kurds and Nestorians indifferently, who come to settle their disputes and hospitality is offered to all alike. On the other hand, we find the Nestorians seeking the good offices of Shaikh Salim of Barzan known as the "Christian Shaikh", who was executed by the Turks in Mawād at the beginning of the War.

The Nestorians and the Diklā. Even before the official outbreak of hostilities between Russia and Turkey, in August 1914, the patriarch Mār Shim'un was invited by Djewdet Bey, the *waḥī* of Wān, to come to see him. Presents were lavished upon him and assurances given that all the grievances of the Nestorians would be redressed. As a result of the proclamation of the *ghilā* however, the atmosphere became heavy in Kurdistan. In November, Turkey entered the war and the persecution of the Nestorians of Albāle (Bashkafa) began at once. In Persia fighting broke out between the Christians of the Urmiya region and the Bekrān Kurds. At the end of 1914, the Russians evacuated Urmiya and Salamas. Those Christians who did not save themselves in time by going to Dūlfa perished in large numbers. As to the Nestorians of the highlands, although the massacres and deportations of Armenians were at their height, the Turks endeavoured to attach the Patriarch to their side and to secure the loyalty of the Nestorians. Complete educational freedom, good rifles, subsidies and grants to the Patriarch and to the bishops and *maliks*, all these things were promised in vain. Mār Shim'un retired to the particularly inaccessible district of Dix from which the Patriarch's personal bodyguard had always been recruited. About this time an "accidental" shot killed Mār Shim'un's uncle Nestorus, who was, it was said, urging a more conciliatory policy towards the Turks. After an interview, which decided matters, with the Russian commander at Muhsūdijik, near Salamas, the Patriarch on May 10, 1915, issued the order for mobilisation. The fortune of war resulted in the Nestorians, at first encouraged by the Russian successes in Wān and Urmiya at the beginning

of the summer, being left to their own resources. To be brief, with the help of the Hammî Kurds, the Turks sacked Tihûniya, Tiya'ri, Dîlla and Mîr. We may note especially the destruction of the irrigation canals exactly as was done in Sargon's campaign in the same region. The famous church of Mîr Zaia at Dîlla, of the fourth century, was desecrated for the first time in its long history. Interesting *ex voto*, Chinese vases, brought there in early days by missionaries, disappeared. The inviolability enjoyed by Mîr Zaia is said to have been due to a letter guaranteeing it written on a piece of cloth, attributed to the Prophet (cf. above). After this disaster the Nestorians withdrew to their summer pastures, at a height of 10,000 feet. This final trial was a painful one. Harassed by the Kurds, with insufficient food and no salt, the Nestorians nevertheless held out. The Patriarch, taking refuge on the plateau of Shîna, endured privations which were even harder for him who could not eat meat (even the mother of the patriarch apparent must not eat meat). The Nestorian *vallet* of Gawar were massacred at this time under the orders of Nûri Bey. Finally in October 1915 a skilful retreat was carried through. The Kurds were actually holding the approaches to the Persian frontier. A detour was effected towards Albêk in the north via Kotanis (Berwar) and the bridges were burned after crossing the Great Zab. The Kurds succeeded however in threatening the retreat by using the natural bridge of Hese'ikan, but were driven back by Mîlik Khoshâha of Tiya'ri whose bravery is destined to become legendary. In the month of November the exodus of the Nestorians was completed and they were safe within the Russian lines at Salamas. The Russian authorities organised assistance for the refugees, who to the number of 40,000 were settled in the Persian districts of Khûi Salamas and Urmîya where they remained till 1918. After the departure of the Russians as a result of the revolution, the Nestorians formed detachments with the help of Russian munitions and instructors and opposed the advance into Adharbâidjân of the Turks led by 'Allî Ihsân Pâshâ. Towards the end of the summer of 1918, however, their munitions being exhausted, the Nestorians left the region of Urmîya via Sûldûs-Sân Kâfa-Bidjâr for Hamadân where the English forces then were. From there the refugees were sent to the concentration camp of Baqûba near Baghdâd. The Patriarch was no longer alive. Led into an ambush by the Shîkî Kurd chief Ismâ'îl Aghâ Simkô, Mîr Shîm'ûn was treacherously assassinated at Kohne Shêhr on March 4, 1918.

The Nestorian community is now living in scattered groups in the 'Irâq, Persia, Syria etc. The post-war history of the Nestorians is closely bound up with the problem of the wilâyet of Mawil, finally attached to the 'Irâq. The line adopted for the northern boundary of the wilâyet in question, however, leaves the Nestorian districts to Turkey and it is very unlikely that they can return there. The martial qualities of the Nestorians were used by the British authorities who raised four battalions from them, which were very useful especially at the beginning of their establishment in the 'Irâq.

In conclusion a few words should be said about the Nestorians of the region of Lake Urmîya. Those of Salamas believe (Duval, *op. cit.*) that they are aborigines converted in the early

centuries of our era. In 1883 there were however only fifteen Nestorian families, the remaining 3,000 having become Roman Catholics under the bishop Mîr Ishô'yâh (d. 1789). As to the Nestorians of the plateau of Urmîya, they preserve a tradition according to which their immediate ancestors came down from the mountains five or six centuries ago, which corresponds very closely to historic fact. The Nestorians of Urmîya have been the object of lively competition among the missions, of which the Presbyterian was first established (1833). The Roman Catholic Lazarists followed in 1863 and finally an Orthodox mission, the brotherhood of Cyril and Methodius, began work in 1905. At one time shortly before the War, there were also Anglican and Catherian missions. The work of the missions has made quite appreciable modifications not only in the beliefs of this ancient Christian community but also in its life and customs. Although little information has been preserved on the subject, there is reason to believe that the Nestorians of Urmîya also lived under the authority of *malîks*, who were recognised by the Shâhs as the official representatives of the community. We have seen a number of *fiwânas* preserved in the family of Dr. Johanna Malik. They were administered according to the old collection of canon law called *Sunâ'idus* of which Shamasha Yûsuf Kaleta published a new edition in 1916 at the American Mission Press.

This is probably only one of the versions of the Synodicon, which we know in the Abbé Chabot's edition with its wealth of learning. In the eyes of the Muslim authorities the Nestorians were *simni* (*dhimmî*; cf. *dhimma*) and their position was regulated by Muhammadan law. With the coming of the missionaries, the position gradually changed. The *malîks* were replaced by *millet bâshî*, each dependent on his respective mission. The Persian governor had to appoint a *sergeant*, an official whose special duty was to deal with foreigners and those under their protection. During the War a national council called *majlis* was organised, which dealt not only with the defence of Christian interests before the local authorities but, especially after the addition to their numbers of the Nestorians from Turkey, acquired a certain political character but later disappeared in the general débâcle. — In conclusion it should be mentioned that in the present article we have confined ourselves mainly to the Nestorian highlanders of Central Kurdistan. The historical phenomenon that we have been led to study in this connection is far from being so limited and simple, for it demands not only consideration of linguistic problems, the ramifications of which go back to a remote past through Aramaic, but also of facts of ethnology even less known which are implied in the idea of Nestorianism. Finally the geographical area is also enormous if we remember for example the epigraphic material from Russian Central Asia.

NEWI, ܢܝܘܝܐ. PIS 'ALI K. NAZŪŪ, an Ottoman theologian and poet, with the nom de plume (*wakhtay*) of Newi, was born in Malghars (Rumelia), the son of Shaikh Pu 'Ali in 940 (1533). Up to his tenth year he was taught by his learned father and then became a pupil of Karanant-zāde Mehmed Efendi. His fellow pupils were Bakī, the poet [q. v.] and Sa'd al-Din, the famous historian [q. v.]. He was an intimate friend

of the former. He joined the 'Ulema', became *muderris* of Gallipoli in 973 (1565) and after filling several other offices became a teacher in the Medrese of Mihr a-Mih Sultan. In 998 (1598) he was appointed *Kādi* of Baghdad but before he could take up office Sultan Murād III appointed him tutor to his son Magāsa and to the princes Bayazid, Othmān and 'Abd Allāh. When after Murād III's death (1003 = 1595) the usual slaughter of the princes deprived him of all the charges, he retired completely from public life and lived on a pension granted him by the new sultan. He died at Stambul in Dhū l-Ka'da 1007 (June 1599) and was buried in the court of the Shaikh Wefā mosque. His son was Newi-zāde 'ATĀ'Ī [q. v.].

Newi was a man of great learning and his encyclopedic knowledge was most clearly revealed in the best known of his works, the *Nata'ij al-Funūn wa-Maḥāsīn al-Mafūn*, in which he surveyed the twelve most important branches of learning; on it cf. [J. v. Hammer] *Encyclopädische Übersicht der Wissenschaften des Orients*, part I. (Leipzig 1804), p. 22 sqq. and the German translation of the story of Shāddān and Bashir, *ibid.*, p. 24 sqq. which forms the concluding section of this work. Brusa'li Mehmed Tāhir gives a list of other prose works in his *Othmānī Mektūbāt*, iii. 437 sq. with references to the libraries in which they are. In poetry Newi imitated the style of his contemporary Bakī without however reaching his level. His poems which were collected in a scarce *Diwan* (MS. in Stambul, Hamidiye library), lack ease and betray too readily the learned author who frequently makes his work difficult to understand with unusual words and obscure allusions. He tries his skill in different forms of verse, the *ḡazal*, *ghazal*, and *muḥawwī*, without however attaining popularity in any one of them. His fame as a poet is completely overshadowed by that of his contemporary and friend Bakī. Newi's high position as an author he owes to his learned work, particularly the already mentioned encyclopedia, which was very popular, as is evident from the numerous MSS. still in existence in European collections (e.g. Berlin, Bologna, Dresden, Leyden, London [3 copies], Upsala, Vienna). A *Salsimān-nāme* by him (Paris, *Bib. Nat.*, cod. reg. 44, Cat. N^o. 308 and F. Babinger, *G. O. W.*, p. 76) does not seem to be mentioned by his biographers. His son Newi-zāde 'ATĀ'Ī wrote a very full life of him (p. 418–27 of the *Shail* to Taghköprü-zāde's work).

Bibliography: J. v. Hammer, *G. O. D.*, iii. 108; Gibb, *H. O. P.*, iii. 171 sqq.; Haddādī Khalifa, *Fedhlike*, i. 120 sqq., also the biographies of poets by Kinali-zāde and 'Abdi.

(FRANZ BÄNINGER)

NEWI-ZĀDE 'ATĀ'Ī, 'ATĀ' ALLĀH, an Ottoman author and poet, better known as 'ATĀ'Ī with the nom de plume Newi-zāde, i.e. son of Newi, was born in 991 (1583) in Stambul, as the son of the celebrated Newi [q. v.]. After the death of his father from whom he received his early education, he placed himself under Kāfrāle Faiz Allāh Efendi, the compiler of an anthology, and later under Akhi-zāde 'Abd al-Halim Efendi. He then joined the 'Ulema' but did not attain any of the higher offices. After becoming a *muderris*, he was appointed a judge and served in this capacity in a number of Rumelian towns like Lofça, Silistria, Rusçuk, Timovo, Monastir (Bitolj),

Trikkala and Üsküb (Skoplje). Soon after his retirement from this sphere of activity he died in 1041 (1634) in his native city of Stambul; here he was buried beside his father.

'Atai is best known for his continuation (*ḡāʾi*) in Turkish of Tashköprüzade's *ḡāʾi al-Nu'māniyya*. This work, entitled *Ḥadīṣ al-Hakīm fī Takmilat al-ḡāʾi*, contains, in addition to a supplement to the *ḡāʾi* in which a place is given to many scholars of the time of Süleimān and Selim II, overlooked by Tashköprüzade, the biographies of Ottoman 'Ulemā and dervish sheikhs down to the reign of Murād IV (on the contents see F. Babinger, *G.O.W.*, p. 172). Death prevented the author from continuing his work, which was taken up by others. 'Atai's book contains 999 biographies. It is written in a very artificial style permeated with Persian, which was popular at the time. 'Atai also enjoyed a great reputation as a poet. He wrote a quintet (*ḡāʾi*) on the contents of which see Gibb, *H.O.P.*, iii, 234 sq. The *Ḥadīṣ al-Hakīm*, manuscripts of which are also common (cf. F. Babinger, *G.O.W.*, p. 172) to which may now be added Stambul, Lilla Lusa II, No. 339, was printed at Stambul (15 + 774 pp. 2) in 1268. The poetry still awaits a printer. 'Atai's significance as a prose writer is much greater than as a poet.

Bibliography: Cf. F. Babinger, *G.O.W.*, p. 171 sq. and the works there given, especially J. v. Hammer, *G.O.D.*, iii, 475; Gibb, *H.O.P.*, iii, 232 sq.; Brockelmann, *G.A.L.*, ii, 427 (where he is wrongly, according to F. Wattenfeld, *G.A.W.*, called Muhammad); Haddad Khalfā, *Firdhā*, ii, 168; Rida, *Tadhkirah*, p. 70 sq.; Mahbūb, *Khulāṣa*, Cairo 1284, iv, 263.

(FRANZ BABINGER)

NEWRES, the name of two Ottoman poets.

1. 'ABD AL-RAZZAK, known as Newres, or more accurately Newres-i Kāmil, 'Newres the Elder', to distinguish him from 'Othmān Newres [q. v.], came from Kirkūk (near Baghdad) and was probably of Kurdish origin. He seems however to have come to Stambul at an early age to prosecute his studies. Here he became a *mudarris* but in the year 1159 (1746) entered upon a legal career. According to the *Sigill-i 'Arṣūd*, he held the office of *ḡāʾi* in Sarajevo and Kutahya. His sharp tongue which found particular expression in daring and malicious chronograms (*ḡāʾi*) earned him banishment to Rethymna (Crete) along with the poet Hashmet and then to Brussa; he was later, according to Wajīf (*Ta'rīḡ*, p. 211), sent back to Kutahya. In any case he died in Brussa in Shawwāl 1175 (May 1762) of a broken heart and was buried in the cemetery opposite the entrance to the mosque of Pīr Uftāde Muhammad the founder of the order of the Djalwatiya. 'Abd al-Razzak Newres composed a *Diwān* in Persian and Turkish (pr. Stambul 1290 and we believe 1304), and also a history of the war with Nadir Shāh in 1143 (1730) in which he took part on the staff of İbrahim-Oghlu 'Alī Pasha. The little book called *Tibyan-i Ḥabib-Oghlu 'Alī Pasha* is written in ornate language and is of no historical value. The fair copy in the author's hand is preserved in the Berlin Staatsbibliothek (Cod. Or. S° 2186). Newres also enjoyed the reputation of being a distinguished *munshi*. Excerpts from his *Jahid* are given by J. v. Hammer in his *G.O.R.*, ix, 643 sq. His *Diwān* is called *Makhlūḡ*

al-Hikām which gives the year 1172 (1758) for its completion (cf. however a similarly titled work in Vienna: Flügel, *Cat.*, iii, 486, No. 19911).

Bibliography: Cf. F. Babinger, *G.O.W.*, p. 294 sq. with further references. The promised very full bio-bibliography of Newres Efendi by İbn al-Amīn Mahmūd Kemāl Bey has not yet appeared (1933).

2. 'OTHMĀN, called Newres or, to distinguish him from his older namesake, Newres-i Djedid, came from Chioia. He held several military posts in the capital and died there in 1293 (1876) in retirement. He is buried in the Karadja Ahmed cemetery in Skutari. His collected poems have been twice printed: Stambul 1237 and Stambul 1290 (by Yeṣār Kāmil Pasha) (*Diwān-i 'Othmān Newres*). In 1302 there was published at the suggestion of 'Abd al-Kārim Nadir Pasha in Stambul under the title *Elderi Nadir* specimens of his prose and verse. A Turkish translation of the *Gulistan* by him exists in MS. 'Othmān Newres had a very thorough command of the three languages of İslām and wrote poetry in all three. His work however is hardly of permanent value.

Bibliography: Brüssel Muhammed Tahir, *'Othmān-i Miftah*, iii, 465 sq.

(FRANZ BABINGER)

NICEA. [See 1287.]

NIEBLA (Ar. LAMLA), a little town in the S. W. of Spain, 45 miles W. of Seville on the right bank of the Rio Tinto. Now much decayed, it has less than 2,000 inhabitants and is in the judicial district of Moguer, in the province of Huelva. It is the ancient Ilipla. In the Visigothic period it was the see of a bishop. In the Muslim period it enjoyed considerable prosperity. It formed part of the district of al-Sharaf (*al-Sharaf*) and was also called al-Hamra', 'the red', no doubt from the colour of its ramparts and of the water of its river. It was particularly an olive-growing centre. The gentian was also cultivated there and deposits of alum and of sulphate of iron were worked.

Niebla was taken in 94 (713) by 'Abd al-'Aziz, son of Muṣā b. Nuṣair [q. v.]. In 149 (766) it was the starting point of the rising of Sa'īd al-Maṭarī al-Yahsubī who seized Seville but was soon defeated and slain by the troops of 'Abd al-Rahmān I. The town in 230 (844) suffered from a visit of the Normans (*ḡāʾi*, q. v.). In 284 (897) it rebelled against the Umayyads: it was however retaken by force of arms in 304 (917) by order of 'Abd al-Rahmān al-Nāṣir by his general Badr b. Ahmad. At the time of the fall of the Caliphate, it became the capital of a little kingdom formed in 414 (1024) by Abū 'l-'Abbās Ahmad b. Yahyā al-Yahsubī, who took the *ḡāʾi* of Tāj al-Dawla, which also comprised the lands of Huelva and of Djabal al-'Uyūn (Gibraltar). This prince died in 435 (1041) and was succeeded by his brother Muhammad 'Izz al-Dawla. The 'Abdīdīd sovereign of Seville al-Mu'tadīd [q. v.] soon displayed his desire to annex the principality of Niebla and made several raids into it. 'Izz al-Dawla had to abandon his capital and take refuge with the lord of Cordova Abū 'l-Walīd Muhammad b. Djabhar in 443 (1051) leaving the power to his nephew Abū Naṣr Faḥ b. Khalaf b. Yahyā al-Yahsubī. 'Izz al-Dawla, who at first bought peace from al-Mu'tadīd by paying him tribute but was forced two years later in 445 (1053) to abandon his

principality to the ruler of Seville and join his uncle in Cordova. Niebla passed a little later to the Almoravids [q.v.]. When the power of this dynasty was beginning to collapse in Spain, it became the headquarters of another rebel, Yūsuf b. Ahmad al-Bitrawshi (or al-Batrūdi), who in 540 (1146) finally submitted to the Almohad general Barrāz al-Musāfi and went five years later to Salā on the summons of 'Abd al-Mu'min. A few years later Yūsuf al-Bitrawshi, maintained as governor of Niebla by the Almohads, rebelled and the town was retaken in 549 (1154) by the governor of Seville and of Cordova, Yahyā b. Yaghmur, who executed 8,000 of the inhabitants. This massacre was condemned by 'Abd al-Mu'min who had Yahyā brought in chains to Morocco and then exiled to Tlemcen.

Niebla remained under Muslim rule until 1257, when it was taken after six months' siege by Alfonso X and became finally Christian.

(E. LÉVI-PROVENÇAL)

NIFFAR (NUFFAR), a ruined site in southern 'Irāq, in 32° 7' N. lat. and 45° 10' East Long. (Greenw.), now in the kaḍa of 'Aḡel in the liḡā al-Diwāniye. Niffar corresponds, as J. Oppert was the first to point out, to the town of Nippur well known from cuneiform inscriptions, one of the oldest and most important places in Babylonia. Its great importance was not political but religious, as the temple of the chief deity of the town formed a kind of central sanctuary or place of pilgrimage for the whole of Babylonia, to which almost all the important sovereigns of the period before Hammurapi, and Hammurapi himself, as well as the Kassite kings and many later rulers like Assurbanipal, dedicated gifts.

Nippur's period of greatest prosperity lay in the millennia before Hammurapi; but it remained an important city down to the last Babylonian and Achaemenid rulers and an important commercial centre with a very mixed population which gave it a somewhat cosmopolitan character. In the fifth century B.C., under Artaxerxes I and Darius II, we find in it an important business and banking house, the firm of Murashshu & Sons to whose activities many documents still bear eloquent testimony. Nippur still continued to flourish under the Seleucids and Arsacids as buildings of this period show, quite apart from the numismatic evidence. It is not directly mentioned by Greek or Roman writers, but the name of the district of Nippur may be concealed in *nippurys*, the name of a stone which Pliny (*Nat. Hist.*, xxxvii,

10, 175) says is of Persian (i.e. presumably Parthian) origin.

In the Babylonian Talmud Nippur appears as Niphar (נִיפָר) and Nuphar (נִּוּפָר); the latter form corresponds to that which is now most usual: Nuffar. In the passage in question in the Babylonian Talmud (*Sh'mot*, 100) we read: *Kalneh* (קִלְנֶה)

is Naphur (Nuphar) Nimp (נִימְ, נִיפְ); the qualification Nimp (?) is obscure; Daiches' explanation in *O.L.Z.*, xi, 539 as Nimb falls to the ground as the name of this deity is now known to read Ninurta. The basis of the equation *Kalneh* (Gen. x, 10) = Nippur is not yet satisfactory. A Babylonian place-name *Kalneh* has so far not been found in cuneiform inscriptions.

Nippur was also an inhabited place in Muslim times; for example we find it mentioned in 38 (659) on the occasion of a rising against the caliph 'Alī (Tabari, ed. de Goeje, I, 3423, 3424) as well as during the Khāridjī troubles (*op. cit.*, II, 929, 930); cf. also Yāqūt, ed. Wüstenfeld, IV, 275, 798 and Ibn al-Fakih, in *B.G.A.*, v, 210. In the later middle ages we find Niffar mentioned as a Nestorian bishopric in the chronicles of the Patriarchs (*Akhbar Fārūkhī* I and II, ed. Giamondi, Rome 1897 and 1899) of 'Amr b. Mattā (p. 83, v, 95, 1) and of Mārt b. Sulaymān, in the period 900—1058 A.D. (cf. also Sachau, in *Abh. Pre. Ak. W.*, 1909, N° 1, p. 31). When the town was abandoned by its inhabitants and became completely desolate we do not know. It probably was the result of one of the Mongol invasions, that under Hūlagū or that under Tīmūr, which dealt their death-blow to so many flourishing places in Mesopotamia.

The ruins of Niffar are next to those of Babylon and al-Warkā' [q.v.] the most extensive in the whole of the Babylonian plain; they cover an area of almost 180 acres. The first European to visit them was W. K. Loftus who spent some time here in 1850 and came back again in 1854 (see the *Bibl.* for his report). A year later than Loftus, in Jan. 1855, Layard was in Niffar and spent two weeks digging but with little success because Layard, paying too little attention to the difference between Assyrian and Babylonian mounds, did not dig deep enough and only turned over the cemetery of a people who had settled here only in the last centuries of antiquity, under the Arsacids.

The University of Pennsylvania (Philadelphia) was the first to undertake a methodical investigation of the ruins and in four expeditions from 1888 to 1900 (1888—1889, 1889—1890, 1893—1896 and 1898—1900) under the leadership of Peters, Haynes and Hilprecht carried out excavations on a large scale. On the results of this intensive work see Hilprecht's full report in *Explorations etc.* (see *Bibl.*), p. 289 ff.

On the topography of Niffar see, in addition to the descriptions by Loftus and Layard, especially Peters, *op. cit.*, II, 104 ff.; Hilprecht, *op. cit.*, p. 540 ff. and notably Fisher, *op. cit.*; cf. also King, *op. cit.*, p. 85—86. The American expedition also found an ancient Babylonian plan of Nippur which Hilprecht, *op. cit.*, p. 518 (reproduced in Zehnfund, *op. cit.*, p. 66) published, more distinct in Fisher, *op. cit.*, pl. I. This plan has been since 1926 in the possession of the University of Jena with the rest of Hilprecht's private Assyriological collection; see Zimmern, in *Z.A.*, xxxvii, 224.

The sight of the ruins is very impressive; they rise like a range of hills in close formation from 30–60 feet above the plain, culminating in the cone of Bint al-Amr 95 feet high, the *siggarat* of the chief temple.

The most imposing part of the whole eastern quarter is the *siggarat* of Im-Kharasg, still 95 feet high, which the inhabitants for some reason now forgotten call Bint al-Amr, the "prince's daughter". The triangular mound south of the sanctuary proper marks the site of the great temple library, about a twelfth of which, yielding some 23,000 cuneiform tablets and fragments, has been excavated. The western half of the inner city contains the residential quarters with the bazaars, business houses and private dwellings. Its history is still obscure as in the course of centuries it was repeatedly resettled. In the Parthian period a large cemetery extended over a considerable part of the clay buildings which had fallen to pieces there.

On Parthian buildings in Nippur, cf. Hilprecht, *op. cit.*, p. 554 *sq.* and *do.*, *Der Bīt-Tempel in Nippur*, p. 31 *sq.*

In addition to the great Enlil temple Ekur there were a number of other highly venerated temples in Nippur.

According to the cuneiform inscriptions, Nippur must have in ancient times lain on the Euphrates itself or at least in its immediate vicinity (cf. e.g. *O. L. Z.*, XX, 142, note 1); this fact forces us to the assumption that this river in the Babylonian period must have taken a much more easterly course below Babylon than in the middle ages and present day. The inner city is divided into two parts by a canal now dry but once navigable, which the natives call Shatt al-Nil. This was an important watercourse which, according to Hilprecht, was in many places at one time 20–25 feet deep and 150–190 feet broad and which the modern inhabitants rightly describe not as a mere *nahr* (stream, canal) but as *shatt* (river).

According to the mediaeval Arab geographers Nahr al-Nil was the name of one of the canals led off from the Euphrates to the Tigris. It still survives in its entirety; as in the middle ages, it starts from Babylon and flows a little above 32° 30' N. Lat. in an almost straight line eastwards. The geographer Subrāb (who used to be called Im Serapion; cf. *iv.*, p. 1130*) writing in the fourth (tenth) century observes that this canal bears the name Nahr al-Nil only after passing the town of al-Nil (the modern ruins Niliye). At the present day it is called only Shatt al-Nil throughout its course. Somewhat east of Niliye a side-canal, now dry, branches off to the south for which, not only in its lower part where it flows by the ruins of Nifpar but along its whole extent, the name Shatt al-Nil, the same as that of the main canal, was and is usual. Yāqūt however says (*iv.* 77, 798) that Nifpar lay not on the Nahr al-Nil but on the bank of the Nahr al-Nars, a canal dug, it is said, by the Sāsānian king Narsē b. Bahram (293–303 A.D.) which leaves the Euphrates at al-Hilla a little below the Nahr al-Nil and turns southeastward. It was presumably connected by a branch with the southern small canal of the same name which branches off from the Nahr al-Nil, so that the occurrence of the two names Nahr al-Nil and Nahr al-Nars for the river in Nifpar is explained. It

should be noted also that the nomenclature of the Babylonian canals changed several times already in the middle ages. On the Nahr al-Nil or Shatt al-Nil and Nahr al-Nars see Loftus, *op. cit.*, p. 238; G. Le Strange, in *J. R. A. S.*, 1895, S. 259, 260–261 and *do.*, in *The Lands of the East. Caliphate*, Cambridge 1905, p. 72–74; Streck, *Babylonien nach den arab. Geographien*, I. (Layden 1900), p. 30 *sq.*; Herfeld, in *Sarre-Herfeld, Archäolog. Reise im Euphrat- und Tigrisgebiet*, I. (Berlin 1911), p. 234 *sq.*; Hashim al-Sa'di, *Dughrafiyat al-'Irāq al-qadīma*, Baghdad 1927, p. 34, 35.

Below Nifpar the Shatt al-Nil loses itself in the swamps of Hūr al-Afek. The Shatt al-Kār very probably forms its southern continuation.

If the "Euphrates of Nippur", as it is called in the cuneiform inscriptions, really represents the old course of this river, and not simply a branch of it, the modern Shatt al-Nil with its continuation, the Shatt al-Kār, probably corresponds to the bed of the Euphrates of Babylonian times. On the great changes in their courses which the rivers of Mesopotamia have undergone, cf. especially Fisher, *op. cit.*, p. 2 *sq.* Hilprecht, who is followed by others like Zehnspund, Unger etc., thinks that the name of the canal, *Kabaru* (= the large) found in later texts from Nippur, corresponds to the "Euphrates of Nippur" of the older texts. He further compares it with the Kebar (כְּבַר) of Eselziel

(i. 1 etc.); see Hilprecht, *Explorations*, p. 412 and also in *Der Bīt-Tempel in Nippur*, p. 10. The identification of the Kabaru with the old bed of the Euphrates, i.e. the modern Shatt al-Nil, I do not consider proved; the Kabaru may also be a canal in the neighbourhood of Nippur.

West and Southwest of Nifpar lies the very extensive Hūr al-Afek (on the meaning of Hūr see *iii.*, p. 147b).

(M. STRECK)

AL-NIFFARĪ MUHAMMAD IBN 'ABD AL-DJABBAR.

This mystic, whom the principal Sufi biographers fail to mention, flourished in the 10th (11th) century, and, according to Ḥadīdī Khaltā, died in the year 354 (965). His *nishā* refers to the town of Niffar [q. v.] in Mesopotamia, and one MS. of his works asserts that it was during his residence at Niffar and Nīl that he committed his thoughts to writing. Niffar's literary reliquiae consist of two books, the *Mawāḍif* and the *Mukhṭṣarāt*, together with a number of fragments. It is improbable that Niffar himself was responsible for the editing of his writings; according to his principal commentator, 'Aṣī al-Dīn al-Tilimsānī (d. 690 = 1291), either his son or his grandson collected his scattered writings and published them according to his own ordering. The *Mawāḍif* consists of 77 sections of varying length, made up for the most part of brief apothegms touching on the main aspects of Sufi teaching, and purporting to be inspired and dictated by God; the *Mukhṭṣarāt* is similar in content, and is divided into 56 sections. Niffar's most characteristic contribution to mysticism is his doctrine of *waḥḍa*. This term, which would appear to be used by him in a peculiarly technical sense, implies a condition in the mystic which is accompanied by direct divine audition, and perhaps even automatic script. *Mawāḍif* is the name given to the state of the mystic in which *waḥḍa* is classed higher than *ma'rifa*, and *ma'rifa* is above *'ilm*. The *waḥḍa* is nearer to God than any other thing, and almost transcends the condition of *ṣaḥābiyya*, being alone separated from all limitation. Niffar definitely maintains the possibility of seeing God in this world; for he says that vision (*ru'yā*) in this world is a preparation for vision in the world to come. In several places Niffar distinctly touches on the theory of the Mahdī, and indeed appears to identify himself with the Mahdī, if these passages are genuine; and this claim is seemingly in the mind of Ṭabībī, when he describes Niffar as *ṣāḥib al-dāwā wa 'l-jalāl*. Tilimsānī however interprets these passages in an esoteric and highly mystical sense; and it does not accord with the general character of the author, that he should make for himself such extravagant claims. Niffar shows himself in his writings to be a fearless and original thinker. While undoubtedly influenced by his great predecessor al-Hallāj, he acknowledges no obligations, and has a thorough conviction of the reality of his own mission.

NIGDE, a town in the Turkish sandjak (now wilāyet) of the same name in a fertile trough on the east edge of the Central Anatolian steppe. The town is first mentioned in the Turkish period; previously the chief town of the district was Tyana (Arab. *Tawāna*) but it is probable that the striking hill which commands the important road from Cilicia across the Taurus to Kalaṣiye

as its entrance to a pass over the mountains had a fortified settlement upon it in the pre-Turkish period. The old place-name may be the origin of the modern one, an older form of which was *Nekide* (Yāqūt, ed. Wüstenfeld, iv. 821; Nakida; Ibn Bihār and others, also in inscriptions down to the xvth century; Nakida; the modern form

نیکه [in the new Turkish script: Nigde] is already found in Ḥamd Allāh Muṣṭawfī, *Nushat*, in G.M. S. xxiii/1, 99). In this particular district some villages have retained their ancient names (Andaval-Andahalia, Melegop-Malakopais) and considerable numbers of descendants of the original Christian inhabitants survived until quite recently (R. M. Dawkins, *Modern Greek in Asia Minor*, Cambridge 1916, p. 16 197).

Nigde is first mentioned in connection with the partition of Saljuḳ territory among the sons of Kılıdī Arslān II (685 = 1180) when it was allotted as an independent lordship to Arslān Shāh (Ibn Bihār, ed. Houtsma, *Rec.* iv. 11). Nigde had perhaps previously belonged to the Daughmandids but Ewliyā, iii. 189, cannot be taken as evidence of this. Kaiḳ'as I granted Nigde to the Emir Aḥḥār Zaim al-Dīn Ḥaḥḥār (Ibn Bihār, p. 44) who shortly before his death built the important mosque of 'Alī' al-Dīn here (620 = 1223). In the xliith century Nigde was the headquarters (*ṣayd ḥāḥḥ*) of one of the great military districts of the Saljuḳs. Under Kılıdī Arslān IV, Ibn al-Khaṭir Ma'nūd held this office. At first an ally of the all powerful Ma'n al-Dīn Perwān, with whom he killed the sultan in 1264, he endeavoured to remove the young Kaiḥūmraw III out of Perwān's influence and brought him to Nigde (1276). But the help for which he had appealed to Egypt came too late and he succumbed to Perwān who was supported by the Mongols (Ibn Bihār; Weil, *Geogr. d. Chuliften*, iv. 80 19.). He built a well in Nigde opposite the 'Alī' al-Dīn mosque (666 = 1268). Under the Ilkhāns there ruled in their name, or in the name of their Anatolian governor Eretna, Sunḡur Agha who is known only from inscriptions and is, it is remarkable to note, not mentioned by Ibn Baṭṭiṭa who visited Nigde about 1333 (ed. Desfrères-Sanguinetti, ii. 186); he made himself independent after the death of Abū Sa'īd. He gave the town a large mosque on the wall of which facing the Beṣṭān is a Persian inscription, in which he grants Christian foreigners exemption from *ḡriya* and *ḡharāḡ* (736 = 1335). The Saljuḳ princess Khudāwād Khātūn buried in 732 (1332) in her splendid türbe built in 712 (1312) on the other hand probably did not rule in Nigde although she resided there. She was, if the lady buried beside her in 1344 was her daughter, the wife of the Emir Shudjā' al-Dīn who is mentioned as the father of the lady on her sarcophagus; he ruled according to al-'Umari (ed. Tieschner, p. 31) in the Bulghatlagh, where a Wilāyet Shudjā' al-Dīn is still mentioned in Sa'īd al-Dīn (i. 517 following Idriṣi) and where lies Ulukshāh, which, according to Ḥadīdī Khaltā (*Ḍihānnūn*, p. 617), was also called Shudjā' al-Dīn. After the period of Sunḡur's rule, Nigde probably passed directly to the Karamanoghlū, who held it against the attacks of the Eretnid 'Alī' al-Dīn 'Alī (c. 1379) ('Aṣī b. Ardashīr, *Diwan u-Riṣā*, p. 141 197). In 1390 Nigde surrendered with other Karamanian towns to the Ottomans but was restored to the Kara-

manids who defended it successfully against Kāji Burhān al-Dīn, lord of Kāsarīye and Siwās (*Seem u-Room*, p. 424, 523). After Timur's invasion the power of the Karamanids extended northwards as far as Dewell Karahisār which previously belonged to Kāsarīye and for a time even to Kāsarīye itself. Nigde then ceased to be a frontier town. Apart from a temporary occupation by Egyptian troops in 1419 (Weil, v. 146 sqq.) it enjoyed peace and prosperity and the special care of the Karamanids who had one of the bulwarks of their power here till the end of the dynasty. A series of buildings, the first of which not only in time but also in size and quality is the Ak-Medrese of the year 1409, is evidence of their interest in the town. Nigde surrendered in 875 (1470) to the Ottoman general Ishāk Paşa who had the defences of the town restored. In 878 (1473) the Ottoman Sandjak-bey of Nigde, Koçi Bey, forced Dewell Karahisār which still belonged to the Karamanoghlis to surrender to prince Müşafâ. The latter died on the way back at Nigde (Sa'd al-Din, i. 517, 550).

The sandjak of Nigde belonging to the beylerbeylik of Karaman, contained the kazas of Ürgüç, Bor, Deweli, Dewell Karahisār and Ulukışla. When about 1720 the grand vizier İbrahim Paşa transformed his birthplace of Muşkara in the kaza of Ürgüç into the imposing town of Newşehir, the fiefs for the garrisons of the decayed fortresses of Nigde and Dewell Karahisār were transferred to the new foundation (v. Hammer, *G.O.A.* 3, iv. 250 sq.). At the end of the Ottoman period the sandjak of Nigde, to which the kaza of Ak-serai also belonged, contained 148,700 Muslims and 49,551 Christians the latter mainly natives and mostly speaking Turkish. Nigde was the residence of the metropolitan of Konia. The town numbered at this time 11,526 inhabitants, in 1927 (after the exchange with Greece) only 9,465.

Nigde (now on the Kayseri-Ulukışla railway) consists of an upper town running north and south, now largely uninhabited (Tepe Wihiue) at the highest point of which in the north stands the imposing citadel, and the lower town (Shehr altı) which was also once surrounded by a wall. In the upper town is the "All" al-Din mosque, one of the oldest mosques in Anatolia, with an architect's inscription in Persian. Before the gate of the upper town at its south end is the Gothic mosque of Sunkur (c. 1330) showing influences from Little Armenia and Cyprus, and the bazar. West of and below it is the Karamanid Ak-Medrese of 1409. A little apart to the west of the town, separated by a broad road, running north and south is the modern quarter Kayalısık with a few remains of the old cemetery and a group of türbes among which that of Khudāwand Khātūn of the year 1312 is prominent.

(PAUL WITTEK)

NĪHĀL CĀND LĀHAWRĪ, Indian man of letters, Hindu by religion, was born in Diliit, but left it in early life and went to Lahore where he lived for a considerable time. Owing to this circumstance he called himself Lāhawri. Search for a livelihood led him to Calcutta. Here he was introduced to Dr. J. B. Gilchrist who asked him to translate into "Hindī rekhta" the story of Tāqī al-Mulūk and Bakawāl. He consented and thus became one of the famous band of Fort William translators. He made the translation from *Gul-i Bakāwāl*, a Persian rendering by Shaiḥ 'Izzat Ullāh, 1772, of an old Hindī story, which has been reproduced in Urdu verse by Dayā Shankar Kawnām (q.v.), in his wellknown mathnawī *Gulāz-i Nāstūn*.

Nihāl Cand called his work *Madhhab-i 'Izzat*. It is in very good prose mixed with verse. The name gives the date 1217 (1802). Apart from the above mentioned facts nothing is known about the writer.

Bibliography: M. Vahyā Tanhā, *Siyar al-Mujammi'a*, I. 117—119; Garcia de Tassay, *Les Hindous et l'Hindouisme*, ii. 468—470; T. Graham Bailey, *Hist. of Urdu Lit.*, p. 82; R. B. Sakseena, *Hist. of Urdu Lit.*, p. 249.

(T. GRAHAM BAILEY)

NĪHĀWAND, a town in the old province of Hamadān, with, at the present day, 5,000—6,000 inhabitants (de Morgan), at a height of 5,860 feet on the branch of the Gūmāsh which comes from the S. E. from the vicinity of Barūdīrd; the Gūmāsh then runs W. to Bistūn. Nihāwand lies on the southern road which, coming from Kirmānshāh (the Khurādābād, p. 198), leads into Central Persia (Isfahān) avoiding the massif of Alwand (Opeves) which rises W. of Hamadān. Hence the importance of the town in the wars of Persia with her western neighbours.

The French excavations of 1931 (Dr. Contenau) have shown that the site of Nihāwand was inhabited from pre-historic times. The ceramics ("I-his style") which have been found there, seem to be older than those of style I and II of Susa. Ptolemy VI, 2 knows of Nihāwand and according to Ibn Faḳīh, p. 258 the town already existed before the Deluge. In the Sāsānid period the district of Nihāwand seems to have formed the fief of the Kārin family (Dināwārī, p. 99). There was a fire-temple there. According to Ibn Faḳīh, p. 259 there could be seen on the mountains near Nihāwand two figures of men in the form of a bull and a fish (similar tallmans are said to have existed at Riths also cf. also the stems of *wisḥap* ["dragons"], protectors of waters) in Armenia west of Lake Sewan which combine these symbols, *Zap.*, xxiii./3, 1916, p. 409). The same legend is reflected in the name of the river Gūmāsh (*Gūmwāsh* = "water of the bull and fish"; *māsh* is the Kurdish form of the Persian *māsh*).

Among the products of Nihāwand the Arab authors mention willow-wood which was used for polo-sticks (*panālīfā*), aromatic reeds (*ḥashāt al-ḥarīra* or *al-ḥamḥat al-irūḡiyya*) which were used like *ḥandī* (a perfume put in coffins) and black clay used as wax for sealing letters. The district of Rūdīwār was under Nihāwand (cf. de Morgan, *Mission*, ii. 136: *Rūdīwār*) and was famous for its abundance of saffron (istakhlī, p. 199). For a list of the places more or less dependent on Nihāwand, cf. Schwarz, *Iran* etc., p. 505—509.

In the Mongol period, the *Nuṣṭat al-Aḥdāṣ* mentions three districts of Nihāwand: Māfīyir (now Dawianabad), Ishdihān (= Ishdihān, see below) and Djahūk. (Nihāwand no longer forms part of the province of Hamadān; cf. Rabino, *Hamadān*, in *R.M.M.*, xliii, 1921, p. 221-227).

Near Nihāwand was fought the famous battle which decided the fate of the Iranian plateau and in which the Kūfī Nu'mān b. Muḥarrir defeated the Sāsānian generals. The commander-in-chief is given different names: Dhū 'l-Hādībain Mardīnshāh (cf. Balādhūri, p. 303^c; Marquart, *op. cit.*, p. 113 identifies him with the *darīghar* Khurnand) or Fartūn (cf. Tabari, I. 2608; the latter also gives the names of his generals: Zariūk, Bahman [Hādīya and the commander of the cavalry Anshāk]). The Arab camp was at Ishdihān and that of the Persians at Wāykhud (?). The sources do not agree about the date: Saif b. 'Umar (Tabari, I. 2615-2619) gives the end at the year 18 (639) or the beginning of 19 (640); cf. Wellhausen, *Seiden und Vorarbeiten*, vi, 1899, p. 97, while Ibn Ishāk, Abū Ma'shar and Wāḥidī, followed by Caetani, *Annali dell' Islam*, iv, 1911, p. 474-504 put the battle in 21.

The district of Nihāwand (formerly called Māh-Bahrīdihān or Māh-Dīnār) was finally incorporated in the possessions of the Bāsrīans and called Māh-Bāsrā ("the Media of Basra": Balādhūri, p. 306).

Nihāwand is often mentioned in the period of the wars between the Sāfawids and the Ottomans. In 998 (1589) at the beginning of the reign of 'Abbās I, Cigāla-Zāde built a fortress at Nihāwand (*Sāḥib-nāma*, p. 273). After the death of Murād IV a rebellion took place among the garrison of Nihāwand; the Ottomans were driven out by the Shī'ī inhabitants. As a result in 1012 (1603) war again broke out with Turkey (*ibid.*, p. 440). In the spring of 1142 (1730) Nādir [q. v.] took Nihāwand again from the Turks.

(V. MINORSKY)

NIKĀH (أ.), marriage (properly: sexual intercourse, but already in the *Qur'ān* used exclusively of the contract). Here we deal with marriage as a legal institution; for marriage customs see *URĀ*.

1. The essential features of the Muslim law of marriage go back to the customary law of the Arabs which previously existed. In this, although there were differences according to districts and the conditions of the individual cases, the regulations governing marriage were based upon the patriarchal system, which permitted the man very great freedom and still bore traces of an old matriarchal system. It is true that before the coming of Islam a higher conception of the marriage state had already begun to exist but the position of the women was still a very unfavourable one. The marriage contract was made between the suitor and the "guardian" i.e. the father or the nearest male relative of the bride, the latter's consent

not being regarded as necessary. But even before Islam it had already become generally usual for the dowry to be given to the woman herself and not to the guardian. In marriage the woman was under the unrestricted authority of her husband, the only bounds to which were consideration for her family. Dissolution of the marriage rested entirely on the man's opinion; and even after his death his relatives could enforce claims upon his widow.

2. Islam reformed these old marriage laws in far-reaching fashion, while retaining their essential features; here as in other fields of social legislation Muhammad's chief aim was the improvement of the woman's position. The regulations regarding marriage which are the most important in principle are laid down in the *Qur'ān* in Sūra iv. (of the period shortly after the battle of Uhud): "3. If ye fear that ye cannot act justly to the orphans marry the women whom ye think good (to marry), by two, three or four; but if ye fear (even then) not to be just then marry one only or (the slaves) whom you possess; this will be easier that ye be not unjust. Give the women their dowry freely; but if they voluntarily remit you a part of it, enjoy it and may it prosper you. — 26. Marry not the woman whom your fathers have married (except what is already past); for this is shameful and abominable and an evil way. 27. Forbidden to you are your mothers, your daughters, your sisters, your aunts paternal and maternal, the daughters of your brother and sister, your foster-mothers and foster-sisters, the mothers of your wives and the step-daughters who are in your care, born of your wives, with whom ye have had intercourse — but if ye have not had intercourse with them, it is not a sin for you — and the wives of the sons, who are your offspring, also that ye marry two sisters at the same time except what is already past; Allāh is gracious and merciful. 28. Further married women except (slaves) that you possess. This is ordained by Allāh for you. But he has permitted you to procure (wives) outside of these cases with your money in decency and not in fornication. To those of them that ye have enjoyed give their reward as their due, but it is no sin to make an agreement between you beyond the legal due. Allāh is allknowing and wise. 29. If however any one of you has not means sufficient to marry free believing women (let him marry) among your believing slaves, whom you possess; Allāh best knows (to distinguish) your faith. Marry them with the permission of their masters, and give them their dowry in kindness; they should be modest and not unchaste and take no lovers". Also Sūra ii. 220 (uncertain date), the prohibition of marriage with infidels, male or female (cf. Sūra ix. 10, Sūra xxxiii. 49 (probably of the year 5), an exception in favour of the Prophet, and Sūra v. 7 (of the farewell pilgrimage in the year 10), permission of marriage with the women of the possessors of a scripture. Other passages of the *Qur'ān* which emphasise the moral side of marriage are Sūra xliiv. 3, 26, 32 and Sūra xxx. 20. In tradition various attitudes to marriage find expression; at the same time the positive enactments regulating it are supplemented in essential points. The most important is the limitation of the number of wives permitted at one time to four; although Sūra iv. 3 contains no such precise regulation, this interpretation of it must have predominated

very early, as in the traditions it is assumed rather than expressly demanded. The co-operation of the "guardian", the dowry and the consent of the woman is regarded as essential and competition with a rival the result of whose suit is still in doubt is forbidden.

3. The most important provisions of Muslim law (according to the Shāfi'ī school) are the following. The marriage contract is concluded between the bridegroom and the bride's *wali* (guardian), who must be a free Muslim of age and of good character. The *wali* is in his turn bound to assist in carrying out the contract of marriage demanded by the woman; if the bridegroom fulfils certain legal conditions. The *wali* should be one of the following in this order: 1. the nearest male ascendant in the male line; 2. the nearest male relative in the male line among the descendants of the father; 3. do. among the descendants of the grandfather etc.; 4. in the case of a freed woman the *manūfā* (manumitter) and if the case arises his male relatives in the order of heirs in intestacy (cf. *MIRKAT*, 6, 8); 5. the representative of the public authority (*ḥākim*) appointed for the purpose; in many countries it is the *qāḍī* or his deputy. In place of the *ḥākim* the future husband and wife may agree to choose a *wali* and must do so if there is no authorised *ḥākim* in the place. The *wali* can only give the bride in marriage with her consent but in the case of a virgin silent consent is sufficient. The father or grandfather, however, has the right to marry his daughter or grand-daughter against her will, so long as she is a virgin (he is therefore called *wali muḥṣir*, *wali* with power of coercion); the exercise of this power is however very strictly regulated in the interest of the bride. As minors are not in a position to make a declaration of their wishes which is valid in law, they can only be married at all by a *wali muḥṣir*. According to the Hanafis on the other hand, every blood relative acting as *wali* is entitled to give a virgin under age in marriage without her consent; but a woman married in this way by another than her ascendant is entitled on coming of age to demand that her marriage be declared void (*fāḥṣh*) by the *qāḍī*. A bridegroom who is a minor may also be married by his *wali muḥṣir*. As a kind of equivalent for the rights which the husband acquires over the wife, he is bound to give her a bridal gift (*maḥr*, *ḥadāḥ*) which is regarded as an essential part of the contract. The contracting parties are free to fix the *maḥr*; it may consist of anything that has value in the eyes of the law; if it is not fixed at the conclusion of the contract and if the parties cannot agree upon it, we have a case for the *maḥr al-mithl*, a bridal gift fixed by the *qāḍī* according to the circumstances of the bridegroom. It is not necessary to pay the *maḥr* at once; frequently a portion is paid before the consummation of the marriage and the remainder only at the dissolution of the marriage by divorce or death. The wife's claim to the full *maḥr* or the full *maḥr al-mithl* arises only when the marriage has been consummated; if the marriage is previously dissolved by the man the wife can only claim half the *maḥr* or a present (*ḥawṣa*) fixed arbitrarily by the man; these regulations go back to *Sūra* ii. 237-19. (cf. *xxiii*. 48). In form the marriage contract, which is usually prefaced by a solicitation (*ḥabṣa*), follows the usual scheme in Muslim contracts

with offer and acceptance; the *wali* of the bride is further recommended to deliver a pious address (*khutba*) on the occasion. The marriage must be concluded in the presence of at least two witnesses (*shāhid*), who possess the legal qualifications for a witness; their presence is here not simply, as in other contracts, evidence of the marriage but an essential element in its validity. On the other hand, no collaboration by the authorities is prescribed. But since great importance is usually attached to fulfilling the formalities of the marriage contract, upon which the validity of the marriage depends, it is usual not to carry through this important legal matter without the assistance of an experienced lawyer. We therefore everywhere find men whose profession this is and who usually act under the supervision of the *qāḍī*. The part they take is to pronounce the necessary formulae to the parties or even to act as authorised agents of one of them, usually the *wali* of the bride. The most important impediments to marriage are the following: 1. blood relationship, namely between the man and his female ascendants and descendants, his sisters, the female descendants of his brothers and sisters as well as his aunts and great-aunts; 2. foster-relationship which by extension of the Koranic law by tradition is regarded as an impediment to marriage in the same degree as blood relationship; 3. relationship by marriage, namely between a man and his mother-in-law, daughter-in-law, step-daughter etc. in the direct line; marriage with two sisters or with an aunt and niece at the same time is also forbidden; 4. the existence of a previous marriage, in the case of a woman without limitation (inclusive of the period of waiting after the dissolution of the marriage, *ʿidda*, q. v.) and in the case of a free man with the provision that he cannot be married to more than four women at once; 5. the existence of a threefold *ḥalāl* [q. v.] or of a *ḥaw* [q. v.]; 6. social inequality: the man must not be by birth, profession etc. below the woman (unless both the woman and *wali* agree); a free Muslim can only marry another's slave girl if he cannot provide the bridal gift for a free woman; and the marriage between a master (or mistress) and his slave (or her slave) is quite impossible (a master is however permitted concubinage with his slave); 7. difference of religion; there is no exception to the prohibition of marriage between a Muslim woman and an infidel while the permission given in theory for marriage between Muslim men and the women of the possessors of a scripture is at least by the Shāfi'is so restricted by conditions as to be prohibited in practice; 8. temporary obstacles such as the state of *ḥarām* [q. v.]. On the other hand, the law knows no minimum age for a legal marriage. If a marriage contract does not fulfil the legal requirements, it is invalid; the Hanafis and especially the Mālikis but not the Shāfi'is distinguish in this case between invalid (*ḥalāl*) and incorrect (*fāḥṣh*) according as the error affects an essential or unessential element in the contract; in the former case there is no marriage at all, in the second its validity may be attacked but (according to the Mālikis) consummation removes any defect. Marriage does not produce any community of property between husband and wife and the woman retains her complete freedom of dealing; but certain laws regarding inheritance come into operation (cf. *MIRKAT*, 6, c). The man alone has to bear the

expense of maintaining the household and is obliged to support his wife in a style befitting her station (*nafāḥa*); if he should not be in a position to do so his wife may demand the dissolution of the marriage by *fāḥḥ* [q. v.]. The man can demand from his wife readiness for marital intercourse and obedience generally; if she is regularly disobedient, she loses her claim to support and may be chastised by the man. The latter however is expressly forbidden to take upon himself vows of continence (*ḥāḥ* and *ḥāḥ*). Children are only regarded as legitimate if they are born at least six months after consummation of the marriage and not more than 4 years (the predominant *Shāfi* view) after its dissolution; it is presumed that such children are begotten by the husband himself; the latter has the right to dispute his paternity by *ḥāḥ* [q. v.]. Parentage can also be established by the husband's *ḥāḥ* [q. v.], while both recognition and adoption of illegitimate children are impossible.

4. The laws regarding the rights and duties of husband and wife cannot be modified by the parties at the drawing-up of the contract. This can however be effected by the man pronouncing a conditional *ḥāḥ* [cf. *ḥāḥ*, vii.] immediately after the conclusion of the marriage contract; this shift to secure the position of the woman is particularly common among Indian Muslims. For the rest the couple are left to private agreements which need not be mentioned in the marriage contract. The actual position of the married woman is in all Muslim countries entirely dependent on local conditions and on many special circumstances. It is not a contradiction of this to say that the legal prescriptions regarding marriage are most carefully observed as a rule. In spite of certain ascetic tendencies Islam as a whole has been decidedly in favour of marriage. — In modern Islam the problem of the woman's position in marriage and polygamy is especially discussed between conservatives and adherents of modern social ideas. For the different views resulting from these conditions see the *Bibliography* cited below.

5. Alongside of the usual form of the old Arabian marriage which in spite of its laxity aimed at the foundation of a household and the procreation of children, there existed the temporary marriage in which the pair lived together temporarily for a period previously fixed. Such temporary marriages were entered upon mainly by men who found themselves staying for a time abroad. It is by no means certain that these are referred to in *Sūra* iv. 28, although the Muslim name of this arrangement (*maḥ* [q. v.], "marriage of pleasure") is based on the literal meaning of the verse; it is however certain from Tradition that Muhammad really permitted *maḥ* to his followers especially on the longer campaigns. But the caliph 'Omar strictly prohibited *maḥ* and regarded it as fornication (*zinā*) (a group of traditions already ascribes this prohibition to the Prophet). As a result, *maḥ* is permitted only among the Shi'ites but prohibited by the Sunnis. The latter have however practically the same arrangement; those who wish to live contrary to the law as husband and wife for a certain period simply agree to do so without stipulating it in the marriage contract.

NIKOPOLIS, in Turkish spelling Nīkbūllī or

Nīkbūllī (in Ewilyā Çelebi, vii. 463: نیکه بولی),

town on the southern bank of the Danube, at 43° 43' N., 24° 54' E. This Nikopolis, founded by Heraclius (c. 575–642), has often been confused, especially in medieval literature, with Nikopolis *ad Istrum* or *ad Haemum*, founded by Trajan in 101 in commemoration of his victory over the Dacians (minus recently excavated near modern Nīkūp in the upper valley of the Djantra by Mt. Haemus). The Byzantine Nikopolis is sometimes called Nikopolis Major to distinguish it from Trajan's Nikopolis and Nikopolis Minor on the opposite bank of the Danube near the Roumanian town of Torna Magurele.

The importance of Nikopolis as a trade centre and military post is due chiefly to the command which it holds over the Odra and the Aluta, the two Danubian arteries reaching into the heart of Bulgaria and Roumania respectively. Situated on a naturally fortified plateau, it dominates the plains to the south, the Danube to the north, and the eastern gorge connecting the interior of Bulgaria with the river. The medieval double walls and strong towers surrounding Nikopolis were destroyed by the Russians during their occupation of the city in 1810 and 1877.

Nikopolis was first captured from the Bulgarians in 791 (1389) by 'Alī Pāshā Çandereli [see 'Alī Fāḥḥ], Seven years later, it was the scene of the famous battle in the Crusade which is called by its name. The acquisition of Bulgaria by the Turks and their continual irruptions north of the Danube into territories claimed by Hungary, together with a state of comparative peace in western Europe in the last decade of the 15th century, made it both necessary and possible for most Catholic countries to participate in the expedition. An army of about 100,000 crusaders (according to the most reliable estimates) from France, Burgundy, England, Germany, Italy, Spain, Hungary, Poland, Wallachia and Transylvania marched along the Danube, seized Widdin and Rahova, and finally set siege to Nikopolis while an allied Venetian

Genoese fleet blockaded the city from the river. The siege lasted about fifteen days, during which Bayazid [q.v.] abandoned the siege of Constantinople, burnt the siege machinery, and summoned his Asiatic and European contingents to arms. A Turkish army of perhaps 110,000 men met at Adrianople and, marching through the Shipka Pass, descended into the valley of the Osma and pitched their camp on the southern hill commanding the Nikopolis plain.

The battle took place on Monday, September 25, 1396, and the crusaders were completely routed owing to the superiority of Ottoman tactics and the dissensions amongst the leaders of the Christian host. Bayazid divided his army into two large sections. The first, consisting of two large bodies of irregular cavalry and of irregular infantry, occupied the slope of the hill. Between the cavalry vanguard and the foot rearguard of this section, the Turks planted a field of pointed stakes. Beyond the skyline on the other slope of the hill, hidden from their unsuspecting enemy, the second and more important section, consisting of Bayazid with his Sipahis and Stephen Lazarević with his Serbs, watched for the right moment to advance against the exhausted Christians. These tactics proved to be effective when the Crusaders' vanguard of French and foreign auxiliaries defeated the Turkish irregular cavalry and, after forced dismounting to uproot the stakes, routed the irregular infantry and pursued them uphill to face the new and unseen forces. Meanwhile, a stampede of riderless horses produced confusion in the Crusaders' rear which comprised the Eastern European armies. Mircea and Lascarić, who had no sympathy for Sigismund of Hungary, retired with their Wallachian and Transylvanian auxiliaries who constituted the left and right wings of the rearguard. After desperate fighting for the relief of the French and foreign contingents, the Hungarian nobles persuaded their king to board a Venetian galley and escape by way of Byzantium and the Morea to Dalmatia. The rest were either killed or captured, only to be massacred on the following day by Bayazid in order to avenge in this way the severe losses which he had sustained. A small number of nobles were, however, saved from the massacre for a ransom of 200,000 gold florins.

The immediate result of the Ottoman victory was the extension of the conquests into Greece and the submission of Wallachia to Ottoman suzerainty. More important, however, was the breathing-space it gave for the consolidation of the Turkish territories in Europe, which enabled the Ottoman empire to survive the critical struggles of the next decades.

In later history Nikopolis plays only a minor part. During the wars of the sixteenth century it was thrice captured by Russian armies (Sept. 1810; July 1829; July 1877), and by the Treaty of Berlin (July 13, 1878) was included in the tributary principality of Bulgaria.

For the "Crusade of Nikopolis" a full and classified bibliography of the extensive MS. and printed sources, both Eastern and Western, is contained in A. S. Atiya, *The Crusade of Nicopolis* (London 1934); see also the following older monographs: A. Brauner, *Die Schlacht bei Nikopolis, 1396*, Breslau 1876; J. Delaville Le Roulx, *La France en Orient au*

XIV^e siècle, Paris 1886; H. Kiaz, *Nicopolis ulkott*, Magyar Akademiai kiadása, 1896; I. Köhler, *Die Schlachten bei Nikopolis und Warna*, Breslau 1882; F. Šišić, *Die Schlacht bei Nikopolis*, Vienna 1893.

(A. S. ATIYA)

NIKSAR, Neo-Caesarea, first mentioned by Pliny (vi. 3) so that it presumably arose under Tiberius, lies in the Anatolian wilayat of Siwas [q.v.] 1,150 feet above sea-level. The town is picturesquely situated at the foot of a hill, crowned by the ruins of a mediæval castle which was erected from the material provided by the numerous buildings of antiquity there. Here in remote antiquity was Cabira and after its decline Diospolis founded by Pompey, later called Sebaste. In Church history Niksar is famous as the scene of a Council (314 A.D.) and as the birthplace of Gregory the miracle-worker. In the Muslim period it became important under the Seljuks of whom numerous and important buildings have survived to the present day. It became more important under the Dönishmandiys [q.v.] whose founder Malik Dönishmand Ahmad Ghāsi took Niksar among other places. His grandson Muhammad successfully resisted a siege by the emperor Manuel in Niksar. His son Vaghilassan (537—562 = 1142—1166) of whom there survives an inscription of the year 552 (1157) died in 562 (1166) whereupon Niksar was taken by the Byzantine emperor Manuel (Kommenos, p. 296 ff., 300) although only for a short time. In 1397 Niksar passed to the Ottomans and gradually lost its former importance. It remained noted for its very prolific orchards, celebrated already in Kazwini's time (*Aghār*, ed. Wüstenfeld, Göttingen 1848) the special produce of which, very large and sweet cherries, pears, figs etc., were famous at all times. Ewliyā Çelebi (cf. *Siyāhat-nāma*, ii. 389; v. 14; *Travels*, ii. 102 fpp.) who visited Niksar in 1083 (1672) describes the town in his usual extravagant fashion, mentioning 70 schools, 7 monasteries, many mills and water-wheels and 500 shops with a large number of shoe-makers. The pomegranates there, he says, are the size of a man's head and weighed 1 okka. The remains of the Muslim period so far as they bear inscriptions, have been published by İsmail Hakkı, *Kitâbeler* (Stambul 1345 = 1927), p. 58—73. The türbes (sepulchral cupolas) of Malik Ghāsi and of Hacı İsmail Çelebi are worth mentioning; among old dervish monasteries there are the İshak-tekke and the Kulaş-tekke. Niksar has often been visited and described by modern travellers. The population (c. 4,000) was before the war one quarter Christian; they were mainly engaged in the silk and rice trades.

(FRANZ BARTHOLOMÆ)

AL-NIL, the river Nile. The Nile is one of the large rivers which from the beginning have belonged to the territory of Islām, and the valleys and deltas of which have favoured the development of an autonomous cultural centre in Islamic civilisation. In the case of the Nile this centre has influenced at different times the cultural and political events in the Muhammadan world. Thus the Nile has, during the Islamic period, continued to play the same part as it did during the centuries that preceded the coming of Islām.

The name al-Nil or, very often, Nil Mīṣr, goes back to the Greek name Νῆλος and is found already in early Arabic literary sources, though it does not occur in the Qur'ān. (In Sūra xx. 39 the Nile may be meant by *al-yamūn*.) The Christian habit of calling the river Gēhōn, after one of the rivers of Paradise, as found in the works of Ephraim Syrus and Jacob of Edessa and in the Arabic-Christian author Agapins (*Patrologia Orientalis*, v. 590), is not followed by the Muhammadans, who know only the Oxus under this name. Al-Zamakhsharī (*Kitāb al-Ashbāh*, ed. Salverda de Grave, p. 127) mentions as another name al-Faīḍ, no doubt a poetical allusion to the yearly flood. Already in the Middle Ages, the word *baḥr* having come to acquire in Egyptian Arabic the meaning of "river", the Nile is also called al-Baḥr or Baḥr Mīṣr (cf. al-Maḥrizī, ed. Wirt, i. 218), which is also the case with several separate parts of its river system, such as Baḥr Yūsuf or Baḥr al-Qḥarāl. In the Delta the different ramifications of the river are occasionally also called Nile, but where necessary the main stream (*amūd*) is distinguished from the minor branches (*dhīr* or *dhīlīḥī*) and the canals (*tur'a*).

The geography of the Nile is treated here only from a historico-geographical point of view so far as the knowledge of Islamic science is concerned. The geographical knowledge of the Nile among the Muhammadans, as far as we can learn from their literary sources, is based partly on direct observation, but for the most part on legendary or pseudo-scientific traditions which go back to local beliefs or to classical science. For a long time during the Middle Ages the limit of Islamic territory on the Nile was well fixed; it ended at the first cataract near the island of Bilāḥ (Philae) to the south of Uṣwān (Assuan); here began, since the treaty (*ḥuḍ*) concluded by 'Abd Allāh b. Abī Sarīḥ with the Nubians, the Nubian territory, where for long centuries Christianity prevailed (al-Balādhurī, p. 236; Ibn 'Abd al-Hakam, *Futūḥ Mīṣr*, ed. Torrey, p. 188). The first locality on Nubian territory, where tribute was paid, was called al-Kaṣr (al-Mas'ūdī, *Murūj*, iii. 40, 41).

Historical tradition has preserved parts of the alleged correspondence between 'Amr b. al-'Āṣ and the caliph 'Umar on the subject of Egypt, then newly conquered; here the Nile is described as a river "whose course is blessed", while the flood and the inundations are praised in poetical terms ('Umar b. Muḥammad al-Kindī, *Faḡḥ al-Mīṣr*, ed. Zābir, p. 204; al-Dimashqī, ed. Mehren, p. 209). The same correspondence reveals the perhaps historical fact that 'Umar did not wish to see the Arab army established in Alexandria, because

there would be then a great river between the army and the caliph (Ibn 'Abd al-Hakam, p. 91; cf. also what is said on p. 128 about those who went to live in al-Ḥijāz).

The principal towns by which the Nile passed in medieval Egypt in Upper Egypt, between Uṣwān and al-Fuṣṭāṭ, were Atfū (Edfu, on the left), Iṣnā (Esne, l.), Armanī (I.), Kāṣ (r.), al-Ḥakam (Luxor, r.), Kūr (r.), Iḥmīm (Akhmīm, r.), Uṣyūṭ (Asyūṭ, r.), al-Uḥmīmīn (I.), Anṣina (r. opposite al-Uḥmīmīn), Tahā (l.), al-Kais (l.), Dalāṣ (l.), Ahnās (l.) and Iṣṭī (Atfīh, r.). This succession of towns is given for the first time by al-Ya'qūbī (*B. G. A.*, vii. 331–334), while Ibn Hawqāl (*B. G. A.*, ii. 95) is the first to give a table of the distance between these towns, expressed in *harūḍ*, the entire distance being 21 days' journey (al-Idrīsī, ed. Dozy and de Goeje, p. 52, gives 25 days' journey for the same distance). Shortly before al-Uḥmīmīn branched off on the left the canal that conducted the water to al-Faīyūm, which is known to Ibn al-Faḡh (*B. G. A.*, vi. 74) as Baḥr al-Lāḥūn and to al-Idrīsī (p. 50) as Khālīḍ al-Manḥī; this canal, which according to unanimous tradition was dug by Joseph, occurs already on the MS. map of the year 479 (1086) of Ibn Hawqāl in the Seray Library of Constantinople, N^o. 3246 (reproduction on fol. 658 of *Monumenta Africæ et Aegypti* by Youssouf Kamāl). It is the Baḥr Yūsuf of our days; on it was situated al-Bahmān. The banks of the Nile in Upper Egypt are not very completely described by the geographers; one finds repeated everywhere the assertion that the borders were cultivated without interruption between Uṣwān and al-Fuṣṭāṭ (cf. al-Iṣṭakhrī, *B. G. A.*, i. 30), but that the width of the cultivated territory varied during the river's course, dependent on the greater or lesser distance of the two mountain ranges that border the stream. Ibn Hawqāl (MS. of Constantinople, cf. supra) describes two extremely narrow strips, one between Uṣwān and Atfū (now called Gebelein) and one between Iṣnā and Armanī (now called Gebel Silāle). The curves in the course of the Nile, especially in the upper part of the Ṣaḥl, are not indicated on the maps of Iṣṭakhrī and Ibn Hawqāl. The oldest extant Arab map of the Nile, however — which is at the same time the oldest Arab map that we know of — gives clear indications that its sinuous course was a known fact. This map is found in the Strasbourg MS. of the year 428 (1037) of al-Khwarizmi's *Ṣūrat al-Ard* and has been reproduced in the edition of that text by H. v. Miik (*B. A. H. U. G.*, iii, Leipzig 1916). The representation of the Nile here is connected with the classical tradition of astronomical geography; al-Khwarizmi himself, and after him Suhayb (Ibn Serapion) and Ibn Yūnus (MS. 143 Gol. of the University Library at Leyden, where on p. 136 a special table is given of the towns lying on the banks of the Nile) give exact indications as to the longitudes and latitudes of the Nile towns, but these indications need many very uncertain corrections to allow of the reconstruction of a map, as v. Miik has tried to do for al-Khwarizmi in *Denkschr. Ak. Wiss. Wien*, li., Vienna 1916 and J. Lelewel for Ibn Yūnus in pl. ii. of the Atlas annexed to his *Géographie du Moyen-Âge*, Paris 1850. But the fact that the course of the Nile is from south to north is well known to all the Arabic sources, which often repeat the

assertion that the Nile is the only river in the world for which this is the case. Only the text of Ibn Hawqal seems to imply that the Nile reached al-Fustat from the S.E. (*B. G. A.*, ii. 96).

The Delta of the Nile begins to the north of al-Fustat, where the distance between the two mountain ranges widens, while these hills themselves become lower and pass gradually into the desert. Immediately below al-Fustat began the canal that was dug by 'Amr b. al-'As to link up the Nile with the Red Sea; this canal (Khaldj Mijr or Khaldj Amir al-Mu'minin) was made in 23 (644) according to Muhammad b. Yhsuf al-Kindi (cited by al-Maqrizi, *As-Sifat*, Bulak, ii. 143; cf. Ylsuf, ii. 466) and served for the conveyance of provisions to the Hijla until the reign of 'Umar Ibn 'Abd al-'Aziz; afterwards it was neglected and even obstructed by the order of the caliph al-Mansur, so that, in the 10th (xth) century, it ended at Dhanab al-Timsah in the lakes to the north of al-Qalam (cf. al-Mu'addi, *Muruj*, i. 147).

The two principal arms of the Nile in the Delta began about 12 miles to the north of al-Fustat (a little further than nowadays, according to Guent) and had, as now, a great number of ramifications which communicated in many ways and ended for the greater part in the big lakes or lagoons stretching behind the sea coast from west to east; these lakes were called in the Middle Ages Buhairat Maryut (behind Alexandria), B. lakk, B. al-Barallus or B. al-Buhtin and the very large B. Tinnis, which last contained a large number of islands with Tinnis as the most important. On the land tongue, where the two main arms separated was situated the town of Shubra. The western arm went as now to the town of Rashid (Rosette) after which it reached the sea; near the town of Shubra a branch parted from this arm in the direction of Alexandria, ending in the Buhairat Maryut; this branch was only filled with water in the time of the flood (a very complete survey of the different "canals" of Alexandria by P. Kahle, in *l.c.*, xii. 83 *sqq.*). The eastern arm ran, as is still the case, past Dimyati (Damiette) and reached the sea shortly afterwards; it had several branches that went to the Buhairat Tinnis, one of which continued one of the Nile mouths of antiquity. Though many sources, based on a pseudo-historical tradition, repeat after each other that there are seven Nile arms (Ibn 'Abd al-Hakam, p. 6; further al-Khwarizmi, Qadāma, Suhrah, al-Ma'addi, Ibn Zulaq), the more realistic authors (Ibn Khundādhrah, al-Yaqubi, Ibn Rusta, al-Istakhri, Ibn Hawqal, al-Idrisi) only know of the two main arms. These were linked up by a canal system which, in the Middle Ages, differed considerably from the present situation. The chief sources from which we know them are Ibn Hawqal and al-Idrisi, who give itineraries following the different branches, but as the places named in these itineraries have been identified only in part, an integral reconstruction is not yet possible (on this problem cf. R. Guent, *The Delta in the Middle Ages*, in *J.N.A.S.*, 1912, p. 941 *sqq.* and the map annexed to this article). The description in the text of Suhrah (ed. v. Mlik, *B. A. H. U. G.*, v.) has little value as an endeavour to trace back to his time (xth century) the seven legendary arms; among these arms special attention is paid to the "arm of Saradisa", which, according to tradition, was dug by Hāmān

(Ibn 'Abd al-Hakam, p. 6; cf. Guent, *loc. cit.*, p. 944 and Maspero and Wiet, *Mémoires*, in *M. I. F. A. O.*, xxxvi, 104). Al-Maqrizi has preserved a detailed description of the canal system in the province of al-Buhaira, to the east of Alexandria, from the *Kutub al-Minkahij* of Abu 'l-Hasan al-Makhrumi, who wrote in the xth century (*M. I. F. A. O.*, xvi, p. 167 *sqq.*). It seems possible that a study of the ancient maps (especially the Delta map of the Constantinople MS. of Ibn Hawqal and the maps of al-Idrisi) may be useful for a more complete reconstruction of the medieval situation.

The Nile arms have always been decisive for the administrative division of the Delta, which the sources call by the name of Asfal al-Ard or Asfal Ard Mijr. The region to the east of the eastern branch was called al-Hawf; the texts of al-Istakhri and Ibn Hawqal place al-Hawf to the north of the Nile, which may be understood in connection with the view referred to above that the Nile at al-Fustat had a direction from S.E. to N.W. The region between the two main arms was called al-Rif (a name sometimes used for the entire Delta as well) or Ba'in al-Rif, while the country to the west of the western arm was called al-Buhaira and later al-Hawf al-Qharbi, the original Hawf being called then al-Hawf al-Sharqi. The three sections were divided into *Ekres*, the limits of which were determined by the more important branches; the bigger administrative units of later times (cf. *supra*) depended likewise on the river system. The present geographical aspect of the Delta is the result of the new irrigation works that began in the sixteenth century under Muhammad 'Ali; the most conspicuous new canals are the Mahmudiya canal, dug from Fūwa on the western arm to Alexandria, the Tawfiqiya, Mansufiya and Buhairiya canals that were completed in 1890, and the Isma'iliya canal, which links up the Nile with the Suez canal.

As to the knowledge of the course of the Nile to the south of Egypt the Muhammadan geographical literature begins rather late to give information based on direct observation. At first these sources content themselves with saying that the Nile comes from the country of the Nuba; for the rest there were ancient sources of a different kind that helped to complete the geographical conception of the course of the great river. This conception involved also the origin of the Nile, covered since antiquity by a veil of mystery. The real origin of the Nile always remained unknown to the Muhammadan scholars and travellers. It is a curious fact, however, that the information on this subject which we find uniformly repeated in the Islamic sources from the treatise of al-Khwarizmi (± 830 A.D.) gives an idea of the origin of the Nile which does not correspond entirely to the data furnished by the classical sources. This conception makes the Nile emerge from the Mountains of the Moon (Djabal al-Qamar) to the south of the equator; from this mountain come ten rivers, of which the first five and the second five reach respectively two lakes lying on the same latitude; from each lake one or more rivers flow to the north where they fall into a third lake and it is from this lake that the Nile of Egypt begins. This conception is largely schematized and corresponds only partly to Ptolemy's description of the Nile sources; Ptolemy

knows only of two lakes, not lying on the same latitude and does not speak of a great number of rivers coming from the Mountains of the Moon. The third lake especially is an innovation (cf. A. v. Mill, in *Dunkelr. Ab. Wiss. Wien*, lxxix, p. 44); in later authors such as Ibn Sa'id and al-Dimashqi this third lake is called Kūrā and may be connected with some notion of Lake Chad (the same authors change the name of Djabal al-Kamar into Djabal al-Kumr which pronunciation is commented on by al-Makrizi, ed. Wiet, i, 219), but this is not probable for the time of al-Khwarizmi; the knowledge of more equatorial lakes, however, may perhaps be traced to the experiences of the two centuries despatched by Nero to explore the Nile and who reached, according to Seneca, a marshy impassable region, which has been identified with the Bahr al-Ghazal. The system described by al-Khwarizmi of the origin of the Nile is represented on the map in the Strasbourg MS. and is repeated many times after him (Ibn Khurdādhbeh, Ibn al-Fakih, Kādāma, Suhāb, al-Idrisi and later authors). Al-Mas'ūdi, in describing a map he has seen, does not speak of the third lake (*Murūj*, i, 205, 206) and Ibn Rusta (*B. G. A.*, vii, 90) says that the Nile comes from a mountain called B-b-e and also knows only two lakes. Al-Isfahāni and Ibn Hawqal on the contrary, frankly admit that the origin of the Nile is unknown, which is also illustrated by their maps. Still the system of al-Khwarizmi continued to be a geographical dogma and is found as late as al-Suyūti. Al-Khwarizmi also took over from Ptolemy a western tributary of the Nile, which comes from a lake on the equator; this river is called by Ptolemy Astapos and may perhaps be identified with the Atbara. A later development, which connects with the Nile system a river that flows to the east in the Indian Ocean, is found for the first time in al-Mas'ūdi (*Murūj*, i, 205, 206; ii, 383, 384); this view is later taken up again by Ibn Sa'id and al-Dimashqi.

Another category of notions about the origins of the Nile is connected with the Jewish and Christian traditions which make the Nile come from Paradise. Medieval cosmographical theory places Paradise in the extreme East, on the other side of the sea (cf. the maps of Beatus), so that the Nile, like the other rivers of Paradise would have to cross the sea. This state of things is actually described in an old tradition, probably of Jewish origin, of a man who went in search of the sources of the Nile and had to cross the sea, after which he reached Paradise (al-Mas'ūdi, *Murūj*, i, 268, 269 and *Akhbār al-Zamān*, MS. Vienna, fol. 156-b; al-Makrizi, *B. G. A.*, iii, 21). With this origin in Paradise is perhaps connected the view, which all sources attribute to al-Djāhiz in his lost *Kitāb al-Buldan*, that the Nile and the Mīhrān (India) have the same origin (cf. al-Mas'ūdi, *Tanbih*, *B. G. A.*, viii, 55), a view which is sarcastically criticised by al-Biruni (*India*, p. 101). To the same origin may go back the idea, often found in Muhammadan sources, that, when the Nile rises, all the rivers of the earth go down in level.

Thirdly there is a cycle of geographical conceptions which link up the western part of Africa with the river system of the Nile. Herodotus already had sought a western origin and Pliny quotes the *Lybia* of king Iuba of Mauretania, who makes the Nile rise in western Mauretania. Mar-

quardt (*Bein-Sammlung*, p. 125 sqq.) has explained this view from a corruption of the name of the river Nubal, which he identifies with the Wādī Nil and which has its origin in the Mauritanian Atlas. Traces of this western Nile are to be found in Ibn al-Fakih (*B. G. A.*, v, 87) who, following an authority of the time of the conquest, places the origin of the Nile in al-Sūs al-Akṣā. Al-Bakrī for the first time identifies this western Nile with the river Niger, although we find already in al-Mas'ūdi the knowledge of a great river, far to the south of Sijilmāsa (*Murūj*, iv, 92, 93). Al-Bakrī describes the Nile as passing through the territory of the Sūdān (ed. de Slane, p. 172) and enumerates a number of Berber and Sūdān tribes and their towns which border the river; the westernmost town is with him Sanghām, followed in eastern direction by Takrūr, Silla, Ghāns, Tūqāḥ and finally the country of Kawkaw. After al-Bakrī a similar description is given by al-Idrisi, but this last author goes back to another source than al-Bakrī when he places the mouth of the Nile in the neighbourhood of the salt town Awlīl, thus identifying the lower course of this Nile with the Senegal (Marquardt, *loc. cit.*, p. 171). Al-Idrisi likewise shows himself informed on the course of the Nile to the east of Kawkaw, though he is in doubt if Kawkaw is situated on the Nile itself or on a side arm (ed. Dozy and de Goeje, p. 11); he finally derives this western Nile from the third of the big Nile lakes mentioned above, thus connecting the Nile of the Sūdān with the Nile of Egypt in one river system. So long as the complete text of al-Bakrī is not known, we cannot ascertain if this conception goes back already to that author. Al-Idrisi's Nile course is clearly indicated on his maps of the 1st—4th section of the first climate. After him it is especially Ibn Sa'id who has described the western Nile in this way and he has been followed again by Abu 'l-Fida'. Al-Dimashqi (ed. Mehren, p. 89) gives the same representation; this last author even makes the third lake, which he calls like Ibn Sa'id the lake of Kūrā, give birth to three rivers: the Nile of the Sūdān, the Nile of Egypt, and a third river running in eastern direction towards Maḳdashū in the Zandj country on the Indian Ocean. This last river, which was also connected by al-Mas'ūdi with the Nile (cf. *supra*) is probably identical with the Webi river in Italian Somaliland.

While the geographical authors constructed in this way the Nile system with a good deal of credulity and imagination, the real knowledge of the Nile south of Egypt advanced but slowly. The southernmost point reached by the Arab conquerors was Dongola (al-Kinādi, ed. Gress, p. 12) and it was well known that this town was situated on the Nile; its latitude and longitude are given by al-Khwarizmi and Suhāb. Al-Ya'qūbī (*Tarikh*, ed. Houtuma, p. 217) knows that, in the country of the Nūba called 'Alwa, who live behind the Nūba called Mugurra, the Nile divides into various branches; this same author, however, places Siud behind 'Alwa. Al-Mas'ūdi (*Murūj*, iii, 31, 32) knows that the country of the Nūba is divided into two parts by the Nile. Ibn Hawqal (Constantinople MS.) describes two places where there are cataracts (*ḡāwāḍī*), namely the one above Uṣwān, which is the "first cataract", and one near Dongola, of which it is not certain whether the "second" or the "third" cataract is meant. About the same time,

however, a traveller named Ibn Sulaim al-Uswānī wrote a valuable description of the middle Nile course, which has been preserved in al-Maḳrīzī's *Khitaṭ* (ed. Wiet, in *M.I.F.A.O.*, xvi, 252-199). This Ibn Sulaim, on whom al-Maḳrīzī's *Khitaṭ al-Muḳarrā* gives some information (cf. Quatremère, *Mémoires sur l'Égypte*, II.), had been sent by the Fatimid general Ḍawhar to the king of the Nūba on a diplomatic errand, and was the author of a *Kitāb al-Jihād al-Nūba wa 'l-Muḳarrā wa 'l-Aḥwā wa 'l-Buḡa wa 'l-Nil*, in which a detailed description is given of these countries. He says that the region between Uswān and Dangkala is inhabited in the north by the Maris and more to the south by the Muḳarra; the northern part is barren and the great cataracts are correctly described. The country between Dangkala and 'Alwa (this last spot is the region of Khartūm) is described as highly flourishing; the big winding of the Nile here is perfectly known to Ibn Sulaim. The Nile "is divided" then into seven rivers; from the description it is clear that the northern one of these rivers is the Athara, coming from the east; further south the "White Nile" and the "Green Nile" join near the capital of 'Alwa and the "Green Nile", which comes from the east, is again the result of four rivers, one of which comes, as the author thinks, from the country of the Mahagha, and one from the country of the Zanj; this last, incorrect, statement may have been influenced by learned tradition. Between the "White Nile" and the "Green Nile" there stretches a large island (*ḡarḡa*, as it is still called on our maps), which has no limits in the south. This is about the only description in mediæval Islamic literature that shows how far the knowledge of the middle Nile really went. Only little of it seems to have reached the systematic geographic treatises; al-Idrīsī, e.g., describes this part of the river in a way which only shows that he did not make good use of the inadequate sources that were at his disposal.

The exploration of the upper Nile and its sources since the end of the xviiith century was the work of European travellers. They discovered, or perhaps re-discovered, the real big Nile lakes and identified the Rwenzori mountain range with the Moon Mountains, the name of which was found again by the explorer Speke in the name of the Unyamwezi country, the "country of the moon". A part of the exploration of the Nile was due, however, also to Egyptian initiative. The well-known military expedition of 1820-1822 under Muḥammad 'Alī's son Ismā'īl Pasha, during which the city of Khartūm was founded, established Egyptian domination in the Egyptian Sūdān and opened the way for further scientific exploration. In the years 1839-1842 three Egyptian expeditions went up the White Nile, and during the reign of Ismā'īl Pasha the Egyptian government repeatedly tried to cleanse the swamps of the White Nile above Sobat from the masses of vegetation (*ḡadd*) which hindered navigation.

The yearly flood of the Nile (*ḡayḡa*, *ḡayḡ*, *ḡayḡān*) is the phenomenon to which Egypt has been at all times indebted for its fertility and prosperity, as it provides, in compensation for the almost complete lack of rain in the country, a natural and almost regular irrigation for the lands on its borders and in the delta. It is the foundation of all cultural life and justifies entirely the attribute *ḡayḡān* so often given to the river. On the same

account the Nile is considered, as well as the Euphrates, as a "believing" river (al-Maḳrīzī, ed. Wiet, *M.I.F.A.O.*, xxx, 218). The flood deeply influences the private and public life of villagers and townsfolk alike, and already the oldest Muhammadan traditions about Egypt reflect the feelings of wonder and thankfulness that animated the people of Egypt before them (Ibn 'Abd al-Hakam, p. 109, 205). Having reached its lowest level towards the end of May at Assuan and in the middle of June at Cairo, the Nile begins to rise again, reaching its highest level in the beginning of September at Assuan and in the beginning of October at Cairo. This regularity brings about a similar regularity in the methods of irrigation in the several parts of Egypt, in the times of the sowing and reaping of the different crops and consequently in the modes of levying the land taxes (e.g. al-Maḳrīzī, ed. Bulaḡ, i, 270, which text comes from Ibn Ḥawḡal); all the dates referring to these occupations have always continued to be fixed according to the Coptic solar calendar.

There is much discussion in the literary sources about the causes of the flood. The most ancient belief, which at the same time corresponds best with reality, was that the flood is caused by heavy rainfalls in the countries where the Nile and its tributaries have their origin. This is expressed in a somewhat exaggerated way in a tradition that goes back to 'Abd Allāh b. 'Amr b. al-'As, according to which all the rivers of the world contribute, by divine order, with their waters to the flood of the Nile (Ibn 'Abd al-Hakam, *loc. cit.*, and p. 149). This implies the belief that all other rivers fall while the Nile rises, but, on the other hand, it is sometimes observed that other rivers also show the same phenomenon of rising and falling, especially the Indus, and this again is considered as a proof of the common origin of the two rivers (al-Maḳrīzī, ed. Wiet, *M.I.F.A.O.*, xxx, 227). There are, however, other views, which attribute the cause of the flood to the movement of the sea, or to the effect of the winds; these views have been inherited from sources of the pre-Muhammadan period, among others from the treatise on the flood of the Nile attributed to Aristotle, and they are discussed and refuted at length in a special chapter of al-Maḳrīzī's *Khitaṭ* (*M.I.F.A.O.*, xxx, 230-199).

Up to the sixth century the irrigation system of Egypt continued along the same lines. When the flood begins all the outlets on both sides of the main stream and its principal arms in the Delta are closed, to be opened again about the time of the highest flood, when the water level has reached the necessary height according to the different places. The most important of these yearly "openings" was that of the canal (Khalidj) of Cairo, which, until recent times, remained a public festival. In Cairo the flood is complete (*ḡayḡ al-Nil*), when it has reached 16 *ḡayḡ*, generally in the first decade of the Coptic month of Mesore (about the midst of August), and this was proclaimed everywhere in the town (cf. the description by Lane, *Manners and Customs*, II, 287-199, and E. Littmann, *Ein arabischer Text über die Nilüberschwemmung*, *Festschrift Oppenheim*, Berlin 1933, p. 66-199, for older times, al-Kalkashandī, III, 316).

The height of the level of the Nile has been measured since older times by the Nilometers (cf. *ḡayḡān*). Many of these *ḡayḡān* are recorded by the

sources, the southernmost being that of 'Alwa and the most celebrated the one of al-Fustāt, constructed by Usama b. Zaid al-Tanūkhī about 92 (711) and often restored afterwards (A complete survey of all the *sūfiyās* is given in Omar Toussein, *Mémoire sur l'Histoire du Nil*, II, 285 *sqq.*). These instruments generally were made of stone, with marks upon them, but they were sometimes of other material (e.g. a fig-tree near the monastery of Safanāf in Nubia; cf. Everett, *Cherches*, p. 262). The level necessary for the operations of irrigation varied in different places; in the capital the average level had to be 16 *dhira'* above the lowest level of the Nile; if the flood surpassed 18 *dhira'* it became dangerous, while a flood not exceeding 12 *dhira'* meant famine (cf. e.g. al-Idrīsī, p. 145, 146). In the history of Egypt the years after 444 (1052), and especially the year 451 (1059), are notorious for the famine and disaster caused by the failure or practical failure of the flood. A historical account of the flood from the years 152—1296 (759—1879) is given on p. 454 *sqq.* of Omar Toussein, *Mémoire sur l'Histoire du Nil*, II.
